Interest.—"An American Almanac and Treasury of Facts," by A. R. Spofford, Librarian of Congress, contains much that is valuable for reference. We extract a few lines which express very forcibly the accumulations of interest at low and high rates: "One of the causes of bankruptcy is that so few persons properly estimate the difference between a high and low rate of interest, and therefore often borrow money at a ruinous rate that no legitimate business can stand. Very few have figured out the difference between 6 and 8 per cent. One dollar loaned for 100 years, at 6 per cent., with the interest collected annually and added to the principal, will amount to $340. At 8 per cent. it amounts to $2203, or nearly seven times as much. At 3 per cent., the usual rate of interest in England, it amounts to $19.25; whereas at 10 per cent., which has been a very common rate in the United States, it is $13,809, or about 700 times as much. At 12 per cent. it amounts to $84,075, or more than 4000 times as much. At 18 per cent. it amounts to $15,145,807. At 24 per cent., which we sometimes hear talked of, it reaches the enormous sum of $2,551,799,404. One hundred dollars borrowed at 6 per cent., with the interest compounded annually, will amount to $1842 in 50 years, while the same $100 borrowed at 8 per cent. will amount to $4690 in 50 years. One thousand dollars at 10 per cent., compounded, will run up to $117,390 in 50 years."

Sundry memoranda and statements of my property and business for use of myself and executors. Also memoranda of business of my father and sisters, more or less under my care, and observation. Also of my wifes separate property.
