LETTER OF TRANSMITTAL

COMMONWEALTH OF KENTUCKY
DEPARTMENT OF EDUCATION
FRANKFORT

To the Governor and the
General Assembly of the
Commonwealth of Kentucky:

In compliance with Sections 57.140 and 156.250 of the Kentucky Revised Statutes, I submit herewith the report of the Superintendent of Public Instruction for the biennium ended June 30, 1947.

Part 1 represents the Report of the Superintendent of Public Instruction and Part 2 contains statistical reports concerning personnel and finance from the standpoint of the state at large and from individual districts of the state. Your attention is called to the Introduction, which points out a few of the major accomplishments of the biennium and a few major needs for the elementary and secondary educational programs in Kentucky.

Respectfully submitted,

JOHN FRED WILLIAMS
Superintendent of Public Instruction

January 1, 1948

PART I

REPORT OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION

INTRODUCTION

This volume contains the biennial report of the Superintendent of Public Instruction for the school years 1945-46 and 1946-47. In it are extensive reports from the bureaus and divisions of the Department of Education. Information is provided in regard to the activities, developments and needs in the public, elementary and secondary schools of the Commonwealth. In this statement an attempt will be made to point out a few of the major accomplishments of the biennium which are considered to have the greatest significance for the State's total program of elementary and secondary education, and a few major needs which are considered to require immediate attention will be outlined.

The two years covered by this report have been fruitful ones for public education. Several outstanding developments have taken place, each of which should make an important contribution to the improvement of the total program of the common schools.

1. **The minimum school term has been changed from seven to eight months.** The year 1946 marked the beginning of a period in which every child in the State is guaranteed a school term of at least eight months. All school districts have complied with this minimum term requirement. All independent school districts, with the exception of one, and fifty-nine county school districts have gone beyond the minimum requirement and will operate their schools on at least a nine months term basis for the school year 1947-48.

2. **The maximum tax rate has been set at $1.50 for all school districts.** This represented a change in the maximum tax rate for all county school districts from 75c to $1.50 and provided increases in the maximum tax rates for all other school districts, except districts embracing cities of the third and fourth classes. As a result, school districts of the State have increased financial support from local sources substantially during the last year of the biennium covered by this report.

3. **There has been a substantial increase in State aid to all levels of public education.** The common school fund was increased in 1946 from $15,000,000.00 to $18,500,000.00 for 1946-47, to $19,501,250.00 for 1947-48. Ninety per cent of the common school fund constitutes the per capita fund and 10% is designated as an equalization fund.

   Per Capita Fund. The per capita appropriation was increased in 1946 from $13,500,000.00 to $16,650,000.00 for 1946-47, and to $17,551,125.00 for 1947-48, making possible a distribution of $24.40 per census pupil in 1946-47 and $25.66 in 1947-48.

   Equalization Fund. The equalization appropriation was increased in 1946 from $1,500,000.00 to $1,850,000.00 for 1946-47, to $1,950,-125.00 for 1947-48.

4. **Teachers' salaries have been increased.** During the school year 1944-45, the school year immediately preceding the period of this report, there was expended the sum of $21,950,094.65 for teachers' salaries. Reports for the year ending June 30, 1947, show an expenditure for teachers' salaries of $28,112,014.22, an increase of $6,161,919.57 over the last year of the previous biennium. Since the increase in the State's common school fund during this period was only $3,500,000.00, it is obvious that local school boards have made substantial increases in teachers' salaries from local sources.

5. **Many approaches have been made to the problem of improving instruction.** Fifty-seven county school systems and twelve independent school systems are now employing ninety persons as helping teachers and supervisors, and it is believed that local elementary school supervision has become firmly established. Provision has been made for the reorganization of the program of instruction in the small elementary schools calling for the elimination of the traditional program of alternating grades 5 and 6 and grades 7 and 8. Greater emphasis has been given to health instruction, health services, and to plant facilities conducive to more healthful living at school. Greater emphasis has been given to safety, driver education, resource-use education, audio visual aids, air age education, and to creative expression through art, music, and poetry. During 1946-47 each high school in the state, through its principal and faculty, studied its pupil population and community and developed a school philosophy to serve as a guide for the improvement of the program of the school.

6. **Studies have been made to account for each individual in the common school census, to identify the type of school each census pupil is enrolled in, and to determine the extent and causes of non-enrollment.** This information is helpful in planning a more effective school program.

7. **A program of teacher recruitment has been organized.** It has stimulated much interest on the part of the public in the selection of young people of ability and caliber for teachers, and is the beginning of a program of selective recruitment for the profession.

These and other accomplishments of recent years will contribute to the improvement of the common schools and to the welfare of the entire citizenry; but, in the long view, they are, at best, limited steps in the development of an adequate program of education for all Kentucky's children. Before this goal can be attained, it will be necessary to revise the state constitution, and to secure Federal aid for the entire program of the common schools.

In the meantime, however, there are many problems which can be dealt with from our state and local resources, and within the framework of our present constitution. These problems should have immediate attention.

1. **Teachers' salaries should have immediate attention.** During the last year covered by this report only 12,964 of Kentucky's 18,164 public school teachers met minimum training requirements. The remainder were individuals teaching on an emergency basis. Higher annual salaries beckon to these certificated teachers from every state bordering Kentucky. Emergency teachers and high school graduates are not enrolling in teacher training courses in higher institutions in numbers sufficient to meet the present and future need. To retain trained teachers and to encourage young people to prepare for teaching, immediate steps should be taken to provide more attractive salaries.

2. **Every child in Kentucky should be guaranteed the opportunity to attend school for a period of at least nine months each year.** Studies in the Department of Education show a close correlation between the school terms and the percentage of children who fail to be promoted. Every child is entitled to a school term most likely to make possible his normal progress year by year.

3. **Provision should be made for a strong Department of Education.** Kentucky statutes grant considerable authority over the common schools to the Department of Education; provision should be made for a staff adequate to discharge the responsibility conferred by law. Intelligent guidance and strong leadership at the state level are essential to the development of an effective state program of education; there should be made available a single appropriation for the entire Department of Education, sufficient to enable the Superintendent of Public Instruction to retain and secure outstanding educational leaders on the staff of the Department of Education. State Departments of Education can perform their functions more effectively when organized on a functional basis which calls for the grouping of related activities into a few major divisions; authority should be conferred upon the Superintendent of Public Instruction and the State Board of Education to abolish the various divisions of the Department established by law and by State Board order; and to organize the activities of the Department of Education on a functional basis into three or four divisions each of which may be headed by a deputy of the Superintendent of Public Instruction.

4. **Permission should be given to the State Board of Education to require a local board of education upon recommendation of the Superintendent of Public Instruction to employ a person with special training in business management, budgetary practices, and accounting as business manager to have charge of the business and financial affairs of the board under the direction of the local superintendent and board in accordance with regulations of the State Board of Education.**

5. **Provisions should be made for developing an equitable assessment of taxable property in the State.**

6. **Emphasis should be given to the improvement of instruction under the direction of the bureau of instruction.** The staff of this

bureau should include sufficient personnel, adequately trained, to provide to local school systems assistance in cooperative curriculum construction activities, counseling, testing, and guidance programs, and in improving methods of instruction in both the elementary and secondary schools.

These and other major needs should be met if the desire of the people for a better educational program for their children is to be fulfilled.

JOHN FRED WILLIAMS
Superintendent of Public Instruction

TEACHERS' RETIREMENT SYSTEM

This is a condensed report covering the period from July 1, 1945, to July 1, 1947. Please be referred to the Sixth Annual Report and the Seventh Annual Report of the Teachers' Retirement System of the State of Kentucky for additional tables and details.

The most important event in the life of the Teachers' Retirement System during the first year of this biennium was the enactment of the amendments relating to percentage of contribution by the members, definition of subsequent service salary, out-of-state service credit, increase in the allowance to at least $10.00 per year for each year of service up to 30 years, and new formula for the calculation of the retirement allowance (161.220 to 161.710, KRS. Acts 1946, c. 111 secs. 1, 2, 3, 4, 5 and c. 102).

Operation under the amended Retirement Act has apparently been much more satisfactory to the teachers of the Commonwealth, and there is a general feeling of appreciation and gratitude on the part of the profession.

The amendments grew out of suggestions and recommendations made by the teachers of the state, subject to some practical modification by the Actuary of the System. Since teachers had a voice and part in initiating the changes, the amendments have been well received and interest in the Retirement System greatly increased.

During the year 1945-46 the work in the office, which had been retarded by the war, was brought up to date. Work was handled currently for 1946-47 and is up to date.

On the part of the General Assembly there appeared to be unanimous consent in favor of amending the Retirement Law and in favor of a special appropriation of $106,000.00 per year for the biennium to meet immediate obligations incident to the amendments.

Two-thirds of the living retired teachers received increases in their benefits under Section 161.620, paragraph 3. All retirants receiving less than $300.00 per year for 30 years of service credits were immediately increased to $300.00 (July 1, 1946). Members retiring for disability were assisted in like proportion. This annual increase for teachers already retired was $36,728.32, which is an average increase for those receiving increases of $124.08.

Section 161.620, paragraph 1, seems to operate as expected. It is a great help in relieving the pressure to stay active to age 70. The annual increase for the 136 members retired July 1, 1946, was $12,903.08. The average for those receiving increases was $120.59. Upon the passage of the amendment, effort was made to promulgate an understanding of the amended sections of the law and their application. Experienced teachers in small numbers and teachers who have gone to other states are gradually returning to Kentucky. We are grateful to a sympathetic General Assembly, its leaders, and to the Chief Executive, Governor Willis, for signing the Act into law. The budget request for 1945-46 was $972,625.00. We received $823,000.00 in the appropriation for that year, a reduction of $149,625.00. This decrease augmented the deficiency in the Allowance Reserve Fund to a point in excess of one million dollars.

Since July 1, 1946, was the end of a five-year period since the last evaluation, an actuarial investigation of the system was made. Also, an investigation into the cost to the Retirement System and the teachers of the new amendments enacted and referred to above. Complete records of this matter and other financial statements are on file in the Retirement Office, which is located in Room 9 of the State Capitol Building. The Actuary of the Retirement System warned that steps should be taken under which the state would meet more fully its obligation for prior service.

Since there has been a more recent actuarial evaluation and for lack of space, it is assumed that the reader will be better served by omitting financial statements, statistics, etc. for the year 1945-46, and to present in this report the more recent ones for the year 1946-47.

The Teachers' Reirement System of the State of Kentucky was seven years old July 1, 1947. Seventeen states of the Union have younger systems; thirty states older systems. The Kentucky Retirement Law provides for one of the best and most modern retirement systems, and provides retirement allowances in the amount of somewhat more than the median for the forty-eight states, being sixteenth from the top of the list.

The present problem of the Kentucky Teachers' Retirement System is to secure such appropriations as will bring each of its four funds to a full reserve basis, and which will make the Retirement System actuarially sound. Continuous effort has been made in this direction, and it appears at this time that sentiment for doing so is on the increase.

There are seven members comprising the Retirement Board, three of whom are ex officio, three of whom are professional, and one a lay member. The names of those serving during 1946-47 are as follows:

Miss Mary J. Maguire, Chairman, Teacher Henry Clay High School, Lexington

Mr. L. C. Curry, Vice-Chairman, Superintendent Bowling Green Public Schools, Bowling Green

Mr. Edward L. Cawood, Lay member, Banker, Harlan

Mr. William S. Milburn,* Principal Louisville Male High School, Louisville

Hon. J. F. Williams, Superintendent of Public Instruction, Ex officio member, Frankfort

Hon. T. W. Vinson, State Treasurer, Ex officio member, Frankfort

Hon. Eldon S. Dummit, Attorney General, Ex officio member, Frankfort

Every member on the Retirement Board has taken an interest in the problems of the Retirement System and in the administration of the Retirement Law. They serve without pay, but are reimbursed for actual and necessary expenses incurred in performing their respective duties.

The office staff consists of twelve members under the direction of the Executive Secretary, and including him. Salaries are determined in accordance with the State salary schedule administered by the Division of Personnel. Cost of administration is limited by Section 161.420 (1), KRS., and a budget adopted by the Board of Trustees. Dr. Edward K.

* Mr. William S. Milburn was elected by the Board to fill the unexpired term of Mr. Morton Walker who resigned November 1, 1946.

Martin, M. D., physician and surgeon, is Medical Director of the Retirement System.

Since July 1, 1940, a total of 40,392 individuals have served as teachers in the state of Kentucky, and at this time 32,111 have an equity of more or less value in the funds of the Retirement System. Of this number 19,414 paid contributions during the current year ended June 30, 1947. The amount of prior service held by 17,473 members is 185,492.7 years, an average of 10.6. There are 6,457 who have filed enrollment Forms A-2 and who do not have prior service credit. On June 30, 1947, there were 8,181 members who had not filed enrollment forms. Many of these are not teaching and will not teach again. Those who continue in the service will file enrollment forms.

TABLE I. Membership 1940-47

	SERVICE RECORDS						Members Without Service Records		Totals All Members	
	With Prior Service		Without Prior Service		Total with Records Filed					
Members		23,154		7,749		30,903		9,489		40,392
Withdrawn	4,713		1,283		5,996		1,276		7,272	
Deceased	257		9		266		32		298	
Retired	711	5,681	-------	1,292	711	6,973	-------	1,308	711	8,281
TOTAL as of June 30, 1947		17,473		6,457		23,930		8,181		32,111

On June 30, 1947, the balance in the Teachers' Savings Fund was $4,069,658.78; the balance in the State Accumulation Fund $4,069,652.71; and the balance in the Guarantee Fund $312,812.26. These three funds are actuarially sound and on a full reserve basis.

The balance in the Allowance Reserve Fund was $55,948.54, leaving the deficit in this fund at $1,976,183.80. This deficit was further increased by reason of the retirement of 117 members as of July 1, 1947.

The budget request for appropriation for the year 1946-47 was $1,170,000.00 per year plus $106,000.00 to take care of immediate requirements of the amendments previously referred to. Upon the basis of this total request of $1,276,000.00, the Retirement System received $956,000.00 for the year 1946-47, a decrease of $320,000.00 for the year. These decreases from biennium to biennium and from year to year are rapidly reducing the Retirement System to an unsound position. It will be noted that all of the difficulty is in the Allowance Reserve Fund, the fund from which retired teachers' allowances are paid.

It is estimated that under this appropriation that there will be at the close of next year a deficit in the amount necessary to match teachers' contributions of $84,212.22, exclusive of any increase paid in by reason of a retroactive appropriation if one is made.

The balance in the Allowance Reserve Fund will be consumed entirely and a deficit in that fund is anticipated to be $95,021.88 by the end of the succeeding year.

These points are mentioned because of their vital bearing upon the well-being of the Retirement System and upon its ability to serve the retired and active teachers of the Commonwealth. The total deficiency as of July 1, 1947, in the Allowance Reserve Fund is $2,439,606.64.

It is recommended by the Actuary that if this deficiency cannot be made up by special appropriation, that it be amortized at the rate of $450,250.00 per year until the whole amount of the deficiency is liquidated. As members retire the obligation for prior service becomes payable as a part of the Retirement Allowance, and, therefore, all of the $450,250.00 cannot be used to liquidate the deficiency; however the sum total of the state's obligation for prior service will be reduced by the full amount of the $450,250.00 per year if appropriated.

From the actuarial study as of December 31, 1946, the present worth of the entire obligation for prior service not already paid was $7,840,-588.67; of this $1,162,693.12 is for members now teaching, but also now eligible to retire. The amount for retired teachers is stated above.

It follows then that any appropriation for the Retirement System should consist of two principal parts, (1) the amount necessary to match the teachers' contributions as they are paid in, and (2) the $450,250.00 to amortize the deficiency in the Allowance Reserve Fund.

Financial statements, general balance sheet, and evaluation balance sheet are included in this report. It is not practical to include all statistical tables and financial statements, but these will be found in the annual reports of the Retirement System, and to which the reader is respectfully referred.

For the year 1945-46, 121 teachers were retired, and for the year 1946-47, 165 teachers were retired. Including those retired July 1, 1947, the total is 828. If you multiply the retirement allowance granted each by the life expectancy of those now living, the total cost appears to be $2,741,912.50. Most of this amount is by reason of the prior service of the retirants. Of the number living, which is 719, the modal age is 72, and the greatest age is 88. Eighty of our retired teachers are 70 years old. Three hundred sixty-seven are 71 years old or older, and 272 are less than 70 years old. Reference is made to Table Xa.

It should be borne in mind that the obligations of the Retirement System will increase rapidly as soon as younger qualified teachers are available and that our experience up to this time cannot be used as a guide to the future. Total of retirement benefits paid to July 1, 1947, amount to only $598,929.48. This amount will increase rapidly, and it is incumbent upon all concerned to provide for the needs of the Retirement System before the obligation becomes so large that it cannot be met with convenience. The law is very clear and specific as to the meeting of these requirements by the proper contribution on the part of the state (employer), but up to this time the state has not been able to provide the funds anticipated by the law. The teachers have made their contributions regularly and in the proper amount as provided by the law, and have by so doing fulfilled their part of the obligation placed upon them by the Retirement Law.

For the 117 teachers retired at the close of the year 1946-47, the average age was 65.8 years. The average prior service 25.7 years, average subsequent service 5.1 years; the average prior service salary $992.90, and

the average subsequent service salary $1,215.30. This average does not include salary in excess of $2400.00.

Table Xa. Living Retired Teachers by One-Year Intervals Attained Age at July 1, 1947

Attained Age	Number Living	Aggregate Annuity	Needed to Pay Annuity of $1.00	Cost of Life Expectancy

84	3	973.96	5.90105	5,747.39
85	1	300.00	5.61416	1,684.25
86	1	630.00	5.33473	3,360.88
87	3	900.00	5.06292	4,556.63
88	1	300.00	4.79888	1,439.66
	719	$259,630.24		$2,741,912.50

For this class of retired teachers, the average accumulated contributions was $313.73, the average retirement allowance $387.40, and the reserve needed to pay each one during his life expectancy $4,588.35, an aggregate of $536,837.00.

In this group of 117, two received the minimum of $100.00 for six years of service, forty-two received $300.00, the minimum for thirty years of service, and seven the present maximum of $787.20. Approximately 18% of the total, including those retired for disability, will receive $600.00 or more as a retirement allowance. When thinking of the average retirement allowance, we should note that it is pulled down by those who have not entirely made teaching their life work. Of this class of 117, thirty-five taught less than thirty years; five less than twenty years; and two less than ten years.

Each year of membership service will increase the amount payable to the retiring teacher, and next year the maximum will be $826.86, based upon thirty years of prior service, seven years of subsequent service, age seventy, and maximum salary. Increases in salary are reflected in the retirement allowance, provided the increase does not bring the salary to more than $2,400.00.

For those teachers now in service in Kentucky and who will at some time retire, and including those already retired, it will require in excess of $41,000,000.00 to pay their retirement allowances according to the report of the Actuary dated December 31, 1946. The assets of the Retirement System July 1, 1947, amounted to $8,541,215.41.

The Actuary of the Retirement System is Mr. L. C. Cortright, Springfield, Illinois, formerly of Louisville, and who is now Executive Secretary and Actuary for the State Employees Retirement System of Illinois and for the Judges Retirement System of the State of Illinois. Mr. Cortright serves these two organizations and also several other retirement systems in an advisory capacity. His complete report on the Kentucky Retirement System is included in our Seventh Annual Report. We quote his conclusion to the investigation made as of December 31, 1946.

"Conclusion

"In the foregoing report of the Actuarial Investigation into the affairs of the Teachers' Retirement System of Kentucky your actuary has outlined factually the condition of the System as of December 31, 1946, and views with alarm the financial difficulties that are confronting the Board of Trustees of the System. It is hoped that the report will merit the serious consideration of the Board of Trustees to the end that proper corrective measures will be undertaken without undue delay.

"Respectfully submitted,

"(Signed) L. C. Cortright
Actuary"

Each year since July 1, 1940, the Auditor of the Commonwealth of Kentucky has audited the records and statements of the Retirement System as provided under Section 43.050 and has filed his report with the Governor of the Commonwealth and in the Retirement Office. Reference is made thereto. Lack of space prevents the inclusion of his report; however it is included in full in the Seventh Annual Report of the Board of Trustees of the Teachers' Retirement System.

BUREAU OF ADMINISTRATION

Some accomplishments of the Bureau of Administration for the biennium ended June 30, 1947.

Reversion of Independent School Districts

During the last two years conferences were held with fifteeen to twenty boards of education concerning the possibilities and procedures to be followed in making these independent districts a part of the county school system. Partial results of these conferences were reversions of ten independent school districts to the county school system. The total work of making them a part of the several county school districts involved other divisions of the Department of Education in planning the educational program for the district after the reversion of the independent district.

The independent districts which became a part of the county school systems were:

Cadiz (Trigg County)
Eddyville (Lyon County)
Grand Rivers (Livingston County)
Guthrie (Todd County)
Kuttawa (Lyon County)
McVeigh (Pike County)
Middleburg (Casey County)
Moreland (Lincoln County)
Nicholasville (Jessamine County)
Upton (Hardin County)

The reversion of five of these independent districts made it possible to have a county-wide educational program with no independent districts within the county school district. In Lyon County, Eddyville and Kuttawa became a part of the county district at the same time. The result of these reversions places the board of education in the position of furnishing the same educational advantages for all the children of the district.

School Transportation

During the last biennium school transportation has been considerably handicapped because of the lack of school buses. At present (September 15) the supply is not sufficient to meet requirements. Many districts have had to use automobiles and in some instances use vehicles that do not meet safe transportation requirements, in order to provide transportation for those who could not have schooling otherwise. During the last year the improvement of rural roads, as well as the increased desire on the part of the public for better educational facilities, has increased the demand for school transportation.

The table submitted below is a typical exhibit of the increased demand for school transportation during the past three years.

Table I

	School Year	
	1943-44	1946-47
Number transported	126,258	137,513
Number vehicles	1,608	1,809
Daily miles bus traveled	84,874	88,736
Total annual cost	$1,902,064	$2,446,624

In December 1946, the State Board of Education revised the standards for school buses and regulations for operating these school buses to conform to the national standards. The national standards were revised at the national conference held in Jackson Mills, West Virginia. This conference revised the national standards adopted in 1939. A bulletin entitled "Standards for School Buses, Laws and Regulations for Their Operation", published by the Department of Education in December 1946, is Volume XIV, No. 10, of the Educational Bulletins published by the State Board of Education. This publication contains the revised standards and rules and regulations for school buses.

School Laws

Laws passed by the 1946 session of the Legislature relating to schools were published in the revised edition of the Kentucky School Laws. This revised edition of the school laws was published in May 1946. About twenty-five court decisions interpreting the school laws were annotated and included in the new edition of the school laws under the several sections of school law which they interpret. The index to the 1946 edition of the school laws is a revision of the index to the 1942 edition and provides more ready reference to the different sections of these laws.

EDUCATIONAL BULLETINS

The twenty-four issues of the Department bulletins for the biennium from January 1, 1946, to January 1, 1948, were as follows:

1946	January	The Administration of Vocational Rehabilitation in Kentucky
1946	February	Official Manual of Instruction for the Kentucky Uniform Financial Accounting System
1946	March	Procuring Teachers for 1946-47
1946	April	Kentucky High Schools, 1945-46
1946	May	Kentucky Common School Laws, 1946
1946	June	Getting the Primary Reading Program Under Way
1946	July	Status of Health and Physical Education in Secondary Schools of Kentucky
1946	August	Handbook of Audio-Visual Materials for Kentucky Schools
1946	September	School-Community Health Education Service

1946	October	The Appropriation, Distribution and Administration of State's Equalization Fund
1946	November	Public School Directory, 1946-47
1946	December	Standards for School Buses, Laws and Regulations for Their Operation
1947	January	Thoughts Have Wings
1947	February	Evaluating the Community School
1947	March	Kentucky High Schools, 1947-48
1947	April	Financial Support, Financial Ability, and Inequalities Existing in Various School Systems in Kentucky
1947	May	Getting the Health and Physical Education Program Under Way in the Elementary School
1947	June	Getting the Intermediate Reading Program Under Way
1947	July	Future Farmers of America in Kentucky's Program of Vocational Agriculture
1947	August	Building the Program for the One-Teacher School
1947	September	Education on the March
1947	October	The Rehabilitation of the Disabled Civilian
1947	November	Public School Directory, 1947-48
1947	December	Report of Superintendent of Public Instruction

School Buildings and Grounds

A study of the school building situation indicates that during the past two years there has been a constantly increasing need for new buildings, new additions and repair of old buildings. Because of the increasing costs very little of this needed building and repair has been done. The increasing enrollment throughout the state is creating a greater need for new buildings and additions to old ones. This problem is partially being solved in a number of districts by temporary classrooms, and portable buildings.

During the past two years plans for building construction, repairs and additions to old buildings have been approved or are practically ready for approval for 201 projects. Boards of education have applied for federal aid to pay for plans for fifty-one of these projects. The estimated cost of these 201 projects is $16,232,000. We believe this estimation is low. Our belief is based upon the fact that a few projects that have been erected have cost from ten to twenty-five per cent more than architects had estimated.

The building projects consist of thirty-one elementary school projects, nineteen high school projects, twenty-three projects consisting of both elementary and high school, eight shops, two canneries, ten lunch rooms, five heating systems, thirty-three projects consisting of four rooms or less, eighteen gymnasiums, twenty-six additions, seven alterations, six toilets, two garages, two vocational buildings, two office buildings, one auditorium, one band room, one stadium, two complete remodeling projects, one complete re-wiring project, and one school site.

Since July 1, to date (September 15), the Department of Education had either approved, or has in process of approval, building projects, additions and repairs which architects estimate will cost about $2,000,000. The building plans and specifications, referred to above, do not include nearly all of the buildings and repairs needed.

Plant Extensions and Cost of Extensions in County School Districts

There were erected 107 new buildings during the past year at a cost of $588,322. These new buildings consisted mostly of one-room schools, lunch rooms, canneries, cafeterias, toilets ,etc. There were 34 additions at a cost of $289,686; repairs and remodeling of 98 buildings at a cost of $82,209. There was expended for new sites $150,686. This makes a total expenditure of $1,110,903 during the last school year for total repairs, additions, sites and small buildings throughout the 120 county school districts.

The annual reports of the superintendents of the various county districts show these projects and expenditures in detail to be as follows:

STATE EDUCATIONAL AGENCY FOR SURPLUS PROPERTY

On the 28th of December, 1945, the Governor did by an Executive Order create a State Educational Agency for Surplus Property. The duties of this Agency, as outlined in this Order, were to ascertain, determine and make provisions for the necessary expenses of the Agency, its agents and employees, and to cooperate with Federal agencies in the distribution of property available under the Surplus Property Administration to the educational agencies entitled thereto.

On the 29th of December, 1945, the Agency had its first meeting and determined plans for carrying on the work as outlined in the Executive Order. This property was to be distributed to two hundred and fifty-six county and independent school districts, the University of Kentucky, five teachers' colleges and other State institutions, as well as all parochial, private and non-profit educational institutions. Personnel was employed and the work begun immediately.

The 1946 session of the Legislature made two appropriations. One appropriation was for $7,500 for the period ending June 30, 1946, and $20,000 for the period ending June 30, 1947.

From the creation of the Agency to June 30, 1946, personnel was secured and the Division of Surplus Property was organized as a division of the Department of Education. During this period, classification of institutions entitled to secure surplus property was made in accordance with rules and regulations of the Federal agencies and some property was distributed. At the beginning of the period July 1, 1946, the Agency's personnel was well organized, plans were under way and property available was being allocated. By the close of the year, June 30, 1947, property had been secured and distributed as indicated elsewhere in this report.

No funds were appropriated for the regular recurring expenses of the agency after June 30, 1947. It was found at this time that much property was available and would continue to become available at intervals during the next school year. For this reason, a request was made to the Governor and he did make available $10,000 from his Emergency Fund for regular recurring expenses of the Agency for the school year 1947-48. It is estimated that this sum will be sufficient for said expenses until the Legislature meets in 1948.

There is given below a summary statement of the accomplishments of this Agency during its existence from December 29, 1945, to September, 1947:

I. Property Received by Donation Under Procurement Regulation 7-316, War Department

	Acquisition Cost	Description
U. S. Army Signal Corps (Excess)	$ 396,604.08	Radio parts, tubes, tools, radio and radar transmitting and receiving sets, generators, power units, motors, motion picture projectors, test equipment, public address systems, telephone equipment
U. S. Army Signal Corps (Avon-Salvage)	43,420.12	
U. S. Navy Electronics	358,071.50	
U. S. Naval Ammunition Depot, Crane, Indiana	41,847.94	Machine shop trailers (3), electrical devices, auto maintenance tools
Oak Ridge, Tennessee	24,203.98	Laboratory equipment
Baton Rouge Engineer Depot	7,200.00	Motor generator sets
Terre Haute Ordnance Depot	26,000.00	Radial diesel engines
Sharonville Engineer Depot	14,606.20	Small hand and shop tools
U. S. District Engineers	18,365.00	Welding equipment, tractors, power woodworking equipment, hand tools, tables, transits and levels
Chemical Warfare	14,750.00	Garden sprayers
Indiana Arsenal	16,043.00	Tableware, utensils, hand tools, sinks, walk-in refrigerators
Jeffersonville Quartermaster Depot	3,395.00	Gasoline engines, anvils, crow bars, woodworking vises, hand tools
Lordstown Ordnance Depot	38,079.00	Hand tools, machinists vises, air compressors, shop equipment
U. S. Navy	9,290.00	Link trainers (3), miscellaneous equipment
Louisville Medical Depot	73,747.98	Laboratory equipment and glassware, dispensary and veterinary equipment, hand tools, foreign typewriters
Fort Knox	11,503.00	Small hand tools and kitchen hardware
Camp Campbell	175,117.61	Walk-in refrigerators, automotive equipment, trucks, trailers, bulldozers, cranes, saw mill, meat blocks, hand tools, gas cylinders
Bluegrass Ordnance Depot	21,526.00	Machine shop equipment, gas cylinders, power woodworking equipment, hand tools, steam jacket kettles
Camp Breckinridge	12,436.26	Shop and hand tools
Ohio River Ordnance Works	28,375.60	Tables, cafeteria equipment, photographic equipment, refrigerators and ranges
AAF (Estimate)	225,000.00	Power woodworking and machine tools, motors, engines, tractors, wrenches, hands tools
WAA (Approximately)	125,000.00	Machine tools
Total	$1,459,582.07	

Personal property purchased from War Assets Administration through the State Educational Agency at 40% and 95% discount. WAA fair value, $207,060.34.

School furniture—tablet arm chairs, folding chairs, lockers.
Office furniture and supplies.
Cafeteria and cannery equipment—steam tables, mess tables, drinking fountains, refrigerators, steam jacket kettles, dishwashing machines, food trays, food carts, ranges.
Safety equipment—fire extinguishers, fire hose, ladders.
Laboratory and medical equipment and supplies.
Water purification units.
Heating equipment and plumbing equipment.
Electrical equipment—fuses, floodlights, lamp bulbs, wire, motors, switches, generators.
Tents and tarpaulins.
Hand tools—machine tools.
Shop equipment—woodworking, metalworking, automotive (elec. power).
Hardware, paints and varnishes, rope.
Dormitory equipment—blankets, mattress covers, sheets, pillows, cots and bed steads.
Quonset type huts (19).

Real property sales were arranged by the State Agency through WAA Real Property Disposal Division at three locations. Buildings purchased by Boards of Education for removal off site subject to public allowance benefit of 95%:

July 4–14, 1947, Kentucky Ordnance Works, Paducah, 30 buildings—fair value	$ 8,868.00
Aug. 8–18, 1947, Bowman Field, 14 buildings—fair value	11,298.09
Aug. 18–28, 1947, Sturgis Air Field, 23 buildings—fair value	12,325.00
	$32,491.09

FUTURE NEEDS

School Transportation

Because of the constantly increasing demand for better school facilities in rural territory during the past few years, more adequate transportation facilities must be made available in the near future. At present transportation facilities are not available for children who live beyond a reasonable walking distance of an adequate school. In many districts transportation is available but not in sufficient amount to provide safety of this service. Such conditions are a deterrent to regular attendance and, consequently, contribute to absence from school. The rural road building program will improve hundred of miles of roads in the near future. This will cause still an increased demand for transportation because of the resulting expansion of educational services now being demanded.

School Buildings

The school plant facilities in a large percentage of the districts are now overcrowded. The more than $18,000,000 building program mentioned above needs to be done at once in order to supply the immediate needs This Department has conferred with school administrators concerning many other projects which are being planned to house the ever increasing demands for better educational programs. Many boards of education are setting aside funds to be used for buildings and repairs as soon as conditions warrant the erection of the program needed. The 1946 session of the Legislature authorized all boards of education to set aside not less than four cents nor more than twenty cents on each one hundred dollars valuation of property subject to local taxation, to provide a special fund for the purchase of sites for school buildings, for the erection and com-

plete equipping of school buildings, and for the major alterations, enlargement and complete equipping of existing buildings. Two years ago we estimated the need of $2,500,000 to be expended for school buildings and repairs. Now it appears that about twice this amount will be needed.

Surplus Property

While it is apparent that the property disposal program of the Federal Government is nearing the final stages, the outlook for the acquisition of additional property by Kentucky schools during the next 12 months is generally good. Many items of valuable equipment will be made available to schools by the military installations under the donation program still in effect. Though there exists some doubt over the continued assistance of the U. S. Office of Education, Army authorities will continue to recognize accredited assistants who make regular visits to installations for the purpose of providing the State Educational Agency with reports on donable property.

The value of remaining inventories still to be disposed of by War Assets Administration is estimated to be close to two and one-half billion dollars. As the deactivation and reactivation programs of the armed forces progress, further declarations of surplus by the War Department are expected to swell this total. Cleanup of residue and emergency warehouse clearances, where WAA leases are expiring, may result in large quantities of property becoming available to educational institutions. Here it will be necessary for the State Agency to act on short notice; screen and inspect the inventory in light of existing needs, prepare requests for the desirable items, and in some cases arrange pick-up and distribution.

The WAA Office of Real Property Disposal has recently released the information that a number of surplus buildings located at various military installations within the State are still to be offered to educational buyers.

Funds needed for continuance and extension of the activities of the Agency: A revolving fund of $10,000 to take care of warehousing, transportation and purchases where large quantities of property become available on short notice. Appropriation of $20,000 for salaries and other regular recurring expenses.

BUREAU OF INSTRUCTION

DIVISION OF SUPERVISION

The Division of Supervision of the State Department of Education is under the legal and assigned direction to plan the organization and supervise the administration of the public elementary and high schools. These schools are under the controlling authority of 246 local boards of education in 120 counties and 126 independent school districts. The schools are divided as follows:

Elementary schools for white pupils	4,743
Elementary schools for Negro pupils	373
High schools for white pupils	513
High schools for Negro pupils	62
Total	5,691

The functions of the Division of Supervision are carried on by a personnel of five staff members. Included in the membership of this personnel is a director of the division of supervision, who is also high school supervisor, one elementary school supervisor, one consultant of health education, one supervisor of Negro education who is also director of the division of Negro education, and the school library consultant. The school library consultant assumed her duties a few months ago. In addition to these staff members much assistance is contributed to the division by the College of Education of the University of Kentucky, the four state teachers colleges, and many private colleges.

In the discharge of the duties for which the division of supervision exists supervisors not only endeavor to see to it that the schools are measuring up to the standards prescribed by legislative enactment and by regulations of the State Board of Education, but they also work with the schools in the field, studying their conditions and needs and assisting them in laying out programs towards improvement.

Many activities are carried on by the staff members. Some of these activities are:

1. Meeting with boards of education
2. Holding individual and group conferences outside the office
3. Preparing bulletins for publication
4. Meeting with state and regional accrediting associations
5. Planning and conducting state-wide conferences of administrators and teachers
6. Making visitations to schools for study and advisement
7. Preparing circulars for instruction and information
8. Conducting and answering correspondence
9. Planning and conducting workshops and other in-service training programs
10. Addressing teachers' and other educational meetings

The members of the Division of Supervision believe that their best contribution to the cause of public education in the state is found in their work with local administrative units in promoting a better school program.

Elementary Schools

During the past biennium the Division of Supervision has been active in promoting a better in-service training program for teachers, especially for those who teach in the elementary grades. Many of the state's best trained and most successful teachers withdrew from the teaching profession during the war years and this caused the employment of many emergency teachers. In order that these emergency teachers could receive training in service a helping teacher program was instituted and promoted. Nearly one half of the local school districts in the state now have special or helping teachers.

These helping teachers strive to improve the quality of instruction in the elementary schools. The helping teacher program is recognized not only as an effective technique for in-service training of teachers during the emergency but also as a permanent part of an effective program of education.

The modern elementary school has a twofold function. In the first place, it is obligated to offer every child opportunities through training

in the fundamentals and must also provide additional experiences for his physical, mental, emotional, and social development. In the second place, it is the obligation of the elementary school to serve the adults of the community by extending its services to them.

The elementary school must make provision for the well-rounded development of pupils of varying types of ability. This means that the program must include opportunities for the development and maintenance of skills through the tool subjects and for experiences in art, music, science, social studies, industrial arts, homemaking, and the like.

If modern facilities are to be provided for elementary children, they cannot be provided in small elementary schools except at prohibitive costs. For example, play space, cafeteria, and shops will probably never become a part of the program of a two or three-room school on account of the expense involved. It seems wise, therefore, that we think of consolidated elementary schools in terms of four-or-more class rooms. This should be regarded as a minimum program of consolidation. As schools become larger such facilities as library, assembly room, music room, lunch room can be provided. In rural areas, schools with an enrollment of 300 or more elementary children should be developed, provided the area served is a definite community. It is recognized, of course, that in some counties on account of topography and distribution of population as well as present location of buildings there will be exceptions to the enrollment goal suggested above. In these counties it will be necessary to continue to operate many smaller elementary schools.

High Schools

During the school-year 1946-47 there were 648 high schools in Kentucky. This number is in contrast to 674 that operated during the school-year of 1945-46. Table I presents data showing the number and types of our high schools for the school-year 1946-47.

TABLE I

Types of High School Organizations and Number of Each—1946-47

Types of Organization	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7–12	178	97	13	5	293
Grades 9–12	156	62	52	1	271
Grades 8–12	4	5	6	0	15
Grades 10–12	1	9	1	0	11
Grades up to 11	3	0	0	0	3
Grades up to 10	14	0	1	1	16
Grades up to 9	17	22	0	0	39
Totals	373	195	73	7	648

The table above not only shows the number of different types of high school organizations found in the state but it also indicates the number of high schools that are operating under different types of control. It will be observed that 373 of our high schools are operated by county

boards of education, 195 are maintained by boards of education in independent school districts, 73 are privately operated, and 7 are operated by the state.

The total number of high schools for 1946-47 represents a decrease of 26 when compared with the total number operating in 1945-46. Three of the high schools that have ceased to operate during the biennium were maintained for colored pupils, two were private high schools, while 21 were public white high schools.

TABLE II

High School Enrollments by Grades, Race and Control—1946-47

Grades	County Districts		Independent Districts		State or Regional		Private		Total
	White	Negro	White	Negro	White	Negro	White	Negro

TABLE III

Complete High School Organizations Grouped According to Size, Race, and Control—1946-47

Size	County Districts		Independent Districts		State		Private		Total	Per Cent
	W	C	W	C	W	C	W	C		
59 and below	6	1	1	8	0	0	12	0	28	4.9
60–99	83	3	11	13	0	0	19	1	130	22.0
100–199	150	3	47	16	4	0	22	0	242	41.0
200–299	65	0	26	5	1	0	8	0	105	17.8
300–399	16	0	17	1	0	1	3	0	38	6.4
400–499	8	0	9	0	0	0	3	0	20	3.4
500 and over	5	0	15	3	0	0	4	0	27	4.5
Totals	333	7	126	46	5	1	71	1	590	100.0

By the expression "complete high school," we mean a high school organization that offers work through the twelfth grade. The foregoing figures show that 590 of the total of 648 high schools are complete high school organizations. Of the 58 "incomplete" organizations, 3 offer work

through the eleventh grade, 16 through the tenth grade, and 39 through the ninth grade. There were 26 fewer complete high schools in operation during the school-year 1946-47 than were in operation during the school-year 1944-45. It might be noted in passing that there were 33 fewer high schools of all types in operation during the school year 1946-47 than were in operation for the school-year 1944-45, the last year of the last biennium.

Information Concerning High School Development. For a number of years the Division of Supervision has carried three tables in the biennial report showing the development of high school education in Kentucky. The information in these tables has proved helpful to students of Kentucky education and it is thought desirable to continue to carry them in this report.

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. It was during the school-year 1934-35

TABLE IV
Number of High Schools by Years

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1915-16	316	No report	No report	316

1942-43	555	71	71	697
1943-44	541	70	70	681
1944-45	542	66	73	681
1945-46	536	65	73	674
1946-47	513	62	73	648

that we had the greatest number of high schools, 848 in all. Today we have 648 or 200 fewer high schools in operation than we had in 1935. This decrease in the number of high schools has resulted very largely from their being merged into larger centers where pupils are provided with a broader program of work better designed to meet their educational and vocational needs.

Table V presents an interesting picture of the increase in high school enrollments since 1915. Naturally, high school enrollments showed a decrease during the war years due to pupils being inducted into the armed

TABLE V

Enrollment by Years in Different Types of High Schools

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included in the totals.

services or entering war industries. Now that the war is over, high school enrollments are on the increase. There were approximately 10,000 more pupils enrolled in our high schools during the school-year 1946-47 than in 1944. During the closing school year (1946-47) there were 6,056 more

TABLE VI

High Schools Accredited Through Grade Twelve—1909-1947

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1909-10	54	No report	29	83
1910-11	69	No report	32	101

1946-47	463	55	72	590

pupils enrolled in public white high schools than were enrolled during the preceding school year. In the public colored high schools, 542 more pupils were enrolled. In the private high schools, 1,341 more pupils were enrolled.

The preceding table shows the situation as regards the number of accredited high schools by years since 1910. When one thinks of a high school in its true sense one thinks of an institution providing a program of work through the twelfth grade, i. e., a complete high school organization. High schools that are organized to give work that does not extend through the twelfth grade should be looked upon as incomplete, feeder schools for regularly organized complete schools. Complete high school organizations are accredited by the State Board of Education as either class A or class B. In arriving at the official accredited ratings given the high schools of the state (public and private), the State Board of Education usually follows the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the public school supervisors and canvass the annual high school reports that are made by the high schools to the State Department of Education and also the reports of the supervisors who have inspected the high schools.

Improving the Quality of High School Education. It has been argued by many that while accrediting standards do improve high schools, still they do not give enough emphasis to the improvement of the quality of the school's work. With this argument in mind, the State Board of Education prepared and adopted regulations and standards designed to improve the quality of the school's program of activities. These regulations provide that beginning with the school session 1946-47, every accredited school shall, through its principal and faculty, study the needs of its pupil population and community it serves and through the knowledge gained, formulate a statement of its philosophy, i. e., a set of beliefs or values that will serve as guides for making decisions regarding the type of program of work that the school should offer the pupils. Suggested forms for gathering information regarding pupils' educational and vocational intentions or plans were prepared and distributed to the schools. Conferences were held with school officials throughout the state explaining the intention of this new program. 310 of the 590 complete high schools made a study of their pupils' educational and vocational intentions or plans. The principal and faculty of each of these schools then prepared a statement of what they thought their school should offer its pupils. The remaining 280 complete high schools will make this study during the coming year.

Need for Larger and More Comprehensive Type of High Schools. One of the principal goals of high school education should be that of providing a program of work that will function in the lives of young people. The needs of youth of high school age are of such a wide variety that they cannot be met adequately in small high schools. One high school in the case of many of our small counties should serve the entire county. Where counties have a school population sufficient to require more than one high school, such schools should serve large areas within the county.

It is generally recognized that an adequate offering for a comprehensive high school designed to meet pupil needs should offer a broad program of general education for citizenship and other common needs and specialized offerings to meet individual needs in academic subjects, fine arts, practical arts, and vocational fields. In addition to these offerings the high school must offer its pupils adequate library facilities, an adequate health and physical education program, and an adequate and full program of guidance.

It is clear from recent studies of high school costs that this broad program of offerings and activities cannot be adequately provided in high schools of fewer than 500 pupils. It is recognized that in some smaller counties and in other counties on account of road conditions, topography, and distribution of population, as well as present location of buildings, exceptions to this enrollment goal will be necessary, and under these conditions smaller high schools must be operated.

If Kentucky is to have large high schools offering a comprehensive program of work that meets the needs of youth, then many small high schools must be merged into larger centers. The State Department of Education does not attempt to dictate such mergers or consolidations to local school districts. It does, however, encourage and recommend consolidations for the purpose of securing sound and comprehensive programs of education.

Transportation is an important factor in school consolidation. The State Department of Education recognizes that there are limits in time that pupils should spend on school buses. In general, in the case of high school pupils the maximum range of time spent in school buses of 60 to 90 minutes one way, and for elementary pupils a maximum range of 30 to 50 minutes one way, seems reasonable.

The fundamental reason for merging small schools into larger units is to carry out a sound educational policy and to provide for the highest educational efficiency. It is fallacious to merge small schools into larger units and at the same time fail to provide a richer and more comprehensive program of education for the pupils in the larger school. There is little or no educational advantage in bringing large numbers of pupils together into one school if the pupils are to continue to be offered virtually the same offerings and opportunities that they had in the small schools.

The merger of small schools into larger units for the purpose of providing a comprehensive program of education should be based upon careful study of the entire school district. After a comprehensive educational program has been agreed upon then ample time should be taken to familiarize the people with the needs and advantages of the proposed plan, since any program designed to improve educational conditions, to be successful, must have the support of the people in the area to be served.

NEGRO EDUCATION

Special emphasis in the interest of supervision for Negro schools began on the part of the state in 1914 when a separate functional division was set up in the Department of Education during the administration of State Superintendent of Public Instruction Barksdale Hamlett. The Gen-

eral Assembly of 1924 gave legal status to the division and the School Code of 1934 provided for its continuance. The state's initiative toward providing better educational services for the Negroes came at a time of great need. More than half of the Negro population of the state was illiterate and a chance for an education offered these people was of little public concern. As a result, an ill-informed element in our democratic society was beginning to present problems that concerned not only the welfare and economic independence of the Negro himself, but it was a most important concern of the whole of our commonwealth. That which is good for the happiness of all the people is good for the individual, and it is important that all our people be educated so that each individual regardless of race or creed will not only benefit from our social order but will be able to participate in its betterment. It has been the concept of our lawmakers, to whom goes the credit for setting up our modern school system, that education must prepare all people to appreciate, conserve and utilize, intelligently and efficiently, the resources at their command, to the end that our commonwealth may become an increasingly better place in which to live. It must prepare the individual to make an increasingly greater contribution to the welfare and improvement of the nation.

The state, recognizing the need of the improvement of educational services for Negroes, developed a plan for supervisory services. Since funds were scarce and hard to secure in the earlier days, application was made to the General Education Board, a philanthropic institution with general offices in New York City, for funds to support the program of state supervision of Negro education. The funds were granted, and during the period of 32 years, from 1914 to the present, more than $100,000 have been made available by contribution to the state for the support and development of this phase of its educational program.

Planning and stimulating the development of desirable facilities and services, and helping to bring about equal educational opportunities for Negroes, was the first responsibility of the Division of State Supervision of Negro Education. At first these provisions were slow to develop. But with years of slow and gradual advancement there has been tremendous progress. Schools for Negroes are now recognized by the same laws, rules and regulations as all other schools of the state. Every local school district in the state is now providing elementary and high school service for all Negro children either by maintaining schools within the particular district or by paying tuition and furnishing transportation to schools maintained in other districts. Many of the objectives of the Division of Negro Education have already been realized in so far as a dual system will permit. Among which are (1) equal salaries paid to all teachers, (2) equal distribution of the school fund, (3) equal term lengths, (4) equal qualifications for teachers, (5) equal tenure and retirement of teachers, (6) equal attendance service, (7) the same or equal supervision, (8) equal transportation services, and (9) equal building facilities, supplies and equipment. Where conditions are similar, school service for the Negroes now compare favorably with those offered the whites.

As in the past, most of the problems in Negro education during this biennium were due to the distribution of Negro population throughout

the state. Almost one third of the Negroes in Kentucky now live in Jefferson, Fayette, and Kenton counties. The other two thirds are scattered throughout the other 117 counties with concentration in the central and western parts. About three fourths of the colored population live in about one third of the counties. The other one fourth is scattered throughout the large areas of the other two thirds of the state's land area. It can be easily understood why there are critical problems concerning adequate facilities for educational services under such conditions. This situation is becoming worse. Negroes are migrating from the rural areas of the state toward centers of population and to the north, east, and west.

The data contained in Table I, Table II and Table III are evidence of what is happening. Table I shows the gradual decrease in Negro population in the state from 16.8 per cent of the total population in 1880 to 7.5 per cent in 1940. Table II shows the migration from rural areas to the centers of population. The Negro population of Jefferson, Fayette, and Kenton counties shows that there has been an increase of 11.5 per cent in these counties from 1920 to 1940. Table III shows a tremendous increase in Negro population in states of the North, East, and West. During the twenty-year period, from 1920 to 1940, the Negro population has more than doubled in these states. The shifting has taken place not only in Kentucky but throughout all the states of the South. A study of the Negro population shows (1) a steady diffusion to all sections of the nation, and (2) a steady decrease in relation to the total population.

TABLE I

Population of Kentucky, 1880, 1900, and 1940, Showing Decline in Numbers and Percentage of Negroes

Year	Total Population	Negro Population	Per cent Negro
1940	2,845,627	214,031	7.5
1920	2,416,630	235,938	10.0
1900	2,147,174	284,706	13.0
1880	1,648,690	271,451	16.8

TABLE II

Centers of Population in Kentucky Showing Increase in Negroes

Population Center	Year		Per cent Increase
	1920	1940	
Jefferson County	44,448	51,166	15.0
Fayette County	15,613	16,969	8.6
Kenton County	3,325	3,532	6.2
Total	63,386	71,667	11.5

TABLE III

States of the East, West and North Showing a Conspicuous Increase in Negro Population

State	Year		Per cent Increase
	1920	1940	
California	38,763	124,306	221.0
Illinois	182,274	387,446	112.0
Indiana	80,810	121,916	51.6
Michigan	60,082	208,340	247.0
New York	198,483	571,221	189.0
Ohio	186,187	539,461	82.4
Pennsylvania	284,568	470,172	100.0
Total	1,031,167	2,222,862	115.0

Elementary Schools. At the close of this biennium there were 439 elementary schools of the state operating for the colored children. Of this number, 284 are one-teacher schools, 51 two-teacher schools, 22 three-teacher schools, and 82 are four-or-more teacher schools. Throughout the biennium much effort has been given to the consolidation of the small, expensive elementary school into larger, more economical school centers. Table IV shows that there has been a decrease of 48 in one-two- and three-teacher schools while there was an increase in four-or-more teacher schools from 42 to 80 since the biennium ending in 1945.

TABLE IV

Number and Size of Negro Elementary Schools for Biennium Ending June 30, 1945 and Biennium Ending June 30, 1947

Size of Schools	Biennium Ending 1945	Biennium Ending 1947	Decrease	Increase
1-teacher	311	284	27	
2-teacher	65	51	14	
3-teacher	29	22	7	
4-teacher or more	42	82		40
All sizes	447	439	8	

There were 24,633 pupils enrolled in the elementary schools of the state for Negro children at the close of the biennium ending June 30, 1947. Of this number, 11,218 were enrolled in the schools operated by county districts while 13,415 were enrolled in schools operated by independent districts. Over one-half of the pupils enrolled in the county

school districts are in the one-teacher schools, while more than four fifths of those enrolled in schools operated by independent school districts are in schools of four-or-more teachers.

There are 895 teachers in the elementary schools of the state for Negro pupils. Of this number, 421 are enployed to teach in the county districts while 474 are under the control of independent districts. The pupil-teacher ratio in the county districts is 25.9 pupils per teacher. In the independent districts there is one teacher for every 30.2 pupils.

Table V shows the distribution of enrollment and teachers according to size of school and type of control.

TABLE V

Elementary Enrollment and Number of Teachers Distributed According to the Size of School and Type of Control

Size of School	Co. School Districts		Ind. School Districts		Total	
	No. of Tchs.	Enrollment	No. of Tchs.	Enrollment	No. of Tchs.	Enrollment
1-teacher	260	6,734	24	725	284	7,459
2-teacher	70	1,831	32	966	102	2,797
3-teacher	42	1,188	24	725	66	1,913
4-teacher or more	49	1,465	394	10,999	443	12,464
All sizes	421	11,218	474	13,415	895	24,633

High Schools. The State Board of Education accredits 63 high schools for Negro children. These schools maintain the same standards that are maintained by white schools. Of these 63 high schools for Negroes, 13 are under the control of county school districts, 48 are operated in independent districts, one is a private school, and one is a state-controlled school. Thirty-five, or fifty-five per cent of the complete high schools are six-year high schools, grades 7–12 while twenty, or thirty-one per cent are four-year high schools, grades 9–12. The remainder are of various types of organization. Besides these ratings, thirteen schools maintain ratings with the Southern Association of Colleges and Secondary Schools. Kentucky has a larger proportion of Negro high schools rated with the Southern Association than any state.

TABLE VI

Types of High School Organizations for Negroes and Number of Each

Types of Organization	County Districts	Independent Districts	State or Regional	Private	Total
Grades 7–12	5	30	0	0	35
Grades 9–12	4	14	1	1	20
Grades 10–12	0	1	0	0	1
Grades 7– 9	0	2	0	0	2
Grades up to 11	1	0	0	0	1
Grades up to 10	2	0	0	0	2
Grades up to 9	1	1	0	0	2
Totals	13	48	1	1	63

Table VII presents data showing the high school enrollment and the number of teachers distributed according to the type of control. The high schools of the state offering services to Negroes are operated mainly by the independent school districts. Of a total enrollment of 10,511 pupils, 9,372 are in schools of the independent districts. More than three-fourths of the 488 high school teachers employed are under the control of independent districts. The total enrollment of 10,511 pupils represent about eight per cent of all the pupils, white and colored, enrolled in the high schools of the state. It represents about one-half of the Negro pupils of high school age, indicating that our high school services are failing to reach one-half of the high school age group.

TABLE VII
Negro High School Enrollment Showing Teacher-Pupil Ratio

Type of Control	Number of Teachers	Enrollment	Pupil-Teacher Ratio
County Districts	41	734	17.9
Independent Districts	427	9,372	21.4
State or Regional	16	335	21.0
Private	4	70	18.0
State totals	488	10,511	21.0

Almost three-fourths of the counties of the state do not have enough high school pupils of their own to operate a high school without exorbitant per capita cost. About half of the counties have no high school within their borders. The sparsity of population is more vivid when it is noticed that in twenty counties there are only 79 pupils of high school age, enough only to maintain a small, inefficient school if all these pupils could be brought together. Bringing them together is impossible in such a large area because transportation is impracticable. The only solution to such a problem under the dual system is schools with boarding and rooming facilities. The boarding school solution is being provided by the state with the recently acquired Lincoln Institute. Since the state has assumed complete responsibility for Lincoln Institute, local school districts without high school possibilities can now send their Negro high school pupils to this school at the cost of $72 per child per year, which cost is commensurate with the per capita cost for white children in their districts. At present the school can accept only about 350 pupils. It has a faculty of sixteen well-trained instructors. The school needs its facilities expanded so as to be able to accommodate at least 500 pupils. Plans are in the making for this expansion, which will include vocational shops, agricultural laboratories, and a project farm and home economics laboratory, wherein courses may be taught to encourage Negro youth from the state's rural areas to engage in agricultural pursuits.

HEALTH EDUCATION

1. The workshop at Lee's College in 1946 was an outstanding piece of work. About 75 supervisory officers worked for 2½ weeks under the direction of Dr. Ellis Hartford of the University of Kentucky, who

was assisted by a full-time staff of six persons and several other resource persons. The program of the workshop was built around the problem of health. A very excellent report was made. This report became a kind of handbook for supervisory officers in the school system during the year 1946-47.

2. During the year the Coordinating Committee composed of three members from the staff of the Department of Education and the Department of Health continued to work together on health problems.

3. A committee composed of staff members of the State Department and the staff of the Morehead State Teachers College developed a bulletin in health education in the elementary grades. This is an outstanding piece of work. It is now at the press and will be ready for use this year.

4. A committee composed of staff members of the Department of Education and the staff of the Eastern Kentucky State Teachers College has been working several months on a course of study in health for the secondary grades. This bulletin will be ready for publication during the current year.

5. The Kellogg Fund—a small amount—was used in helping to conduct a workshop on Healthful Living in School and Community during June, 1947.

6. A Health Code has been adopted by the State Board of Education requiring health examinations in schools and the teaching of health in the schools. The effective date of this Code is July 1, 1948. The provisions are as follows:

   (a) Beginning not later than the opening of the 1948-49 school year, all Boards of Education of county and independent school districts shall, under the general direction of the Superintendent of Public Instruction, provide for medical examinations of each teacher upon employment and every year thereafter, and of each child, in so far as local facilities and personnel are available, immediately prior to entering or upon entering school for the first time and at least every fourth year thereafter. Furthermore, Public School Board shall, in as far as local facilities and personnel are available, provide annual physical examinations for each child enrolled or entering school. The Superintendent of Public Instruction is directed to request teacher education institutions to provide both types of examinations for all of their students.

   (b) Beginning not later than the opening of the 1948-49 school year, each public school and each teacher education institution shall start cumulative health records for each child or student enrolled and/or entering school; said records to be maintained throughout the child's or student's attendance, after which they will be filed as part of the school's permanent record and be available for transfer. These health records shall be uniform and on forms prescribed by the Superintendent of Public Instruction. Health data shall be recorded and recommendations

shall be sent to both the parents and county health committee or council if any exist; follow-up checks shall be made of each case by proper health or school authority and results recorded.

(c) Beginning not later than the opening of the school year 1948-49, Health and Physical Education shall be included in each pupil's program of daily learning and living in the school. A specific course in basic health shall be required of each pupil in the upper four years of high school. This course should be taken preferably during the ninth or tenth year.

(d) No elementary or high school shall be considered as having met health and physical education standards of approval until programs have been put into operation which meet the minimum standards prescribed by the State Board of Education as approved and published in its specified bulletins, syllabi, and courses of study.

The Code for Health and Physical Education, it is believed, is the most outstanding achievement made in health education in Kentucky thus far.

7. Health education will be required in the certification curriculum after July 1, 1948.

8. The Department of Education assumed full financial responsibility for the Division of Health Education on July 1, 1946.

FREE TEXTBOOKS

The Free Textbook Law was enacted by the General Assembly of Kentucky in 1928. It remained inoperative until 1934 due to the lack of funds. The "Appropriation Act" of 1934 provided $500,000.00 per annum for the purchase and the administration of free textbooks for the pupils of the public schools of Kentucky.

The first free textbooks were purchased by Kentucky in the school year of 1934-35. In this year books were purchased for the first three grades and in part for grade four. From 1934 to 1940 books were purchased for other grades until all eight grades were included. By 1940 all the pupils in grades 1 to 8, inclusive, had "complete sets of books."

In addition to the necessary replacement of books from year to year of the required subjects, books were supplied to the pupils in grades 1 to 8, inclusive, by 1944-45.

The annual expenditures by Kentucky for free textbooks, the number of books purchased each year, the elementary grade enrollment, and the grades for which books were purchased are given in the following table 1–b.

TABLE 1
Annual Free Textbook Purchases

Year	Annual Expenditure	No. Books Purchased	Elementary Grade Enrollment	Grades Supplied	Remarks
1934-35	*$455,582.94	1,333,402	529,210	1–4	Supplied only 3 subjects in grade 4.
1935-36	519,241.20	1,093,316	523,535	1–5	Replacements made and supplied part of grade 5.
1936-37	484,618.68	1,041,952	515,270	1–6	Replacements made and supplied part of grade 6.
1937-38	485,495.01	1,161,533	491,337	1–6	Replacements made and supplied part of grade 6.
1938-39	488,012.41	927,579	518,052	1–7	Replacements made and supplied part of grade 7.
1939-40	487,791.63	851,510	510,514	1–8	Replacements made and supplied part of grade 8.
1940-41	485,007.04	935,997	498,599	1–8	Replacements made and supplied optional books in grades 1 to 4.
1941-42	486,081.85	841,457	484,485	1–8	Replacements made and supplied optional books.
1942-43	484,843.47	868,939	470,025	1–8	Replacements made and supplied optional books.
1943-44	486,844.96	864,355	451,742	1–8	Replacements made and supplied optional books.
1944-45	**474,756.66	814,580	***452,000	1–8	Replacements made and supplied optional books.
1945-46	483,806.72	1,064,595	467,729	1–8	Replacements made for grades 1 to 8.
1946-47	†485,707.78	‡686,196		1–8	Replacements made for grades 1 to 8.

* Annual expenditure includes cost of textbooks, insurance, freight, drayage.
** $474,756.66 is approximate amount expended in 1944-45.
*** 452,000 is estimated enrollment for 1944-45.
† All freight not included.
‡ Expenditure calculated from July 1 to June 30; books purchased may be in two school years.

One third of the textbooks are changed every five years. Those changed are usually those which are becoming outdated or of least value. There is a demand, therefore, for the purchase of new books to replace at least one third of all the textbooks in the State. It is desirable to purchase all the newly adopted books immediately following the adoption if sufficient funds are available. Due to lack of funds it is necessary to distribute the purchase over a period of years. The enrollment of elementary grades, for example, for the school year ending on June 30, 1944, was 451,742. Based on the 1943-44 pupil enrollment it would have cost $1,903,114.25 to purchase all new books for the required subjects in 1945-1946. The purchase of optional books would have required an additional $395,192.70. The total amount required for these purchases would have been the sum of $2,298,306.95. To make full replacements and to buy the books for the added subjects with the annual appropriation of $500,000.00 will require a period of time of four years or more.

The extension of free textbooks through the high school grades 9 to 12 inclusive would require an annual estimated expenditure of approxi-

mately $650,000.00 for the first year. Free textbooks, however, could be provided for the high school grades on the one grade per year plan for an annual expenditure of about $225,000.00.

Free Textbooks have been a valuable factor in the educational program of the State. This service would be greatly augmented by the extension of free textbooks into the high school grades.

LIBRARY SERVICE

Through funds granted by the General Education Board, the Department of Education added to its staff on February 1, 1947 a School Library Consultant. This is the second time the services of a specialist in school libraries have been made available by this agency to the school people of the State.

The initial General Education Board grant was from 1933-1937. One of its stipulations was that the State would carry on the program when the four year period ended. Due to the lack of funds this was not done, hence, the services of the Supervisor of Public School Libraries was suspended in 1937. During the next ten years there was no one responsible for developing this phase of the total educational program throughout the State. Whatever progress was made on the State level during this period was due to the interest and effort of the general supervisors in the State Department of Education.

By 1946 all of the states in the Southeastern region but Kentucky were enjoying the services of school library supervisors. Through the interest of the Southern Association of Colleges and Secondary Schools in this phase of the instructional program and their ability to interest the General Education Board in making funds available, Kentucky, for a second time, was able to employ a school library specialist. This time the grant was made for seventeen months, February 1, 1947 to June 30, 1948. In accepting it, the State Department of Education pledged itself to do everything possible to perpetuate the service following the expiration of the grant.

Making the school people of the State aware of the kinds of services the School Library Consultant is prepared to render seemed to be the most important initial consideration. To this end the School Library Consultant participated in summer workshops, pre-school conferences, teachers' meetings, professional meetings of both teachers and librarians, met and talked with librarians in training at the various library training agencies in the State, wrote articles for professional journals and a Department bulletin, and visited specific libraries and school systems, largely upon request, to work with administrators and librarians on their particular problems.

The shortage of trained school librarians throughout the State is an acute problem. From information given in the Annual High School Report of 1946-47 we know that many persons are now serving as school librarians who have had little or no training in this field. To encourage these and others to take training to become qualified school librarians is another major endeavor of the School Library Consultant.

Kentucky is fortunate to be among the states in the Southeastern region that received money from the General Education Board for library scholarships during the 1947 summer terms. These thirty fifty dollar

scholarships were awarded through the Department. Recipients were persons with little or no library training who are now in school library positions, or persons who plan to be in such positions in the school year of 1947-48. The School Library Consultant visited the two training agencies that participated in the program and talked individually with most of the scholarship recipients. She plans to make visits to each of them in their schools during the coming school year to work with them in whatever way they need help. It is hoped that in another summer a workshop can be held by one of the training agencies to encourage many more untrained person who are now serving in school libraries to become qualified.

Although the School Library Consultant has a general idea of the school library situation in the State and a better understanding of it as she visits more widely, there are meager statistics available in the Department. Twenty questions in the Annual High School Report constitute the total basis of information of school libraries in Kentucky. These reveal largely quantitative data. The State has no records of elementary school library service. A survey in which Kentucky is participating with other states in the Southeastern region in the Fall of 1947 should reveal sufficient information for a clear picture of school library service in both the elementary and high schools. Each accredited high school in the State and a sampling of twenty-five elementary schools are to be surveyed. It is hoped that the results will suggest a program of action in school library development and accelerate the efforts toward the desired ends.

TEACHER EDUCATION AND CERTIFICATION

The crisis in teacher education continues. The teacher is the major factor in a sound program of American education. The teacher shortage of America, after increasing steadily throughout the war, has continued undiminished into the second year of the post-war period.

Extent of Teacher Shortage in Kentucky. Probably the best usable measure of the extent of the shortage is the number of teachers who cannot meet the legal requirements for regular certificates. The over-all picture of what has happened in teacher supply and demand in Kentucky during and immediately following the war years is shown in Table I.

TABLE I

Decrease in Supply of Qualified Teachers in Public School Classrooms in Kentucky Over an Eight Year Period

Year	Approx. Number of Qualified Teachers	Number Emergency Certificates	Number Teachers Employed
1939-40	18,880	0	18,880
1940-41	18,707	164	18,871
1941-42	16,907	1,593	18,500
1942-43	15,580	2,600	18,180
1943-44	14,000	4,100	18,100
1944-45	13,143	4,567	17,710
1945-46	12,980	5,200	18,180
1946-47	12,964	5,200	18,164

Note the decrease in teaching positions from 18,880 in 1939-40 to 18,164 in 1946-47. Note also, the decrease in the number of available certificated teachers from 18,880 in 1939-40 to 12,964 in 1946-47. At the close of the 1946-47 school year 5200 emergency teachers occupied Kentucky classrooms.

Demand for Qualified Teachers in Kentucky. The present supply of qualified teachers must be doubled in the immediate future. Prior to the war, there were 18,800 classroom units in the schools of Kentucky. The pre-war demand was inadequate, according to the Norton-Lawler Study, which pointed up the need for 21,000 classroom units based on a desirable classroom pupil-teacher ratio. Present and immediate future demands for 24,000 classroom units are due to birth rate increases, increased enrollment in primary grades, increased enrollments all the way through elementary and high school grades, enriched programs, and increased demands for additional school services on the part of society. Only approximately 13,000 qualified teachers are employed this year. The normal turnover is from 1,000 to 1,500, and this has been increased to between 2,000 and 2,500 during the emergency. To meet the demands of the immediate future, the services of 24,000 qualified teachers will be needed.

The Supply of Certificated Teachers. The supply of teachers who hold regular certificates as revealed by the records includes all persons who hold certificates even though these persons have not remained in the profession. Many certificated teachers have apparently quit the profession. Table II shows that on February 1, 1947 there were 22,376 certificates in force exclusive of emergency teachers. Table I, however, shows that only 12,964 certificated teachers were employed. Where are the others? Some have retired; some have withdrawn into other business; and still others have gone into states where salaries are higher and where teaching conditions are more favorable. Kentucky teachers may go into any neighboring state to the North, South, East, or West and receive higher salaries than are available to them in Kentucky.

TABLE II

The Training Level of Certificated Teachers in Kentucky
February 1, 1947

Training Level of Certificates	Number Renewable	Number Life	Total
5 years college	419	354	773
4 years college	5225	4194	9419
2 years college	4042	7654	11706
1 year college	6		6
High School only	45		45
Special certificates	172	3	175
Miscellaneous	4	248	252
TOTALS	9913	12453	22376

Of the 12,453 life certificates many were issued twenty to thirty years ago, and the holders are no longer available for employment in Kentucky classrooms. This reduces the supply.

TABLE III

Number Persons Receiving Certificates for the First Time in Kentucky

Years	Kentuckians	From Other States	Totals
1943-44	434	355	789
1945-46	159	306	465
1946-47	262	317	579

The normal demand for beginning qualified teachers in the profession is 1000 annually. One thing which should be of vital concern to the people of Kentucky is the small number of persons who became qualified and entered the profession during the last eight years and the small number of young persons who are preparing for the teaching service at present. Table III shows that in 1943-44 approximately 55 percent of the people who received certificates for the first time graduated from colleges located in Kentucky, while in 1945-46 only 45% of the persons who received their first certificates came from Kentucky colleges. Young Kentuckians in sufficient numbers to staff Kentucky's schools are not entering training for the teaching profession.

The decrease in the number of young people who are choosing teaching is shown by the trend in the number who take supervised teaching in Kentucky Colleges preparatory to teaching. This is shown in Table IV. In 1945-46 the trend downward has stopped and began to reverse itself. It is obvious that unless there occurs a rapid rise in the number of persons who choose to teach in elementary schools the shortage of qualified teachers at the elementary level will continue for some time.

TABLE IV

Number Taking Student Teaching in Kentucky Colleges Preparatory to Teaching 1940-41 to 1945-46

Level	1940-41	1941-42	1942-43	1943-44	1944-45	1945-46
Elementary	1293	879	637	321	285	402
Secondary	1050	865	675	354	308	597

Where Teacher Supply is Most Critical. A study shows that **50 per cent of all emergency teachers are employed in one-teacher schools;** therefore, of approximately 3,500 teachers employed in one-teacher schools in Kentucky, approximately 2,600 of them are emergency teachers.

The demand for qualified teachers is greatest in county systems in the rural elementary schools; in the first grade positions in independent systems; in secondary schools in the fields of music, commerce, science, physical education, agriculture, vocational home economics; and in principalships in both elementary and secondary schools.

This crisis in teacher supply becomes a "crisis of opportunity" for competent teachers and for young people of dynamic personality and superior ability who choose to prepare for the teaching profession.

Financing the Division of Teacher Education and Certification. This Division receives an annual appropriation of $15,000.00 from the State Treasury. This appropriation has not varied for more than 15 years. When the Division was devoted wholly to the certification of teachers the appropriation was $15,000.00 and the sum was adequate to finance the work.

In 1934, the Legislature provided that the Division of Teacher Education and Certification be established. To the duties of issuing certificates was added the directing of teacher education. Since 1934 the services of the Division have almost trebled. In addition to issuing certificates, the Division now has the responsibility of developing curriculum materials for elementary and secondary schools; leading in the formation of teacher education curricula; supervising teaching education programs and reporting such supervision to the State Board of Education; leading in the development of in-service programs of education for elementary and secondary teachers; directing workshops and planning local preschool conferences; acting in official capacities in state-wide committees in cooperation with the Southern States Work Conference; serving officially on the State Committee on Teacher Recruitment, the Advisory Committee on Teacher Education, and the Council on Public Higher Education; and the responsibility of examining all transcripts of credits, and issuance of all certificates. Also, the personnel of this Division participated during the school year 1946-47 in the over-all plan of general supervision in cooperation with all other staff members of the Bureau of Instruction. Further, during the past biennium the Director has served as Chief of the Bureau of Instruction for the purpose of coordinating all related activities in the following areas of service: High School Supervision, Negro Education, Elementary Supervision, Health Education, Library Services, and Administering Free Textbooks.

An examination of the record of certificates issued and renewed over the past five year period is revealing. Prior to the war approximately 5500 certificates were issued or renewed annually as shown in Table V. During the past biennium approximately 10,000 certificates have been issued or renewed annually. This is one evidence of the

TABLE V
Number of Certificates Issued or Reissued
1939-40—1946-47

	Regular Certificates		Emergency Certificates		Totals
	Issued	Renewed	Issued	Renewed	
1939-40	2901	2600	.....	.....	5501
1940-41	2351	2356	53	.....	4740
1941-42	2255	2456	336	89	5156
1945-46	1671	1714	2378	2781	9544
1946-47	2765	1487	2339	3166	9757

increase in the services of the Division of Teacher Education and Certification.

As shown in Table VI, the funds collected from fees charged for issuing and renewing certificates has more than doubled since 1940-41, the beginning of the emergency period in teacher education.

TABLE VI

Funds Collected by Years from Fees Charged for Issuing and Renewing Certificates

1940-41	$ 6,911.98
1941-42	7,879.54
1942-43	13,031.25
1943-44	12,437.49
1944-45	11,576.51
1945-46	14,324.73
1946-47	14,764.59

For issuing certificates a fee of $2.00 each is charged, and for renewing certificates a fee of $1.00 each is charged. The income goes into the general fund.

Publications in Teacher Education. The personnel of this Division has participated in planning and producing the following bulletins released monthly by the State Department of Education:

No. 6, August, 1945	Kentucky's Approved Facilities for the Education and Training of Veterans
No. 7, September, 1945	Measuring the Community School
No. 1, March, 1946	Procuring Teachers for 1946-47
No. 4, June, 1946	Getting the Primary Reading Program Under Way (third reprint)
No. 6, August, 1946	Handbook of Audio-Visual Materials for Ky. Schools
No. 7, September, 1946	School-Community Health Education Service (reprint)
No. 11, January, 1947	Thoughts Have Wings (Ky. Poetry Day)
No. 12, February, 1947	Evaluating the Community School (revised)
No. 3, May, 1947	Getting the Health and Physical Educatio Program Under Way in the Elementary School
No. 4, June, 1947	Getting the Intermediate Reading Program Under Way
No. 6, August, 1947	Building a Program for the One-Room School
No. 7, September, 1947	Education on the March

Teacher education circulars, community school circulars, and teacher recruitment circulars have continued to be produced and given wide distribution.

Teacher Recruitment. The Kentucky program of Teacher Recruitment has received national recognition. In launching the National Selective Teacher Recruitment Campaign, the Executive Secretary stated that the program which had been under way in Kentucky for two years was one of the three experiments which served as a basis for the national

program. This program, inaugurated in March, 1945, is a cooperative enterprise on the part of the State Department of Education, the public and private schools, the Kentucky Congress of Parents and Teachers, the colleges of the state, Delta Kappa Gamma, and other organizations. Some of the results are the following:

a. Twenty-five teacher recruitment circulars have been prepared and released to all high school libraries.
b. Publicity of the serious teacher shortage problem was made through the press, the radio, and education conferences with a view to creating on part of the profession and the public their responsibility to relieve the causes of this situation.
c. Future Teacher Clubs were organized in many high schools and a state organization of Future Teachers was effected. It became affiliated with the Kentucky Education Association.
d. The State Board of Education adopted regulations relative to improvement in classroom conditions.
e. Two hundred and sixty-five of the 1947 seniors who ranked high in personality, high in character, high in leadership ability, and high in scholarship were recruited for training for the teaching profession. All the teacher education institutions in the state cooperated fully in this program.

This is the beginning of a program of selective recruitment for the teaching profession.

In-Service Training of Teachers. Approximately 70 off-campus county workshops with 5000 teachers enrolled have been conducted by the teacher education institutions in cooperation with the Division of Teacher Education and Certification during the period 1943-47. On-campus workshops with approximately 1000 teachers enrolled have been conducted during this period. This technique of training teachers was born out of the emergency but the value of it has been recognized and workshops will probably continue to be employed in a program of in-service training of teachers.

Under the leadership of the Director of this Division, a workshop in health education was conducted during the summer of 1946 by the University of Kentucky with 70 persons participating from 42 school systems. In the summer of 1947 the second workshop in health education was conducted by the University of Kentucky and directed by the Director of this Division. There were 42 supervisors enrolled from 26 school systems. This was a leadership training workshop in the area of health education as a integral part of the total school program.

During the past four years the State Department of Education has secured and expended $45,800.00 in Foundation Funds for the exclusive purpose of conducting workshops to guide teachers in organizing better school programs, developing enriched curriculum materials, and in using better methods of improving classroom instruction. In-service education of teachers has now been recognized and established as a significant part of a total program of teacher education.

The Cooperative Study and Teacher Education. In 1943 the Cooperative Study of Teacher Education got under way. This study was financed by a $12,000 grant by the General Education Board. Five state colleges and two non-state colleges participated directly in this study over a four-year

period in cooperation with six total-county-school systems and two individual schools in a seventh county. All other teacher education institutions in the State participated indirectly throughout the study. The purpose of the Cooperative Study of Teacher Education was to make teacher education more functional as an agency in the improvement of the quality of living through education, to improve programs of in-service and pre-service teachers in giving the service society demands. Machinery was set up which would stimulate all people interested in the pre-service and in-service education of teachers to come together and work together on common problems. Throughout the four years, 1943-47, there has been a marked increase of interest in the disposition of colleges and college staffs and public school people—classroom teachers and administrators—to work on problems which concerned all alike. The study has promoted a high degree of friendliness.

A major activity of this cooperative enterprise during the year 1946-47 has been the revision of certification requirements in the light of the experiences gained through this study. Representatives from the colleges and public schools have worked together in a state-wide conference and in state-wide committees in modifying the curriculums for the pre-service program of education of teachers and these curriculums, which will serve as guides for the certification of teachers, are now in the process of being approved by the Advisory Committee, the Council on Public Higher Education, and the State Board of Education.

The Cooperative Study on Teacher Education has made a definite contribution in strengthening the cooperation between the higher institutions, the public schools, and the Department of Education. The high degree of cooperation now existing at all levels of education should be directed in the immediate future to some of the following problems in teacher education:

1. A careful study should be made of those problems of public education which can be met through higher education and this study should result in making higher education in the State more available to more people and more functional in the solution of the human problems of living.

2. Young people in sufficient numbers are not entering teacher education programs and this problem requires a study of the financial status of high school graduates of superior ability who fail to attend college.

3. A program of selective admission to teacher education, based on supply and demand, should be set up and accepted by each State teacher education institution and the State Department of Education as a responsibility.

4. A strong guidance committee in each college should work with the Freshman classes with a view to selecting young students who offer promise of becoming good teachers and helping them to see the advantages in preparing to teach.

5. Every phase of the college should be employed in making the teacher education program on the campus more functional and more appealing and challenging to students of superior ability.

6. An in-service program of education is a necessity. This means that off-campus education should receive increased emphasis. It is inevitable that many poorly educated persons will continue in service until the supply of qualified teachers catches up with the demand of Kentucky classrooms. This means that extension teaching, problems courses, and workshops will be a necessary part of the teacher education program for the years immediately ahead.

7. Emergency teachers who offer promise of becoming good teachers should be screened through supervisory programs and encouraged to meet training requirements for regular certificates.

8. The minimum standards for certification of elementary teachers should be raised to a level equal to that required for secondary teachers just as rapidly as there is reasonable assurance that higher standards can be met. Raising standards and increasing salaries must be undertaken at the same time if these movements are to produce permanent values in the profession and in society.

9. Teaching should be made so satisfying and attractive that the best minds and personalities will be attracted to the profession.

10. Teachers should be given freedom to participate in the planning and the operation of the school program.

If education is democracy's life line, it must be made strong. If the present weaknesses in education are to be eliminated and if future crises are to be averted, the teaching profession must be made strong through adequate salaries, devotion to the profession, effective teaching, reasonable length of employment, favorable working conditions, community recognition, freedom of self expression of teachers, and selection of superior teacher candidates. Attention to these needs demand immediate action if education in Kentucky is to move with force and general effectiveness.

BUREAU OF VOCATIONAL EDUCATION

Division of Vocational Education

During the five-year period 1941-45 Vocational Education in all of its phases was called upon to make adjustments more rapidly and to expand its services on a broader and more rapid basis than ever before in the history of this program of education. Workers for the war industries were needed and time was the most important element. Adjustments and changes in curriculums had to be made rapidly. Teachers had to acquire new skills and master new methods of training workers in the shortest period in history. The war effort made necessary the immediate employment of many thousands of persons with specialized skills. History will record the fact that vocational workers arose to the emergency and met the situation in a manner which enabled the United States to field the largest military force of all time.

During the past two years an almost equally urgent demand for readjustments has faced the country. Although we did not have our armies in actual combat, readjustments in almost all walks of life have faced the people of the country. War plants had to be converted to peacetime operation. Almost all farm machinery, automobiles and many

other essential types of machines, both for industry and for the household, had been completely out of production during the war years. There existed a big backlog of orders for all such types of equipment. Workers trained for war industries had to be retrained for peacetime pursuits. More than 15,000,000 Americans had been in the armed services. These men and women had to be mustered out and gainfully employed in peacetime pursuits in a relatively short time—again the demand for readjustments in curriculums and in the offerings to vocational students in all walks of life. Vocational Education has met this situation and is continuing to meet it ably and effectively.

Almost every country in the world faces food shortages that in many cases are acute. The greatest demand in the history of any nation has been placed on the United States to provide food for countries, some of whose people are on dangerously low diets. The youth of many nations will develop into sickly, diseased adults unless the United States meets the situation. This means food production, food processing, transportation, and distribution. Vocational Education has done much to help countries make satisfactory progress on the road back to normalcy during the past two years.

The reconversion period continues to make demands upon vocational teachers to provide the type of specialized workers that the country needs at the present time. Many war workers and rural people who found it possible to live profitably in the cities during the war have returned to the farms and villages during the past two years. Many of these persons have been given part-time and evening courses in farming and homemaking. This instruction is continuing. During the past two years Kentucky has enrolled more than 10,000 veterans in farm classes alone. The peak of the enrollment in farm classes is not yet in sight. Farm production practices have materially changed during the past two years and many tasks formerly performed by hand are now done by machine. This has also made additional instruction necessary. Many changes have been made in disease prevention and control, both with plants and with livestock. Teachers of agriculture have kept up to date and have carried this instruction on to their students, both youth and adults. New home appliances are becoming increasingly numerous and homemaking teachers are instructing the young women and adults in their classes in the use of these appliances to the end that the home is a more convenient and a more attractive place in which to live. Workers in the skilled trades have been confronted almost daily with the need for new abilities in the operation of new appliances continually coming on the market.

Distributive Occupations workers have received the training that has enabled them to keep up with the new developments in every-day life in the processing, packaging, transportation and distribution of consumer goods to a rapidly growing population.

TABLE I

The number of people served by Vocational Education during the past two years is as follows:

	1945-46	1946-47
Agriculture (Regular Program)	11,722	13,036
Farmer Training Program for Veterans	2,653	9,323
Home Economics (Regular Program)	14,780	15,983
School Lunch	100,000	156,470
Trades and Industry (Regular Program)	4,556	7,089
Trades and Industry (Veterans' Program)	781	2,829
Distributive Occupations (Regular Program)	9,391	10,067
Distributive Occupations (Veterans' Program)	117	90
Totals	144,000	214,887

AGRICULTURAL EDUCATION

The program of agricultural education has expanded during the biennium. The number of departments has increased from 184 during the school year 1944-45 to 227 during the school year 1946-47. Enrollment has also increased during this period. The average enrollment per department of all-day high school boys increased from 31 for the school year 1944-45 to 38 for the school year 1946-47. The program of instruction in agriculture for out-of-school persons has been continued during the biennium. Young farmer classes, for young men out of school between the ages of 16 and 25, who are not yet established in farming, have been continued throughout the state during the school years 1945-46 and 1946-47. One hundred and forty-one classes, with an enrollment of 3,578, were conducted by teachers of vocational agriculture during the school year 1945-46. A large number of the young men enrolled in these classes were veterans. Many of these are now enrolled in the institutional-on-farm program for veterans. During the school year 1946-47, 110 classes were conducted with an enrollment of 2,247. The adult farmer program increased from 109 classes with an enrollment of 1,942 during the school year 1945-46, to 126 classes with an enrollment of 2,236 during the school year 1946-47.

In addition to the program of instruction for boys enrolled in all-day classes, young men enrolled in young farmer classes, and farmers enrolled in adult farmer classes, a program of instruction in agriculture has been developed for veterans. Under this program a full-time course of instruction is provided for veterans who have facilities for, and who wish to enroll in, a training program in agriculture. This program requires 200 hours of class instruction and individual instruction on the farm of not less than 100 hours for each veteran. Each veteran carries on a full-time farming program under the supervision of the agriculture teacher. The institutional-on-farm program for veterans began operation in Kentucky in January, 1946. During the first year there were 2,653 veterans enrolled, and by the end of the school year 1946-47, this enrollment had increased to 9,323. The cost of the institutional-on-farm training program has been paid from funds secured from the Veterans

Administration at a tuition rate of $15.00 per month per veteran for the period beginning January, 1946, to June 30, 1947. The tuition rate was increased to $20.00 per month per veteran, beginning July 1, 1947, to take care of increased salaries and other added costs. The tuition charge is used for salaries and travel of teachers and incidental costs. Costs of supplies, books and tools for veterans are paid in addition to the tuition charges. All moneys are paid to the state by the Veterans Administration and the state reimburses local boards of education for the cost of operating the program. All institutional-on-farm programs are operated by the high schools through departments of vocational agriculture. An additional teacher of vocational agriculture is added to the staff by local boards of education for each 20 to 30 veterans enrolled. The supply of fully qualified teachers of vocational agriculture was not adequate to meet the demand for teachers. During the summer of 1947 a training program was operated by the University of Kentucky to train a number of teachers. More than 150 teachers were enrolled in this training program. In addition to this pre-service training program, all teachers are given in-service training by the staff in Agricultural Education at the University of Kentucky. Once each month the teachers are brought together in each of the nine districts and given help by the teacher-trainers in Agricultural Education. To adequately supervise the program, seven assistant supervisors were added to the staff. An assistant supervisor of agricultural education has been assigned to each of the nine districts to supervise the program and assist teachers with instruction. The salary and travel of these supervisors are paid from tuition received from the Veterans Administration. The cost of the increased clerical staff is paid from funds received from the Veterans Administration.

The program of food production-conservation has been carried out during the biennium. One hundred and fifty-one canneries have operated with approximately 50,000 families processing between three and four million cans of food each year. Local boards of education have increased the amount of equipment in the canneries, thus making it possible to improve the effectiveness of the instruction in this program.

The Future Farmers of America, a national organization of farm boys studying vocational agriculture in high school, is an integral part of the program of vocational agriculture. Each department of vocational agriculture has an active F. F. A. chapter. Leadership training is an important part of the program of work of each F. F. A. chapter. The program of work of each chapter is planned and carried out by boys working in committees. The F. F. A. Convention was held in Louisville each year of the biennium with an attendance of more than 600 in 1946, and more than 800 in 1947. The State Fair was held each year of the biennium and F. F. A. members took an active part in judging contests and in exhibiting livestock and crops. Three fat lamb shows and sales were held with more than 1800 lambs exhibited. Future Farmers increased the number of entries in the fat cattle shows which were held in Louisville in November each year of the biennium.

HOME ECONOMICS EDUCATION

The program of vocational home economics is designed to improve personal, home and family living through the training of youth and adults for the vocation of homemaking. All-day classes, part-time classes, and evening classes are provided to give this training. Table IV shows the number of all-day departments, part-time classes and evening classes, together with the enrollment during the past two years.

TABLE IV. Number of All-day Departments, Part-time Classes, and Evening Classes in Home Economics, and Enrollment, by Years

	1945-46		1946-47	
	No. of Depts. or Classes	Enrollment	No. of Depts. or Classes	Enrollment
All-Day Departments	266*	13,420	259	13,678
Part-Time Classes	22	345	26	369
Evening Classes	60	1,015	52	1,003
Total		14,780		15,983

* Three departments had no Federal funds.

During the biennium there has been a slight decrease in the number of all-day departments, part-time classes, and evening classes. In 1945-46, 17 departments were closed. Seven of these departments were re-established during 1946-47. During the year 1946-47, 19 departments were closed in adddition to the 10 which were closed during 1945-46 and not re-established. During the biennium, 7 new departments were established and 6 departments which had been closed during the past biennium were re-established. The shortage of teachers in certain localities in the state was the cause for closing the departments. The shortage of funds and of teachers prevented the establishment of more than 7 new departments during the biennium. During 1945-46, 25 emergency teachers taught in vocational home economics departments and 24 emergency teachers were employed in 1946-47 in vocational home economics departments.

Each year of the biennium help was given to all teachers on planning and adjusting homemaking programs. This help was given through conferences, visits, teaching materials, and workshops. In 1945-46 thirteen bulletins and Teaching Hints were prepared and sent to teachers, and in 1946-47 six such publications were prepared and sent. In 1945-46 conferences were held to give help on teaching family relationships, on serving as F. H. A. advisers, on working on a cooperative program of food production and preservation, and on making profitable use of eleven and twelve months' employment. In 1946-47 conferences were held to give teachers help on using the new tentative state course of study, teaching housing, serving as F. H. A. advisers, carrying on summer employment, working with adults, and operating the school community canneries. The State Department also cooperated with the University of Kentucky in having a workshop on the teaching of personal and family relationships during the summer of 1945, and with workshops on planning a state course of study and on teaching housing during the summer of 1946.

Some of the developments in the program during this biennium have been:

1. The work started in 1943-44 on the improvement of the total homemaking program was continued. In 1945-46 the activities for improving the total homemaking program included giving help to

teachers on the teaching of personal and family relations. Material prepared at the University of Kentucky workshop was made available in the form of bulletins. One bulletin dealt with the girl, herself, and her relationships with others. This bulletin gave suggestions to the teachers on how to help girls solve some of their personal problems and their problems dealing with relationships. Another bulletin gave suggestions to teachers for working with out-of-school young women on problems of family relationships. A third bulletin gave suggestions on ways to work with adults on problems dealing with relationships. Help was given in conferences on how to use the suggestions given in the bulletins.

In 1946-47 the activities for improving the total homemaking program included preparing a tentative state course of study, giving help to teachers on how to use the course of study, and giving help on methods of teaching housing. A group of teachers working at the University of Kentucky drafted the tentative course of study using all materials that had been previously prepared during the homemaking improvement program. This course of study was made available to teachers at fall conferences and help was given to them on how to use this course of study. Special emphasis was given to the housing area and help was given to the teachers on ways of improving the teaching of housing. Teachers were asked to use the course of study during the year and to make suggestions at the close of the year for changes in at least one area of the course of study. Suggestions submitted by teachers are to be used in revising the course of study.

2. More training was given to beginning teachers, emergency teachers, and teachers who had not taught for a number of years. Early in the fall two two-and-a-half–day conferences were held for the purpose of helping these teachers do a better job. At these conferences various parts of the homemaking program were discussed and help was given to them on planning their total programs.

3. The Kentucky Association of Future Homemakers of America, which is a part of the National organization of pupils who study homemaking in junior and senior high schools, has shown much progress during this biennium. This organization was founded late in the year of 1944-45. The Kentucky Association was the first association in the United States to qualify for a state charter and received State Association Charter No. 1. In 1945-46 there were 122 chapters with a total of 4,231 members. In 1946-47 there were 141 chapters with a membership of 5,326. Plans for the development of the organization have been made by the girls working under the direction of state, district, and local advisers. Besides the work of the local chapters, the work of the Association has been carried on by 10 district organizations, the State Excutive Council and meetings of the State Association at which each chapter had the privilege of being represented by two official delegates. Each of the 10 districts has its officers and have held at least two meetings during each year. These districts have made recommendations to the state regarding the development and work of the organization and recommended girls for state officers. The State Executive Council has made many decisions for the state organization. Their work may be

illustrated by a description of what they did at their meeting in the fall of 1945. At a two-day meeting they set up a provisional state constitution, a pattern for the local chapter constitution, adapted the installation and initiation services for use in the state, adopted a program of work for the year and made plans for an honor roll system. During both years of the biennium a state meeting was held at Eastern Kentucky State Teachers College. Emphasis at the 1946 meeting was given to developing leadership and giving information and inspiration relative to the F. H. A. program. At the 1947 meeting emphasis was given to ways in which chapters could improve recreation in their own communities as well as to the development of leadership both on the part of the girls and the advisers.

Each year of the biennium three state F. H. A. newsletters were published and distributed to all chapters. These newsletters were prepared by a publicity committee, the work of which was guided by one of the local F. H. A. advisers and a member of the State Staff.

Each chapter plans a definite program of work for the year which is based on the state and national programs of work. Reports from chapters showed that each year chapters rendered services to the homes, the schools, and to the communities, that improve home and family life. Sixty per cent of the chapters indicated that three-fourths, or more, of their members made contributions to the improvement of their homes and families during 1946-47.

One of the National officers in 1946-47 was a Kentucky girl. She served as chairman of the public relations committee and, as such, was a member of the National Executive Council. The State Supervisor of Home Economics Education is a member of the National F. H. A. Advisory Board and a member of the Executive Committee of the Advisory Board.

4. The Food Preservation Program has continued to receive emphasis in the program of work during 1945-47. Each year of the biennium help has been given teachers on making the food program a year-round program, and on ways of working cooperatively with the agriculture teachers in carrying on the program. Help has also been given on the care and use of cannery equipment and on new trends in canning procedures. A training course has been offered each year for teachers of home economics working with the cannery program, who had not previously had training. Members of the agriculture and home economics staffs assisted in teaching this course. The number of families using the canneries and the volume of food canned has increased during this biennium.

5. The adult program in home economics education has become more a part of the total homemaking program. Each year of the biennium teachers have been encouraged to include instruction for adults as part of their total homemaking program. During the past year, special emphasis has been given to instruction for veterans' wives to help them with problems of homemaking. A bulletin was prepared for teachers giving suggestions for working with young women on the problem of feeding the family.

In addition to the organized part-time and evening classes, help has been given to adults through the school community cannery program,

group meetings, and through such informal means as having conferences, giving demonstrations at homes, making home visits, and making books, bulletins and other informational materials available to them. Approximately three-fourths of the teachers have included work with adults as part of their homemaking programs during the school year 1946-47. Reports of the summer employment during the year 1946-47 show that more than 7,000 adults were given help by homemaking teachers.

6. Teachers, teacher trainers, and members of the State Department have worked more cooperatively in planning the home economics education program in the state. In 1945-46 an association of home economics teachers was formed with the district presidents' group serving as the executive council of this organization. By-laws were set up for the district and state organizations and officers were elected. The officers of this association served as members of the state recommendations committee which has as one of its purposes making suggestions for the state program of work by presenting needs of teachers and giving suggestions as to how these needs can be met. The district oranizations have assumed a major responsibility in evaluating and making suggestions for improving the course of study.

In 1945-46 and 1946-47 each institution training vocational home economics teachers helped in planning a program of work for the teacher education group by having one representative on a teacher education program of work committee. In addition to planning the program of work for the teacher education group, the committee made suggestions to be presented to the State Recommendations Committee on the program of work for the total homemaking program. Representatives of this committee served as members of the State Recommendations Committee. The State Recommendations Committee made up of representatives of teachers, teacher trainers and the State Staff has assisted in planning the program of work for each of the two years.

7. Improvements have been made in the home economics teacher education program. Each year of the biennium a teacher education conference has been held. In 1945-46 the group set up the characteristics of a good teacher, and criteria for evaluating a good homemaking teacher education program. Each institution evaluated its existing program, and the common weaknesses of all teacher training institutions were listed. In light of this evaluation, long-time goals were set up for the teacher education group in Kentucky.

The teacher education conference in 1946-47 was for the purpose of making recommendations regarding policies to be included in the new State Plan for home economics education. Some of the problems on which they worked were: securing a desirable directed teaching center, setting up professional education requirements, setting up home economics and related field requirements, setting up requirements other than curriculum, and determining the qualifications of teacher trainers.

Some of the developments in the teacher education programs as shown by their reports and visits to the various teacher education institutions are:

a. A greater effort has been made to give students more experience in planning a homemaking program. This planning has included

not only the planning of a course of study but also the planning of a calendar of activities of the homemaking program.

b. Experience has been given to prospective teachers in using materials made available to them from the State Department of Education and from the University of Kentucky. The various institutions reported the use of the tentative state course of study with their students in methods and student teaching work. The number of requests for this course of study from new teachers going on the job shows that they have had experience in using this course of study.

c. More experience has been provided for prospective teachers in working with adults. All but one teacher education institution reported that their students have had experience in observing and participating in the teaching of adult groups. Three of the institutions reported organizing groups for veterans' wives who were living on the campus and giving the students the opportunity of helping to plan, promote, teach, and follow-up the work with this group. Other institutions reported that student teachers worked with the adult programs in their directed teaching centers.

d. All of the teacher education institutions, except one, gave prospective teachers actual experience in working with the F. H. A. All but one of the directed teaching centers had an active chapter of F. H. A. and student teachers had the opportunity of working with a chapter as well as learning about it in their methods courses.

e. More training has been given for helping with the school lunch program. Two of the teacher education institutions reported the addition of a course in lunchroom work. These courses included laboratory work in college cafeterias, and one of the courses also included experience with the high school lunch program.

SCHOOL LUNCH PROGRAM

An increasing number of schools in Kentucky are including the school lunch as a part of the total educational program. In schools where the reimbursed lunch program has been in operation for several years, superintendents and teachers are reporting that attendance is improved, discipline problems are fewer, and children are healthier and happier. Many schools recognize and use the lunch program as a laboratory for teaching health.

Funds to aid schools in the operation of a lunch program have been made available by the Federal Government. The National School Lunch Act—Public Law 396, was approved June 4, 1946 by the 79th Congress. This law requires that the operation of the lunch program at the state level be administered by the State Department of Education under an agreement with the U. S. Department of Agriculture. The agreement stipulates that the state shall match federal funds dollar for dollar through the year 1950 and that for the succeeding five-year period the state shall provide $1.50 for each dollar of federal funds provided. For any fiscal year, thereafter the state is to provide $3.00 for each federal

dollar received. The state's "matching fund" will include not only actual cash expenditures, but the reasonable value of donated services, supplies, facilities, and equipment.

TABLE V. Reimbursement Received Each Year for School Lunch Program and the Number of Schools Receiving Reimbursement During Period 1943-47

Year	Amount of Reimbursement	No. of Schools Receiving Reimbursement
1943-44	$ 428,461.72	450
1944-45	852.554.64	684
1945-46	1,137,348.72	746
1946-47	1,708,717.00	923

Funds received by schools for school lunch programs for the past four years and the number of schools receiving funds each year is shown in Table V. The number of schools participating in the National School Lunch Program has doubled in the past four years. During the year 1946-47, lunch programs were in operation in 115 counties in the state. There is, however, need for greater participation since during 1946-47 approximately 15% of the schools in Kentucky were being reached by the program and 42% of the school children in Kentucky had an opportunity to participate in the National School Lunch Program. This, also, shows a need for the program being developed in more of the smaller schools.

In 1946-47 funds were available to reimburse schools participating in the program for the purchase of approved equipment. These funds made it possible for many schools in Kentucky to improve the physical set-up of their program. Some schools could not have started the program without these funds. The bases on which funds were allocated to the various schools were need, size of school, and number of children participating in the lunch program. During the year, 731 schools received $328,988.20 for the purchase of approved equipment. Approximately 49% of this amount was spent for refrigerators, 19% for stoves, 11% for china, glasses, silverware and trays, 9% for sinks and dishwashers, 4% for steam tables, 3% for cooking utensils, 1% for cabinets and dish carts, and 4% for miscellaneous items.

The distribution of commodities donated by the U. S. Department of Agriculture was another important phase of the program. During the biennium, the following commodities were distributed to superintendents who had signed an agreement with the State Department of Education:

In 1945-46, beets, 97,153 lbs.; cabbage, 55,280 lbs.; green beans, 14,014 No. 10 cans; Irish potatoes, 1,229,010 lbs.; sweet potatoes, 53,540 lbs.

In 1946-47, American cheese, 126,240 lbs.; green beans, 24,138 lbs.; beets, 68,450 lbs.; canned apricots, 3,000 No. 10 cans; canned figs, 6,000 No. 10 cans; cabbage, 72,200 lbs.; Irish potatoes, 3,283,400

lbs.; peach jam, 1,440 No. 10 cans; pineapple (crushed) 68,016 No. 10 cans; onions, 330,000 lbs.; orange juice, 40,038 No. 10 cans; sweet potatoes, 53,700 lbs.; tomato juice, 58,254 No. 10 cans.

An allotment of $16,800 state funds was provided each year of the biennium to be used for the administration and supervision of the program. In June, 1947, an additional sum of $650 was received from the Governor's emergency fund. The administration and supervision of the program was under the direction of the State Supervisor of Home Economics Education. Two assistant school lunch supervisors worked with schools in the state, one in the eastern half of the state and the other in the western half of the state. Because of the rapid growth in the size of the program, it has been difficult to give adequate supervision to the program. Fewer schools were visited in this biennium than in the preceding biennium. During each year of the biennium conferences have been held to explain the details of the program, bulletins have been prepared and sent to schools giving help on school lunch problems, and assistance has been given in workshops for teachers and for school lunch workers. During the summer of 1946 the State Department of Education cooperated with Murray State Teachers College in a workshop for school lunch workers in the western part of the state. Help was given on problems relative to planning menus, preparing food, buying food, arranging and purchasing equipment, managing time and energy, and keeping records. Similar workshops were held in several counties in the state during the summer of 1946.

During 1946-47 a committee was appointed by the superintendent of public instruction to obtain information about the school lunch program in Kentucky in order to set up some basic beliefs and recommend policies relative to the lunch program. The basic beliefs concerning the school lunch program as set up by the committee are,

We believe that the school lunch program should be an integral part of the total educational program and that:

1. Many kinds of educational experiences should be provided for individuals.
2. The program should be administered by school personnel.
3. Administrators, teachers, pupils, parents and others in the community should support (or cooperate with) the program.
4. Well-balanced and attractive meals should be made available to all children in the school.
5. Sanitary practices should be observed in the storage, preparation and serving of food.
6. Satisfactory physical conditions should be provided for the storage of food, and the preparation and serving of meals.
7. Good business procedures should be used in managing the program.
8. Personnel should have specific training for jobs to be done and have a background of nutrition information and an understanding of children.
9. The school lunch program should be a part of the student teaching experiences of every teacher.

These beliefs will be used in planning future developments of the program.

TRADE AND INDUSTRIAL EDUCATION

During this reporting period, Trade and Industrial Education has had a complete reconversion from the training of war workers to setting up courses for returning veterans. This necessitated changing shops and equipment so that emphasis could be placed on training for peace time occupations. The regular trade courses for high school students have remained about the same except that more students have been enrolled since the end of the war. Table VI shows the number of students enrolled in all types of courses for the biennium.

TABLE VI

Number of Students in Trade and Industrial Classes

Years	Day Trade	Part-Time	Evening	Full-Time Veterans	Part-Time Veterans	Total
1945-46	1,966	2,412	178	535	246	5,337
1946-47	2,072	4,684	333	1,911	918	9,918

Kentucky has a plan of Area Trade Schools that has moved steadily forward in the last few years. It is part of a national movement whereby specific trade instruction can be centralized in industrial centers. By concentrating equipment in centers results in a better training program. These Area Trade Schools are administered by the local superintendent and Board of Education where they are located. The exception is the three State schools which are administered by the State Board of Education. Chart I shows the Area Trade School centers, the counties covered by each school and the amount of funds expended.

AREA TRADE SCHOOLS

Area Trade Schools are set up to serve High School students, Out-of-School-Youth, Veterans, and other adults who need training for industrial and distributive occupations. The personnel for each school consists of a supervising coordinator, a teacher coordinator in charge of apprentice and extension training, a teacher coordinator in charge of extension training for distributive workers, an inspector in charge of inspection and supervision of On-the-Job training programs for veterans, instructors of regular and veterans' classes, and necessary clerical personnel. About 6,093 industrial and business firms have been approved for On-the-Job training for veterans.

These schools are well equipped with machines and tools supplied from several sources, namely:

1. Purchased from State and local funds.
2. Equipment and buildings turned over to Vocational Education from the N. Y. A. Program.
3. Surplus equipment from war plants, etc.
4. Equipment from the War Training Program.

The George-Barden Act makes it possible to add further to the equipment by using Federal funds matched with State funds.

The schools are equipped with machines and tools for instruction in machine shop, sheet metal, auto mechanics, electricity, wood-working, welding, tailoring, barbering, cosmetology, and office practice. The equipment and buildings at these Area Trade School Centers are conservatively estimated at around $5,000,000.00

The courses offered are as follows:

1. Day trade courses for high school students.
2. Pre-employment courses for veterans.
3. Part-time apprentice courses for veterans.
4. Evening courses for employed workers.

The Area Trade Schools set up extension courses at any location within the area for apprentices, employed workers, firemen, foremen, R. E. A. workers, and all types of distributive workers. The courses are carried on by itinerant instructors for the most part. In some cases the instuctors are hired locally and supervised by a teacher coordinator from the Area Trade School.

A very large percentage of the students attending the Area Trade Schools at this time are veterans, and the cost of instruction is financed by the Veterans Administration under a State Contract. As the Veterans Training Program recedes, more out-of-school youth, and adults will enter training. This will call for greater appropriations from State and Federal funds if these schools are to serve the people of Kentucky in industrial and distributive occupational training.

A few high schools in some towns of the State have vocational trade courses, however, this is not practical in most cases. The need is for general industrial art shops in all urban high schools. These shops have not been developed in the last few years because of the lack of trained industrial arts teachers. Since the war, all State Teacher Colleges have a greater enrollment in courses for these teachers, and will soon have an available supply. It is hoped that in the very near future that a supervisor of industrial arts will be placed on the State Industrial Education staff to help to develop shops at the high schools. When these classes are set up, boys will take general industrial training while in high school, and those who wish may proceed to the Area Trade Schools for specific vocational training to prepare them for a job in industry.

DISTRIBUTIVE OCCUPATIONS EDUCATION

The purpose of distributive education is to provide vocational training for those engaged in the field of marketing. During the biennium, Kentucky shifted from a war-time economy to that of a peace-time economy. This meant an increased activity throughout the state in both wholesale and retail businesses. The program of distributive education has been arranged so as to offer the most effective service.

A recent report by the Committee for Kentucky indicates that the retail and wholesale trades in Kentucky now employ the second largest number of people in the state. A further study indicates that three out of five high school students eventually find their first jobs in the field of retailing.

Some of the high points of the program during the past two years were as follows:

1. An overall expansion of the educational offering to serve groups of different levels. The program includes education for high school students who were starting their careers in retailing to that of Institutes for Salesmanagers of Kentucky's larger wholesale operations.

2. More Kentucky high schools established cooperative training programs. Under this plan, the students attend school part of the day and work in a local retail store during part of the day. Under this work-experience educational program, the school gives the related instruction and the business establishment serves as a laboratory.

3. The area vocational schools employed itinerant instructors who taught classes within the area served by the school. These instructors, with a wide experience in business, taught part-time and evening classes.

4. There was an increase in the number of adults who attended classes during the past two years. Part of this was due to the increased facilities of the schools to offer this educational service. However, a second factor was the demands of business for more training programs because of their experience during the war years.

5. A plan, not perfected as yet, was made to offer educational programs in high schools that are too small to establish full-time cooperative teachers. The area itinerant instructors carry this teaching load in addition to the evening class instruction.

6. Supervisory training courses were offered with success to those of management level. These instructional courses were designed as refresher classes for experienced store supervisors and as initial training classes to advance qualified people.

7. Training classes were offered for returning veterans who either planned to go into business for themselves or who planned to work in an established business.

8. Distributive education is the newest of the vocational education services. June 30th, 1947 marked the end of the first ten years of its existence. During that time, the number of students enrolled increased from zero for the school year ending June 30, 1937 to more than 10,000 for the school year ending June 30, 1947.

Cooperative Part-Time

Since 1920 the number of people engaged in retailing has increased more rapidly than in any other field of endeavor. It is estimated that in the State of Kentucky, 10,000 new people are finding their first jobs in the distributive field. The object of the cooperative program is to lay the foundation for store or other distributive work as a vocation.

The cooperative program is offered as a part of the standard high school curriculum. The subject matter is based on actual needs and experiences of the pupils, and the instructors for the classes have had work experience in retail stores. Each student spends fifteen hours a week in school and a minimum of fifteen hours a week in store work. The program is coordinated by the teacher, through frequent contacts

with the employer as well as the employee on the job in the store. Thus the student not only receives vocational training in school, but also is supervised in his first job by the school.

Evening and Part-Time Extension

According to the latest census report, more than 100,000 people in the State of Kentucky are engaged in distributive trades. The function of this ever increasing group is to provide consumers with goods and services. The purpose of the evening program is to improve the skills and abilities of those engaged in a distributive vocation, so that they can offer the best possible service to the consumer. Classes are organized on the basis of needs of the workers and are taught by people with experience in the particular field. Courses are organized to meet the needs of three groups: first, conferences and clinics for owners, managers and store executives. The programs are designed to aid in the solution of store operation problems; second, sales courses for experienced workers. These include classes in merchandise, studies, sales techniques, display techniques, store arithmetic, store English and the like; third, classes for those with little or no experience. These include pre-employment training classes, classes to improve workers on their present jobs and supplementary training classes to advance workers to other jobs in the trade.

Veterans

Statistics indicate that one out of each six employed workers in Kentucky are engaged in a wholesale or retail occupation. Guidance clinics conducted among members of the armed forces indicate that the percentage of veterans interested in merchandising is even higher. The educational offering in distributive education has been planned to take care of this need.

Two types of classes were organized during the past two years. One, classes for those who are employed and can only attend school in the evenings. A complete curriculum was developed with instruction to continue over a two-year period. One phase of the instruction is designed to improve those who are employed by an existing business. The second phase is designed to improve those who wish to be self-employed.

The second type of class is the all-day school designed for those who can attend school full time. In some instances, the veterans are enrolled in the regular high school cooperative classes. In other cases, special classes for veterans only have been established. The full training period in these latter classes includes six hours of instruction per day for a period of eleven months.

CHART II

Number of Students in Distributive Education Classes

Years	Part-Time Cooperative	Part-Time Extension	Evening	Full-Time Veterans	Part-Time Veterans	Total
1945-46	567	6,980	1,844	----------	117	9,508
1946-47	770	6,683	2,614	15	75	10,157

WEST KENTUCKY VOCATIONAL TRAINING SCHOOL

The West Kentucky Vocational Training School for Negroes.

The West Kentucky Vocational Training School at Paducah, Kentucky, at the end of the school year 1946-1947, closed its 8th year of service to the youth and the State of Kentucky. At this time it finds its aims and objectives being more rapidly accepted by an awakening trade-conscious people. Thus, the school is destined definitely to become an important part of Kentucky's expanding school system.

The school is strictly a vocational school, designed to equip the Negro youth with a worthwhile trade, and to fit him for future usefulness to himself and to his country.

West Kentucky is staffed with a full and competent faculty, an Acting President and Business Manager, a Coordinator, a Registrar-Secretary, a Secretary to the Acting President and Business Manager, a combination Staff Physician and Class room lecturer for Cosmetology and Barbering, a Matron, Librarian, and five regular workers. The offices of Acting President, Business Manager and Coordinator constitute the executive branch of the school.

All trade departments are well equipped, well organized and in full operation, and are as follows:

Carpentry	Barbering	Trade Sewing
Cabinet Making	Chef Cooking	Home Services
Tailoring	Office Practices	Beauty Culture
Auto Mechanics		

Along with each trade, related subjects are taught to the end that the trainee may attain proficiency and understanding of the vocation and its relationship to the world of work as well as to other desirable activities in which people in a democracy must engage.

All of the trade courses are set up on a two-year basis except Barbering and Beauty Culture, each of which may be completed in one school year.

The school also carries a number of extracurricular activities—music clubs, debating clubs, basketball and football.

An Approved Veterans Training School.

The West Kentucky Vocational Training School has been fully approved by the United States Veterans Administration for the training of veterans, and during the school year 1946-1947, 145 veterans of World War II registered in the various trade departments, taking advantage of the training offered under the G. I. Bill of Rights. Twenty-seven veterans were graduated from the Barbering course and 1 from the course in Auto Mechanics. In order to meet the heavy requests by veterans for this training, plans are now under way to add several new trade departments.

Aims and Purposes of the West Kentucky Vocational Training School.

The aims of the West Kentucky Vocational Training School are:

1. To help the student find himself and become skilled in a worthwhile trade or vocation.

2. To help the student form a philosophy of the world, and of human relations, and of one's part in the making of the future through actual practice in work which embodies this philosophy.
3. To help the student develop into a respectable, self-supporting citizen of the community in which he lives.

A Summary Biennial Financial Statement of West Kentucky Vocational Training School

Paducah, Kentucky

FOR THE SCHOOL YEAR 1945-1946

Sources of Revenue		
Legislative Appropriation	$ 48,250.00	
Continued Appropriation	978.00	
From Vocational Division	4,562.50	
Total receipts from all sources		$ 53,790.50
Expenditures		
For Salaries and Wages	$ 34,901.20	
For Instructional Supplies	3,195.70	
For Capital Outlay Account No. 2126	944.00	
For Operation and Maintenance	14,424.51	
Total Expenditures		$ 53,465.41
Unexpended Balance		325.09

FOR SCHOOL YEAR 1946-1947

1945-1946	291
1946-1947	301

NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

Covington, Kentucky

The Northern Kentucky State Vocational School began operation on July 1, 1946, under House Bill No. 58. Prior to that time the school, under the name of the Kenton County Vocational School, had been operated primarily for war training purposes, out of war training funds. The War Training Program closed as of May 31, 1945, and until July 1, 1946 the school was operated on funds transferred from the regular appropriation for vocational education.

Since April 1, 1941 the school has been housed in the old Postoffice Building in Covington, in accordance with a rental agreement between the State Board of Education and the Kenton County Fiscal Court. The Northern Kentucky State Vocational School has been equipped with machines and tools provided through the War Training Program, by surplus equipment made available through the Procurement Division of the Treasury Department, and from equipment made available by the Army and Navy. The equipment now in this school is valued at more than $200,000.

The figure of 10,021 trained war essential employees turned out by the school speaks for itself. During the past two years a large training program has been offered to veterans returning from service in the armed forces. An on-the-job training program for veterans is serviced by the school throughout nine counties in Northern Kentucky.

All full-time and part-time training programs are set up with the guidance of three advisory councils, viz: a council of local school superintendents for all courses, including part-time high school trainees; a council of selected representatives from both labor and industry for all technical training offered; and a council of selected merchants representing management for all distributive training offered.

The following courses of training are offered in the school:

Auto Mechanics	Refrigeration
Electricity	Radio
Machine Shop	Woodworking

Distributive Occupations

Enrollment in the Northern Kentucky State Vocational School for the Year 1946-47

	Enrollment
Regular Day Trade School	266
Distributive Education	230
Total	496

Financial Report of the Northern Kentucky State Vocational School
1946-47

Allotted appropriation	$25,000.00
Expenditures	24,665.19
Balance	$ 334.81

Many veterans are now in training at the Northern Kentucky State Vocational School under a special contract with the Veterans Administration. As the veterans training program becomes smaller, more out-of-school youth and adults will enter the regular vocational classes. This will call for a larger appropriation of State and Federal funds to carry on the training in order to serve the needs of future mechanics and workers in distributive occupations in Northern Kentucky.

MAYO STATE VOCATIONAL SCHOOL

The Mayo State Vocational School was organized in 1938. The institution has as its philosophy the training of young men and women for industrial pursuits. Since the time of its organization, over 10,000 young men and women have been trained. This of course enhances the efficiency of labor, not only in Eastern Kentucky, but in other industrial sections of the nation as well. The schools did a magnificent job during the War Training Program and now have the obligation to train the returning service men as well as the displaced war workers who were thrown out of employment because of Industry's making a shift from war production to civilian production. The demand for training is so great at this time that the institution cannot meet the demand because of a limited budget and building facilities. The program at this institution has been expanded during the last two years. However, the expansion cannot in any way meet the needs as manifested by the great number on the waiting list.

The following is a summary of developments in the past two years:

1. The new shop building that was constructed by the Federal Works Agency during the war has been purchased by the State for the sum of $35,000.00, with payments of $3,500.00 annually until this amount is paid.

2. A school shop has been organized at Belfry. This was made possible through the cooperation of the Coal Industry and the Pike County Board of Education. A complete program of Mine Mechanics Training on a high school level is now being offered, with the understanding that Mine Installation Training will begin sometime in the near future.

3. The Prestonsburg School, that is operated as an extension of this institution, has been reorganized to offer training to all the high school youth of Floyd County. This curriculum has also been organized to serve the Mining Industry efficiently on the high school level.

4. A course in Mine Safety and Mine Rescue Work has been organized at the Mayo School. This was made possible through the cooperation of the Department of Mines and Minerals.

5. The Cosmetology Department has been re-established and organized and is now in operation with full capacity enrollment.

6. The Paint and Body Department and Air Conditioning and Refrigeration Department have been organized with a very efficient training program.

7. The Department of Retail Selling and Merchandising has been organized on the Regular Day School training program. Also, extension classes are offered in this field.

8. Short unit courses are offered at this institution to miners who are already employed.

9. A complete testing program has been established for all people who enter training. From information obtained from the tests, an instructional program is conducted in which an effort is made to improve the academic background of the various students so that they might profit by the training in their respective trades.

10. The Related Instruction Department has been organized to the point where each student may have an opportunity to attain proficiency and understanding of the vocation and its relationship to the world of work.

11. Mayo Manor has been completed as a training project by the various departments of the institution.

Below is a list of courses offered in the Day Trade Program:

Cabinetmaking
Carpentry
Auto Mechanics
Body & Paint Department
Office Practice
Sheet Metal
Air Conditioning & Refrigeration
Drafting
Cosmetology
Industrial Electricity
Welding
Mine Mechanics
Machine Shop
Radio
Mine Safety & Rescue
High School Mine Training
Retail Merchandising

The Mayo School also offers the following services through regular and itinerary instructors:

1. **Evening Trade Extension Schools or Classes.** The purpose is to increase skill or knowledge in the occupation in which the wage earner is employed, through supplementary instruction given during the leisure time of the workers.

2. **Part-time Trade Extension Classes.** The purpose shall be to increase skill and knowledge in the occupation in which the wage earner is employed, through instruction given during working hours.

3. **Part-time Cooperative Classes.** To provide vocational training in school systems where it would be impractical to erect a trade school or even install unit courses, through cooperation between schools and local employers. The class will be made up of workers from many trades and occupations with one or more in each occupation, depending upon the training needs of the community.

Enrollment in the Mayo State Vocational School Resident and Extension Courses

Training Courses	Enrollment 1945-46	1946-47
Regular Day Trade School	225	317
Regular Day Trade School (Veterans)	179	388
Trade Extension	735	976

A FINANCIAL REPORT OF MAYO STATE VOCATIONAL SCHOOL

School Year 1945-46

Allotted Appropriation		$30,000.00
Personal Services	$19,393.01	
Services Other Than Personal	5,120.44	
Material, Supplies, and Parts	3,743.17	
Other Current Expenses	1,209.13	
Capital Outlay	407.00	
Total Expenditures		29,872.75
Balance		$ 127.25

School Year 1946-47

Allotted Appropriation		$35,000.00
Personal Services	$24,899.62	
Services Other Than Personal	3,257.28	
Material, Supplies, and Parts	5,204.36	
Other Current Expenses	910.99	
Capital Outlay	928.75	
Total Expenditures		35,201.00
Balance		$ –201.00
Special Appropriation		$15,000.00
Expenditures		14,268.29
Balance		$ 731.71

If Kentucky is to meet the needs for the many young men who desire trade training, it will be necessary to have an increase in appropriations from the Legislature so that an expanding program can be developed. If we are to preserve our human resources and develop the natural resources through industrial pursuits, Kentucky must have a large backlog of skilled men. This can only be done through an efficient training program.

DIVISION OF VOCATIONAL REHABILITATION AND SPECIAL EDUCATION

Scope and Function

The State Board of Education of the Commonwealth of Kentucky, in cooperation with the United States Government, provides Vocational Rehabilitation services for mentally and physically impaired individuals. Such services include vocational and college training, physical restoration, psychological and psychiatric services, fitting of prosthetic appliances, aptitude and intelligence testing, counselling, guidance, and placement. All services are performed in order to prepare individuals for more remunerative employment in the occupation which they are best fitted to earn a living.

The philosophy underlying the program of Vocational Rehabilitation is predicated on the theory that the extension of special services to the physically handicapped will assist in equalizing their opportunities.

During the fiscal year 1945-46 and 1946-47, this division, thru its local district supervisors, was able to render rehabilitation services to 2,405 individuals in the Commonwealth of Kentucky. Kentucky is one of the leading states of the nation in the number of Vocational Rehabilitation served during the past two years. For purposes of better administration, the state is divided into eleven districts. The district offices are located in the following cities: Paducah, Harlan, Madisonville, Owensboro, Bowling Green, Louisville, Lexington, Somerset, Ashland, Covington, and Hazard.

The service of this division by means of district offices is extended to every county and community in the state.

Cooperative Agreements

It has been the policy of this division to formulate a number of agreements with local, state, and federal offices whereby they make referrals of people to Vocational Rehabilitation for such services as we provide. As a result of this practice, many handicapped persons are found and thereby saved who would never be reached without such arrangements.

Expenditures and Needs

During the fiscal years 1945-46, 1946-47, the state and federal governments spent $480,867.09 for the Vocational Rehabilitation of handicapped people in Kentucky.

If this program is to fully meet the ever increasing need of handicapped people, there should be spent not less than $125,000 for the next biennium 1947-48. Federal funds will be provided for a like amount, making a total of $250,000 for case service to be spent annually.

The federal government is expending considerably more money than the state for Vocational Rehabilitation. Kentucky received less from her legislature than any sister state for the rehabilitation of handicapped people.

The added responsibility of providing Physical Restoration in rehabilitation and services to the blind fully justify the increases requested in state appropriations. Hospital costs are increasing almost monthly and service to the blind is very costly because of the special way in which services are performed. If Kentucky is to adequately meet the needs of its less fortunate handicapped citizens, it must provide more money to do the job.

Handicapped Children

Legal authority for the existence of special education for handicapped children of the Commonwealth lies in Section 4434.33 of the Kentucky Statutes. The present legislation aids in developing state-wide services but LACK of an appropriation to meet the extra per capita costs prevents rapid extension of educational services to the exceptional child.

A cooperative program with the Kentucky Society for Crippled Children through a grant-in-aid to the State Department of Education provides the salary and travel expense for a full-time Supervisor for Handicapped Children as well as the cost of part-time clerical help.

It is now possible to develop a complete service program for the exceptional child, from six to sixteen inclusive, through stimulating interest in and understanding of the educational needs of handicapped children, encouraging experimental programs in local schools, organizing new special education programs as well as evaluating and extending present service to handicapped children of the Commonwealth.

Since February contacts with thirty-five or more cooperating child welfare agencies, both public and private, were effected. Twenty-three school districts were visited with a total of sixty-six contacts. Two new county services have been organized.

Two hundred twenty-nine school districts reported to the Division a total of 5,061 handicapped children known to the schools.

Handicapped Children in Kentucky Showing School Attendance

		Attendance	
		Attending School	Not Attending School
Total	5,601	2,624	2,437
Independent Schools	1,921	1,301	620
County Schools	3,140	1,323	1,817

Special education provisions are made in only ten county districts and in eight independent districts. The total number of handicapped children served by special teachers is estimated to be a few more than one thousand.

DIVISION VOCATIONAL REHABILITATION—CLOSED CASES 1946-1947
REHABILITATED INTO EMPLOYMENT

Types of Disability

	Orthropedic	Deaf	Blind	One Eye	Mental	Polio	T. B. Arrested	Other	Grand Total
Number Served	360	95	52	50	10	77	41	209	894
Weekly Wage Before Service	$ 2,174.00	$ 508.00	$ 126.00	$ 359.00	$ 40.00	$ 196.00	$ 49.00	$ 640.00	$ 4,092.00
Weekly Wage After Service	10,122.00	2,271.00	1,191.00	1,292.00	302.00	2,064.00	1,073.00	5,599.00	23,914.00
Total Cost to Department	$40,978.00	$11,143.00	$6,578.00	$2,834.00	$963.00	$12,758.00	$5,753.00	$29,035.00	$110,042.00

The table shown above represents expenditure of 894 cases served during the past year. The total weekly wage before Rehabilitation was $4,092.00. The total weekly wage after Rehabilitation is $23,914.00, a difference of $19,822. These 894 persons are receiving nearly 5 times as much now as before service. If we assume the wage difference of $19,822 continuous for 52 weeks, we would have a grand total annual salary of $1,030,744.00 for 894 handicapped rehabilitants. The cost to the department, which is recurring cost, amounts to $110,042.00. Hence you can readily see that the difference between cost to department and increase in salary of persons served is over 9 times what the 894 individuals cost the state. Nearly all of these 894 persons now are income taxpayers. It can be safely assumed that they will pay in taxes to the State and Federal Government within a very short time more than enough to pay the original cost of service.

Physical Restoration Services

Since this phase of the program is in actuality just beginning, we present only material for the past six months. There are indeed unusual opportunities for serving the handicapped by physical restoration service. Between January 1, 1947 and June 30, information was recorded.

Between January 1, 1947 and June 30, 1947, information was recorded on the total number of persons whose physical restoration services were well in progress or completed. This study, however, will include information on only those cases whose services have been completed and the persons placed in employment.

Types of Service

During the last six months of the fiscal year just ending, 202 persons received some sort of physical restoration service. Of these 202 persons, 95 were supplied with artificial arms or legs, 38 with hearing aids, 17 with braces, 14 with glasses, 8 with artificial eyes, 2 with trusses, and 1 with arch supports. It is obvious that the fitting of prosthetic appliances is still a large part of the total physical restoration program in Kentucky. Nevertheless, more cases for surgery and medical treatment are coming to our attention each month. A total of 36 different types of surgical and medical treatment were given to those persons who were rehabilitated during the last six months of the fiscal year just ending. This was an increase of 30% over the first half of the fiscal year. Many more cases than this are now in progress, but of course, these will not be closed until a later date. Our records show that since July 1, 1947 plans have been made on 14 persons who are to receive surgery. This is more than one-third of the total number served during the last six months of the fiscal year just ending.

Identifying Information

Of the 202 persons receiving physical restoration, 165 were male and 37 female, 179 were white and 23 colored, and all but 5 were 65 years of age or below, or within the age group commonly considered employable.

Results of Treatment

Medical reports following treatment are now being required on all persons receiving physical restoration. In all of the 36 cases marked improvement was shown. Six persons who were totally blind as a result of cataracts were given surgery. After recovery 1 had 20/20 vision, 1 had 20/30, 1 had 20/40, 1 had 20/50, and 2 showed only "substantial improvement." In other words, 4 of these six persons are now able to engage in most any activity requiring normal sight, while the other two are still somewhat limited. They are, however, far from totally blind. One other person was treated for iridocyclitis and had his vision improved from 10/200 to 20/60 in each eye.

Only two other types of surgery or medical treatment have been given to more than one person. Six have had surgery for hernia and two for hemorrhoids. The remaining 22 persons received 22 different types of treatment. All of these have had satisfactory results and are able to carry on full-time employment.

Vocational Adjustment

The list of occupations shown below is a breakdown of the different jobs in which the persons receiving physical restoration have been placed. It may be noted that 202 were placed in 73 different types of employment.

Farmer	39*	Minister	1
Housewife	20	Pressman, Printing	1
Miner	15	Dietician	1
Sales Clerk	7	Crusher Man	1
Auto Worker	7	Timekeeper	1
Laborer, Process	7	Railroad Car Inspector	1

Laborer, Wrecking	1	Gateman	1
Sheet Metal Worker	1	Candy Vendor	1
Millman	1	Faller	1
		Service Clerk	1

* 16 of these were farm hands who were receiving a wage at the time of closure, while 23 were closed as general farmers.

Forty-three persons were closed as either general farmers or housewives for which no wage was shown. Those who were placed on jobs with a definite salary or wage were earning an average of $29.19 per week. The average wage for those persons who were on the job at survey was $9.35 per week.

The average total cost for all physical restoration services was $123.46 per person.

Kentucky School for the Blind

The State Board of Education operates the Kentucky School for the Blind located in Louisville, Kentucky. This institution has been serving in that capacity for over 100 years. The educational program of this institution includes instruction in all the elementary subjects,

as well as accredited high school work. Some of the subjects included in such an educational program are: music, home economics, commercial work, and other types of vocational courses. The Vocational Rehabilitation Division, in cooperation with the Kentucky School for the Blind, has been able to assist their graduates in additional training and also in seeking employment in various fields of endeavor. Any child between the ages of 6 and 18, having visual handicap which prevents his attendance at the public schools, and being a resident of the State of Kentucky, is eligible for admistance.

The annual appropriation for operation of the Kentucky School for the Blind has been $82,000. The school which has been serving approximately one hundred fifty pupils should have an increased enrollment, since a recent study in the Department of Education showed 293 blind children of school age as not enrolled in any school. The increase requested would also be used to increase salaries of teachers and other personnel whose salaries are inadequate and to meet the costs of much needed improvements in the physical plant.

Kentucky Workshop for the Blind

The Kentucky Workshop for the Adult Blind is located at Louisville, and offers training and employment to adults. This agency is engaged in the manufacture of such articles as brooms, broom bags, mops, etc., which are sold to jobbers on the open market. During the war period they have made a direct contribution not only in production, but also in offering employment opportunities to a large group of blind adults.

The Workshop serves as a training agency for those individuals who desire to be employed later in industry. It will be the responsibility of the Kentucky Workshop to train a much larger group of blind persons in the future.

Vending Stand Program

The Division of Vocational Rehabilitation is the agency in the State authorized to license vending stands operated by the blind. These vending stands are small businesses operated by blind people and provide good opportunities for this group of handicapped individuals. The vending stands are provided through vocational rehabilitation and the program is supervised by special personnel of the rehabilitation program. There are now forty such employment opportunities in the state.

It is anticipated that the program be expanded within the next two years so that there will be about one hundred fifty vending stands providing work opportunities and independence for blind persons.

Department of Education

DIVISION OF VOCATIONAL REHABILITATION

REHABILITATION SERVICES FOR THE BLIND IN KENTUCKY

During the year there were 225 blind persons carried on the rolls. This report will deal largely with the 52 blind persons who were closed from the case load as employed and self-supporting. The remaining 173 cases were distributed as follows at the year end:

112—in the process of further diagnosis, counseling and guidance, and planning of services
8—were receiving physical restoration services
15—were in training
6—were trained or otherwise prepared and awaiting employment
1—was in employment and receiving adjustment services
6—whose services had been interrupted
3—whose services were terminated; individuals not employable
22—who were not feasible of services

Services Rendered Those 52 Who Were Rehabilitated

Physical Restoration

Thirteen of the 52 persons were provided with hospitalization, surgery and artificial appliances. Seven of these were cataract operations in one eye and two were cataract operations in each eye. All nine operated for cataract received glasses following surgery. One was provided glasses only. One was provided treatment for iridocylitis and glasses. One was provided dental surgery and dentures. One was provided operation for hernia.

Results of these services were:

Of the seven receiving cataract operation of one eye and glasses, one had restoration of 20/20 vision; one had restoration of 20/30 vision; one had restoration of 20/50 vision; the other four had substantial improvement to the point that they could no longer be considered as blind.

Of the two receiving cataract operation in each eye, one had restoration of 20/40 vision in each eye and the other had substantial improvement and is no longer blind.

The one receiving glasses only had a small improvement in vision. The one receiving treatment for iridocyclitis had restoration of 20/60 vision in one eye.

The one operated for hernia had full repair. The one provided dental surgery and complete dentures—progress toward complete blindness was arrested.

Training

Nine of the 52 persons receiving training, either in school, on-the-job or in the shop.

Maintenance

Three of the nine trainees were provided room and board while in training.

Training Supplies

Three of the nine trainees were provided training supplies.

Transportation

One trainee was provided transportation from his home to the place of training and return.

Placement Equipment

Three of the fifty-two were provided the necessary occupational tools and equipment.

Business Enterprises Equipment

Two of the 52 were provided equipment and set up in small supervised businesses.

Placement

Thirty of the 52 were directly placed in employment and provided adjustment services. This service was provided by blind Industrial Placement personnel on the staff.

Employment Accepted by the Blind Rehabilitants

Following is a list of the jobs in which the 52 persons were employed:

6—Laborer, industry
2—Clerical
5—Farm hand, dairy, poultry
1—Teacher
9—Saleman and sales clerk
3—Personal service
1—Caretaker
1—Shoe repairman
2—Broom making
1—Leathercraft
1—Minister
2—Domestic service
2—Housekeeping
3—Musician
2—Photography (dark room)
7—Assembler, industry
3—Press operator
1—Assorter

Other Data Concerning Blind Rehabilitants

The average weekly earnings per person before rehabilitation services—$2.40.

The average weekly earnings per person after rehabilitation—$28.30.

Annual earnings of group after rehabilitation—$76,544.

Cost of rehabilitation services provided the 52 rehabilitants—$6,578, a non-recurring expenditure. Average cost $126.50.

Eleven of the 52 were before rehabilitation recipients of Aid to Needy Blind in the amount of $2,912 annually—a recurring expenditure.

THE BUREAU OF FINANCE

The Bureau of Finance includes two Divisions: namely, the Division of Census and Attendance and the Division of Finance. These two divisions are directly concerned with the over-all supervision, accounting and auditing of school finance and statistics. Certain tables displayed herein reflect in a limited way the scope, status and results with reference to census, enrollment, attendance and finance.

DIVISION OF CENSUS AND ATTENDANCE

During the biennium, the Division of Census and Attendance placed special emphasis upon maintaining a complete and accurate school census and upon improving enrollment and attendance in the schools of the state. The tables that follow reflect to some extent the progress which has been made in these areas of action. Special assistance in formulating and maintaining an effective attendance service program was also given to many of the school districts of the state. A study was conducted during the first year of the biennium for the purpose of determining the Age-Grade and Grade-Progress of the pupils enrolled in the public schools. The results of this study are shown in Part II of the Biennial Report.

School Census

During the first year of this biennium, the independent districts lost 1,610 in the school census and the county districts gained 1,352. This

represents a state loss of 252 for the first year of the biennium. However, for the second year of the biennium, the state gained 1,429. This represents a state gain of 1,171 during the biennium. During this period, the county districts gained 8,503 and the independent districts lost 7,332. During the previous biennium the rural areas showed the greatest census loss. However, during the present biennium, the rural areas or county districts show a decided increase while the urban or independent districts continue to show a loss, as indicated by Table I-c:

TABLE I-c
Number of Census Children by County and Independent Districts from 1940 to 1947

Year	County	Independent	Total
1940	547,575	230,854	778,429
1941	536,362	227,017	763,379
1942	523,915	221,189	745,104
1943	500,711	217,181	717,892
1944	488,176	216,014	704,190
1945	470,980	211,655	682,635
1946	472,332	210,045	682,377
1947	479,483	204,323	683,806

During the last biennium (1943 to 1945), only six county districts reported a gain in school population. These counties reported a gain of only 930. Eighty-eight county districts reported a gain of 10,435 during this biennium while thirty-two counties reported a loss in school population of only 1,932. On the other hand, the independent districts reported a loss of 7,332.

In contrast to the previous biennium, the school population is shifting from the more urban centers to the more rural areas of the state. The increase in rural school population during the present biennium can be attributed largely to the return of war workers and their families from the war—industrial plants to the rural areas. The school census population for the second year of the biennium indicates for the first time since the beginning of the war an upward trend. The increase in birth-rate in Kentucky over the past five years certainly indicates that a decided increase in school population may be expected during the next biennium.

School Enrollment

Public school enrollment showed decided gains during each year of the biennium over the preceding biennium. The increase in public school enrollment during the biennium, ending June 30, 1947, was 18,208 compared with a census-gain of 1,171 for the same period. It is significant to note that during the biennium, the county districts gained 20,140 in enrollment with a census gain of 8,503 while the independent districts lost 1,932 in enrollment with a census loss of 7,332. Approximately 80 per cent of the state's children between 6 and 17, inclusive, was enrolled in the common schools during the school-year, ending June 30, 1947, compared with 75.66 per cent enrolled during the school-

year, ending June 30, 1944. The table which follows shows the public school enrollment by county and independent districts from 1940 to 1947:

TABLE II-c
Number of Children Enrolled in Public Schools of County and Independent Districts from 1940 to 1947

Year	County	Independent	Total
1940	426,510	182,111	608,621
1941	418,324	181,143	599,467
1942	404,567	176,738	581,305
1943	389,195	172,649	561,844
1944	366,643	166,167	532,810
1945	361,472	166,418	527,890
1946	366,346	168,474	534,820
1947	381,612	164,486	546,098

During each year of the biennium, a study was made to determine the number of children between 6 and 17, inclusive, that had been enrolled in some type of school prior to April 1 of the school-year. During the first year of the biennium (Table III-c), 578,422 of the 682,377

TABLE III-c
Number and Percent of Kentucky Children Enumerated of Ages 6-17, Inclusive, Enrolled in Public, Private or Parochial or Other Schools and the Number and Percent in No School, April 1, 1946

census children had enrolled in some type of school by April 1. During the second year of the biennium (Table IV-c), 580,567 of the 683,806 census children had enrolled in some type of school. Tables III-c and IV-c show the number and per cent of the children enumerated in the school census who enrolled in some type of school and the number and per cent in no school prior to April 1 of each school-year of the biennium.

TABLE IV-c

Non-Enrollees

During each year of the biennium, the Division of Census and Attendance made studies to ascertain the extent and causes of non-enrollment in the state. The tables which follow show the results of these studies by indicating the number of white and colored non-enrollees for county and independent districts and the reasons given for non-enrollment.

TABLE V-c

Number of Children from 6 to 17, Inclusive, Not Enrolled In Any School, and the Causes of Non-Enrollment, April 1, 1946

Causes	County			Independent			State

Table VII-c shows the number and per cent of children by ages not enrolled in any school during the school-year ending June 30, 1947. It is important to note that the six, sixteen and seventeen year olds accounted for 75.05 per cent of all non-enrollees. These age-groups are not subject to the compulsory school attendance laws.

TABLE VII-c

Number of Census Children, Number Not Enrolled, Per Cent of Census Not Enrolled, and Per Cent of Non-Enrollees of Each Age-Group for School-Year, 1946-1947

Age	Census at Each Age April 1, 1947	Not Enrolled 1946-47	Percent of Census Not Enrolled at Each Age	Percent of Non-Enrollees at Each Age
6	59,180	31,350	52.97	30.37

Average Daily Attendance

The increase in public school enrollment was paralleled by a decided increase in average daily attendance during the biennium. Table VIII-c shows the average daily attendance for county and independent districts since 1940:

TABLE VIII-c

Average Daily Attendance from 1940 to 1947

Year	County	Independent	Total
1940	338,290	154,920	493,210
1941	330,023	152,002	483,025
1942	319,781	147,837	467,618
1943	293,299	140,311	433,610
1944	278,015	136,442	414,457
1945	277,294	138,184	415,478
1946	280,314	140,377	420,691
1947	306,056	140,520	446,576

It is significant to note that the average daily attendance increased 31,098 from June 30, 1945 to June 30, 1947. The greatest increase occurred during the last year of the biennium. The following table

shows what per cent the average daily attendance in the public schools was of the census, the enrollment and the average daily membership for the school-years 1943-44 to 1946-47, inclusive:

TABLE IX-c

Per Cent of Average Daily Attendance Based Upon Census, Enrollment and Average Daily Membership for the School Years 1943-44 to 1946-47, Inclusive

Year	A.D.A.	Census		Enrollment		A.D.M.	
		Number	Percent	Number	Percent	Number	Percent
1943-44	414,457	704,190	58.86	532,810	77.88	491,741	84.28
1944-45	415,478	682,635	60.86	527,890	78.71	489,327	84.91
1945-46	420,691	682,377	61.65	534,820	78.66	495,352	84.93
1946-47	446,576	683,806	65.31	546,098	81.78	510,560	87.47

DIVISION OF FINANCE

Equalization Fund

It is a truism known to every thinking citizen of Kentucky, that there are wide differentials in the amounts of recurring revenue back of each pupil in the various school districts of the State. These differences are due largely to the variations in assessed valuations and the rates of the tax levies in the different school districts. To illustrate, each census child in Woodford County, 1944-45, had $10,717 of assessed wealth behind him, while the tax rate was only 30 cents on the $100. At the same time, each census child in Clinton County had only $408 behind him, and the tax rate was 75 cents which was then the legal maximum limit for general purposes. For that year, the mean average amount of assessed property for all the 257 independent and county school districts, was $2,267 with a range of $10,309. Thus, most of the less able county districts were putting forth two and a half times more fiscal effort than the more wealthy Woodford County district, and yet, they were collecting less per child. Obviously the children living in the richer districts have much better educational opportunities than those living in the less able districts. Therefore, knowing these conditions existed, the citizens of the State determined to make some amends.

In the year ending June 30, 1941, each school district received only $12.33 for each census child (from six to seventeen years of age inclusive) within its jurisdiction, which was the only State aid then available, other than that received from the Federal Government for vocational programs. So, in November, 1941 an amendment to the State Constitution received a favorable vote of the people, to permit the distribution of not more than ten per cent of the Common School Fund on bases other than per census. This enabled the 1942 General Assembly to make an appropriation and enact legislation to set up an equalization law whereby the less able school districts could receive additional aid from State sources.

The first equalization fund so appropriated was for the school year of 1942-43, which amounted to $400,000, and was distributed to six inde-

pendent and thirty-three county districts; in 1943-44, the amount was $400,000, and was distributed to five independent and thirty-two county districts; in 1944-45, the amount was $1,500,000 and distributed to eighteen independent and sixty county districts; in 1945-46, the amount was $1,500,000 and distributed to twelve independent and fifty-seven county districts; and for the school year of 1946-47, the amount was $1,850,000 distributed to thirty-nine independent and fifty-one county districts. Table I-f shows a detailed tabulation of these data for the five years the equalization law has been in force.

TABLE I-f

Table Showing Total Average Daily Membership, Net and Adjusted Recurring Revenue, Actual Equalization Distributed, Minimum Legal Limit, Mean Average Revenue Per Pupil, Mean Average Equalization Per Pupil, and Number of Districts Participating

Item 1	Item 2	Item 3	Item 4	Item 5	Item 6	Item 7	Item 8

1942-43	165,775	$4,332,126.00	$ 399,999.24	$30.00	$28.55	$2.41	39
1943-44	147,539	3,899,363.84	399,999.79	30.00	29.14	2.71	37
1944-45	242,492	7,281,246.57	1,499,855.96	40.00	36.21	6.19	68
1945-46	219,857	6,899,410.75	1,499,973.41	40.00	38.20	6.82	59
1946-47	[1]204,574	[2]9,044,076.46	1,850,000.00	[3]none	53.25	9.04	90

[1] $\left(\frac{ADM + ADA}{2}\right)$ is provided under the current equalization law, as a unit of distribution.

[2] This is "adjusted" and other recurring revenues which include for county districts only the amount that would have accrued, if collected at a tax rate of 75 cents per $100 of assessed valuation of property subject to local taxation, and for independent districts, if collected at $1 per $100. See Section 157.051 (2) KRS, 1946.

[3] The present law fixes no limit. See Section 157.053 (2) KRS, 1946.

Table I-f may be read as follows: In 1942-43 there were 165,775 (Item 2) pupils in average daily membership (ADM) in all the participating school districts. These districts collected a total of $4,332,126 net recurring revenue (Item 3). The amount in equalization actually distributed was $399,999.24 (Item 4). A minimum limit of $30 (Item 5) per pupil was fixed by law, but since the appropriated amount of $400,000 was not sufficient to guarantee the $30 limit, the money was distributed on a ratio or percentage basis according to law. This placed an average of $28.55 in local and State revenue (Item 6) back of each pupil instead of the $30 minimum. That same year when the equalization fund was distributed there was a mean average of $2.41 in equalization fund (Item 7) prorated by the State to each pupil in average daily membership in those 39 school districts participating. In the school years of

1943-44, 1944-45, 1945-46, marked increases in equalization appropriations are shown.

Further, Table I-f shows that in 1946-47 there was an average of 204,574 pupil units in average daily membership (ADM) and average daily attendance[1] (ADA). This average of pupil-units is obtained by dividing the sum of ADM and ADA by two, according to Section 157.051 (3) KRS, 1946. In 1946-47 the amount of "adjusted" and other recurring revenues from local and State sources was $9,044,076.46 and the equalization fund was $1,850,000. The sum of these two revenue funds distributed among the 90 participating school districts guarantees $53.25 back of each of the 204,574 pupils represented as being in average daily membership and average daily attendance; and places a mean average of $9.04 in State equalization revenue back of each of these "average pupils" or pupil-units in the 90 districts.

Equalization Law Enacted In 1946

In order that the 1946 Equalization Law may function more effectively, those whom it concerns should become thoroughly familiar with it; and know how it applies to the common school system of the State. Therefore it is quoted below in its entirety:

157.051 Definitions for KRS 157.052 to 157.055 As used in KRS 157.052 to 157.055:

(1) "Equalization fund" means a special fund of ten percent of the total appropriation for common school fund, appropriated by the General Assembly for the specific purpose of equalizing education service in the less able local school districts of Kentucky.

(2) "Adjusted recurring revenue" means all recurring revenue other than that produced by a subdistrict tax and that received by a school district from the equalization fund; provided that in a county school district only the amount of ad valorem revenue is included that was accrued at the tax rate of seventy-five cents per one hundred dollars of assessed valuation of property subject to local taxation, and that in an independent school district only the amount of ad valorem revenue is included that was accrued at the tax rate of one hundred cents per hundred dollars of assessed valuation of property subject to local taxation.

(3) "Arithmetic mean index" means the quotient obtained when the sum of the average daily membership and the average daily attendance in a school district is divided by two.

157.054 Time of allotment and distribution of equalization fund.

The special fund shall be allotted to the local boards of education which meet the provisions of KRS 157.052 to 157.055 by the Superintendent of Public Instruction with the approval of the State Board of Education on or before April 1, prior to the beginning of each school year except in 1942, when such allotment shall be made on or before June 1. The funds so allotted shall be distributed to the local boards of education regularly as a supplement to the state per capita funds provided for such districts.

[1] The 1946 law added average daily membership as another factor in the distribution of equalization funds.

157.055 Administration and expenditure of equalization fund; rules for; liability for.

The Superintendent of Public Instruction with the approval of the State Board of Education shall prescribe rules and regulations governing the administration and expenditure of any moneys allotted to local school districts from this special fund. The money allotted to any local board of education under the terms of KRS 157.052 to 157.055 shall be received and held and expended by it under the same liability and responsibility as provided by law for other funds which come into the hands of such board.

157.060 Reports of funds received and spent by school districts.

The officials of each educational institution and each school district supported in whole or in part from taxation shall make a report to the State Board of Education at the close of each scholastic year, showing in detail all funds received from the state and from all other sources during the year, and a detailed statement of all expenditures for the year.

TABLE II-f

Calculations for the Distribution of State Equalization Fund for 1946-47 $1,850,000.00

(Calculated on data obtained from annual reports 1944-45)

Name of School District Listed in Rank Order	Equalization Apportionment to District

Per Capita

The regular per capita appropriation for 1945-46 was $13,500,000 and for 1946-47 it was $16,500,000. This fund provided a per capita rate of $19.77 for distribution in 1945-46 and $24.40 in 1946-47. By means of an esculator clause in the State's budget appropriation law an extra $1,001,250 in State revenue was made available for use in 1947-48. This increased the per capita fund to $17,551,125 for the fiscal year 1947-48, thus making possible a per capita of $25.66.

Teachers' Salaries

The median annual salary for 18,164 teachers, principals and supervisors employed in all the 251 school districts in 1946-47 was $1,325. Of this number 12,066 were white elementary teachers with a median salary of $1,175; 4,758 were white high school teachers with a median salary of $1,715; 904 were colored elementary teachers with a median salary of $1,336; and 436 were colored high school teachers with a median annual salary of $1,791. These salaries show remarkable increases over those of previous years. For example, the annual median salary for all elementary teachers in 1942-43 was only $676 and that for high school teachers only $1,139.

Length of School Term

There has been a remarkable increase in the length of the school terms among the county districts in the State since 1943-44. During that year there were 72 counties operating their schools for seven months, two counties for 7½ months, 26 counties for 8 months, one county for 8½, and 19 counties for 9 months. The average length of the school term in the 120 county school districts for 1943-44 was 7.55 months or 151 days. In 1946-47 the legal minimum school term was fixed at 8 months. During that year 72 counties operated the schools for 8 months, 3 counties for 8½ months and 45 counties for 9 months. The average length of the school term for that year had increased to 8.39 or an average of 167.8 days. In the school year of 1947-48 there are 59 counties operating school for 8 months, 2 counties for 8½ months and 59 counties for 9 months. During 1947-48 the average term length in the county schools will be 8.5 months or 170 days. The average length of the school term for all districts in the United States for 1942-43 was 175.5 days. The average length of the school term in all districts in Kentucky for 1947-48 will be approximately 175.8 days.

Tax Rates

Prior to the legislative enactment of 1946 (Section 160.475 KRS, 1946), the maximum limits on ad valorem tax for county school districts ranged from 75 cents to $1.50 for schools in third and fourth class cities. This act now permits any public school district in the State to fix its tax rate (other than for sinking fund purposes) not to exceed $1.50 for general school purposes. This law became effective for the fiscal school year of 1946-47. Table IV-f depicts the results during the first year the law has been in force. In 1946-47, six county and 27 independent districts levied the maximum of $1.50. For this year, 65 counties raised their school tax rates above 75 cents, 51 remained at 75 cents, and four below.

The median school tax rate in counties for 1945-46 was $0.772; and for 1946-47, it increased to $0.888. The ranges were 70 cents and 95 cents respectively. The medians and ranges for the independent school districts are virtually unchanged.

TABLE IV-f

Distribution of Tax Rates for General School Purposes, 1945-46 and 1946-47 in County and Independent School Districts

Tax Rates in Cents	County School Districts		Independent School Districts
