FOREWORD

In compliance with Sections 156.310 and 156.320 of the Kentucky Revised Statutes the State Textbook Commission of Kentucky approved and adopted a list of textbooks for the use in Kentucky schools during the five year period from July 1, 1950 to June 30, 1955.

At present there are 235 school districts in Kentucky. For the purpose of textbook adoption these districts are divided into two types—the basal adoption districts and the multiple adoption districts. The basal school districts include 120 counties and 54 independent school districts. There are 61 multiple adoption school districts. Multiple adoption districts include the cities of the first four classes.

For the basal adoption districts the State Textbook Commission designates "the subject and grade for which the adopted book is intended." The cities of the first, second, third or fourth classes have the privilege of selecting and adopting their textbooks from the multiple list that was approved and adopted by the State Textbook Commission.

In addition to the "List of Textbooks" other information of value has been included. The additional information includes a list of the Members of the State Textbook Commission, a list of the basal and multiple school districts, a list of the publishers and their addresses, extracts from the textbook law, textbook rules and regulations of the State Board of Education, and other explanations and suggestions.

EXTRACTS FROM STATE TEXTBOOK LAWS

A. Textbook Adoption

1. Basal Adoption School Districts Section 156.320, Kentucky Revised Statutes:

"The State Textbook Commission shall, not later than January 1 in any adoption year, adopt a uniform series or system of basal textbooks for use in the public schools of the county school districts and for the use of independent school districts. The commission shall cause to be printed and send the list to the administrative officer of each school unit of the state. In making the adoption of basal textbooks, the commission shall designate the subject and grade for which the adopted book is intended, and not more than one book shall be adopted for use in any one subject and grade. The adoption shall be made for a period of five years which shall be deemed to have begun in 1930."

2. Multiple Adoption School Districts

"The State Textbook Commission shall, not later than January 1 in any adoption year, select and publish a list of 10 books in each subject, taking into account the needs of the various types of school organizations. One of the books for each subject and grade so listed shall be the one on the uniform list for county school districts as provided in KRS 156.320. Not more than two books for any subject and grade shall be from the same person. If less than ten books in any subject and grade of sufficient merit to warrant their being listed are submitted, the commission may list fewer than ten, but in that event it shall not list more than one book for the same subject and grade from the same person. The list, as soon as prepared, shall be sent to the chief administrative officer of the various school units of the state.

The Board of Education of each independent school unit embracing a city of the first, second, third or fourth class shall, upon the recommendation of its superintendent, and not later than May 1 of any adoption year, select from the list one book for each subject and grade to be used as a basal text in its school system for a period of five years, except that the Board may, upon recommendation of its superintendent and by a majority vote of the entire Board, adopt a basal text or the complete series of basal texts from the uniform list adopted for use in county school districts as provided in KRS 156.320.

The books adopted by the State Textbook Commission

shall remain unchanged for a period of five years, except, however, the State Textbook Commission may approve revisions and supplements, and such approval shall not constitute a change in adoption. Not more than one-half of the books currently in use shall be changed at any one adoption period, and such change of books shall be equitably distributed between books currently in use in elementary schools and books currently in use in high schools. The adoption periods shall be deemed to have commenced in 1930."

B. Textbooks To Be Used in Kentucky Schools

1. Section 156.320 Kentucky Revised Statutes:

"No textbook shall be used in a public school in Kentucky as a basal textbook unless it has been approved and adopted by the State Textbook Commission. Any change of textbook made by the State Textbook Commission shall not become effective until grades or classes of the respective school districts of counties or cities have completed work for which the adopted book then in use was originally intended. Nothing in this section shall apply to the supplementary books that are needed from time to time."

C. Purchase of Textbooks

1. Section 157.100, Kentucky Revised Statutes:

"The Superintendent of Public Instruction, subject to the approval of the State Board of Education, shall purchase textbooks from the publishers whose books have been adopted by the State Textbook Commission and distribute them without cost to pupils attending grades one to eight, of the free public schools of the state, in the manner and upon the conditions set out in KRS 157.110 to 157.180."

D. Textbooks: Distribution; Agents; Retail Prices

1. Section 156.340 Kentucky Revised Statutes:

"Each board of education may appoint one or more dealers to act as official retail agents for the sale of books for use in the school district, or any school unit may purchase and distribute books to its own patrons. Persons whose books have been adopted under the provisions of KRS 156.260 to 156.320 shall furnish the books, either through the official retail agents or through respective boards of education, at the lowest wholesale price and the lowest exchange price listed with the Superintendent of Public Instruction, f.o.b. the publisher's nearest shipping point. Each official retail agent shall give a reasonable bond if required, to the

persons who have contracts to furnish adopted texts. All orders given by the retail agent or board of education shall be promptly filled. The official retail agent shall sell the books at not more than fifteen per cent in excess of the listed wholesale price. Where old books, displaced by a new adoption, are offered by pupils in exchange for the corresponding new books, the new books shall be offered at a price not more than fifteen per cent in excess of the listed exchange price. If any agent violates the requirements of this section, or fails to give reasonable bond requested by any person who has a contract to furnish adopted texts, the board of education that appointed the agent may, by giving notice prior to May 1 in any year, revoke the appointment on July 1 of that year. When an agent's permit is revoked or terminates, all textbooks as per inventory of the agent must be paid for at wholesale price by the person from whom the textbooks were purchased, if the textbooks are of the lawful adoption."

RULES AND REGULATIONS OF THE STATE BOARD OF EDUCATION*

A discussion of practices and procedures designed to assist district superintendents in handling the various forms and in performing their duties relating to free textbooks follows each regulation of the State Board as set forth in the following paragraphs.

Custodian Bond, Form FT-3, (KRS 157.130 and 157.150). The superintendents making requisition for the textbooks are "custodians" of the books in their respective jurisdictions. Each custodian of free textbooks shall execute a bond to the Commonwealth for the faithful performance of his or her duties in such capacity. The penal sum of the bond shall be equal to or above the value of the free textbooks under the charge of the custodian. The bond shall be executed in triplicate on a form (Form FT-3) prepared by the State Superintendent of Public Instruction and shall be guaranteed by a surety company authorized to do business in the Commonwealth. Bonds must be filed before books are provided. The premium of a bond shall be paid by the local board of education. This bond shall be approved first by the local board and signed by the chairman and secretary. The three copies shall then be sent to the State Board of Education for its approval. After approval, one copy shall remain in the permanent files of the State Board of Education, and two copies shall be returned to the local board. At the expiration of one year after approval of bond by the local board of education, a new bond should be executed, a continuation certificate forwarded to this office, or a receipt for payment of annual premiums, to be attached to our copy of custodian bond.

Textbook Labels, Forms FT-4W and FT-4C, (KRS 157.130 and 157.140). All textbooks shall be permanently labeled as the property of the Commonwealth.

For economy in administration these forms are duplicated by the use of a rubber stamp. This label or stamp should appear inside the front cover of each book. It should bear a serial number in order that the book can be properly identified. Before textbooks are distributed to the schools it is important that the labels be marked to distinguish the books to be used in the white schools from those to be used in the colored schools. Proper segregation of the books returned to the depository can be observed by the use of this mark on the label. When issued to the pupil, teacher is to inscribe in the proper blanks name of child, year issued, and condition of book

* Reprint of pages 6-10 from Educational Bulletin on Free Textbook Administration, Vol. XII, March, 1944, No. 1.

(new, good, fair). No writing or marking is to appear elsewhere in the book. Superintendents are cautioned against labeling textbooks until an examination of the shipment shows it agrees in detail with their copy of the purchase order (FT-9 or FT-10). Errors in shipments can be more easily corrected if the textbooks are unlabeled. Superintendent is also advised to delay labeling if there is any doubt about certain books being distributed for use. A labeled book is classified as a used book and is not acceptable for exchange in the event of a change in the adoption.

Teacher's or Principal's Receipt, Form FT-5, (KRS 157.100). The district superintendents, acting under the direction of their respective boards of education, shall deliver or cause to be delivered to the principal or teacher in charge of any public school at the building where said principal or teacher has charge, the necessary number of books required for each grade for the use of said school and shall take his receipt therefor on Form FT-5.

This form should be made in duplicate. One copy should be retained by the superintendent and the other given to the principal or teacher. Changes occurring during the school term are to be recorded on both copies. Responsibility for the handling and distribution of textbooks must be assumed by the principal or head teacher of the larger school units. The principal may use Form FT-5 as his receipt for textbooks issued to each teacher. When textbooks are returned at the close of the school term they should be carefully checked against this receipt to see that each textbook is properly accounted for. Collections from pupils or teachers for lost or damaged textbooks should be noted on this form. Having posted bond for the performance of all duties connected with free textbooks, the custodian must naturally share this responsibility with teachers and principals who are to supervise the use of the textbooks. Lost or damaged textbooks resulting from improper pupil instruction reflect upon the record of the teacher and the school.

Pupil's Receipt List, Form FT-6, (KRS 157.150). Books shall be issued by principals or teachers in charge of the public schools of the State to regularly enrolled pupils of said schools. The principal or teacher will fill out requisition cards in duplicate for each pupil, using Form FT-6. The original of these cards must be signed by the parents or guardians who have supervision or custody of the pupils enrolling. When the requisitions are properly signed and returned to the principal or teacher, the books will be delivered as requested to the pupils entitled to them. The principal or teacher will keep both the original and the duplicate requisition cards. The original

requisition cards shall be receipted and returned to the pupils when the books are returned to the principal or teacher at the close of the school term.

The duplicate receipts are to be filed with the superintendent when textbooks are returned to the depository. If, for any reason, a pupil fails to return a textbook issued to him the teacher will file the original card with the duplicate stating on the reverse side the reason for the textbook not being returned. If a child loses, destroys, or damages a book beyond use, he should be required to pay according to the age of the book; 1 year 100% of retail price; 2 years 60%; 3 years 25%; 4 years 10%. (Retail price is 15% above net wholesale price listed in Textbook Bulletin, Vol. XVIII, No. 3, May, 1950.) If a child damages a book, but not sufficiently to cause it to be discarded, he should be fined in proportion to the damage done, and the book remain the property of the State. If a pupil or his parent refuses to settle for textbooks which have been lost, damaged or destroyed through negligence the pupil should be deprived of the benefit of free textbooks until settlement is made. If the parent is found to be unable to pay for a textbook it is suggested that the pupil be given the opportunity to discharge his obligation by performing some task around the school. When a pupil moves from one district to another he is to return his textbooks to the teacher and be given a receipt (Form FT-6 original). This receipt shall be presented to pupil's next teacher as evidence that he is entitled to receive other textbooks. Teachers are cautioned not to issue books until this receipt has been presented. If books are taken to another school by the pupil then the teacher is to turn them in to the superintendent in order that he may return the textbooks to the school which originally issued them.

Receipt for Books Sold, Form FT-7, (KRS 157.170). Custodians of free textbooks, under the provision of this Act, may sell textbooks to any pupil, parent or guardian of pupils attending the public schools of Kentucky and making request to purchase books. Such books shall be sold at the official retail contract price, provided that custodians shall not sell textbooks to private or sectarian schools or for the use of pupils attending a private or sectarian school. Funds accruing from the sale of books shall be covered into the General Fund of the State Treasury. Any custodian selling textbooks as herein provided shall issue a receipt in triplicate on Form FT-7, showing number and kind of books sold, the amount of money received, from whom received, the pupil from whom the books are purchased, and the school district in which the pupil is enrolled. The original copy shall be sent to the Superintendent of Public Instruction (Division of Free Textbooks), the duplicate kept on file

by the custodian, and the triplicate delivered to the purchaser of the books. All custodians are advised to sell as few books as possible. Remittances to this office should be made by check or money order.

Annual Report and Requisition, Forms FT-8 and FT-8a, (KRS 157.120). The Superintendent of Public Instruction shall furnish annual report and requisition forms on which county superintendents and independent district superintendents shall requisition the books needed for the next ensuing school term in the districts of their respective jurisdiction. The annual report on free textbooks for the closing year and requisition for the succeeding year (Form FT-8) shall be made out in duplicate. A slightly different blank (Form FT-8a) is provided for districts having multiple adoptions. The original shall be sent to the Superintendent of Public Instruction (Division of Free Textbooks) and the duplicate kept on file as a permanent record by the superintendent making report and requisition.

Purchase Orders, Form FT-9 and FT-10, (KRS 157.130). The Superintendent of Public Instruction (Division of Free Textbooks) will, upon receipt and approval of a requisition for books from any superintendent, issue a purchase order (Form FT-9 or 10) to such publishing companies as are under contract to sell the textbooks requisitioned, provided an acceptable custodian bond has been received. A copy of the order shall be sent to the publisher, a copy kept on file by the Superintendent of Public Instruction (Division of Free Textbooks), and another shall be sent to the superintendent making such requisition and retained for his files.

Shipments, Invoices and Payments, (KRS 157.130). Upon receipt of the purchase order from the State office the textbooks shall be shipped by the publisher by prepaid freight, express or parcel post, to the district superintendent, as directed by the Superintendent of Public Instruction. The publisher shall issue invoices in quadruplicate. Invoice No. 1 shall be sent directly to the Department of Finance, Division of Accounts and Control; Invoice No. 2 shall be sent to the Department of Education, Free Textbooks Division; Invoice No. 3 shall be sent directly to the superintendent of schools to whom shipment was made; Invoice No. 4 is to be retained by the vendor for his files. Upon receipt of the textbooks the district superintendent or principal shall check the shipment against his invoice (receiving report) and O. K. the same to the Superintendent of Public Instruction (Division of Free Textbooks) as a receipt of the shipment. The State Board of Education may then order payment.

As payment for books cannot be authorized until the receiving report (superintendent's copy of invoice) is filed with the Superintendent of Public Instruction (Free Textbook Division), district superintendents are urged to forward the approved invoice immediately upon checking it with the shipment and his copy of the purchase order. The invoice form is not to be sent by the publisher until

the number of books shipped correspond to the number on the Purchase Order. Invoices for partial shipments are not acceptable. If any discrepancy is found in the shipment, district superintendent is to notify the publishing company immediately, forwarding a copy of this notification to the Division of Free Textbooks.

Books Unfit for Use, Form FT-18. District superintendents are to make an accurate count of all books in the depository which have become unfit for use during the year and report same on this form. The number so reported should correspond to the number of copies listed in Column 7 of the Annual Free Textbook Report. These books are not to be disposed of until superintendent receives positive instructions from the Director of Free Textbooks, and the approval of a member of the local board of health.

Committee for Destroying Textbooks Unfit for Use, Form FT-19, (KRS 157.160). The Superintendent of Public Instruction, the local district superintendent, a member of the local board of health or a local physician, and the Director of Free Textbooks, shall constitute a committee to condemn and dispose of state-owned textbooks unfit for use.

The Director of Free Textbooks, the local district superintendent and a member of the board of health of the local school district, shall act as an executive committee. Said committee is hereby authorized, after personal inspection of books, to destroy or dispose of in any other manner deemed wise state-owned textbooks which this committee determine are wholly unfit for use in the school or which, in the opinion of the committee, are detrimental to the general health and welfare of those who may be required to use them.

It is recommended that wherever possible these books be disposed of through the waste paper salvage market. The various publishing companies whose interest in part of these books is based upon the exchange price clause in their contract, have agreed to the method of disposal approved by the committee. Form FT-19, when signed by the Director of Free Textbooks, and a member of the local board of health, is the district superintendent's authorization to dispose of the textbooks reported on Form FT-18. These forms are to be made out in duplicate. One notarized copy of Form 18, and one signed copy of Form 19 is to be forwarded to the Division of Free Textbooks. Duplicate copies are to be filed in district superintendent's office.

SUPERINTENDENT'S ANNUAL REPORT AND REQUISITION FORMS FT-8 AND FT-8A*

Before the data for this report is assembled, careful preparation is important. Superintendents making a report must be thoroughly familiar with the form and the instructions pertaining thereto. All records of textbooks issued to and returned by teachers and principals must be available. All textbooks should be arranged in the depository or storage room so that they can be easily counted and classified. To facilitate accurate inventory of the usable textbooks it is suggested that separate space in depository be provided for books of previous adoptions and for those declared unfit for use.

Superintendents will list in Column 2 (see illustration) the number of usable books in each subject and grade on hand in district depository at the beginning of the year. As Column 2 provides the basis for the report a careful check should be made of the figures in Column 9 on report of previous year. Before carrying forward these totals to the new report the Superintendent must be certain that these figures represent accurately the number of usable books on hand as computed according to instructions given on the report.

The number of copies purchased for each district during the year is listed in Column 3 before the report form is mailed from the State office. These figures may be verified by the copies of the purchase orders (FT-9 and FT-10) on file in each superintendent's office.

All books lost or destroyed for which no collection could be made are to be entered in Column 4. This includes books ordered destroyed by the Board of Health, those destroyed by fire or flood, and all otherwise lost or destroyed through no fault of pupil or teacher. All others sold, lost or destroyed for which collection was made are to be listed in Column 5. A detailed accounting of all books listed in Columns 4 and 5 is called for in Tables C and D on back of report form.

In Column 7 space is provided for superintendent to list any books that he may have received from other depositories, and for any that he may have sent from his depository to superintendents of other school districts. This includes books that may have been

needs of th
Column 9, s

shipped direct from the Department of Education and any that might have been returned to the Department.

An actual count of all textbooks enumerated in the first two columns which became unfit for further use during the year is to be reported in Column 8. In order to secure uniformity of copies being classified for disposal, custodian should examine the condition of each book. A book meeting any of the following conditions may be declared unfit for use:

1. Soiled and unsanitary appearance.
2. Worn or loose back or cover.
3. Damage to book or pages.

Teachers and superintendents are encouraged to see that maximum use is obtained from each book. At the same time, the condition of the book issued to the pupil should be such that he will be encouraged to exercise the proper amount of pride in caring for the book. Beginning pupils should never be asked to use a book that presents a worn or soiled appearance. The life of a textbook in the hands of a pupil is influenced by teacher instruction, length of term, distance between home and school, transportation facilities, etc. For obvious reasons the life of a textbook in the upper grades is longer than that of a book used by the younger pupils. A book used by a pupil in a city school has a longer average life than one used by a rural pupil traveling some distance to school.

Particular attention is directed toward providing a safe and suitable place for the storage of books not in use. Depository should be located where books will be free from dampness, direct sunlight, dirt and soot. Shelves should be provided to accommodate an orderly arrangement. Titles for each grade should appear together in order that an inventory of usable and unusable books may be quickly and easily obtained. Where the central depository is not sufficiently large to accommodate all textbooks it is permissible for the superintendent to store books in the larger schools providing a safe, suitable storage space is available in the building. It is necessary that each depository be visited at close of term and a careful accounting made. All worn out or damaged books should be removed, and an inventory record completed for each school in which books are stored.

In order that each superintendent can correctly estimate the needs of the district, it is extremely important that the figures in Column 9, showing the number of usable copies on hand at the end

of the year, represent the actual inventory. The teacher and principal receipts and each depository inventory record should be rechecked and totals compared with these figures before requisition is completed.

In making an estimate of the grade enrollment for Table A and for Column 10, superintendents are advised to use all data found in teacher's record books or on annual statistical report. Any substantial increase in the estimated enrollment over the enrollment for the previous year should be accompanied by full explanation. The alternation of grades in the smaller schools is an important factor influencing the estimate of enrollment. Hence, it is advisable that district enrollment figures for several years be reviewed before the final estimate is entered in Table A and in Column 10 of the report.

Superintendents are asked to exercise extreme care in making the requisition for additional books (Column 11) fit the actual needs of the district. This is to assure each pupil the proper number of books, and to prevent waste resulting from the accumulation of surplus books.

After the requisition has been filled and a check of all schools reveals that the supply available is not sufficient to furnish each pupil with the required texts, the superintendent will submit a supplementary request for additional books to the Division of Free Textbooks. This should be determined at the earliest possible date following the opening of the school term as several weeks are required for the preparation of orders and the completion of shipments. All supplementary requests must bear the signature of the district superintendent (bonded custodian). Whenever possible, supplementary requisitions are filled by means of transfers from districts reporting surplus books. Superintendents are asked to cooperate in reporting and transferring textbooks which are not to be used during the current school year.

**MINIMUM STATE COURSES OF STUDY FOR GRADES 1 TO 12,
INCLUSIVE, FOR FIVE-YEAR PERIOD ENDING JUNE 30, 1955**

These Minimum State Courses of Study for Grades One to Twelve, inclusive, are set up in accordance with Section 156.160 Kentucky Revised Statutes. Each local board of education shall adopt its own courses of study, upon the recommendation of its superintendent, consistent with the rules and regulations of the State Board of Education. The twelve-grade program has been designed for four plans of organization—the eight-grade elementary plan, the 8-4 plan, the 6-6 plan, and the 6-3-3 plan.

For the corresponding grades in the eight-grade elementary plan, the 8-4 plan, and the 6-6 plan of organization the same subjects are included and the same textbooks shall be used. In the 6-3-3 plan of organization the subjects and textbooks for grades one to six inclusive and for grades 10, 11 and 12 are identical to the subjects and textbooks for the other three plans. There are some variations, however, in the subjects and textbooks for grades 7, 8, and 9 in the 6-3-3 plan of organization.

Free textbooks are purchased by the State Board of Education for the elementary grades one to eight inclusive. For the purpose of textbook purchases the subjects for the elementary grades one through eight have been designated as required and optional subjects. The required subjects are marked by the (*) asterisk. The local courses of study for the elementary grades one through eight must include the required subjects listed in the Minimum State Courses of Study for these grades plus such additional subjects from the optional list as may be necessary to meet the local needs.

The first purchases of free textbooks by the State Board of Education shall be the required subjects listed in the Minimum State Courses of Study for the elementary grades one to eight inclusive. If funds are available after textbooks have been purchased for the **required** subjects, additional textbooks will be purchased for the **optional** subjects in grades one to eight inclusive from the optional list selected by the local board of education upon the recommendation of its superintendent in compliance with the free textbook law.

The selection and requisition of free textbooks for the **optional** subjects involve these two steps:

1. The subjects may be selected by the local school districts from the optional list as follows:
 - a. For grades one, two, seven, and eight, two optional subjects may be selected for each grade.

- b. For grades three, four, five, and six, four optional subjects may be selected for each grade.
2. Textbooks which have been properly adopted for the selected optional subjects may be requisitioned by the school districts according to either of the following plans:
 - a. For each pupil a book in one optional subject and grade may be requisitioned, or,
 - b. For pupils in the same grade or grades a desirable number of books may be requisitioned for two or more optional subjects in such grade or grades.

These courses of study have been adopted by the State Board of Education as the **Minimum State Courses of Study for Grades One to Twelve**, inclusive, for the common schools of Kentucky for the five-year period ending June 30, 1955. The courses of study are as follows:

C. SENIOR HIGH SCHOOL GRADES TEN TO TWELVE

The subjects for the senior high school grades ten to twelve inclusive are the same subjects contained in the 8-4 and the 6-6 plans of organization. The same textbooks are used.

EXPLANATORY NOTES

A. Letter Symbols

*—Indicates Minimum Courses of Study in reference to the first purchases of free textbooks by the State Board of Education.

n—New subjects added to the 1950-1955 Minimum State Courses of Study.

se—Subjects designed to be taught in grades seven and/or eight.

B. Arabic Numerals

It is suggested by the State Board of Education that the State Textbook Commission in its consideration of subject materials emphasize correlation of studies.

1. World geography is a one year's course. It may be offered in either the ninth grade or the tenth grade.
2. Foreign languages: Four years of Latin may be offered. It may be offered in any one or in each year of the high school. French and Spanish each are two year high school courses. They may be offered in grades nine and ten or in grades eleven and twelve, or in some other desirable combination. German is a two year course designed for the eleventh and twelfth years.
3. Health-physical-safety education may be taught as separate or integrated courses.
4. General shop includes handicrafts and home mechanics.
5. General business is designed for a one year's course. It may be offered in either the ninth or tenth grades.
6. In vocational agriculture the program suggested and outlined by the Division of Vocational Agriculture should be followed.
7. In vocational home economics the program suggested and outlined by the Division of Vocational Home Economics should be followed.
8. It is suggested that general music be taught in grades nine and ten carrying $\frac{1}{2}$ unit of credit for each year. The same plan is suggested for general art. Instrumental music may be taught in any one of the four years or in some other desirable combination.
9. Typewriting may be offered as a one or two year course. It may be taught in any one or two of the last three years of high school or by some other suitable plan.
10. Journalism, public speaking, dramatics, and creative writing are $\frac{1}{2}$ unit courses each. They may be taught in either the eleventh or twelfth year of high school.
11. Advanced physical science may be taught in lieu of chemistry or physics. It may be offered in either the eleventh or twelfth grade.
12. Aeronautics is a one year course. It may be offered in either the eleventh or twelfth grade.

13. **Industrial Arts for the Kentucky High Schools**, Educational Bulletin, Vol. XVI, No. 5, published by the Department of Education, Frankfort, Kentucky, July, 1948, is a valuable handbook on industrial arts for high schools. It is a good guide for an industrial arts program.
14. Salesmanship and commercial law are $\frac{1}{2}$ unit courses. They may be taught in either the eleventh or twelfth grade.
15. In trades and industries the program set up by the Division of Trades and Industrial Education provides a valuable guide.
16. Distributive education and diversified occupations are two year courses each. Plans of organization and instruction which have proved to be effective should be used.

ESSENTIAL INFORMATION ON TEXTBOOK ADMINISTRATION

1. **Approved and Adopted Textbooks**

No textbook shall be used in any public school in Kentucky as a basal textbook unless it has been approved and adopted by the State Textbook Commission.

2. **Basal Adoption School Districts**

All county school districts and independent school districts that are classified as basal adoption districts by law shall use the basal-adopted textbooks. In the textbook list the basal-adopted books are printed in CAPITAL LETTERS and preceded by the (*) asterisk.

3. **Multiple Adoption School Districts**

Independent school districts embracing cities of the first, second, third or fourth class may select and adopt from the multiple list one book for each subject and grade to be used as a basal text in its schools for a period of five years. Contracts for these books shall be entered into by and between the publishers and the adopting school district.

4. **Retail Price of Textbooks**

The retail price of textbooks shall not be more than fifteen percent in excess of the listed wholesale price.

5. **Textbook Agents**

Each board of education may appoint one or more dealers to act as official retail agents for the sale of books for use in the school district, or any school unit may purchase and distribute books to its own patrons. (KRS 156.340)
