ISSUED MONTHLY

Entered as second-class matter March 21, 1933, at the post office at Frankfort, Kentucky, under the Act of August 24, 1912.

VOL. XXV DECEMBER 1957 NO. 12

BIENNIAL REPORT

of the

SUPERINTENDENT OF PUBLIC INSTRUCTION

of the

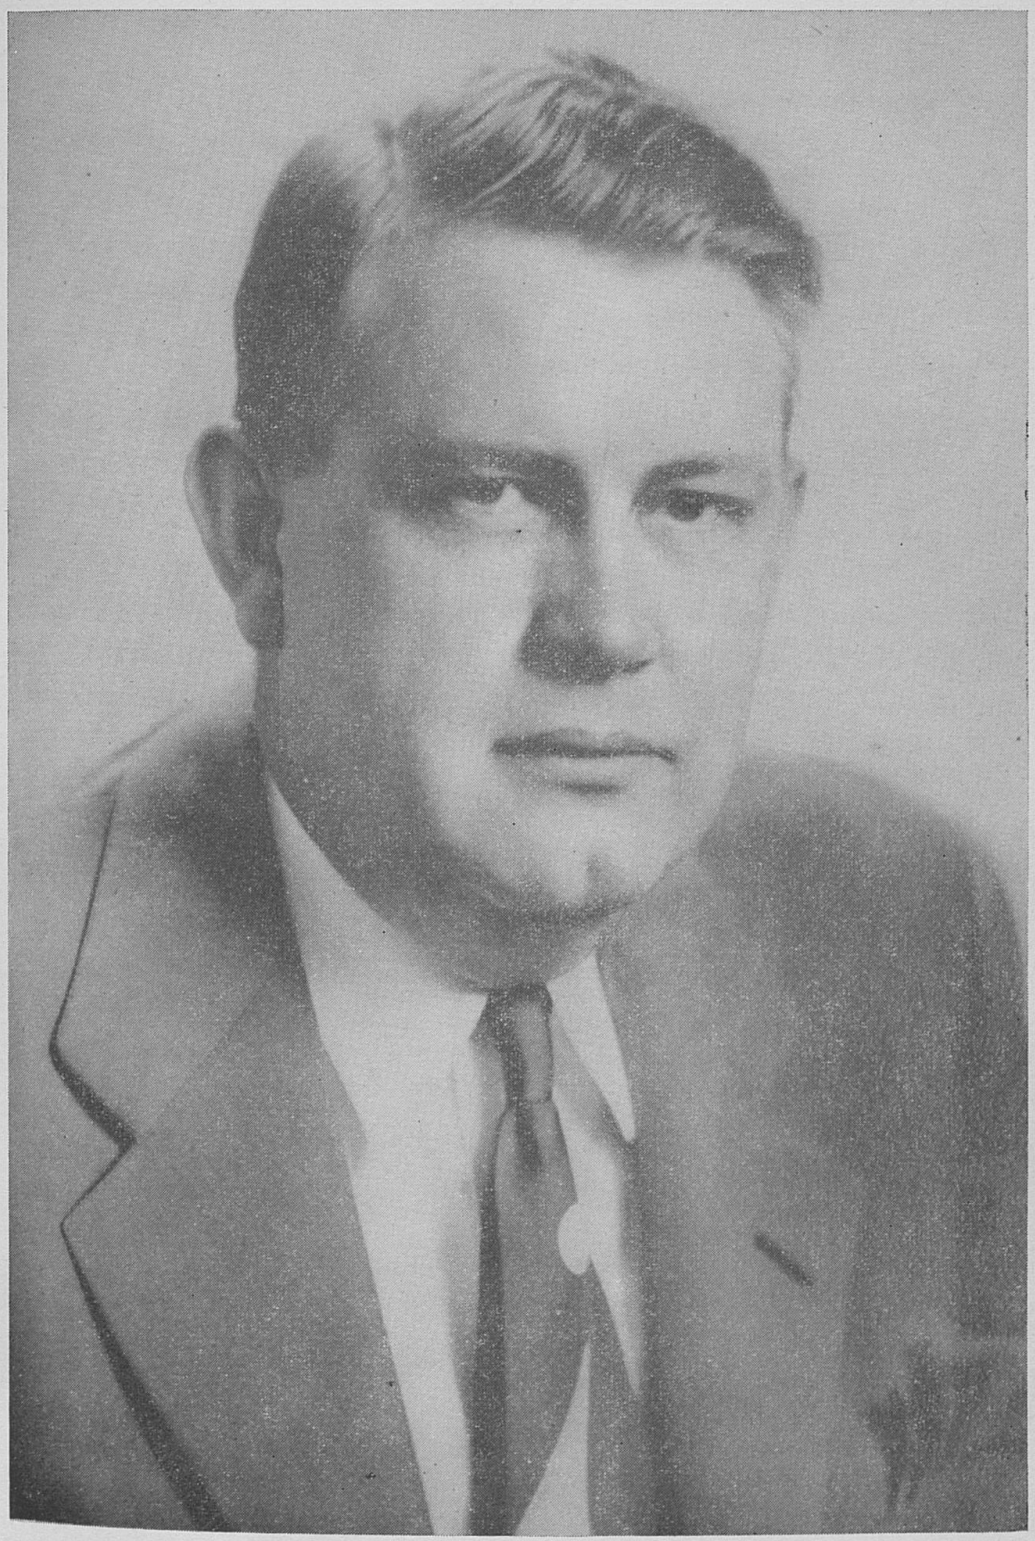

COMMONWEALTH OF KENTUCKY

FOR THE BIENNIUM ENDED
JUNE 30, 1957

Published by order of the

STATE BOARD OF EDUCATION

ROBERT R. MARTIN
Superintendent of Public Instruction
Chairman State Board of Education

ROBERT R. MARTIN
Superintendent of Public Instruction

To the Governor and
the General Assembly
Commonwealth of Kentucky

Pursuant to the provisions of Sections 57.140 and 156.250 of the Kentucky Revised Statutes, I am submitting the Biennial Report of the Superintendent of Public Instruction for the biennium ending June 30, 1957.

Part I of this report constitutes the Report of the Superintendent of Public Instruction and his staff in the various Divisions of the Bureaus in the Department of Education while Part II is made up of statistical information and data relating to personnel, finance, and school population for the state and the local school districts.

I especially invite your attention to the narrative sections of this report in which the major educational achievements of the biennium are summarized and to that portion of the report which discusses recommendations for the continued advancement of public education in this Commonwealth.

Respectfully submitted,

ROBERT R. MARTIN,
Superintendent of Public Instruction

REPORT OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION

PART I

SECTION I.

CHAPTER 1.

THE SUPERINTENDENT DISCUSSES THE STATUS OF EDUCATION IN KENTUCKY

In considering the conditions and prospects of Kentucky's system of public schools, there can be found elsewhere in this report detailed accounts of the progress of the various divisions within the organization of the State Department of Education.

It is my purpose here to bring the attention of the reader to those achievements and accomplishments of major significance in a program designed to elevate the status of Kentucky's common school system.

Any overall analysis of the educational program in Kentucky during the last biennium must consider two fundamental precepts:

1. That the citizens of Kentucky have exhibited an awakening of interest in the conduct of the public schools.
2. That the Governor and the General Assembly have responded to the needs of education fairly and conscientiously to the end that this Commonwealth can display a sincere pride in school progress.

Together, these two precepts have ushered in a new dimension of education consciousness on the part of both professional educators and the public. I have said before and I reiterate that more has been done in the past two years to elevate Kentucky's public school system than in any comparable period since the founding of the common schools in 1837.

MAJOR ACHIEVEMENTS

With an amended Constitution which permitted the formulation of a more realistic method of apportioning the distribution of the school fund to local school districts, and the enactment of the Foundation Program Law which described the method for making that distribution, the way was opened for real progress.

FULL FINANCING OF THE FOUNDATION PROGRAM LAW

Obviously a method for distributing funds more equitably to local school districts was a great step toward the new era in advancing education in Kentucky. However, providing the method is one matter while providing the means is certainly another.

Therefore, the most outstanding contribution to the construction of a new and progressive program for the public schools was the full implementation and financing of the Foundation Program Law.

The 1956 General Assembly on recommendation of Governor A. B. Chandler and with his active support, appropriated $54,785,500 to the school fund for the 1956-57 school year. This was an increase of $20,000,000 over the previous year and was substantially sufficient to fully finance the Foundation Program Law. Furthermore, this amount provided financial assurance that no school district would receive less than $80 in state-aid for each child in average daily attendance and that no school district would receive less in state-aid than the amount it received in its per capita allotment the previous year.

The effects of a fully financed Foundation Program in improving the quality of education available to Kentucky's youth have clearly emerged in these two years. Some of these can be briefly listed as follows:

1. Teachers' salaries have been increased and as a result, a significantly larger percentage of graduating teachers are remaining in Kentucky to teach.
2. More adequate school centers are being provided. There are 750 fewer one, two, and three teacher schools than in the previous biennium.
3. Every child in Kentucky is now guaranteed a minimum nine-month school term. In 1954-55, twelve county school districts had terms of less than nine months.
4. Under the Capital Outlay Allotment, more classrooms have been provided to relieve over-crowding and increased enrollments.
5. The programs and curricula of our schools have been greatly strengthened through:
   - A. Additional units in art, music, industrial arts, physical education and library services.
   - B. Relieving principals of teaching loads in order that they may devote more time to supervision and administration.
   - C. Provision for instructional supervisors in nearly all school districts aimed toward improving the quality of instruction offered in the public schools.

TEACHER RETIREMENT ACT

In addition to the full financing of the Foundation Program, the 1956 General Assembly also provided for the full implementation and financing of the Kentucky Teacher Retirement System. As a result of this action, teachers in Kentucky have a retirement program that offers them freedom from insecurity and other benefits for the general welfare of the teaching corps.

The most progressive program of school legislation was enacted by the 1956 General Assembly since the Educational Legislature of 1908. Some of this legislation included more adequate financial support for the University of Kentucky and the State colleges; increased appropriations to the Department of Education, provision and authorization for a medical school at the University of Kentucky and a strengthened status for Kentucky School Building Revenue Bonds.

OTHER IMPROVEMENTS

With the closing of the biennium 1955-57, education in the Commonwealth of Kentucky had crossed the threshold of a new day — a day ever brighter with prospects for the continued expansion of the public school program.

Though certainly the full financing of both the Foundation Program and the Teacher Retirement System were the most outstanding accomplishments of this period, they were by no means the only ones.

THE DEPARTMENT OF EDUCATION

The Department of Education has been completely reorganized into sections designed to secure economy and efficiency. Though the De-

partment is discussed in some detail in the following portion of this report, I think it is significant to point out that additional services have been made available in Guidance, Administrative & Supervisory Services and Public Relations, and Education for Handicapped Children.

An expanded program of In-service teacher training has been initiated during the biennium and in cooperation with State institutions for higher learning, these services have resulted in pre-school planning conferences in more than one hundred school systems.

HIGHER EDUCATION

Recognizing that the same conditions which for the past decade have exerted grave responsibilities and pressures on the public elementary and secondary schools are beginning to exert similar pressure on our colleges and university, planning and attention have been given to meeting problems on the college level in the light of past experiences.

Thus, the Council on Public Higher Education in Kentucky has been provided with a full time staff to enable it to be of more service.

Cooperation between the state colleges and the University of Kentucky has increased tremendously and salaries for instructional personnel have increased during the biennium.

To aid the various colleges in Kentucky to meet their increasing needs, an evaluation program was initiated. As of June 30, 1957, twenty-five Kentucky colleges had been evaluated. These evaluations help colleges to better prepare for the future by focusing attention to their strengths and weaknesses.

GOVERNOR'S CONFERENCE

The Governor's first Annual Conference on Education was held in October, 1956, devoted to a discussion of current problems facing education in Kentucky. Of the 300 delegates to this conference, a two-thirds majority were lay people, while only one-third were from the ranks of professional education.

Authorized by an act of the legislature and financed by special appropriation, the conference will be held yearly in the Fall. The 1957 conference scheduled for late September will have as its theme, "Education Beyond the High School."

OTHER CONFERENCES

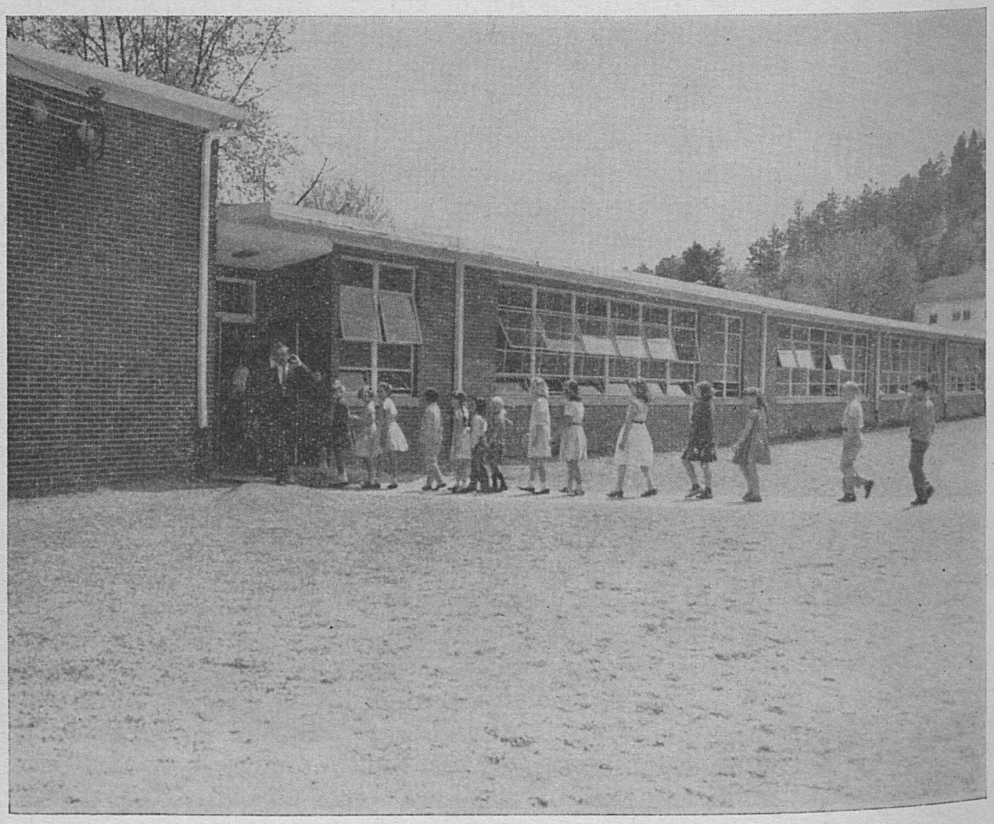

In addition to the Governor's Annual Conference on Education, there have been a series of other highly significant conferences on education held during the biennium. These conferences were sponsored by the Department of Education in cooperation with other educational agencies in the State.

A conference devoted to the improvement of the quality of instruction was held in August 1956, and is to continue annually. This first conference served to launch a broad promotional and practical program for improving all phases of the public schools and this has been labelled, "The Advancing Education in Kentucky Program."

A conference held in December 1956, in cooperation with the Kentucky Association of School Administrators considered legal aspects and responsibilities of school administrators. Another cooperative conference with this organization is planned for 1957, with emphasis on another area of administrative responsibility.

FOR WHICH OF THESE IS THE COST GREATER

CONSOLIDATION AND CONSTRUCTION

The program of consolidation of small, inefficient schools into larger school centers is certainly not new to the philosophy of Kentucky education. Consolidation was recognized as an important means for providing better educational opportunities for Kentucky boys and girls as early as 1900. The first real consolidated schools were effected in Mason County around 1910 and the program has progressed since that time.

As of June 30, 1957, the number of school districts in Kentucky has decreased from 223 in 1954-55 to 216. Merger of small independent school districts with the county system in which they existed has accounted for this decrease. The desirability of central schools, large enough to accommodate many students and thereby capable of providing a broader and more satisfying curriculum has been proved again and again. The large schools are not only more efficient academically, but it has been demonstrated that they are more economical than several smaller schools in various parts of the school district.

By means of the Capital Outlay provision in the Foundation Program Law, local school districts have contracted for a total of 37 million dollars in new classrooms during the biennium 1955-57. This represents a tremendous effort on the part of local school dsitricts to meet their construction needs, however, it does little more than make a "dent" in the overall need for new and additional classrooms in Kentucky.

RECOMMENDATIONS FOR THE CONTINUED ADVANCEMENT OF EDUCATION IN KENTUCKY

With the full implementation of Kentucky's new and dynamic educational program during the biennium, I am sure all Kentuckians are aware of a growing prestige for their schools. No longer do we need feel a sense of educational inadequacy as in a former time. We have every reason to feel a new sense of pride in the quality of education available to our children.

But as with every constructive endeavor of men there is that constant and ever-present danger that what we have begun to build might cease through the false impression that it is good enough. If our program is allowed to stall now, the result would be disastrous to the entire progress of Kentucky. I can think of no greater lack of wisdom than this.

What has been started, must continue.

MAJOR PROBLEMS

In considering the major problems with which we are yet faced, three categories are at once apparent:

1. The need for additional classrooms.
2. The critical shortage of qualified teachers.
3. Inadequate appropriations for free textbooks.

THE CLASSROOM PROBLEM

Although local school districts have exerted great efforts to meet their classroom needs, they have reached the limit of their financial ability — and yet there remains this nightmare of increasing enrollments, out-moded, insanitary, and totally unsatisfactory classroom environments and overcrowding.

Kentucky needs now 7,620 new classrooms to replace unsafe, unsanitary, and outmoded facilities; 1,600 additional classrooms to house the

overflow from crowded classrooms; and, 1,000 additional classrooms over the next five years to house enrollment increases.

This represents a total need for 10,220 classrooms and is not a random estimate nor an educated guess. This figure is based on actual visitation by staff members of the Department of Education during the second phase of the SCHOOL FACILITIES SURVEY authorized by Public Law 815 and corrected as of July 1, 1956.

For too many years, we have seen the Federal Aid proposal tossed from one political pile to the other and during each Congress, finally tossed into the heap of dead legislation. The children of Kentucky cannot wait — they must have classrooms.

Upon advice from a committee appointed to give its close and competent attention to the feasibility of a state-wide bond issue for school house construction, I am prepared to make precise and specific recommendations to the General Assembly for such a state-wide bond issue for schoolhouse construction and I will lay before that body all necessary factual data to substantiate and qualify a request for that bond issue.

THE SHORTAGE OF TEACHERS

Better salary levels and working conditions resulting from the Foundation Program have done much to hold teaching personnel in Kentucky. But the critical shortage of teachers still exists and as enrollments continue to climb, there is no relief in sight under existing conditions.

The Kentucky White House Conference recommended that Kentucky establish a system of state-wide scholarships to young men and women for teaching. I strongly endorse this recommendation. It is a sound and reasonable proposal and properly executed, could do much toward alleviating the need.

Presently, there are 35 other states with such programs. Such a scholarship should be granted on the condition that accepted candidates be required to teach for a specified period within the State upon graduation. Such scholarships should be awarded on the basis of need and ability.

Though teachers' salaries have been substantially increased, they are yet decidedly below the national average of $4,300. Elevating the state average is an important prerequisite to solving the teacher shortage in this Commonwealth.

FREE TEXTBOOK APPROPRIATION

Under Kentucky law, the State furnishes free textbooks to elementary school pupils. Since the first appropriation of $500,000 in 1934 for the purchase of free textbooks, the prices of books have increased in ratio, more rapidly than subsequent appropriations for their purchase.

For the biennium ended June 30, 1957, the total appropriation for textbooks was $2,068,000. Pupil enrollment in 1955-56 was 483,071, thus, the average amount of money available to each pupil for a set of textbooks was $2.00 annually after shipping and handling. At present prices, a set of textbooks costs approximately $16.00 per pupil.

With present appropriations, it would require eight years to provide each pupil with a complete set of books.

The average number of books purchased annually has been around 700,000 or not quite 1½ books per pupil. For a number of years only 70 to 80 per cent of the needed books have been purchased. As a result,

on April 1, 1957, the schools were short 700,000 copies of books for the required subjects. Consequently, for the 1957-58 school year 1,500,000 copies of books for the required subjects are needed.

The average price per book is $1.60. At this price 1,500,000 books will cost the sum of $2,400,000.00. Another $500,000.00 is needed for the purchase of books for the optional subjects.

By reducing the optional subjects to equivalent of two subjects per grade, after the 1958-59 school year, the estimated cost of textbooks for grades one through eight is as follows:

1958-1959	$2,200,000.00
1959-1960	2,120,000.00
1960-1961	2,332,000.00
1961-1962	2,565,000.00
1962-1963	2,821,000.00
1963-1964	3,103,000.00

For the 1958-1959 school year, $2,200,000.00 is needed to take care of the book shortage that now exists in the public schools.

Should the General Assembly of Kentucky extend the free textbook program through the high school grades, another $1,800,000.00 would be needed to purchase all the high school books. On the other hand, if the books were introduced one grade each year, an annual appropriation of $450,000.00 would finance the high school textbook program rather satisfactorily.

THE FOUNDATION PROGRAM MUST BE MAINTAINED

The Foundation Program — fully financed — has given new life to Kentucky's program for the public schools. This law is not a rigid, unbending formula for educational excellence. It is a dynamic program and as services under it are increased, the cost of maintaining the program will also increase.

The 1956 General Assembly wisely realized this and increased the appropriation for the second year of the past biennium by three million dollars. We must now realize that as more and more classroom units are needed, as we solve teacher shortages and other problems, this appropriation must be substantially increased for 1958-59 and 1959-60 as the Foundation Program gains stature and momentum.

BLUEPRINT FOR EXCELLENCE

We have in Kentucky a greater potential for a high quality educational program then at any time in our previous history. We have a program that is rapidly becoming the envy of many of our sister states. But this blueprint for excellence cannot be more than a plan and a vision without that action needed to convert our planning into actualities. With the continued support and active interest of public sentiment and legislative intent, our system of public school education will never deserve the description of mediocrity.

Kentucky's scheme of popular education cannot be too jealously guarded. Neither can we too earnestly insist that it shall be made thoroughly effective.

LEADERSHIP AND CONSULTATIVE SERVICES

(THE STATE DEPARTMENT OF EDUCATION)

The State Department of Education consists of the Superintendent of Public Instruction and his staff and the State Board of Education. The primary function of this Department is to provide the Superintendent and the State Board with the necessary professional and clerical assistance they require in the exercise of their responsibilities. The Department of Education has therefore become down through the years, an agency that provides leadership and consultative services to local school districts in the various aspects of their administrative and instructional programs.

The Department of Education came into existence as a natural adjunct to the function of the Superintendent of Public Instruction.

SCHOOL SYSTEM ESTABLISHED IN 1837

Kentucky's common school system was established by an act of the legislature on February 23, 1837. This provided the general frame-work of school law under which the schools would operate. This act and others pertaining to the common schools were approved by acts of the legislature in the following February, 1838 and became a law in the land.

This early law was comparatively sound considering the time and circumstances of its passage. It provided for a school fund, a superintendent of public instruction, a state board of education, and for county school districts. The law also required that local districts levy a tax for education upon adoption of the common school system. Management of schools within each district was to be under the control of five commissioners appointed by the state board of education. It was from this provision that the office of county superintendent evolved.

Other provisions of this law required an examination of teachers, public election of five school trustees, and the requirement that no state money would become available to the local school district until "at the expense of the inhabitants thereof" a school had been procured and a tax levied. This was a part of the law that met with little popular support and therefore many counties did not avail themselves of the opportunity for education that was made possible by the law.

EARLY SUPERINTENDENTS HAD LITTLE HELP

The first several superintendents of public instruction had practically no assistance with the keeping of records and other clerical aspects of the position. Until and during the administration of R. J. Breckinridge (1847-51), the office of superintendent of public instruction was held as secondary to some other employment. It was one of his significant recommendations that the position be placed on a "better foundation as to salary and office."

In 1864 during the administration of Daniel Stevenson, the legislature authorized the superintendent of public instruction to appoint a Clerk to assist with correspondence and necessary reports. A second clerk was added in 1878, and during the administration of Ed Porter Thompson (1887-95)*, a third clerk was added.

* The fourth, and present, Constitution of Kentucky adopted in 1891 provides that elected officials shall not succeed themselves. When Mr. Thompson was elected, the third Constitution, 1850, was the governing document. Thompson was the third Superintendent of Public Instruction in succession to serve two terms.

The organization of the department into bureaus was not effected until 1914 on a recommendation of Barksdale Hamlett.

It is difficult to imagine how these early school leaders functioned without more assistance than was provided for them. Early laws at various times required the superintendent of public instruction to spend as much as eight months of the year "in the field", or that they visit at least 25 counties each year and "Until such time as all the counties of the State have been visited." These sojourns into local districts were for the purpose of informing the citizenry on the status of education.

Certainly it is remarkable that Kentucky was fortunate enough to secure such excellent men for this position when one considers the system under which they came into office and served. Correspondence was carried on by hand as was the preparation of all reports and manuscripts for printing until about 1870. However, the records that were kept were accurate, comprehensive, and legible. It was not until after the adoption of the constitution of 1891 that education began to gain significant status and realize real progress. Legislatures became more and more school-minded after 1900, and interest in public education on all levels received continual support and impetus. Yet, in no other period in the entire history of public education in Kentucky has as much been accomplished as during the last two years. Reports of this progress are to be found elsewhere in this report in detail.

THE STATE BOARD OF EDUCATION

The organization of the state board of education is a product of the revised school codes of 1934. It is composed of seven members with the superintendent of public instruction as chairman. Members are appointed for four years by the Governor without reference to place of residence, political affiliation, or occupation—except that they cannot be considered as professional educators.

When the common school system was established back in 1837, the state board was made up of the superintendent of public instruction, the attorney general, and the secretary of state. Except for one change, it so remained until 1934. In 1874 two additional members were added to the board. These were to be professional educators and together with the superintendent could form a standing committee to form "rules, by-laws, and regulations for the government of the common schools." Other than their addition, no other changes were ever effected though many were recommended and many more laws offered, always short of passage, for its reorganization.

BUREAU OF INSTRUCTION

The Bureau of Instruction is responsible for the supervision of the Foundation Program Law and other laws relating to the instructional programs in Kentucky's public schools. It consists of three divisions: Division of Instructional Services; Division of Teacher Education and Certification; and, Division of Education for Handicapped Children.

Each of these three divisions has a distinct responsibility in the overall objective of improving the quality of instruction now being offered in Kentucky schools. The instructional services division functions primarily through a staff of supervisors. It is also responsible for the classification of schools according to their programs and the approval of special instructional services units under the Foundation Program Law.

The Division of Education for handicapped children develops policies and procedures regarding the education of physically and mentally handicapped children, and interprets and coordinates other general policies in relation to this phase of the instructional program.

The function of the Division of Teacher Education and Certification is vitally important to the improvement of the programs in Kentucky's public schools. Based on the realistic assumption that no school can be any better than the quality of its teachers, this division constantly works toward upgrading Kentucky's teachers. This is being accomplished through well defined regulations regarding the certification of teachers and through a program of in-service teacher education. Complete reports of the activities and accomplishments of these various divisions can be found in the next chapter of this report.

BUREAU OF VOCATIONAL EDUCATION

The divisions of Vocational Agriculture, Home Economics, Guidance Services, Veterans Education, and Vocational Industrial and Distributive Education comprise the Bureau of Vocational Education. The overall function and philosophy of this Bureau is not unlike that of the Bureau of Instruction.

It is necessary that our programs of vocational education be reviewed from time to time in order to determine that they are in keeping with state and federal laws and rules and regulations of both the state board of education and the U. S. Office of Education. The programs of vocational education must also conform and be consistent with the State Plan for Vocational Education.

BUREAU OF REHABILITATION SERVICES

The Bureau of Rehabilitation Services works toward the administration, supervision, direction, and overall promotion of the State-Federal Program for the vocational rehabilitation of the disabled in Kentucky. The head of this bureau maintains liaison with the Federal Department of Health, Education and Welfare as State Director of the Kentucky agency. This bureau administers the Kentucky Rehabilitation Program according to the Kentucky State Plan for Vocational Rehabilitation and its head is responsible to the Superintendent of Public Instruction and the Federal Office of Vocational Rehabilitation.

BUREAU OF ADMINISTRATION AND FINANCE

Just as rapid technological changes and the pressures of growing populations have effected vast changes in today's modern economy, so have the administration and financial policies and procedures grown more and more complex in providing education for Kentucky's people.

In meeting ever growing needs and solving the many administrative problems that arise in the administration of the public schools, the Department of Education plays a vital role. As enrollments have climbed new pressures were placed on the schools to expand their programs and facilities to meet these growing school populations and the problems that they created.

Accurate records and reports must be kept on each pupil and as these records constitute an important source of information it is imperative that they may be properly administered. Then, too, increasing enrollments impose upon school facilities the necessity for properly housing and thereby educating every child. New buildings must be constructed and

new methods worked out for better attending to the needs of the school population. Free textbooks are provided for elementary pupils in Kentucky public schools and transportation to and from school is provided in every county for youngsters attending public schools.

All of these functions are administered by Divisions in the Bureau of administration and Finance. All administrative and financial functions in which the Department of Education is involved in its relations with the local school districts are the responsibility of this Bureau.

Its Divisions are Finance, Records and Reports, School Lunch, Free Textbooks, Building and Grounds, Transportation, and Property Utilization.

SECTION II

OUR PRODUCT IS PROGRESS

(Reports of the various divisions within the Department of Education)

SECTION II

Our Product Is Progress

On the following pages are reports of the activities of the several divisions within the Department of Education. These reports contain summaries of the progress that has been produced during the biennium ending June 30, 1957, as well as recommendations for realistic measures designed to further expand the various programs now in operation.

With full financing of the Foundation Program Law, the public school program in Kentucky was revitalized. The administration during the last two years provided the teaching profession with the tools to wisely, vigorously, and more effectively promote the improvement of the quality of education available to Kentucky's boys and girls.

There has been however, growing concern on the part of school leaders and many other interested persons across the state that a feeling of false security has become prevalent in the thinking of many people regarding our educational program. As a result of the foundation program and the many benefits and improvements that it immediately made possible, too many people have indicated the naive attitude that education in Kentucky has solved all of its problems. Nothing coud be farther from the truth.

The foundation program is not a panacea; it is not a cure-all out of which we have emerged as the leading educational state in the union. Actually, the foundation program provides us with the beginnings of a good program. As we have operated under the law during the last two years, we have naturally discovered new problems that merit the attention of those who have the power to help us to further expand and improve the program.

SECTION II

CHAPTER I

OFFICE OF THE ASSISTANT SUPERINTENDENT OF PUBLIC INSTRUCTION

The office of the Assistant Superintendent of Public Instruction is provided under authority of Section 156.020 of the Kentucky Revised Statutes, and is authorized under this section to act in the absence of the Superintendent.

The Assistant Superintendent is also responsible for over all supervision of the internal operations of the Department of Education and for the employment, placement and transfer of members of the clerical staff.

However, the primary duty of the Assistant Superintendent is in assisting the Superintendent in developing policies and in the control and management of those factors within his realm of responsibility for the public school system.

Directly under the supervisory responsibility of the Assistant Superintendent is the Division of Departmental Finance and the Kentucky School for the Blind.

DIVISION OF DEPARTMENTAL FINANCE

The Director of the Division of Departmental Finance supervises and assists in the preparation of budgets for the various divisions and institutions under the control of the State Department of Education. He receives all funds and controls all expenditures of the Department and maintains the necessary bookkeeping records.

Individual records of all personnel employed by the Department of Education are kept in this Division as well as other records pertaining to the financial properties of the State Department. Services for the Department of Education including purchase and issuance of supplies and equipment, janitorial, duplicating, handling of mail, and accounting are provided by this division.

Statistical records for the Division of Departmental Finance can be found in Part II of this Report.

KENTUCKY SCHOOL FOR THE BLIND

The Kentucky School for the Blind has been in continuous operation for one hundred fifteen years. This accredited program of special education for the blind is the only complete one offered in the Commonwealth. Students are accepted from age five to eighteen. The school offers courses in pre-vocational work in manual training and piano tuning in addition to the regular elementary and secondary school courses. Students are received whose visual acuity is such that they cannot compete successfully in public schools. The negro staff and teachers were integrated in instruction in September 1955. In September 1956 the cottages received all the negro students who were in residence. The school is now completely integrated on all levels. There have been no major problems resulting from these changes. Twenty teachers are now serving an average enrollment of one hundred thirty-five students.

The students of Jefferson County are expected to be day students. Those whose homes are outside Jefferson County live in the cottages at the school. The Department of Education is now trying a project in the education of blind students. Academic students in the eleventh and

and twelfth grades are being enrolled in the public schools near their homes. A similar project has been carried out successfully before with the Louisville City Schools cooperating. It is now being tried in the home school of more blind students. A full program of education and leisure time activities have been planned for all of the students.

The future planning of capital construction includes replacement of the present classroom building, a new commissary, staff residence and a swiming pool. Two personnel needs are: 1. A qualified psychologist to carry out a complete testing program. 2. A Principal.

The two graduates of the past year are well on their way in advanced education.

The WHAS Crusade for Children award has helped make it possible to complete a spacious playground facility.

ADMINISTRATIVE ASSISTANT TO THE SUPERINTENDENT OF PUBLIC INSTRUCTION

The office of the Administrative Assistant to the Superintendent of Public Instruction is primarily responsible for publications and public relations for the Department of Education, and for Press, Radio, and Television relations.

The administrative assistant also disseminates general and specific information relative to the status of the public school program and conducts research for the Superintendent of Public Instruction. He assists the Superintendent and the Assistant Superintendent in the routine details of the function of their respective offices.

TEACHERS' RETIREMENT SYSTEM

This is a brief report covering the operations of the Teachers' Retirement System for the year ending June 30, 1957, and the trend of annuity payments from 1942-43 through 1956-57. A more detailed and factual report can be found in the Annual Reports of the Retirement System prepared under 161.320 KRS.

The new Law that was made effective July 1, 1955, has greatly increased the interest of teachers and has been a great factor in holding teachers in Kentucky and causing them to return to a covered position.

During the year 1956-57 there were 2,759 new teachers who had never taught in Kentucky previous to last year, and 135 who taught for the first time in Kentucky since 1940.

The average age of the 23,395 contributing members during the year 1956-57 was 41.71.

STATISTICAL SUMMARY

Contributors, 1956-57	Male	Female	Total
Number of Contributors	6,212	17,183	23,395
Proportion of total number	26.55%	73.45%	100.00%
Annual salaries	$22,770,875.00	$52,127,927.00	$74,898,802.00
Proportion of total salaries	30.40%	69.60%	100.00%
Average salary	$ 3,665.63	$ 3,033.70	$ 3,201.49
Average age (year)	39.98	42.33	41.71
Number with prior service credit			10,710
Total years of prior service credit			110,449.9
Average years of Prior service credit			10.31

Average prior service salary			$ 865.01
Aggregate contributions (member)			$ 3,409,800.55
Average contributions			$ 145.75

New Contributors, 1956-57	**Male**	**Female**	**Total**
Number of contributors	882	2,012	2,894
Proportion of total number	30.48%	69.52%	100.00%
Number with prior service credit	18	117	135
Total years of prior service credit	125.3	594.2	719.5
Average years of prior service credit	6.96	5.08	5.33
Average attained age	50.61	49.53	49.68
Number with no prior service credit	864	1,895	2,759
Proportion of total number	31.32%	69.68%	100.00%
Average salary	$ 2,741.28	$ 2,479.50	$ 2,561.48
Average attained age	29.09	31.18	30.52

Since July 1, 1942, on which date the first teachers were retired, 2,342 teachers have been retired. During the fifteen-year period, July 1, 1942, to June 30, 1957, $6,879,040.99 has been paid in annuities to the retired teachers. There were 1,704 living retired teachers at June 30, 1957.

TABLE I - trs

LIVING RETIRED TEACHERS

Trend in Annuity Payments*

Year Ending June 30	Number Receiving Annuities at End of Year	Per Cent Increase Over Preceding Year	Total Annuity Payments During Year	Per Cent Increase Over Preceding Year	Average Annual Annuity	Per Cent Increase Over Preceding Year

1948	689	15.80	252,374.54	17.17	366.29	1.19
1949	796	15.53	289,568.15	15.74	363.78	(0.69)
1950	896	12.56	331,367.57	14.44	369.83	1.66
1951	1,056	17.86	517,542.72	56.18	490.10	32.52
1952	1,152	9.09	574,212.32	10.95	498.45	1.70
1953	1,284	11.46	647,085.26	12.69	503.96	1.11
1954	1,410	9.81	725,196.28	12.07	514.32	2.06
1955	1,531	8.58	909,023.42	25.35	593.74	15.44
1956	1,618	5.68	982,596.56	8.09	607.29	2.28
1957	1,704	5.32	1,049,427.01	6.80	615.86	1.41

* Computations are based upon the number of members receiving annuities on June 30 of each fiscal year, and the total annuity payments during each fiscal year.

The General Balance Sheet, June 30, 1957, and the Statement of Receipts and Disbursements for the fiscal year ending June 30, 1957, show a very favorable picture of the System.

The Teachers' Retirement System is of the actuarial reserve type and is financed by contributions of members and the State, and by interest received on invested funds. In addition to matching contributions paid by members, the State makes contributions in amounts necessary to cover the obligation assumed by it for prior service credit. The State also pays the administrative cost of the Retirement System.

SECTION II

CHAPTER 2

THE BUREAU OF ADMINISTRATION AND FINANCE

The Bureau of Administration and Finance is responsible to the Superintendent of Public Instruction for those functions involving the Department of Education and State Board of Education in their relations with the local school districts in matters of general administration and finance. The Bureau is organized into seven divisions to carry out this responsibility.

The implementation of the Foundation Program during this biennium brought about an expansion of the scope and services of the entire Bureau. The expansion of services necessitated reorganization of some divisions, and the services of additional personnel became a necessity in some instances.

Implementation of the Foundation Program also resulted in closer relations between the local school district administrative officers and the staff of this Bureau. Frequent consultation with local school personnel has become necessary in order to fit the Foundation Program to the needs of the various local school districts.

The most noticeable increase in services has occurred in those divisions charged with the responsibility of administering technical aspects of the Foundation Program Law.

DIVISION OF BUILDINGS AND GROUNDS

A comparison of the building activity in the two years of the 1955-57 biennium reveals the impact of the Foundation Program on the school systems of Kentucky.

In the first year of the fully financed Foundation Program (1956-57), the expenditures for capital outlay for sites, buildings and equipment were more than doubled over the previous year. A tabulation from Part V of the Superintendents' Annual Reports indicates that $14,491,597 was expended by all Kentucky School Districts in 1955-56 and $31,678,395 in 1956-57. These sums were spent, or contracted by means of revenue bonds, for sites, new buildings, additions to buildings, improvements to buildings and new equipment. The sums represent legal contracts and do not include repairs and maintenance done by school board employees.

TABLE I - BG.

Facility Summary of Annual Buildings and Grounds Report for 1955-56

	County	Ind.	Total
Number of New Sites Purchased	32	10	45
Number of Acres in New Sites	382	108	490

Cost of Building Improvements	596,031	446,119	1,042,150
Cost of Equipment	610,106	339,264	949,370
Grand Total	$8,282,175	$6,209,422	$14,491,597

TABLE III - BG.

Facility Summary of Annual Buildings and Grounds Reports for 1956-57

	County	Ind.	Total
Number of New Sites Purchased	65	10	75
Number of Acres in New Sites	1015	121	1136
Number of Additions to Sites	7	6	13
Number of Acres in Additions	30	8	38
Number of New Elementary Buildings	44	14	58
Number of New High School Buildings	14	2	16
Number of Additions to Elementary Buildings	31	12	43
Number of Additions to High School Buildings	25	7	32
Number of Improvements to Buildings	130	162	292

TABLE IV - BG.

Cost Summary of Annual Buildings and Grounds Reports for 1956-57

	County	Ind.	Total
Cost of New Sites	$ 740,120	$ 194,317	$ 934,437
Cost of Additions to Sites	31,085	379,461	410,546
Cost of Improvements to Sites	608,175	133,808	741,983
Cost of New Buildings	15,387,865	4,429,702	19,817,567
Cost of Additions to Buildings	4,988,091	1,383,474	6,371,565
Cost of Building Improvements	451,709	977,862	1,429,571
Cost of Equipment	1,389,586	583,140	1,972,726
Grand Total	$23,596,631	$8,081,764	$31,678,395

The figures demonstrate that the staff of the Division of Buildings and Grounds has been busy. All of the sites and additions have been visited and approved before purchase. Most of the buildings have been visited before additions have been made. Conferences have been held in the office with superintendents and architects on the plans for each building. Plans and specifications for each building or addition have been reviewed and approved, and Division Engineers have inspected each building upon completion.

School Construction Committee Considers Economies in School Building

With the financing of the Foundation Program came the incentive to provide as many classroom units as the school population would justify. This expansion required additional classrooms. The Division of Buildings and Grounds had the responsibility for checking and approving all classrooms reoccupied, rented, remodeled from other spaces, or provided in any way except by approved plans and specifications. This responsibility resulted in practically every district in the State being visited one or more times.

Superintendents and school boards are confronted with two very serious problems in connection with building. First is the rising cost of labor and materials. Second is the rising interest rates. Both of these factors tend to reduce materially the building potential of any district.

In February 1956 the Superintendent of Public Instruction appointed a committee composed of superintendents, architects, engineers and business men to study and make recommendations, if possible, which would result in lower building costs. This committee was divided into four subcommittees, each charged with a different aspect of the problem. The subcommittees and the committee of the whole have been

meeting and working at frequent intervals since that time. The work is not complete, but it is hoped that a final report can be made by December 1957.

Another problem which seems to be incapable of solution at present is that of the district that has reached the limit of its potential with building needs still unsatisfied, and in many cases barely touched. This problem is financial, but it has a tremendous effect on the building plans of the district.

On June 17, 18 and 19, 1957, the State Department of Education and the University of Kentucky jointly sponsored a building conference at the Fine Arts Building, University of Kentucky. This three day conference explored such areas of the planning of school building as preliminary planning, recent trends in school buildings, economy in building, multiple use of space, materials and equipment. Operation, maintenance and insurance were also discussed. This conference, which included on the program nationally known specialists in many of the areas covered, was well attended by superintendents, architects and school board members.

The outlook for the coming biennium is for a leveling off of school building activity due to districts reaching the limit of their building potential. However, the level of the 1956-57 year is expected to be maintained for the coming biennium.

DIVISION OF FINANCE

The functions of the Division of Finance and the program as administered by the State Department of Education are broad in scope and practice. The program includes all duties and responsibilities assumed in the inspection, approval and supervision of all phases of local school district finance. Through authority delegated by the Superintendent of Public Instruction, the Division of Finance supervises the following activities of the various school districts:

1. **Budgeting**
   This phase includes the General Budget, which for all practical purposes, is the tax-levying budget. This document is to be filed with the Division of Finance by July 1, annually. The Close Estimate or Working Budget is filed with the Division of Finance by September 15, annually. After these budgets are analyzed by the staff of the Division of Finance and it is determined that all statutes governing budgets have been fulfilled and sound budgeting procedures have been used, these budgets are recommended to the State Board of Education for approval.
2. **Auditing**
   The seven field auditors of the Division of Finance audit annually the financial records of the school districts as well as the attendance records as taken from the teachers' registers of the various schools.
3. **Bonding of Treasurers and Depository Institutions**
   The Division of Finance supervises the bonding of Treasurers and the Depository Institutions. Penal sums of these bonds are set and corporate surety bonds are presented for the appointed treasurers. The Depository Institution, through its escrow agent, presents safe-keeping receipts to the Division of Finance to safeguard the funds of the local district.

4. **Reporting**
   The Division of Finance analyzes the monthly and annual financial reports as submitted by the various school districts.
5. **Revenue Bonds for School Construction**
   The ability of the school district to issue revenue bonds is approved by the Division of Finance based on the financial plans submitted as to the soundness of the projects. If the district has the ability to issue revenue bonds, the project is recommended to the Superintendent of Public Instruction, who gives formal approval to the issue.

One of the primary functions of the staff of the Division of Finance is the arranging of conferences with local school superintendents for guidance in the operation of the financial systems in the various school districts.

DIVISION OF FREE TEXTBOOKS

Free Textbook Law

The free textbook law was enacted by the General Assembly of Kentucky in 1928. It remained inoperative until 1934 because appropriations for the purchase of free textbooks were not made by the State Legislature. The appropriation act of 1934 provided $500,000 per annum for the Division of Free Textbooks. The annual appropriations for free textbooks were increased to $735,000 in 1950. The annual appropriations for the 1952-53 and 1953-54 school years were $900,000, for the 1954-55 school year it was $869,625 and $1,023,950 for the 1955-56 school year, and for the 1956-57 and 1957-58 school years, the annual appropriations were $1,034,000. The 1954-55 and 1955-56 appropriations included the cost of administration and the expenses of the State Textbook Commission.

The 1952 Textbook Law

The General Assembly enacted a new textbook adoption law in 1952. This law made it the responsibility of the Superintendent of Public Instruction to classify the subjects included in the Minimum State Courses of Study under seven subject fields; namely, Language Arts, Social Studies, Science and Health, Mathematics, Fine and Practical Arts, Foreign Languages, and Vocational and Business Education. The seven subject fields were to be arranged into four adoption groups as nearly in equal number and purchase cost as possible.

Under the 1952 law the greater part of the responsibility for textbook adoptions rests upon the local school districts rather than upon the State Textbook Commission. Beginning in 1954 one-fourth of the textbooks for the public schools of Kentucky are adopted each year. Each adoption year the State Textbook Commission approves a multiple list of books for the adoption group to be changed that year. From this multiple list all school districts are authorized to select one book for each subject and grade in that adoption group to be used as a basal text in its school system for a period of four years.

Annual Textbook Purchases

For textbook purchases subjects for grades one through eight have been divided into two major categories — required and optional subjects. The first purchases of free textbooks shall be for the required

subjects. If funds are available after textbooks have been purchased for the required subjects, additional textbooks will be purchased for the optional subjects.

The number of books that are purchased annually is determined by the amount of money available, the number of books requisitioned, and the cost of the books. The cost of textbooks varies by subjects and grades.

The table below includes the annual expenditures for free textbooks, the number of books purchased each year, the grade enrollment for grades one through eight, and the grades for which books were supplied.

Table I - ft

TEXTBOOK EXPENDITURES, GRADE ENROLLMENT, ETC.

School Year	Annual Expenditures		No. Books Purchased	Ele. Grade Enrollment		Grades Supplied
1934-35	$ 455,582.94		1,333,402	529,210		1-4
1935-36	519,241.20		1,093,316	523,535		1-5
1936-37	484,618.68		1,041,952	515,270		1-6
1937-38	485,495.01		1,161,533	491,337		1-6
1938-39	488,012.41		927,579	518,052		1-7
1939-40	487,791.63		851,510	510,514		1-8
1940-41	485,007.04		935,997	498,599		1-8
1941-42	486,081.85		841,457	488,485		1-8
1942-43	484,843.47		868,939	470,025		1-8
1943-44	486,844.96		864,355	451,742		1-8

Annual Number of Textbook Orders

The Division of Free Textbooks placed 10,152* orders for free textbooks with the publishers for the school year of 1945-46. From 1945 to 1957 the annual average number of book orders was 3,224. The placement of book orders ranged from March 12 until February 16 of the following year.

TABLE II-ft

NUMBER OF TEXTBOOK ORDERS

School Year	No. Book Orders	Unpaid Orders on June 1st.	Per Cent Unpaid Orders	Unpaid Orders on June 1st
1945-46	10,152*	186	1.8	$53,647.53
1946-47	2,875	40	1.4	4,150.65
1947-48	3,419	30	.9	5,794.63
1948-49	3,347	168	4.4	19,812.85
1949-50	3,277	1	.03	109.05
1950-51	1,991	0	.00	.00
1951-52	2,240	0	.00	.00
1952-53	2,394	0	.00	.00
1953-54	2,458	0	.00	.00
1954-55	2,567	0	.00	.00
1955-56	2,323	0	.00	.00
1956-57	1,641	2	.001	361.83
Average	3,224	36	.7	6,987.71

* The unused textbook appropriation for 1944-45 was carried over and used in 1945-46.

Textbook Sales and Fines

For the textbooks sold, lost, destroyed, and damaged, money for sales and fines is collected by the local school districts. All money collected as sales and fines by the local school districts shall be turned in to the general fund of the State. In the table below is listed by years the amount collected for sales and fines.

Table III - ft

TEXTBOOK SALES AND FINES BY SCHOOL YEARS

School Year	Amount	School Year	Amount
1934-35	$1,438.98	1946-47	$2,146.99
1935-36	3,773.21	1947-48	2,353.00
1936-37	.....*	1948-49	3,277.62
1937-38	1,842.47	1949-50	2,963.37
1938-39	1,701.62	1950-51	4,041.48
1939-40	2,830.39	1951-52	4,638.67
1940-41	2,135.89	1952-53	5,470.41
1941-42	1,642.64	1953-54	5,212.48
1942-43	1,234.60	1954-55	5,362.49
1943-44	2,765.86	1955-56	6,682.35
1944-45	2,009.45	1956-57	5,740.90
1945-46	1,927.46	Average	$3,236.05

*It appears that the collections for 1935-36 and 1936-37 were combined.

Estimated Cost of Textbooks

The estimated cost of a complete set of textbooks for each of the 483,071 pupils for the required subjects is calculated in Table IV-ft. The estimated cost of books for the authorized optional subjects, that is, four subjects per pupil has been computed in Table V-ft.

Table IV - ft

ESTIMATED COST OF TEXTBOOKS FOR REQUIRED SUBJECTS

A Complete Set of Books for Each Pupil
1958-1959 School Year

Grade	Grade Cost[1]	Pupil Enrollment[2]	Total Cost
1	$ 3.24	76,456	$ 247,717.14
2	3.39	68,524	232,296.36
3	8.24	69,847	575,539.28
4	11.32	63,247	715,956.04
5	12.32	52,754	649,929.28
6	12.58	50,548	635,893.84
7	15.20	53,259	809,536.80
8	17.46	48,436	845,692.56
Total	$83.75	483,071	$4,712,561.30*

*The $4,712,561.30 is for one complete set of books per pupil for the required subjects. Since the usable period of books is about four years, the annual cost would be one-fourth of the $4,712,561.30 or $1,178,140.32.

[1]Prices for current adoptions.

[2]Grade enrollment based on enrollment as of June 30, 1956.

Table V - ft

ESTIMATED COST OF TEXTBOOKS FOR OPTIONAL SUBJECTS

Textbooks For Four Optional Subjects Per Pupil
1958-1959 School Year

Grade	Grade Cost[1]	Pupil Enrollment[2]	Total Cost
1	$ 4.66	76,456	$ 356,284.96
2	4.89	68,524	335,082.36
3	5.88	69,847	410,700.36
4	6.18	63,247	390,866.46
5	6.87	52,754	362,419.98
6	7.35	50,548	371,527.80
7	7.14	53,259	380,269.26
8	7.80	48,436	377,800.80
Total	$50.77	483,071	$2,984,951.98*

*The $2,984,951.98 is the estimated cost of books for the authorized optional subjects. Since the usable period of the books is about four years, the annual cost would be one-fourth of the $2,984,951.98 or $746,238.00.

[1]Prices for current adoptions.

[2]Grade enrollment based on enrollment as of June 30, 1956.

The annual cost of the books for required subjects is $1,178,140.32 and the annual cost of the books for the optional subjects is $746,238.00 or a total annual cost of $1,924,378.32. To this amount is added shipping charges and other program costs which will make the total around $2,000,000.00 per annum.

DIVISION OF PROPERTY UTILIZATION

Biennial Report 1955-57

The Division of Property Utilization, Kentucky Department of Education, distributes Federal surplus property to eligible public health and educational institutions in Kentucky. The Federal Property and Administrative Services Act of 1949, (Public Law 152, 81st Congress) as amended, authorizes the Secretary of Health, Education and Welfare to allocate Federal surplus property to the Division of Property Utilization which, in turn, distributes such property to eligible claimants.

On July 3, 1956, Public Law 655 further amended Public Law 152 to include Civil Defense units as being eligible to receive Federal surplus property. The Division is now transferring property to Civil Defense units in accordance with this Law and our State Plan of Operation.

The property distributed includes all types and categories of personal and real property. Personal property embraces such items as hand tools, instructional supplies, maintenance supplies, building supplies, furniture, motor vehicles, machine tools, communication and electronic equipment. Real property may consist of land, land and buildings and appurtenant improvements, or buildings for off-site removal.

Property may be acquired for public health purposes, including research, by tax-supported or non-profit medical institutions, hospitals, clinics or health centers. It may also be acquired for educational purposes, including research, by tax-supported and non-profit school systems, schools colleges or universities. Non-profit institutions must be exempt from taxation under Section 501(c)(3) of the 1954 Internal Revenue Code. Personal property may also be acquired by Civil Defense units of a state or political subdivision and instrumentalities of a state which are established pursuant to State Law.

Government surplus real and personal property is offered on an "as is, where is" basis, without warranty of condition or title upon the basis of need and utilization.

The Division has expanded rapidly in the past two years and from information furnished by the Department of Health, Education and Welfare, we may expect an additional expansion according to estimates given as to the increase of surplus property declarations on the Federal level. The amount of new property being transferred has increased and a larger amount of new property is expected in the months ahead.

The recent increase in property utilization in Kentucky is shown in the acquisition cost of property transferred during the 1955-57 biennium. During the 1955-56 period $3,777,776. in personal property and real property appraised at $607,665., a total of $4,385,441., was transferred to health and educational institutions in Kentucky. The General Services Administration estimated fair value of the personal property was $2,833,330. Handling charges assessed by the Division were $259,061. to give a savings to institutions of $2,574.268. Real property fair value was $121,533. and handling charges assessed were $1,816. which is about 1½% of the fair value. During the year 1956-57, $4,411,301. in personal property and $579,899 in real property was transferred.

In addition to the regular program the Division was called upon to assist civil defense units, schools and hospitals in the Flood Disaster in Eastern Kentucky in January, 1957. Also, assignment was made to the Division by the State and Federal Civil Defense Administrations to try to replace property lost in the flood by Small Businesses.

Warehouse facilities of the Division have been provided in buildings formerly occupied by the Kentucky River Mills on North Wilkinson Street, Frankfort, Kentucky. The location is in easy access to the State Office Building where the administration office of the Division is now located on the fifth floor.

DIVISION OF PUPIL TRANSPORTATION

During the biennium of 1955-57 the program of pupil transportation enjoyed perhaps two of its most successful years since this program first began in Mason County in 1911. Although the Foundation Program was enacted into law during the legislative session of 1954, the program was not fully financed until the meeting of the 1956 General Assembly. As a result of these two sessions of the legislature, the Foundation Program has now been in effect three years, with the first two being approximately 70 per cent financed and the last one fully financed. Not until the passage of the Foundation Program law did the local school districts receive any financial aid for transportation from the state. Therefore, it would be reasonable to assume that substantial improvements would be made in the area of pupil transportation. This has been the case as herein pointed out.

Pupil transportation needs are expressed in terms of transportation units which are based upon the (1) number of pupils that live a mile or more by the nearest traveled road from the school attended and are transported at public expense, and (2) the area in square miles served. Each unit is allowed $1,600 which is allotted to the local school district to apply to the cost of transportation.

During the first year under the Foundation Program (1954-55) the total units earned by all school districts operating transportation programs were 3508.8 or when translated in dollars was $5,614,080. The following year (1955-56) saw the number of units increase by 224 or a total of 3732.8 units. This represented an increase of $358,400 or a total allotment of $5,972,480.

Based upon information received from local school districts for 1956-57, the state allocated 3896.1 units or $6,233,760 to pay for transportation services. This was an increase of 163.3 units or $261,280.

At this writing the tentative allotment in transportation units to local school districts for the 1957-58 school year shows a total of 4058.2 units or an increase of 162.1 units over the previous year.

The General Assembly of 1956 enacted into law two measures bearing directly on transportation. One of the measures was incorporated in House Bill No. 1 of the First Extraordinary Session. This measure in substance authorized and directed the Superintendent of Public Instruction through the Division of Purchases of the Department of Finance to secure price contract agreements for the purchase of school buses by all district boards of education. These price contract agreements shall establish maximum prices that a school district can pay for school buses. The other measure requires that every school bus must have attached to it on the drivers side a stop arm to be extended when pupils are being loaded or unloaded. The first law was placed on the statute books as an economy measure and the second one for the safety of the pupils who are transported. The latter measure especially has met with the approval of local school administrators.

To further insure the safety and comfort of transported pupils the State Board of Education adopted on June 14, 1956, the "Revised Minimum Standards for School Buses." These minimum standards embrace three types of school buses as modified by the 1954 National Conference of School Transportation and are as follows:

a. The conventional body-on-chassis vehicle having a seating capacity of 24 or more pupils.

b. The small vehicles including station wagons, suburbans, jeeps and converted panel trucks having a seating capacity up to and including twenty-three pupils.

c. The transit and metropolitan types of vehicles having a seating capacity of twenty-four or more pupils.

Each standard pertaining to each of these three types has been carefully considered from the standpoint of safety and comfort to the pupils and economy of operation.

Inasmuch as the present transportation formula has not been entirely satisfactory during the first three years of operation, the Superintendent of Public Instruction, in an effort to improve upon the present method of distributing transportation aid, appointed a committee composed of approximately twenty-five local school superintendents representing all sections of Kentucky, the executive secretary of the K.E.A. and four staff members from the Department of Education to develop a satisfactory plan to adequately and fairly distribute aid to local districts operating transportation programs. Following several months of intensive study and research, the committee has succeeded in developing a formula that has all the earmarks of making a more equitable distribution of transportation aid to the school districts throughout Kentucky that operate transportation programs.

The primary factors taken into consideration are pupil density based on area of square miles served and cost per pupil per day transported. Based on these factors, tentative calculations have been run for the school years 1956-57 and 1957-58 in an effort to determine the fairness, adequacy and feasability of the formula. Along with the calculations, a comprehensive narrative has been prepared to explain in detail the principle of the method employed. Also an act relating to the method of distributing transportation aid has been revised to conform with the principle of the proposed formula. If this plan meets with the approval of the Superintendent of Public Instruction and State Board of Education it will be presented to both houses of the legislature for consideration and adoption.

The Director of Pupil Transportation works as closely as possible with the 169 school districts that operate transportation programs. He gives assistance in planning bus routes and inspects as many of the approximately 3,500 school buses each year as possible. Workshops are held throughout the state for school bus drivers to make for safer transportation of pupils. This has resulted in a substantial reduction of school bus accidents. Also improved methods of selection, training, and supervision of bus drivers have resulted in a better program of pupil transportation. Two fatalities have resulted from transportation during this period, both occurring during the school year of 1955-56. Careful attention is given by this division each year to the approval of school bus body and school bus chassis manufacturers primarily for the purpose of insuring the safety and comfort of transported pupils. Seven school bus body manufacturers and a similar number of chassis manufacturers have been approved by the Department of Education as having met the regulations as prescribed by the State Board of Education. Also care has been taken each year to see that every bus is properly insured in

order to give more adequate protection to the riders and to protect local boards of education that might be liable in case a school bus becomes involved in an accident.

Table I below gives evidence of the rapid growth of pupil transportation in Kentucky and gives sufficient reason to believe that the growth will continue indefinitely. It is interesting to note that the rate of increase in the number of pupils transported for the eight-year period from 1948-49 to 1955-56 was approximately 11,000 to 23,000. The increase in annual cost of transportation was proportionally as great.

TABLE I - t

Table showing increase in number of enrolled pupils transported and total transportation cost by years during an eight-year period from 1948-49 to 1955-56.

Year	Number of Enrolled Pupils Transported	Increase in Number of Enrolled Pupils Transported	Total Transportation Cost	Increase in Transportation Cost
1948-49	168,162	.....	$3,702,125.70	$ .....
1949-50	187,616	19,454	3,986,580.02	284,454.32
1950-51	200,368	12,752	4,451,407.60	464,827.58
1951-52	211,572	11,204	4,956,026.34	504,618.74
1952-53	229,177	17,605	5,313,836.47	357,810.13
1953-54	252,189	23,012	5,652,502.25	338,665.78
1954-55	263,572	11,383	6,101,398.79	448,896.54
1955-56	277,362	13,790	6,428,291.17	326,892.38

DIVISION OF RECORDS AND REPORTS

The Division of Records and Reports is charged with responsibilities that fall into two major areas: school statistics and Foundation Program calculation. In addition, the Division makes such studies and reports as are desired by the Superintendent of Public Instruction.

School Statistics

Each local school district, in accordance with the statutes, maintains a continuous census of children of school age residing within the limits of the district. Tabulations of this census are made monthly and forwarded to this Division. These tabulations are summarized and a declaration of the census for Kentucky is made annually. This declaration shows the number of children by race, sex, age, and grade in school.

The census is of great importance to those persons who plan for the future needs of Kentucky's public schools. It provides a basis for predicting future enrollments resulting in predictions of financial and housing needs.

In accordance with statute and State Board of Education regulations, each public school teacher in Kentucky maintains a **Teacher's Register of Daily Attendance.** This is a comprehensive record which provides for each pupil a permanent record of his enrollment, membership, attendance and tardiness as he progresses through the school.

Summaries of this information are made at the local district level and forwarded to the Department of Education. The Division of Records and Reports make summaries for the state which appear later in this report. To insure uniformity and accuracy, audits of these records are made by field representatives of the Division of Finance of the Department of Education.

These general school statistics are also important for future planning at the state level and at the national level. Also, average daily attendance and transportation data gathered by these reports provide the basis for calculation of allotments to local districts from the Public School Foundation Program Fund.

Foundation Program Calculation

On or before August 15 each year, the Division of Records and Reports calculates the tentative allotments to local school districts from the Public School Foundation Program Fund.

This tentative calculation is based on average daily attendance from the past school year, requests of local superintendents for units, information from the Bureau of Instruction, Division of Pupil Transportation, and Division of Finance of the Department of Education and data from the Department of Revenue. On the basis of this calculation, monthly installments of the allotment are sent each district.

Visits to the local districts by field representatives of the Bureau of Instruction and the Division of Finance of the Department of Education are then begun to inspect the **Teachers' Registers,** the professional staff employed, and the program of instruction being carried on. On the basis of information gained from these visits, the final calculation of the Foundation Program allotments is made. This final calculation also takes into consideration the ranking of teachers according to training as made by the Division of Teacher Education and Certification.

Adjustments are made in the remaining monthly installments to local districts so that the total allotment to a district agrees with the final calculation.

Other Reports

The Division of Records and Reports compiles data for the **Public School Directory** published annually as a bulletin of the Department of Education.

Various requests for information compiled by this Division are received from the Department of Health, Education and Welfare of the United States Government, and other agencies and individuals.

DIVISION OF SCHOOL LUNCH

During the years 1955-56 and 1956-57 emphasis has been placed upon two objectives for all school lunch programs in the schools of Kentucky. These objectives have been:

1. To provide a noon meal for all Kentucky school children which will meet at least one-third of his daily nutritional requirements; and
2. To provide a school lunch environment where teachers may teach and children may learn.

Technical advice and financial assistance have been provided local school personnel with the view of improving the quality and quantity of the meal served and the dining room environment. The addition of one supervisor to the staff of five during the two year period has made it possible for the supervisory staff to reach more often a greater number of school lunch operations. Financial assistance was possible to those districts approved to share in the Kentucky allocation from the federal appropriation.

Training programs have been planned and conducted by the area supervisors for school lunch personnel in those districts feeling a need for such training. These training programs materialize upon an in-

vitation from the local superintendent. The programs have been of two day duration and average attendance at each session was fifty.

Reimbursement rates for the Type A lunch varied from 4c to 6½c during the 1955-56 school year and from 4c to 7½c during the 1956-57 school year. Rates were assigned to each lunch program on the basis of need as determined by the factors size of school, cost of lunch to the child, and percent of local ability to support the total educational program. The rates as assigned during the 1956-57 school year made it possible to make Federal funds available for use by the local school lunch programs during the time of lunchroom activity. The claims presented for the months of May and June 1957 were reduced by 7% and 10.5% respectively. The objective of making funds available during the school year was thus more nearly realized.

The Special Milk Program for Children was continued in Kentucky schools during the two year period 1955-1957. The program, when inaugurated in 1954, was organized so that reimbursement payments were made to schools for milk consumed in excess of a base figure. During this biennium the number of Type A lunches has been substituted for the base figure. This procedure has been more highly accepted as reflected in the participation data. The rate of reimbursement to schools has continued as 3c per half pint for milk served to children in schools not serving Type A lunches as required by the National School Lunch Program and 4c per half pint for milk served to children in addition to that served as a part of the Type A lunch. The Special Milk Program was broadened in 1955 to include nursery schools, child care centers, and seasonal as well as permanent camps. Although participation by these groups has been rather small, it is felt that increased services have been made available to an important group of children.

TABLE I - sl.
NATIONAL SCHOOL LUNCH REIMBURSEMENT AND PARTICIPATION DATA

	Amount of Reimbursement Received by Schools	Total Number Meals Served During Year	Total Number Meals Served Free During Year	Largest Number of Schools Participating in One Month	Largest Number of Children Participating in One Month
1955-56	$1,863,570.38	41,167,069	4,833,725	1,326	260,688
1956-57	2,315,514.81	46,595,312	5,685,875	1,353	284,055

TABLE II - sl.
SPECIAL MILK PROGRAM REIMBURSEMENT AND PARTICIPATION DATA

	Amount of Reimbursement Received by Eligible Schools, Camps, etc.	Number of ½ pints milk for which Reimbursement Was Paid	Largest Number of Schools Participating in One Month
1955-56	$ 988,625.09	23,312,572	1,180
1956-57	1,047,553.82	27,262,380	1,327

The following is a summary of accomplishments and progress that has been made during the biennium:

1. The services of nutritionists have been extended to include all school lunch programs in all schools;
2. A larger percentage of schools are operating school lunch programs as a part of the total educational program;
3. The number of schools having lunch programs has increased with a larger number of children attending schools where there are school lunch facilities;
4. The program of in-service education for local school lunch personnel has been continued with increased demand for summer work shops;
5. The Special Milk Program for Children has been simplified and extended to reach a larger number of children.

SECTION II

CHAPTER 3

THE BUREAU OF INSTRUCTION

The Bureau of Instruction consists of three divisions, all of which are concerned with the quality of instruction provided by the 216 local school districts. The services of this Bureau have been expanded during the last biennium due to the increased emphasis on instruction brought about by the Foundation Program Law. The responsibility for providing leadership in the various phases of the educational program falls to the Bureau of Instruction because its work is directly related to the learning process. Some of the areas given consideration during this biennium are:

The organization of State study committees on science, citizenship, and moral and spiritual values
Cooperative in-service training program
College evaluation program
Science workshops at the University of Kentucky, Western, Morehead, Murray, and Eastern
System-wide twelve-grade evaluation
Evaluation of proposed educational program prior to the construction of school buildings
Special emphasis on curriculum development in grades one through twelve
Program for mental group testing.

It is the further responsibility of the Bureau, through the Division of Teacher Education and Certification, the Division of Instructional Services, and the Division of Education for Handicapped Children, to supervise the provisions of the Foundation Program Law, the 1956 Budgetary Law, and the State Board of Education Regulations which have to do with the general program of instruction, certification of teachers, ranking of teachers, approval of various Administrative and Special Instructional Service Personnel and Supervisor of Instruction and Director of Pupil Personnel Units, accreditation and approval of schools, and the licensing of child care centers.

THE DIVISION OF INSTRUCTIONAL SERVICES

GENERAL AND SPECIAL SUPERVISION

Prior to 1952, general supervision at the school system level was not a status program in Kentucky. If the superintendent and the board of education of a school system chose to provide supervisory services, the cost of same was charged to the instruction budget. This fact alone often created a climate for supervision in which the teachers and supervisors were in conflict. If the supervisory services were discontinued, the money expended for same potentially could be divided among the teachers that had been served.

Before the enactment of the Foundation Program Law, many educational leaders in Kentucky were of the opinion that additional system-wide educational leadership was needed in order to improve the quality of educational opportunities for Kentucky's children. Much of this thinking was the result of the fact that the responsibility of the school

superintendent had multiplied to the extent that it was practically impossible for him to devote much time to the actual improvement of instruction. Therefore, the creation of the position of supervisor was envisioned as a means of helping provide the type of leadership that the superintendent was not providing, due to the pressures of his office. It follows that the personnel filling the positions of supervisors across the state would be well trained individuals, skilled in dealing with teachers and other professional personnel. Therefore, the qualifications and requirements for such individuals have been held at a high level. Superintendents have been urged to be highly selective in choosing the individual to fill this important position. Every effort has been made at the state level to assist the superintendents in securing the best possible persons to serve in the supervisory capacity.

The supervisory group has organized itself into a professional organization known as the Educational Supervisors of Kentucky. This organization makes it possible for supervisors to work together in small groups and in state groups on the development of the supervisory services to Kentucky schools. These activities make it possible for the fine leadership residing among Kentucky supervisors to exert itself in a beneficial way for the improvement of other supervisors. The supervisory groups are dealing with such study areas as Child Growth and Development, Staff Relationships, Teacher Growth, Teacher-Learning Materials, and Evaluation Procedures. Under the sponsorship of the Supervisors' Organization, the State Department of Education, and the Colleges, various state-wide workshops and conferences have been conducted. The Supervisors' Organization is on record as desiring that a state-wide workshop and a state-wide conference for supervisors be conducted annually.

The state shares in the cost of the supervisory service and the state contribution is determined on the basis of the school system's entitlement and the qualifications of the supervisory personnel as provided by the statute and State Board regulations. If the school system provides supervisory service in keeping with the entitlement, state aid is available. If the system does not provide the service, then the state aid is not available to the school system for other purposes. The growth of the supervisory program in terms of personnel during the 1955-56 school year and 1956-57 school year is as follows:

Supervisors 1955-56	(County School Systems	= 69)
	(Independent School Systems	= 27)
Supervisors 1956-57	(County School Systems	=103)
	(Independent School Systems	= 43)

As the 1957-58 school year gets underway, there is every indication that the use of supervisors at the system-wide level is continuing to increase in the Kentucky school systems. Within the next biennium there is every indication that the school systems of the state will aproach the full utilization of the potential state aid for supervision as provided by law.

ATTENDANCE AND PUPIL PERSONNEL

Attendance is a natural thing for thousands of children who are enrolled in Kentucky schools. A child who is to receive maximum benefit from the school program must be in regular attendance and feel he is a vital part of the school activities. To provide this opportunity for all the children of all the people, the total school personnel must plan together the total school program. The Director of Pupil Personnel and the Visiting Teacher are vital members of this planning group.

Increased emphasis is being placed on the causes of non-attendance with absence from school recognized as a symptom of a problem that needs to be understood. The pupil personnel workers, with their training and experience in working with school personnel, with children in their homes, and with community agencies, contribute a unique service to the total school program.

The Foundation Program in providing a sound program of education improved attendance. Attendance is the vital factor in determining the needs of a district as classroom units are based on average daily attendance.

Pupil personnel workers participate in in-service training conferences held in local districts and area centers. An annual state-wide conference was held at Cumberland Falls State Park in 1955, and at Ken-lake Hotel in 1956. The objectives of the annual conference are to orientate new workers, to encourage professional growth, to give workers current information on state policies which affect pupil personnel services, to present professional people on pertinent subjects, to provide for discussion of vital problems and to promote better understanding among pupil personnel workers.

The trend is toward more full-time directors. In 1955-56, 90 districts applied for one or more units. In 1956-57, 73 districts applied for a fractional unit for a director, with 147 districts applying for one or more directors. Three counties employ two directors each, one county employs six, and one county employs seven. Eleven directors serve two districts each. In 1956-57, 54 directors held Masters Degrees, 129 had AB or BS Degrees, 26 had more than 90 college hours and 24 had less than 90 college hours.

In 1955-56, 19 Emergency Certificates were issued and in 1956-57, 17 Emergency Certificates were issued.

A Handbook for pupil personnel workers was prepared and published as the March, 1957 Educational Bulletin. This bulletin interprets the role of the pupil personnel worker in the total school program.

The visiting teacher works in cooperation with the director of pupil personnel and the total school staff to promote better attendance. In 1955-56, 25 districts employed 58 visiting teachers. In 1956-57, 26 districts employed 48 visiting teachers.

Child Care Centers:

Through the efforts of the Kentucky Division of the American Society of University Women, the first law in the state regulating private pre-school centers was passed by the 1956 Kentucky General Assembly. In accordance with the law, the Superintendent of Public Instruction, Dr. Robert R. Martin, appointed an advisory board to devise regulations and application forms governing the operation of child care centers. These regulations were recommended to, and adopted by, the State Board of Education. The Supervisor of Attendance and Pupil Personnel in the Division of Instructional Services was appointed to direct this work throughout the state.

The purpose of this program is to provide for the safety of children and raise the standards for programs, facilities and equipment in private child care centers.

During the first year of supervision under the State Department of Education, 173 child care centers were listed. Seventy-two applications were received. Thirty regular permits and 42 provisional permits were issued after the centers were visited by a staff member from the Division of Instructional Services.

A Handbook for teachers of pre-school children was prepared and published as the July, 1957 Educational Bulletin. This bulletin gives philosophy of working with pre-school children, with practical suggestions for programs, and equipment and materials.

There is an increased interest in meeting the standards and regulations by those starting new kindergartens and nursery schools.

ELEMENTARY EDUCATION

Significant progress has taken place in elementary education during the biennium 1955-57. Financing of the Foundation Program has raised the status of the elementary school, its teachers and principals. No longer is elementary education a neglected area, but more and more emphasis is being placed on this extremely important part—the beginning of the child's school life. This fact is true both at the state and local level. In the reorganization of the State Department of Education, recognition was given to the increasing importance of elementary education through the addition of a second Supervisor of Elementary Education. The two supervisors are available to the elementary schools of the state to aid in improving the instructional program through work with superintendents, supervisors, principals, teachers, or other interested groups.

For the first time cognizance is being taken at the state level of the need for looking at the over-all program of instruction in a system — evaluating it and recommending improvements. This new state program of twelve-grade evaluation should prove a boon to elementary education since more awareness of its need will result from an over-all look at the various systems' programs of education.

As the Foundation Program progresses, more and more of its benefits are becoming apparent at the elementary school level. An increasing proportion of elementary teachers of music, art, physical education, and elementary librarians are being added by the school districts. Elementary centers are increasing throughout the state as evidenced by the fact that in 1955-56 there were 420 elementary centers of eight or more teachers, while in 1956-57 there were 459 such schools.

There appeared, too, during the biennium an increase in the number of elementary principals. Evidence points to the fact that more and more principals are being made principals in actual practice rather than head teachers. In 1956-57, there were 852 full- or part-time principals in public schools giving one half or more of their time to the principalship in either elementary or combination elementary—high schools and nineteen assistant principals also spending one-half time or more at supervision of these schools.

TABLE I - is.

NUMBER OF PUBLIC ELEMENTARY SCHOOLS IN KENTUCKY ACCORDING TO NUMBER OF TEACHERS*

Number of Teachers	1955-56	1956-57
1	2093	1801
2	597	509
3	167	177
4	139	117
5	64	69
6	68	62
7	36	37
8	69	88
9-12	162	176
13-16	81	69
17-20	60	49
21-24	38	56
25-28	9	10
29-32	7	5
33-36	0	2
37-40	3	2
41-42	1	2
Total	3574	3231
High School-Elementary School Combination	359	338
GRAND TOTAL	3933	3569

From the table, one can see that in 1955-56 there were 3,933 public elementary and high schools compared with 3,569 in 1956-57. This represents a decrease of 364 schools—primarily in the one-room group. It seems safe to assume that this trend away from the one unit school will continue into the next biennium.

A significant fact to be noted is that of the 3,933 elementary or combination public schools in 1955-56, 3,164 were schools having seven or fewer teachers. Under the Foundation Program, an elementary school must have at least eight teachers before there can be a principal. We find, therefore, that teachers in the 3,164 schools are teaching with little supervisory help that is immediately available when needed.

* Includes both county and independent districts

In 1956-57 there were 2,772 schools which did not qualify for a principal out of the total of 3,569. The number of schools that do not have supervisory help for the teaching staff is decreasing as a more comprehensive program of consolidation of the smaller units is being carried out.

TABLE II - is.

13-16	22	21
17-20	4	7
Total	192	193
High School-Elementary School Combination	52	58
GRAND TOTAL	244	251

NEEDS:

1. Although an increase has been noted in the number of special units being used at the elementary level, there is still an unfavorable balance in the utilization of these units. There is a need for even greater emphasis on obtaining music teachers, art teachers, physical education teachers, and librarians at the elementary school level throughout the state.
2. A definite need exists in most elementary schools for more help for each teacher in obtaining instructional materials. Many teachers still must use their own funds or resort to candy selling or other individual fund-raising devices to obtain money for necessary classroom supplies.
3. To do a more effective job of helping up-grade elementary schools throughout the state, more elementary supervisory staff members will be necessary in the Department of Education.

SECONDARY EDUCATION

There were 549 high schools, all types and organizations, approved by the State Board of Education before the close of the year 1956-57. The size of these schools are classified below and arranged according to the number of teachers in the high school organization and type of control under which the schools operate.

TABLE III - is.

LIBRARY SERVICES

This biennium has been a transition period in the field of education throughout the state. Due to the passage of the new Foundation Program for Education in Kentucky, the Law has provided for all children a minimum standard of education. The year 1955-56 saw the program in effect for the first time and in 1956-57 it was fully financed. Consequently, library service has extended as school systems improved their curriculum.

The need for improved library service has shown a decided trend toward a twelve-grade program, thus making an effort to equalize educational opportunities for both elementary and high school. Some school systems have given impetus to the planning of facilities and developing libraries in elementary schools. For the first time, through the Division of Instructional Services, it can be reported that there were 47 elementary schools with centralized library programs in the state during 1956-57. Some semblance of library service is being done in a number of other elementary schools, but lack of trained personnel or sufficient time allotted to organization and administration prevents the program from being an adequate one. The Supervisor of School Libraries has fulfilled a number of requests to evaluate and assist in the expansion of facilities in various schools and numerous materials from this office have been made available. All of these requests and services rendered offer evidence of the intense interest and effort on the part of some of the local school systems to provide long overdue library service to elementary school children.

The critical shortage of qualified librarians is still a serious hindrance to school library development. The number of teachers serving as librarians without any hours of library science, as reported during 1956-57 is 93, and 193 librarians have less than 18 hours of library science as compared with 284 unqualified librarians in 1951-52. Compiled data were not available for 1955-56. Of course, it must be kept in mind that standards have been revised since that time and the figures may have changed as a result of the revision. The fact that many school libraries in junior and senior high schools have been strengthened indicates progress has been made. The ASIS unit for librarians has been respon-

sible for putting all full-time librarians on ten months employment if the district is receiving money under the Foundation Program.

Progress cannot always be measured in terms of statistics, but the following table shows the total number of approved library programs which are provided to serve the youth of Kentucky.

Librarians	Ele.	Jr. & Sr. H.S.	12-Grade	Total
With library science training	42	303	35	380
Without any training	5	69	19	93
TOTAL LIBRARIANS	47	372	54	473

Number ASIS library units — 307.2
Number full-time librarians — 284
Number part-time librarians — 189

New qualification standards for elementary, high school and 12-grade librarians have resulted in more personnel becoming qualified. Absence of compiled data prevents making a report for 1955-56, but a breakdown of qualifications by number of hours in library science for 1956-57 are indicated in the following table.

Qualifications of Librarians

No. Hours of Library Science	18 and above	12 to 18 hrs.	6 to 12 hrs.	0 to 6 hrs.	Total
Number of librarians	280	32	59	102	473

The Department of Education continues to encourage and promote the training of librarians in order to develop effective school library programs.

Much has been done to improve library facilities during this biennium, but much still needs to be done. Even though study halls are still housed in the library reading room, in many instances this is being eliminated to provide expanded library service to meet the needs of a fuller curriculum. As plans for new buildings are made by school systems and approved by the Department of Education, library quarters are considered an essential factor.

Publications which have been developed during this biennium are "147 Recommended Books for the Kentucky Elementary Schools" and "Children's Choices" which were prepared by committees of school librarians. The publication **Library Services for Kentucky Schools** has been revised as the April, 1957 Department Educational Bulletin. It was prepared to give assistance to those who have little or no training in library science but are serving in library positions, and contains suggestions for organizing and administering library service throughout the twelve grades as well as offers informations which will be helpful to all librarians in the efficient operation of a school library.

Some measure of library service has been given to every school system in the state through visits to individual schools, participation in conferences, and by means of correspondence. The Division of Instructional Services, through its supervisor of school libraries and general supervisors, hopes to improve the library programs throughout the state

in order that the curriculum needs of the schools will be met and enriched.

The program for improving library services points toward the following efforts on the part of the Division of Instructional Services.

1. Have a fully qualified librarian in every school.
2. Provide adequate library program in every elementary school center.
3. Seek to improve the quality of library service to meet the needs of the curriculum.
4. Work toward increased expenditures for instructional materials for every school system.
5. Encourage school administrators to provide more functional and attractive quarters for libraries.
6. Provide leadership for all school systems when initiating and improving library program and facilities.

HEALTH, SAFETY AND PHYSICAL EDUCATION

HEALTH, SAFETY AND PHYSICAL EDUCATION have increased their contributions to the total education program of the state during the past biennium. Some of this can be traced either directly or indirectly to the fully financed foundation program. Yet, much of this progess can be attributed to an increased understanding by school administrators, teachers, and other personnel, of the values to be received from well-balanced programs in this area.

PHYSICAL EDUCATION. Certainly one of the important developments in the field of physical education was including physical education as one of the special instructional units under the Foundation Law. This meant that before these special units could be approved, they would have to meet certain criteria. As in the case of most of the development of the Foundation Law, the criteria were developed cooperatively by a cross-section of educators and lay people of our state. This development of criteria served two important functions. (1) It provided standards by which the programs could be approved. (2) The people who participated in this work became increasingly aware of the need for improving the programs of physical education and also of the contribution that physical education could offer to the total development of a child.

These criteria or standards were organized and compiled; and after acceptance by persons in the field of general education, as well as persons in physical education, they were adopted June 23, 1955 by the State Board of Education. These "Programs of Standards for Health and Physical Education" have provided a means of improving the quality of instruction. Before these Standards were adopted, the Code for Health and Physical Education provided that physical education be taught daily, but the Code did not set up any Standards to insure quality programs in Health and Physical Education.

From these Standards criteria have been selected and separated to be used as a basis for approving the special unit in physical education.

A significant achievement in the field of physical education has been the development and publication of a bulletin on elementary physical education. Again the development of this bulletin was a cooperative

achievement. It is an attempt to offer some guidelines and undergirding principles to be used by local school systems as they develop their own programs of physical education in accordance with the needs and interests of that particular school district.

There are several other trends that are developing as a result of the Foundation Law and of a need and desire for having a quality program of physical education. Some of these trends and developments are:

1. It is highly significant that the standards developed by the State Board have been widely accepted and used.
2. The using of more special teachers for elementary schools, and in some cases, of using more specialists in physical education to work with the regular classroom teacher toward the development and improvement of physical education programs.
3. Employing more women teachers for girls' physical education programs.
4. The use of self and team evaluation as a means of improving instruction in physical education.

TABLE VII - is.

Semester hours training in Health and Physical Education for physical education teachers — 1956-1957. (This includes full-time, part-time, elementary, junior and senior high school personnel.)

Sem. Hours in Health and Physical Education	Number	Per Cent of Total
0- 5 hours	101	13
6-11 hours	58	8
12-17 hours	71	9
18-23 hours	92	12
24-29 hours	96	13
30 or more	338	45
Total	756	100

23 of this number serve the elementary school only
58 of this number serve the junior high school only
675 of this number serve the high school or the twelve-grade program
169 women teach full or part physical education
45% have 30 or more hours in health and physical education
159 are teaching some physical education with less than 12 hours, because of the policy of permitting a teacher to teach two periods out of field
405 physical education programs with teachers serving full-time or part-time were approved as meeting ASIS requirements, and a total of 337.6 units were allotted.

HEALTH. The development of health programs in the past has been authorized and provided for by the Code for Health and Physical Education. The adopted Standards by the State Board as mentioned for physical education also included Standards for health programs. These standards are giving emphasis to make health teaching functional.

The trend in health has been to coordinate health instruction with health services and healthful surroundings to gain a total health program for school districts.

During the past biennium much progress has been made toward meeting the requirements of the Code for Health and Physical Education. Nearly 100 per cent of the districts are offering good health instruction programs. Many school districts have made remarkable expansion in their health services programs. The portion of the health program with which there is the most difficulty is in the area of student medical examinations. The following table shows that of the 218 school districts approximately 90 are not getting 95 per cent of their first, fifth, and ninth grade students examined each year.

TABLE VIII - is.

Number of districts meeting the examination requirements of the Code

1953-54	105
1954-55	124
1955-56	122
1956-57	127

SAFETY AND DRIVER EDUCATION. The school systems of Kentucky are becoming increasingly aware of the need for including more safety education in their total school curriculum. Safety instruction is being included in the daily life of each child rather than being taught as a special subject for a short period. There is a need and a demand for more behind-the-wheel driver training programs. However, many school districts will need additional help before driver training can really meet the need in our high schools. The inclusion of driver training as a special instructional unit under the Foundation Law and the development of criteria for approving these units have done much to standardize our driver training programs. However, the following table shows that a relatively small portion of the need for instruction in this area is being met.

TABLE IX - is.

Driver Training including behind-the-wheel instruction

Year	No. of Schools	No. of Students
1955-56	94	2219
1956-57	88	2129

During 1956-57, 53 driver training programs with full-time or part-time teachers were approved as meeting ASIS requirements and a total of 27.0 units were allotted.

Plans for improvement in this area during the next year.

1. Conference on Total Fitness
2. Workshop on Outdoor Education
3. Study of professional program required for certification of physical education teachers
4. State Department of Education, State Department of Health, and voluntary agencies, workshop of Total School Health Programs
5. Development of a twelve-grade program of health instruction
6. Study professional program for driver education teachers and develop certification requirements.

Future needs for improvement in this area.

1. More help in supervising programs. One supervisor must now divide time between the general program, physical education, health education, safety and driver education.
2. More provision in the Foundation Law for ASIS units. Many school districts could have employed more teachers of physical education if the units were available.
3. More and better qualified teachers. This is especially true of elementary physical education teachers and women teachers.
4. More adequate facilities and equipment. Improvement of instruction is hampered by lack of facilities and equipment.
5. Study and evaluation of the medical examination program to achieve a meaningful examination of all students periodically.
6. Plan for the inclusion of safety and driver training programs in more school curricula of the state.

CURRICULUM DEVELOPMENT

In July, 1956, a Supervisor of Curriculum Development was appointed. It is the purpose and responsibility of this supervisor to provide professional leadership in the following ways:

a. To assist in the development of the broad curriculum concepts which provide the framework for the development of curriculum at the school system level.

b. To assist teachers, principals, supervisors, and superintendents develop short and long range plans for curriculum study and development in relation to the total school program.

c. To assist in the development of curriculum bulletins and materials through working in cooperation with other State Department staff members, professional organizations, college personnel and various state committees.

d. To foster and assist in curriculum research projects in the school districts and at the college level.

e. To help provide resource materials for curriculum study by actively cooperating and working with professional curriculum organizations and keeping in touch with curriculum programs in other states.

f. To work with the colleges and other agencies that can provide assistance to curriculum development at both the state and local district level.

As the curriculum program gets under way, we anticipate the publication of several curriculum bulletins. We are committed to some publications in the field of science. There is also a great need for numerous publications that place emphasis on the first eight grades as we consider the development of curriculum on a twelve grade basis.

MUSIC EDUCATION

Supervision of specialized curricula in general education, long a neglected area, received substantial impetus with the appointment of a State Supervisor of Music in 1957. The Department of Education has

not had a Supervisor of Music Education since 1929 when Miss Mildred Lewis held the position.

The Foundation Program provides the framework for an expanded and enriched music program for Kentucky public schools by placing music on an equal basis with other administrative and instructional service units (ASIS).

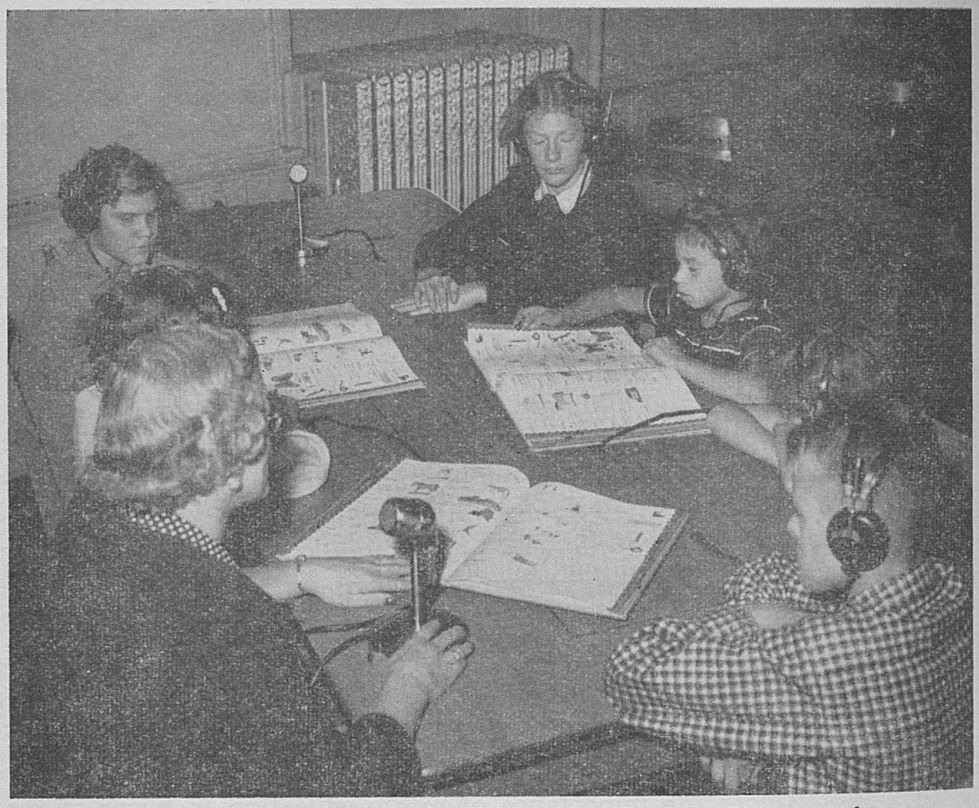

In 1956-57, there were 451.5 special units in music allotted to 99 county and 72 independent districts. This represents 17.6 per cent of the total ASIS units allotted. In addition to music programs which qualified for special units, other music programs were in operation as basic classroom units.

Tentative Goals and Objectives —

1. Provide central coordination and direction of the State's Public School Music program, designed to develop the full potential of the musical heritage of the State.
2. Expand and enrich the Public School Music program with additional emphasis on elementary grades.
3. Assist school districts through better local planning to achieve a more equitable distribution of special units between elementary and secondary schools and between music and other curricula.
4. Encourage a more desirable perspective and long-term planning.

Immediate Goals —

1. Re-evaluate the importance of music education in terms of the total end as attained through desirable experiences of the child.
2. Develop sound programs, well organized and balanced, to be directed by the school unit.
3. Formulate desirable standards and ways and means of evaluating program and facilities by the local district in terms of these standards.
4. Develop criteria for the expenditure of funds from all sources used in the procurement and maintenance of instruments and purchasing of other music supplies and equipment.
5. Develop guiding principles in determining adequate scheduling of a well-balanced music program.

Special Units are now available for the hard of hearing

Home Study is a function of the Division of Education for exceptional children

DIVISION OF SPECIAL EDUCATION FOR HANDICAPPED CHILDREN

There has been increased interest in the establishment of classroom units for physically and mentally handicapped children since the implementation of the Foundation Program Law. Also, the addition of supervisory personnel in the Division has made it possible for school districts to receive more assistance in identifying, classifying and planning programs for all types of handicapped children.

Special Education Teaching Personnel

There is not a sufficient number of fully qualified teaching personnel available to staff all classroom units for handicapped children provided in the Budgetary Law for the Foundation Program. During this biennium, it was necessary in some districts to conditionally approve teachers only partially trained in special education methods and procedures. Also, in some cases, the employment of part-time teachers and the allotment of fractional units was unavoidable.

Classroom Units

During 1956-57, 39 school districts had 113.5 classroom units for handicapped children with an Average Daily Membership of 3324.504. In 1955-56, prior to the full implementation of the Foundation Program, there were 99.3 units operative in 26 school districts with an Average Daily Membership of 3230.983.

TABLE I - se.
CLASSROOM UNITS FOR HANDICAPPED
1955-1957

*Some districts had more than one type of unit.

ORTHOPEDICALLY HANDICAPPED

The number of school districts having special classes, home or hospital instruction, for crippled children has increased markedly during the biennium (see Table I). In 1955-56, 33 districts had one or more programs; in 1956-57, 38 school districts had programs for Crippled

Children. It is anticipated that the number of districts will continue to increase as interest is stimulated under the Foundation Program. In addition, there is a national trend, becoming apparent in Kentucky, for the more severely crippled child (such as the cerebral palsied, neurologically involved, etc.) to be enrolled in these types of units. This trend will increase the demand for programs for physically handicapped children who have never been enrolled in school.

VISUALLY HANDICAPPED

A two thousand dollar ($2,000.00) grant from the Kentucky Society for Crippled Children enabled the Division to continue a Special Equipment and Materials Loan Service for the use of visually handicapped children in regular classes in rural areas. In 1955-56 approximately 215 large-type books were loaned to 26 school districts; in 1956-57 approximately 304 large-type books were loaned to 37 school districts.

In 1956, Federal legislation for materials for blind children was amended to include blind children enrolled in regular school classes. In January 1957, 11 school districts reported 46 blind children to the Division. These districts will receive books and materials from the American Printing House for the Blind up to a value of $30.00 per child for use during the 1957-58 school year. These children are registered with the Division of Special Education, which allocates the materials.

SPEECH AND HEARING

During the 1955-56 school year a grant to the Department of Education from the Kentucky Society for Crippled Children provided for the salary, travel, and clerical assistance for one supervisor for services to speech and hearing handicapped children. During that year, it was possible to provide services to 207 of the 311 children from 39 school districts referred to the Division as having speech and/or hearing problems.

In July 1956 the supervisory position in speech was included in the State Department of Education budget. A grant of $33,320.00 was received from the Kentucky Society for Crippled Children to cover the salary, travel, and clerical assistance for a supervisor for programs for hearing handicapped children. With a supervisor to concentrate full time in each area, the number of speech and hearing handicapped children receiving the services of the Division increased over four hundred per cent (400%). In 1956-57, it was possible for the Division to be of assistance to 1,054 speech and hearing handicapped children from 118 school districts.

Educational Study Projects to identify **speech** and/or **hearing handicapped** children were continued during the 1955-56 school year in three (3) school districts. During 1956-57, study projects were conducted in the area of speech correction in six (6) school districts. Two of these districts plan to establish units in speech correction to meet the needs of these children during the 1957-58 school year. Two other districts have plans to establish units within the next two years. As the need is demonstrated in other districts, and the Foundation Program continues to make provisions for these units, it is anticipated that there will continue to be a substantial increase in the number of speech correction programs in Kentucky public schools.

In September, 1956, it was mutually agreed that the Division of School Health of the State Department of Health would conduct surveys

in local districts for hearing defects and refer children who need further assistance to the Division of Special Education. The Division would be responsible for initiating medical, therapeutic, and educational follow-up procedures for those children found to be in need of such attention. (See Table II)

Since this arrangement became effective, a total of 690 children with hearing handicaps from 112 school districts were referred to the Division by the State Department of Health. Of these, some 429 were referred either to an ear specialist for examination, had an audiological evaluation, and/or received a hearing aid. These services were purchased by the Kentucky Society for Crippled Children. Educational recommendations for each child were made to the local school districts by the Division so that these children could receive maximum benefit from their education. It should be noted that the remaining 261 children will receive assistance during the 1957-58 school year.

MENTALLY RETARDED

In January 1956 the Special Education Act was amended to include the establishment of programs for "trainable" mentally retarded children (IQ 35-50). Formerly, school districts could establish classes only for "educable" mentally retarded children (IQ 50-75). This amendment emphasized the need for Division personnel qualified in tests and measurements to aid in the identification of mentally retarded children for placement in special education classroom units. In August 1956, a position in the Division was changed to permit the employment of a supervisor of mental testing, thus increasing services to local school districts.

In 1955-56, there were 22.5 classroom units for educable retarded children in five school districts. In 1956-57, there were 39.5 classroom units for the educable mentally retarded in 11 districts and 2.5 units for the trainable mentally retarded in three school districts.

TABLE III - se.

CLASSROOM UNITS FOR MENTALLY RETARDED CHILDREN

1955-56			1956-57

			Owensboro	.5		
			Warren County	1		
			Wolfe County	2		
TOTAL	22.5	None		39.5		2.5

In 1956-57 Division personnel administered individual psychological examinations to children in Boyd, Floyd, Greenup, Harlan, Henderson, Monroe and Warren counties. Upon completion of the testing, individual reports on each child were sent to the local school district; these reports included recommendations concerning educational placement for the children tested, e.g., regular class, special class for educable or trainable children. As a result of this testing, one unit for physically handicapped children was re-classified as a unit for the trainable mentally retarded and plans were made for the establishment of additional units during the 1957-58 school year. Division personnel also tested individual referrals from various other counties.

In 1956-57, due to lack of properly qualified teachers, 18.9 of the 42 units for the mentally retarded were approved on an emergency basis. This conditional approval was for one year only and was granted on the condition that the teachers secure the additional training before the beginning of the 1957-58 school year.

CRITICAL UNMET NEEDS—PROGRAM PROJECTION

Future expansion of education for handicapped children demands provision for:

1. Additional Division personnel to aid in the development and supervision of units (home, hospital and classes) for orthopedically handicapped children.
2. A teacher preparation program for teachers of handicapped children to increase the number of fully qualified teachers for all types of special education units.
3. Scholarships for prospective special education teachers with the understanding that they teach handicapped children in Kentucky for a defined period of time.

DIVISION OF TEACHER EDUCATION AND CERTIFICATION

Education has always been dear to the hearts of American people. The American people, however, seem to be resting their hope for the bright future which beckons on education more today than ever before. Next to peace education appears to be society's deepest concern. Society demands more of education in today's world than ever before. No doubt, people will demand more, not less, educational opportunity for the children of tomorrow.

The great scientific discoveries, the increasing complexity of society, the vast population increases, the manpower shortages in all of life's endeavors and the crucial need for human values by which man may make the choices conducive to human welfare rather than human destruction—all these factors bring into focus the nation's unique system of public education, for it is through America's schools that society must prepare its children, and even its adults, to live in the present complex world and the changing and perhaps very strange world of tomorrow.

"Slumber not in the tent of your fathers—the world is advancing; advance with it." This is a challenge to the public schools everywhere, because it is through education that human welfare is advanced. The ultimate challenge is for quality education. Teaching is the "mother of all other professions" and on the quality of its services depends the welfare and leadership of our country. This challenge has been reflected in the slogan of the Kentucky State Department of Education during the past biennium—"Advancing Education in Kentucky."

The services of the Division of Teacher Education and Certification have focused upon advances which are reflected in better qualified teaching personnel. These services are performed through the following areas:

Teacher preparation at the pre-service level
Teacher Certification
In-Service growth of teachers
Publications and communications
Teacher recruitment
Research
Accreditation of teacher education colleges and universities
Ranking of teacher qualifications in keeping with the Foundation Program Law
Determining qualifications of special instructional personnel provided for by the Foundation Law.

These last three functions are new to this Division this biennium.

Higher Standards of Preparation—Certification

College graduation has been recognized as the minimum level preparation and certification for elementary teachers. This recognition was given to high school teachers through certification standards in 1934. The target date of September 1, 1958, has been set as the effective date for this standard of certification. Thus Kentucky has now become one of the high-standard states. This holds some promise for teacher supply

because research supports the idea that high standards attract a large number of top flight people, while low standards repel them.

The keystone to any significant advance in public education lies in the hands of an adequate supply of competent classroom teachers and administrators. The Foundation Program of Education has given professional and financial recognition to a well qualified teacher. The Foundation Program provides a greater salary incentive for college graduation than for any other increase in teacher qualifications. The increase from Rank IV to Rank III (college graduation) is $500 while all other increases amount to $300.

Certification in "The Old Way" Replaced by the "Approved Program" Approach

During this biennium the "approved program" approach to certification has come to be generally accepted by the thirty-four (34) teacher education institutions. This new approach is practiced by this Division in issuance of certificates and generally recognized as a significant process for improving the quality of teacher preparation. Under "the old way" a list of courses was required for each type of certificate and in order to issue a certificate the transcript of credits was checked in detail to determine whether or not each course had been completed. Today, the profession works with the Division of Teacher Education and Certification to determine the competencies essential for each type of position in the schools; then, a broad outline of three facets of college preparation—general education, professional education, and special education in the subjects to be taught—are adopted by the State Board of Education as the program designed for developing the essential competencies. Each college approved for offering teacher preparation programs plans its program of courses within this broad framework and after securing State Board approval guides each prospective teacher. After successful completion of the program by the student, the college recommends to the Division of Teacher Education and Certification that the applicant for the certificate has completed the "approved program." It is now upon this basis that certificates are issued. This is in accord with the best practices in the Nation and is a significant advance.

New Programs of Preparation and Certification

During this biennium, under the stimulation of the Foundation Program Law, new programs have been developed for elementary librarianship and for guidance counselors. Programs for high school librarianship have been revised and based on the competency approach—the competencies needed by an effective librarian in today's school.

Ranking of Teacher Qualifications

One of the biggest factors in the formula for the allocation of State funds to the local school systems under the Foundation Program is the preparation level or qualifications of the teaching personnel. The incentive offered to teachers through salary increments was great. This stimulated teachers to raise their qualifications as reflected in Table I. The improvement in preparation during the first year of a fully financed Foundation Program is significant and the full impact of the Foundation Program on teacher preparation will not be reflected until the next biennium.

TABLE I - tes

NUMBER OF PERSONNEL EMPLOYED IN VARIOUS RANKS IN KENTUCKY FOR SCHOOL YEARS 1955-1956 and 1956-1957

	1955-1956	1956-1957	Increase or Decrease
Rank I (master's degree plus 24 sm. hrs.)	187	248	+ 61

Rank VII (0- 31 sm. hrs.)	591	622	+ 31
TOTAL	21,835	22,967	1,132

Preparation of Kentucky's Teachers

It seems paradoxical but during the seventeen-year crisis in teacher supply, Kentucky teachers have consistently lifted the median level of their preparation each year for the past twelve years—a whole school generation. Twelve years ago the median preparation of all elementary teachers employed in Kentucky was 82.3 semester hours and only 44% of the 17,612 elementary and secondary teachers were college graduates. Just five years ago, the median preparation of elementary teachers, as reflected in Table II, was 102.4 semester hours and 57% of the 19,940 elementary and secondary teachers were college graduates. In the second year of this biennium, 1956-1957, the median preparation of all elementary teachers had reached the highest level in the history of Kentucky—118.3 semester hours, just 10 semester hours below college graduation. During the same period, 60.3% of the 22,617 elementary and secondary teachers were college graduates.

1956-1957	19,779	2,838	22,617	87.45

The Programs for Issuance of Emergency Certificates

The state program for issuance of emergency certificates has been strengthened during this biennium. Each school system requesting emergency certificates has submitted a planned program for in-service growth

of all school personnel. Significant improvement in the instructional program has been made through total staff participation in continuing in-service program. In spite of all improvements, however, the number of emergency teachers employed each year during this biennium has increased as reflected in Table IV. This has resulted in part because Kentucky's salaries do not compare favorably with salaries offered in other states. In 1956-1957, Kentucky was able to employ only 50 more teachers with the master's degree than in 1955-1956. To some extent, the Foundation Program which, while offering some incentive to teacher improvement, also contributed to the increase in the number of emergency teachers employed. The effort to maintain the desirable teacher-pupil ratio paralleling an increased school enrollment resulted in the employment of an additional 1,000 teachers.

Quality of Teacher Education Improved Through State and National Accreditation

After the University of Kentucky withdrew accrediting privileges to its sister institutions in 1953 the accrediting function was placed in the Division of Teacher Education and Certification of the State Department of Education. The University of Kentucky took this action in keeping with the national practice and in an effort to perfect a procedure which would provide for the continuing improvement of the quality of teacher preparation programs. The Division of Teacher Education and Certification, assisted by the Advisory Committee on Teacher Education and a large group of public school persons from the various professional organizations, including the Commission on Teacher Education and Professional Standards, evaluated the teacher education programs of all the junior and senior colleges and universities which had not been previously accredited by the American Association of Colleges for Teacher Education. Short term accreditation was granted these institutions with recommendations for further improvement and with plans for follow-up evaluations. This service to the colleges and universities which prepare Kentucky's teachers holds great potential for strengthening teacher preparation programs offered to future teachers.

The Division has supported the National Council for Accreditation of Teacher Education — a national voluntary accrediting agency for accreditation of teacher education institutions. The Council was organized in 1952 and began its activities in 1954; it was approved by the National Commission for Accreditation during this biennium in October, 1955. Kentucky now has nine colleges which hold NCATE accreditation. The two major purposes of this Council are (1) to stimulate the development of a unified teacher education program of high quality in each institution which prepares teachers and (2) to help make teaching a major profession.

In 1956-57, of the 2,466 teachers receiving degrees from Kentucky colleges 69.8 per cent were from the nine institutions accredited by NCATE. In 1955-56 the nine NCATE colleges and universities in Kentucky produced 71.06 per cent of the Kentucky college graduates who were qualified to teach. Nationally during this period 69 per cent of the teachers were graduated from NCATE institutions.

The Director of the Division of Teacher Education and Certification during the period 1956-58 serves as one of the five consultants to the National Council on Accreditation of Teacher Education.

Liberal Arts and Professional Education — Together — Enrich the Preparation of Teachers. The accreditation procedures have involved liberal arts departments as well as departments of education. The professors of academic subjects, the professors of education and the administrators in both areas are working together on a regional and state-wide basis to improve the programs of preparation-certification in the following areas: Science and Mathematics, Music, English, Guidance, Art. Significant changes are being made in programs of preparation and in certification programs as a result of these cooperative endeavors.

Research, Studies and Publications

Research and studies as reflected in the following Teacher Education Circulars have been undertaken during the past biennium. The research and publications contributed to a long range planning on teacher supply, demand, and recruitment as well as to communication to the profession and to the public.

Funds Collected from Certification Fees

Fees collected for the issuance and renewal of certificates during the biennium are as follows:

1953-1954	$23,961.66
1954-1955	20,208.35
1955-1956	23,488.30
1956-1957	28,362.45

COOPERATIVE PROGRAM OF IN-SERVICE TEACHER EDUCATION

Since July 1, 1950, in-service teacher education has been one of the major functions of the Division of Teacher Education and Certification of the State Department of Education. Beginning July 1, 1956, this program was expanded and became tied closely to pre-service teacher preparation. This was accomplished through joint employment of personnel by four state colleges and the State Department of Education. The fifth staff member is employed by the State Department and works

cooperatively with the University of Kentucky, Kentucky State College, and private colleges in one geographical area.

Through this program, total staffs in the 217 local school systems are given consultative assistance in working democratically on instructional problems and curriculum development in grades one through twelve. The staff members identify their own concerns and problems, and plan ways to find solutions. They invite college personnel to attend their all day work conferences and to bring them research findings, and guide them in doing their own research on more effective ways to work with boys and girls.

The State Board of Education permits each system to devote two of the 180 school days to these all day in-service conferences. The in-service consultants of the Division of Teacher Education and Certification assist the staffs in planning ways to continue their studies all year and in ways to share results with all staff members.

Through these activities college personnel responsible for the pre-service programs of teacher preparation are brought face to face with problems teachers face every day. They, in turn, are finding ways to improve the experiences provided teachers in training. Both pre-service and in-service teacher education programs are enriched through the in-service teacher education programs. Professional growth has been stimulated; morale has been boosted; curriculum planning has been based on total staff decision; and the quality of instruction is being improved.

Scope of In-Service Program Participation

The scope of the in-service program in the 217 local school districts in the last year of the biennium is reflected in the following statements:

139 systems or 64% of the systems have in-service committees.

140 systems or 64% held all day work conferences on instruction.

181 systems or 84% reported participation in area conferences on instruction.

125 systems or 58% reported sub-committees on various phases of instruction working all the school year.

32 or 91% of the colleges have participated actively in the in-service conferences.

180 college staff personnel have assisted in local school staff conferences.

18,071 or 80% of all elementary and secondary teachers employed in 1956-57 were involved in continuing in-service activities.

4 out-of-state resource persons have served in the conferences.

28 State Department members have assisted in the all day — total staff conferences.

Five Regional Science Conferences

Through the Cooperative In-Service Teacher Education Program a new enterprise for the improvement of science was initiated. Through a grant from the National Science Foundation to the Kentucky State Department of Education, 521 persons in five regional conferences have spent two days studying ways to improve science teaching in the classrooms and science preparation for teachers. This was the first grant in the nation to a state department of education and the first made for elementary teachers.

Under provisions of the grant, elementary teachers, secondary teachers and college teachers of teachers and administrators worked together throughout the conferences. The results have implications for the teacher education institutions as well as for the local systems and the State Department of Education. The conferences created a great force of interest in science.

The teacher preparation institutions and the local school systems are going forward in planning and working for a continuing program of science teaching improvement. The elementary teachers are not science specialists, but they are asking for more science content appropriate for the elementary grade level. The secondary teachers are asking for help in ways to present science so that high school students may come to experience science as an exciting, interesting, and creative experience. The results of this undertaking have been published in a state department bulletin entitled THE KENTUCKY REPORT. This report will be published as the November 1957 bulletin of the State Department of Education.

Areas of Study

The following areas of instruction have been given major consideration in the in-service conferences and in the order as listed: reading, science, guidance, testing programs, arithmetic, art, total school evaluation, curriculum planning, cumulative records, reporting and pupil progress.

Special Projects Underway

One of the five in-service consultants serves as secretary to the state-wide committee on CITIZENSHIP. Another consultant serves as secretary to the state-wide committee on SCIENCE. All in-service consultants serve on these committees. Area committees under the guidance of the in-service consultants are studying and reporting on the following areas of the school program: Art, Citizenship, Instructional Materials, Child Growth and Development, Language Arts, Objectives and Philosophy of the School Program, Methods and Processes of Learning, and Interpreting the Instruction Program to Parents.

CHAPTER 4

BUREAU OF VOCATIONAL EDUCATION

The Function of the Bureau

Vocational education is an integral part of the total services in the Department of Education.

The over-all function of the Bureau of Vocational Education is to develop an administrative atmosphere through the making of constructive policies and sound procedures of operation so that the different divisions can operate effectively. The divisions of this bureau are: Agriculture, Home Economics, Guidance Services, Trade and Industrial and Distributive Education, and Veterans Approval Agency.

The specific functions of the bureau are to develop over-all objectives so that each division might formulate a consistent program of operation and to give general directions on program planning that are in keeping with these objectives. The bureau must work with the Superintendent of Public Instruction in the development of policies and rules and regulations for operating the total program of vocational education. The functions of the bureau must be coordinated with the total program of the Department of Education. It is also necessary to review programs from time to time and see that they are operating in keeping with the provisions of State and Federal laws and rules and regulations of the State Board of Education and the U. S. Office of Education as well as the State Plan for Vocational Education.

In the development of vocational programs with local boards of education, the different divisions in the bureau must keep in mind Section 163.020 of the Kentucky Revised Statutes which provides that: "This state accepts and agrees to comply with all the provisions of the Acts of Congress of the United States approved February 23, 1917, and all subsequent acts relating to Vocational Education as defined herein, the purpose of which is to provide training, develop skills, abilities, understanding, attitudes, work habits, and appreciation, and to impart knowledge and information needed by workers to enter into and make progress in their chosen vocations. These training opportunities should be provided for the young people who are enrolled in the regular day schools and, also, for out-of-school youth and adults, both employed and unemployed, who are in need of and can profit by vocational training."

There are two main phases of the vocational program:

1. Administration and supervision of the total program as well as conducting special programs made possible by some Federal funds and special appropriations by the State Legislature.
2. Administration and supervision of the educational program that is within the Foundation Law. This law has placed added responsibility on the Bureau of Vocational Education since its implementation.

The following charts show the vocational units approved by the State Legislature for the school years 1956-57 and 1957-58; also, graphic presentations as to total Federal and State moneys for vocational education and their utilization by the different services and programs.

Recommendations

There is a need for continued expansion in vocational services to the people of Kentucky, as is reflected in the attached charts which show the past and projected enrollment. There is also a need of an intensive effort to improve programs now in operation. This, of course, would mean the employment of more teachers to give added emphasis to young and adult and evening programs. Additional programs through the Trade and Industrial Division should be organized to provide skilled manpower for Kentucky's industrial expansion and, also, to give more effective training to rural people so that individuals who cannot economically stay on the farm can obtain skills through an educational program that would enable them to find industrial employment in the industrial areas of our State and Nation. It is also imperative that an accelerated program in guidance be inaugurated in the public schools of the State so that more young people would have a better opportunity to become adjusted educationally, socially, and vocationally, at an earlier age than they have in the past.

Chart IX
VOCATIONAL EDUCATION ENROLLMENT (AGRICULTURE, HOME ECONOMICS, TRADE AND INDUSTRIAL AND DISTRIBUTIVE EDUCATION) FOR THE PAST FOUR YEARS AND PROJECTED ENROLLMENT FOR THE NEXT BIENNIUM

DIVISION OF AGRICULTURAL EDUCATION

The purpose of vocational education in agriculture is to train young men preparing to farm and adults engaged in farming to manage the farm business, produce farm products efficiently and live well from farming. It develops abilities and attitudes in farm people that help them fit their farm operations into the economy in which they live. Instruction in vocational agriculture is provided for high school boys who live on farms, out-of-school young men who are becoming established in farming, and adult farmers. Also included in the program of vocational agriculture is the Institutional On-Farm Training Program for Veterans. The course of study used in local departments is based upon the type of farming found in the community and instruction is centered around the farming programs of the students. The general pattern of instruction is classroom work, followed by individual instruction given in the supervision of the farming programs of those enrolled in classes.

EXTENT OF THE AGRICULTURE PROGRAM

The program of agricultural education in some of its phases was conducted in all counties of the state during the 1955-57 biennium except Harlan, Knott, Letcher, and Martin. There was no program in Wayne County in 1955-56, nor in Leslie and Fleming Counties in 1956-57. The number of persons receiving instruction in agricultural education during each year of the biennium and the preceding biennium is shown in the table below:

	All Day		Young Farmer		Adult Farmer		Veterans		
Year	No. Depts.	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	Total Enrol.
1953-54	233	12,174	196	2,457	229	3,274	155	2,574	20,479
1954-55	229	13,119	182	2,153	273	3,578	122	1,787	20,637
1955-56	220	13,064	168	1,792	240	2,914	113	1,703	19,473
1956-57	214	12,377	156	1,779	249	3,110	97	1,537	18,803

In 1956-57 the Foundation Program Law was fully financed for the first time. It was also the first year that the program of agricultural education in Kentucky operated without any direct reimbursement to boards of education from the Division of Vocational Education for salaries of the teachers of vocational agriculture. This year the state placed the federal money in the general education fund, and allotted it to school districts, together with state money, on the basis of approved units in vocational agriculture. The Division of Agricultural Education did have, during the last year of this biennium, a state appropriation of $98,000 to use in expanding the young and adult farmer work. It also had $138,486 which was used for reimbursing boards of education for travel of teachers of agriculture.

There has been a definite trend during the biennium toward multiple teacher departments. This has been brought about through the establishment of larger high school units. In the year 1954-55 there were 220 departments, 23 of which had two teachers. In 1955-56 with the same number of departments 37 had two teachers, and one had three teachers. In 1956-57 there were 214 departments, 36 of which had two teachers, and 2 of which had three teachers.

There has been a demand during each year of the biennium for more vocational agriculture teachers than could be found. Each year of the biennium, 28 teachers, or 11 percent of the number employed, left the profession. During this period the teacher training department of the University of Kentucky qualified 52 teachers for vocational agriculture. Only 31 of these were placed as teachers of vocational agriculture in Kentucky. There has been a definite tendency in the past two years for school administrators to bring back into the teaching of vocational agriculture men who had dropped out of high school teaching several years ago.

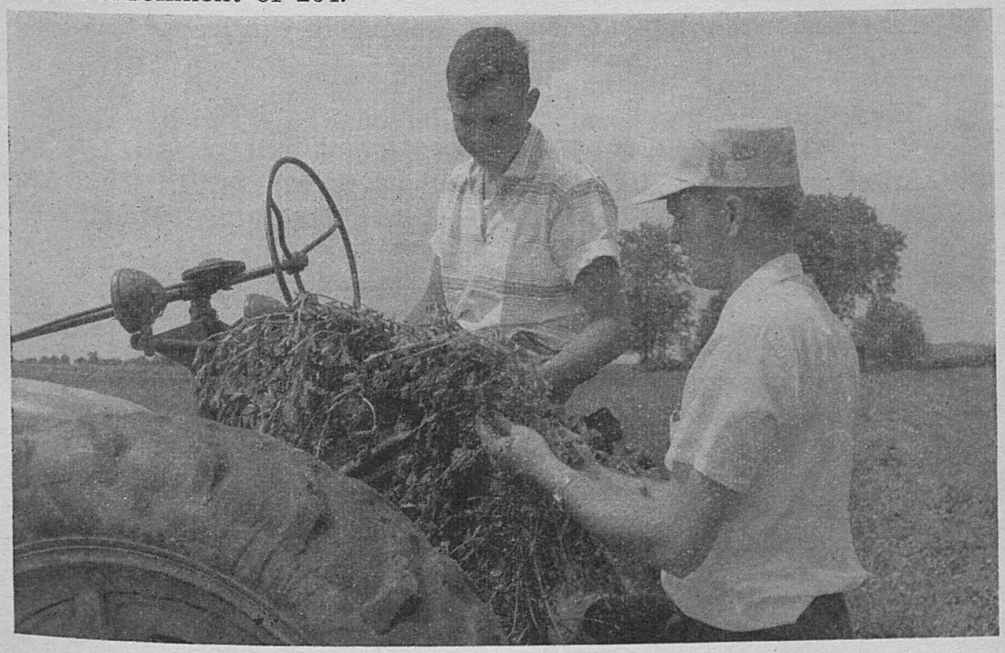

The Foundation Program Law has made possible enriched curricula in our schools. This has resulted in many non-farm boys who have formerly been placed in classes in vocational agriculture because of restricted course offerings in the schools, electing to take other courses. This is reflected in a decrease from 13,064 high school boys enrolled in 1955-56, to 12,377 enrolled in 1956-57. This decrease in enrollment makes possible a better program in agricultural education and also allows these non-farm boys to select other courses that more nearly fit their need.

THE FUTURE FARMERS OF AMERICA

The Future Farmers of America program has strengthened during the biennium. Each department of vocational agriculture in the state

has a Future Farmer Chapter. Membership in 1955-56 was 11,874, and in 1956-57 was 11,664. Most of the work in modernizing the Kentucky State FFA Leadership Training Center at Hardinsburg was completed during the 1955-56 school year. Other improvements contemplated at the Center, as soon as funds are available, are the construction of a large lake and the acquiring of property which lies between the Training Center and the Hartford Road. This property is needed so that an attractive entrance to the Center may be developed. The Leadership Training Center is kept in constant use during the summer months, being used primarily by the Future Farmers of the state for leadership training and recreation. Generally the chapter officers and the chairmen of the program of work committees from local chapters come in for a one-week training period in the duties and responsibilities of their offices and to study the principles of effective democratic leadership. During the year 1956-57 the director of agricultural education replaced the committees that had been appointed to plan and direct the building activities at the camp during the construction period with a policy committee. This committee is composed of the assistant director of agricultural education, a member of the teacher training department of the University of Kentucky, two teachers of agriculture, and the state president of the Future Farmers of America. The state executive secretary of the Future Farmers of America was selected to act as chairman of the group, and the director of the Leadership Training Center was appointed to act as secretary. Neither of these last two individuals has a vote on matters discussed by the group.

An important development in the program of agricultural education during the last year of the biennium was the use of special instructors for an expansion of the young and adult farmer program. The men selected for this work had proven to be good teachers in the Institutional On-Farm Training Program, or as teachers of agriculture. This important phase of our program will expand as rapidly as funds are available. During 1956-57 this special program was conducted in eight counties. There were eight teachers employed on either a part-time or full-time basis. They gave instruction to twelve different groups of farmers with a total enrollment of 264.

EVALUATION OF THE AGRICULTURAL EDUCATION PROGRAM

During 1956-57 the staff in agricultural education evaluated approximately fifty per cent of the vocational agricultural departments. This evaluation was made with the help of the superintendent of the local district, the principal of the school involved, a member of the board of education or other interested citizens, the teacher of agriculture, and one or more supervisors of agricultural education. This resulted in the strengthening of some departments and discontinuance of others where the program was considered ineffective. During 1956-57 the staff in agricultural education worked upon system-wide evaluations in cooperation with the Department of Education.

Substantial expansion of the program in agricultural education is needed in young and adult farmer work. This can be brought about as rapidly as trained teachers and funds to operate the program are available. It is hoped that a more selective group of high school students can be enrolled in vocational agriculture and that these boys can receive more effective instruction. The demands of modern day farming necessitate careful training of those who are to engage in this vocation.

DIVISION OF HOME ECONOMICS EDUCATION

The major goal of vocational education in home economics is to improve home and family living through providing instruction in homemaking to prospective and established homemakers. During the biennium progress has been made in the three large phases of the vocational program as follows:

1. Instruction

Instruction in homemaking has been provided for pupils in secondary schools and for out-of-school young women and adult homemakers. This instruction has been in the various areas of homemaking; namely, foods, housing, child guidance, clothing, health, relationships and management. Progress has been made during the biennium in the number of programs and in enrollment.

TABLE I - he

NUMBER OF ALL-DAY DEPARTMENTS, YOUNG ADULT PROGRAMS AND ADULT PROGRAMS IN HOME ECONOMICS AND FOOD CONSERVATION ADULT COURSES, AND ENROLLMENT, BY YEARS

	1955-56		1956-57	
	No. of Depts. or Programs	Enrollment	No. of Depts. or Programs	Enrollment
All-Day Departments	309	22,853	316	23,542
Young Adult Programs	35	772	45	729
Adult Programs	62	1,143	96	1,589
Food Conservation Adult Courses	23	5,574	18	6,832
	Total.....	30,342	Total.....	32,692

Day-School Program—The number of two-or-more-teacher departments in 1956-57 increased by eleven over the number for the previous year. Progress was also made on decreasing the number of

departments having too large a pupil load per teacher. During the biennium more teachers were employed for eleven and twelve months than previously.

Emphasis has been given during the biennium to having homemaking programs meet the criteria for a vocational unit under the Foundation Program. Present programs have been evaluated in light of the criteria and plans made for meeting the criteria. Improvements have been made in programs as a result of these evaluations including: providing more adequate space, adding large and small equipment, redecorating and remodeling departments, providing more adequate storage space and adding teaching materials and supplies.

Progress has also been made in the carry-over of class instruction to home situations through home experiences. During 1956-57 major emphasis was given to improving the home-experience phase of the vocational home economics program resulting in improvement in both quality and quantity. The number of home experiences carried on by home economics pupils increased from 50,144 in 1955-56 to 59,523 in 1956-57. Part of these home experiences were carried on during the school year and part during the summer.

Home visitation, another essential of a vocational home economics program, was emphasized during 1956-57. Home visitation has increased during the school year as evidenced by the fact that

13,173 home visits were made by home economics teachers during the school year 1956-57.

In 1955-56 there were 235 FHA chapters with a membership of 12,546, and in 1956-57 there were 251 chapters with a membership of 13,690. The number of NHA chapters in 1955-56 and 1956-57 were 19 and 18 respectively. NHA membership totaled 656 in 1955-56 and 550 in 1956-57. Leadership Training conferences have been held each year of the biennium for state and district FHA officers and their advisers. Better work has been carried on by the chapters as a result of these conferences. Both organizations have also had state meetings for their members each year of the biennium.

Adult Program — Organized adult programs have shown growth during the biennium in number of classes and in the quality of the work. There was greater variety in units taught and in ways of promoting classes and more emphasis was given to following up the instruction. Many teachers have also given help to adults in informal ways during the school year and during the summer employment period.

During 1956-57, Vocational Home Economics cooperated with other divisions of Vocational Education and other agencies concerned with the welfare of rural people in starting a program of rural development. In two of the pilot counties an additional home economics teacher was employed during the year. These teachers are trying to find effective ways of working with adults and are helping to build a Rural Development Program within their counties and trade areas.

2. **Preparation of Teachers**

During the biennium eight institutions of higher learning were approved for training vocational home economics teachers. These institutions trained a total of 100 vocational home economics teachers in 1955-56 and approximately 125 in 1956-57, which was an increase each year. A Home Economics Teacher-Education Council composed of teacher trainers and heads of departments from institutions training vocational home economics teachers and the Director and Assistant Director of Home Economics was formed for the purpose of working together on problems of teacher education. This Council has met twice each year of the biennium. The problems receiving major attention by this Council have been curriculum development and certification requirements for vocational home economics teachers.

Major emphasis has been given by these institutions to curriculum development. Cooperative work having implications for curriculum development has been carried on, as: surveys of freshman majors and drop-outs, study of strengths and weaknesses of first-year teachers, committee work, etc. Analyses of present programs, surveys, summaries of problems of teachers and other means have been used by various staffs to evaluate present curricula. The state teacher-education conference held each year gave attention to trends in home economics education curricula in 1956 and to competencies needed by teachers in 1957.

Progress has been made in the use of off-campus teaching centers. Two of the institutions started using off-campus centers and two other institutions have completed plans for using off-campus centers during the coming year. This will mean that each of the eight institutions will have one or more off-campus student-teaching centers.

3. **Supervision**

More individual help to secondary, adult and teacher-education programs has been made possible by the addition of another staff member in the fall of 1955 and the re-organization of staff responsibilities during the biennium. The Assistant State Director was designated as Co-ordinator for the Teacher-Education Program, and time was provided in her schedule to work more closely with the institutions training vocational home economics teachers. One of the supervisors was assigned the responsibility of giving guidance to department planning throughout the state, being relieved of part of her area responsibilities so as to have time for this work. Another supervisor was assigned the responsibility of being in charge of the development of the adult program on a state-wide basis. She, too, was relieved of some of her area supervisory responsibilities.

Each year of the biennium the teachers have been given the opportunity to indicate on a supervision check list the kinds of help they would like to receive from supervisors. This information has been used as a basis for planning the supervisory program.

Emphasis was given in 1955-56 to helping teachers understand and use the new curriculum guide and to the improvement of teaching Family Relationships. In 1956-57 emphasis was given to improv-

ing methods of teaching Management, improving home experiences, and strengthening home visitation as a means of improving instruction.

During each year of the biennium a state conference has been held for home economics teachers. In 1955-56 a series of regional conferences was held to give help on making better use of the curriculum guide. Small group conferences have been held and materials prepared each year of the biennium to give help to teachers on common problems.

Progress has also been made in the development of leadership on the part of teachers through participation in the home economics teachers' organization. The State was redistricted into fourteen districts in 1955-56. Each district is organized as a part of the state organization and contributes to reaching the over-all goals for the home economics education program in Kentucky.

DIVISION OF GUIDANCE SERVICES

The rapid growth of school enrollments, the change in character of the school population, rapid changes in the business and industrial world resulting in longer school attendance and expanded school offerings demand increasing emphasis on guidance for youth.

Guidance philosophy holds that guidance is an essential element of the school curriculum. It is the phase of the curriculum that helps prevent and remove roadblocks to effective classroom instruction. Guidance provides individualized and personalized assistance to all pupils in meeting their needs, solving their problems, and in making adjustments.

Services of Guidance

The guidance program in a school is made up of a series of services and activities — obtaining, recording and integrating information about the pupil. Providing educational, occupational and other information to pupils; counseling students to help them in making adjustments and sound choices; assistance to pupils in the selection of courses, employment, a suitable occupation, or the next school; follow-up of pupils who have graduated or dropped out of school.

Planning is essential to the effective functioning of guidance services. Although specific duties are assigned to certain persons, the guidance program is a joint responsibility of all staff members of the school.

Guidance Improves Holding Power of the School

Despite improved school offerings, better facilities, and more competent teachers, the school drop-out rates remain too high. The drop-out rate has resulted in focus of attention on some of the attendance problems, including wasted manpower. Between 10 and 15 per cent of the high school enrollment drop out every year. Less than 50 per cent of the drop-outs are employed. Juvenile delinquency problems are many times greater among drop-outs than for those who are in school. Society is losing the contributions that drop-outs could have made had they remained in school. Guidance services are designed to improve the school curriculum, facilitate better instruction and to help boys and girls to plan wisely. It stimulates some and gives meaningful direction to others.

Counselor's Place in Guidance

The counselor in a school works with pupils and teachers — with the pupil on individual problems, with the teacher in discovering pupil needs. The counselor provides leadership with respect to guidance practices and techniques.

Purposes of Division of Guidance Services

1. Exercise leadership in the promotion of good guidance problems within the public schools of the State.
2. Plan cooperatively with other educational leaders a State program of guidance services.
3. Stimulate and assist local schools in the establishment, development and evaluation of local program of guidance.
4. Develop and send out to schools guidance materials which will be of value in:
   (a) organizing the guidance program;
   (b) developing techniques for guidance;
   (c) developing a guidance library, and
   (d) providing occupational information.
5. Work cooperatively with the Division of Teacher Education and Certification in planning for the selecting and training of counselors with teacher-training institutions.
6. Hold conferences and workshops for counselors and other guidance personnel to assist them in improving their services while on the job.
7. Study and recommend standards for guidance services in terms of personnel, functions, housing supplies and equipment.
8. Provide supervision needed for improvement of local programs of guidance.

Activities of the Division

1. During the year six graduate schools in Kentucky established programs for the preparation of guidance counselors. Personnel in the Division of Guidance Services and Division of Teacher Education and Certification have worked with responsible persons in the graduate schools on their guidance counselor preparation programs. Prior to the past year there had been certification standards for guidance counselors.
2. One day of a two-day workshop of the professional staff in vocational education was devoted to guidance.
3. Planned with the Division of Home Economics Education an experimental project in guidance in several departments of Home Economics: to identify needs and problems of home-making students as a basis for providing group guidance in the home-making curriculum for doing more effective counseling with individual girls during the conference period.
4. Supervisory services were rendered to schools having guidance counselor units as authorized under the Kentucky Education Foundation Program Law.

5. The Guidance Services Division participated in eleven in-service teachers' conferences that involved all the teachers of the individual school system.
6. The Guidance Services Division developed and provided resource materials to numerous schools and school personnel.
7. A member, or members, of the Division staff attended and participated in 20 conferences for educational personnel.
8. Personnel of the Division of Guidance Services visited and consulted with responsible persons in all the graduate schools of Kentucky that are offering counselor preparation programs.
9. Members of the Guidance Division staff visited 45 schools or school superintendents to discuss and promote guidance services.
10. Schools have been encouraged to secure occupational and educational information materials and place them in the school libraries. To assist them the Division of Guidance Services has compiled and distributed a bibliography of free materials.
11. Materals that have been developed relate to organization and administration of guidance services. They are: testing; cumulative records; activities of the counselor; aims and objectives of guidance.
12. "Guidance Guideposts" is a quarterly publication of the Division of Guidance Services distributed to all Kentucky school superintendents, principals and counselors. Its purpose is to bring to school personnel information which may be of value in organizing, developing and expanding programs of guidance services.
13. Personnel of the Division of Guidance Services participated in Department of Education sponsored system-wide evaluations of eight school systems.

Accomplishments for the year have been gratifying. However, even now the present staff is unable to provide adequate consultative and supervisory services to schools needing and requesting them.

C. DIVISION OF TRADE AND INDUSTRIAL AND DISTRIBUTIVE EDUCATION

The area vocational school plan, for carrying on a program of trade and industrial and distributive education, in which Kentucky has pioneered, has received national recognition. The thirteen designated area schools are strategically located, from a geographical standpoint, to the extent that each of them is able to serve the needs of several counties. Ten of the area vocational schools are administered through local boards of education and are financed on a reimbursable basis through the Division of Trade and Industrial and Distributive Education by a combination of state and federal vocational funds, in combination with local funds. Three of the area schools are financed and supervised directly by the State Board of Education through the Division of Trade and Industrial and Distributive Education in the Department of Education. Information relative to these schools appears separately in this report. The Louisville Board of Education also operates programs in trade and industrial and distributive education on a reimbursable basis from state and federal vocational funds in combination with local funds. Several high schools operate courses in distributive education under the Foundation Program for Education. Thirteen units were approved for such

classes during the last year of this biennium. An extensive veterans training program has been carried on by all of the area vocational schools during the biennium and which was financed in the main by tuition.

A teacher-training staff, for the purpose of up-grading the teachers of industrial and distributive education in Kentucky, has been maintained at the University of Kentucky and at the University of Louisville. These two universities were reimbursed from federal and state vocational funds for these services.

The following types of classes were offered by the area vocational schools:

Types of Classes

1. Full time preparatory classes for high school students, out-of-school youth, and adults, including veterans.
2. Part-time trade extension classes for apprentices, providing related instruction essential to their training on the job.
3. Evening extension classes for employed workers in all types of occupations who need training of an up-grading nature, in order to progress in their jobs.
4. Cooperative part-time classes for young workers, who spend part of their time in school and the other part on the job.

Vocational education funds used by the division of trade and industrial and distributive education for the two years covered by this report are as follows:

1955-56 — $482,325.85 1956-57 — $534,746.54

TABLE I - vti

STUDENTS ENROLLED IN VOCATIONAL INDUSTRIAL AND DISTRIBUTIVE EDUCATION CLASSES BY TYPES

Year	Pre-employment Day Trade	Part-time Extension	Evening Extension	Total
1955-56	2,448	3,719	8,476	14,643
1956-57	2,670	2,416	9,195	14,281

At the beginning of the second year of this biennium, a completely new financial and budgetary procedure was adopted relative to reimbursing the ten area vocational schools for services rendered. This new procedure is consistent with state policies and procedures relative to budgetary and financial practices. All tuition and fees collected at the local level, by these schools are submitted to the Department of Finance and are reimbursed back to the local operation on the basis of sworn statements as to services rendered, in accordance with the state plan of operation.

A supervisor of practical nurse education has been added to the staff of the Division of Industrial and Distributive Education to supervise the new program of practical nursing education which was inaugurated through this division during the last year of the biennium. This is a program designed to prepare young women and men as practical nurses for which there is a tremendous need in the hospitals, clinics, homes, industrial establishments, and other health clinics through the state. This program is conducted and administered through the area vocational schools in cooperation with affiliating hospitals and health clinics.

A supervisor of industrial arts also was employed in the Division of Industrial and Distributive Education for the purpose of promoting and supervising this program in the secondary schools of the state. Although industrial arts is not specifically vocational in nature, it is considered as general industrial education and is closely allied to vocational trade and industrial education from a guidance standpoint and requires specially trained personnel with an overall concept of both general and vocational industrial education to effectively supervise and promote programs in this field.

TRENDS AFFECTING VOCATIONAL INDUSTRIAL AND DISTRIBUTIVE EDUCATION

The rapid industrialization being experienced in Kentucky is providing increasing opportunities for employment for Kentucky people. Increasing technological advances demand high levels of skills of workers which can be obtained only through training. This is resulting in a terrific impact in the way of demands on our programs of trade and industrial education to meet the needs for training. The only way to meet these demands will be through the expansion and further development of the area vocational schools. It is anticipated on the basis of all available data and statistics, that our present system will need to be expanded by at least four times its present capacity within the next five years if we are to keep pace with present and indicated future demands for trained manpower essential to our expanding industrial economy.

THE WEST KENTUCKY VOCATIONAL SCHOOL

ENROLLMENT

	1955-56	1956-57
Day Trade (full time)	171	159
H. S. (part time)	12	8
Day Trade (half time)	26	28
Evening Trade Extension	0	12
	209	207

The West Kentucky Vocational School, Paducah, Kentucky, was established by an Act of the Legislature in 1938. It is operated by the State Board of Education through the Bureau of Vocational Education. Its area is state wide and its program is designed to meet vocational training demands in every community large or small.

The school which occupies the plant of the former West Kentucky Industrial College was formally opened September 19, 1938, with a faculty of 14 instructors and officers. It is mainly supported by state appropriations, but receives some allotments from Federal Vocation Funds. Also some money is received from student fees.

Purpose

The general purpose of the program is to equip students for effective living in all areas of life. An elaboration of this purpose may be stated in this manner:

Vocationally, to prepare students for earning a living and to know how to meet and solve the economic problems of life in a way that will bring them genuine satisfaction and benefit society.

Personally, to prepare students for standing on their own feet as responsible, mature, confident individuals and to help them acquire a meaningful personal philosophy, in deciding upon those values in which they believe and by which they can guide their lives.

Intellectually, to help them understand as much as possible of the social and physical world in which they live; and

Socially, to help students to acquire the knowledge and skill which will enable them to make effective and creative adjustments to other people and to prepare them for assuming responsibilities as accepted effective members of society.

Shops and Equipment

Auto Mechanics, Barbering, Beauty Culture, Brick Masonry, Carpentry, Chef Cooking (temporarily discontinued), Dress Making, General Electricity & Appliance Repair, Office Practice, Shoe Repairing, Tailoring and Woodworking are offered at the school.

With the exception of Barbering, Beauty Culture, and Shoe Repairing, which may be completed in one year, all the trade courses are offered on a two year basis.

In addition to training in the trades, the student also receives classroom instruction in related courses, so that he can best understand the underlying fundamentals and principles of the work and shop. Also, this related work will aid the student in adapting his work to new machines and methods as they are developed in industry, in order that people engaged in full-time work may be able to increase their skills and knowledge of their trade.

Since the beginning of the institution, facilities for the teaching of the trade courses have improved each year. However, it must be completely realized by all concerned that to carry on an efficient, effective trade program, facilities, teachers, and equipment must all keep pace with industry. Among the grave needs of the school is sufficient money to insure the proper housing, the necessary up-to-date equipment, and the required trained personnel for efficient and effective instruction in the trade courses.

Graduates

Since the establishment of the institution, approximately 1200 students have been graduated.

Graduates have been employed in the following general areas:

1. Teachers in trade schools.
2. Owners and operators of barber and beauty shops, as well as employees in barber and beauty shops.
3. Owners and operators of tailoring and dress shops.
4. Employees in factories and clothing establishments.
5. Secretaries and stenographers in school and college offices. Clerk-typists and stenographers in insurance companies, in Civil Service, and in various social, religious and business institutions.
6. Contractors in the building trades in this and other states, and employees as carpenters and brick masons at various plants and construction companies.

7. Taxi cab operators and owners, employees in garages and service stations in this and other states.
8. Employees in hotels, schools, restaurants, tourist camps, and private families.

THE MAYO VOCATIONAL SCHOOL

The Mayo State Vocational School, Paintsville, Kentucky, was established by an Act of the Legislature in 1938. It is operated by the State Board of Education through the Bureau of Vocational Education.

The aim of the school is first to discover the interest and talents of the people coming here for training. This is done by testing, counseling, and conferences. This is a very important phase of the school's work since all people have interest and talent in some work in life. When this interest and talent is found, the student is well on his or her way to success.

The second aim of the school is to develop the natural interest and talent of these people. This is done through shop instruction where the student "learns to do by doing." The shops are arranged and equipped as nearly as possible as these same shops are in industry. The instructor gives individual instruction to each of the students so that they can better achieve the skills required in industry. The student also receives classroom instruction in mathematics, science, safety, drafting and blueprint reading, so that he can better understand the underlying fundamentals and principles of the work in the shop. Also, by the aid of this related classroom work, the student will be able to adapt his work to new machines and methods as they are developed in industry.

This school offers day trade training to boys and girls sixteen years of age and over. The period of training ranges from one to two years, depending upon the trade pursued. A program of testing and counseling is provided to help the student select the trade in which he has the greatest aptitude and interest along with the best opportunity for improvement after graduation. At present the school has a day trade enrollment of more than 600, representing more than twenty-five counties in Kentucky. Many students in the adjoining counties drive to and from school while the boys living at a greater distance from the school room and board at the boys' dormitory. Girls find boarding facilities in private homes in Paintsville.

During the past two years, the school has added courses in Practical Nursing and Printing. The school at present offers training in the following trades:

Auto Body Mechanics
Auto Mechanics
Carpentry
Cosmetology
Drafting
Electricity
Machine Shop
Mining Mechanics
Office Practice
Practical Nursing
Printing
Radio

Retail Merchandising
Welding
Woodwork

In addition to the day trade program, the school offers a program of evening instruction so that people engaged in full-time work can be upgraded by improving their skills and knowledge of their trade. Some of these classes are offered at Mayo School, but most of them are offered in communities a distance from the school so as to better serve the people in this entire area.

During the past year, the school had a total enrollment in the evening classes of 619 students. The courses offered in evening instruction were:

Welding
Mining Electricity
Machine Shop
Office Practice
Mine Safety
Mining
Practical Nursing
Hydraulics
Human Relations

A new building has been completed on the Mayo Campus at a cost of approximately $175,000. This building has approximately 17,000 sq. ft. of floor space and is occupied by Machine Shop and a section of First Year Auto Mechanics on the first floor, the second floor is occupied by Office Practice, Retail Merchandising and the Cosmetology Department. The addition of this building has made it possible to accommodate more students in Office Practice, Retail Merchandising, Welding, Auto Paint and Body and Practical Nursing.

THE NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

The Northern Kentucky State Vocational School, Covington, Kentucky, is an area vocational school established in 1940 for National Defense Training, and since 1945 has been operated under the direct supervision of the State Department of Education.

The sole purpose for the existence of such a school is to offer vocational education to youths and adults. Vocational education means learning how to work effectively. A democratic society depends on the ability of its citizens to develop personal, social and civic competence; it also requires its citizens to be occupationally proficient. Most adults spend a large part of their lives earning a living, which implies that education for work should be an essential part of every individual's complete education.

Education for occupational competence should be an integral part and necessary feature of the educational program for every boy and girl coming of age in the second half of the twentieth century. There is no question of preparation for "Citizenship" or "Vocational Preparation." It is fulfilling the need for both, that should claim the attention and efforts of those charged with the responsibility for planning an effective school program. It has been to this ideal, that the efforts of the Northern Kentucky State Vocational School have been directed for the school years 1955-56 and 1956-1957. Enrollment in any course is based upon evidence that the applicant can benefit from the instruction and that

he possesses the personal characteristics which will enable him to succeed in his chosen profession. The school is operated in accordance with Vocational Education Bulletin number one and the State plan of operation for area vocational schools.

Specificity, selectivity, practicability and immediate applicability mark education as vocational. Subject matter becomes vocational when its objective is to increase occupational competency. Yet another distinguishing characteristic of vocational education is the teaching method —which concentrates attention on learning by doing. It has long been known that learning takes place more readily and is more permanent when there is strong motivation for learning. It has been well established also, that we learn by doing and that the greater number of the senses that are involved in learning the more permanent learning becomes. The Northern Kentucky State Vocational School recognizes these facts and endeavors to carry them out in its education program.

During the past two years the following day trade courses have been offered by the school. These courses may be completed in a 22 month period, with the exception of television which is of six months duration:

Auto Mechanics
Printing
Radio
Television
Woodworking

Evening trade extension courses have been offered in the following fields:

Auto Mechanics (General)
Auto Mechanics (Specialized)
Machine Shop Practice
Office Practice
Printing
Radio
Television
Woodworking

The school facilities are available to many types of students: veterans, out-of-school youth, adults, in-school youth and apprentices.

Needed expansion in the school's training program in recent years has not been possible because of the limited space and facilities in the school's present location. The school is presently occupying the old Post Office Building in Covington, Kentucky. This building is eighty-one years of age and is in need of numerous repairs which would require an amount of money in excess of the building's worth as a vocational school.

The Bureau of Vocational Education under the direction of the State Department of Education is making a study of our needs and are very much aware of the conditions which exist at this school. The present staff of the school feel sure that the Legislature meeting in 1958 will give due consideration to our present problems.

ENROLLMENT IN THE NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

Training courses	1955-56	1956-57
Day Trade	80	78
Evening Trade Extension	142	89
Total	222	167

DIVISION OF EDUCATION FOR VETERANS

The program of education and training for veterans as viewed and administered by the Kentucky State Approval Agency is broad in scope. The program includes all duties and responsibilities assumed in the inspection, approval, and supervision of veteran training facilities. This includes the functions delegated to the approval agency as a result of Public Law 346 for World War II veterans and those acquired under Public Law 550 for Korean veterans. Even though major differences exist between the two educational bills, there are similar duties and responsibilities for the Approval Agency. These bills provide education and training for veterans in all fields and in all types of programs.

Prior to the enactment of Public Law 550 the duties and responsibilities of the Approval Agency were performed by other divisions in the Bureau of Vocational Education. The passage of Public Law 550 created a need for a different type of administrative organization, and on November 1, 1952, the Division of Education for Veterans was established in the Bureau of Vocational Education. This Division is responsible for performing all duties in connection with the inspection, approval, and supervision of all veteran training facilities except the area trade schools and the institutional on-farm training program.

The Division of Education for veterans is financed by a fiscal year contract with the Veterans Administration and an allotment of State funds in the Department of Education Budget. The Veterans Administration contract provides reimbursement monthly for salary and travel expenditures while the State fund is utilized for incidental expenditures other than salary and travel.

The Division of Education for Veterans is currently operating five field offices and a central office in Frankfort. The field offices are manned by a field supervisor and a clerk-stenographer. They serve an area of 13 to 37 counties and are equally divided as to work-load. Each of these offices handle four distinct types of education and training programs.

1. Institutional (accredited)
2. Institutional (non-accredited)
3. Apprenticeship training, and
4. Other On-The-Job

The status of approved training facilities as of June 30, 1957 is:

237 Accredited institutions

69 Non-Accredited institutions

549 Job training establishments

There were 5,490 veterans pursuing training in these facilities on this date.

This program of education and training for veterans should not be viewed as a "tremendous waste of tax monies" nor as a "large drain of federal funds" as is the tendency of some, but rather as an investment in our greatest resource. Yes, this cost of the veterans program is an investment and it is already paying dividends in services rendered in every field of endeavor by our veterans who were educated under this program. It is also paying dividends in actual increased income tax payments brought about by greater earning power resulting from this educational program.

CHAPTER 5

BUREAU OF REHABILITATION SERVICES

Vocational Rehabilitation is a process of restoring handicapped persons to the fullest vocational, social, and economic usefulness to which they are capable. During the past quarter century there has been more educational and welfare legislation enacted in this country than for any comparable period in its history. Society has long recognized its obligation to make provision for the disabled. By doing this it not only adds to the total economic strength of the country, but contributes very significantly to the educational and cultural heritage of its people.

Services Available

Any person sixteen years of age, or older, with a physical or mental disability which constitutes an employment handicap, is considered for vocational rehabilitation services. The rehabilitation counselor interviews the applicant and records such educational and social factors, including work history, as is necessary. All cases referred are given general medical examinations, and such medical information forms a basis in determining eligibility for service and the feasibility of rendering physical correction to the individual. After these services are performed by the rehabilitation counselor, a determination is made whether or not to continue plans for service.

When a full case history has been established, any one or more of the following services may be provided to the disabled individual as needed:

1. Individual counseling and guidance.
2. Necessary hospital, surgical, and psychiatric services.
3. Necessary prosthetic appliances, such as artificial limbs, braces, hearing aids, etc.
4. Training for a position, profession, or job, by colleges, special schools, tutors, or on-the-job.
5. Maintenance and transportation during rehabilitation, if necessary.
6. Necessary tools, equipment, and licenses.
7. Placement assistance in securing suitable work.
8. Folow-up to make sure the worker and the job are properly matched.

Source of Clients

The methods of finding disabled people vary according to the locality. Usually, all types of public and private agencies that are interested in aiding the handicapped are contacted. Many persons make application directly to the district offices, located in Ashland, Bowling Green, Covington, Harlan, Lexington, Louisville, Madisonville, Owensboro, Paducah, Paintsville, and Somerset, or the central office in Frankfort. A number of cooperative agreements have been made with local, state, federal and private agencies, whereby they refer clients of their agencies to the Bureau of Rehabilitation Services. The Department of Economic Security, the Kentucky Crippled Children's Commission, United Mine Workers of America, Social Security Administration, and Veteran's Administration, are a few of the agencies with which these agreements exist. These

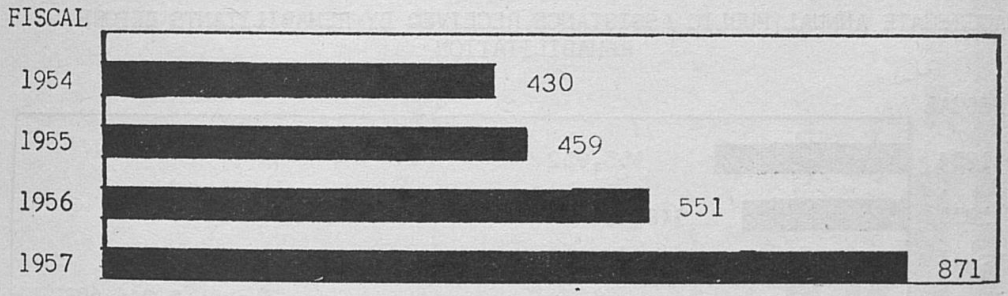

agreements have been very helpful in discovering clients who need and desire vocational rehabilitation services.

Clients Served

The Bureau of Rehabilitation Services was able to serve 2,441 handicapped clients during the 1956 fiscal year, and 3,127 during the 1957 fiscal year. Of these persons served, 551 were rehabilitated to productivity in 1956, and 871 during 1957, as shown in Chart No. I.

CHART NO. I

PERSONS REHABILITATED

A slight increase in Rehabilitation Counselors in 1956 made it possible to cut the number of counties in the Commonwealth without rehabilitations from 26 in 1955 to 14. Another slight increase in Counselors in 1957 made it possible for 119 of the 120 counties to produce rehabilitations. The 871 rehabilitations in 1957 represents an increase of 58.1 per cent over 1956. Also, during the 1956-57 biennium, there was an increase of 59.6 per cent in rehabilitations over the 1954-55 biennium.

Services for the Blind

The Bureau of Rehabilitation Services includes a section devoted to providing specialized services to the blind. A staff of trained blind personnel is engaged in developing or selecting facilities tailored to meet the unique problems of blindness.

Adjustment training, vocational training, as well as specialized mechanical devices designed to overcome the handicapping effect of blindness, is provided.

The program of services offered the blind compares in scope and character to those services offered to applicants having disabilities other than blindness.

Placement Program for the Blind

Placement of the blind in industry is accomplished through the efforts of trained specialists, who are blind. These specialists contact business management and demonstrate the employability of suitably trained blind persons. Through repeated contacts, business management is persuaded to accept the blind as employees. Several hundred legally blind persons have been placed in competitive employment since the creation of the "Services for the Blind" section.

Rehabilitation—A Good Investment

There were 168 persons rehabilitated during fiscal 1957, who were being paid Public Assistance benefits. The aggregate annual Public Assistance benefits received by these people before rehabilitation was

$246,688 in annually recurring expenditures unless relieved. The appropriation by Kentucky for all rehabilitation purposes during the **same year** was $192,350, which is $54,338 less than the public assistance paid.

CHART NO. II

AGGREGATE ANNUAL PUBLIC ASSISTANCE RECEIVED BY REHABILITANTS BEFORE REHABILITATION

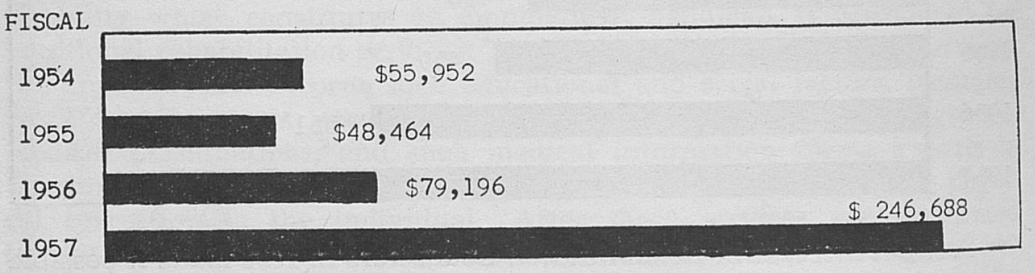

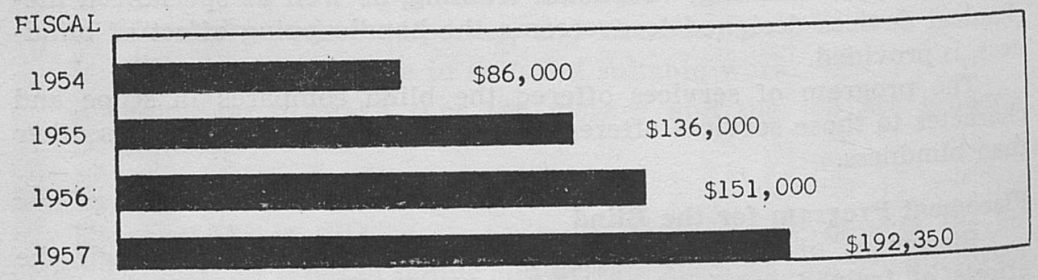

CHART NO. III

STATE APPROPRIATION TO BUREAU OF REHABILITATION SERVICES

The persons rehabilitated during 1957 were able to realize an increase in aggregate annual income of from $187,668 to $1,188,512—a **533%** increase. (See Charts No. IV and V)

CHART NO. IV

AGGREGATE ANNUAL WAGES

BEFORE REHABILITATION

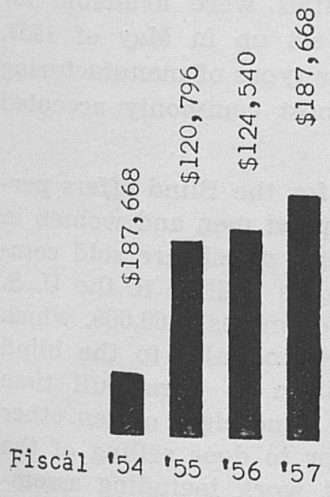

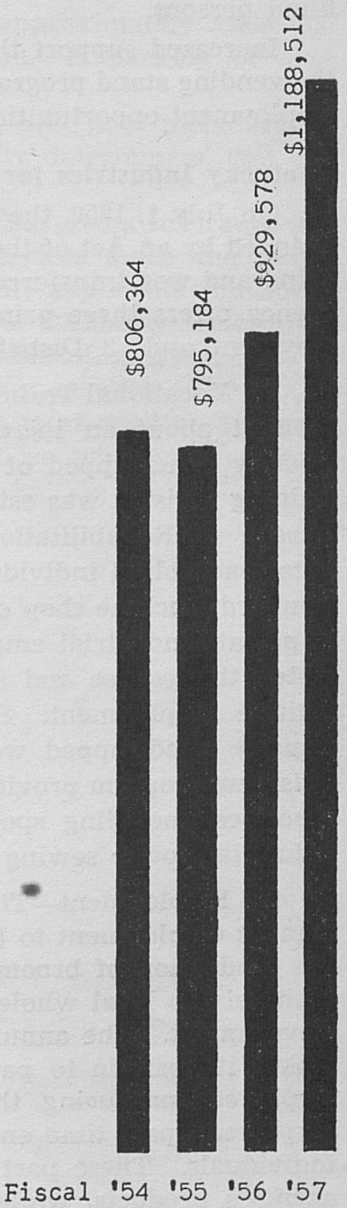

CHART NO. V

AGGREGATE ANNUAL WAGES

AFTER REHABILITATION

The 1422 citizens of Kentucky rehabilitated during the 1956-57 biennium, therefore, became self-supporting, productive, tax-paying citizens instead of tax-consuming persons dependent on their society. It is estimated that each person rehabilitated will pay back in Federal taxes within the average work-life of the individual $10 for each $1 spent by the Federal Government on his rehabilitation, and a proportionate amount in State taxes to the State Government. Vocational Rehabilitation is then not only a good investment for society and humanity, but is a very profitable investment for the economy of the State.

Kentucky Business Enterprises Program for the Blind

The Kentucky Business Enterprises Program is a chain of 27 vending stands, each operated by a blind person. These vending stands are located on Federal, State and City property, and in manufacturing plants. Currently 33 blind persons are employed by this program, either as operators or as assistant operators. A well planned vending stand program has long been recognized as a valuable employment opportunity for trained blind persons.

Increased support through adequate State financing would improve the vending stand program in Kentucky, thus making available additional employment opportunities.

Kentucky Industries for the Blind

On July 1, 1956, the Kentucky Workshop for the Blind was officially changed by an Act of the Legislature to The Kentucky Industries for the Blind and was transferred to the Bureau of Rehabilitation Services. This agency offers three principal services: 1. Vocational Training, 2. Employment, and 3. Distribution of Talking Books.

1. Vocational Training—The transfer to the Bureau of Rehabilitation brought about an increased emphasis on vocational training for the visually handicapped of the Commonwealth. As a result an industrial training division was established in March 1956, in cooperation with the Bureau of Rehabilitation. The purpose of this new training facility is to teach blind individuals the safe and efficient methods of operating standard machine shop equipment so that they may ultimately be placed in private industrial employment. To date eighteen trainees have completed this course and now should be fully capable of obtaining competitive employment. Since no training facilities were available for visually handicapped women, a program was set up in May of 1957. This new program provides instruction in various types of manufacturing processes, including specific training on the most commonly accepted industrial power sewing machine equipment.

2. Employment—The Kentucky Industries for the Blind offers permanent employment to twenty visually handicapped men and women in the production of brooms, mops, and broom bags, which are sold competitively to local wholesale and retail markets, as well as to the U. S. Government. The annual volume of sales approximates $160,000, which makes it possible to pay approximately $42,000 annually to the blind employees producing these products. In addition to these full time employees, part time employment is offered to some eight or ten other individuals. These part time employees do door to door selling of the agency's products, while others do sub-contract work including assembling, packing and processing of industrial items.

3. Distribution of Talking Books—The Kentucky Industries for the Blind is also the designated agency for the State of Kentucky in the distribution of talking book machines which are loaned by the Library of Congress. The Talking Book machine resembles a portable record player using records on which a wide selection of literature is available. Both the talking book machine and the records are furnished at no cost to the recipient. There are approximately eight hundred talking book holders in the State of Kentucky.

Old-Age and Survivors Insurance Disability Determination Section

This Section of the Bureau of Rehabilitation Services is engaged in the determination of disability for individuals in Kentucky who apply for disability benefits under the Social Security Act Amendments of 1954 and 1956. Agreement by the Bureau to assume this function was made with the Federal Department of Health, Education, and Welfare, in 1955. All funds for necessary costs for making these disability determinations are provided by the Federal Government.

During the period July 1955 to July 1957, approximately 5,000 disability claims were determined by this Section. A backlog of over 2,000 claims is on file awaiting determination.

The Section staff has increased since 1955, and now includes two medical doctors, a state supervisor, four disability determiners, two disability counselors, and five secretaries.

The program of the Bureau of Old-Age and Survivors Insurance is a source of many referrals for rehabilitation services since the Social Security Act provides mandatory referral for all applicants for Social Security disability benefits. The activities of the Disability Determination Section have been integrated with other rehabilitation service activities to secure a maximum exchange of program benefits. The major objectives of this integration is to relieve in the most positive and constructive manner the personal misfortune of those who have suffered severe disability.

Total Receipts	$65,952,578.59	$41,632,736.21	$107,585,314.80

* Explanatory Notes:

1. Walton-Verona refunded $130.22 of final equalization allotment since allotment had been reduced.
2. Campbell County had coded $70.00 under Code 1050 instead of Code 1010.
3. Liberty had coded one installment of equalization allotment in amount of $2,720.00 under Code 1050 instead of Code 1010.
4. Henry County had not deposited final equalization allotment of $3,916.06 in bank prior to July 1, 1956.
5. Stanford had erroneously coded $75.00 under Code 1010.
6. Ferguson had coded April, 1956, equalization allotment in Code 1050 instead of Code 1010.
