LETTER OF TRANSMITTAL

COMMONWEALTH OF KENTUCKY
DEPARTMENT OF EDUCATION
FRANKFORT

To the Governor and the
General Assembly of the
Commonwealth of Kentucky

I herewith submit the report of the Superintendent of Public Instruction for the biennium ended June 30, 1951. This is in compliance with Sections 57.140 and 156.250 of the Kentucky Revised Statutes.

Part 1 represents the Report of the Superintendent of Public Instruction and Part 2 contains statistical reports concerning personnel and finance from the standpoint of the state at large and from individual districts of the state. I should like to call your attention to the Introduction, which points out some of the accomplishments of the biennium, and calls attention to some of the urgent needs for the program of education in Kentucky.

Respectfully submitted,

BOSWELL B. HODGKIN
Superintendent of Public Instruction

January 1, 1952

PART I

REPORT OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION

LOOKING TO THE FUTURE

Progress in education in Kentucky during the last four years has been substantial and significant. The activities and accomplishments outlined here have made a noteworthy contribution to the improvement of the public schools of the state and to the welfare of the people.

Many problems, however, remain which must be met if education is to serve in the most effective way. Some of these problems are accentuated because of outmoded provisions of the State Constitution. Others are aggravated by the low per capita income of our people. These problems are of such magnitude to challenge the best minds for decades.

Attention should be given to these problems:

1. A defensible minimum foundation program is the first need of public education in Kentucky. Section 186 of the Constitution should be amended at the earliest possible time to permit Kentucky to use this current pattern of educational financing. This satisfactory minimum program would provide a floor under educational opportunity below which no district would be allowed to go and to which every district would be permitted to add.

   This foundation program calls for a fiscal partnership between the state and the local school district. The key to this partnership is the sharing of the cost of the program in such a way that the burden shall fall upon the people of all districts in an equitable way according to their power to pay taxes. It further demands that the burden of the property tax which supports local initiative shall not be greater than the burden on other types of taxes.

2. The teacher shortage must be met. Ways must be found to encourage the most promising youths to enter teaching. The implementation of the foundation program concept will encourage the best to enter teaching. Consolidation of the more than 3,000 one room schools is a must if a competent teacher is to be provided every classroom.

3. There is need for further reorganization of local school districts into efficient administrative, supervisory and attendance units. Kentucky cannot afford to use its limited financial resources unwisely.

4. The Department of Education should be expanded to provide needed services and leadership to other important facets of the school program. The resources of the Department in the fields of research and public information are limited. Lack of supervision at the state level in guidance and counseling has handicapped the development of these programs locally. Supervision and auditing of activity funds of local schools would provide a valuable service which cannot now be undertaken because of the limited supervisory staff in finance. Areas such as music education, conservation education and audio-visual education need supervision at the state level to enhance their development locally. Special attention needs to be given to the encouragement of the program for the handicapped. Supervision should be given in the areas of speech and hearing and mental retardation.

5. The minimum term length should be extended to nine (9) months. Every Kentucky child regardless of his race, social status, or place of residence should be guaranteed the opportunity to attend school for at least nine months. Every child is entitled to a school term that will enable him to make normal progress year after year.

6. Capital outlay or long-term financing should be further separated from the financing of the current educational program. The rigorous restrictions of Section 158 of the Kentucky Constitution have forced the financing of capital outlay from revenue that would otherwise have been available for the current school program. Section 158 should be amended without delay. The special voted building fund tax should be used to provide revenue for financing the capital outlay program. The superior revenue resources of the state should be taxed to assist in meeting the need for adequate buildings.

7. The rural road program has made possible the consolidation of small schools and the transportation of their pupils to more adequate centers. The time has come for the state to assist in financing the cost of pupil transportation.

8. The vocational education program should be expanded as a means of raising the per capita income of the state. The supervisory and teacher training program in these fields should be increased as the program expands.

9. The most important improvement that can be made with reference to the Teachers' Retirement program would be in the nature of increasing the current contribution of the teacher and the state. Such an increase should not be less than one per cent in each age bracket and should be matched by the state. Teachers should be permitted to make contributions matched by the state on salaries up to $3,600 to $4,000.

10. The instructional program is the prime element in education. All services provided have but one purpose—to improve the education of children. No school is perfect. There is no school regardless of the level of expenditure and the organization and quality of its staff but can, by taking thought, improve the quality of its educational program. Many improvements could undoubtedly be made without the outlay of an additional dollar. But a realist must know that smaller classes and more adequate staffing will cost more. A change from textbook teaching to a realistic approach through instructional aids will be expensive. In the long haul, however, a community or a state has the type of educational program it purchases with tax dollars.

This program is not the work of starry-eyed dreamers. It is practical. It is based on modern educational concepts with full regard to its implications for sound fiscal policy. It gives full regard to our resources as well as to our responsibilities. When its full portent is understood by the citizens of Kentucky, they will demand that it be implemented in order that no Kentucky child be denied his educational birthright.

BOSWELL B. HODGKIN
Superintendent of Public Instruction

TEACHERS' RETIREMENT SYSTEM

This is a brief report covering the period July 1, 1949, to July 1, 1951. The reader is respectfully referred to the Annual Reports of the Retirement System prepared under 161.320, KRS

The interest of the teachers has greatly increased during this biennium, and the Retirement System has prospered. The holding and stabilizing effect of the System has been apparent in a reduction of the number of members not now teaching, but who have taught within the last three years. Six years ago the number in this category was about 8,000, while on July 1, 1951, the number was 2,855. The number paying monthly contributions during 1950-51 was 23,145. Teachers are now fully realizing the value of a year of service credit and are not so inclined to go to another state to teach, or to accept employment in other fields as formerly

TABLE I. Membership 1940-51

	SERVICE RECORDS				
	With Prior Service	Without Prior Service	Total with Records Filed	Members Without Records Filed	Totals
Active Membership	11,968	11,146	23,114	2,885	25,999

Inactive accounts—Membership lost	499	209	708		708
Professional Service Records in force	13,432	12,711	26,143		
Deceased before Retirement	451	40	491	60	551
Withdrawn	7,957	4,440	12,397	3,230	15,627
Retired	1,456	5	1,461		1,461
Records pending	43	23	66		66
Certificates issued—Refunds made within Year	647	243	890		890
	13,432	12,711	26,143	7,041	33,184
	11,053	4,960	16,013	3,290	19,303
Total Accounts Handled 1940-51	24,485	17,671	42,156	10,331	52,487

The excellent amendments to the Retirement Act made by the General Assembly in regular session in 1950 have greatly increased the value of the System to the teachers.

Age requirements for retirement for disability and for superannuation were repealed, leaving only a service requirement. This enabled the removal of many sick and inefficient teachers from the classroom, thus improving instructional service. During 1950-51 two hundred and two teachers were retired with an age range from 39 years to 70 years.

For this year, alone, 8,000 pupil children were permitted to have a younger, more alert and more vigorous teacher. For the preceding year of 1949-50, 150 teachers were retired.

The amendment permitting members of the Retirement System to

make voluntary unmatched contributions for the purpose of buying an additional annuity at retirement is not yet sufficiently understood to be of service to them. This amendment is 161.705, KRS. We believe it will prove to be an important provision.

The present inflationary conditions prompted the passage of an amendment increasing a second time the minimum retirement allowance and appropriating $250,000 for the biennium to pay the extra cost. On the basis of 30 years or more of service credit, the minimum was increased from $300 to $480. This included retired teachers, as well as those who may retire subsequently. This was an increase of 60%; from $10 per service credit year to $16. A teacher retiring with 20 years of service credit will have a minimum of $320; a maximum of $720. This amendment increased the retirement allowance of about 65% of all retired teachers and met a very great need. It was considered the most important amendment by the profession.

Receipts by Sources

Year	From Teachers	From the State	Interest and Profits	Totals
1949-50.....	$1,182,974.01	$1,477,875.00	$429,361.89	$3,090,210.90
1950-52.....	1,255,319.51	1,630,000.00	399,979.09	3,285,298.60

The mark of a good Retirement System is that the State taxpayers contribute at least as much as the teachers and that interest on the reserve funds be a significant part of the receipts. During the biennium interest and profits equaled 15% of contributions of teachers and state. The time will come, if the System is kept on a full-reserve basis, when interest will carry half the cost. This makes it easier on teacher and taxpayer.

Since July 1, 1942, on which date the first teachers were retired, $2,000,000 in round numbers has been paid to retired teachers. Of this amount, the retiring teachers provided $331,140.93 and the State and interest provided the balance. During 1950-51, $515,230.92 was paid to retired teachers; $28,296.05 to beneficiaries of deceased teachers; and $244,174.48 refunded to resigning teachers. Total disbursements to teachers $787,701.45.

The General Balance Sheet June 30, 1951, shows assets of $20,124,-465.24. This means the Retirement System is financially sound. Trust Fund balances are shown in this statement. The prospective obligations of the System as of July 1, 1950, were $58,465,679.97. The present assets are 34% of the total obligation which shows actuarial soundness.

To date 1,461 teachers have been retired. This provides a satisfactory and honorable means by which near 60,000 pupil children may have a young and more vigorous teacher. In this way the Retirement System has a very direct beneficial effect upon instruction in the classrooms of the public schools. As time passes the annuity due will be greater, the weeding-out process easier, and the beneficial results still more pronounced.

MERGER OF INDEPENDENT SCHOOL DISTRICTS

During the two school years 1949-50 and 1950-51, conferences were held with county and independent district boards of education of several counties throughout the State with the view of arriving at the procedure for them to follow to provide the best educational facilities for the children of the districts concerned. In these conferences the advisability of merger of independent school districts with the county districts as a means of providing desirable educational facilities of the districts concerned, was one among the important points discussed at length. Partial results of these conferences was the decision of four of the independent district boards of education that their educational program would be improved by merging with the county school district. As a result of the merger, educational programs have been planned on the district-wide basis and in most of them school building programs are now under way or are being planned for construction.

The independent districts which became part of the county school districts are as follows:

Hodgenville (LaRue)
Hikes (Jefferson)
Greensburg (Green)
Madisonville (Hopkins)

Two independent districts merged into one:
Cave City—Horse Cave (Caverna)

EDUCATIONAL BULLETINS

Twenty-four issues of the Department of Education Bulletins have been published during the last biennium. The titles are as listed below.

1950	January	Moral and Spiritual Values in Education
1950	February	The Program of Civilian Rehabilitation in Kentucky
1950	March	School Sites
1950	April	Kentucky High Schools (1949-50)
1950	May	List of Textbooks Adopted (1950-55)
1950	June	Kentucky School Laws
1950	July	Toward Better Teaching
1950	August	Health and Physical Education in Public Schools
1950	September	A Kindergarten Guide
1950	October	Moral and Spiritual Values in Education
1950	November	Kentucky Public School Directory 1950-51
1950	December	Revising the Teacher Education and Certification Program
1951	January	A Suggested Twelve Grade Program of Studies for Kentucky Schools and Standards for Accrediting High Schools
1951	February	Getting the Primary Reading Program Under Way (Revision)

1951	March	Thoughts Have Wings
1951	April	Kentucky High Schools (1950-51)
1951	May	Unit Teaching in the Elementary School
1951	June	Improving Instruction Through In-Service Training
1951	July	Reporting on a 1950 Fall Conference
1951	August	Promising Practices in Kentucky Schools
1951	September	Kentucky Source Material and the State Constitution
1951	October	Four Years of Educational Progress in Kentucky 1948-51
1951	November	Public School Directory 1951-52
1951	December	Biennial Report of the Superintendent of Public Instruction

SCHOOL LAWS

After the close of the 1950 session of the Legislature the Volume of School Laws, formerly published by the State Board of Education, was revised so as to include all the Laws passed during the four preceding years. The present volume, revised to include these laws and dated 1950, contains abstracts from the decisions of the Court of Appeals to and including Volume 312, page 474. These Laws were distributed throughout the State.

SCHOOL BUILDINGS AND GROUNDS

This Division of the Department is engaged daily in conferences with Superintendents and boards of education and in visiting school districts throughout the State in planning school building facilities in which to house the educational program for the constantly increasing enrollment throughout the State. The need has been so great during the past four years that it has been necessary to give more consideration to district-wide planning for school buildings and repairs than has been necessary in the preceding years. Such needs require much study because boards of education need not only to erect complete buildings but to provide additional services such as shops, lunch rooms, and, in many cases, to provide temporary classrooms until such time as the permanent building may be provided.

During the past two years approvals have been made for more than $30,000,000, estimated expenditure, for new buildings, additions and repairs to old buildings. The number of projects for new buildings was 85 and the number of additions to and remodeling of old buildings was 177, as is indicated by the table below. In this table is itemized the type of new buildings erected as well as the type of buildings to which additions and remodelings were made. It will be noted that the elementary schools require the greatest number of building projects, both new and additions (122). Twelve grade projects which include both elementary and high school come second in number, that is, 33 in all. High school building projects come third, 22 in number. The largest building project in the State during the biennium was a high school project which cost three and one-half million dollars. An unusual number of new heating plants and toilet facilities was added to old schools during the last biennium. This indicates a constant demand for better facilities in this connection than has been required heretofore.

COUNTY AND INDEPENDENT SCHOOLS

June 30, 1949 to June 30, 1951

Primary Purpose of Project	No. of Projects		Cost of Project		
	New	Addition	New	Addition	Total
Elementary	49	73	$4,721,685	$2,951,318	$7,673,003
Elem. and Jr. High	1	1	52,440	204,500	256,940
Elem. and High	8	25	2,041,023	2,370,871	4,411,894
High School	12	10	7,375,205	1,545,797	8,921,002
Jr. and Sr. High	4	13	898,200	3,983,137	4,881,337
Gymnasium	4	13	288,919	724,911	1,013,830
Heating Plant	0	7	0	68,636	68,636
Agri. Shop	4	13	98,548	663,082	761,630
Cafeteria	1	9	5,612	171,165	176,777
Toilet	1	20	11,025	311,094	322,119
Storage	0	2	0	4,300	4,300
Garage	2	2	245,305	7,500	252,805
Athletic Field	0	2	0	70,359	70,359
Auditorium	0	2	0	107,551	107,551
Other	2	9	18,500	129,421	147,921
Total	85	177	$15,756,462	$13,313,642	$29,070,104

It is also of interest to note that in every new building much increased acreage for sites has been secured. This is necessary in order to provide space for the activities outside of the school rooms which are required for the health and recreational programs for the present day.

A new feature in the building program for the state is conferences for the training of Custodians and Janitors. These conferences were held as an experiment in order to determine the best procedures to be followed in getting more competent personnel. Since the modern school building requires the operation of more machinery and equipment than in the past, there are increased needs for individuals to care for them who can do much more than sweep the floor and carry out ashes from the several stoves formerly used in heating the school buildings. These conferences have been very successful and the work that has been done is just the beginning, we believe, of a better day for school building maintenance.

SCHOOL BUILDING SURVEY

A school building survey is now in progress. This work was begun last September by personnel employed in the Division of Research and Statistics. This project is being financed, fifty per cent from the Federal Government and, at present, fifty per cent from the Emergency Fund of the Governor. At the present time an inventory of the school building situation has been filed by practically every district in the State. After this work has been completed, the need for new buildings, repairs and the amount of funds necessary to provide these needs will be determined. It will probably take two or two and one-half years to complete the survey which is now under way.

PUPIL TRANSPORTATION

The number of pupils being transported throughout the State is constantly increasing. This service is becoming more necessary in order to

provide educational facilities for the pupils of rural districts comparable with those districts of urban communities. The work of this division has so increased that in 1948 a full-time director, with secretarial assistants, was employed as a member of the State Department of Education. Since the beginning of this service, more than 1,200 school buses have been inspected, and recommendations have been made for their improvement and for the comfort and safety of the pupils who are transported.

In addition to this service, many of the districts have received help from the Division of Pupil Transportation in planning their programs in such a way as to serve the children in the most efficient and economical manner. Also, meetings of school bus drivers were conducted on safety requirements for school bus operation as well as discussing regulations conforming with the requirements of operating school buses. One of the objectives of this division is to make available such a conference for every school bus driver in the state so that he will become familiar with the regulations as prescribed by the State Board of Education and the laws governing pupil transportation.

By an act of the Legislature of 1950, persons eighteen years old or over were permitted to drive a school bus. However, those under twenty-one and eighteen or over are required to pass a fifty-hour course in school bus driver training before they can qualify to transport school children. During the months of July and August of the two school years beginning July 1950 and July 1951, two driver training schools for the duration of one week each were conducted for individuals between the ages of eighteen and twenty-one who were interested in qualifying to drive a school bus. Expressions from superintendents indicate that the young men receiving this training are among their best drivers. The number of persons attending the second conference increased over those attending the first one. This seems to be evidence that superintendents and boards of education think this is a step in the right direction for improving the safety of pupil transportation.

In addition to these courses qualifying young men under twenty-one years of age to drive a school bus, courses in first aid training conducted by and under the supervision of the National Red Cross are being made available throughout the state to any bus driver in the state who has not completed a standard course in first aid training. It is hoped that in the near future every bus driver will hold a certificate certifying that he has completed such a course.

That the transportation program is on a constant increase is shown by the table below. It may be of interest to contrast the items in 1939-40 with those of 1949-50. At the present time, figures are incomplete for the school year ending June, 1951. However, enough information is available to indicate that there is an increase in every item listed in the table for the school year ending June 30, 1950. For example, available information shows that in the school year ending June, 1950, there were in use 2,333 vehicles, whereas for the school year ending June, 1951, there were in use 2,500 vehicles. It may be observed that in the period between 1939-40 and 1949-50, the number of children transported almost doubled. The cost of transportation for the school year 1949-50 is about three times the cost of the 1939-40 school year, and the percentage of pupils transported was almost doubled over the same period. This would indicate that as roads are improved, schools consolidated, and more buses added, the percentage of children transported increases proportionately.

	School Year 1939-40	1949-50
Number pupils enrolled	608,621	552,655
Number transported	101,317	187,616
Per cent pupils transported	16.65	33.95
Number vehicles	1,673	2,333
Daily miles bus traveled	63,830	126,216
Annual Cost per pupil transported	13.42	21.25
Total annual cost	$1,359,685.63	$3,986,580.02

SURPLUS PROPERTY

Beginning July 1, 1949 and ending June 30, 1951, the Division of Surplus Property has operated without State appropriated funds with the exception of $10,000 allocated from the Governor's Emergency Fund. This amount was made available for the first half of the fiscal year 1949-50. Since that time the total costs of administration, warehousing and transportation have been borne by the disposal of property to educational and health claimants.

Since July 1949 the Agency has been operating under Federal Public Law 152, 81st Congress, which was amended in July 1950. Public Law 152, as amended, makes not only public and non-profit schools, colleges, universities and school systems eligible to receive Federal surplus property but also hospitals, clinics and health units, both public and non-profit. Property surplus to the needs of any Federal agency may now be made available to the above eligible institutions. Heretofore, only property from the defense agencies was in this category. Since July 1950, due to the Korean situation, property has been screened more closely by all Federal agencies, thus not as much usable property has been made available to the Agency.

Public Law 152 set up the General Services Administration as the one overall storehouse keeper for the Federal Government and the Property Utilization Program was transferred from the U. S. Office of Education in the Federal Security Agency to the Office of the Administrator in the same agency. Since health and educational institutions were to be served the program was transferred to the Office of the Administrator in order to coordinate the two programs. The State Agency for Surplus Property has been serving both health and Educational claimants by agreement worked out between the State Department of Education and the State Department of Health. This arrangement has worked well since it gives the Agency a broader outlet which should in time reduce the per item cost of distribution. During the time of national emergency when property will be scarce, and even afterwards, the State should seriously consider providing funds for the administration of the program since both health and educational institutions share in the operation, thus insuring the continuation of the Agency and making it a permanent division of the State government. It would seem that the flow of such property could well justify such action.

For the biennium closing June 30, 1951 this division has expanded its operations to include more warehouse space, facilities for transporting property and increased personnel.

Following is a summary of operations during the biennium:

Agency has distributed property:

Independent boards of education	79
County boards of education	102
Public schools	40
Parochial schools	27
Private schools	18
Junior colleges, colleges and universities	25
Other agencies	13
Health units	5
Hospitals	13

Personal Property Allocated to Kentucky

Fiscal Year 1949-50	$2,378,727.00
Fiscal Year 1950-51	1,316,232.00
Total Acquisition Value	$3,694,959.00
Estimated Fair Value	1,477,983.00
Cost to Health and Educational Institutions	115,055.76

Real Property Allocated to Kentucky:

Total Acquisition Value for Biennium	$ 380,808.00
Fair Value	22,266.00
Cost to Schools	1,107.00
Total Acquisition Value of Personal and Real Property	$4,075,767.00
Fair Value	1,500,249.00
Cost to Recipient Institutions	116,162.76

FUTURE NEEDS

School Buildings

It may be noted from the preceding information on school buildings that there is an increase in the expenditure for school buildings during the last biennium over that for the preceding biennium. About half of the expenditure of the last biennium was to take care of the most pressing needs. In many instances boards of education have been forced to erect buildings of temporary nature and to reclaim ill suited spaces for pupil use until funds can be made available and new structures erected. There are many districts where additional classroom space and improved facilities are needed where no funds are available to supply this need. As the enrollment constantly increases because of increased population and as more roads are constructed or brought to a condition where school buses may be used for transporting children, there will be an increased demand for school building spaces. As the demand increases for school buildings more money must be made available for capital outlay. The law enacted at the last session of the Legislature which authorizes the people of a district to vote a tax for school building projects from five to fifty cents may be a partial answer to this need. Some seven or eight districts have already taken advantage of this law to provide funds for the needed school plants and repairs to the old buildings. It now appears that more districts must take advantage of this source of funds if they are to supply the school building needs.

Pupil Transportation

By referring to the table in this report on pupil transportation it will be noted that the number of pupils being transported in 1949-50 was nearly twice the number that were being transported ten years preceding, namely, 1939-40. The number of vehicles has been increased 50%; the number of miles traveled daily has been doubled and the total annual cost tripled. Because of the increased demands for school transportation facilities and the increased cost due to limited expansion of routes as well as for labor and facilities, districts are finding it difficult to expand the transportation program to meet the demands for this service. It appears that some means should be provided whereby districts which are not able to provide the needed transportation may be permitted to do so. The states adjoining Kentucky, which seem to provide more or less adequate transportation facilities, do so by some form of state aid. A recent study of the number of states that provide assistance to pupil transportation shows that every state that adjoins Kentucky appropriates funds which are used to aid boards of education in providing school transportation facilities. This service is becoming more and more necessary if the boys and girls in rural territory are to have an opportunity to attend schools which furnish instructional facilities suitable to the needs of the individuals that must attend them.

School Building Survey

In order that additional funds may be made available from the Federal Government to continue the school building survey after June 30, 1952, it will be necessary to ask the State Legislature for an appropriation to match the Federal funds which will be available at that time. On or about January 1, 1952, the second phase of the school building survey will be begun. The overall outline for carrying on this survey consists of the following listed five points.

1. Facts concerning the District—What will the community or district look like in 1960.
2. Educational program to be housed—What kind needed and for whom.
3. School Housing situation—Status and utilization.
4. Financial ability and effort.
5. What school facilities will be needed in this community and in the district as a whole.

Points 3 and 4 are now well under way and will be completed by January 1, 1952. Points 1, 2, and 5 will be begun after that date.

BUREAU OF INSTRUCTION

All the functional divisions of the State Department of Education, directly related to the learning process or instructional services, are organized into the Bureau of Instruction. Among these divisions are, (1) Division of Supervision, (2) Division of Teacher Training and Certification, (3) Division of Free Textbooks, (4) Division of Health Education, and (5) Division for the Education for Exceptional Children. With these five divisions effectively organized into a Bureau of Instruction, greater coordination of all their responsibilities and services towards common objectives can be assured. As a working unit, the Bureau is under the direction of the Superintendent of Public Instruction, the executive officer of the State Board of Education, to plan and direct the states' program of instruction as it relates to all levels of education. Some of the responsibilities, with which the Bureau is charged, may be summarized as follows:

1. The Bureau of Instruction, through its Division of Supervision and Division of Free Textbooks, assists in the preparation for adoption by the State Board of Education, of the minimum courses of study for the different kinds of common schools. When these courses are adopted by the State Board of Education, the Bureau is assigned the responsibility of supervising and administering them in the schools throughout the state.

2. Through the Division of Supervision, the Bureau of Instruction prepares the rules and regulations for grading, classifying and accrediting all common schools and for determining the scope of instruction that may be offered in the different classes of schools and the minimum requirements for graduation from the courses offered. The Bureau supervises and administers the carrying out of these regulations in the schools of the state following their adoption.

3. The Bureau of Instruction through the Division of Free Textbooks is delegated the responsibility of administering purchase, and distributing free textbooks to the 232 districts of the state. It serves the State Textbook Commission with the services necessary for carrying out the adoption of textbooks for the various courses approved for use in the schools. It carries out the laws relative to the conduct of the Free Textbook Program.

4. Through the Division of Teacher Training and Certification, the Bureau of Instruction supervises and administers the laws and the rules and regulations governing the training qualifications and certification of teachers and other school employees. It supervises the in-service training of teachers and assists the Council on Public Higher Education in prescribing courses for the formal preservice training of all teachers.

5. The Division of Education for Exceptional Children, created by an act in 1948, directs and supervises special educational facilities for children with physical and mental handicaps. It works toward providing better services to the local school districts with meaningful instruction to children who are handicapped and unable to

attend regular classes. This Division is made responsible to distribute an appropriation of $70,000.00 biennially for the purpose of providing these Kentucky children with an educational service.

6. The Health and Physical Education Program is administered by the Bureau of Instruction through its Division of Health Education. This program of instruction is directed toward the improvement of the health of the children by providing health instruction and medical examinations, together with follow-up corrections of physical defects revealed by the examinations.

In order to execute and carry out the many responsibilities delegated and assigned to the Bureau of Instruction, several plans of organization and numerous activities have been entered into during the biennium beginning July 1, 1949 and ending June 30, 1951. Some of these plans and activities, together with certain factual information, are given in the report of the various Divisions of the Bureau.

DIVISION OF SUPERVISION

Elementary Schools. Some factual information, concerning the elementary schools and the elementary education program of the state follows:

1. During the school year of 1949 and 1950, there were 237 local school districts operating elementary school programs. In 1950-51, this number was reduced to 232 as a result of the merger of five local school systems into larger units of school administration. Of this number 112 are independent systems, ranging in size from 207 census pupils in Silver Grove, Campbell County, to 49,131 census pupils in the city of Louisville.

2. During the school year of 1949-50, there were 4,678 separate schools operated for elementary children. In 1950-51, this number was reduced to 4,550 as a result of 128 consolidations of one-room schools. The present schools are classified as follows:

(a) One-teacher schools	2,999
(b) Two-teacher schools	781
(c) Three-teacher schools	195
(d) Four or more teacher schools	575

3. In 1949-50, the enrollment in the elementary schools was 465,625 pupils. Included in this number is 33,528 pupils enrolled in parochial schools, 5,025 pupils were enrolled in the private schools, 1,053 were enrolled in the training schools operated by the colleges and 820 were enrolled in other state supported institutions. This enrollment represents approximately 69 per cent of the census pupils.

4. In 1950-51, the enrollment in the elementary schools of the state was 464,283. This number includes 4,778 children enrolled in the private schools, 34,974 enrolled in the parochial schools, 1,058 enrolled in the training schools operated by the colleges, and 1,421 pupils enrolled in other state supported institutions. The total enrollment is 68 per cent of the census children.

5. In 1949-50, about 14,425 teachers were employed in the elementary schools. In 1950-51, the number of teachers employed was 14,758, of which 13,485 were public school teachers. The average pupil-teacher ratio for the elementary schools is thirty-one (31) pupils per teacher.

6. The length of the school term for the elementary schools range from eight to ten months. Forty-nine (49) county school districts still maintain a school term of eight (8) months. In twelve (12) independent school districts, the term is ten (10) months. The average length of the school term for all districts is 8.8 months. There has been much progress made in the last few years in increasing the school term for elementary children. It now compares favorably with the term provided for high school children, the high school term being only .3 of one month more than the elementary term.

During the biennium much emphasis and effort have been given to the organization of elementary school programs towards more effective and economical school units. Noticeable progress has been made in this direction since 129 small, expensive and inefficient one-room schools have been consolidated into large school units. In addition to this, five local school districts have been merged into larger units of school administration.

As a result of many years of national, state and local research and study, there is emerging the consensus of opinion as to the type of local school districts that is most desirable both from the standpoints of economy and efficiency. After studying the many reports of public school surveys and research, the National Commission of School District Reorganization describes the local school district most desirable as follows:

A properly organized school district will meet the following criteria:

1. It will contain at least one well-defined community or a number of unrelated communities.

2. It will have pupils and resources sufficient to operate a comprehensive program of education from the kindergarten through the high school.

3. It is able to maintain a competent, well-balanced staff of teachers, supervisors and specialists.

4. It is able to secure and maintain capable educational leadership.

5. It is able to finance its school program without unduly burdensome taxes.

6. It will locate its schools with due regard to bringing together enough children in each age group to make good instruction possible at reasonable cost, placing schools in neighborhood or community centers and holding the time spent in transportation to a maximum of one hour a day for high school children and less for younger children.

The Commission recommends that in order to provide the essential educational services most needed in Kentucky communities the local school district organization should have at least 1200 pupils between ages

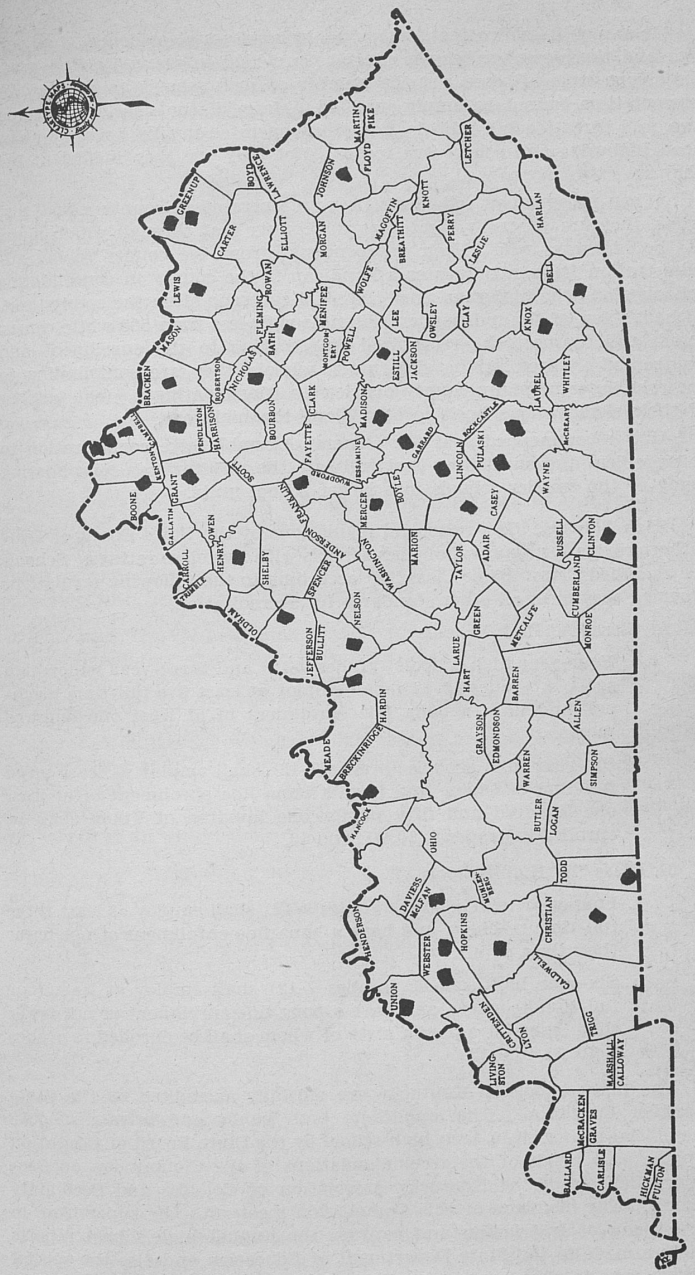

six and eighteen years of age. An effective elementary school should have a minimum enrollment from the kindergarten and grades one through six of not fewer than 175 pupils with not less than seven full-time teachers. It recommends that a most desirable minimum would be an enrollment of not fewer than 300 pupils with at least twelve full-time teachers. These are desirable minimums provided that elementary pupils can be brought together without requiring them to travel more than forty-five minutes each way between home and school.

Of the 232 local school districts now existing in Kentucky, eighty-one have a pupil census of 1200 pupils or less and thirty-eight of these have a pupil census of 500 or less.

TABLE I

KENTUCKY INDEPENDENT SCHOOL DISTRICTS
(With Fewer Than 500 White Census Pupils)

DISTRICT	COUNTY	Census	Elementary Schools		High School Enrollment		High School Rating
			Enrollment	No. of Teachers	Total	From other Districts

Map showing the location of 38 local independent school districts with 500 census pupils or less.

It is a well known fact, supported by substantial evidence, that one, two and three-teacher schools must be provided in many isolated areas for a long time to come, yet the number of such schools existing at the present time cannot be amply justified. Many of the nearly 4,000, one, two, and three-teacher schools, now being operated in this state are along good highways and school bus routes. Not only are they inefficient but they are expensive as well.

When independent school districts are operated in county school districts, they are generally located at the county seat through which many of the highways run. Their independence from the county school administration frequently creates a handicap to the county in consolidating schools along the highways since the ideal center is often the county seat. Although few of the independent districts with less than 500 white census pupils fail to meet the recognized standard as to the enrollment and number of children in the elementary schools, they are contributing to the reluctance of many county districts in consolidating a great number of their elementary schools located along the highways.

It is recommended that the General Assembly give consideration to this problem and enact laws that will ease the way towards consolidating many of the smaller schools into larger school units.

High Schools. The rules and regulations of the State Board of Education provide for approval of high schools with two class ratings. Schools are classified Class "B" or Class "A" according to the following regulations provided they meet all other standards for accreditation.

A. Class "A" High Schools

a. Four-year high schools (grades 9-12) and three-year senior high schools (grades 10-12) shall employ at least five full-time teachers, and have a bona fide enrollment of at least one hundred pupils.

b. Six-year high schools (grades 7-12) shall employ at least seven full-time teachers, and have a bona fide enrollment of at least one hundred and fifty pupils, one hundred of whom shall be enrolled in grades 9, 10, 11, and 12.

B. Class "B" High Schools

a. Four-year high schools (grades 9-12) shall employ at least three full-time teachers, and have a bona fide enrollment of not fewer than sixty pupils.

b. Six-year high schools (grades 7-12) shall employ at least four full-time teachers, and have a bona fide enrollment of not fewer than eighty-five pupils, sixty of whom shall be enrolled in grades 9, 10, 11, and 12.

The high schools in Kentucky are officially accredited by the State Board of Education. This applies to both public and private schools. The official rating given each high school by the State Board of Education is made as a result of the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the supervisors in the Bureau of Instruction and canvass the annual high school reports that are made to the State Department of Education and also the special written reports that are made of inspections by the supervisors. The

State Board of Education may accept or reject the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools or may modify these recommendations. In practice the State Board of Education usually follows the recommendations of the Commission.

At the close of the biennium there were 613 high schools operating in Kentucky. During the two-year period, twenty-seven (27) small high schools have been eliminated, reducing the number from 640 to 613 as a result of consolidating these twenty-seven (27) small high schools into larger and better school organizations.

Of the 613 high schools now operating, 569 are complete organizations in that they offer work through the twelfth grade. The remaining forty-four (44) high schools, because they do not offer work through the twelfth grade, are approved as incomplete feeder schools. Of the forty-four (44) incomplete high schools, thirty-seven (37) are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining seven high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 569 complete high schools, 334 are operated by county boards of education while 158 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are operated by the State in connection with institutions that are maintained entirely by the State.

This year, the six-year high schools (grades 7-12) number 270 while the traditional four-year high schools (grades 9-12) number 261. The remaining thirty-eight (38) complete high school organizations represent modifications of the six-year and the traditional four-year plans.

Included in the 569 complete high schools are 125 class "B" schools enrolling fewer than 100 pupils. Only six of the thirty-eight (38) independent school districts with 500 or fewer white census-pupils are able to maintain class "A" high schools and five of these districts have no high school at all within their district.

TABLE II-se

Types of High School Organizations and Number of Each

Types of Organizations	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12	166	85	13	6	270
Grades 9-12	152	59	49	1	261
Grades 8-12	14	6	7	0	27
Grades 10-12	2	8	1	0	11
Grades up to 11	0	0	1	0	1
Grades up to 10	6	0	0	0	6
Grades up to 9	15	21	1	0	37
Totals	355	179	72	7	613

The foregoing table not only shows the number of different types of high schools that are found in the state but it also indicates the number of such schools that operate under different types of control.

TABLE III-se

High School Enrollments by Grades, Race, and Control

Grades	County District		Independent District		State or Regional		Private		Total
	White	Negro	White	Negro	White	Negro	White	Negro

Totals	324	9	113	46	6	1	69	1	569

For a number of years the Division of Supervision has carried three tables showing the development of high school education in Kentucky. This information has proved helpful to students of Kentucky Education.

TABLE V-se

Number of High Schools by Years

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1915-16	316	No report	No report	316
1916-17	376	32	No report	408
1918-19	400	30	No report	430
1922-23	529	56	No report	585
1923-24	492	51	86	629
1924-25	496	50	84	630
1925-26	551	57	91	699
1926-27	552	55	88	695
1927-28	607	64	98	769
1928-29	614	73	97	784
1930-31	661	72	73	806
1931-32	676	70	86	832
1932-33	678	73	82	834
1933-34	682	74	84	838
1934-35	684	75	89	848
1935-36	680	75	83	833
1936-37	663	78	77	818
1937-38	652	80	76	808
1938-39	628	80	75	783
1939-40	605	78	75	758
1940-41	592	74	72	738
1941-42	574	71	71	716
1942-43	555	71	71	697
1943-44	541	70	70	681
1944-45	542	66	73	681
1945-46	546	65	73	674
1946-47	513	62	73	648
1947-48	507	61	75	643
1948-49	507	59	74	640
1949-50	493	59	71	623
1950-51	482	59	72	613

This table shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This is the largest number of high schools that the state has ever had. Now that we have 613 high schools, public and private, it is clear that there has been a decrease of 235 in the number of high schools since 1935. This decrease has come about very largely through small high school organizations being merged into larger school centers.

TABLE VI-se

Enrollment by Years in Different Types of High Schools

1944-45	102,619	9,448	10,376	122,443
1945-46	103,455	9,897	10,820	124,172
1946-47	109,511	10,439	12,161	132,111
1947-48	107,876	10,666	12,015	130,557
1948-49	110,324	11,384	12,124	133,832
1949-50	116,047	10,919	11,898	138,864
1950-51	120,733	10,862	12,506	144,101

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

This table presents an interesting picture in total high school enrollments in different types of high schools (public white, public colored, and private) since 1915. High School enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 144,101 a small amount less than the highest total enrollment which was in 1940-41.

TABLE VII-se

High Schools Accredited Through Grade Twelve, 1909-1950

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1909-10	54	No report	29	83

1930-31	522	26	91	639
1931-32	527	34	84	645
1932-33	539	35	83	648
1933-34	535	34	82	651
1934-35	529	34	84	647
1935-36	559	51	77	687
1936-37	558	54	78	690
1937-38	546	56	75	677
1938-39	543	60	73	676
1939-40	529	59	73	661
1940-41	516	61	72	649
1941-42	510	56	70	636
1942-43	500	54	70	626
1943-44	494	55	69	618
1944-45	490	56	70	616
1945-46	487	55	71	613
1946-47	463	55	72	590
1947-48	464	55	71	590
1948-49	463	54	72	589
1949-50	452	55	70	577
1950-51	443	56	70	569

This table shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school" we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon as incomplete feeder schools for the regularly organized, complete high schools of the district.

Library Service

Since the adoption of new elementary and high school library standards by the State Board of Education on March 18, 1949, concerted effort has been made to encourage and assist schools to attain these minimum requirements. There is every indication that local schools have used the standards as criteria in planning the development of their programs of library service and that, as a result, considerable improvement has been made.

Despite evidences of progress in many phases of library facilities and service during this biennium, available data show that libraries in Kentucky schools are far from adequate. The major deterrents to school library progress have been, and continue to be, the shortage of qualified librarians and inadequate financial support. Concerted and continuous efforts have been made to stimulate improvement in these areas, but the inadequacies are so great that progress is very slow.

Training of Librarians. In 1948-49, according to the annual high school reports filed in the Department of Education, there were 157 persons serving as part or full-time school librarians in Kentucky public high schools who had had no professional training in library science. As a result of the special emphasis given to this problem by the Department of Education and the colleges in the state that offered work in library science, summer enrollments in library science courses and a workshop offered in the summer of 1949 greatly increased the number of persons enrolled for initial or additional training. In studying the training of librarians in the school year 1950-51, it was found that 139 persons were serving in public high school library positions without benefit of training in library science. In comparing the data for 1948-49 and 1950-51 it can be seen that some improvement has been made. However, that the problem still remains one of primary concern is evident from the 1950-51 reports which revealed that only 196, or 36.6 per cent, of the 535 public high schools in Kentucky were able to meet the minimum standards regarding the library science training of their librarians. The magnitude of this problem is further demonstrated by the fact that, in only eleven of the 120 counties in Kentucky do all the high school libraries have qualified librarians. In 40 of the counties there is not a single public high school whose librarian has the necessary library science training to meet the minimum State Board of Education regulations. It is obvious that continued efforts must be made to effect improvement in this essential phase of school library service.

Financial Support of School Libraries. Although there are no data which show the annual expenditures for library materials, the annual financial reports made by each school district to the Department of Education do show the combined expenditures for library and supplementary books. Statistical studies made of these expenditures in 1948-49 and 1949-50 offer graphic evidence of the extent to which school districts are meeting the minimum State Board of Education regulation of $1.25 annual expenditure for library materials for each elementary and high school pupil. The findings are so significant that they are summarized below:

1. Amount expended from local board of education funds for library and supplementary books for each child in average daily attendance.

	1948-49	1949-50
Elementary Schools	$ .34	$ .43
High Schools	1.07	1.30

2. Amount expended from **other** than board of education funds for each child in average daily attendance.

	1948-49	1949-50
High Schools	$ .34	$ .30

It is commendable that extra-curricular revenue is used in developing school libraries. Until financial support from boards of education is increased to provide sufficient funds for school libraries, these supplementary funds are essential. However, library service is fundamental and must have **adequate** and **regular** support.

Data are not available to show the amount of similar support that was given to elementary schools.

3. School districts that expended **no** money from board of education funds for library and supplementary books.

	1948-49	1949-50
Elementary Schools	45 districts	37 districts
High Schools	19 districts	10 districts

It is encouraging that fewer school districts expended no money for this essential school service in 1949-50 than in the preceding year. The records show that 23 of these school districts expended no money for elementary libraries in either of these two years, and 6 districts expended no money for high school libraries. Even if the money that is made available for this service is inadequate, annually, every local board of education should provide their elementary and high schools with some funds to develop school libraries.

By means of correspondence, visits to individual schools and school systems, participation in work conferences with librarians from various geographical areas, and the preparation of materials which were disseminated to all school librarians, the Department of Education, through its supervisor of school libraries, has offered some measure of direct service to every school system in the state. Although there continue to be many obvious inadequacies in library service in Kentucky schools, objective data clearly show that increased emphasis is being given to developing this facet of the educational program and, gradually, improvement is being effected.

Negro Schools

At the close of the biennium there were 378 segregated schools operated for Negro children. Nine of these schools were separate high school organizations, 322 were elementary schools and 47 were twelve-grade schools. Seventy-one per cent of the elementary schools were one-room schools and about two-thirds of the high schools were "B" class schools.

Equal education advantage for Negroes is no longer a major problem in Kentucky. While it cannot be stated that our Negro schools are equal to our white schools in every way and in every community, it can be said that generally equal services are provided so far as can be accomplished in a segregated system. Many of our Negro schools are even superior to a great number of our white schools and now by far the greater inequality

is found to exist not only between the races but between the various local school systems within the state and between the elementary and high schools of both races.

Much progress has been made in Negro education during the biennium and on behalf of the minority race thanks and grateful appreciation is expressed to the Governor and General Assembly, to state officials and to the many local school officials who have made it possible to offer good educational services to the Negro boys and girls. They too, will be making their contribution to society in the years to come, and the kind of citizens they are to become will depend on the kind of education and respect they receive today.

One of our biggest problems comes about, not as a result of the numbers to provide for but, by the scarcity of numbers. Two hundred of 232 local school districts have a Negro pupil population ranging in size from one census-pupil in five districts to over 10,000 in the city of Louisville. Outside of the five largest city school districts where about one-third of all the Negro population is concentrated, the other two-thirds are scattered over the rest of the area of nearly 40,000 square miles. In 138 of these 200 local districts there are ten or less than ten teachers employed. In many schools the pupil-teacher ratio is so low that the per capita cost is often two or more times the cost for white children. Under this condition it is difficult to effect desirable consolidation of schools with practical transportation services, or to provide such services as supervision on the local level with participation of the Negroes, as well as many other services.

The state is meeting these problems mainly by three methods: (1) by maintaining a modern high school at state expense and control with boarding facilities, (2) by merging local districts into county units and (3) by effecting consolidation under the co-operative plan of two or more local school systems. Two or three consolidated centers have been developed in the last year, resulting in modern twelve-grade program of studies. Our state high school is going forward with much improvement and added facilities each year. During the last two sessions of the Legislature, additional appropriations have been made to this school.

Other progress in the last year or so may be briefly mentioned as follows:

1. In 1950, the Legislature modified the Day Law legalizing non-segregation in schools above the high school level providing the governing body of the school so elects. As a result, Berea College and three private institutions located in the city of Louisville have opened their doors to Negroes. The city of Louisville has terminated the operation of its Negro college and is allowing its Negro students to enroll in the University of Louisville beginning with the school term 1951-52.

2. Twelve of our sixty high schools, which are members of the Southern Association of Colleges and Secondary Schools have been evaluated by the criteria developed by the cooperative study. These schools are now following the suggestions set out in the report of the Visiting Committee and are making many fine and needed improvements. A future plan is being considered to have all high schools of the state evaluated by this criteria and a similar program set up for each high school.

3. Under the health and physical education code, adopted by the State Board of Education in 1948, all children in the State are now being given physical examinations and health records are set up for each child. A present and future plan is now in existence to make a follow up of these examinations with the necessary corrections.

4. Much emphasis has been made to bring about improvements in buildings and physical plant, transportation services, library services, in-service training of teacher, textbooks and supplementary teaching materials, vocational education and education for exceptional children.

The greatest immediate needs in the area of Negro education may be listed as follows:

1. Buildings and equipment in both the elementary and the high school fields. Since many schools serve two or more districts due to limited numbers, laws should be enacted which will make it possible for all local districts served by one school to share proportionately in the construction of building facilities.

2. Additional support for Lincoln Institute, our state high school, in order that more high school pupils from rural areas may be served.

3. More supervision from the state and local levels. There is a great need for more supervision on the state level, especially in the areas of vocational education and elementary education.

4. Laws and amendments to existing laws that will enable local school authorities to provide school services more easily to the children in sparsely populated areas of the state. Segregation is extremely expensive in districts where only a few Negroes live. Modification should be made to the Day Law legalizing non-segregation when school boards elect to do so.

5. Transportation services to meet the needs of the transportation problem.

These are some of the areas that will engage our concentrated efforts in the years ahead. In order to solve the supervision problem we propose to employ a full-time, well qualified person, who will:

1. Give approximately six months full-time each year to supervision, visiting teachers at work, holding group conferences, and studying firsthand problems of teachers.

2. Give approximately six months full-time each year to work at the teacher training college. The work at the college would include:

   a. Instruct classes in methods of teaching in various subject matter areas, especially in the field of reading wherein most of our students are found to be weak.

   b. Keep the teacher training faculty well informed on problems found in the field so that the training curriculum can be developed toward meeting these problems.

   c. Conduct at the teacher training colleges institutes and workshops in reading and other subject matter areas as found to be of greatest need for teachers teaching in the schools of the state.

Generous appropriations have been made during this biennium for the purpose of continuing the Out-of-State College Tuition program for Negro citizens. Although a Federal court decision in 1948 opened the way for Negro students to enroll in graduate courses at the University of Kentucky, continuous appropriations have been made to enable a number of Negro students to finish courses started in out-of-state institutions under a law providing for the payment of tuition to out-of-state schools. This program representing an expenditure of approximately $75,000 has made it possible for some 200 citizens of the Negro race to complete requirements for advanced degrees without interruption. Most of these people have returned to the state better trained to serve their race and consequently the Commonwealth as a result of this training. The appropriations made to carry on this program, administered through the Bureau of Instruction, State Department of Education, is a small investment when compared to the returns it brings toward improving human resources. Advanced degrees have been awarded to most persons who participated in this program in business administration, engineering, architecture, education, science and mathematics, the fine arts (such as art and music), the practical arts (such as home economics, trades, industry and agriculture), religious work, social work, and many others.

HEALTH EDUCATION

The Health and Physical Education Program in the public schools of the state has shown much improvement during the biennium ending July 1, 1951. It is recognized that all the results of improved health do not readily appear in statistics.

School Employee Medical Examinations—1950-51

Required each year	100 School Districts
Required every two years	115 School Districts
Required every three years	18 School Districts

	1949-50	1950-51
Number of Pupils Examined in Accordance with Health Code	105,800	136,951
Total Number of Immunizations	504,020	493,224
Total Number of Defects Corrected	20,646	91,268
Amount Spent for Health Services by District Boards of Education	$151,621.70	$182,046.54
Number of Pupils Who Have Regular Physical Education	207,370	406,956
Number of Pupils in High School for Whom Health is Required		102,235

Number of Immunizations and Defects Corrected—1950-51

Number of Immunizations		Number of Defects Corrected	
(a) Smallpox	134,450	(a) Dental	56,022
(b) Diphtheria	55,132	(b) Tonsilectomy	5,551
(c) Typhoid	255,775	(c) Eyes	11,214
(d) Chest X-Ray	40,202	(d) Others	18,481
(e) Unclassified	7,665		
TOTAL	493,224	TOTAL	91,268

Fifty-five districts report the medical examination of all pupils attending school during the first three years of the Health and Physical Education Code. Only six school districts report less than five per cent of the pupils examined.

Special Activities Conducted

1. Statewide study of Physical Education in the elementary school was conducted in the spring of 1950.

2. Two meetings of representatives from teacher training institutions of Health, Physical Education, and Recreation studying problems in this area have been conducted.

3. Assisted in Health Workshop at Murray State College.

4. Supervised a study of Health and Physical Education in the public schools of Kentucky.

5. Served as a member of the White House Mid-Century Committee on Youth and Children.

6. Assisted in the preparation and distribution of four issues of Health News.

DIVISION OF TEACHER EDUCATION AND CERTIFICATION

Better teachers mean better schools. Teacher education is an avenue through which improvement can be made in school leadership, classroom teaching and learning, the teaching profession itself, and the state program of education. This is evidenced by significant achievements in the whole area of teacher education and certification during the past four years.

Training Level of Teachers Highest in History—by a Wide Margin

If educational preparation makes a better teacher, Kentucky schools have this year the best teachers they have had in their history. Kentucky teachers are better prepared today than ever before to guide the education of her childhood and better prepared to train future Kentuckians to think for themselves and to make intelligent decisions on economic, political and social problems of living.

Through the discharge of responsibility of this division teachers have been stimulated to become better qualified. The median training of our teaching personnel in Kentucky is above the A. B. Degree. This means that more than half of all the teachers are college graduates. Of the approximately 20,000 teachers employed in 1950-1951, 53.5 per cent held the baccalaureate degree or master's degree. This is a remarkable increase over the preparation status of the teaching staff in 1944-1945 when the training level had reached the lowest point in a decade. The training level of employed elementary and secondary teachers in Kentucky during the past decade is reflected in Table VIII-te.

TABLE VIII-te

Training Level of Employed Elementary and Secondary Teachers in Kentucky

1940-41—1944-45—1946-47—1948-49—1949-50—1950-51

Number of Emergency Teachers Decreasing

The program of certification administered by this division during the ten year period of critical teacher shortage has encouraged emergency

teachers to meet full certification requirements. Approximately 1,500 teachers who met only emergency requirements in 1947-1948 have now become qualified. The number of emergency teachers employed in Kentucky schools has decreased from 5,300 in 1947-1948 to approximately 3,000 for the 1951-1952 school year. This is heartening and gives hope for future progress in the solution of the problem of an inadequate supply of qualified teachers. The number of qualified and emergency teachers employed in Kentucky schools during the past decade and the improvement during the past biennium are indicated in Table IX-te.

TABLE IX-te

Number of Qualified and Emergency Teachers Employed During the Past Decade

Year	Number Qualified Teachers	Number Emergency Teachers	Total Number Teachers Employed
1939-1940	18,880	—0—	18,880
1940-1941	18,707	164	18,871
1941-1942	16,907	1,593	18,500
1942-1943	15,580	2,600	18,180
1943-1944	14,000	4,100	18,100
1944-1945	13,143	4,567	17,710
1945-1946	12,980	5,200	18,180
1946-1947	12,964	5,200	18,164
1947-1948	13,200	5,300	18,500
1948-1949	14,220	4,600	18,820
1949-1950	14,947	4,045*	18,992
1950-1951	15,792	3,600	19,392

* 3,900 are regularly employed teachers, 145 were for replacements during the year.

Authority for Certification Standards Given to the State Board of Education

All certification authority was placed in the Council on Public Higher Education and the State Board of Education by the Legislature in 1950. This was done upon recommendation of the Division of Teacher Education and Certification and is in keeping with the trend all over the Nation. This is a significant step in a long range plan for the teaching profession, in keeping with other professions, to accept responsibility for setting its own standards.

Prestige of Elementary Education Has Been Raised Through Higher Standards of Certification

A target date of September 1, 1953 has been set by the State Board of Education as the date for placing minimum certification standards for elementary teachers on a par with minimum standards for high school certificates. In 1934 the Legislature set college graduation as the minimum standard for all high school certificates. In 1953 the four year college level will be the standard level for all elementary certificates as well as high school certificates. This is significant since research reveals that high certification standards attract superior candidates for the teaching profession while lower standards repel them. Kentucky is now one of the 25 states that have set college graduation as the minimum standard for all teacher certification. Kentucky is one of the five states that have set five years of college training as the minimum basis for life extension of certificates.

Quantitative Standards Being Raised for Superintendents, Principals and Supervisors

An improved program of preparation and certification of school superintendents, principals and supervisors, based on an eight-year laboratory project has been adopted by the State Board of Education effective September 1, 1952. The over-all aim of this program is improvement of administrative leadership. The program is unique in that the professional, social and cultural competencies of these school leaders were determined by analyzing in actual school situations the scope of the responsibilities and functions of leaders in these positions. The program of preparation and certification designed to develop these necessary competencies was then determined cooperatively by representatives from college staffs, the state department representatives, superintendents, supervisors and teachers.

Qualitative Standards for all Teaching Personnel Being Improved

During the past two years a series of conferences have been held with representation from colleges, public school systems and the State Department of Education to consider ways to improve the quality of programs of preparation for all school personnel. This is encouraging since it is at the point of quality improvement of teacher preparation, pre-service and in-service, that improvement begins in the quality of teaching and learning programs.

Annual Study of Teacher Supply and Demand of Teachers

This division has participated in a Nation-wide study of teacher supply and demand annually during the last four years. This information has been a significant basis for a teacher recruitment program. Through the work of a state-wide committee on teacher recruitment the 33 colleges and the 232 school systems have cooperated with this division in a program of selective teacher recruitment. An evidence of the success of the program is reflected in the teacher supply and demand study. In 1948 in the 33 colleges in Kentucky, 1,368 prospective teachers completed the two-year or four-year teacher preparation program. This number has increased each year and in 1951 the number had increased to 2,311. The present college enrollments indicate that the supply of teachers will increase each year during the next four years. The gains made during the past four years have paved the way for future increases for the number of teachers becoming qualified annually.

Number of Regular Certificates Being Issued Annually During the Past Biennium Shows Improvement in the Supply of Fully Qualified Teachers

This improvement is reflected in Table X-te.

TABLE X-te

Number of Certificates Issued or Reissued

1939-40—1950-51

	Regular Certificates		Emergency Certificates		Totals
	Issued	Renewed	Issued	Renewed	
1939-40	2901	2600	.....	.....	5501
1940-41	2351	2356	53	.....	4740
1941-42	2255	2456	336	89	5156
1945-46	1671	1714	2378	2781	9544
1946-47	2765	1487	2339	3166	9757
1947-48	2266	1269	2259	3316	9110
1948-49	2414	1859	2100*	3417	9790
1949-50	2826	1988	1697	3526	10137
1950-51	2932	2030	1540	3349	9851

* This number includes approximately 900 for instructors on the Veteran Farmer Training Program, for substitute teachers and for teachers who replaced those who resigned in the spring to return to school.

Services of the Division Expanded Through the Employment of Additional Personnel

Within the last year a new position, the Supervisor of Certification, has been created in this division in order to improve services to the teaching personnel.

In-Service Teacher Education Accepted as Integral Part of the Total Program of Teacher Education

The 1950 Kentucky Legislature, upon recommendation of the State Department of Education, enacted a law providing for a state-wide in-service teacher education program and providing, also, funds for the inauguration of the program through the Division of Teacher Training and Certification. This Act may prove to be the most significant piece of educational legislation in a generation. The goal of the program is improvement of teaching through growth of all school leaders—all school personnel. It focuses upon the heart of the school program—the learning program for the child. This program was launched on a state-wide basis on July 1, 1950. A staff of five persons is now working throughout the state in carrying out this program. The program has been under way just one year, but the services provided have been received enthusiastically by total school staffs throughout Kentucky. There is sufficient evidence that the program is providing stimulation and guidance that are creating within the school personnel the desire to improve the quality of teaching and learning. The activities of the program during the past year include the following:

1. **Cooperation** with an in-service committee from each of the 33 teacher education institutions in the state.

2. **Assistance** given to approximately 75 superintendents in initiating and carrying out local in-service projects. These projects include: service in a testing program; meeting with a total school staff to help set up goals and objectives; assisting in curriculum development; aiding in other classroom and instructional problems.

3. **Co-sponsorship** with the University of Kentucky and other professional organizations in the state in planning and putting on a three weeks work-conference in June, 1951, for superintendents, principals and supervisors. Also, participation in numerous other school conferences, workshops and clinics.
4. **Co-sponsorship** with the Associated Public School Systems of a Citizenship Workshop in August, 1951, for superintendents, principals, supervisors and teachers.
5. **Aiding** educators to work more closely with their communities in developing a better understanding of the purposes of education and in developing a school program based on needs and resources of the community.
6. **Developing** curriculum guides cooperatively with representative committees from school staffs.
7. **Assisting** in developing and using a plan of evaluation, with an emphasis upon the use of a testing program only for the purpose of improving instruction.
8. **Serving** as consultants and advisers in any other services relative to the improvement of instruction when requested by school officials.
9. **Developing** cooperatively with the teacher training colleges and the public schools some general policies, objectives, and basic beliefs to serve as a guide at both the pre-service and in-service levels for the development of a state program of public education.

This program has focused the attention of school leaders upon educational administration—the primary purpose of any type of school administration. Classroom teachers are given guidance in modern practices based on latest research and are working together as total staffs, elementary and high school, for better ways to provide effective learning programs. This program has within it seeds of great promise and has placed Kentucky in a Nation-wide movement of in-service professional growth of all school personnel.

Leadership Responsibility in Many Phases of Education That Have Implications for Improved Teacher Education

The personnel of this Division including the six professional staff members have participated in and carried leadership responsibility in many types of professional organizations and programs as reflected in the following activities:

1. One member serves as secretary to the Council on Public Higher Education, the Advisory Committee and the Kentucky Cooperative Committee on Educational Administration.
2. Three staff members are members of the Kentucky Commission on Teacher Education and Professional Standards, with one being the chairman and another the secretary. All three members attended the regional conference of the National Commission on Teacher Education and Professional Standards, and one attended the National conference in 1950 and 1951.
3. Four staff members are participating members of ASCD; one is the State President of the organization, and one represents Kentucky on the National board of ASCD. Two members participated in the National conference of ASCD in 1951.

4. One staff member is a member of the National Association of State Directors of Teacher Education and Certification and attended the National conference in 1950 and 1951.

5. One member participated in the 1951 Southern States Workshop on Educational Problems held at Daytona Beach.

6. Three members are active participants on the State Committee on Elementary Education in cooperation with the Southern States Cooperative Study on Elementary Education. The State Committee participated in the production of **The Children's Charter**, being given wide distribution all over the Nation.

7. One member participated in the National Conference of the Educational Writers Institute.

8. One member participated in the Conference of Southern Leaders in Childhood Education.

9. One staff member has served as secretary to the State Committee on Moral and Spiritual Education and assisted in planning and developing the State Program on Moral and Spiritual Education and assisted in producing the following publications:

Moral and Spiritual Values in Education	January, 1950
Moral and Spiritual Values in Education	October, 1950

10. One member serves as chairman of the State Committee on Teacher Recruitment.

11. One member participated in the production of the following publications:

Education of Elementary School Personnel, 1951

The Southern Association's Cooperative Study in Elementary Education

Commission on Curricular Problems and Research
School Public Relations, 1951

Southern States Work-Conference on Educational Problems

12. The staff members of the In-Service Teacher Training Program sponsored a conference on the Citizenship Education Project conducted by ten staff members from Columbia University.

13. One staff member has annually during the biennium served as co-consultant in the development of study-group conferences for the district meetings of the Fourth District Education Association and for the Middle Cumberland District Education Association, and served as co-author of two State Department bulletins describing these conferences. They are:

Toward Better Teaching
Reporting On A 1950 Fall Conference

14. One staff member has produced and released during the biennium the following Teacher Education Circulars containing research on many phases of teacher education:

Report on the Teacher Shortage for School Year 1949-50

The Challenge of the One-Teacher Schools

Training of Elementary and Secondary Teachers in Kentucky for School Year 1949-1950

Reporting on Teacher Shortage During the School Year 1950-1951

Higher Education in Kentucky

Training of Elementary and Secondary Teachers in Kentucky School Year 1950-1951

A Report on the National Conference on Evaluation Criteria For Teacher Education Programs

15. The In-Service staff members produced and released one In-Service Teacher Education Report and the following State Department bulletins:

    Improving Instruction through In-Service Training
    Promising Practices in Kentucky Schools

16. One member has served as a consultant to the State Committee on Kindergarten Programs and assisted in the publication entitled **A Kindergarten Guide.**

Higher salary, higher professional standards and high professional morale go hand in hand. This Division has devoted its energies to the improvement of the total program of education through development of high quantitative and qualitative standards and through the stimulation of higher professional morale. This is teacher welfare on a plane that will result in better services to the public and eventually in salaries commensurate with the quality of services society demands of education in today's world.

DIVISION OF FREE TEXTBOOKS

Free Textbook Law

The free textbook law was enacted by the General Assembly of Kentucky in 1928. It remained inoperative until 1934 because appropriations for the purchase of free textbooks were not made by the State Legislature. The appropriation act of 1934 provided $500,000.00 per annum for the Division of Free Textbooks. In 1950 the annual appropriation for free textbooks was increased to $735,000.00.

Annual Textbook Purchases

For textbook purchases the elementary subjects have been divided into two major categories—required and optional subjects. The first purchases of free textbooks shall be for the required subjects. If funds are available after textbooks have been purchased for the required subjects, additional textbooks will be purchased for the optional subjects.

The number of books that are purchased annually is determined by the amount of money available, the number of books requisitioned, and the cost of the books. The cost of textbooks varies by subjects and grades.

The table below includes the annual expenditures for free textbooks, the number of books purchased each year, the elementary grade enrollment of pupils, and the grades for which books were supplied. In part this table has been used in previous biennial reports. It was supplemented by the Legislative Research Commission in 1949.

TABLE XI-ft

Textbook Expenditures, Grade Enrollment, Etc.

School Year	Annual Expenditures		No. Books Purchased	Ele. Grade Enrollment		Grades Supplied
1934-35	$455,582.94		1,333,402	529,210		1-4
1935-36	519,241.20		1,093,316	523,535		1-5
1936-37	484,618.68		1,041,952	515,270		1-6
1937-38	485,495.01		1,161,533	491,337		1-6

(6) Bulletin 1948-49, page 708.

Annual Number of Textbook Orders

The Division of Free Textbooks placed 10,152 orders for free textbooks with the publishers for the school year of 1945-46. From 1945 to 1951 the annual average number of book orders was 4,177. The placement of book orders ranged from April 9 until March 19 of the following year.

TABLE XII-ft

Number of Textbook Orders

School Year	No. Book Orders	Unpaid Orders on June 1st	Per Cent Unpaid Orders	Unpaid Amount on June 1st
1945-46	10,152*	186	1.8%	$53,647.53
1946-47	2,875	40	1.4%	4,150.65
1947-48	3,419	30	.9%	5,794.63
1948-49	3,347	168	4.4%	19,812.85
1949-50	3,277	1	.03%	109.05
1950-51	1,991	0	0	0
Average	4,177	71	1.42%	13,919.12

* The unused textbook appropriation for 1944-45 was carried over and used in 1945-46.

The Cost of Free Textbooks by Grades

At the 1950-1955 adoption prices the cost for one set of books for the required subjects per pupil will average $8.00 per grade and $2.34 per grade for the optional subjects allowing two books per pupil enrolled or a total of $10.34 per pupil. The present textbook appropriation that is available for book purchases for each pupil enrolled in the elementary grades is around $1.50. This means almost 7 years will be required to provide each pupil with one set of books for the required subjects and two books for the optional subjects.

TABLE XIII-ft

Present Cost of Textbooks for Required Subjects

Elementary Grades	Book Cost by Grades	Enrollment by Grades[1]	Total Cost by Grades[2]
Grade 1	$ 2.97	87.535	$ 259,978.95
Grade 2	2.94	66,945	196,818.30
Grade 3	6.51	62,711	408,248.61
Grade 4	9.00	60,933	548,397.00
Grade 5	9.60	55,770	535,392.00
Grade 6	9.81	50,703	497,396.43
Grade 7	11.55	43,757	505,393.35
Grade 8	11.64	40,009	465,704.76
Total	$64.02	468,363	$3,417,329.40

[1] Pupil enrollment as of June 30, 1950.

[2] For the five-year period each pupil on the average will need 1.4 sets of textbooks.

TABLE XIV-ft

Present Cost of Textbooks for Optional Subjects

Elementary Grades	Book Cost by Grades[1]	Enrollment by Grades[2]	Total Cost by Grades
Grade 1	$ 1.77	87,535	$ 154,936.95
Grade 2	1.74	66,945	116,484.30
Grade 3	2.16	62,711	135,455.76
Grade 4	2.34	60,933	142,583.22
Grade 5	2.46	55,770	137,194.20

Grade 7	2.63	43,757	115,080.91
Grade 8	2.67	40,009	106,824.03
Total	$18.69	468,363	$1,056,612.13

[1] Two books per grade at the average cost.

[2] Pupil enrollment as of June 30, 1950.

Textbook Sales and Fines

For the textbooks sold, lost, destroyed, and damaged money for sales and fines is collected by the local school districts. All money collected as sales and fines by the local school districts shall be turned into the general fund of the State. In the table below is listed by years the amount collected for sales and fines.

TABLE XV-ft

Textbook Sales and Fines by School Years

School Year	Amount	School Year	Amount
1934-35	$1,438.98	1943-44	$2,765.86
1935-36	3,773.21*	1944-45	2,009.05
1936-37	.....	1945-46	1,927.46
1937-38	1,842.47	1946-47	2,146.99
1938-39	1,701.62	1947-48	2,353.00
1939-40	2,830.39	1948-49	3,277.62
1940-41	2,135.89	1949-50	2,744.89
1941-42	1,642.64	1950-51	4,041.48
1942-43	1,234.60	Average	2,227.42

* It appears that the collections for 1935-1936 and 1936-1937 were combined.

DIVISION OF SPECIAL EDUCATION FOR HANDICAPPED CHILDREN
1949-51

In a society committed to the democratic principle of equal educational opportunity for all children, a State program of special education for children with physical and mental handicaps represents a forward step in the total educational program. The aim of the Division of Special Education for Handicapped Children is to promote improved and adequate educational opportunity for **all** educable handicapped children. This aim is best achieved through effective guidance and service to the local district.

All school personnel responsible for exceptional children must be concerned with (1) the discovery of handicapping problems, (2) medical diagnosis and treatment, (3) curriculum and methods, (4) special instructional materials and equipment, (5) individual guidance, and (6) vocational counsel and vocational training. Continuous consideration of these facets of a developmental program of special education facilities is of vital importance in providing educational opportunity appropriate to the individual and group needs of handicapped children.

Identification of Handicapped Children

Special education facilities will be materially developed and improved when **all** children with physical and mental handicaps are recognized. Census reports on handicapped children in Kentucky, when compared to national ratios, do not indicate the total number of handicapped children living in the Commonwealth.

The following figures, based upon 1949-50 reports from 171 of the 236 school districts, indicate the number of handicapped children known to local school attendance personnel:

Type Handicap	Race	Enrolled in School	Not Enrolled in School	TOTAL
Mentally Retarded	White	688	652	1,340
	Negro	144	35	179
All Physical Handicaps	White	3,139	1,393	4,532
	Negro	264	30	294
TOTAL		4,235	2,110	6,345

Services at State and local levels have shown steady growth during the biennium.

Significant Results

Types of Handicap Enrolled in Special Education Facilities	Average Daily Membership 1949-50	Average Daily Membership 1950-51
Partially Seeing	104.19	111.94*
Deaf and Hard of Hearing	36.60	52.36*
Mentally Retarded	541.15	356.04
Speech Impaired	324.00	706.00
Physically Handicapped (Home and Hospital)	212.99	357.641
Crippled (Special classes)	196.40	123.37
TOTAL	1,415.33	1,707.351

*—11.55 average daily membership (Lexington), individual instruction and special instructional materials provided in regular classes.

It is worthy of note that 9 independent school districts and 12 county school districts participated in the reimbursement program in 1949-50. Nine (9) independent school districts and 14 county school districts received reimbursement in 1950-51. Although this is only an increase of 2 districts, the average daily membership increased by 292.021 children during the same period.

Participating Personnel

According to applications for approval of special education facilities, the number of special education teachers employed during the two-year period is indicated by the following:

	1949-50	1950-51
Teachers of partially seeing	8	8
Teachers of deaf and hard of hearing	4	7
Teachers of mentally retarded	27	23
Teachers of speech impaired	4	7
Teachers in home and hospital	32	39
Teachers of crippled children classes	7	10
TOTAL	82	94

In 1949-50, 14 of the 82 teachers instructing handicapped children were employed on a part-time basis while 16 of the 94 teachers in 1950-51 were employed on a part-time basis to instruct children with handicaps.

During this two year period, the special education staff assisted local school administrators in evaluating the needs of children with handicaps. Divisional personnel determined, in consultation and cooperation with local school authorities and citizen groups, the advisability of developing special facilities. In addition, assistance was given to local teachers in planning and carrying out adapted programs within the regular classrooms.

Reimbursement of Excess Costs

Local school districts may claim reimbursement for the **excess cost** of special education facilities, as described in the 1948 Special Education Act. The biennial appropriation has not been sufficient to pay the total

excess costs. Had reimbursement been made in full accordance with the Act, the total claims would have far exceeded the amount that could be alloted for reimbursement purposes. Reimbursement has been **pro-rated** on a **percentage basis,** using the excess cost of teachers' salaries as the factor of reimbursement for the biennium.

Twenty-seven (27) school districts made excess cost claims on special education teachers' salaries and received proportional reimbursement in the following amounts:

District	1949-50 Claims	1949-50 37.95% Reimbursement	1950-51 Claims	1950-51 22.85% Reimbursement
Independent				
Ashland	$ 503.78	$ 200.49	$ 1,751.17	$ 400.14
Bowling Green	62.96	25.05	61.51	14.06
Cold Spring	12.66	5.03	(No program)	
Corbin	133.97	53.31	122.09	27.90

Spencer	1,037.44	412.86	1,066.68	243.74
Warren	187.68	74.69	955.00	218.22
Whitley	(No program)		1,861.39	425.33
TOTAL	$69,866.17	$27,804.52	$109,939.88	$25,121.26

Teacher Training and Certification

A Teacher Training Conference for Teachers of Exceptional (handicapped) Children was co-sponsored by the University of Kentucky, the State Department of Education, and the Kentucky Society for Crippled Children, during the 1951 summer session. The Kentucky Society for Crippled Children made available a grant of $1,000.00 for instructors' salaries. Twenty-six (26) teachers from twelve (12) school districts were enrolled.

Regulations governing the certification of teachers of exceptional (handicapped) children were cooperatively developed by the Division of Teacher Education and Certification and the Division of Education for Exceptional Children. Adoption by the State Board of Education was made official in June 1951.

Cooperating Agencies

Securing adequate services for handicapped children educationally requires a wholesome and effective working relationship between related agencies. The cooperation of the Kentucky Crippled Children Commission, the State Health Department in hearing conservation, the University of Kentucky Speech Clinic, local Health Departments, and the Department of Welfare have contributed immeasurably to the program of education for children with handicaps.

In addition, a number of private agencies and organizations have actively assisted handicapped children in various ways. Among them are the Lions, Rotary, and Kiwanis Clubs, the Kentucky Congress of Parents and Teachers with its affiliated local units, the Kentucky Society for Crippled Children and its county units, and others.

Future Needs

Among the most pressing of the needs in the educational program for handicapped children are:

1. Improved means of identification, classification, and school placement.
2. Improved training programs of teacher education for special education teachers.
3. Increased State appropriations to pay anticipated excess costs, to provide additional supervisory staff at the State level, and to extend the program of special education to create equal educational opportunity to all educable handicapped children.

BUREAU OF VOCATIONAL EDUCATION
INTRODUCTORY STATEMENT

The readjustment in the economic and social life of the country which was felt so keenly during the first two years after the ending of World War II has been no less significant during the two years ending June 30, 1951. The continued relatively high salary level, the high cost of labor, and the high cost of consumer's goods have had a definite effect upon the daily lives of people.

The continued development and improvement in machines, those used in the home, on farms, and in industry, has created a demand for workers with new skills and for the up-grading of skilled workers with experience. Improved practices in agriculture continue to undergo changes as research reveals more efficient production practices. These expected developments made it necessary for the people of the country to reorganize their daily lives and to make the necessary adjustments in their ways of doing things.

Changes in the economic and social life of a country and its people make it quite necessary that the Nation's program of education be reorganized and readjusted to offer the instruction needed so that the Nation's workers in all fields may be equipped to work efficiently and effectively in the new scheme of things. Ideally, the schools should be equipped, not only to make these readjustments in curricular offerings, but to look into the future, conduct as much research as possible, and anticipate further developments in the way of life in the years ahead.

The demand for reorganizing and readjusting the curricular offerings has been especially experienced in the field of vocational education. The continued rise in farm prices was accompanied by the rising cost of production. The cost of consumer's goods made it quite necessary that homemakers re-evaluate their plans and programs.

The threat of world war caused a continued demand for the training of skilled workers. These and other developments placed a heavy responsibility, as well as an opportunity, upon the workers in vocational education in all services.

The new Agricultural and Industrial Development Board and other forces did much to get new industries to establish plants and factories in the State during the biennium. Several such plants which have been established and are being developed in the State in connection with the defense program have created a demand for thousands of skilled workers to man the machines and working stations in order that the finished products might be turned out. These developments have created an urgent and immediate demand for skilled workers and have placed a heavy load upon the area vocational trade schools throughout the State, and especially upon the schools in the areas where these plants have been located. During the biennium, the area vocational trade schools utilized every facility at their disposal to meet this demand insofar as possible. These facilities included classrooms, laboratories, and shop space as well as instructional personnel. Instruction was offered in the schools in day classes, afternoon, evening, and part-time classes, as well as extension classes in nearby centers. The program of adult education carried forward under the direction of personnel of the Bureau of Vocational Education underwent its greatest expansion and rendered the greatest service in the history of vocational education during the biennium.

The program of education for veterans as authorized under the G. I. Bill of Rights was, of course, the most significant part of this program of education for adults. The numbers of veterans receiving instruction and other pertinent information concerning this instruction for veterans will be explained in the reports of the various divisions of the Bureau of Vocational Education.

Urgent requests for additional departments of vocational agriculture and vocational home economics in the high schools of the State continued to come to the department during the biennium. Requests for the expansion of the instructional offerings in trade and industrial education also continued to be urgent for reasons outlined above. Lack of funds made it impossible to grant these requests. However, through careful planning, three or four additional departments of vocational agriculture were opened.

Insofar as possible, plans have been made during the biennium to meet the expected impact of readjustment which will be necessary as the program of education for veterans decreases in scope.

The program of the division of vocational rehabilitation was completely revised during the biennium and insofar as possible geared to meet the immediate needs of persons needing rehabilitation. This revised program was approved by State and Federal authorities and put into immediate operation. Considering the funds and consequently the personnel available, this program rendered its most efficient service and reached the largest number of persons since its establishment. Numerous requests from persons needing and deserving rehabilitation indicate the need for the further expansion of this program.

As a result of the experience and in-service training of personnel, the National School Lunch Program rendered the most effective service during the biennium since it became a significant part of the public school system. The number of schools participating and the number of pupils served continued to increase. The increased efficiency of school lunch personnel was enhanced by the addition of greatly improved and expanded physical facilities and equipment, so that this program became a still more significant part of the total school program during the biennium.

The foregoing introductory statement has intentionally been made brief due to the fact that the programs of the various divisions of the Bureau of Vocational Education will follow and give in more detail the services rendered, the persons reached, and the total program of the bureau.

AGRICULTURAL EDUCATION

The Division of Agricultural Education in the Bureau of Vocational Education is charged with the responsibility of the agricultural education program in Kentucky on the state level.

Vocational education in agriculture is concerned with instruction for four groups, namely; high-school farm boys, out-of-school young men on farms, adult farmers, and veterans of World War II who have entered the vocation of farming.

The number of people receiving instruction in agricultural education during the four-year period is shown in the table below.

TABLE I-ve

Number of Persons Enrolled in Programs of Vocational Agriculture

	All-Day		Young Farmer		Adult Farmer		Veterans		
Year	No. Depts.	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	Total Enrol.
1947-48	226	8,123	125	2,340	141	2,746	505	12,295	25,522
1948-49	233	9,427	163	2-611	178	2,993	635	14,978	30,009
1949-50	232	10,053	182	2,651	193	3,036	742	18,045	33,875
1950-51	236	10,699	200	2,683	215	3,171	605	13,895	30,488

Table I-ve shows the gradual increase in enrollment in the high-school classes; it also shows the expansion of the young and adult farmer classes.

The program of vocational education in agriculture is financed by federal, state, and local funds. The table below shows the amount of money expended from each of these sources.

TABLE II-ve

Expenditures for Vocational Agriculture
1947-1951

	Regular Program				Veteran Program	Grand Total All Programs
Year	Federal	State	Local	Total	Federal	Federal, State and Local
1947-48	$370,474	$ 81,189	$383,947	$835,610	$1,751,688	$2,587,298
1948-49	371,304	85,569	373,326	830,199	2,687,220	3,517,419
1949-50	372,264	104,686	399,764	876,714	3,347,169	4,223,883
1950-51	372,150	96,562	449,382	918,094	3,257,247	4,175,341

The effectiveness of the program of vocational education in agriculture has been demonstrated by the improvement in the total farming programs of those enrolled in organized classes of instruction. Probably the most striking examples can be cited in the institutional on-farm training program. A few studies of individual classes have been made which show that the increased total incomes from the farm have been doubled and in some cases more than tripled. The farm homes have shown like improvement. The institutional on-farm training program has been largely responsible for bringing about a complete change in the farming in many communities throughout the State. Improved pastures and better livestock are the rule rather than the exception on the farms of persons enrolled in this program.

The high-school boy program has improved in effectiveness, particularly in the leadership phase. For the past three years a leadership training course for one full week has been conducted at Hardinsburg, Kentucky, at the F.F.A. state camp. This program has been set up to train the Future Farmers of America officers for each chapter. The results of this training are being reflected in the excellent job being done by the local F.F.A. chapters throughout the State.

During the past year the F.F.A. members have built a $40,000 swimming pool at the camp and have made plans for permanent improvements at the camp over a period of years which would result in a new auditorium, kitchen, and cottages. This would permit the camp to be used over a longer period during the year and by many educational and farm groups. The financing of this program to date has been done by the boys themselves.

The program of agricultural education in some phase is now being carried on in all but four of the 120 counties. The four counties that do not have programs of vocational agriculture are Harlan, Knott, Letcher, and Martin.

HOME ECONOMICS EDUCATION

1949-50 — 1950-51

The program of vocational home economics has as its goal to improve personal, home, and family living through the training of youth and adults for the vocation of homemaking. The program serves in-school groups through high-school classes, the home project program, the home economics student organizations (FHA and NHA for white and Negro home economics pupils, respectively) and through school lunch educational activities. The program serves out-of-school groups through individual help and organized group instruction for young women and adult homemakers and through food conservation courses held in the school community canneries. Table No. IV-ve shows the number of all-day departments, young adult programs, adult programs, and food conservation adult courses together with the enrollment during the past two years.

TABLE IV-ve

Shows the Number of All-Day Departments, Young Adult Programs, and Adult Programs in Home Economics, and Food Conservation Adult Courses, and Enrollment, by Years

	1949-50		1950-51	
	No. of Depts. or Programs	Enrollment	No. of Depts. or Programs	Enrollment
All-Day Departments	264	14,837	260	15,537
Young Adult Programs	51	850	37	571
Adult Programs	63	1,176	60	1,061
Food Conservation Adult Courses	71	12,798	57	9,097
	Total	29,661	Total	26,266

The number of departments showed a decrease of six during the biennium due to the consolidation of several schools and to an insufficient supply of home economics teachers. Because of salary increases and no increase in the amount of funds available for reimbursement, other departments could not be established. Even though the number of departments showed a decrease, the enrollment in the all-day departments showed an increase each year of the biennium. The number of departments offering courses in Food Conservation for adults decreased each year of the biennium due to the closing of a number of the school community canneries as equipment became worn out and space was needed for other school activities.

During each year of the biennium help has been given to teachers in departments reimbursed with vocational funds and to many non-reimbursed home economics departments in the State. This help included visits to schools, individual and small group conferences with teachers, larger group conferences, the preparation of and making available to teachers mimeographed materials, the planning of suggested layouts for home economics departments, and analyzing plans of teachers and making suggestions to them.

There has been increased participation of teachers in planning the type of help needed from the State Staff. The staff has worked in cooperation with district organizations of home economics teachers in giving help to them on various parts of the program as requested by them. During the first year of the biennium one district was divided into two districts because of travel difficulties, making a total of eleven district organizations. The presidents of these district organizations have met together with members of the State Staff each year of the biennium for the purposes of planning the district work for the year and requesting the help which was desired from the State Staff.

A program of curriculum revision received major emphasis during the biennium. Early in the year 1949-50 a conference of the home economics teacher education group focused its attention on planning steps to take in the revision of the home economics curriculum guide. This group working with a program planning specialist from the U. S. Office of Education discussed the basic needs of adolescents and made plans for eight district conferences which were held for teachers later in the year. At these conferences teachers set up their tentative beliefs concerning the homemaking education program and were helped to understand the basic needs of adolescents and the implications of these needs to the teaching of home economics. Teacher trainers from various state colleges assisted with these conferences. During August 1950 a State Conference was held at the FFA Camp in Hardinsburg. Attention at this conference was focused on ways of recognizing pupil needs and planning activities that would help to meet these needs. During the fall of 1950 meetings of the district organizations worked further on this problem as a follow-up to the State Conference. At the State Conference for Negro home economics teachers held at Kentucky State College during the year 1950-51, help was given to the teachers on securing a better understanding of the developmental needs of adolescents and on the implications of these needs to the teaching of home economics. These teachers also stated their beliefs concerning the home economics education program.

During the year a curriculum guide steering committee was formed with representation on this committee from teachers, teacher trainers, the University of Kentucky, and the State Department Staff. This committee determined next steps to be taken in the curriculum revision program. At spring district meetings of home economics teachers, members of the State Staff secured the opinion of teachers on a number of questions relative to the preparation of the curriculum guide. These opinions served as a basis for the work that was done at a curriculum workshop held at the University during the summer of 1951. Members of the State Staff assisted with this workshop at which unit suggestions were developed in all areas of the homemaking program.

The district organizations selected the improvement of home projects as the common problem to work on throughout the State during the first year of the biennium. Members of the State Staff worked with these districts in having conferences in each of the eleven districts for the purpose of giving help on home projects. Through role playing, teachers within the districts demonstrated several types of conferences held with pupils on home project work. Members of the State Staff helped in analyzing the demonstrations and pointing out factors that would help improve home project work. During the year 1949-50 there were 29,867 home

projects carried on by home economics pupils, and during the year 1950-51 there were 31,442 home projects carried on by home economics pupils. These projects were distributed throughout the various areas of homemaking.

The home economics student organizations (FHA and NHA for white and Negro home economics pupils, respectively) have shown progress during the biennium. During 1949-50 there were 196 FHA chapters in the State with a membership of 7,730, while in 1950-51 there were 200 chapters with a membership of 8,510. Leadership training has been given through meetings of the State Executive Council during both years and through meetings of the district presidents and their advisers each year. Two district meetings in each of the eleven FHA districts have been held each year of the biennium.

From June 2-4, 1950 a State FHA meeting was held at Western State College in Bowling Green with 500 advisers and girls from 126 chapters attending. This meeting highlighted the first four purposes of the organization all of which pertain to the improvement of homes and family living. From June 1-3, 1951 a State FHA meeting was held at Morehead State College with approximately 525 advisers and girls from 136 chapters attending. Attention was focused at this meeting upon learning more about the organization and creating more interest in home economics. In July 1949 over 100 FHA members and advisers attended the regional meeting held in Columbus, Ohio. During June 1950, 56 FHA members and advisers from Kentucky attended the National FHA meeting held in Kansas City, Missouri. A number of the Kentucky group participated in each of these meetings.

Individual development of members is encouraged through a degrees program. During the biennium the process of selecting girls who will receive the State Homemaker Degree has been improved by changing the procedure so that it will more nearly conform to good principles of evaluation. Progress has been made in having girls set their own goals for work toward this degree and in having them participate in determining whether or not these goals have been reached. In 1950, 41 girls received the State Homemaker Degree and in 1951, 65 girls received this degree. The FHA Honor Roll plan is one in which chapters meeting requirements for a good one are given recognition. During 1949-50, 71 chapters were Honor Roll chapters. The requirements were changed so as to be more difficult and thirty-five chapters met the requirements for the Honor Roll during the year 1950-51. As a project of the State Association four FHA scholarships of $125.00 each were given in 1950 and five in 1951 to outstanding FHA members who were to continue their study of home economics in a four-year college in Kentucky. Each year two of these scholarships were made possible through a gift to the organization by a former home economics teacher. The other scholarships were made possible through voluntary contributions to this fund from FHA chapters in the State. Local FHA chapters have carried out numerous activities to promote good recreation, to create interest in home economics and FHA, to promote international good will, to render service to their schools and communities, and to improve their own homes and family living.

Emphasis was given during the biennium to improvement of the NHA. At the State Conference for Negro home economics teachers held in the fall of 1949 attention was focused on some problems of serving as advisers to the NHA, such as interpreting the Honor Roll plan, setting up

chapter programs of work, and preparing an NHA bulletin to be sent to all chapters. Time was also spent at the State Conference in February 1951 on problems teachers were having in working with the NHA program. During each year of the biennium three district meetings were held in the State. In June, 1950 a State meeting was held at Kentucky State College with 15 chapters represented by 56 persons including chapter members and advisers. The theme of this State meeting was "Building a Strong NHA Organization." In April 1951 a state meeting was held at Kentucky State College with 18 chapters represented by 62 members and advisers. The theme of this meeting was "Building Today for Better Living Tomorrow." In June 1950 the Kentucky Association was represented at the National meeting in Scotlandville, Louisiana by 5 NHA members, 2 local advisers, and the teacher trainer from Kentucky State College. In June 1951 the Kentucky Association was represented at the National meeting which was held in West Virginia by 6 NHA members, 2 local advisers, and the teacher trainer from Kentucky State College. At each of these meetings the Kentucky group participated in the program.

During the year 1949-50 there were 24 NHA chapters with 609 members, while during the year 1950-51 there were 24 chapters with 762 members. The work of the local chapter has included numerous activities that promote individual growth, promote better home living, provide wholesome recreation, give service to the school, community, State and Nation, and observe NHA Week. In 1950, four chapters were named Honor Roll chapters and in 1951, two chapters were recognized as Honor Roll chapters.

Through a survey an effort was made during the second year of the biennium to find out the difficulties teachers were having with adult programs and helps which they desired on this part of their program. Since this survey revealed that teachers needed more help on planning units and lessons for adult groups, two bulletins (one on safety in the home and the other on handicrafts for homemakers) were prepared. These bulletins were developed by a State Staff member working jointly with some teachers in the State who were teaching these units to adult groups. Thirteen small group conferences were held to interpret these bulletins to the teachers and to discuss with them ways of working with adult groups. This same type of help was given to Negro home economics teachers at the State Conference held in February 1951.

Work has been continued during the biennium on the Food Conservation Program. This work has been carried on jointly with the agricultural education division. In July 1949, four two-day conferences were held in various sections of the State for beginning cannery instructors and teachers of home economics and agriculture who had not had experience in teaching in a cannery. In the early fall of 1950, five one-day conferences on the conversion of the cannery for canning in glass were held in different sections of the State. At this time demonstrations and explanations were given of ways of converting some of the cannery equipment for glass canning.

During the year 1950-51 a survey was made of available and needed equipment, of availability of special teachers, and of the training and experience of special teachers and teachers of home economics and agriculture in centers where canneries had been established. Findings of this study were analyzed and plans made for next steps in working with the cannery program in light of these findings. In June 1951, three one-day conferences were held in various parts of the State for the purpose of becoming acquainted with new equipment available for community can-

ning centers and new techniques of canning. Canning in glass was again demonstrated and discussed at these meetings.

During 1949-50 reports from 90 canneries showed that nearly 13,000 families used the cannery for the canning of 677,989 quarts of fruits, vegetables and meat, the rendering of 77,585 lbs. of lard and the processing of 20,526 lbs. of sausage. During 1950-51 reports from 59 canneries showed that 8,205 families used the canneries to can 380,456 quarts of fruits, vegetables and meat, and rendering 43,761 lbs. of lard. The decrease in the number of families using the canneries and in the amount of food processed has been partly due to the closing of a number of the canneries and insufficient facilities in other canneries.

SCHOOL LUNCH PROGRAM

1949-50 and 1950-51

The National School Lunch Act passed in 1946 designated state departments of education as the agency to administer and supervise the school lunch program on the state level. In Kentucky the administration and supervision has been under the direction of the division of home economics education. A staff of a supervisor of school lunch accounting and three area supervisors worked under the direction of the director of home economics education. The school lunch program has as its goal to improve the nutritional status of children in Kentucky by providing adequate lunches and encouraging the formation of good food habits. The program serves public, parochial, and non-profit private schools of the elementary and secondary levels.

Local, state and Federal funds were used to operate the school lunch programs in Kentucky. According to the agreement with the U. S. Department of Agriculture, in 1949-50 Federal funds were matched dollar for dollar with state or local funds. In 1950-51 each Federal dollar was matched with at least $1.50 from state and local funds. State funds made available in the amount of $40,000.00 per year by the state legislature for administration and supervision on the state level were used as part of the matching funds. Other sources of funds for matching purposes were: (a) school district appropriations, (b) non-government cash contributions, (c) payments by children for lunches, and (d) money value of donated goods and services.

During both years of the biennium the school lunch program has expanded greatly as shown by the following table:

TABLE V-sl

Reimbursement Received Each Year For School Lunch Programs, Number Of Schools Receiving Reimbursement and Number of Children Participating During the Peak Month of Operation

Year	Amount of Reimbursement	No. of Schools Receiving Reimbursement	Children Participating*
1947-48	$1,943,296.00	1,053	158,516
1948-49	1,972,025.58	1,088	167,167
1949-50	2,156,621.16	1,141	182,000
1950-51	2,223,274.01	1,229	219,583

* These figures represent the children participating during the month of highest state participation.

During both years of the biennium emphasis has been given to increasing the pupil participation in the schools having the National School Lunch Program. In 1950-51, 23% of the schools in Kentucky participated in the National School Lunch Program as compared with 20.8% in 1949-50. The total pupil participation in 1950-51 was 20% greater than in the preceding year. In 1949-50, 62% of the children in the schools with a school lunch program participated in the program and in 1950-51 the participation increased to 65%. During visits made to schools having a small participation, supervisors helped in analyzing reasons for lack of participation and in suggesting ways for increasing participation. Some of the reasons found most often for lack of participation were unattractive meals, nic-nacs available in the school or near the school grounds, high prices for meals and unattractive lunch rooms.

During the biennium emphasis has also been given to improving the quality of meals served to children. In 1949-50, thirty county conferences were held reaching approximately 662 school lunch workers. At each conference demonstrations were given on the use of dried milk, dried eggs, tomato paste, peanut butter, and peaches since each of these foods was made available to schools through the Direct Distribution Program of the United States Department of Agriculture. In 1950-51, eleven county conferences were held to give help on improving the quality and attractiveness of meals through the use of Direct Distribution foods and leftovers. A series of sixteen conferences also was held in cooperation with the U. S. Department of Interior, Fish and Wild Life Service, on the use of fish in the school lunch menu.

Each year of the biennium workshops have been held on college campuses for school lunch workers. These workshops have been five days in length and were designed to give help to the school lunch workers on the preparation and serving of adequate and attractive meals and on managing time and energy in preparing meals. One hundred and seventy-six school lunch workers attended the three workshops scheduled in 1949-50 and 268 attended the five held in 1950-51. One of the workshops in 1950-51 was limited to persons who had attended school lunch workshops in previous years. More advanced work was presented at this workshop. Members of the college home economics staff at each of the colleges where workshops were held assisted members of the state school lunch supervisory staff in conducting the workshops. In addition to the workshops held on the campuses, three other workshops of two to four days in length were held in other areas of the state for the purpose of giving help to school lunch workers on their problems. In these three workshops 246 school lunch workers received help on their problems.

Additional help on menu planning and preparation of food was also provided through a monthly publication prepared and mailed to schools.

During the biennium 814 schools were visited by area supervisors. While visiting these schools help was given on problems relative to planning menus, analyzing expenditures, using Direct Distribution foods to cut costs, and making lunch rooms more sanitary and convenient.

A study of reports of visits made in 1950-51 by area supervisors showed the following:

a. Approximately one-third of the schools had 75% or more of the pupils participating in the program.

b. Two-thirds of the schools were spending 60% or more of the income for food.

c. Three-fourths of the schools were spending 30% or less of the income for labor.

d. Foods being served in insufficient amounts most frequently were butter and meat.

e. Seventy per cent of schools were making good use of plentiful foods.

f. More than one-half of the schools had inadequate equipment for the program.

g. Sixty-five per cent of the schools made the lunch program an integral part of the total education program.

A study was undertaken in the winter of 1951 to give an insight into the cost involved in serving Type A Meals. Ten representative schools were selected and asked to keep a daily record of meal cost for a period of two months. The data supplied by the ten schools were used in determining the average cost of meals served at each school and the percentage of income used for food, labor, and all other items for each school and the average for all ten schools. The average percentage of total income used for food, labor and all other items was 65.2%, 21.8% and 7%, respectively. The remaining 3% was kept in reserve for future expenses. The average cost of meals in which Direct Distribution foods were used was $0.224. When the cost of meals was figured without using Direct Distribution foods the average cost was $0.279.

Making the lunch program a part of the total educational program has received emphasis during the biennium. A study of the ways teachers have used the school lunch program as an educational activity in schools visited shows the following: (a) pupils helped plan menus and make market orders, (b) classes in home economics taught nutrition to elementary children, (c) chapel and radio programs were built around a good school lunch for children, (d) the lunch room was used as a laboratory for practicing what was learned in class room, such as table manners, wise selection of foods, and methods of sanitizing dishes and utensils, and (e) classroom activities were correlated with lunch program in such ways as carrying on rat feeding experiments, weighing regularly and recording gains or losses, and keeping records of income and expenditures.

At the beginning of the 1949-50 fiscal year the Direct Distribution program was transferred from the State Department of Education to the State Department of Agriculture. During the biennium school lunch supervisors gave help to schools in making good use of commodities donated by the U. S. Department of Agriculture and distributed in the state by the State Department of Agriculture.

DIVISION OF TRADE AND INDUSTRIAL
and
DISTRIBUTIVE EDUCATION

1949-1950 — 1950-1951

Trade and Industrial Education

Training youth and adults for jobs in industries has progressed very favorably during this biennium. Some additional shops have been added to provide training for full-time students.

There has been a general increase in numbers of apprentices attending the trade schools in part-time classes for related subjects to receive training needed in their trades. Evening courses are offered for mechanics, foremen and supervisors who need supplementary training in their daily work. One important development in this field of Vocational Training was the organization of courses for school custodians. Approximately 250 janitors attended conferences at the Area Trade Schools for the purpose of improving their knowledge and skills in the very important position of school custodian. Itinerant instructors are employed to train firemen at their respective fire departments. Electric linemen instructors serve the training needs of R.E.A. workers. They travel over the State and hold classes at the various centers.

TABLE No. VI-t & i

Number of Students in Trade and Industrial Classes

Years	Day Trade	Part-Time	Evening	Full-Time Veterans	Part-Time Veterans	Totals
1949-50.....	1997	0	3093	1375	1590	8055
1950-51.....	2009	699	4638	1456	491	9293

General Industrial Education, usually termed Industrial Arts, is carried on in high school shops. This type of training is not vocational in the sense that it prepares boys to enter specific occupations. It is general industrial skill training and is considered a part of general education. There are 139 Industrial Arts Shops in the high schools at this time. However, some progress has been made during this biennium but 38 additional shops should be added in the near future so that all urban high schools should have General Industrial Shops. High-school students should be given an understanding of trade skills which are so important in this industrial age.

Distributive Occupations Education

Distributive Education is designed to provide vocational training to workers in retail and wholesale business. Two types of classes are offered as follows:

1. Cooperative part-time classes for high-school students working half time and attending school half time.
2. Evening classes for employed workers who wish to improve their skills and knowledge in distributive occupations.

One outstanding program has been in operation this biennium. It is the training of distributive workers in Tourist Courtesy Courses.

TABLE VII-do

Number of Students in Distributive Occupations Education Classes

Years	Part-Time Cooperative	Part-Time Extension	Evening	Veterans	Totals
1949-50	859	5010	1424	15	7308
1950-51	712	1613	3982	12	6319

Area Vocational Schools

Kentucky has thirteen Area Vocational Schools where training is carried on in the fields of Trade and Industrial and Distributive Education. The Mayo State Vocational School at Paintsville, Kentucky; the Northern Kentucky State Vocational School at Covington, Kentucky and the West Kentucky Vocational Training School for Negroes at Paducah, Kentucky, are State operated schools. The following ten Area Schools are operated by local Boards of Education:

Ashland Vocational School, Ashland, Kentucky
Western Trade School, Bowling Green, Kentucky
Lafayette Vocational School, Lexington, Kentucky
Harlan County Vocational School, Harlan, Kentucky
Hazard Vocational School, Hazard, Kentucky
Oakdale Vocational School, Louisville, Kentucky
Madisonville Trade School, Madisonville, Kentucky
Owensboro Tech. High School, Owensboro, Kentucky
Tilghman Trade School, Paducah, Kentucky
Somerset Vocational School, Somerset, Kentucky

All Area Vocational Schools serve a number of counties and classes are held for high-school students, out-of-school youth, and adults, and veterans. The program of On-The-Job Training for Veterans is a function of these schools.

TABLE No. VIII-ve

Disbursement of Federal and State Funds to all Area Vocational Schools

Year	Personnel	Federal Funds	State Regular Funds	State Funds from Veterans Tuition	Totals
1949-50	287	$74,964.46	$70,958.28	$530,906.35	$676,829.09
1950-51	259	$76,327.13	$73,862.35	$436,358.77	$586,549.25

TABLE No. IX-t & i

Number of High School Teachers in Trade and Industrial and Distributive Education and the Amount of Reimbursement from Federal Funds for These Programs

Years	T. & I. Teachers	Distributive Teachers	Federal Funds
1949-50	35	12	$44,814.12
1950-51	27	14	$44,369.52

MAYO STATE VOCATIONAL SCHOOL, PAINTSVILLE, KENTUCKY

The School was established by an Act of the Legislature in 1938. The first classes started in the Fall of that year. It is operated by the State Board of Education through the Department of Vocational Education. In the first year of operation, there were nine teachers and about sixty students. The growth of the institution has been phenomenal, as the teaching staff has grown to thirty-nine and the student body to around five hundred. There are twenty or more counties represented in the student body at Mayo. Students drive as far as eighty miles a day to take advantage of the educational opportunities. However, a large group remain on the campus and make their home in the boys' dormitory. The school being located in a densely populated section of Kentucky provides educational opportunities to a people who have natural talents for development. The following groups take advantage of the educational opportunities:

1. People sixteen years of age or older who have dropped out of the regular school program.
2. High school graduates.
3. Young men and women who are interested and talented in learning a trade.
4. People who are employed but would like to be upgraded in their trade.
5. Veterans.

It is the aim of the institution to discover the talents of the people they serve and give them opportunities for development. This is done through a comprehensive testing program, counseling, individual and group conferences. Also, the younger students have an opportunity of a period of exploration and adjustment to determine their likes and dislikes. After the individual has discovered his aptitudes and interests under supervision, he then follows a prescribed course of study in a trade that best meets his qualifications.

The Day Trade Courses available in the institution consist of: Auto Mechanics, Auto Body Mechanics, Cabinet Making, Carpentry, Cosmetology, Drafting, Electricity, Machine Shop, Mining Mechanics, General Mining, Office Practice, Retail Merchandising, Radio and Television, Sheet Metal (Air Conditioning and Refrigeration), and Welding. All of the major trade courses require two school years to complete. However, students with good educational and work experience background can complete in a shorter length of time. The courses of study of all major day trades offered at the school have the following pattern of training:

1. Theory (Two hours and a half daily)
   (1) Trade science
   (2) Related drawing
   (3) Trade Mathematics
   (4) Blueprint and Diagram Reading
   (5) Industrial Citizenship

2. Laboratory and Shop Training (Three hours and a half daily)
   (1) Industrial physics
   (2) Mock-up training
   (3) Machine operation
   (4) Related shop training
   (5) Practical shop job training

3. Industrial Tours
   Industrial tours are a part of the total curriculum of many of the major departments of the institution.

Mayo is not only proud of the day trade program, but the Evening Trade Extension Courses provide excellent opportunities for educational development. This program is designed to improve or up-grade the individual in his present employment. The type of training is short-unit training on specialized subjects. The training opportunities now available are in the fields of Business, Auto Mechanics, Drafting, General Mining, and Electricity. Other major fields can be covered in the evening program when more funds are available.

This school is also promoting High-School Extension Shops. Two of these departments are now in operation. The young man who is talented and interested has an opportunity to take three hours of his school work following the regular prescribed course of study in the high school and three hours of related science and shop work. These courses make special application to the coal industry since they are located in the heart of the coal field. Then each student has an opportunity to follow a prescribed course of study in Mining Mechanics. This type of training program was inaugurated with full cooperation of local school people and industry in the community where the school is located. The two outstanding programs of this type are located at Belfry in Pike County, and at Prestonsburg in Floyd County. In the long range plan of the school, other departments are in the picture to be organized and developed.

The program is meeting with much success and has manifested the following results after five years of operation:

1. The school has a greater holding power for its students.
2. Many young men who have dropped out of school re-enter to take advantage of the training program.
3. It is proving that the school curriculum and leaders of the local community can work together for educational advancement in keeping with the needs of the people served by the school.
4. Industrial leaders visit the school and contribute to the training program by giving talks and demonstrations to the student body.
5. This type of program provides a period of exploration for young men who manifest mechanical aptitudes.
6. The students have an opportunity to learn what it means to work as a unit in an industrial atmosphere. This is true because the shops and laboratories are patterned after industry.
7. It is providing opportunities to equip people to better serve their local community and in some degree provide opportunities to the eighty per cent who never plan to go to college or seek any advanced type of specialized training.

In summary, the Day Trade Program, Evening Trade Extension Program and the Extension High School Shop Program are providing opportunities for educational development and, through such technical training, the backlog of skilled labor is being developed that would have a tendency to invite industry to locate in Kentucky.

The program has encouraged the development of small industries, as many of the Mayo graduates have developed businesses of their own and are contributing to the total wealth of the area where they live. Then, too, the already organized industries located in the area served by the school have an opportunity to obtain a better type of employee for skilled and semi-skilled jobs. Many of the Mayo graduates already hold responsible positions with industry of which the training program at the school was a great contributing factor to their success.

To discover and develop the talents of a free people and provide opportunities of advancement is the ideal way to insure the future of democracy in America.

A FINANCIAL REPORT OF MAYO STATE VOCATIONAL SCHOOL

School Year 1949-50

Allotted Appropriation		$50,000.00
Personal Services	$31,613.10	
Services Other than Personal	4,922.76	
Material, Supplies, and Parts	5,094.29	
Other Current Expenses	1,814.93	
Capital Outlay	5,985.70	
Total Expenditures		$49,430.78
Balance		$ 569.22
Special Appropriation, Balance from 1948-49		$ 2,955.48
Expenditures		2,877.15
Balance		$ 78.33

School Year 1950-51

Allotted Appropriation		$75,000.00
Personal Services	$47,959.02	
Services Other than Personal	7,914.48	
Material, Supplies, and Parts	10,337.03	
Other Current Expenses	2,030.10	
Capital Outlay	6,002.29	
Total Expenditures		$74,242.92
Balance		$ 757.08
*Special Appropriation, approx.		$14,944.23
Expenditures		.00
Balance		$14,944.23

* Was not allotted in time to spend in this fiscal year. Will be spent in 1951-52.

NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

Covington, Kentucky

Upon the completion of the school year 1950-51, the Northern Kentucky State Vocational School had brought to a close its eleventh year of service as an Area Vocational School in the State of Kentucky. Many students have had the opportunity of preparing themselves for lifetime occupations since the school was established in August, 1940.

For the first time in the school's history, two new activities were introduced in 1949-50 as part of the curricula—a school publication and a recreational program. THE VOCATIONAL REVIEW was published and edited quarterly by the students.

Since July 1, 1946, the annual appropriation for The Northern Kentucky State Vocational School has been $25,000.00, and until the year 1950-51, the major portion of the expenditures required to operate the school were made possible through funds derived from the Veterans Training Program. On September 1, 1950, however, the curtailment of the Veteran Program and the lack of veterans enrollment created an acute shortage in the school's budget. The current appropriation of $25,000.00 could not support the operation of six shops and courses of training without a deficit of approximately $10,000.00 by the end of the school year, thus by December 31, 1950, three courses of training were closed and the services of the instructors were terminated in three departments, Machine Shop, Printing, and Welding. By consolidating the veterans enrolled into the three remaining shops and operating as economically as possible, courses of training were maintained in Auto Mechanics, Radio and Television, and Woodworking for the balance of the year.

There are fourteen metropolitan high schools in Northern Kentucky and superintendents of these schools have many students who wish to be enrolled in this vocational school for their shop work. Every effort has been made to accommodate as many of these students as possible, however, it was necessary to limit this enrollment in order to take care of veterans who applied for training as the Veterans Training Program had to be emphasized. On December 31, 1950, the school was forced to discontinue the training program for high school students because of lack of funds.

The Northern Kentucky State Vocational School is equipped to offer training courses in the following shops:

Auto Mechanics	Radio and Television
Machine Shop	Welding
Printing	Woodwork

Day Trade courses were not operated in these shops on a full-time basis during the last year because of a shortage of funds. It was likewise impossible for the school to include many adult evening classes which were particularly necessary to meet the demand of defense production.

Throughout Northern Kentucky industry and labor have acknowledged the great need for the training facilities that are offered by the school in the field of Trade and Industrial Education.

During the biennium, world conditions and the threat of war caused many industries to convert from peace-time production to defense production, or to take steps in that direction, so that complete conversion could be made with the least possible loss of time. The school used every

facility at its disposal during the biennium to provide the training needed to turn out these skilled workers who could present themselves as qualified to enter industry in the area as it changed to defense production.

Developments during the next biennium may make it desirable and necessary to make still further changes to gear the instruction to meet the needs of industry in the area. These revised instructional offerings will be necessary for day-trade, part-time, and evening instruction as well as for the up-grading of employed persons so that they may meet the qualifications and have the necessary skills to fill these specialized jobs in this highly idustrialized area.

Many industries are now converting their peace-time production to defense production. This presents an immediate emergency for part-time and evening instruction for employed persons that they may meet the qualifications necessary for these specialized jobs. At this time over 300 adults have filed applications for enrollment in this type of training.

VETERANS TRAINING PROGRAM

The On-The-Job Training Programs and Apprentice Training Programs supervised by the school throughout a twenty-seven county area are as follows:

Firms approved for both On-the-Job and Apprentice Training	456

WEST KENTUCKY VOCATIONAL TRAINING SCHOOL

Paducah, Kentucky

At the end of the school year 1950-51, West Kentucky Vocational Training School had completed its thirteenth year of existence as a Trade School. Since the establishment of this institution, 783 persons have graduated. Thus, the school continues to expand and is an important part of Kentucky's growing school system.

West Kentucky Vocational Training School is a full-time Trade and Industrial institution whose object is to give sufficient training in the courses offered as will make employable the trainees who complete these courses by making them more self respecting and self supporting.

West Kentucky is staffed with a full and competent faculty, President, Business Manager, Coordinator, a Secretary to the President and Business Manager, one Clerk, a combination staff Physician and Classroom Lecturer for Cosmetology and Barbering, a Matron, Librarian and five regular workers. The offices of the President, Business Manager and Coordinator constitute the executive branch of the school.

All trade departments are equipped, well organized and in full operation. They are:

Carpentry	Office Practice	Tailoring
Cabinet Making	Auto Mechanics	Beauty Culture
Sewing	Brick Masonry	Barbering
Chef Cooking	Shoe Repairing	Maintenance Engineering

Along with each trade, related subjects are taught to the end that the trainee may attain proficiency and understanding of the vocation and its relationship to the world of work as well as to other desirable activities in which people in a democracy must engage.

All of the trade courses are set up on a two-year basis except Barbering and Beauty Culture. These two courses are operated in conjunction with the State Board of Barbers and Beauticians.

The school also carries a number of extra curricular activities, music clubs, debating clubs, basketball and softball.

West Kentucky Vocational Training School has been approved for the training of veterans and a large number of veterans are continuing to take advantage of the courses that are being offered.

The number and scope of trade courses offered at present must be considerably enlarged before the great need for industrial training for colored youth of Kentucky will or can be adequately met.

The aims of the West Kentucky Vocational Training School are:

1. To help the student find himself and become skilled in a worthwhile trade or vocation.
2. To help the student develop a philosophy and an understanding of human relations, and of one's part in the making of the future through actual practice work which embodies this philosophy.
3. To help the student develop into a respectable, self supporting citizen of the community in which he lives.

As a trade school, we feel that West Kentucky Vocational Training School is making an effort to meet the needs of the new defense production industry. Paducah being a defense industry town, a survey was

made to find out what the school could do to back up the defense effort. Teachers were released, students took jobs in Carpentry, Brick Masonry, Electricity, etc., at the Atomic Energy Plant. There are 19 carpenters, one brick mason and one employed in the Electrical Engineering Department, with the outlook that more will be employed in the near future.

The West Kentucky Vocational School has made a contribution toward helping to meet the needs for defense industrial production during the biennium ending June 30, 1951.

A Summary Biennial Financial Statement of
West Kentucky Vocational Training School
Paducah, Kentucky

FOR THE SCHOOL YEAR 1949-1950

Sources of Revenue

1949-50	315 Students
1950-51	205 Students

DIVISION OF VOCATIONAL REHABILITATION

Scope and Function

The Kentucky State Board of Education, in cooperation with the United States Government, provided Vocational Rehabilitation services for mentally and physically impaired individuals, including the blind, during the biennium. Such benefits included vocational and college training, medical examinations, physical restoration, psychological and psychiatric services, fitting of prosthetic appliances, aptitude and intelligence testing, counseling, guidance and placement, and occupational tools and equipment. All services provided by Vocational Rehabilitation are predicated on the basis of better preparing the disabled to earn a living.

The philosophy underlying the program of Vocational Rehabilitation was based on the theory that the extension of special services to the disabled would assist in equalizing their opportunities in a competitive social order.

During the fiscal years 1949-50 and 1950-51, this division through its local district offices, was able to rehabilitate 1420 persons in Kentucky, and approximately 2400 other cases were in various stages of being served. These 1420 persons are now employed in remunerative work. The number is more than the number rehabilitated during the previous Biennium in spite of rising costs and reduced staff.

What does this mean? This means that 1420 men and women of working age in Kentucky made the transition from dependency to self-sufficiency. It also means that these people are no longer drains upon the state and local welfare agencies, family resources and private charities. It means they are helping to increase productivity in Kentucky's industries, agriculture and commerce, and adding thousands to the purchasing power of our people.

Numbers do not tell the whole story. Among those rehabilitated last year were many men and women who had been seriously disabled for a long time, and many who would never have worked if it had not been for Vocational Rehabilitation. These cases who received physical restoration got the best medical, surgical, and hospital services that Kentucky offers. If they were trained the same was true.

For purposes of improved administration, the state is divided into two large areas, one of four districts and the other of five. The district offices being located in the following cities: Paducah, Harlan, Madisonville, Bowling Green, Louisville, Lexington, Somerset, Ashland, and Covington. By the district arrangement people in every county and community in the state are reached more easily.

Cooperative Agreements

It is one of the policies of this division to have a number of cooperative agreements with local, state and federal agencies whereby they make referrals of clients to Vocational Rehabilitation for services available through this division. These cooperative agreements have proven to be an excellent plan since many more handicapped persons are found in this way than would be otherwise.

The Department of Economic Security and their field staff have been most cooperative in referring these cases to Rehabilitation and giving

helpful advice during the process of service. The Kentucky Crippled Children Commission is another agency that has been most cooperative in the work of rehabilitating the handicapped. There are of course a number of other private and semi-private agencies very helpful to Vocational Rehabilitation in rendering service to the disabled. One of the outstanding pieces of work done was with the cooperation of the United Mine Workers of America. There are hundreds of injured miners in Kentucky who are unable to return to mines because of injuries. Rehabilitation trained many of these people to be self supporting in other fields. Additional funds were sorely needed in this field. A cooperative program has just been completed between the U.M.W.A., State Vocational Schools and Rehabilitation which offered a fine re-adjustment for this disabled group. This was the first program of its kind in the United States.

July 1, 1949 to June 30, 1951

Rehabilitation, Not a Recent Service

The first thing to remember about rehabilitation is that it has been with us a long time. Medical history shows evidence of physical restora-

tion in early civilizations. In the United States a training school for the deaf, subsidized with public funds, opened in Hartford, Connecticut in 1817. The first private hospital for the crippled is said to have opened in Boston in 1833. Fifty years later Michigan enacted a law which specified treatment and the hospitalization of indigent persons suffering from chronic disabling diseases. In the early years of this century rehabilitation moved forward under private auspices, such as the National Tuberculosis Association which began work in 1904.

In 1918 a federal law was passed for the rehabilitation of disabled soldiers. Then two years later we had the first federal legislation for the Vocational Rehabilitation of civilians. Thus today we are talking about a publicly supported program thirty years old.

We are now confronted with a new awareness of the vast possibilities and needs of such an endeavor. Since 1920 there have been several new starts, each one important. The Social Security Act of 1935 was one; the Randolph-Sheppard Act of 1936 was another. The most significant move came in 1943 with the enactment of the Barden-LaFollette Act. This was a big beginning.

This Barden-LaFollette Act greatly enlarged the benefits to the handicapped by providing physical restoration services, medical diagnosis and a medical review in every case.

So, the rehabilitation of disabled persons is not a program of recent years, without any backlog of practical experience. It is rather a thing of long standing which has been discussed, reviewed and planned by different groups over thirty years.

REHABILITATION SERVICES FOR THE BLIND

A section of the division is devoted to rehabilitation services for the blind. During the fiscal year 1950-51 there were 41 blind persons rehabilitated and 125 others were in various stages of being served.

Important Data Concerning the 41 Blind Rehabilitants

$ 4.30	Average weekly earnings per person **before** rehabilitation services.
33.75	Average weekly earnings per person **after** rehabilitation services.
6,454.00	Total cost of case services to rehabilitate the group (one-half state, one-half federal funds). A non-recurring expenditure.
2,704.00	The annual amount of public assistance received by eight (8) of the 41 before rehabilitation service. A recurring expenditure of tax funds.

Source of Support

27	Were dependent upon their families before rehabilitation.
8	Were dependent upon public assistance.
6	Had small, but inadequate income.

Work History

12	Had a history of employment.
10	Had only part time work experience.
19	Had never worked before.
	The median age of the group was 25 years
22	Persons are now dependent for a livelihood upon this group.

The following services were rendered these 41 blind persons:

1. **Physical restoration:**
   Seven were provided one or more physical restoration services which included treatment, surgery, hospitalization, and glasses. Of this group, one had sight restored in one eye to 20/30, one was restored from 98% loss in both eyes to 20/50 and 20/100, and another was restored from 98% loss both eyes to useful vision in each eye. The remaining four had sufficiently to enable them to be employed.

2. **Training:**
   Fifteen of the 41 persons received training, either in school, on-the-job, or in the shop.

3. **Maintenance:**
   Seven of the 15 trainees were provided room and board while undergoing training.

4. **Placement Equipment:**
   Twelve of the 41 persons were provided with the occupational tools and equipment necessary to establish them in small business enterprises.

5. **Placement:**
   Seventeen of the 41 were directly placed in employment by personnel of the division.

THE BUREAU OF FINANCE

The Bureau of Finance includes two Divisions, the Division of Finance and the Division of Census and Attendance. These two divisions are directly concerned with the over-all supervision, accounting and auditing of school finances and statistics. Certain tables displayed herein reflect, in a limited way, the scope, status and results of the efforts of the Bureau with reference to census, enrollment, attendance and finance.

Division of Census and Attendance

Kentucky Revised Statute, Section 159.080, provides that each school district shall employ a full-time attendance officer. The statutes make it mandatory that he shall maintain a continuous census and enforce the compulsory attendance laws in the district which he serves.

The program of the Division of Census and Attendance during the biennium has emphasized assisting the local attendance officers to carry out their duties as provided by the law. During this period we have made frequent audits of the census files to eliminate any children who have been a part of the census illegally. New procedures have been initiated to make the census transfer of pupils from one district to another a simpler process and to eliminate duplicates between the districts. The number in the census, when compared with other years, indicates that it is now more accurate than at any time since the establishment of the system.

A program of in-service training has been carried on for workers in the field of attendance. Emphasis has been placed on finding the causes of truancy and eliminating the source. The use of legal processes to cure non-attendance has been eliminated, to a degree, by a program of court hearings. The plan provides for a conference of the attendance worker, the judge and the parents to discuss the attendance problems of the child.

This division is also responsible for the assemblying of all pupil statistics. These statistics are used to give information to the public, in planning future programs and in determining the districts' shares of the common school fund and equalization fund.

Table I-c shows the trend of the census beginning in 1940.

School Enrollment

Public school enrollments are increasing all over the nation. This has been true in Kentucky until the school year 1950-51. Table II-c shows that the enrollment decreased in this year. This was probably due to increased industrial activity throughout the nation and the migration of workers to large industrial centers. The cities of the state continue to report large enrollments. During the next few years we should show large increases in the lower grades, due to increased birth rates occurring in 1946 through 1948.

TABLE I-c

Number of Census Children by County and Independent Districts from 1940 to 1951

Year	County	Independent	Total
1940	547,575	230,854	778,429

Non-Enrollees

During each year of the biennium the Division of Census and Attendance has made studies to ascertain the extent and causes of non-enrollment in the state. The tables which follow show the results of these studies and indicate the number of white and colored non-enrolled for county and independent districts and the reasons given for non-enrollment.

The number of non-enrolled in 1950-51 shows a slight increase over the same number reported for 1949-50. This increase probably was a result of many districts adhering to the law which requires a child to be six years of age by September 1 before he can enter school. The increase is reflected in Items 10, Tables V-c and VI-c. In making an analysis of the causes of non-enrollment, it might be said that the schools and parents are responsible for the numbers appearing in items fourteen through twenty in Tables V-c and VI-c. The other causes cannot be attributed to the failure of any group which seems to be in the position to prevent them.

TABLE V-c

Number of Children from 6 to 17, Inclusive, Not Enrolled in Any School, and the Causes of Non-Enrollment April 1, 1950

Causes	County			Independent			State

DIVISION OF FINANCE

The division of finance includes five sections: local district accounting, departmental finance and services, research and statistics, department personnel, and State Board of Education records. This division has the responsibility for supervision of the finances of the local districts and the finances and services within the Department of Education.

Functions of the Division of Finance

(1) To act as financial supervisor and auditor of local school district finances and accounts.

(2) To perform accounting and bookkeeping functions for the State Department of Education.

(3) To act as a Service Division for the State Department of Education.

(4) To advise on the approval of all school revenue bond issues of local school districts.

(5) To apportion and distribute the State Common School Fund.

(6) To act as a personnel division for the State Department of Education.

(7) To maintain records for the State Board of Education.

Equalization Apportionment

During 1949-50 there was an appropriation of $2,150,000 to assist in equalizing educational opportunity in the state. Sixty-two school districts —forty-six counties and sixteen independents—shared in the distribution of this Fund. The apportionment to each district can be determined by reference to Table XXIX-f.

The General Assembly in 1950 appropriated $4,287,500 for each year of the 1950-52 biennium. Eighty-eight school districts—sixty-three county and twenty-five independents—shared in the distribution of this Fund in 1950-51. The apportionment to each of these districts can be seen in Table XXX-f. For the 1951-52 school year eighty-nine school districts—sixty-one counties and twenty-eight independents—participated in the distribution.

Per Capita and Teachers' Salaries

Reference to Table XXI-f will show the per capita appropriation and mean average teachers' salaries for 1949-50 and 1950-51. It is believed that the additional appropriation of $6,000,000 made by the General Assembly in March, 1951 will provide a mean average teachers' salary of approximately $2,350 for the 1951-52 school year.

Length of School Term

Tables XXII-f and XXIII-f show the length of school terms for the 1950-51 and the 1951-52 school years.

Tax Rates

The tax rates for the school years 1946-47 to 1951-52 are given in Table XXIV-f.

Special and miscellaneous services	16.55	
Office supplies	46.87	
Total Disbursements		$ 160.93
Balance as of close of year		$ 3,609.62

(Funds accruing to this account were collected by the Division of Certification from March 20 to June 30, as fees for issuance of certificates. Also, that Division collected $14,035.08 in fees prior to March 20 which were deposited to State's General Fund as required by law.)

C. Division of Certification (General Fund)

Amount appropriated for the year		$ 15,000.00
Disbursements:		
Salaries, wages and fees	$ 12,715.36	
Traveling expense	378.38	
Postage, telephone and telegraph	1,231.08	
Printing, binding and advertising	120.08	
Special and miscellaneous services	31.00	
Paper	32.22	
Office Supplies	468.65	
Total Disbursements		$ 14,976.77
Balance as of June 30, 1950		$ 23.23

D. State Board of Education (General Fund)

Amount appropriated for the year		$ 17,500.00
Disbursements:		
Salaries, wages and fees	$ 3,035.00	
Traveling expense	1,227.39	
Printing, binding and advertising	9,761.86	
Special and miscellaneous services	20.75	
Paper	3,096.59	
Office supplies	198.59	
Special and miscellaneous supplies	45.90	
Total Disbursements		$ 17,386.08
Balance as of close of year		$ 113.92

E. State Textbook Commission (General Fund)

Amount appropriated for the year		$ 2,500.00
Transfer from Governor's Emergency Fund		$ 2,700.00
Total appropriated		$ 5,200.00
Disbursements:		
Salaries, wages and fees	$ 500.00	
Traveling expense	2,075.77	
Postage, telephone and telegraph	378.15	
Printing, binding and advertising	1,333.86	
Paper and office supplies	467.83	
Total Disbursements		$ 4,755.61
Balance as of June 30, 1950		$ 444.39

F. Division of Free Textbooks (General Fund)

Amount appropriated for the year		$500,000.00
Disbursements:		
Salaries, wages and fees	$ 11,752.13	
Traveling expenses	673.30	
Freight, drayage and express	19.34	
Postage, telephone and telegraph	455.72	
Printing, binding and advertising	279.00	
Special and miscellaneous services	25.80	
Paper	756.18	
Office supplies	224.73	
Special and miscellaneous supplies	3.75	
Bond premium	12.22	
Textbook purchases	481,262.51	
Total Disbursements		$495,464.68
Balance as of close of year		$ 4,535.32

G. Division of Physically Handicapped Children (General Fund)

Amount appropriated for the year	$ 35,000.00	
Unexpended, unobligated balance as of July 1, 1949	687.66	
		$ 35,687.66
Disbursements:		
Traveling expense	$ 746.87	
Salaries, wages and fees	6,239.41	
Freight, drayage and express	2.36	
Postage, telephone and telegraph	151.37	
Office supplies	216.87	
Bond	11.41	
Payments to schools	27,804.52	
Equipment	46.60	
Total Disbursements		$ 35,219.41
Balance as of close of year		$ 468.25

H. Division of Surplus Property (General Fund)

Amount appropriated for the year		$ 10,000.00
Disbursements:		
Salaries, wages and fees	$ 7,899.97	
Traveling expenses	1,803.13	
Postage, telephone and telegraph	192.98	
Office supplies	81.91	
Bond	22.01	
Total Disbursements		$ 10,000.00
Balance as of close of year		0

I. Division of Surplus Property (Agency Fund)

Receipts from sale of property		$ 64,346.28
Disbursements:		
Salaries, wages and fees	$ 12,613.46	
Traveling expense	1,963.64	
Freight, drayage and expense	13,211.24	
Utilities	455.55	
Printing, binding and advertising	27.08	
Special and miscellaneous services	3,580.86	
Office supplies	12.16	
Special and miscellaneous supplies	725.46	
Insurance premiums	134.10	
Rent	4,200.00	
Equipment	552.83	
Total Disbursements		$ 37,476.38
Balance as of close of year		$ 26,869.90

J. Public School Lunch Program (General)

Amount appropriated for the year		$ 40,000.00
Disbursements:		
Salaries, wages and fees	$ 33,438.62	
Traveling expense	4,973.59	
Postage, telephone and telegraph	715.29	
Special and miscellaneous services	157.61	
Paper	58.25	
Office supplies	377.28	
Total Disbursements		$ 39,720.64
Balance as of June 30, 1950		$ 279.36

K. Public School Lunch Program (Federal)

Received from Federal Government	$2,157,199.00
Reimbursement for lunches	$2,157,157.67
	$ 41.33

L. Common School Per Capita Fund (General)

Amount appropriated for the year	$19,350,000.00
Disbursements:	
Payments to school districts	$19,350,000.00
Balance as of close of year	0

M. Equalization Fund (General)

Amount appropriated	$ 2,150,000.00
Disbursements:	
Payments to school districts	$ 2,150,000.00
Balance as of close of year	0

N. College Tuition for Negroes (General)

Amount appropriated for the year		$ 40,000.00
Disbursements:		
College tuition and fees	$ 23,119.26	
Less refund	219.05	
Total Net Disbursements		$ 22,900.21
Balance as of close of year		$ 17,099.79

O. Anna T. Jeannes Fund (Agency)

Received from Southern Education Fund	$ 720.00
Disbursements:	
Salaries for Jeannes Teachers	$ 720.00
Balance as of close of year	0

P. Kentucky Business Enterprises Program (Agency Fund)

Balance from prior year		$ 4,270.06
Receipts		5,781.73
Total Receipts and Balance		$ 10,051.79
Expenditures:		
Salaries	$ 3,960.00	
Travel expense	352.42	
Postage, telephone and telegraph	220.70	
Office supplies	18.62	
Vending stands	1,549.33	
Office equipment	31.55	
Total Expenditures		$ 6,132.62
Balance at close of year		$ 3,919.17

Q. Vocational Education (Regular Program)

Amount appropriated for year		
State funds		$ 300,000.00
Federal funds		714,229.49
Total		$1,014,229.49
Disbursements:		
Salaries, wages and fees	$ 65,093.16	
Traveling expenses	14,074.71	
Freight, drayage and express	4.58	
Postage, telephone and telegraph	2,587.05	
Printing, binding and advertising	190.02	
Special miscellaneous services	52.10	
Paper	243.36
