The Kentucky Alumnus

Published by the Alumni Association of the University of Kentucky. Admitted as second class matter December 28, 1908, at the Postoffice, Lexington, Ky., under the act of July 16, 1894

Foreword

The call to service for the Alma Mater has been heeded by alumni in rapidly increasing numbers in the last year. The growth of the University, its greater prestige, a new spirit among the undergraduates and the firm conviction of leaders among the alumni that there must be a strong Association and a definite program have figured in this renewed activity.

Kentucky needs an educational awakening. The first signs of such awakening are visible. The University, which is at the head of the public school system in the State, will share the advantages of a renaissance.

There are many reasons for pride in the University of Kentucky. Its standards are high and the ability of the men and women who have received its degrees is known. The quality of work done in the several colleges compares favorably with that done in other institutions in the South, in many instances being far superior. The personnel of the student body have evoked much favorable comment from townsfolk of Lexington and from visitors. Its numbers are limited only by the capacity of class rooms and laboratories.

Greater growth is possible only with greater support from the State in appropriations for new buildings, equipment and operation. The report of the Kentucky Survey Commission on its work,

May 16-21, 1921, indicates clearly the needs of the institution. In that report recommendations were made for an immediate increase of \$300,000 in the annual appropriations and \$8,000,000 for buildings and equipment in the next ten years. Members of the commission pledged support to a movement that would supply these needs. On the alumni rests in large part responsibility for success of the plan.

Membership in the Association has increased from 193, June 15, 1920, to 924, June 1, 1921. In the same period the number of active alumni clubs has grown from two to fourteen, nine of them being within the State, with a score more in process of organization.

Twenty-one hundred men and women have been graduated by the University, which number will be increased by 157 with the class of 1921. More than 16,000 men and women have been enrolled since the founding in 1865. When all these are ardent workers for the University, when they rejoice in its victories and have faith in its future, great progress will be possible.

This directory is published—the first since 1916—in the hope that the information contained will help in promoting a closer union of alumni with a greater opportunity for service to the Alma Mater.
