Harralson may sponsor Gay Students' Coalition

By DAVID BROWN
Assistant Managing Editor

Student Government (SG) president Jim Harralson is seriously considering becoming co-sponsor of the Gay Student Coalition (GSC).

The Student Code of Rights and Responsibilities states a sponsor is "a responsible adult interested in the purposes of the organization who shall give guidance and counsel to the officers" of the organization.

The GSC submitted an official application for University recognition to the Dean of Students' office yesterday.

Harralson said accepting the role of sponsor would not be out of line, considering his past position on the Gay question.

Harralson gained University-wide recognition last year when he opposed SG sponsorship of a Gay dance.

"I have no trouble accepting gays as human beings," Harralson said.

He said he would not decide whether he would be a GSC sponsor until the end of this week, or the beginning of next week.

"I have to consider what bearing my decision will have on my relationship with other factions on campus, and what bearing it would have on the faction involved," Harralson said.

"I have to take time in considering these things, it's just my nature," he said.

As evidence of his previous support of the Gay movement, Harralson cited a Kernel Comment published Dec. 9, 1974.

That comment, co-authored by Glenn Stith, current SG vice president, stated,

"...we support the efforts of the Gay Coalition for recognition, with both the University and the community, and we affirm the right of each individual to the sexual behavior of his choice."

The application for University recognition listed Linda Welch, former president of the Red River Defense Fund, as sponsor, said Carey Junkin, GSC president.

If Harralson decides to sponsor the GSC, he would be listed as co-sponsor, Junkin said.

Wayne Davis, Biological Sciences Professor, is the GSC advisor, Junkin said.

It will take at least a week to 10 days for the Dean of Students' office to decide whether the GSC should be recognized, said Frank Harris, associate dean of students.

Harris said he had not yet looked at the application. He would not say if a previous University decision against the Gay Liberation Front's (GLF) application for recognition, would be considered when evaluating the GSC application.

When the University denied the GLF organizational status, the group took the issue to court. Three years ago the 6th District Court of Appeals ruled the University had the power to withhold recognition from any organization.

Harris said it was too soon to ask how he would make a decision. "Wait and see what I do, and then I'll tell you why I did it," he said.

Joe Burch, acting dean of students, also refused to say if previous decisions regarding gay students' groups would affect the decision made by his office.

Carey Junkin, GSC president, said he would fight any decision not to grant the GSC organizational status.

The first step would be to take the decision to the University Appeals Board, and if that failed, to court, he said.

If court action was necessary, Junkin said he thought he would have American Civil Liberties Union support.

Tobacco farmers dissatisfied with University

By JAMIE LUCKE
Kernel Staff Writer

Farmers who last year participated in a tobacco production experiment with UK are unhappy about being eliminated from the program this year, according to Bud Rankin, a spokesman for the farmers.

Last year's experiment involved a new technique in tobacco production that could save farmers time and money. The technique, developed by University researchers involved baling tobacco leaves for sale. Tobacco is now sold in loosely tied bunches called "hands".

The new baling technique "mechanizes the stripping room phase of the farmer's operation and reduces production costs," said G. W. Stokes, College of Agriculture associate dean. About 15 farmers participated in the baling experiment last year. Their tobacco was baled and sold to the Philip Morris Tobacco Company under an arrangement worked out by the University.

But now, Stokes said, the University researchers "have all the information they need at the farm level and the program is

moving so rapidly that it is difficult to fully understand the problems involved in baling tobacco."

He also said the University's involvement in marketing the baled tobacco may have been inappropriate.

"We had allowed ourselves to get over into the management of the flow of tobacco. The movement of tobacco is not a part of our testing program."

New techniques must be tested at all levels of the tobacco production and processing system, Stokes said.

Researchers are still studying baling to see how well it can be integrated into the system.

Rankin and several other farmers who were involved in the experiment met with tobacco company officials in Richmond, Va. after UK announced that the farmers would no longer be involved in the baling experiments.

Rankin said the tobacco companies are interested in baling, but the new technique must be perfected at the farm level before the companies can determine its feasibility.

Gay students reapply for group status

There are those who say history repeats itself... UK gay students attempted to obtain recognized UK student organizational status about three years ago. The attempt ended with the gay students taking the University to court and losing.

Now UK gay students are again attempting to obtain student organizational status. Their petition was filed Wednesday with Associate Dean of Students Frank Harris.

In between the two attempts at recognition much has been written and said about gay students and their relationship to the University. Commentary after commentary has been published in the Kernel by students reacting purely emotionally, as pure libertarians—in short, every variation of the theme.

Student Government (SG) has

been no less confused when dealing with gays. SG pledged to support gay students in their recognition attempts last year and this year. It approved then rescinded sponsorship of a gay dance last year and the Student Senate recently approved sponsorship of a second gay dance which in all probability may be vetoed by SG President Jim Harralson.

Amidst all the confusion and bruhaha, it's difficult to tell whether those circumstances which prevented the University from granting gays student organizational status have changed sufficiently to grant them recognition now.

Unfortunately it seems things have regressed rather than progressed. Student support—more importantly SG support—is not as

strong as it once was. Obtaining SG support of attempts toward recognition was a big fight in the Student Senate this year—last year it was almost assumed. If senators who are deemed representative of the entire student body do not unitedly support gays, the odds the University will change its mind are slight.

The University has two weeks to make its decision according to the Student Code. Hopefully, gay students will be recognized and all this discussion over what should be a simple right can end. But Harris, asked whether previous decisions would effect his decision on recognition for gays, said: "Wait and see what I do and then I'll tell you why I did it."

Well, there are those who say history repeats itself....

Letters

Low Blow

Editor:

My God! I find it totally unbelievable that the Kernel could stoop so low. I realize that the Kernel has never been "overly" supportive of the UK football program in the first place, but what has taken place with its so-called reporting is disgusting!

I'd like to know whether the Kernel makes a practice of setting up all its targets. How did the Kernel photographer know exactly where to go and who to photo at Keeneland. But hell, even the NCAA has stated that no apparent violation has taken place by the taking of a prospect to Keeneland.

I guess then that it is no small wonder that journalism at UK is unaccredited if unethical practices are allowed. Perhaps we should rename journalism and call it the Richard M. Nixon School of Dirty Tricks. Perhaps if we checked into the "real" identities of Monty Foley and Walter Hixson we'd find out that their "real" names are Charles Colson and John Mitchell.

What amazes me even more is that the Kernel is the UK newspaper. Is the editor so apathetic to his own school spirit and state pride that it conducts a witchhunt that not only reflects upon the football program but the school and state itself. Maybe the Kernel has gotten a little too independent and needs a little classroom instruction in responsible journalism.

UK alumnus

Trash

Editor:

I truly enjoyed Ron Mitchell's article on the Ginkgo Festival which appeared in the Nov. 3 Kernel ("Amazing facts revealed at fifth Ginkgo Festival"). It was one of the more amusing articles which have graced the pages of your wonderful little newspaper. However,

whodecided that a group of 111 moronic misfits singing praises to a leaf covered urinal for canines is front-page material? I can understand how homecoming weekend at this school might be considered "slow news days," but this is not the first time page one has been reserved for something less than newsworthy. I just can't imagine someone running into the office with that story screaming "Stop the presses." Need I remind your loyal fans of the totally useless article that appeared not too long ago concerning a drunken bird that damn near killed itself by mistaking a parking lot for Lake Superior. Interesting article, but hardly front-page news. You people just aren't consistent. You folks did a great job in covering the Luron Taylor kidnapping and murder, but then you turn around and serve us trash like this. Anyway, I thought you should know that I am saving my Kernels and using them to line my bird cage.

Protest

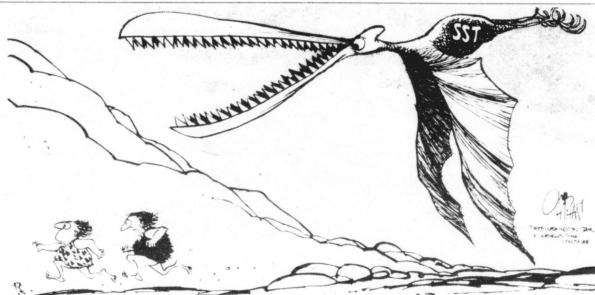

Editor:

There have been letters in the past protesting bikes on the sidewalks. This letter is to protest an even more dangerous practice: that of riding motorcycles on the sidewalks around campus. Even when the sidewalks are packed with students between classes, the motorcyclists insist on driving their machines through the crowd.

Unlike bikes, motorcycles are motor vehicles. I shudder to think what would happen if a cycle hit a pedestrian, even going only 5-10 mph.

I think the motorcycles should be allowed to park only in parking lots like cars.

"I THOUGHT THOSE THINGS WERE SUPPOSED TO BE EXTINCT!"

Gable's 'party' died

By David Brown

To a casual observer at Robert Gable's victory party, the reason for a resounding Republican defeat was obvious: campaign workers had to buy their own drinks.

It is traditional for political candidates to hold "victory parties," to thank their supporters for the effort they have exerted on behalf of the campaign.

Liquor flows, jokes about opposing candidates fly and people laugh as they eat food spread before them on large banquet tables.

Mr. Gable's "party" was dead. People had to buy their own drinks, all the food that was provided could have fit on a card table and the people were not joking.

Republicans, particularly those who knew they had lost, complained that little effort was made to bring out the Republican vote. They blamed Republicans for not working hard enough to get people to the polls.

"Why should they?"

It is impractical to expect campaign workers to support candidates on an idealistic, this is the best candidate basis.

The members of the grass roots must see some personal benefit for all the work they put into the campaign.

For some, a candidate's handshake will be enough, more often than not the prospect of a wild party suffices and for a privileged few the prospect of if- successful post-campaign employment is necessary.

As the waves of campaign workers flooded the Louisville restaurant hosting the Gable party, they found no food, and a cash bar. The majority of them didn't even find the smiling candidate ever-willing to shake their hand.

Gable was not at the party for about two hours because he was with an ill son, his wife said.

Ms. Gable said "we had everything against us" in the campaign. But no effort was made to reward the loyal party people who fought against "everything" to get Gable elected.

When those Republicans went home and faced Democratic friends, who could tell tales of a wild Carroll victory party, what could they say?

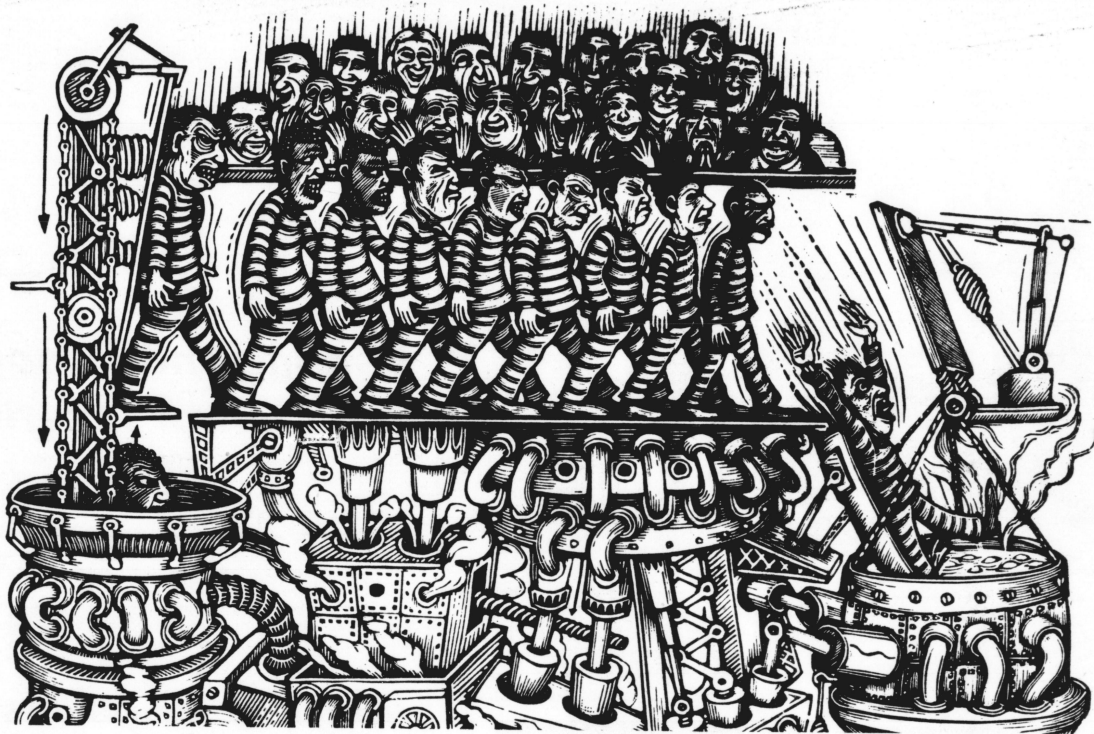

"Well, it was a lousy party. No, I didn't shake his hand. Yea, we lost real bad. What do you mean 'wasted my time?'"

Perhaps the first lesson Republicans should learn from their defeat is how to treat those who do the work of a campaign.

David Brown is a Kernel assistant managing editor.

spectrum

Candidates need bugaboo

Normally I'm not too interested in politics. I have a long diatribe full of years of accumulated bile against politics and the truly dangerous crackpots who run for elective office. And when I look down the list of potential Democratic candidates for president this year I don't find many whose throats I wouldn't cheerfully slit on a dark night in some evil back alley in Washington.

scott
payton

Still, I'm an easy-going guy, and I prefer to accentuate the Positive. So, for good or ill, here are some modest proposals, strictly for the use of presidential aspirants, strictly free to be used in whatever vengeful and twisted manner they find useful.

First, a little sop to the Bicentennial. We all know that this country was tamed and built by gamblers, drunkards and misfits—just read any

history of the old West. But as we've settled into our comfortable middle age as a People, we've tended to forget this.

And so, to correct the rampant injustice that finds these heroes wasting away in poverty and in jail, I'd suggest that a prospective president issue a statement to the effect that all gamblers, drunkards and misfits be subsidized by the state, their life styles supported by federal funds. The rationale for this is that they are living embodiments of all that is True and Right in the National Spirit.

Second, a little controversy to liven things up. Birth control in all forms should be made illegal; abortion on demand, however, should be supplied, free of charge. The reasoning behind this is that birth control is a small and distant murder—much like bombing a village from 20,000 feet—while abortion is a direct and enormously personal murder. The root idea is that we'll improve as a People—and perhaps avoid tragic grotesqueries like Vietnam—if we learn to live right up against the consequences of our actions instead of two steps removed. The mentality that prefers birth control to abortion is the same mentality that perpetrated Vietnam—if you can't see the gods you're murdering you're not really killing them. Murder if you must, the president should say, but look your victim in the eye. To do any less is to

circumvent conscience, and conscience is the well-spring of our humanity.

Enough of controversy. How about that old bugaboo, The Quality of Life? The president should issue an executive order banning all private use of automobiles. Every one of the goddamn things will be burned, smashed, compacted and buried in Death Valley. No longer will those noisy, polluting, traffic-jamming devils torment us and drive us to cancer and madness! (Except in Lexington, which will be preserved as a National Historical Park of sorts. Lexingtonians will be allowed to keep and drive their autos as always. Future generations will be able to come to the city and stare in wonderment as the natives drive around in their accursed machines, totally amok in a psychotic din of honking, cursing, motor-racing, ulcers...a living monument to the incredible stupidity of the Automobile Age).

The environment? Immediately upon assuming office, the president must inform all industrial polluters that they have 60 days to clean up their act—totally—or they will be arrested and shot without benefit of trial. Strip miners will simply be shot down in the streets without warning, by roving bands of displaced landowners and others tired of putting up with the strip miner's bullshit. I'm serious. It would be per-

fectly justifiable capital punishment. These bastards are crazed murderers of the worst sort—they're killing entire planet—and if the very survival of the Earth depends upon eliminating these treacherous sons-of-bitches, well, so be it. Let the blood run ankle-deep in the streets. It can't be any fouler than the stinking sulfur pits that pass for creeks in Eastern Kentucky, courtesy of your local strip mine. Or Lake Erie or any of a hundred dead rivers sold down the cancer-tubes of money and technology...

But this is all gibberish, bad craziness. The American people would never vote for anyone who advocated programs this drastic. But I'm driven: the Sickness is upon me—my gizzard is swollen to twice its normal size, my eyes are glazed, and there's no more Chivas in the cupboard.

So listen up, you candidates. Ignore me at your peril. You're likely to end up sucking wind all over the country for the next 20 years, until finally there's no one left to listen.

Senate votes to open all sessions to public

WASHINGTON (AP) — The Senate voted unanimously Wednesday to require for the first time that all its committee meetings be open to the public.

The 86-0 vote was a major victory for advocates of "government-in-the-sunshine" legislation, who will now move to get a similar open-meeting requirement adopted for many federal agencies.

The Senate approved a resolution by Sen. Lawton Chiles, D-Fla., to require all meetings to be open unless a majority of committee members votes to close them.

Such a vote would have to be taken in open session, however, and committees could only be closed for narrowly defined exemptions — such as matters that relate to national security.

By an 81-6 vote, the Senate also agreed to extend the open-meeting concept to House-Senate conference committees named to work out differences in bills passed by each chamber.

The House already had agreed to open conference committee.

All House meetings currently are open unless committee members vote to close them. But in the Senate, business meetings are considered closed unless a committee votes to open them.

Britain sends troops into Central America

BELIZE CITY, Belize (AP) — Britain dispatched troops and war power into this Central American colony by air and sea today, claiming that neighboring Guatemala is building up a military threat against the disputed territory.

The Royal Navy frigate Zulu arrived in Belize harbor, and a British government statement in London said troops, jet fighters and vertical take-off aircraft were on their way to reinforce the 650-man British garrison here.

No figures were released on the number of men being sent from England. In addition to the British troops here, the colony has a local militia of 300 men. Three transport helicopters came from England about three weeks ago.

Marijuana mouse dies

SAN JOSE, Calif. AP—Marty the Mouse, a onetime field mouse who used a liking for marijuana to gain fame and a position in medical research, has died. He was an estimated 16 months old.

Marty died peacefully in his sleep Tuesday at a pet clinic where he had spent the last month for treatment of a stubborn skin ailment that robbed him of much of his fur. Death was attributed to old age.

The four-inch, gray-brown rodent was little known until last Christmas when he moved to police headquarters and, despite strenuous police efforts, conducted nightly raids on marijuana stored for use as evidence.

His success at eluding police gained national publicity. Officers finally trapped him with his favorite snack, but instead of being charged he was taken to the University of California at Los Angeles to aid in studies on marijuana.

Later he was installed as a police mascot, living a life of leisure in a special cage—with all the food he wanted but no marijuana.

There are no known survivors. A companion mouse donated to provide female companionship—but who turned out to be a male—died during the summer. Marty will not go unmourned at headquarters, however.

"We hated to see him go. He brought us a lot of enjoyment, more than people realized," Officer Jim Leroy said Wednesday. "He was really a welcome relief around here, kind of a kick."

Inner Peace Movement sponsors two workshops this week on ESP

Susan Harper, an international representative of the Inner Peace Movement (IPM), will be conducting two workshops—Nov. 6, at 8 p.m. and Nov. 7, at 7:15 p.m. at the Holiday Inn West.

On Nov. 6 Harper will speak on understanding a person's relationship to himself, society and the universe. She will also discuss the practical use of extra sensory perception and understanding psychic experiences.

On Nov. 7, Harper will help everyone experience for themselves the practicality of mystical and psychic experience. She will also discuss how one can develop these potentials in everyday life.

The workshops are open to the public but a nominal fee will be charged, Harper said.

For the past year, Harper has been a full-time traveling leader for IPM, a non-profit, educational self-understanding program. IPM has been in existence for 11 years and has 400,000 actively involved leaders all over the world.

Tobacco farmers dissatisfied with UK

Continued from page 1

Baling cuts labor time at the farm level by about 40 per cent, Rankin said. Farmers would save about six cents on every 100 pounds of tobacco they prepare for market. Also the cost of transporting the tobacco to market would be reduced since the bales are much easier to handle, Rankin said.

But, tobacco companies need more than the 25,000 bales produced by the University to determine if the technique will work for them, Rankin said.

Company officials realize farmers must reduce their production costs, Rankin said. The companies are willing to participate in baling research but want the University to supervise the project.

"Two companies—Philip Morris and R. J. Reynolds said they would go along with baling experiments if the University would supervise it," Rankin said. "Some of these companies

aren't real happy with the University now. They told us 'get the University back in it, and we're with you'," Rankin said.

University efforts to develop methods for handling baled tobacco at the Warehouse level are unnecessary at this point, Rankin said.

"They haven't proven the bale is the way yet to the companies. A company can't form an opinion from the 25,000 pounds of baled tobacco the University will have. What good will warehouse techniques do if baling doesn't suit the big companies," Rankin said.

Rankin said he believes pressure from influential warehouse interests may have influenced the decision to cut back farmer involvement in the experiment.

Many warehouse operators fear that if baling becomes widespread the farmers will sell their tobacco directly to the companies instead of bringing it to the warehouse to be sold, Rankin said.

"We're not trying to cut the warehouse man out—they're an asset to the farmer. I wouldn't attempt to raise tobacco without the warehouse phase."

Rankin said he believes the warehouse operators would not have a negative attitude toward baling if they had been "properly oriented."

Most of the 15 farmers, including Rankin, who were involved with the project plan to market their tobacco in bales this year even though they are not sure company buyers will purchase the baled tobacco.

Tobacco warehouses in Paris have agreed to let the farmers market their tobacco in bales this year.

Rankin said he plans to "start out baling. If the price I get is close to the floor price I'll continue with it. I'll even take a little less than the floor price."

But if his losses are too great at first he will sell the remainder of his tobacco crop in the traditional "hands" he said.

Elections cost local government over \$32,000

Tuesday's election may cost the Lexington-Fayette Urban County Government (LFUCG) as much as \$32,000, according to Charles Basler, Fayette County Court Clerk.

This cost averages out to about 34 cents for each of the approximately 77,000 voters registered in the 147 precincts in Fayette County. The campus area, which is made up of seven voting precincts, accounts for about 3,200 of these voters.

As election this expensive is not unusual for Fayette County, according to Basler. He said the various expenses making up the total costs do not vary much from each election unless new precincts are added to the county. Basler said expenses include:

- \$100 for each precinct to pay the four election officials (This is the maximum pay allowed by Kentucky law);
 - \$20 paid to the owners of each voting location for use of the facilities;
 - \$5,000 to \$6,000 for the printing of ballots;
 - \$3,000 for publishing sample ballots in newspapers;
 - \$2,500 paid to two of the county's four election commissioners;
 - \$2,500 for moving voting machines to polling locations;
 - LFUCG pays these costs, but is partially reimbursed by the state.
- The city receives from the state \$50 for each voting precinct, but still has to pay more than \$21,000, according to Basler. He said \$65 is not "nearly enough" to cover the cost of an election.

There is no way to reduce these expenses, according to Bob Reeves, Democratic election commissioner. "The only substitute for spending the money is not having the election," he said.

Reeves said the cost is probably going to increase because many precincts are approaching maximum voter capacity. A voting precinct is not allowed to contain more than 700 voters.

"We'll have at least 20 more precincts next year," he said.

The addition of 20 new precincts would increase the cost of elections by a minimum of \$2,400, according to Reeves.

Another election cost not included in the \$34,000 estimate is the price of a voting machine, \$2,300.

Because costs are determined before each election and depend mainly on the number of precincts, the voter turnout on election day will have no effect on expenses, Basler said.

COLLEGE OF ARTS AND SCIENCES

Department of Anthropology

New Courses

ANT 108. European Anthropology

History of the development of various theoretical approaches to the cross-cultural study of economic systems and inquiry into the relationship existing between economy and the other systems within a society.

Prereq: ANT 121 or consent of instructor.

Change to:

ANT 120. Regional New World Ethnology (3)

The ethnography of a selected New World culture area. Both historical and contemporary cultures within discussion may be required to a maximum of 4 credits.

Prereq: ANT 121

ANT 108. Topics in Anthropology (3)

Selected topics of theoretical/ methodological importance in anthropology, with special attention to topics of contemporary relevance. Possible topics include Cultural Ecology, Urban Anthropology, Cultural Revolution, Women, Ethnobiology, etc. May be repeated to a maximum of 6 credits.

ANT 110. Seminar in Physical Anthropology (3)

A seminar covering one or more selected topics of interest in physical anthropology. May be repeated to a maximum of 4 credits. Prereq: Six credit hours of physical anthropology or consent of instructor.

ANT 121. Seminar in Regional Ethnology (3)

Intensive examination of the ethnography of a selected major geographic division of the world, on the ethnographic and/or contemporary time horizon, with emphasis on the history of ethnological research. May be repeated to a maximum of 4 credit hours.

Prereq: Consent of instructor.

ANT 220. Seminar in Applied Anthropology (3)

Seminar discussion and individual or group research in the applications of social anthropology theory and methods to the solution of unsatisfactory, community, regional or national problems. Attention will be given to effects, to the role of the student in the application of anthropology, and to the history of applied anthropology.

Prereq: Consent of instructor.

ANT 221. Practicum in Applied Anthropology (1-6)

Practical field experience of which the student applies the theory and method of social anthropology in the solution of a problem defined by the student in cooperation with a community or public or private service agency. Required of all doctoral students in Applied Anthropology.

Prereq: Consent of instructor.

Dorm poll

Statistics indicate residents oppose SG recognition of Gay Students' Coalition

By DAVID BROWN
Kernel Staff Writer

Results of a poll conducted in several dormitories indicate that residents oppose Student Government's (SG) recognition of the Gay Students' Coalition (GSC). The statistics were presented to SG Monday night. The results of polling in seven dorms showed 1,015 opposed the SG action, 175 approved and 137 had no opinion, said Robert Stuber, Kirwan Tower Dorm Council (KTDC) secretary and poll director.

Stuber said he felt "the sample is quite representative of the student body." However, there is reason to believe the opposite is true.

The poll was conducted by residence hall governments in Kirwan I and IV, Kirwan Tower, Blanding IV, Donovan, Haggins and Jewell Halls, Stuber said.

Students polled were asked, "Do you agree or disagree with the Student Senate passage of the resolution stating that 'the 1975-76 student assembly support the efforts of the GSC to achieve organizational status at the University of Kentucky?'"

Stuber said the figures were presented to student senators for their information. He has decided against seeking a counter-resolution, which would rescind SG's approval of the GSC effort because "I don't think it would pass," he said.

Passage of a counter-resolution would require a two-thirds vote of the senate.

Members of the GSC have charged the poll is biased and selective questioning was used by poll takers.

While there doesn't appear to be any concrete basis for GSC's charges, although Stuber admits he is strongly opposed to the GSC, there is some basis to say the poll means very little.

Of the 2,190 people who reside in the seven dorms, 60.5 per cent, or 1,327 students responded to the poll.

The poll was taken by corridor presidents who went door to door asking for responses, Stuber said. Students who were not home were not interviewed, he said.

Residents of Kirwan IV, Blanding IV and Donovan Hall were given paper ballots to record their responses; residents in the other dorms were questioned verbally, Stuber said.

Stuber said he tried to get other dorms to participate in the poll, but for various reasons they refused.

"The poll was not really a survey, it was a census," said Dennis Haack, statistics UK assistant professor.

To conduct a survey, a sample must be properly chosen, and then each person in the sample must be contacted, Haack said.

The poll results might be held representative for the residents of the seven dorms polled, Haack said.

The results might apply to other University residence halls if the make-up of the dorms was similar, "but their refusal to conduct the poll indicates that they were different in some way," he said.

Statistics Department Chairman Richard Anderson said, "The results refer only to the people who were interviewed. The survey is suspect because there was no effort to contact the other 40 per cent," he said.

Haack said since no effort was made to contact the remaining 40 per cent of residents in the dorms polled the census was really not complete.

"Assumptions (made on the basis of the poll) would be at best tenuous," he said.

To discuss the results, Haack said the 40 per cent of the residents not polled should first be added to figures for those approving the SG action to get one figure. Then the 40 per cent figure should be added to the opposing side to get another figure.

"Then about all you can say is that the truth lies somewhere in between," he said.

We goofed

Because of incorrect information supplied to the Kernel, the "Truth" concert will be held Friday, Nov. 7 at 8 p.m. instead of Saturday, Nov. 8.

GRADUATE COUNCIL:

Mens' gymnastics is out; Appling might go to court

By JOE KEMP
Kernel Staff Writer

The UK men's gymnastics team has been scrubbed for this year, but coach Jeff Appling is considering taking legal action against the University to bring it back.

"I may take it before any court necessary on the grounds that the men are being denied equal representation in gymnastics," Appling said.

"I'm going to talk to 'Skeeter' (Bernard Johnson, director of campus recreation) about this to

see what should be done," he said. "I won't be able to take it to court personally, but I plan to talk to the team and see if any of the men would be interested."

Appling said "eight to 10" people showed up for the club's organizational meeting Oct. 23. He said the biggest problem facing team personnel was that "they couldn't get anything (financial help) out of practicing three to four hours a day, five days a week."

As a result, several members have said they would be unable to stay with the team. Appling, who is president of a local gym club,

said a couple of the gymnasts may perform with the UK Troopers this fall.

"But that's not a gymnastics team," he said.

The Troopers is a talent organization which performs at local hospitals, high schools and civic clubs.

Appling maintains that he would "hate to go to court" to have men's gymnastics reinstated at UK. "But," he adds, "We may have to do it. I'm not giving up. I'm just disappointed the University couldn't work something out," Appling said.

Cassidy, Rentz lead Lady Kats to third in tennis tournament

By JENNIFER WILLIAMSON
Kernel Staff Writer

UK's women's tennis team finished its fall season this past weekend by taking third place honors in the state tournament. Previous to the tournament, the team had compiled a record of eight wins and two losses.

Western Kentucky was the overall winner of the tournament with a total score of 32 points. Murray placed second with 22 while UK followed with 17½ points. In fourth place was Kentucky Wesleyan with 16½, fifth; Eastern Kentucky University, sixth; Morehead State University, and in seventh place, the University of Louisville.

The tournament was played with single elimination in each

division. The doubles were played in a total of three rounds.

UK won two singles events with the wins of Kathy Cassidy and Holly Rentz. Cassidy, playing in the number two division, defeated Rachel Strauss of Kentucky Wesleyan, 6-3, 7-6 in the finals. Rentz took her finals victory from Tarrie Mudwilder of Western by a score of 7-5, 6-2. UK's number one player, Jackie Gibson, almost made it to the finals but was unseated in the semi-finals by Karen Weis, 7-6, 4-6, 6-3. Cindy Kearney was also defeated in the semi-finals as she lost to Daphney Langridge, 6-2, 6-2.

In doubles, Leslie Fisher and Karen Rose were defeated in semi-final play by Langridge and Suzanne Johnson.

Coach Claudia Young said she was pleased with the per-

formance of her team. "They all did a good job and the tournament was a great experience for them," she said.

Young also stated that Western had been favored in the tournament due to the fact that they had five of their players on scholarship. Murray also has players on scholarship but the Western players were just stronger.

For the remainder of the semester and until weather permits in the spring, the tennis team will be practicing on the indoor courts. They will be staying in shape and working towards the Region Two tournament in the spring.

Preliminaries will be held to choose the top six players in the state for the regional tournament. Region Two includes Kentucky, Tennessee, North and South Carolina, and Virginia.

Centre College goalie John Thomas wards away a Kentucky shot by using his head. Thomas also knocked away 27 other Kentucky shots. However, his teammates could not cash in on their 11 attempts on the UK goalie, and the teams ended up battling to a 0-0 tie.

Kentucky, Centre soccer teams battle all afternoon for 0-0 tie

Kentucky and Centre College fought to a 1-1 soccer tie yesterday afternoon on UK's field.

The Wildcats were without one of their top players as senior Don Hissam was sidelined earlier this week with an ankle sprain. Fullbacks Mike Avioti, Mark Wilvers, and Steve Salyers along with halfback Greg Maxfield helped take up the slack.

It was an aggressive game

laced with fouls and penalties. Kentucky attempted 28 shots, while Centre tried only 11.

UK had a chance to win the game when, with only four minutes left in the game, Bob Stauble found himself with the ball all alone in front of the Centre goal, with Centre goalie John Thomas way out of position. However, the spin of the ball was such that when Stauble kicked it, the ball rose and went over the

goal, missing the net by inches.

Thomas made several outstanding plays, most notably a diving stop of a hard shot by Wildcat halfback Gabriel Vierra. UK goalie John Maloney made several outstanding plays as well, particularly late in the game, when the afternoon sun was practically blinding.

The tie leaves Kentucky with a 7-3-2 record going into tomorrow night's contest with Indiana University (IU) in Bloomington. The teams will square off on the IU football field at 8 p.m.

The Cats enter the Kentucky Soccer Tournament Saturday and Sunday in Berea. Since UK is ranked second in the league (Morehead and Asbury College are tied for first) it will be playing in the upper division. Kentucky will be playing tougher teams early in the tournament, but should they get to the later stages of the competition, they'll face teams from the lower division of the league.

Because of the tournament, UK had to cancel a game with Vanderbilt which was scheduled earlier in the summer. The Cats will most likely turn down any invitation to play in the Southeastern Conference (SEC) tournament, for lack of funding. The SEC invites Kentucky every year.

After the tournament, the Wildcats will have one more game, a matchup with Tennessee Nov. 22, right after the football game in Commonwealth Stadium.

Cats will take number two in 20-7 win over Vandy

By RICK DIXON
Kernel Staff Writer
KENTUCKY AT VANDERBILT—Vandy escaped with a three point win over Virginia last Saturday while the Cats were parlaying breaks into points in

the win over Tulane. Vandy had gone six weeks in succession without reaching double figures. This week the Wildcats will have little trouble in securing their second win in a row. Kentucky will win 20-7.

Corn!

Rules and regulations for the consumption of as much corn as you can eat, complete with barf breaks. . .

Ray Smith, barf break bugler

By DICK GABRIEL
Sports Editor

It's fall. The leaves are turning beautiful colors and the air is crisp. What better way for college students to spend a lovely fall evening than to sit in a hot smoky room stuffing their faces with corn?

"The Sixth Annual Super Fantastic Original Corn Eating Elimination Contest and Light Show plus Selected Short Subjects" (gasp) is over. The event, staged by the theatre arts department, drew a crowd of about 30 corn-loving souls.

The Corn-Eating Contest, though definitely the climax, was only part of the evening's affairs. It was preceded by the Talent Show (featuring a Corn-Corn dance), the Light Show (won by Sandy McCulley weighing in at a hefty 117 lbs.) and others. The rest is history.

The actual corn-eating began at 10 p.m. A field of six, Mark Bergeson, Rusty Stone, Sandy McCulley, Rob Brown, Mark Chapman, and a (corn-)testant who wished to remain anonymous, sat at the eating table convinced that he or she would be the last to leave. Each was positive he would end up the (corn-)testant to cut loose with the victory belch.

Rules for the contest are explicit:

1. \$5 entry fee for each (corn-)testant.
2. Each (corn-)testant must have two timers, a watch with a second hand, and a barf bucket.
3. Each (corn-)testant is allowed a five minute barf break every hour.
4. Each (corn-)testant is allowed three free barf breaks during the evening.
5. The first (corn-)testant to drop out or be eliminated must pay for the corn. (This rule has been eliminated this year because the Niblets Golden Corn was donated.)
6. Each (corn-)testant must take one bite every 30 seconds.
7. Each (corn-)testant must post and wear their eating colors.
8. The winner is the (corn-)testant who eats the most corn.

Bergeson dropped out early, lasting only half an hour. An hour later, the anonymous entry folded. Then the contest settled into a four-person affair, with Chapman, McCulley, Stevens, and Brown grimly chomping away.

McCulley was the odds-on favorite to win. She had

won the previous year, consuming 14½ cups, and she had the home-floor advantage. The contest was staged at her house.

Stone and Brown dropped out around 1:30 a.m.—Stone because of his ulcer and Brown because he drank beer with his corn. A definite mistake, according to Roger Lee Leasor, the original founder of the contest. Water is the only suitable beverage, Leasor said.

It was down to the final two, Chapman and the defending champion, McCulley. They matched each other spoon for spoon, employing different strategies to avoid boredom. (McCulley read, Chapman played solitaire)

Now the two had to draw on their sheer cunning and will power. Its not easy to ignore a stomach that feels like the Towering Inferno.

This was the time to avoid taking deep breaths, according to Leasor. "People don't realize it, but corn has fumes," he said. "I've seen more people wiped out because of it. Our first casualty ever was the victim of a deep breath."

At 2:30 a.m., McCulley made the startling announcement that at the end of her 21st cup, she was quitting. (Chapman was at 20½, and still going strong.)

As McCulley left the table, Chapman was swallowing the last spoonful of his 21st cup. All he needed was one more spoonful, and he would be the new Corn-Eating Champion. But in an incredible display of sportsmanship, Chapman declined to go on, finished his 21st cup, and declared the match a tie. He and McCulley split the \$52 pot.

75 cups had been consumed since the contest began. Chapman and McCulley both broke McCulley's old record of 14½ cups, and McCulley had set a new career record of 35½ cups. McCulley, who had been the first female champion, also became the first person to ever win twice.

It was the corn-cheerleaders who put the finishing touches on the evening's events with the last in the series of their rousing cheers:

"You've slobbered and slurped,
You've barfed and you've burped.
You frickin' frackin' goons:
We've got a surprise
For all of you guys.
Next year, we're serving PRUNES."

Corn eating co-champ Sandy McCulley stares at the pile of canned corn yet to be eaten. McCulley and Mark Chapman both ate 21 cups of corn at one sitting.

The Business
Statistician**

\$29⁹⁵

Features all common business statistical functions including $+$, $-$, $\times$, $\div$, $\%$, $\sqrt{x}$, and full memory capability! Automatic constant on five functions. Floating decimal. AC adaptable. Easy-to-read 8-digit LED display. One of the most versatile budget-priced pocket calculators you'll find anywhere!

**Model 600
The
Financier**

\$99⁹⁵

Solves complex time and money problems! Calculates annual interest rate! Deluxe split keyboard. Gross profit margin key. Direct access memory. Present value. Payment. Interest. Time periods. Reverse and exchange key. Add-on and discount percent. Fixed and floating decimal with round-off. Rechargeable batteries.

**Model 500—
The Scientist/
Engineer's
Problem
Solver**

\$119⁹⁵

A new scientific offering the efficiency and simplicity of Reverse Polish Notation, a powerful 4-register stack with 9 memory registers, a 12-digit display total capability in scientific functions plus additional capabilities in statistics, conversions and business. Rechargeable batteries and AC adapter.

Rockwell International Ultra-Compact Scientific Slide Rule Electronic Calculators!

**Model 63R 29-Function
8-Digit With Memory**

\$89⁹⁵

One of the most versatile and mathematically most powerful calculators on the market! Designed for use by scientists, engineers and advanced math students, this outstanding model handles complex calculations with ease! Performs factorial computations, degree/radian conversions, parenthetical operations and much more! Fully addressable memory and exponent capabilities for working in scientific notation! Rechargeable nickel-cadmium batteries with AC adapter/recharger. Includes vinyl carrying case. Weighs only 11 oz.

**Model 31R 15-Function
8-Digit With Memory**

\$39⁹⁵

Perfect for anyone working with reciprocals, square roots, percentages! Rechargeable batteries plus AC adapter! Auto constant on all functions! Bright LED display.

**Model 61R 24-Function
8-Digit With Memory**

\$69⁹⁵

Ideal for anyone needing intermediate answers to trig, log or other complex problems. Simultaneously sums numbers and their squares! NiCad rechargeable batteries.

Canon Calculators For Homemakers, Students And Technical Professionals

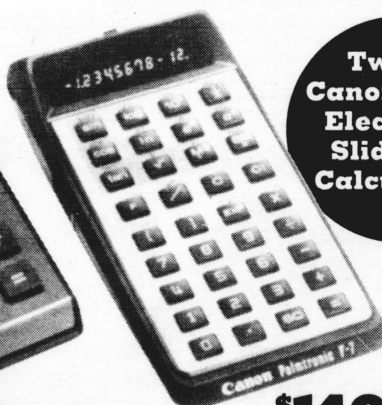

Palmtronic LD-81 Pocket Calculator

\$16⁹⁵

- 6 Functions
- 8-Digit Display
- Runs on 2 Penlight Batteries

Sensational all-around math versatility which is perfectly suited to most everyday home and business math problems! Adds, subtracts, multiplies, divides, figures percentage and square root! Large, easy-on-the-eyes, green display! Auto constant. ($\div$ and $\times$). AC adaptable.

\$149⁹⁵

**Palmtronic F-7
50-Function 8-Digit**

An extraordinary scientific calculator with more features and functions than any other calculator in its price class! All the ordinary functions plus trig, inverse trig, log, exponential, powers, roots, conversions (length, weight, volume; polar/orthogonal coordinates; sexagesimal/decimal notation). One memory for accumulation and another for storage! Unique fraction and parenthesis keys!

**Two Of
Canon's Best
Electronic
Sliderule
Calculators**

\$79⁹⁵

**Palmtronic F-5
18-Function 8-Digit**

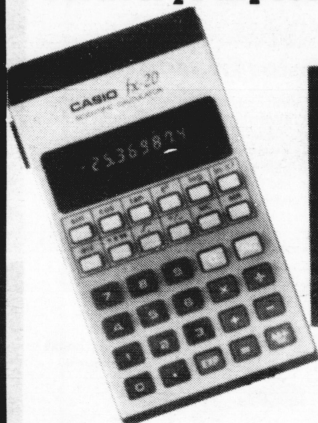

Very compact calculator is only twice the size of a pack of cigarettes, but it has a combination of features few others can match! Chain and constant $\times$ and $\div$. Repetitive $+$ and $-$. Trig, inverse trig, exponential, log, power, root, reciprocal functions. π key. Full memory! Runs on ordinary penlight batteries or optional AC adapter or NiCad battery pack! Floating decimal.

Playback BLAST OFF WITH BIC VENTURI!

FORMULA 1 Speaker System. A beautifully designed compact bookshelf two-way Speaker System, the Formula 1 has ultra-high efficiency for thunderous volume with even the lowest powered amplifiers.

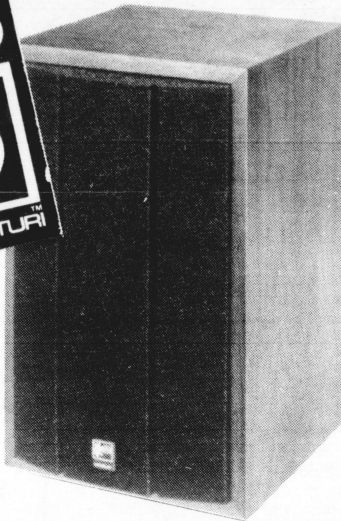

\$74⁹⁵

FORMULA 2 Speaker System. An incredibly accurate reproducer — in a compact enclosure. Without sacrificing efficiency. Delivers clean, high output from low powered receivers. The Formula 2 is the most sensitive, highest power handling speaker system ever offered!

\$119⁵⁰

FORMULA 4 Speaker System. Has the clean, natural sound of Formula 2, but with still better bass, even more efficiency plus a slightly larger cabinet. At home on a shelf or on the floor. Big buy!

\$159

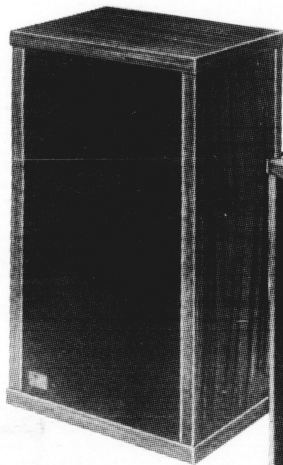

FORMULA 6... Monitor Standard

The ultimate in accurate reproduction is achieved in the Formula 6. Utilizing a larger enclosure, it outperforms even the costliest of speaker systems. The tremendous efficiency of the F-6 is startling! Modest powered amps are more than enough to give you volume levels approaching realism. Wide-angle dispersion, provides exceptional stereo image and outstanding depth. A must-hear, if ever there was one!

\$295

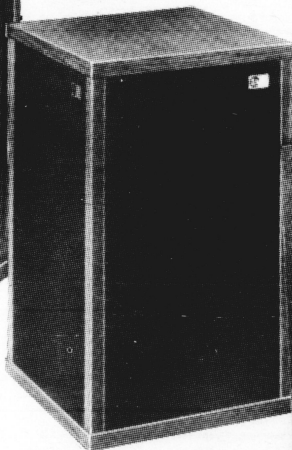

SPEAKERS...SPEAKERS...WE'VE GOT SPEAKERS!

Model 150. Combines an 8" woofer plus a one-inch air-spring tweeter for some of the most natural, distortion-free reproduction you've ever experienced from a home system. Utilizes EPI's state-of-the-art technology to bring you the best dollar-per-dollar fidelity.

Was \$159.00

\$99

EPI 250 ... All New! A truly great speaker system! Combines the high definition and deadly accuracy of earlier models, but with even more efficiency and greater power handling capacity.

\$239

The Mighty 350! The speaker system by which all other speakers will be judged! Omnidirectional design in a slim column with speaker modules provide the most accurate reproduction you can buy ... for half the money you'd expect to spend.

\$349

Best-Buy Model 60. An updated version of the incredible model 50 — the "mighty mite"! Produces an amazing amount of sound from a surprisingly small enclosure, 6" acoustic suspension woofer and one-inch tweeter

MAGNIFICENT MARANTZ "IMPERIAL" SERIES

IMPERIAL 5G Deluxe Two-Way System. An outstanding value. Two-way system features an 8" woofer plus 1 3/4" tweeter with three-position high-frequency level selector switch for contouring the sound to just about any living environment. A great reproducer. \$99.95

IMPERIAL 6G Two-Way 10" System. A clear-cut winner, the 6G is one of the smoothest Speaker Systems you can find . . . at any price! 10" woofer reproduces rock bottom bass—musically. Special 1 3/4" tweeter section is designed with 3-position high frequency level selector. A sensational value. \$139.95

IMPERIAL 7—Top-of-the-line 12" Three-Way. A fabulous Bookshelf System—capable of letting you hear every nuance in the music—with distortion and listener's fatigue at an absolute minimum. Has a high frequency level selector switch PLUS three-position mid-range level switch for maximum listening in any position. \$199.95

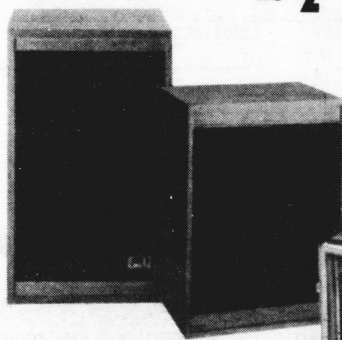

**MARANTZ
Makes Just
About the
Finest
Speakers
Around!**

IMPERIAL 4G Two-Way System

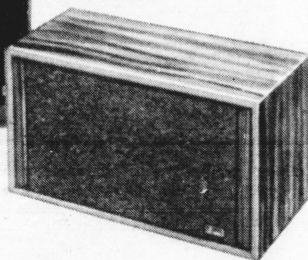

Provides a specially designed 8" Woofer for outstanding bass response down to 40 Hz, plus 1 3/4" tweeter for sensuous high's. Efficient enough so that virtually any medium powered receiver can drive the 4G to room-filling volume—with minimum distortion. \$59.95

Speakers for Just About Everyone by

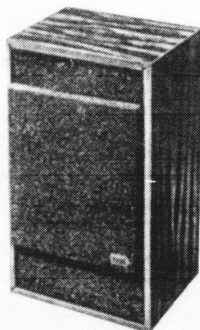

VEGA 217R The absolute greatest rock speaker ever designed! Massive 15" woofer pours out soul-satisfying bass reproduction, midrange horn brings the music "up front," just where you like it. A monster. \$395

VEGA 211 Handles up to 200 watts peak power. Direct radiating 2-way system with 12" woofer and 10 lb. magnet. Provides some of the best volume per-watt than just about any other system in or near its price range. \$189.50

VEGA "26" One of the most popular bookshelf Speaker Systems ever! Can handle up to 120 watts peak power, yet as little as 5 watts can get you evicted. A clear-cut winner. \$149.50

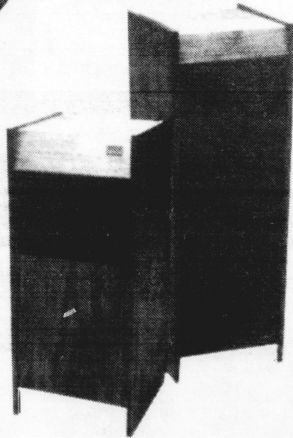

Vega's HED Series — Best for the Money!

The HED Speakers from Cerwin-Vega represent absolute maximum sound for your hi-fi dollar. And they combine Vega's fabulous efficiency with low-distortion, wide dispersion sound—super for rock, big symphony listening. Includes the V-8 (8" 2 Way under \$80), V-10 (10" 2-Way under \$100), V-12 (12" 2-Way under \$120). Whichever one you choose, the HED Series are a best buy!

For the Audiophile . . . Cerwin-Vega's "T" SERIES

The 12T (directly right) and 15T (lower right) both incorporate Cerwin-Vega's "residential" principle—optimum performance of the enclosure-type system. Mid and high frequency drivers are placed at optimum listening height, while the woofers are mounted near the floor for added bass response. Model under \$300. The 15T has a 15" woofer and is priced under \$500.00.

Sansui

LM-110 6" 2-Way Speaker System

A significant departure from traditional speaker design philosophy, this new LM Series offers enhanced image resolution and location! The LM-110 handles 35-watt peaks and has a 38Hz-20kHz frequency range!

\$125

LM-220 8" 2-Way Speaker System

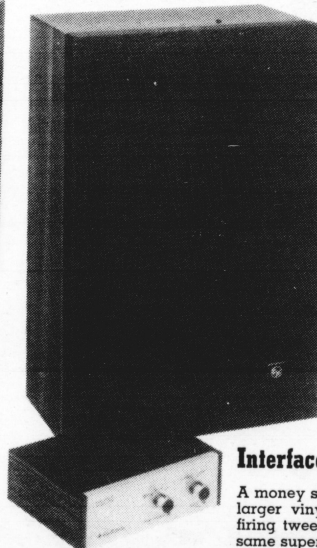

Middle-of-the-line system delivers 32Hz-20kHz response and handles 45 watt peaks! Three exponential horns channel back-radiated sounds from tweeter into the listening field.

\$169

LM-330 10" 2-Way Speaker System

Multi-radiation tweeter baffle emphasizes phase difference relationships in multi-channel music to improve stereo perspective. Handles 60-watt peaks. 31Hz-20kHz response.

\$199

Electro-Voice

Interface: A 8" 2-Way

An amazing system incorporating a 8" long-throw bass driver and two tweeters (one rear-facing) plus an active equalizer for low-end response to 32Hz and uniform total-energy output over the audible range! Well-balanced sound with a minimum of coloration and distortion. Unique 10" ported passive radiator. So efficient that a 1 watt input signal produces a sound pressure level of 89 dB! Sold in pairs with equalizer.

\$450

Pair
with Equalizer

Interface: B 8" 2-Way

A money saving version of the Interface: A. Slightly larger vinyl-laminated enclosure without the rear-facing tweeter. Twice the efficiency of the "A"! The same superb dispersion and neutral sound character. Very wide 36Hz-18kHz ±3 db frequency response. A "must" system to consider if you prefer light classical or popular music!

AS-10 10" 2-Way Super Bookshelf!

Dollar for dollar this sensational PROJECT/one 10" 2-Way Speaker System is one of the best buys you'll find! Big 10" woofer has hefty magnet for resounding bass response! Precision tweeter puts out smooth, clean, widely-dispersed highs! Handsome, sculptured-foam grille. A real winner!

\$119 ea.

AS-6 6" 3-Way System

Compact 6" 3-Way Speaker System is the ideal unit for anyone with limited space and budget! Bass driver has whizzer cone for enhanced mid-range and highs. Deluxe tweeter. A bargain-hunter's delight!

\$59

AS-8 8" 3-Way System

Slightly bigger and with deeper bass response than the AS-6 above. A superb match for nearly any medium-power receiver or amplifier! Acoustically-transparent foam grille.

\$79

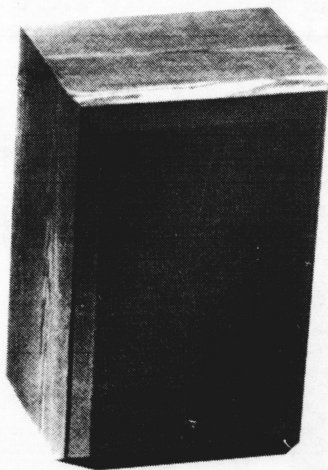

AS-12 12" 3-Way System

For bass response that will reach right down into your basement, consider this top quality speaker system from PROJECT/one! Precision mid-range and high frequency drivers reproduce your favorite music with the utmost clarity!

\$169

Seven Super-Sounders From

ALTEC®

Model Three 10" 2-Way

Designed to satisfy people's listening tastes, rather than meet some arbitrary acoustic specifications, this NEW series of Altec speaker systems offers rich, true-to-life reproduction few others can approach! The Model Three operates on 10 to 100 watts, puts out 106 dB at 35 watts and has a hand-rubbed oiled oak finish.

\$119

Model One 8" 2-Way System. With substantially the same wide-range response as the larger and more expensive Model Three, the Model One has a 12-75 watt operational power range, puts out 99 dB at 30 watts and features a hand-rubbed oiled oak finish. Acoustic suspension design.

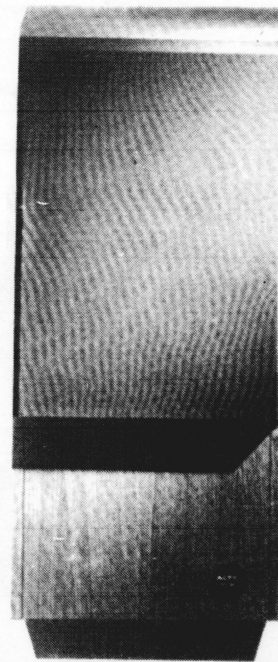

\$89

Model Nine 12" 3-Way System. No matter what type of music suits your fancy, this incomparable bookshelf system will reproduce it as you've never heard it before! Precision mid-range and high frequency drivers. Recommended for use with amps delivering 12 to 250 watts! Oiled Oak finish.

\$289

Stonehenge II 12" 3-Way Sound Tower

Just as the Stonehenge of ancient England was far ahead of its time in concept, design and construction, so the NEW Altec Stonehenge series of speaker systems is a crowning audio achievement without peer in the marketplace! The Stonehenge II incorporates a massive 12" bass driver together with a special 5½" mid frequency driver and a 5" tweeter whose combined sound in the beautiful, vented, 37½" tall, hand-rubbed oiled-oak enclosure must be heard to be appreciated! Recommended for use with amplifiers capable of delivering from 20 to 250 watts! Long term maximum acoustic output is 103 dB at 50 watts! Full 35Hz to 20kHz response with outstanding 130° vertical and horizontal dispersion. A classic!
