Adjourn

Minutes of the Meeting of the Board of Trustees of the University of Kentucky, Tuesday, June 17, 2008.

The Board of Trustees of the University of Kentucky met at 1:00 p.m. (Lexington time) on Tuesday, June 17, 2008, in the Board Room on the 18th Floor of Patterson Office Tower.

A. Meeting Opened

Ms. Mira Ball, chair, called the meeting to order at 1:00 p.m. and asked Ms. Barbara Jones, assistant secretary of the Board, to call the roll.

B. Roll Call

The following members of the Board of Trustees answered the call of the roll: Mira Ball (chair), Stephen Branscum, Penelope Brown, Dermontti Dawson, Jeff Dembo, Ann Haney, James Hardymon, Sandy Bugie Patterson, Phillip Patton, Nick Phelps, Charles Sachatello, Frank Shoop, Myra Leigh Tobin, JoEtta Wickliffe, Billy Wilcoxson, Russ Williams, and Ernie Yanarella. Absent from the meeting were Pamela May, Billy Joe Miles, and Erwin Roberts. Ms. Jones reported that a quorum was present.

The university administration was represented by President Lee T. Todd, Jr., Provost Kumble Subbaswamy, Executive Vice President for Finance and Administration Frank Butler, Executive Vice President for Health Affairs Michael Karpf, and General Counsel Barbara W. Jones.

The university faculty was represented by Chair of the University Senate Council David Randall, and the university staff was represented by Chair of the Staff Senate Bart Miller.

Members of the various news media were also in attendance.

C. Consent Items

Ms. Ball called attention to the items on the consent agenda and asked if there were any questions. Mr. Shoop moved that the consent items be approved. Ms. Wickliffe seconded the motion, and it carried without dissent. (See consent items listed below at the end of the agenda.)

D. President's Report to the Trustees (PR 1)

President Todd said that there were some outstanding items in PR 1. He pointed out the following items:

- UK wins a \$10 million National Institutes of Health (NIH) grant to fight effects of Superfund wastes. The grants are very hard to win with the NIH budget as it is today. It has a far reaching opportunity from trying to solve environmentally difficult issues to driving some economic development opportunities.
- Presidents of the University of Kentucky, University of Louisville, Centre College, and Berea College met recently to discuss what the four institutions can do to have some impact on the state. The presidents chose energy as the topic and committed to three energy conferences. The first conference was held in Louisville, and Sandra Meyer, Duke Power Company's vice president for Kentucky and Ohio, did an outstanding job as the evening speaker. The second conference is scheduled for September. The topic at that conference will be governmental policies, and the keynote speaker will be Thomas Friedman who wrote *The World is Flat*. He is publishing a book on energy. The presidents feel that energy is an area that can touch a lot of things.
- Everett McCorvey has been elected as a faculty representative to the Board of Trustees.
- UK's College of Medicine joins Georgetown College to recruit minorities. Georgetown College will identify prospective "partnership students" as early as sixth grade and nurture these students through their college careers. UK's College of Medicine will provide special opportunities for them to observe, shadow, and be mentored by medical professionals with the hope that they will go into medical school.
- UK reports the highest six-year graduation rates in its history. The African-American graduation rates have exceeded 50 percent at UK.
- Twenty UK HealthCare physicians are named in two of the latest *America's Top Doctors* lists. Due to Dr. Karpf's leadership and the team that he has put together, the awards keep accumulating for the hospital and the individuals.
- The NCAA released its fourth annual Academic Progress Rate report which showed that all 22 of the UK sports teams surpassed the NCAA target score, and 13 of the 22 squads exceeded the national average for public universities in their sports. It is a pretty stringent requirement, and it is really influencing the counseling and the course taking for all athletes.

- The fabulous William T. Young Library celebrated 10 years of service to the public with a celebration on May 13.
- Professor Yanarella has received a follow-up \$103,000 grant from the Kentucky Department of Education to continue and expand his sustainability agenda on campus and within the larger Bluegrass community. That project is a perfect example of education, research, and outreach. They are going to develop a pilot course, and the grant will offer a community workshop. It will also extend environmental education programs at the national level to K-12 schools in the Lexington area.
- The sixth annual President's Awards for Diversity were recently presented to six individuals and one unit on campus. The awards recognize outstanding efforts toward advancing UK's mission to embrace diversity while maintaining academic excellence.
- Dean James Cibulka has been named the next president of the National Council for Accreditation of Teacher Education. He will be in Washington, DC.
- Dean of Arts and Sciences Stephen Hoch will be the provost at Washington State University.

Dean Cibulka and Dean Hoch did their jobs well at UK, and they will be missed.

President Todd recognized Jack Morgan, Executive Director of Omicron Delta Kappa (ODK), who was in the audience. He noted that ODK is the top leadership organization in the university campuses. He expressed appreciation to Mr. Morgan for attending the meeting.

President Todd then asked Nick Phelps to step forward and receive a certificate from ODK. Mr. Phelps was elected for this award from nominations from the circles of ODK throughout Alabama, Mississippi, Kentucky, Tennessee, West Virginia, Wisconsin, Michigan, Indiana, and Illinois. Four students are being considered for the national award which is named for General Russ Dougherty, a Kentuckian. This award will be given to the student who has made a quantitative difference in the institutions in the lives of others. President Todd congratulated Mr. Phelps on receiving the certificate. Mr. Phelps received a round of applause.

E. 2006-09 Strategic Plan Status Report

Provost Subbaswamy called attention to the 2006-09 Strategic Plan report that had been distributed to the Board and noted that this is the second year of the three-year plan. Through a series of slides, he reviewed the report, elaborating on each chart and pointing out the areas of progress.

2006-2009 Strategic Plan – Five Goals

- I. Enhance the University's Stature among its Peers. This is a statement about Top 20 aspirations.

- II. Prepare Students for Leadership in the Knowledge Economy and Global Society.
- III. Enhance the Intellectual and Economic Capital of Kentucky through Growth in Research.
This is a statement about the research mission.
- IV. Embrace and Nurture Diversity.
- V. Engage Kentuckians through Partnerships to Elevate Quality of Life. This is a statement about the land-grant mission.

2006-2009 Strategic Plan – Measures Across Six Domains

Undergraduate Education

Graduate and Professional Education

Faculty Development

Engagement

Staff Development

Undergraduate Education/Highlights

Two universities have made statements that they will not be considering standardized tests as a part of their admission requirements. This is a trend that is likely to increase. More and more universities are getting away from standardized tests as a necessary requirement for even completing an application. The high school GPA and the rigor of courses taken during high school are better indicators of success in college than the standardized tests with the exception of the very low end. There are a lot of different things going on that will affect the ACT/SAT measure. During the next five-year plan, standardized tests may need to be reconsidered. The high school GPA is a measure that is here to stay, and it is a good indicator of success.

The university is closing the gap on the six-year graduation rate for African American students. It is 50.3 percent, which is the highest percentage ever.

The university is putting a lot of focus on advising, especially in the first two years. Tutoring has been increased, and an academic alert system has been put in place, using customer relation management types of software and intervening at the very early stages. There is now a hands-on approach in terms of how students progress in the system.

The university study of general education revision is on track. The University Senate passed guidelines on design principles, and there are faculty teams working this summer to develop particular plans that will be presented to the faculty for discussion at full length in the fall semester.

There has been a drop in transfer students. The staff is working on a plan for a dual admission system for Bluegrass Community and Technical College students, and they hope to unveil the plan in the fall.

Graduate/Professional Education and Highlights

There is good news about graduate and professional education. The number of doctorates and professional doctorates awarded has increased from 634 to 653. The goal is 694. Likewise,

graduate degrees awarded to African Americans have increased. There is progress on both of those measures for the Strategic Plan.

Significant investments will be needed to increase the number of graduate students. Graduate fellowships and assistantships are essential to recruit good students. The university has not made significant investments in that area yet, especially in the current fiscal environment.

There is a lot of national exposure for UK graduate students. Over 560 students were funded to present research findings at national conferences. A tremendous number of UK's students have gone to national meetings this way. UK hosted a national conference on graduate student leadership. International applications have increased by 9 percent.

Faculty Development

The number of faculty has increased. A lot of the increase comes from the growth in the College of Medicine but also because of the 74 new faculty lines added. Obviously, the current reduction has not shown up in the numbers, but it will show up in the next couple of years. That increase has led to the university actually having reached the milestone. The milestone was 2,023 faculty, and the last measure, which was the November census, was 2,057. Since that census, the number might have gone down.

Diversity of full-time faculty in terms of gender and ethnicity diversity has increased. For the first time ever, UK has exceeded the EEOC target. The EEOC goal was 34 percent, and it is currently at 34.6 percent.

The university is separately tracking African Americans and all minorities. In terms of all minorities, the university has made progress from a baseline of 14.7 percent up to 16.1 percent. For African American faculty, these are small numbers. The 2009 target is 4 percent, and the administration is working very hard, even through hard times, to try to meet that target by recruiting the best possible faculty of color.

Research Productivity

In terms of research productivity there are several measures, including the number of programs in the top quartile. These measures and where you find these rankings are fairly controversial, but none the less, the baseline was 17. For this year, there is an increase by one in the number of programs. The 2009 milestone is 20. This achievement will depend on the investments the university is able to make. It will be dicey to get further improvement without further investments.

The milestone goal for total research expenditures is \$350 million. The baseline was \$307 million, and that has now increased to \$332 million. That is based on 2006 data from the National Science Foundation.

There is nice progress in the number of citations of publications. That number has increased from 44,000 to 48,000 and is headed towards the milestone of 49,000.

The total research expenditures growth is behind schedule. Space is a great barrier for the university to grow research. The university did not get any new academic or research buildings in the last General Assembly.

Research Highlights

There were record-high research expenditures in 2007. Unfortunately, awards are down by 8 percent. That is a reflection of the federal environment among other things. There are several large, very important, and competitive grants: \$5.4 million from the Gates Foundation to the College of Agriculture, \$4.5 million to medicine from KCHFS, \$3.1 million to the Center on Aging from NIH, \$10.2 million to agriculture from NIH Superfund Grant, \$5 million from the state legislature to the Kentucky Geological Survey, and \$2 million to the Center for Applied Energy Research for the research on energy and for infrastructure development.

Engagement/Highlights

This is an important goal for the university because everything from teaching to research is to serve the Commonwealth. There are no well documented measures that everybody follows with engagement. In year one, a process was set up to have as a baseline. The university now has a six-point assessment strategy that has been established and can move towards documenting the outcomes.

Another measure of progress was to undertake and evaluate at least three major engagement projects designed to have significant economic impact. Six projects have been identified, and the university is beginning to follow and track that progress.

The engagement measurement has begun. The Carnegie Outreach and Partnerships Classification was obtained. Thirteen new Commonwealth Collaboratives were launched. These are engagement projects funded by the university in small seed grants. The Kentucky Engagement Conference that UK has been sponsoring is getting a dialogue across the Commonwealth. Regional development has taken place, and Kentucky is being seen as a model nationally in terms of engagement activities.

Staff Development/Highlights

There were two specific items in terms of measurement for staff development. One was to complete a compensation analysis and implement an enhancement plan based on the compensation study. That has been completed. The Board approved salary increments associated with the staff salary enhancement pool.

The other item was to monitor and develop UK's diversity in executive, administrative, and managerial positions. The goal for African Americans in those ranks is 5 percent, and currently, UK is 4.6 percent. These are very small numbers. All it takes is one individual to leave, and the number can shift significantly. For all minorities, UK does better. UK exceeds the EEOC target by 6 percent for African Americans.

The shared leave pool and the family education program have been established. The program enhancements for career advancement and professional development as well as supervisor effectiveness training have also been launched.

Key Indicator Summary

The university has already achieved some of the three-year milestones, and except for the undergraduate student input measures dealing with the test scores of students coming in, there is progress being made in spite of some set back. In spite of fiscal liability, UK will continue to try to make progress.

President Todd asked if there were any questions for Provost Subbaswamy on any of the information he presented. He then continued with his report to the Board.

F. Budget Presentation

President Todd began his budget presentation by talking about Governor Steve Beshear's budget address. Prior to the address, he and his staff were informed that there would be a 12 percent budget cut. This would be in addition to a previous 3 percent budget cut. He reported that \$50 million was cut out of a \$300 million base. He said that his feelings were that of grief. At first, he got angry and questioned why it happened. He became angry because he thought UK was getting its message across, and for once higher education was going to be put on a road with the business plan that had been written, endorsed, and supported. He then became embarrassed because he had brought staff such as Dr. Karpf, Dr. Subbaswamy, and Dr. James Tracy to the University of Kentucky when they had options to be at top five universities. The faculty and staff hopes were up because they thought the university would move forward. There were 210 faculty members hired, which is 56 percent of the American graduates from the top 20 institutions such as Yale, Princeton, Harvard, and MIT. The budget cut was extremely disappointing to him. He said he then remembered the bottom line of a story that Mr. Jim Stuckert, chair of the capital campaign, told him about a consultant, "what is is -- deal with it." And, that is what UK has to do.

President Todd said that there were a couple of things that happened that gave him tremendous faith in the institution. He and his staff went to the legislative session and worked to get the 12 percent budget cut down to 3 percent. This was not where he wanted it to be. It is \$40 million below what he was hoping for this year. It was a time higher education was still being discussed behind the conference room doors. The university has some good friends in the legislature that were trying to do their best to find funds to get UK back to where it needed to be. They know that the business plan is still out there, and they feel some responsibility for it. He took some consolation in that.

President Todd said that a basket of flowers were delivered to his office the day following the budget address from a faculty member on campus. The note with the flowers said, "Hang in there." Another faculty member expressed gladness that the decision was made to not give salary increases, and keep the cost of tuition down so it would not be in the double digits. E-mails were sent to him in response to his campus e-mails thanking him for the communications.

President Todd told of Mrs. Todd's first meeting of the Women & Philanthropy organization where he talked about the collaboratives and Provost Subbaswamy's retreat with the

deans where he expected to walk into the room and see a bunch of deans complaining about the budget situation. The moderator, who took notes for the deans' retreat, summarized what the deans had come up with as their priorities. The first thing on the list was to continue to increase the academic success of the student body. The second thing on the list was to continue to serve and meet the needs through outreach of the Commonwealth of Kentucky. Since most of them are not Kentuckians, this was very heartwarming. The third thing on the list was to increase collaboration across campus. While the deans probably felt like whining and moaning, they were there to work. They were there to continue to push forward.

President Todd told the deans of his emotion to have a press conference on the steps of the Capitol and burn the Top 20 business plan because UK has only received an approximate \$12 million increase in the base budget in the past nine years. He wanted to say, "Let's get real;" however, he feared there would be a lot of people that would say that the state could not afford it anyway. He stressed that the state cannot afford not to do it.

President Todd talked about the pride he has in the faculty and staff that have not said a word to him personally about backing off the plan. They know it is tough. The university will not achieve all the measures in the strategic plan right now, but the university will be much better off trying to achieve them.

There is nobody in the state going to move the state forward any better than the institution. The university touches education, health care, and economic development. All of these aspects need to be touched. The state is one of the worst in health care in the country. It has been ranked low in education, due to the lack of commitment for so many years. And, the economy does not reflect where the state has to be in order to offer competitive jobs. There are people at this meeting who are willing to fight for that and who think it is important to do that. For these things, it is worth continuing to ask for more money.

Due to research and the medical center, the university is building on revenue streams. It is time that serious conversations begin with the legislature about stepping up and providing the university the ability and flexibility to do what needs to be done. The university needs a bonding capacity that is comparable to \$2.2 billion, a AAA rated corporation. The university needs the ability to sign leases because it is a very responsible party. The university cannot sign a lease over two years now. Somebody who might want to build the university a building could not get a bank loan under the current conditions. The university needs to be able to get out from under some of the other situations as well.

Indirect cost reimbursement keeps going down nationally. The university did not receive any overhead money for the \$5 million grant to the Kentucky Geological Survey to drill two large holes in eastern and western Kentucky to look at carbon sequestration. While it is nice to get the \$5 million from the state, there are operational costs needed. The state needs to realize the research universities are doing work for the state, and the universities need to have some overhead coverage. The university's public and government relations groups need to schedule campus tours for the legislators so they can see firsthand what is happening on campus.

President Todd said that he wanted to mention another point that he meant to make about embarrassment. The School of Music has wonderful professors that could go to any university they chose. He noted that some professors have been on the stage of Carnegie Hall. UK has some of the best professors in the country, and it is embarrassing that they will not receive a salary increase this year. The state desperately needs the arts, and it desperately needs culture.

President Todd said that he had received only one or two e-mails from the faculty and staff about not getting a salary increase this year. UK is a pretty incredible place. It is hanging in there and meeting a need for the state. He expressed appreciation for the leadership of the Board, and said that he appreciated the faculty, staff, and students that the university is attracting. He also expressed appreciation for the administrative support. He does not think that there has been a team at this administrative level since he has known about the university.

President Todd did not review the specifics of the budget since that had been done in the Finance Committee meeting. He did, however, display a series of slides which showed that the university has not received much of an increase in the base budget since he became president.

The state has got to decide to invest in education. UK is doing its part and will continue doing its part. The university has friends in the legislature. Governor Beshear's recent appointments to CPE have been very strong, and UK is going to get attention. The administrative staff has to be more aggressive because nobody else is going to do the job for the university.

When they reformed higher education in 1997, the University of Kentucky was the only university that gave up anything. The deal was that UK could now become a Top 20 university. The administration has been working on that plan, and it has to work hard to continue to sell the message.

President Todd said that they did have some principles in doing the budget. They tried to preserve as many jobs as possible and also take care of health care benefits. He urged the Board to pass the budget when Mr. Branscum presented it in his Finance Committee report.

G. Proposed Amendment to Governing Regulations: Investment Committee (PR 3)

President Todd said that this is the second reading of PR 3. It is a change in the Governing Regulations which will add some community members to the Investment Committee. He said that Chair Wilcoxson is strongly behind the recommendation, and he urged passage of the second reading. On motion made by Mr. Branscum, seconded by Ms. Haney and passed, PR 3 was approved without dissent. (See PR 3 at the end of the Minutes.)

H. Proposed Amendment to Governing Regulations: Faculty Vacation Leave, Sabbatical Leave, and Delay of Probation Period (PR 4)

President Todd said that this is the first reading of PR 4. It is a Governing Regulation change dealing with vacation leave, sabbatical leave, and delay of the probationary period for faculty. The deans and the University Senate have reviewed it. The revision will change a

current policy for 12-month faculty. Previously, the faculty was allowed to carry forward unused vacation leave. This revision will require that faculty use vacation leave within a 12-month period of time. The clarification of eligibility requirements for sabbatical and the processes by which the various categories of events are reviewed and approved for delay of the probationary period are further clarified in this regulation. He asked for approval of the first reading.

Mr. Dawson moved approval, and Mr. Shoop seconded the motion. Ms. Ball asked for any questions or discussions.

Dr. Yanarella said that there has been a significant number of communications to both of the faculty trustees regarding this proposed amendment. It was vetted through the Senate Council. The Senate Council, after raising some issues with administrative representatives, did endorse the policy. Since that time, there has emanated, particularly from medical college faculty, serious concern about the particulars of this. Since this is the first reading, Dr. Yanarella offered a friendly amendment that the proposed recommendation be vetted through the Human Resources Committee in September for an opportunity to examine its various parts and for an opportunity for various faculty to communicate their concern.

Dr. Dembo seconded the motion to amend PR 4.

President Todd said that he did not have any problems with the amendment going through the Human Resources Committee; however, it has been vetted a lot. He pointed out that this has an approximate \$12 million repercussion. While some might feel they have had something taken away from them, this does give the employees the opportunity to tell their management that they should take a vacation. He thinks that this is the right policy. Most companies have gone toward this kind of policy. He urged the Human Resources Committee to have a recommendation to present at the September Board meeting.

Provost Subbaswamy explained that in making this transition there is a one-year grace period that has been given to those that have vacation to be carried forward to next year. They will be able to carry that vacation leave forward. The new policy will start with vacation accrued next year.

Ms. Ball called for a vote on the amendment presented by Dr. Yanarella that PR 4 be accepted for the first reading but go back to the Human Resources Committee before being presented to the Board for the second reading. PR 4 with the amendment carried without dissent.

I. Appointment/Reappointment of Board of Directors University of Kentucky Research Foundation (PR 5)

President Todd recommended approval of the appointment of Hollie Swanson, a faculty member, to the Board of Directors of the Research Foundation. He noted that her biography was included in PR 5. She is an associate professor in the Department of Pharmacology and will be filling an unexpired term ending June 30, 2010.

President Todd also recommended the reappointment of Henry Jackson, a public member, to the Board of Directors of the Research Foundation for a three-year term ending June 30, 2011.

Ms. Tobin moved approval. Her motion, seconded by Judge Patton, carried without dissent. (See PR 5 at the end of the Minutes.)

J. Appointment/Reappointment of Board of Directors University of Kentucky Mining Engineering Foundation, Inc. (PR 6)

President Todd recommended approval of the individuals listed in PR 6 to the Board of Directors of the University of Kentucky Mining Engineering Foundation. He said that the Mining Engineering Board has been very active and noted that this is a very important Board. UK was losing a lot of potential Mining Engineering graduates to other states because of the aggressiveness of those states, and the Mining Engineering Board stepped up. It has been successful at allowing UK to get additional funding from corporations for mining scholarships as well as from the state government the last two sessions. Many of the members are being reappointed.

Mr. Shoop moved approval of PR 6. Dr. Yanarella seconded his motion, and it carried without dissent. (See PR 6 at the end of the Minutes.)

K. Reappointment to Board of Directors of the Fund for Advancement of Education and Research in the University of Kentucky Medical Center (PR 7)

President Todd recommended that the Board approve the reappointment of Henry Jackson to the Board of Directors of The Fund for Advancement of Education and Research in the University of Kentucky Medical Center for a two-year term ending June 30, 2010.

Ms. Patterson moved approval of PR 7. Mr. Williams seconded her motion, and it carried without dissent. (See PR 7 at the end of the Minutes.)

L. Naming of University Pediatric Emergency Center – Makenna David Pediatric Emergency Center (PR 8)

President Todd recommended that the Board of Trustees approve the naming of the pediatric emergency center in the new Albert B. Chandler Hospital the Makenna David Pediatric Emergency Center. There are many people familiar with the Makenna Foundation and the amount of work that it has done for children at the Kentucky Children's Hospital. The naming of the center is very fitting. Dr. Karpf has been working with Greg and Sheila David to have Makenna David's name displayed at the Children's Hospital in the new hospital.

Mr. Dawson moved approval of PR 8. Dr. Sachatello seconded his motion, and it carried without dissent. (See PR 8 at the end of the Minutes.)

M. Naming of University Albert B. Chandler Hospital Chapel – Myra Leigh Tobin Chapel (PR 9)

President Todd said that it was indeed a pleasure to ask the Board to approve naming the chapel in the new Albert B. Chandler Hospital the Myra Leigh Tobin Chapel in her honor. Dr. Karpf has also worked with Ms. Tobin to have her name displayed at the chapel. The chapel is going to be a singularly important piece of the new hospital that is being constructed.

Ms. Haney, along with several other members, made a motion to approve PR 9. Mr. Williams seconded the motion, and it carried without dissent. (See PR 9 at the end of the Minutes.)

N. Candidates for Degrees (AACR 1)

Ms. Tobin, chair of the Academic Affairs Committee, said that AACR 1 involves the candidates for degrees. It is recommended that the president be authorized to confer upon each individual whose name appears on the attached list the degree to which he or she is entitled, upon certification by the university registrar that the individual has satisfactorily completed all requirements for the degree for which application has been made and as approved by the elected faculty of the university and the Academic Affairs Committee of the Board of Trustees.

Ms. Tobin noted that these are the summer 2008 graduates which total 410. In that number are 276 undergraduates and 162 graduate and professional degrees. She moved that the Board approve AACR 1. Dr. Sachatello seconded the motion, and it carried without dissent. (See AACR 1 at the end of the Minutes.)

O. Establishment of the Center for Muscle Biology (AACR 2)

Ms. Tobin recommended that the Board of Trustees approve the establishment of the Center for Muscle Biology in the College of Medicine.

The background is that this center will build on existing strengths to create a nationally-recognizable program that expands research, promotes educational activities, and enhances the university's progress toward Top 20 status. The center will foster basic and translational research collaborations, expand training opportunities for graduate and professional students, provide an intellectual environment for new programmatic grants, enhance faculty recruitment, and give muscle biology at UK an identity for national recognition.

The proposal has been reviewed and recommended by the Senate Committee on Academic Organization and Structure and the Senate Council and recommended for approval by the University Senate. The provost of the university supports this recommendation. As discussed in the Academic Affairs Committee meeting, this is an extremely important move forward.

Ms. Patterson seconded the motion, and it carried without dissent. (See AACR 2 at the end of the Minutes.)

P. Deletion of Degree – College of Health Sciences (AACR 3)

Ms. Tobin said that AACR 3 is the deletion of a degree in the College of Health Sciences. It is recommended that the Board of Trustees approve the deletion of the Doctor of Science degree with a major in Clinical Sciences, effective with the spring 2011 semester.

The reason to close this program is based on resource consolidation. The students currently involved in the program will not be negatively impacted. This proposal has been vetted by the Graduate Council, Senate Council, and University Senate, and the provost supports this recommendation. She moved approval of AACR 3. Dr. Yanarella seconded the motion, and it carried without dissent. (See AACR 3 at the end of the Minutes.)

Q. Change in Name of Degree – College of Agriculture (AACR 4)

Ms. Tobin said that AACR 4 is a change in the name of a degree in the College of Agriculture. This has resulted from interior design moving out of the College of Agriculture. The change in degree is the Master of Science in Interior Design, Merchandising and Textiles with a major in Interior Design, Merchandising, and Textiles to the Master of Science in Merchandising, Apparel, and Textiles with a major in Merchandising, Apparel, and Textiles, effective with the fall 2008 semester.

The proposal has the approval of the Graduate Council, Senate Council, and University Senate, and the provost supports the recommendation. Ms. Tobin recommended approval of AACR 4. Mr. Dawson seconded the motion, and it carried without dissent. (See AACR 4 at the end of the Minutes.)

R. Change in Name of Degree – College of Design (AACR 5)

Ms. Tobin said that AACR 5 is a recommendation that the Board of Trustees approve a change in the name of the Master of Arts in Interior Design, Merchandising, and Textiles with a major in Interior Design, Merchandising, and Textiles to Master of Arts in Interior Design with a major in Interior Design, effective with the fall 2008 semester.

This proposal has the approval of the Graduate Council, Senate Council, and University Senate as well as support from the provost. Ms. Tobin moved approval of AACR 5. Mr. Phelps seconded the motion, and it carried without dissent. (See AACR 5 at the end of the Minutes.)

S. Change in Names of Degrees – College of Education (AACR 6)

Ms. Tobin said that AACR 6 recommends that the Board of Trustees approve the following degree changes, effective with the fall 2008 semester:

1. Change the name of the Masters in Education with a major in School Administration to Masters in Education with a major in Educational Leadership

2. Change the name of the Specialist in Education with a major in Administration and Supervision to Specialist in Education with a major in Educational Leadership
3. Change the name of the Doctor of Education with a major in Administration and Supervision to Doctor of Education with a major in Educational Leadership

When the name of the Department of Educational Leadership and Studies was changed several years ago, the names of the degrees were not changed at that time. This proposal has the approval of the Graduate Council, Senate Council, and University Senate as well as the provost. Ms. Tobin moved approval of AACR 6. Mr. Williams seconded the motion, and it carried without dissent. (See AACR 6 at the end of the Minutes.)

Ms. Tobin reported that Dr. Philipp Kraemer, associate provost for undergraduate education, gave the committee an end of the academic year update. Dr. Jeannine Blackwell, interim associate provost for undergraduate education, offered a few words as she takes on that roll while a search is made.

T. Audit Subcommittee Report

Ms. Wickliffe, chair of the Audit Subcommittee, reported that the Audit Subcommittee met that morning. There were two items of business.

The Audit Subcommittee heard from the university's new external auditors, BKD. Mary McKinley is the partner in charge for the UK audit. The subcommittee reviewed the firm's preliminary audit plan for the year ending June 30, 2008. The subcommittee had the opportunity to ask questions about the audit engagement and other areas that were emphasized in this year's audit.

The subcommittee also heard from Joseph Reed, UK's Senior Director of Internal Audit. Mr. Reed presented the 2008-09 Internal Audit work plan for the subcommittee's review. The plan calls for over 12,000 hours of audit work. They will focus on the following audit service areas:

- Continuous monitoring
- Compliance
- Core reviews
- Advisory
- Information systems

The subcommittee also reviewed the progress on the 2007-08 work plan.

The subcommittee's next meeting will be in October to receive the management's presentation of the audited financial statements for the year ended June 30, 2008.

U. University Health Care Committee Report

Mr. Hardymon, chair of the University Health Care Committee, reported that most of the trustees attended the hospital retreat on Monday. He said that he wanted to report on the year-to-date financials through April. The outstanding things are that the revenue is running over budget. It is hard to compare with last year's budget because UK only had Good Samaritan for a limited time, but it is important to look at the operating margin. UK is over budget in dollars, but in margin, it is at 6.4 percent today. It was 4.5 percent last year. This is another way of showing that Good Samaritan has come in very well. The committee feels that UK is on track to make the operating income previously predicted.

The committee went over the budget information in great detail. It saw that as part of the consolidated budget and approved it.

Mr. Hardymon said that it was an excellent retreat. Retreats are very hard to put on. There is a tendency to talk about a long-range item that the committee talks about for the next several years, and it does not do much about it. The committee was able to tag both results with vision in this particular retreat, which is a very strong goal.

The committee had two presentations on the market for hospital care. It is obvious that UK is doing much better than the market as a whole. In turn, you must be conscious of markets because they do have an influence. It was good having that information and good to have the speakers comment on performance individually. The committee discussed the current and future facilities. It also covered operational issues such as quality, safety, and efficiency that are very important to the committee and the board. The committee has goals, and it is tracking those goals.

The College of Medicine has had great success in improving faculty and good students. Provost Subbaswamy gave an update on the research growth. All in all, it was a good day at the retreat.

Mr. Hardymon referred to UHCCR 1 which recommends that the Board approve the appointment of new board members to the Board of Directors of the Center on the Aging Foundation. He moved that the Board approve the three individuals listed in Exhibit A and noted that a biographical statement about each was included behind the summary page. On behalf of the committee, he moved approval of UHCCR 1. Mr. Shoop seconded the motion, and it carried without dissent. (See UHCCR 1 at the end of the Minutes.)

V. Finance Committee Report

Mr. Branscum, chair of the Finance Committee, reported that the Finance Committee met that morning and had a very good meeting with most of the trustees in attendance. FCR 1 through 4 were consent items. They include gifts and pledges totaling \$2,563,273. He highlighted the \$1 million gift and pledge from the Makenna Foundation. In recognition of the

foundation's many contributions to the university, the Committee on Naming University Buildings recommended the pediatric center to be named the Makenna David Pediatric Emergency Center, and this was presented and approved in PR 8.

Mr. Branscum also recognized the \$1 million gift and pledge from Dr. Viji and his wife for their gift and pledge to fund a professorship in India studies in the Gatton College of Business and Economics.

W. Department of Behavioral Science Internal Transfer for Vaughan Professorship in Behavioral Science Quasi-Endowment (FCR 5)

Mr. Branscum said that FCR 5 is a request to approve an internal transfer of \$100,000 from the College of Medicine's Department of Behavioral Science to create and endow the Vaughan Professorship in Behavioral Science Quasi-Endowment in the Department of Behavioral Science in the College of Medicine. These funds combined with previous pledges will provide full funding for the endowed professorship. On behalf of the Finance Committee, he recommended approval of FCR 5. Mr. Dawson seconded the motion, and it carried without dissent. (See FCR 5 at the end of the Minutes.)

X. Establishment of Quasi-Endowment for the Endowed Opera Studies Chair Support Fund (FCR 6)

Mr. Branscum said that FCR 6 is the request to establish a quasi-endowment for the Endowed Opera Studies Chair Support Fund. The university has received a commitment of \$10,000 from the UK Athletic Association in honor of Everett McCorvey, Director of Opera in the College of Fine Arts. The quasi-endowment will provide support for education and research related to Opera Studies. On behalf of the Finance Committee, he recommended approval of FCR 6. Ms. Tobin seconded the motion, and it carried without dissent. (See FCR 6 at the end of the Minutes.)

Y. Name Change Request for the University Professorship in Dentistry (FCR 7)

Mr. Branscum reported that FCR 7 was withdrawn from the agenda. It will be brought back at a later time.

Z. 2008-2009 Operating and Capital Budget (FCR 8)

Mr. Branscum said that FCR 8 is the 2008-2009 Operating and Capital Budget. The committee received a very good presentation by Ms. Angie Martin, vice president for planning, budget, and policy analysis. Mr. Martin, her staff, Mr. Butler, and other administrative support staff did an excellent job in putting a very challenging budget together this year.

Mr. Branscum highlighted a few items that Ms. Martin gave in a PowerPoint presentation to the committee.

- The budget totals \$2.2 billion, a net increase of \$113.7 million, or a 5.4 percent increase. The increase is primarily from hospital revenues and transfers from KMSF, Inc. for physician salaries.
- The Undesignated General Fund revenues, including state funds and tuition revenue, will be \$9.2 million less in 2008-09 because of the 6 percent state budget cut and an expected decline in enrollment.
- The Undesignated General Fund expenses are expected to increase \$11 million, creating a \$20.2 million funding gap.

He commended everyone for pulling the budget together. On behalf of the Finance Committee, he recommended approval of FCR 8. Mr. Dawson seconded the motion, and it carried without dissent. (See FCR 8 at the end of the Minutes.)

AA. Expand and Upgrade Livestock Disease Diagnostic Center (LDDC) (FCR 9)

Mr. Branscum said that FCR 9 is a request for approval to initiate Phase II of the Expand and Upgrade Livestock Disease Diagnostic Center (LDDC) project and consolidate Phase I and Phase II for a total combined scope of \$28.5 million.

In 2004, the Kentucky General Assembly authorized Phase I of the Diagnostic Center project for \$8.5 million in state bonds. The 2008 Kentucky General Assembly authorized \$20 million in state bonds for Phase II. The university will request authorization from the Capital Projects and Bond Oversight Committee to consolidate Phase I and Phase II at its July meeting.

Mr. Branscum said that it is his understanding that this is the only new capital project that UK has slated, and the RFPs for construction manager were sent out with the intent upon its approval to bid in October, start construction in November, and be completed by the opening of the World Equestrian Games in 2010. On behalf of the Finance Committee, he recommended approval of FCR 9. Ms. Haney seconded the motion, and it carried without dissent. (See FCR 9 at the end of the Minutes.)

BB. Lease/Purchase of Equipment and Information Technology Items (FCR 10)

Mr. Branscum said that FCR 10 is a request to approve the acquisition of five major equipment and information technology items totaling \$2.78 million by lease-purchase financing. The university's Debt Committee has determined that this request is consistent with the Debt Policy. A description of each item is provided as an attachment to FCR 10. On behalf of the Finance Committee, he recommended approval of FCR 10. Mr. Hardyman seconded the motion, and it carried without dissent. (See FCR 10 at the end of the Minutes.)

CC. Disposal of Personal Property (FCR 11)

Mr. Branscum said that FCR 11 is the disposal of personal property. The annual plan for disposal of personal property is submitted to the Board each year. This FCR will allow the

disposal of items having values of less than \$25,000 during fiscal year 2008-09. The previous limit, established in 1994, was \$10,000. The surplus personal property may include minor equipment, vehicles, livestock, and other materials no longer needed by the university. The various methods of disposal for each type of property are listed in the FCR. On behalf of the Finance Committee, he recommended approval of FCR 11. Mr. Dawson seconded the motion, and it carried without dissent. (See FCR 11 at the end of the Minutes.)

DD. Capital Construction Report (FCR 12)

Mr. Branscum said that each quarter the Finance Committee receives updates from Mr. Bob Wiseman, vice president for facilities management. FCR 12 is the lengthy Capital Construction Report which refers only to projects that had activity within this quarter. The Capital Construction Report for the three months ending March 31, 2008 represents six new contracts, five contracts completed, 1 contract amended, and 11 change orders greater than \$25,000:

The six new contracts were:

- A \$4.9 million contract with Woodford Builders for the Upgrade Cancer Center Radiologic Facility project;
- A \$687,001 contract with Denham Blythe Company for the Renovate Central Vivarium project;
- A \$3 million contract with Denham Blythe Company for the Expand Chemistry Physics Building project;
- A \$956,000 contract with Woodford Builders for the Renovate M. I. King Library project;
- A \$654,000 contract with M. P. Kelly Construction for the Fit-up Education Space in Health Sciences Building project; and
- A \$1.59 million contract with Denham Blythe Company for the Upgrade Fume Hoods T. H. Morgan – Life Safety project.

The five contracts completed were:

- The \$3.3 million contract with Woodford Builders for the Upgrade Surgical Services project;
- The \$1.79 million contract with Lagco for the Replace Steam and Condensate Pipe project;
- The \$5.1 million contract with Jarboe Construction Company for the Renovate-Expand Boone Faculty Center project;
- The \$1.2 million contract with Woodford Builders for the Renovate 3rd Floor Little Library project; and
- The \$834,907 contract with The Wagner Company for the Renovate Hospital Nursing Units – Hospital (NICU) project.

The 11 change orders that were greater than \$25,000 were all typical start up type change orders.

On behalf of the Finance Committee, he recommended acceptance of FCR 12. Ms. Wickliffe seconded the motion, and it carried without dissent. (See FCR 12 at the end of the Minutes.)

EE. Investment Committee Report

Mr. Wilcoxson, chair of the Investment Committee, said the Endowment had a market value at March 31, 2008 of \$888.6 million, decreasing \$28.0 million in the current fiscal year. The fiscal year-to-date Endowment investment loss through March 2008 was -6.9 percent.

For the eleven months ended May 31, 2008, the Endowment had an estimated return of -2.5 percent, underperforming the policy benchmark return by 182 basis points due to underperformance by the U.S. equity asset class.

The Investment Committee met on Monday, June 16 and approved a revised investment policy, which includes major revisions to the target asset allocation and manager structure. One of the most important things in investing is the asset allocation, and the committee is making changes. The committee is impressed with the new consultant, R. V. Kuhns & Associates as well as UK's staff.

Investment staff and the newly hired consultant performed a detailed review of the policy in conjunction with an asset allocation study. New asset class allocations to absolute return, real return and value-added and opportunistic real estate will be implemented in order to increase future endowment returns and decrease the volatility (risk) of future returns. The university will have a 36 percent target allocation to alternative investments versus the previous target of 13 percent. This is comparable to the university's nineteen benchmark institutions as well as other institutions with large endowments.

The committee is moving 23 percent of the U.S. Equity, Non U.S. Equity, Global Equity, and Fixed Income asset classes over to alternative investments, including private equity, real return, real estate and absolute return. While some people may not like that, the committee has to make decisions based on returns, past history, and what is going on in the market today. Most people probably know what private equity, real return, and real estate are, but they may not know what absolute return is, which consists of investing in hedge funds.

Mr. Wilcoxson said that he thought that the committee would have never gotten into hedge funds, but that time is here. That is part of the committee's move. Currently, there are zero dollars in hedge funds; however, the committee is going to go to 10 percent in hedge funds. Hedge funds are designed to provide consistent positive returns with relatively low correlation to other asset classes. The university will utilize a fund-of-funds strategy that invests in a diversified range of underlying hedge funds. The consultant informed the committee that there are more than 8,000 hedge funds out there. There might be 200 or 250 hedge funds that are any good. Be assured that the committee will be dealing with a fund-to-fund manager who will be dealing with those 250 and not the others.

The Investment Committee also approved an implementation plan for the revised asset allocation and manager structure, which includes the issuance of several RFPs in the coming months. The Investment Committee is planning to meet in special sessions on October 13, 2008 and December 8, 2008 for the purpose of interviewing prospective investment managers.

Mr. Wilcoxson added that in the last ten years that ended in March 2008 the total UK Endowment return by asset classes for the 10 years was 6.0 percent, and the policy benchmark was 5.9 percent.

Mr. Williams said that the Investment Committee is set up differently and functions independently from all of the other committees, and there is a reason for that. With the change in philosophy, he requested some information from Mr. Wilcoxson, the Treasurer's Office, or one of the managers. He said that he would like more detail and explanation about the significance of the committee's latest decisions. He needs to know more about hedge funds and what that means before he will be comfortable with it.

Mr. Wilcoxson said he would be pleased to furnish that information as well as historical data on hedge funds.

Ms. Ball pointed out that this will be implemented in the course of probably a year. It will not automatically happen right away.

FF. Student Affairs Committee Report

Ms. Haney, chair of the Student Affairs Committee, reported that the committee met that morning. Jared Tippets, director of new student programs, shared some of the upcoming events for K Week this fall. K week follows up on summer advising to provide orientation for new students. It helps acclimate the students to campus, introduces them to the myriad opportunities for academic and co-curricular success, and informs them of activities in the greater Lexington area as well as the town and gown programs in which they can participate.

There is a new video available on the new student programs web site. This video helps introduce all new students, parents, and families to UK and gives them an opportunity to learn about what to expect when they arrive on campus.

Last year there were approximately 170 events during K Week. Some new events have been added this year, including a parents' reception so parents can meet with university staff and feel better about leaving their children on campus. They also have added more student assistants who are part of K Week. New students are more likely to listen to experienced students more than somebody who looks like their mother, grandmother, or grandfather.

Approximately 96 percent of new students participated in some K Week activities last year. The staff is not satisfied with that percentage and hopes that the number will increase this year. It is an important, far reaching aspect in welcoming new students, making them more comfortable on campus and hopefully enhancing the university's retention rate.

New Student Government President Tyler Montell shared his goals and plans for Student Government for the upcoming academic year. He would like to see stronger connections between the students and the university. He is meeting with different departments to learn what they can do for students. He is meeting with the staff because he wants to find out what the expectations are for students so that students in turn know how to meet those expectations. He hopes to increase student representation on various Lexington community committees and create programs to help keep track of students when they are involved with community activities.

A concern was expressed about the transfer of University Health Services to the executive branch of health affairs. This is quite a major change for some members of the committee, and several people were not sure what was happening. The committee wants to make sure that it is kept informed about the level of student services and student processes. The committee would like to request frequent updated information on the transition of the program as well as actual program organization.

Ms. Haney concluded her remarks by complimenting the excellent staff in Student Affairs and the outstanding student body.

GG. Executive Committee Report

Ms. Ball, chair of the Executive Committee, reported that the committee met at 11 o'clock that morning. Most all of the Board members attended the committee's meeting. The purpose of the meeting was to discuss President Todd's evaluation, consider his bonus, and an extension of his contract.

Ms. Ball reported that there was a great response to the evaluation form. In totaling the percentage on the forms, the evaluation score was 96.8 percent. It was a very high performance year for the president. She asked for a motion for President Todd to receive \$95,500 as a performance award for the fiscal year 2007-08. She said that the additional \$50,000 of the bonus will be retained by the university to be designated to campus programs that will be determined at later dates by President and Mrs. Todd. Mr. Shoop made the motion for approval of a \$145,500 bonus with \$50,000 of the bonus to be retained by the university and designated to various programs by President and Mrs. Todd later. Judge Patton seconded the motion, and it passed without dissent.

Ms. Ball said the next item is a one-page amendment to President Todd's employment contract. The only change is in the bonus, which states that the bonus could be deferred without it becoming a taxable item to him. This wording enables the Board to defer the bonus. The bonus is increased by \$25,000 per year. She asked for a motion to approve the extension of President Todd's contract to 2011. Mr. Branscum moved approval. His motion, seconded by Mr. Williams, carried without dissent. President Todd received a round of applause.

Mr. Shoop said that it is very admirable of President and Mrs. Todd to donate \$50,000 of his bonus back to the university. He should really be commended for that act. He has done that for years, and this is not the first time.

President Todd expressed appreciation to the Board. He said that the campus would not look, feel, or operate the same if it was not for his wife Patsy. She is a major player in a lot of things that happen around campus and at their home. He said that he appreciates the things that Patsy has done to this point. Being native to the state, he and Patsy are honored and challenged by having the position. He thanked the Board for its confidence.

HH. Athletic Association Board of Directors Report

Mr. Dawson reported that the Athletic Board met May 1. Dr. Todd commended 53 student-athletes who made the SEC Honor Roll this year. He noted that UK trumped Vanderbilt this year for the first time.

Athletics Director Mitch Barnhart commended four student-athletes for their dedication to academics and community service. Each had recently received a postgraduate scholarship. Those student-athletes were Greg Dombrowski (Baseball), Crissy Cannon (Gymnastics), Ashley Dimkich (Softball), and Wesley Woodyard (Football).

Mr. Barnhart informed the board of three new hires since the last meeting: Chris Thurmond (football), Kyra Elzy (women's basketball), and Matt Insell (women's basketball). He also discussed UKAA's commitment to the diversity initiative as well as its participation in the campus Diversity Fair. He gave a brief recap of the spring sports season.

Mr. Frank Butler recommended approval of the FY09 budget presented by Rob Mullens during the Finance Committee meeting and the Board meeting. The recommendation was unanimously approved by the Athletic Board.

Mr. Frank Shoop congratulated the Athletics Department for their success with this year's CATSPY's awards. President Todd thanked Professor Gerald Smith for his time served on the board. He wished Professor Smith well.

II. Business Partnership Foundation Board Report

Ms. Patterson reported that the Business Partnership Foundation Board had meetings in October and February. Three new members were appointed to the Board. The focus in both meetings was on the proposed new building for the Gatton College. Dean Sudharshan reported that close to \$20 million had been pledged out of a goal of \$25 million, which is pretty spectacular. He also provided information for two signature undergraduate programs: Global Scholars Program and Scholars in Engineering and Management, which is a joint program with the College of Engineering. He provided details about the 11-month MBA program that is doing very well and is attracting diverse students and employers.

There is an Executive Development Program being developed, and the College has hired a part-time consultant to help develop the program.

At the February meeting, the architects for the concept design phase for the new building gave a detailed presentation of the concept, its rationale, and renderings of the exterior. It is an

exciting time on the board.

JJ. The Fund for Advancement of Education and Research in the University of Kentucky Medical Center (The FUND)

Ms. Ball distributed a report that provided background information about the establishment and purpose of The FUND. She reported that the board meets once a year, and that meeting was May 29. At that meeting, the board approved the \$16.1 million 2008-09 unrestricted FUND budget. Of that amount, \$12.9 million, or 80 percent, is generated by the clinical programs in the College of Dentistry, with the remaining amounts generated by the University Health Service, the Colleges of Pharmacy, Nursing, and Health Sciences, Pilot Research, and interest earnings. The 2008-09 restricted FUND budget is \$3.5 million, and \$3.4 million, or 96 percent, is donated from KMSF to the College of Medicine for purposes of enhancement of programs in that college.

KK. The University of Kentucky Research Foundation Report

Judge Patton reported that The University of Kentucky Research Foundation board met on May 27. The board heard from the Nominating Committee and approved the nominations of the individuals that the Board of Trustees voted on and passed in PR 5.

The board heard from President Todd and Dr. Tracy about the continued growth in research by the faculty as well as research by undergraduates. They also discussed the general decline in federal grants, which is impacting all the universities.

President Todd reported that the university is presently negotiating with five new companies about possibly locating at Coldstream. There are now 49 companies there, including six new companies.

Judge Patton concluded his report by mentioning that the board adopted a resolution thanking and honoring retiree Henry Clay Owen.

LL. University of Kentucky Mining Engineering Foundation Report

Dr. Yanarella reported that the Mining Engineering Foundation board met twice this past academic year. The fall meeting was November 9, 2007. The board heard a number of reports. One was from the College of Engineering Associate Dean, Richard J. Sweigard who underlined that the College was undertaking a plan to strengthen recruiting efforts and to promote retention of students as well as being involved in a variety of programs to engage the interest of young Kentuckians in the areas of math, science, and technology.

The Mining Engineering Department Chair Rick Honaker reported that the department has the highest enrollment since the early 1980s. There were several other reports at this meeting, including the Nominating Committee report that presented a list of names of nominees to the Mining Engineering Foundation Board. Those names were approved by the Board of Trustees in PR 6 at this meeting.

The Fund Raising Committee reported donations of \$44,450 since the last meeting.

At the spring meeting held April 18, 2008, esteemed President Todd spoke of the success of the Mining Engineering Department in raising scholarship funds from the mining industry and from the Kentucky legislature as well as the department's recruitment program. He also mentioned the success of the Robinson Scholars Program and the impact those graduates are having on their communities when they return.

Dean Lester commented that the Mining Department and faculty were very engaged with their industry, following precisely the course that President Todd had outlined. He thanked Bill Caylor for his efforts with the legislature that resulted in an increase in scholarship money for mining students.

At this meeting, Mining Engineering Department Chair Rick Honaker reported again on enrollment and degree production indicating that both had increase.

Finally, the Nominating Committee issued several other nominations that the Mining Engineering Foundation Board approved.

The Fall 2008 meeting is tentatively scheduled for the second week in November.

MM. Resolution Honoring Jeff Dembo

Dr. Yanarella said it was his pleasure and honor to put forth a resolution on behalf of the Board of Trustees to a friend, a mentor, and an exemplar over the last six years, one Jeff Dembo. The resolution is as follows:

WHEREAS, Jeffrey B. Dembo, a member of the University of Kentucky Board of Trustees since 2005, has demonstrated exceptional dedication and commitment to UK as a faculty trustee and in a number of other important roles, and

WHEREAS, he has served with distinction and tireless service as a member of the Board's Human Resources Committee, Student Affairs Committee, and University Relations Committee, and

WHEREAS, he has endeavored to maintain close communications with the University faculty through periodic e-mails, surveys, and individual conversations, and

WHEREAS, he has previously served as the university's academic ombud, chair of the University Senate Council, and presiding officer of the University Senate, and

WHEREAS, he has twice been voted instructor of the year by students in the UK College of Dentistry, where he serves as a professor of oral and maxillofacial surgery, and

WHEREAS, he also holds joint appointments in the Departments of Surgery and Anesthesia in the UK College of Medicine,

NOW THEREFORE BE IT RESOLVED that the University of Kentucky Board of Trustees extends its heartiest thanks and congratulations to Jeffrey B. Dembo and wishes him continued success in all of his future endeavors.

Dr. Dembo received a round of applause from the Board.

Dr. Dembo said that it has been a privilege and an honor to have had the chance to work with this board and with President Todd and his administration. It is primarily because of the common bond of the love for and dedication to the University of Kentucky. He said that he deeply appreciated and cherished the friendships that he has made while on the board as well.

Each member brings their own opinions, occupations, life experiences, values, and certainly visions for what the future should hold not only for the university but for the world. One of the most effective ways for somebody to personally grow is to be able to interact with people whose opinions are not the same but often differ from one's own because the best way to grow is to learn how other people view things and to be able to compare opinions.

Sitting around the table discussing, debating, questioning, revamping, and reinventing things has afforded him the privilege of great personal growth, and he is a better person for having had the chance to be with the Board.

Dr. Dembo said that he is confident that his colleague Dr. Everett McCorvey, who will be an equally and probably better, more effective board member than him, will also effectively represent the faculty of the university.

Even though it will be from the sidelines, he will be looking forward to watching the board question, ponder, reinvent, and debate the future of the university. He thanked the Board for the privilege.

Dr. Dembo received a round of applause from the Board.

NN. Resolution Honoring Nick Phelps

Ms. Haney said it was a delight and pleasure for her to present the resolution honoring Nick Phelps. She has really enjoyed getting to know and work with him over the past year. She read the following resolution:

WHEREAS, Nicholas C. "Nick" Phelps of Goshen, Kentucky, a member of the University of Kentucky Board of Trustees for the past year, has demonstrated tremendous dedication and commitment to UK, serving as Student Government President, Senate President, and Cabinet Secretary during his college career, and

WHEREAS, he has served as president of his fraternity, Sigma Chi, and as an executive officer of DanceBlue, the state's largest student-run philanthropy, while also earning a dual degree in economics and finance, and

WHEREAS, he was recently selected as the Omicron Delta Kappa (ODK) Region 3 Leader of the Year, making him one of only four students in the country to be considered for ODK's National Student Leader of the Year Award, and

WHEREAS, during his tenure on the UK Board of Trustees, Nick served on the Academic Affairs Committee and the Student Affairs Committee and represented the interests of his fellow students most admirably, and

NOW THEREFORE BE IT RESOLVED that the University of Kentucky Board of Trustees extends its heartfelt thanks and congratulations to Nicholas C. Phelps and wishes him continued success in all of his future endeavors.

Mr. Phelps received a round of applause from the Board.

Mr. Phelps expressed appreciation to everybody around the table and around the room. He said that he got to work with many people on campus, and the experience was special and unbelievable. He said that he hoped he lived his life so that one day he could return to the Board table in another way. The University of Kentucky could not have pieced together a better four years for him. He knows that he is one of many students who can say that, and he hopes that the Board will continue to make it that way for many to follow. He thanked everyone for his wonderful experience.

OO. Announcement and Other Comments

Ms. Ball announced that the Board will have a retreat in August. A tentative agenda and details for the retreat will be sent to the Board closer to the date.

Mr. Williams recognized the outgoing chair of the Staff Senate Kenny Blair, who is retiring from the position. During this year, Mr. Blair accomplished quite a bit and led the Staff Senate admirably. For the first time, the Staff Senate coordinated the Staff Appreciation Day this year. It also conducted senatorial elections, and for the first time, UK Good Samaritan Hospital employees are represented in the Senate.

Mr. Blair made contact with other staff senates and councils with the other state universities around the state. He particularly worked with them during the legislative session to get their support for higher education and to show that the staff of all of higher education has a vested interest. He expressed appreciation to Mr. Blair for his good work this year and said he will certainly miss working with him.

Mr. Williams also recognized the new chair of the Staff Senate Bart Miller. He said that Mr. Miller is a colleague in Human Resources and noted that they will be working very closely together.

President Todd recognized the incoming chair of the Senate Council Dr. David Randall and asked him to stand and be recognized. He said that Dr. Randall attended 90 percent of the meetings he had with former chair Dr. Kaveh Tagavi, and it was very helpful to get to know him through those meetings and discussions.

President Todd also thanked Kenny Blair for the wonderful job that he did. He said that he was surprised someone of his youth would take on that role. Mr. Blair did an outstanding job. He said that he looked forward to working with Mr. Miller as well.

PP. Meeting Adjourned

With no further business, Ms. Ball asked for a motion of adjournment, and the meeting adjourned at 2:58 p.m.

Respectfully submitted,

Barbara W. Jones
Assistant Secretary, Board of Trustees

(PR 2, 3, 4, 5, 6, 7, 8, and 9; AACR 1, 2, 3, 4, 5, and 6; FCR 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12; and UHCCR1 which follow are official parts of the Minutes of the meeting.)

Office of the President
June 17, 2008

1. UK Confers a Record 6,500 Degrees at its 141st Commencement

A record 6,500 candidates for degrees were honored during the University of Kentucky's 141st Commencement on May 4 in Lexington's Rupp Arena. This includes students who earned degrees in August 2007 and December 2007, along with candidates for degrees in the 2008 spring semester. Beverly Kirk, a UK alumna and award-winning TV and radio news reporter based in Washington, D.C., and Admiral Mike Mullen, chairman of the Joint Chiefs of Staff, addressed the graduates. The \$5,000 Kirwan Memorial Prize for outstanding contributions to original research or creative scholarship was presented to UK ophthalmologist and professor of physiology, Dr. Jayakrishna Ambati, an international authority on age-related macular degeneration. Lynne A. Hall, the Marcia A. Dake Professor of Nursing Science and associate dean for research and science in the UK College of Nursing, received the \$2,000 William B. Sturgill Award for outstanding contributions to graduate education. Two student leaders in UK's "DanceBlue" benefit, Megan K. Tolley of Louisville and Joseph David Ritchie of Bardstown, and non-student William R. Grimes of Morehead, who operates a free health care clinic in a rural eastern Kentucky community, received the 2008 Algernon Sydney Sullivan Medallions. The graduating senior who spoke on behalf of the Class of 2008 was Christine Tillman, a nursing major from Paducah.

2. UK Wins \$10 Million NIH Grant to Fight Effects of Superfund Wastes

UK has received a grant of more than \$10 million for a multi-pronged effort to study the relationships among environmental pollutants, nutrition and disease. The grant, funded by the National Institutes of Health, will support the efforts of more than 50 scientists and students representing more than 15 academic departments in the colleges of Agriculture, Arts and Sciences, Engineering, Medicine, and Pharmacy. UK's program, "Nutrition and Superfund Chemical Toxicity," was one of only two proposals selected for funding from among 18 competing grants submitted nationally to the NIH's National Institute of Environmental Health Sciences under its Superfund Basic Research Program (SBRP). UK joins 13 other universities with ongoing Superfund programs. Superfund sites are defined by the U.S. Environmental Protection Agency as uncontrolled or abandoned places where hazardous waste is located. More than 500 such sites are in Kentucky, a state where rates of cardiovascular disease, cancer, diabetes, and hypertension are well above national averages. The UK grant, written by program director Bernhard Hennig of the College of Agriculture, supports five projects that address ongoing Superfund-related issues in the Commonwealth, and several core activities, including community outreach. More information about the program is

available online at www.uky.edu/Research/Superfund/.

3. UK's Todd Joins Three Other Presidents for 'Energizing Kentucky'

UK President Lee T. Todd Jr. joined University of Louisville President James Ramsey, Centre College President John A. Roush, and Berea College President Larry Shinn in sponsoring and hosting "Energizing Kentucky," a conference in Louisville earlier this month that focused on the impact of rising energy costs on Kentucky businesses and industries and ways those businesses are adjusting. The conference featured Sandra Meyer, Duke Power Co.'s vice president for Kentucky and Ohio, and Pierce Lyons of Alltech among the leading speakers. Energizing Kentucky is a series of three conferences focusing on energy issues facing the Commonwealth, and makes the presidents of several of Kentucky's leading institutions of higher education the moderators of the discussions of these critical issues. The second conference is scheduled for September in Louisville on governmental policies and will feature *New York Times* columnist Thomas Friedman as keynote speaker. The third conference, date to be announced, will focus on the education response.

4. Kentucky Children's Hospital to Lead National Leukemia Study

UK HealthCare's Kentucky Children's Hospital researchers will lead a national study for children with acute myeloid leukemia (AML). The study is based on laboratory research that was performed at UK's Markey Cancer Center. The principal investigator for the national study is Dr. Jeff Moscow, vice chair and professor of pediatrics in the division of hematology/oncology of the UK College of Medicine, and a physician at Kentucky Children's Hospital. The study, sponsored by the Children's Oncology Group and funded by the National Cancer Institute, involves children with AML who have experienced either a relapse of their disease, or who were unable to achieve a remission with standard therapy, Moscow says. The study will test the drug Bortezomib (Velcade) in combination with chemotherapy. Bortezomib is a new drug that is used to treat multiple myeloma in adults, but it has never before been used to treat leukemia in children. The clinical trial is the direct result of laboratory observations made at the UK Markey Cancer Center by Dr. Craig Jordan. In a series of key studies, Jordan demonstrated that primitive cells that give rise to leukemia cells, called leukemia stem cells or leukemia initiating cells, are especially sensitive to Bortezomib in combination with chemotherapy. Jordan is now at the University of Rochester.

5. Faculty Elects McCorvey as Representative on UK Board of Trustees

Everett McCorvey, the Lexington Opera Society Endowed Chair of Opera in the UK College of Fine Arts and director of UK Opera Theatre, has been elected as a faculty representative to the UK Board of Trustees, replacing Jeff Dembo, whose term expires June 30, 2008. McCorvey was elected to a three-year term, which will expire June 30, 2011. A native of Montgomery, Alabama, McCorvey received his undergraduate and graduate degrees, including a doctorate in musical arts, from the University of Alabama. A professor of voice at UK's School of Music, McCorvey is credited for the growth the

university Opera Theatre has achieved. Under his leadership and with the support of the Lexington Opera Society, the opera program has become one of the most sought after opera educations in the country, on par with other noted programs at Julliard, Florida State, and Indiana.

6. College of Medicine Joins Georgetown College to Recruit Minorities

The UK College of Medicine has entered into a partnership with Georgetown College to enhance diversity in medical education through coordinated minority student recruitment efforts. Georgetown College will identify prospective “partnership students” as early as sixth grade, selecting students from populations that are underrepresented in medical professions. As Georgetown nurtures these students through their college careers, UK’s College of Medicine will provide special opportunities for them to observe, shadow, and be mentored by medical professionals. Once a student is on track toward a medical career, UK will become more directly involved, helping prepare students for their application to medical school. Each year, up to two Georgetown College partnership graduates, who academically qualify and are selected for admission, will be provided financial assistance to the UK College of Medicine.

7. UK Reports its Highest-ever Six-year Graduation Rates

UK reported the highest six-year graduation rates in its history, with its six-year graduation rate for 2007 (those students entering the university in 2001) rising to 61.2 percent, the highest in the state among public universities. The rate is up from 59.1 percent for 2006 or for students who entered UK in 2000. At the same time, graduation rates for African-American students also were at historic highs at 50.3 percent for 2007, up from 45 percent the previous year. That rate also is highest among all public institutions in the state. This past year also marks the first time African-American graduation rates have exceeded 50 percent at UK. The student-faculty ratio has dropped in the last year to 17-to-1 from 18-to-1. The drop is the result of a net increase in faculty of more than 60 this academic year, an increase made possible by legislative funding of UK’s Top 20 Business Plan in 2006. UK received an additional \$20 million in state support in 2006 for its business plan that was made available in 2007-2008. The bulk of those dollars were used to increase the size of the faculty as part of an effort to lower student/faculty ratios, improve graduation rates and retention, and continue to expand research and public service efforts.

8. UK Eliminates Paper Schedule of Classes and Bulletins for Online Publication

Students needing to register for future semesters will soon find their courses with the click of a mouse, rather than a turn of a page. Starting with spring 2009, the schedule of classes will be paperless. Officials say the decision to not print a traditional schedule book will bring both environmental and economic benefits to the university, especially in light of recent budget cuts to higher education. UK will continue to print the schedule of classes for the summer advising conferences. This publication will be a newspaper format that will be much smaller and more cost effective. UK will also go paperless with

the Undergraduate Bulletin starting with the 2008-09 academic year. Both publications will be available for download on the Registrar's Web site.

9. Latest *America's Top Doctors* Includes 20 UK HealthCare Physicians

Twenty UK HealthCare physicians are named in two of the latest *America's Top Doctors* lists. Published by Castle Connolly Medical Ltd., the 7th edition of *America's Top Doctors* and 3rd edition of *America's Top Doctors for Cancer* recognize specialists who are considered among the best in both patient care and research. More than 250,000 doctors nominated their top colleagues, including those to whom they would refer their own patients. Less than 5 percent of all doctors in the nation are listed as a Top Doctor. UK HealthCare physicians included in *America's Top Doctors* are Joseph R. Berger, neurology; Timothy Bricker, pediatric cardiology; Leslie Crofford, rheumatology; Paul DePriest, gynecologic oncology; Philip A. DeSimone, medical oncology; Dennis E. Doherty, pulmonary disease; James E. Ferguson II, maternal and fetal medicine; Darren Johnson, orthopaedic surgery; Patrick C. McGrath, surgery; Franklin C. Miller, maternal and fetal medicine; Timothy Mullett, thoracic surgery; Roy Patchell, neuro-oncology; Edward H. Romond, medical oncology; Randall G. Rowland, urological surgery; Joseph Valentino, otolaryngology; John R. van Nagell, gynecologic oncology; and Byron Young, neurological surgery. DeSimone, DePriest, McGrath, Mullett, Patchell, Romond, Rowland, Valentino, van Nagell and Young also are listed in *Top Doctors for Cancer*, along with Kenneth B. Ain, medical oncology and endocrinology; Jeffrey Moscow, pediatric hematology-oncology; and Marcus Randall, radiation oncology.

10. Kentucky Transportation Center Wins \$3.5 Million for Transit Security Center

The Kentucky Transportation Center's Intelligent Transportation Systems section, headed by Joe Crabtree, has won a \$3.5 million grant over the next three years to continue development of the North American Transportation Security Center. The Kentucky Transportation Center, which is headquartered at UK and affiliated with the UK College of Engineering, will collaborate with Morehead State University, Coldstream Digital, and General Dynamics Advanced Information Systems on this project. The shipment of hazardous materials provides a target for terrorists. In Kentucky, 70,000 trucks pass through the state on a daily basis, with some of them carrying hazardous material. The ability to track hazmat shipments on a real time basis is essential for providing an early warning of an impending terrorist attack. The project will allow for the development of a functional prototype of a hazmat truck tracking center. The project will complement a congressional directive to the Transportation Security Administration to develop a program that tracks motor carrier shipments of security-sensitive materials.

11. College of Law Helps Habitat for Humanity with House for Custodian

Rita Mays has been an integral part of life at the UK College of Law for many years. She not only serves as a custodian for the college, she greets each person with a friendly smile, wishes them the best on a good day, and has become part of the heart and soul of the college. When the College of Law learned that Mays was receiving a house

from Lexington Habitat for Humanity, faculty, staff, and students all wanted to pitch in to help Mays achieve her dream of becoming a homeowner. UK Law is partnering with Ashland, Inc., Webasto Roofing Company, and Lexington Habitat for Humanity to give a new home to Mays and her family. Students, faculty, staff, and friends of the College of Law are working on the house on Thursdays and Saturdays throughout May and June. They also are helping fulfill a wish list of items to help Mays' make her new house a home. Mays and her family will work with Lexington Habitat for Humanity to gain sweat equity hours toward the house. Lexington Habitat for Humanity, Inc. is a nonprofit, ecumenical Christian ministry that cultivates partnerships with families in need, sponsors, and volunteers to build simple, decent, affordable housing in Fayette County.

12. Faculty Citations Lead to High Rankings for Gatton College Doctoral Programs

A recent study regarding the rankings of doctoral programs in economics in the United States spotlights the high quality of the Department of Economics at the UK Gatton College of Business and Economics. The study, published in the April 2008 *Southern Economic Journal*, is based on citations to publications authored by UK economics faculty members. The study focuses on published research in all major peer-reviewed economics journals over the period 1985 to 2004 and citations to these publications in professional journals. Basing the rankings on a per faculty member basis, UK's Department of Economics ranks 19th among all public universities in the U.S. Among all public universities, the Department of Economics ranks 38th, ahead of benchmark institutions Purdue, Florida, and Georgia, and ahead of all public Southeastern Conference (SEC) universities. In the field of public economics, the department is ranked eighth overall and fourth among all public universities. The department is the third-highest ranked in this field among UK's benchmarks and first among SEC schools.

13. UK Teams Score High on NCAA's Academic Progress Rate

The NCAA released its fourth annual Academic Progress Rate report, showing that all 22 of the UK sports teams surpassed the NCAA target score and that 13 of the 22 squads exceeded the national average for public universities in their sports. The women's swimming team led the way for UK with 986 out of a possible 1,000 points, followed by women's soccer (985), men's outdoor track (976), women's outdoor track (976), men's indoor track (973) and women's basketball (972). The marks are a four-year composite, covering the 2003-04, 2004-05, 2005-06, and 2006-07 school years, that measures academic eligibility and retention of student-athletes. The NCAA target score for each sport is 925. The 13 Wildcat teams that exceeded the national average among public universities in their sports included baseball (940), men's basketball (941), women's basketball (972), men's cross country (970), football (943), rifle (966), women's soccer (985), women's swimming (986), men's tennis (958), men's indoor track (973), women's indoor track (971), men's outdoor track (976), and women's outdoor track (976).

14. Center for Research on Violence Against Women Hosts National Meeting

The UK Center for Research on Violence Against Women served as host to a late May national meeting on how universities should address stalking victimization on their campuses. The meeting, part of a U.S. Department of Justice funded project, was attended by criminal justice, student affairs, prevention/education, and other professionals from colleges and universities across the country. The purpose of the meeting was to develop a national model policy on how universities should respond to stalking cases that involve their students. In its 2007 Women's Safety Study, the Center for Research on Violence Against Women surveyed 2001 UK women students and found that 15.1 percent had had the experience of stalking victimization while a student at UK, down from 18 percent in the 2004 version of that same study. Almost half of those stalking cases took place on UK's campus, and there was an increase in the use of electronic means to commit stalking over the past three years.

15. Louisville Physician Wins UK Library Associates Achievement Award

Dr. Laman A. Gray Jr. of Louisville is the 2008 recipient of the UK Library Associates Medallion for Intellectual Achievement. The award, which recognizes high intellectual achievement, was presented at the UK Library Associates annual meeting. Gray is a professor of surgery and director of the division of thoracic and cardiovascular surgery at University of Louisville School of Medicine. He holds the Jewish Hospital Endowed Chair in Cardiovascular Surgery and is medical director of the Cardiovascular Innovation Institute.

16. KGS and Partners Make Progress on Carbon Storage Research Projects

Following the mandate of House Bill 1, passed in last summer's special legislative session, KGS has partnered with several private companies to plan research projects in deep geologic carbon dioxide storage and enhance oil and gas recovery using carbon dioxide. A site has been selected in Hancock County for a demonstration of the ability to store the gas connected to global warming in formations 8,000 feet below the surface. Similar projects are being developed in the eastern coal fields of Kentucky. The partners involved in this work have formed the Kentucky Consortium for Carbon Storage.

17. William T. Young Library Marks its 10th Anniversary

The William T. Young Library celebrated 10 years of service to the public with a celebration on May 13. The event included tours, a reception, and a program with featured speaker E. Gordon Gee, president of The Ohio State University. A student celebration is scheduled for August 25 during K Week.

18. Appalachian Center Hosts Social Venture Showcase

In April, the Appalachian Center convened the fourth annual Social Venture Showcase for the Appalachian IDEAS Network. This event challenges Appalachian undergraduate college students from universities and colleges across the 13-state region to develop entrepreneurial social ventures that address local community issues. The Appalachian IDEAS Network is a regional, multi-university initiative led by UK.

19. Sustainability Project Wins \$103,000 Two-Year Extension

Ernie Yanarella, professor of Political Science, and Carol Hanley, Tracy Farmer Center for the Environment education coordinator, have been awarded a follow-up \$103,000 grant from the Kentucky Department of Education to continue and expand his sustainability agenda on campus and within the larger Bluegrass community, beginning July 2008 and continuing through June 2010. The grant will allow Yanarella's sustainability team to teach a pilot course proposed for the inchoate general education reform program, and integrate its two-class module into UK 101 or its successor. The grant also will offer a community workshop advancing livability and sustainability in Lexington by bringing key movers and shakers from Vancouver, British Columbia, Canada, to share the strategies behind that city's achievement of world-class status. It will also extend environmental education programs at the national level to K-12 schools in the Lexington area.

20. Six Individuals, One Unit Receive 2008 President's Awards for Diversity

President Todd, accompanied by Allan Richards, chair of the President's Commission on Diversity, presented the sixth annual President's Awards for Diversity to recognize outstanding efforts toward advancing UK's mission to embrace diversity while maintaining academic excellence. The awards went to College of Medicine Department of Biomedical Engineering graduate student Nirmal Ravi; three faculty members, College of Arts and Sciences philosophy professor Joan Callahan, College of Arts and Sciences geography professor Karl Raitz, and College of Agriculture plant pathology professor Christopher Schardl; one staff member, Human Resources Development and Training staff member Marietta Watts; one administrator, College of Medicine Dean Jay Perman; and one university unit, the Martin Luther King Jr. Cultural Center.

21. Two Groups with UK Ties Receive State Earth Day Awards

Two groups with ties to UK were among 10 individuals and groups recognized on Earth Day by the Kentucky Environmental Quality Commission for significant contributions to the environment. Water Pioneers Water Quality Program received a 2008 Earth Day Award for sponsoring a week-long, in-depth study of Appalachian watersheds for rising high school sophomores enrolled in the UK Robinson Scholars Program. Another Earth Day Award went to the Bluegrass Partnership for a Green Community for its efforts in the 2006 and 2007 U.S. Conference of Mayors' City Recycling Challenge. The partnership between UK, the Lexington-Fayette Urban County Government, and the

Fayette County Public Schools developed a promotional campaign to encourage recycling of aluminum cans. Thanks to the partnership's efforts, more than 3.7 million cans were collected in Fayette County for recycling during the 2006 two-week contest and more than 10 million cans in 2007.

22. Education Professor Helps Winburn Middle School Finish Strong in Math Contest

Thanks to the guidance of College of Education professor Xin Ma, the Winburn Middle School MathCounts team had a strong finish in the 2008 Kentucky State MathCounts Competition. Ma, a professor of mathematics education in the Department of Curriculum and Instruction, coached the team beginning in November 2007. He led one student to a third-place finish in the Countdown Round of competition and two students to top-17 finishes in individual rounds. In regional competition, one student claimed first place in the Countdown Round, the Winburn four-member team took third place, and four students finished in the top 17 in the individual rounds.

23. Conference Offers Advice to Caregivers of Aging Parents

Caregivers facing the challenges of caring for older adults found useful information at the 25th annual Challenges of Aging Conference. Four workshops focused on meaningful interactions, stress management, long distance care-giving, and the "best kept community resource secrets." Open to all Central Kentucky residents, caregivers, and professionals, the conference provided the opportunity to learn from experts in the field of aging about health and wellness, world events, recreation, financial management, gardening, medical issues, and more.

24. Student Awards and Achievements

Caitlyn Cecil, Center of Membrane Sciences, won first place at the 2008 Southern Region American Institute of Chemical Engineers Meeting for her presentation on film materials. Cecil also published a paper, with Dibakar Bhattacharyya, titled "Functionalized Membranes by Layer-By-Layer Assembly of Polyelectrolytes and In-Situ Polymerization of Acrylic Acid for Applications in Enzymatic Catalysis," which appeared in the American Chemical Society publication, *I&EC Research*.

Ashley Dimkich and Greg Dombrowski, Education, were named finalists for the Southeastern Conference's H. Boyd McWhorter Student-Athlete of the Year award. They received a \$5,000 post-graduate scholarship for their efforts. Each SEC institution nominated one male and one female student-athlete for this annual award.

Samanthia Farthing, Psychology, and Lian Liu, Computer Science doctoral student, received the 2008 Carol S. Adelstein Outstanding Student Award, which is presented annually to students with a disability who best serve as an inspiration to the university community through excellence in academic achievement, leadership, extracurricular activities, and social and personal qualities.

Lesley Jaye Mann, Agricultural Biotechnology, and Ashby Clay Turner, Biology have been named the 2008 Beckman Scholars at UK, providing each of them with \$19,300 over 14 months to support their own scientific research projects under faculty

mentorship. The program is funded by the Beckman Foundation and provides a stipend and support for research projects the winning students propose in the fields of biology, chemistry, biochemistry, or a biomedical science.

Sam Nicaise, Electrical Engineering, won a Barry M. Goldwater Scholarship worth about \$7,500 per year for two years as he completes his undergraduate study.

Three Art students were among those recognized at this year's "University Open," a juried competition between undergraduate fine arts students at Kentucky colleges and universities. Dawn Graham took third place at the show. Tyler Dearing and Katherine Norman received honorable mention recognition for their work.

25. Faculty and Staff Awards and Achievements

Janice Almasi, Education, joined two select groups this year when she assumes seats on the boards of directors of the National Reading Conference and the International Reading Association. Her terms will run from 2008 to 2011.

Lars G. Björk, Educational Leadership Studies, was selected as a Fulbright Scholar for the upcoming year. Björk will be working with a research team at the University of Jyväskylä Institute of Educational Leadership in Finland on several projects funded by the Finnish Ministry of Education including conducting the first national study of superintendents in Finland, conducting a study of municipal government mergers, and publishing study findings in international scholarly journals.

Jonathan Cardi, Law, has written an article "Über-Middleman: Reshaping the Broken Landscape of Music Copyright" that will be included in the 2008 edition of the *Entertainment, Publishing and the Arts Handbook* published annually by Thomson West Group.

James G. Cibulka, dean of the UK College of Education, has been named the next president of the National Council for Accreditation of Teacher Education (NCATE). The NCATE Executive Board ratified his appointment May 9, 2008.

Allison Connelly, Law, was recognized by the Fayette County Bar Association with the Citizen Lawyer Award. The award, presented at the annual Law Day celebration, recognizes a member of the Bar whose involvement in governmental, civic, charitable, or community activities has demonstrated a sincere desire to maintain and improve the administration of justice, the quality of the legal practice, and the quality of life for all residents of Fayette County.

Merl M. Hackbart, Public Administration and Finance, is the recipient of the 2008 William E. Lyons Award from the Martin School of Public Policy and Administration and the Department of Political Science. The Lyons Award, named in honor of the late William (Bill) E. Lyons, professor of political science and public administration, is presented annually to a member of the university community who epitomizes the academic leadership and public service demonstrated by Lyons during many years as a faculty member at UK.

Peter Nagy, Horticulture, had an article published in the journal *Cell Host and Microbe*, a publication belonging to the *CELL* series of journals. He reported on the role of a host protein on the replication of the tomato bushy stunt virus, as well as other positive-strand RNA viruses.

Melynda Price, Law, was recently honored with a Ford Foundation Diversity Fellowship Postdoctoral Award, given to individuals who have demonstrated superior academic achievement, are committed to a career in teaching and research at the college or university level, show promise of future achievement as scholars and teachers, and are well prepared to use diversity as a resource for enriching the education of all students.

Lori Ringhand, Law, who co-authored work on U.S. Supreme Court nominees discussed in an editorial, was quoted in the *New York Times* and by National Public Radio in April regarding her work on United States Supreme Court confirmation hearings in the Senate.

Art Sebesta, Chemistry, won the 2008 Paul Nestor Award for Employment Creativity. Sebesta was recognized for creative problem solving that saved the department an estimated \$121,500 in equipment and training costs.

Rick Underwood, Law, was cited multiple times in the newest edition of *Federal White Collar Crime* by Julie R. O'Sullivan (Thomson/West) and identified as an expert of perjury.

Susan West, Dean of Students Office, won the Southeastern Panhellenic Association Greek Advisor of the Year Award during the Southeastern Panhellenic Conference in Atlanta, Ga., recently. The UK Panhellenic Council was also awarded for its women's issues programming.

Sheila Woods, Pediatrics, and Suzanne Springate, UK HealthCare, received the 14th annual Sarah Bennett Holmes Award, presented annually to UK women who promote the growth and well-being of other women on campus and across the Commonwealth.

Members, Board of Trustees:

PROPOSED AMENDMENT TO GOVERNING REGULATIONS:
INVESTMENT COMMITTEE

Recommendation: that the attached revision of Governing Regulation, Part II, relating to the Investment Committee, which was received for preliminary consideration as PR 6 by the Board of Trustees on April 22, 2008, be approved. The proposed revision relates to a recommendation to allow for the appointment of Community Advisory Members to the Investment Committee.

Background: The Investment Committee of the Board of Trustees is responsible for oversight of the endowment investment programs of the University and its affiliated corporations. This includes formulating and reviewing investment policies, and appointing, monitoring and evaluating investment managers and consultants. Having the option of appointing non-voting community advisory members would provide the Investment Committee with the opportunity to gain specialized expertise and advice. Additionally, the management of the University's endowment portfolio is a long-term responsibility and the opportunity to have non-voting community advisory members on the Investment Committee can provide for stability and continuity in fulfilling this important duty.

University of Kentucky Governing Regulations, Part II, relates to the governance of the University, and in particular, the composition, officers, and committees of the Board of Trustees. The attached revision defines the voting membership of the Investment Committee, comprised of members of the Board of Trustees as selected by the Chair of the Board, and provides for the appointment of non-voting community advisory members to the Investment Committee.

A revised copy of GR II, A (6) (f) is attached. Proposed additions are underlined.

Action taken: ☒ Approved ☐ Disapproved ☐ Other _____

(f) Investment Committee

Under delegation from the Board of Trustees, and consistent with KRS 164A.550 through 164A.630, the Investment Committee is responsible for review and oversight of the endowment investment programs of the University and its affiliated corporations. These responsibilities include: formulating and reviewing investment policies; appointing, monitoring and evaluating investment managers and consultants; and reviewing and approving plans for the general management of the endowment funds of the University.

The membership of the Committee shall include five members from the Board of Trustees. Each member shall be appointed by the Chair of the Board of Trustees. A quorum of the Committee members must be present in order to conduct business.

In addition to the voting members, the Investment Committee may, from time to time, have the Chair of the Board of Trustees appoint, upon recommendation of the University President, Community Advisory Members to assist it in its functions by providing specialized advice and support. Said Community Advisory Members shall be selected on the basis of their expertise in such areas as investment management and finance. The appointments of Community Advisory members to the Investment Committee shall be for three years and may be reappointed for an unlimited number of three year terms. The maximum number of Community Advisory members authorized at any one time shall be three (3).

The Investment Committee Chair reports to the Board of Trustees after each meeting of the committee on the performance results of endowment investments. Policies of the committee are implemented by the Office of the Treasurer in carrying out the day-to-day operations of the University's endowment funds.

Members, Board of Trustees:

PROPOSED AMENDMENT TO GOVERNING REGULATIONS:
FACULTY VACATION LEAVE, SABBATICAL LEAVE, AND DELAY OF
PROBATIONARY PERIOD

Recommendation: that the Board of Trustees receive the attached revision of Governing Regulation, Part X, for the first reading. The proposed revision relates to the university's policy on vacation leave for faculty on 12-month assignments. The revision will change the current policy that allows 12-month faculty to carry forward unused vacation leave. The proposed revision will also clarify the eligibility requirements for sabbatical leave and the processes by which various categories of events are reviewed and approved for a delay of the probationary period.

Background: The current university policy for faculty with 12-month appointments is that they accrue 22 days of vacation each fiscal year, which they can carry forward to the next fiscal year. In principle, such individuals could be eligible for 44 vacation days of leave in a fiscal year. Further, at the time of retirement or departure from the university, the accrued vacation leave translates into a cash benefit. The faculty vacation accrual is considered a recordable fiscal liability according to the Government Accounting Standard Board (GASB) and must be funded by the university (as it does staff vacation accrual) with a cash reserve. In order to reduce future fiscal liability for accrued faculty vacation leave, the attached revision to GR X.B.2(b) requires 12-month faculty to use vacation leave within the fiscal year in which it is earned or the leave will be forfeited.

In September, 2007, the Board of Trustees approved an automatic delay of probationary period for a faculty member who becomes the parent of a child or children by birth, adoption, or guardianship, or who assumes significant responsibilities for the care of a relative or domestic partner. The proposed revision to GR X.B.1(c) clarifies that extension years are not counted toward eligibility for sabbatical leave and identifies the processes by which various categories of events are reviewed and approved. Additionally, the proposed revision to GR X.B.2(d)(i) clarifies that non-tenured faculty members are not eligible for sabbatical leave.

A revised copy of the relevant sections of GR X is attached. Proposed additions are underlined; proposed deletions are lined through.

Action taken: ☒ Approved ☐ Disapproved ☐ Other _____

GR X.B.2(b):

(b) Vacation Leave

All full-time faculty members on a ten-month, eleven-month, or twelve-month assignment basis shall be entitled to twenty-two (22) working days of vacation leave with pay per assignment period. With prior administrative approval, faculty members may take vacation leave at appropriate times during the period in which they are eligible to take such leave; however, each faculty member shall be in actual attendance at least until after Commencement and until all reports have been made, and at least three (3) days prior to the first day of registration for the fall semester, unless for special reason leave is approved. Vacation leave shall be taken in the assignment period in which it is earned, or the vacation leave shall be forfeited. normally cannot be accumulated from one assignment period to another, except that a faculty member on a twelve-month assignment basis may take vacation leave either during the assignment period in which the vacation leave is earned or during the subsequent assignment period. Under unusual circumstances, provided it is in the best interest of the University and has advance approval by the Provost, a faculty member on a ten-month or an eleven-month assignment basis also may take unused vacation leave during the assignment period following that in which the vacation leave was earned. Pay for unused vacation leave shall be limited to a maximum of twenty-two (22) days at the end of employment.

More detailed information on faculty vacation leave is provided in the *Administrative Regulations* (AR II-1.1-7).

GR X.B.1(c)

(c) Automatic Delay of Probationary Periods

A probationary regular, special, extension, or librarian title series faculty member who becomes the parent of a child or children by birth, adoption, or guardianship, ~~or who assumes significant responsibilities for the care of a relative (see GR X.A.1) or domestic partner~~ shall automatically be granted a one-year delay of the probationary period by the dean of the respective college. A faculty member who qualifies for this automatic delay of the probationary period shall submit to his or her department chair a signed and completed Faculty Tenure Delay Form (TDF) and supporting documentation, if required. A faculty member may waive the automatic delay only by completing the waiver section of the TDF. Upon receipt of the TDF, the chair shall prepare and submit to the dean and the Provost a revised Notice of Academic Appointment reflecting the change in probationary dates, along with the completed TDF and supporting documentation.

In addition, a probationary faculty member who assumes significant responsibilities for the care of a relative (see GR X.A.1) or domestic partner may request consideration of a one-year delay of probationary period based on extenuating circumstances. These extenuating event

~~or circumstances providing the basis for a delay related to significant care responsibilities must be clearly beyond those experienced by most probationary faculty. Documentation explaining the extenuating circumstance of the care-giving situation shall accompany the request. This request shall be routed through the normal administrative channels and will be considered for approval by the Provost.~~

This provision is available to all probationary non-tenured faculty upon their official start date and up until the anniversary of their official start date in the year in which their tenure review is scheduled to occur.

~~A faculty member who qualifies for an automatic delay of the probationary period, shall submit to his or her department chair a signed and completed Faculty Tenure Delay Form (TDF) and supporting documentation, if required. A faculty member may waive the automatic delay only by completing the waiver section of the TDF. Upon receipt of the TDF, the chair shall prepare and submit to the dean and the Provost a revised Notice of Academic Appointment reflecting the change in probationary dates, along with the completed TDF and supporting documentation.~~

Notifications of all delays shall be made by the faculty member to his or her department chair as soon as possible after the qualifying event or circumstances (i.e., birth, adoption, guardianship, or assumption of significant care responsibilities), but in no case later than six (6) months from the time of the qualifying event or circumstances or no later than the last day of the fifth year of the probationary period; whichever comes first. ~~The chair, dean, or Provost may require the faculty member to provide documentation supporting the qualifying event or circumstances.~~

The ~~automatic~~ delay shall not be granted more than two (2) times within the probationary period of a faculty member. The faculty member shall be reviewed for tenure under the same academic standards as a candidate who has not extended the probationary period and shall not be penalized or adversely affected by the delay of the probationary period. Further, extension years shall not be counted towards sabbatical. A delay of the probationary period in no way limits the right of the University to terminate a probationary appointment prior to the time of the mandatory review for probation and tenure, should circumstances warrant such action.

GR X.B.2(d)(i)

(d) Leaves of Absence

(i) Sabbatical Leave

The purpose of sabbatical leave is to provide opportunities for study, research, creative effort, improvement of instructional or public service capabilities and methods, and related travel in order that the quality of each recipient's service to the University may be enhanced.

Faculty members who have full-time ~~non-tenured or tenured~~ appointments in the regular, special title, extension, or librarian series with the rank of assistant professor (or librarian III) or higher, are eligible for sabbatical leaves after six (6) years of continuous service in the

rank of instructor (or librarian III) or higher at the University, or for sabbatical leaves under a different option after three (3) years of continuous service. All such sabbatical leaves shall be approved by the President or the President's designee.

APPOINTMENT/REAPPOINTMENT OF BOARD OF DIRECTORS
UNIVERSITY OF KENTUCKY RESEARCH FOUNDATION

Recommendation: that approval be given to the appointment of Hollie Swanson (faculty member) filling an unexpired term ending June 30, 2010 and the reappointment of Henry Jackson (public member) for a three-year term ending June 30, 2011 to the Board of Directors of the University of Kentucky Research Foundation (UKRF).

Background: In accordance with the Bylaws, members of the Board of Directors of the University of Kentucky Research Foundation are appointed by the Board of Trustees to serve three-year terms. The Nominating Committee of the UKRF Board has recommended and the UKRF Board of Directors has endorsed the appointment of Hollie Swanson and reappointment of Henry Jackson.

Action taken: ☒ Approved ☐ Disapproved ☐ Other _____

Hollie I. Swanson, Ph.D.

Dr. Swanson is an Associate Professor in the Department of Pharmacology. She received her MS from Oregon State University, College of Agriculture, Food Science, and Ph.D. in Food Science/Toxicology from Purdue University, College of Agriculture. She was a postdoctoral fellow at Michigan State University, College of Agriculture, Biochemistry and Northwestern University, College of Medicine, Molecular Pharmacology and Biological Chemistry before coming to the University of Kentucky, College of Medicine in 1995. She has had research funding from the National Institutes of Health, the American Lung Association, the American Institute for Cancer Research and the American Cancer Society.

Dr. Swanson's research is focused on study of the aryl hydrocarbon receptor (AHR) signaling pathway and its role in altering cell fate. The AHR is a basic helix-loop-helix transcription factor that binds toxic compounds such as dioxins. These compounds are pervasive environmental contaminants that are formed during combustion reactions and contain manufacturing processes. While the endogenous ligand for the AHR is not known, the best known AHR agonist is dioxin. One of the long-term goals of Dr. Swanson's research program is determining the mechanisms by which dioxin, via activation of the AHR, results in tumor promotion. These mechanisms can then be exploited to develop unique anti-cancer therapeutics. Known genes that are regulated by the AHR are those involved in drug metabolism, such as cytochrome P4501A1, however her research group is also identifying novel, AHR regulated genes. To understand what genes the AHR regulates under normal conditions and how these genes are altered during dioxin-induced tumor promotion, her research group is using cultured human keratinocytes and keratinocytes obtained from mice that lack the AHR. They have recently discovered that dioxin, via the AHR, downregulates major regulators of the senescence pathway, p53 and p16^{INK4a}, block senescence and extends the lifespan of the cells. A second project focuses developing AHR antagonists to be used as therapeutics. Towards that end, Dr. Swanson and her collaborator Dr. Kyung-Bo Kim have a patent (Development of AHR-PROTACS as Antagonists of the Aryl Hydrocarbon Receptor).

In addition to teaching and mentoring students at UK, Dr. Swanson has served as a grant reviewer for DOD, NIH, NIEHS and the National Science Foundation. She is currently serving on the Institute of Medicine, National Academies of Sciences Committee to Review the Health Effects of Vietnam Veterans. She been on the editorial board of *Toxicology and Applied Pharmacology* and she is a member of the American Association for Cancer Research, American Association of Medical Colleges and the American Society for Pharmacology and Experimental Therapeutics. She is a member of the University of Kentucky University Senate and Senate Council and serves as Chair of the UK Senate Advisory Committee on Privilege and Tenure.

Henry L. Jackson

Mr. Jackson is Chairman and President of Jackson Plastics, Inc. He has over 30 years experience in finance and manufacturing. He was Managing Director of Clark Material Handling Company in Muihaim, Germany and Senior Vice-President and Chief Financial Officer for Clark Material Handling Company in Lexington, Kentucky. He earned his Master of Business Administration from the University of Notre Dame and obtained a Bachelors of Science of Commerce from DePaul University.

NAMING OF UNIVERSITY PEDIATRIC EMERGENCY CENTER --
MAKENNA DAVID PEDIATRIC EMERGENCY CENTER

Recommendation: that the Board of Trustees approve naming the pediatric emergency center in the new Albert B. Chandler Hospital the “Makenna David Pediatric Emergency Center.”

Background: The new Albert B. Chandler Hospital currently under construction will contain a separate Pediatric Emergency Center entrance for pediatric patients.

Greg and Sheila David established the Makenna Foundation in September 2001 in memory of their daughter Makenna, who was a patient at the Kentucky Children's Hospital and who passed away in December 1998 from a rare lung disorder. The goal of the foundation is to raise funds for the Kentucky Children's Hospital to support hospital expansion and to purchase necessary pediatric medical equipment.

In recognition of the many contributions of the Makenna Foundation to the Kentucky Children's Hospital and Department of Pediatrics, a proposal was submitted to name the Pediatric Emergency Center the “Makenna David Pediatric Emergency Center.”

The Committee on Naming University Buildings has reviewed the request and recommends approval of this name change. The Executive Vice President for Health Affairs and the Physician-in-Chief of the Kentucky Children's Hospital support this recommendation.

ESTABLISHMENT OF THE CENTER FOR MUSCLE BIOLOGY

Recommendation: that the Board of Trustees approve the establishment of the Center for Muscle Biology in the College of Medicine.

Background: The Center for Muscle Biology will build on existing strengths to create a nationally-recognizable program that expands research, promotes educational activities, and enhances the university's progress toward Top 20 status. The Center will foster basic and translational research collaborations, expand training opportunities for graduate and professional students, provide an intellectual environment for new programmatic grants, enhance faculty recruitment, and give muscle biology at UK an identity for national recognition.

The goals of the Center are to foster collaboration among clinical and basic scientists, catalyze translational research, stimulate educational activities, and increase national recognition for the University in the field of muscle biology. To achieve these goals, the Center will promote specific research and education related initiatives by integrating the activities of NIH-funded investigators from five colleges and centers.

Creation of the Center is expected to stimulate development of new institutional awards including program projects grants, center grants, and T32-funded training grants. The Center will provide a nexus for promoting scientific collaboration and developing translational research. Clinical and basic scientists will work together to address muscle-related concerns ranging from cachexia to cardiomyopathy, from ventilatory insufficiency to sarcopenia of aging.

The proposal has been reviewed and recommended by the Senate Committee on Academic Organization and Structure and the Senate Council, and recommended for approval by the University Senate. The Provost of the University supports this recommendation.

DELETION OF DEGREE – COLLEGE OF HEALTH SCIENCES

Recommendation: that the Board of Trustees approve the deletion of the Doctor of Science degree with a major in Clinical Sciences, effective spring 2011 semester.

Background: The decision to close this program is based on resource consolidation to allow more efficient delivery of programs and optimize faculty talents.

Students currently in the program will not be negatively impacted. The Director of Graduate Studies has met with each student and together they developed a plan of completion with all required and needed courses being made available to these individuals.

This proposal has the approval of the Graduate Council, Senate Council, and University Senate. The Provost of the University supports this recommendation.

Recommendation: that the Board of Trustees:

- approve the 2008-2009 Operating and Capital Budget ;
- approve the appropriation and allocation of all fund balances for future operations, to include amounts necessary to cover accounts receivable and inventories that will represent assets on the audited balance sheet of the University of Kentucky for FY 2007-08. These balances are in addition to those incorporated in the proposed budget. Since the books of account for the University of Kentucky are maintained on a full accrual basis, this action will provide the funds necessary to maintain a sound financial position during FY 2008-09;
- order that the operating budget be recorded as an integral part of the university's financial system with the necessary fiscal control being exercised for the collection and appropriation of income and for the expenditure of departmental appropriations in accordance with authorized fiscal policies and procedures; and
- accept the operating budget as the basis of maximum expenditures for FY 2008-09, subject to Board approved revisions.

EXPAND AND UPGRADE LIVESTOCK DISEASE DIAGNOSTIC CENTER (LDDC)

Recommendation: that the Board of Trustees approve the initiation of Phase II of the “Expand and Upgrade Livestock Disease Diagnostic Center (LDDC)” project and consolidation of Phase II with Phase I of the project for a combined total scope of \$28,500,000 funded with state bonds.

Background: The 2004 Kentucky General Assembly authorized \$8.5 million of state bond funds for Phase I of the “Expand and Upgrade LDDC” project. At its June 14, 2005 meeting, the Board approved initiation of Phase I, which included design of a much needed addition and renovation to the existing facility as well as the pre-purchase of a biosecure waste digester.

The 2008 Kentucky General Assembly authorized \$20 million in State Bond Funds for Phase II. Phase II will continue the project to provide approximately 18,000 gross square feet of laboratories and support space and 4,000 gross square feet of office space to accommodate increased large animal necropsy loads; the new waste digester; and enhanced biosecurity of entry, storage, and disposal of carcasses. Additionally, site access, including new animal receiving areas and service areas, will be provided. Consolidation of Phase I and Phase II is necessary for administrative reporting purposes.

Contingent upon approval by the Board of Trustees, the University will request the Capital Projects and Bond Oversight Committee to consolidate Phase I and Phase II of the project at their July meeting.

LEASE/PURCHASE OF EQUIPMENT AND INFORMATION TECHNOLOGY ITEMS

Recommendation: that the Board of Trustees approve the acquisition of the following major equipment and information technology items using a lease/purchase method of procurement:

1. IT Disk Storage
Agency Funds - \$530,000
2. Replacement of IT Servers for Administrative Applications
Agency Funds - \$648,500
3. Air Conditioner and Uninterruptable Power Supply (UPS)
Agency Funds - \$533,000
4. Upgrade of Communication Switches and Routers
Agency Funds - \$465,000
5. Genome Sequencer FLX
Federal Funds - \$600,000

Background: At its September 11, 2007 meeting, the Board delegated to the Executive Vice President for Finance and Administration the responsibility for managing university debt related to the lease/purchase of equipment and information technology items costing less than \$200,000. Acquisitions of major equipment and information technology items costing \$200,000 or more where the method of procurement involves debt in the form of capitalized lease obligations are to be submitted to the Board for approval. The university's Debt Committee has reviewed these acquisitions to assess the impact on the university's debt capacity. The Debt Committee has determined that acquisition of these items is consistent with the university's Debt Policy. A brief description of each item is attached.

Equipment and Information Technology Item Descriptions
June 17, 2008

1. IT Disk Storage

Agency Funds - \$530,000

This electronic storage equipment is necessary to support the increased data needs of the IRIS/SAP system for the financial, human resources, campus management, plant maintenance, and materials management modules.

2. Replacement of IT Servers for Administrative Applications

Agency Funds - \$648,500

Four-year old IT servers will be replaced. These servers run the IRIS/SAP administrative systems for the financial, human resources, campus management, plant maintenance, and materials management modules.

3. Air Conditioner and Uninterruptable Power Supply (UPS)

Agency Funds - \$533,000

Installation of air conditioning and a UPS system is needed for the Parking Structure #2 Frame Room to improve cooling and power reliability for campus communications equipment.

All campus telephone and data equipment are required to function 24 hours a day, seven days a week. Uninterruptible power to operate the equipment and devices is essential to the overall operation of the University as power fluctuations could cause systems to malfunction and negatively impact the entire network.

4. Upgrade of Communication Switches and Routers

Agency Funds - \$465,000

The upgrade of distribution switches and routers will provide needed improvement in campus communication services.

5. Genome Sequencer FLX

Federal Funds - \$600,000

This research equipment reads the DNA gene sequence, or “code of construction”, of various biological, animal, and human organisms to determine their makeup and life patterns. This new sequencer will facilitate research in plant, animal, and human diseases by greatly reducing the time and cost of gene sequencing. Acquisition of this equipment item is contingent upon receipt of a federal grant that will fund the purchase.

Recommendation: that the Board of Trustees approve a plan for Fiscal Year 2008-09 authorizing routine disposition of personal property having a value of less than \$25,000 per item that includes equipment and machinery, vehicles, library books and materials, livestock and recyclable materials; and the methods of disposal as listed on Attachment 1.

Background: Kentucky Revised Statute 164A.575 requires that the Board of Trustees approve disposition of equipment and other property. Administrative Regulation II-1.3-3, approved by the Board of Trustees on August 16, 1994 establishes the policies and procedures including required approvals for the disposition of personal property. This plan provides an efficient and timely process for the disposition of property having a value of less than \$25,000 in accordance with Administrative Regulation II-1.3-3. Dispositions of individual items of personal property having a value greater than \$25,000 will be approved by the Board of Trustees on a case by case basis.

CAPITAL CONSTRUCTION CONTRACTS QUARTERLY ACTIVITY REPORT

This report contains capital projects that have a dollar scope value of \$600,000 and above. The projects are listed in alphabetical order and contain the project number, the dollar scope, a brief description of the project work and information pertaining to the primary consultant's contract and the primary contractor's contract. This information includes:

Consultant: This section contains the name of the consultant, the contract number, the original contract amount, the total number of amendments, the cumulative amendment amount, the revised contract amount, and a notes section. The notes section will describe, in bold face type, all amendments to the consultant's contract for the current quarter.

Contractor: This section contains the name of the contractor, the contract number, the original construction contract amount, the total number of change orders, the cumulative change order amount, the revised contract amount, information on the low, high and number of bids, the percent of the contract completed, and a section for notes. The notes section will describe, in bold face type, all change orders greater than \$25,000 for the current quarter.

CAPITAL CONSTRUCTION QUARTERLY ACTIVITY REPORT

Glossary

Amendment: refers to modifications or changes to the Consultant's contract with the University, usually the result of changes in the program or scope of a project caused by unforeseen conditions or at the request of the University.

Change Order: refers to modifications or changes to the Contractor's contract with the University, usually the result of conditions not anticipated by the contract documents, plans and/or specifications for the work.

Consultant: the entity, usually an architectural or engineering firm, with whom the University contracts and who has primary responsibility for providing services to design and to administer the contract for construction of a construction project. The prime consultant frequently employs the services of one or more sub-consultants in fulfilling its contractual obligation.

Contract administration: refers to the activities of the consultant during the construction phase of the project in which they verify that construction is in compliance with the requirements of the contract between the University and the contractor.

General Contractor: the entity, usually a general contractor but occasionally a trade contractor, with whom the University contracts and who has primary responsibility for completion the construction of a project. This "prime" contractor usually employs the services of various subcontractors (trade contractors) and vendors in fulfilling its contractual obligations.

Feasibility Study: refers to investigation, usually commissioned through an outside consultant, to advise the University of the merits of an anticipated construction project, and to evaluate and comment on matters such as need, probable cost, preliminary program issues, and so forth.

Gross square feet: the total area of the project, generally measured from the outside of exterior walls for all floors of the project, including mechanical spaces.

H.B.C.: refers to the Commonwealth of Kentucky Department of Housing, Buildings and Construction, the state agency having responsibility for review and approval of University construction projects to assure compliance with applicable building codes.

Penthouse: refers generally to the enclosure around roof mounted mechanical spaces in a project. Not considered occupied (or net assignable) space.

Percent complete: as used in the report refers to the expenditure to date divided by the total amount of the construction contract for the work.

Net assignable square feet: the usable area of the project excluding corridors, rest rooms, storage areas, mechanical spaces, etc.

Phase: The various stages of design and construction of a capital project, including:

- **Programming phase:** refers to the initial planning phase of a project, during which the University (with or without participation by a consultant) defines in detail the needs and requirements of a project. This program becomes the basis for consultant selection, fee negotiation, and design of the project.
- **Schematic design (S/D or Phase 1):** refers to the first formal phase of design by the consultant, in which a general design solution to project programmatic requirements is developed.
- **Design development (D/D or Phase 2):** refers to the second formal phase of design by the consultant, during which the schematic design is expanded to identify solutions to design issues in broad terms, sufficient to insure the stated programmatic needs can be met.
- **Construction document phase (C/D or Phase 3):** refers to the final phase of the design process in which the details and specific project requirements are identified and incorporated in a final set of biddable construction documents.
- **Bidding phase:** refers to the stage of a project during which proposals for construction are solicited, culminating in the award of one or more contracts for construction.
- **Construction phase (or Phase 5):** refers to the actual construction of the project by contractors.

Scope: The total estimated value of a capital project on completion, including all design, construction and administrative costs as well as the cost of capitalized furnishings and equipment.

Substantial Completion: refers to the time during construction, certified by the consultant, when the work is sufficiently complete for the University to occupy the facility for its intended use without significant interruption. Upon certification of substantial completion, the University assumes operational and maintenance responsibility and insurance liability for the project and the warranty period begins for most elements of the construction. Some work generally remains, including correction of minor punchlist items, before the work is certified finally complete.

Trade Contractor: Sub-contractors, or individual bid package contractors, who practice a specific, trade (electrical, painting, structural steel, for example)

Construct Biological Pharmaceutical Complex Building

Project Description:

Phase I of the Biological Sciences/Pharmaceutical Complex, was authorized by the 2005 General Assembly and funded in 2006 at \$40,000,000. Phase II was funded at \$92,792,000 and together these phases will complete the 279,000 gross square foot facility that includes some "shell space" to allow for the growing research needs. This "shell space" will be fitted out for research laboratories at a later date as university funds and/or grant dollars become available. This new building will provide the college with a state-of-the-art facility that will also allow the college to expand enrollment to address the shortage of pharmacists in Kentucky. The College of Pharmacy will relocate to this new facility and vacate their existing space. In addition to the current Pharmacy Building, college faculty members are housed in 10 buildings on and off campus. Consolidation of the research and teaching expertise of the eighth ranked College of Pharmacy in the U.S. will further strengthen the instruction of students and research collaboration among faculty. The vacated Pharmacy Building will be reassigned to the Department of Biology to provide needed expansion space for classrooms, research, and faculty to meet the needs of the growing student enrollment in UK's largest department. The project is expected to be complete by December 2009.

Project Status:

Construction of Bid Package # 3, Structural Steel, continues with delivery of steel to the job site and steel erection. Bid Package # 4, Building Fit-up, will re-bid the Painting work category. These bids will open on May 20, 2008. Bid Package # 5 was advertised and awards to all work categories will be completed in the next few weeks.

Construct Gatton Building Project

Project Description:

The proposed Gatton College Complex will include a state of the art Classroom component which will enable the Gatton College to provide the type of "world ready" business education demanded by today's students and business leaders. The Classrooms will include tiered and flat smart classrooms furnished with computer/video and projection systems as well as smaller break-out rooms that will permit high impact peer-to-peer learning. This complex also will house the business research and study library as well as the Undergraduate and Graduate Advising Centers. The complex will contain signature spaces including a large auditorium, trading floor, innovative laboratories to support action learning, creative problem-solving and leadership development. The building also will house the Von Allmen Center for Entrepreneurship and E-Commerce Laboratory. The Faculty/Administration component will consist of office space for faculty, staff, and graduate assistants. The Outreach component will host nationally competitive professional and life-long learning experiences, and house the College's economic development related service centers including the Center for Business and Economic Research, Kentucky Small Business Development Center and the Center for a Sustainable Aluminum Industry. The program is currently projected at approximately 227,000 GSF of new space. The proposed site is located off Martin Luther King Boulevard and Euclid Avenue, moving UK's Business and Economics efforts closer to downtown Lexington and the business community.

Project Status:

Kohn Pederson Fox Architects (KPF) were selected to provide programming and conceptual design services for the Gatton College. The programming, conceptual design and final renderings have now been completed. Subject to legislative authorization and funding approval, a solicitation will be issued in July 2008 requesting submittals for Prime architectural firms to take the project through the traditional design phases. It is anticipated KPF will be added to the Prime Firm's overall design team.

Construct Law School Building

Project Description:

The new College of Law building will provide additional and reconfigured classrooms, teaching technology, and study spaces to support modern teaching techniques, collaborative learning, distance education, and a comprehensive and innovative law school curriculum. Also to these ends, the building will alleviate the College's critical current and future needs for a single integrated facility housing the College's faculty, library, legal clinic, student activities, outreach programs, and administration. The building consists of approximately 200,000 GSF located on Scott Street. Construction financing for the building will be sought from the General Assembly in the 2010 session.

Project Status:

Robert A.M. Stern Architects (RAMSA) of New York City has completed the programming and conceptual design services. This project is currently in fund raising and waiting for legislative authorization before proceeding with subsequent phases of design.

Construct Patient Care Facility

Project Description:

The Hospital's present patient bed tower is approximately 40 years old. Although the space served patients well, the infrastructure is aging, and the facility can not accommodate present anticipated technology. This project will provide the site location evaluation, building programming, planning, and design services for a new bed tower. The project design team is lead by GBBN with major sub consultants including AM Kinney, Ellerbe-Becket, Staggs and Fisher, Affiliated Engineers, THP Limited as well as a number of specialty consultants. This project will construct a new hospital addition to include patient beds, patient diagnostic and treatment areas, support areas, support facilities, medical equipment and infrastructure. This project also includes the replacement of the hospital parking garage and a connecting bridge to clear the site for the new hospital addition as well as land acquisition and utility relocation costs.

PCF – Parking Garage (GMP # 2):

Project Description:

This package will construct a seven level parking structure that will have an approximate 1,600-car capacity. The new garage will be located on the west side of Limestone Street, between Conn. Terrace and Transcript Avenue. This structure will replace the existing Medical Center parking garage that must be demolished in order to tie the new Patient Care Facility to the existing Medical Center. A future pedestrian bridge will connect the new structure to the Patient Care Facility and the design has allowed for the future addition of approximately 15,000 square feet of retail space fronting Limestone. The garage opened to temporary occupancy in November with full occupancy anticipated by May 2008.

Project Status:

All areas of the garage are nearing completion. All work scopes have completed with the exception of painting, curtain wall, exterior steel panels, site work and landscaping and the exit canopy. Masonry is complete, all lighting is installed and concrete flatwork is complete. Signage has been replaced and interior deck painting is complete. General building cleanup and site cleanup continues. Final punch list reviews are scheduled. The final occupancy inspection is scheduled for May 7, 2008.

BP 3.2 CUP Expansion:

Project Description:

The project includes an 18,000 square foot addition to the existing CUP on Press Avenue. The expansion will include provisions for two new 125,000 lb/hr boilers and additional chillers. The structure will include an enlarged cold well and basement in the cooling section. The boilers and supporting equipment will be installed under this project.

Project Status:

The construction of the addition to the CUP is well underway. During the month of April the installation of the roofing was completed. The boilers have been set into place and the stacks were extended thru the roof. Completion of the interior and exterior masonry is scheduled for late May. The other major activities during May will be the completion of the building envelop and beginning of mechanical and electrical rough-ins.

PCF – Building (BP #'s 4, 5 & 6):

Project Description:

This project includes:

- (BP #4) The demolition of the existing Parking Structure # 4. The work will involve the start of all deep foundations up to the grade of the excavation.
- (BP #5) The construction of the new 1,022,000 gross square feet building's structural frame, fireproofing, exterior wall enclosure for all new building spaces, windows, exterior doors and roofs. Also included will be all exterior site improvements, civil design for roadways, drainage systems, landscaping, hardscape surfaces and walks.
- (BP #6) The interior fit-out partitions, interior finishes, doors and frames, ceilings, mechanical systems, electrical systems, technology systems, medical equipment and fire protection for approximately 490,000 occupiable square feet; and 532,000 square feet of shell space. The work also will include drawings and specifications for signage, interior furnishings and lighting.

Project Status:

- Mass Excavation and Foundations (BP # 4A & 4)

The removal of the shot rock was the major activity during April. Approximately 85% of the required mass excavation was completed by the end of April. The excavation within the northern portion of the building footprint continued thru April with completion scheduled for mid May. Foundations and foundation walls in the west elevation were placed during April. The continuing installation of the storm culvert that serves to divert surface water around the new structure will continue thru May. This work will continue for the south and north elevation.

- Core and Shell (BP # 5)

Early packages for pre-cast concrete and construction cranes have previously been bid and awarded. The rest of the trades in Bid Package # 5 are currently in the bidding process. The pre bid meeting with interested contractors was held April 8th. The bid opening was extended until May 6th, 7th and 8th due to bidder requests. Turner will begin scoping reviews with the apparent low bidders immediately after the bids are opened. Assuming the work comes in within budget the award of the various packages will occur during May and June of 2008.

- Fit up (BP # 6)

The 100% construction review documents were published and distributed in March. Turner Construction has undertaken detailed constructability/IDC review of the documents. Representatives of the University and the commissioning agent also completed in-depth reviews of the document during early April. All review comments and reports were delivered to the consultants April 23rd. The consultants are to provide written responses to all comments in early May. Production of final documents will begin based on this input.

Final construction documents are to be published in late May. At that time, Turner and Boyken will complete a detailed reconciled estimate of the documents. The estimates are due to be published in late June. The decision has been made to break the final construction documents into approximately ten packages for maximum bidding flexibility. Decisions as to what elements of the Patient Care Facility will be included in Phase 1A will be considered in detail based on the detailed estimate, budget considerations and market conditions during the summer bidding period. Bids are scheduled for early September with an 8 week bidding period.

Construct Student Health Facility

Project Description:

University Health Services will be an outpatient clinic to house University Health Services for students with support spaces and some administrative offices. This project will create additional space by constructing a new building of 72,714 gross square feet. The site will be in the courtyard framed by the Wethington Building, Warren Wright Medical Plaza and the Sanders Brown Center on Aging.

Project Status:

Construction work is nearing completion. Punchlists have been generated for the 2nd, 3rd, and 4th floors, along with the Basement, Penthouse, and Stairwells. The punch inspection for the 1st floor is scheduled for the first week of May. Exterior, roofing, and landscaping inspections are scheduled for May 8th and May 14th. Furniture has started delivering on the 2nd and 3rd floors, and is scheduled to begin on the 4th floor the

first week of May. Work on the steam line at the north end of site will not be completed until early summer. The move-in to the building has been temporarily delayed pending review of the programmatic space allocation.

Expand Chemistry Physics Building

Project Description:

To accommodate expanding enrollment, an additional organic chemistry teaching lab must be provided for fall 2008. This additional lab will be created via a major renovation of six adjoining rooms in the Chemistry Physics Building totaling approximately 2,300 net square feet. The dividing walls will be removed to create one large open room, and all finishes will be replaced. New bench casework will be installed with 20 instructional fume hoods spaced along the benches; five additional hoods will be located on a side wall. Each student workstation will be provided with water, cup sink, certain lab gases, electrical power and some storage space. Wall cabinets, safety stations, and high quality lighting will be installed. The building's ventilation capacity will be upgraded by installing a new AHU to accommodate this hood-intensive room, as well as additional future lab work planned.

Project Status:

Duct work installation is approximately 40% complete on both floors; plumbing for casework is 65% roughed-in. Wall layout & stud installation is 90 %. Drywall installation will begin on Monday, May 5. Casework shop drawings have been reviewed and approved, and the order has been placed. A crane will be on site Monday, May 5 through Monday, May 19 to deliver new piping and the new air handling unit, and to remove the old unit. Substantial completion date is scheduled for July 31, 2008.

Expand & Upgrade Livestock Disease Diagnostic Lab

Project Description:

New space is needed for more than one veterinary pathologist to perform animal postmortem examinations in addition to renovation of current necropsy space. New space is also needed to add molecular biology/special procedures capabilities to the laboratory. New technology in the form of an alkaline hydrolysis digester is needed to replace an aging incinerator. The LDDC is an office and laboratory building with net assignable space of 3,860 square feet for offices and 28,100 square feet of laboratories and support space. It is proposed to add 6,300 and 1,200 square feet (net) of new laboratory and office space, respectively. An existing necropsy laboratory and support space will be renovated (2,000 square feet net). An aging incinerator is the present means of carcass disposal. An alkaline hydrolysis digester will be installed for carcass disposal after renovating 2,000 square feet (net) of space to contain the digester.

Project Status:

Schematic design is complete. We are awaiting approval to proceed with the proposed \$20 million legislative authority. The initial Facility Feasibility study confirmed the selection of the tissue digester as the preferred method of disposal. Alternative effluent treatment options continue to be reviewed and evaluated. The bench scale effluent treatability study meeting is scheduled for May 8, 2008. The manufacturer of the 10,000 lb. digester continues, with the factory acceptance tests delayed 6 weeks until June 2008.

Fit-up Education Space in Health Science Bldg

Project Description:

This project will fit-up approximately 4,000 net square feet of shelled education space in the basement of the Health Science Building. The building, constructed in 2002, is approximately 210,000 gross square feet, and is in good condition. The building consists of classrooms, class labs, student spaces, patient clinic, research labs, faculty offices, administrative offices, and support space. The fit-up space will include the latest in technology for an auditorium/classroom. The room will seat approximately 165 students. The space was originally designed and shelled for this use.

Project Status:

Lucas/Schwering Architects are providing architectural design services for the fit-up of the classroom in the basement of the Health Science Building. Bids have been received and a contract has been awarded to M.P. Kelly Construction. Substantial completion is scheduled for July 30, 2008, with Final Completion scheduled for August 31, 2008. The contractor mobilized the week of March 17th. Construction work has begun with above-ceiling mechanical and electrical rough-ins. Insulation has been installed on the exterior wall and the spray-on insulation has been applied to the underneath side of the balcony deck. The balcony

repairs are being performed as a separate project. The slate tile on the balcony has been removed and removal of the concrete leveling bed is scheduled to be completed the week of May 5th. A polyurethane leveling bed and final urethane finish are scheduled to be completed the week of May 19th.

Fit-Up Gill Building Ground Floor - Hospital

Project Description:

Champlin-Haupt/ Kohrs Lonnemann Heil are the consultant's designing to a \$1,550,000 construction budget. This Project encompasses renovations to 5,000 square feet of existing Ground Floor Shell Space within the Gill Heart Institute to accommodate the creation of a new Cardiology Center, including Cardiology Diagnostics and Clinical Research Programs. The scope of work shall include, but not be limited to the following: Cardiology Diagnostic Suite that shall consist of: Waiting room, Interview, Reception, Nurse Station, Prep/Recovery, Patient Toilet/Dress, Soiled Workroom, MRI/CT Control, CT Exam, MRI Exam (1.5T), MRI Equipment (1.5T), Storage, and Cardiology Reading. The Clinical Research Suite shall consist of: Clinical Research Offices, MRI Control, MRI Exam (3.0T), MRI Equipment (3.0T), Clinical Research Workroom, and Staff Toilet.

Project Status:

Contracts and purchase orders have been written engaging Congleton-Hacker Company as the general contractor for this project. Congleton-Hacker mobilized and began construction on April 21st. Substantial completion is currently scheduled for October 21, 2008.

Renovate 4th Floor Critical Care Unit - UK Samaritan Hospital

Project Description:

This project will be consist of renovating approximately 15, 840 square feet of hospital space to create 12 ICU rooms, 16 acute rooms, two nursing stations, physician work areas, medical room, office for the critical care director, shared office for care manager and nurse manager, clean utility, soiled utility, storage, nourishment station, staff break room, staff lockers and family waiting.

Project Status:

The project bid on Tuesday, April 15, and Messer was the low bidder. A purchase order and contract was issued on Monday, April 28th. Heat sensors were installed so ceiling demolition may begin. Demolition of the existing walls, electrical and plumbing lines will begin on May 1st. A meeting is scheduled for Monday, May 5th so all involved parties can coordinate access to the third floor mental health unit so new plumbing lines can be installed to the floor above.

Renovate Central Vivarium

Project Description:

The project will involve the purchase of a new Primate Cage Wash unit to be installed in a renovated cage wash area within the existing DLAR facility.

Project Status:

The contractor mobilized onsite. Demolition of the interior spaces is complete. Utility relocations are ongoing. New equipment pits and floor slabs will be installed in May. The new cage washer was delivered to a local storage facility, awaiting installation.

Renovate M.I. King Library

Project Description:

This project is for the renovation of the 2nd and 3rd floors of the M. I. King Library, 1962 addition, to accommodate the relocation of the Chemistry Library, Physics Library and a computer lab, all currently housed in the Chemistry-Physics Building, as well as the Math Library, currently housed in the lower level of the Patterson Office Tower. The majority of the renovation will occur on the 3rd floor of the M. I. King Library, with a smaller area on the 2nd floor and minor work on the 4th floor. An existing elevator, located inside the south entrance vestibule, is to be replaced with new components within the existing elevator shaft. All staff areas are to include hard wired computer outlets and wireless capability throughout.

Project Status:

The contractor mobilized onsite. New rooms on the third floor are framed and door frames have been installed. Demolition of spaces on the 2nd level is complete. New rooms on the 2nd level are ongoing. The entrance to the south side of the building has been closed to allow for demolition of adjacent spaces. The east entrance to the building has been modified to allow for this entrance to be used temporarily.

Student Housing - Supporting Utility Plant Upgrades (Boiler/Chilled Water)

Project Description:

This project includes expanding the Virginia Ave. CUP to accommodate future expansion in steam and chilled water capacity. The project was established in support of the Student Housing Project.

Project Status:

The funds from this project are scheduled to be expended for the purchase the 125,000 lb/hr boiler with emissions controls for installation in the expanded CUP. The boiler was purchased from English Tube and Boiler of Richmond, Virginia. The unit arrived via rail January 18, 2008. The boiler was set into place in the CUP expansion January 22, 2008. The next months will be required to connect the boiler to the necessary services in preparation for commissioning.

Upgrade Cancer Center Radiologic Facility- Hospital

Project Description:

The University of Kentucky Hospital needs to significantly upgrade and improve the current clinical space in the Lower Level of University Hospital. This will include therapy rooms, clinic exam areas, infusion space, office, education, and support space for the clinical practice. Given that the clinic will need to continue operations during the project, it is anticipated that areas will be taken down, or phased, during the construction. Surge space to allow the phasing has been identified. The addition will be located along the west side of the Markey Cancer Center/Ben F. Roach Cancer Care Facility, while the renovation will occur in existing research space on the on the Lower Level of the same building. Development of Radiation Medicine clinical areas is essential to growth of cancer programs supportive of the strategic plans for UK HealthCare. Current facilities are split between the Lower Level of the hospital and the Roach Building. Several initial facility studies have been completed that identified expansion and renovation of the areas of the Lower Level of the Roach Building to respond to immediate needs and is consistent with the Ambulatory Master Plan.

Project Status:

The contractor has mobilized onsite, installing fencing to define the limits of the construction and staging areas. Abatement of floor tile and lab countertops has been completed on the lower level. Demolition of approximately a third of the space on the lower level has been completed. A supplemental air intake fan, installed on the roof of the building, has been completed. This fan, complete with HEPA filters, will allow fresh air to be supplied to the air handlers while construction is ongoing. The relocation of utilities along the front of the building is underway. Earth excavation, to allow for expansion of the lower level of the building, will begin in early May and continue through the remainder of the month. A new corridor wall on the lower level will be constructed to allow for demolition in additional spaces to continue.

Upgrade Fume Hoods TH Morgan - Life Safety

Project Description:

To accommodate the needs of contemporary research and biology instruction, this project will update the fume hood exhaust and air supply systems and perform needed renovations and upgrades of teaching and research labs to accommodate eight new biology faculty members.

Project Status

All demolition is complete. Wall framing and hanging is 100% complete; drywall finishing is 50% complete. Electrical rough-in is 60%; plumbing rough-in is 75% complete; ductwork install is 10%. Casework shop drawings have been reviewed and approved, and the order has been placed. A chilled water outage to the building will be required so the old piping can be removed and the new piping installed. The Southwest quadrant of the building will be without chilled water from May 5-June 15, 2008. There will be a crane on site to remove the existing Air Handling Unit and deliver new piping. Control work will also begin in May. The current substantial completion date is July 18, 2008.

ARS - Agriculture Project

Project Description:

This is a federally funded project. The Forage Animal Production Research Laboratory will serve the Forage Animal Production Research Unit for the USDA. This unit is known as ARS on the south campus of the University of Kentucky. The mission of the FAPRU is to improve productivity, profitability, competitiveness and environmental sustainability of forage based enterprises within the transition zone of

the Eastern and Midwestern United States. Multidisciplinary teams to work to identify, evaluate, and manipulate genetic and physiological factors, using for the enhancement of food animal and equine health and performance in forage based enterprises as well as to improve forage plant persistence, quality, and production. This building will be a three to four story building with approximately 65,000 GSF for research labs, equipment and support rooms, offices and conferences rooms. The building will be located near the Plant Science building on the South Campus. The program also includes approximately 12,000 GSF for greenhouses and head house.

Project Status:

A Preliminary schematic design alternative # 1 was recommended by College of Agriculture this past month. University of Kentucky will advertise Consultant Selection RFP this month to begin the design process of repairing the steam line within the proposed lease area. Coordination with the proposed service tunnel extending from Plant Science building will be included.

Expand Ophthalmology Clinic - Hospital

Project Description:

This project consists of renovating approximately 12,500 square feet of space on the third floor of the Kentucky Clinic, some of which is currently occupied by Neurosurgery, in order to expand the existing Ophthalmology Clinic (also located on the third floor of the Kentucky Clinic) into the vacated space. It also includes refurbishing the existing Ophthalmology Clinic space. This project will necessitate phased construction activities to include expansion into the additional space as well as a full refurbishment of the existing Ophthalmology Clinic.

Project Status:

JRA Architects have been selected to provide architectural design services for this project. The design of this project will lag behind the project to renovate the outpatient clinic space in Kentucky Clinic (KNI) that is currently occupied by University Health Services. The Neurosurgery Department will move into that space after the renovation work is completed and will then allow the space they currently occupy on the 3rd floor to be renovated to accommodate Ophthalmology.

Renovate Outpatient Clinic in Kentucky Clinic

Project Description:

This project consists of renovating approximately 13,300 square feet of existing space on the first floor of the Kentucky Clinic which is to be vacated by the University Health Services (Student Health Facility) to create a new outpatient clinic for the Kentucky Neuroscience Institute (Neurology, Neurosurgery and Physical Medicine & Rehabilitation clinical services). This project includes renovation of part of the space and refurbishment of all of the space. After completion of the construction work associated with this renovation, KNI departments will move into this space.

Project Status:

JRA Architects have been selected to provide architectural design services for this project. The consultants have spent time in the existing space confirming existing conditions. The project is nearing completion of schematic design. Meetings are being held on Friday mornings to facilitate user input.

Replace Emergency Generators & Fire Pump - UK Good Samaritan Hospital

Project Description:

This scope of this project will consist of the replacement or upgrades of the following equipment at the Good Samaritan Hospital: Emergency Generator, Transfer Switches, AHU #25, Constant Pressure Water Pumps, Deaerator Tank, and a Fire Pump.

Project Status:

Design submittals from interested engineering design firms were delivered on Thursday, April 24. CMW, Inc. was the highest scoring firm based on the submittal criteria. The University is currently negotiating a fee with CMW. The current schedule indicates that design will be complete by July 9, 2008.

CAPITAL CONSTRUCTION QUARTERLY ACTIVITY

Construct Biological Pharmaceutical Complex Building

Project Number: 2235.00

Project Description:

Scope: \$132,792,000

Phase I of the Biological Sciences/Pharmaceutical Complex, was authorized by the 2005 General Assembly and funded in 2006 at \$40,000,000. Phase II was funded at \$92,792,000 and together these phases will complete the 279,000 gross square foot facility that includes some "shell space" to allow for the growing research needs. This "shell space" will be fitted out for research laboratories at a later date as university funds and/or grant dollars become available. This new building will provide the college with a state-of-the-art facility that will also allow the college to expand enrollment to address the shortage of pharmacists in Kentucky. The College of Pharmacy will relocate to this new facility and vacate their existing space. In addition to the current Pharmacy Building, college faculty members are housed in 10 buildings on and off campus. Consolidation of the research and teaching expertise of the eighth ranked College of Pharmacy in the U.S. will further strengthen the instruction of students and research collaboration among faculty. The vacated Pharmacy Building will be reassigned to the Department of Biology to provide needed expansion space for classrooms, research, and faculty to meet the needs of the growing student enrollment in UK's largest department. The project is expected to be complete by December 2009.

Construct Gatton Building Complex - Design Phase

Project Number: 2267.00

Project Description:

Scope: \$800,000

The proposed Gatton College Complex will include a state of the art classroom component which will enable the Gatton College to provide the type of "world ready" business education demanded by today's students and business leaders. The classrooms will include tiered and flat smart classrooms. This complex also will house the business research and study library as well as the Undergraduate and Graduate Advising Centers. The complex will contain signature spaces including a large auditorium, trading floor, innovative laboratories to support action learning, creative problem-solving and leadership development. The building also will house the Von Allmen Center for Entrepreneurship and E-Commerce Laboratory. The Faculty/Administration component will consist of office space for faculty, staff, and graduate assistants. The Outreach component will host nationally competitive professional and life-long learning experiences, and house the College's economic development related service centers including the Center for Business and Economic Research, Kentucky Small Business Development Center and the Center for a Sustainable Aluminum Industry. The program is currently projected at approximately 227,000 GSF of new space. The proposed site is located off Martin Luther King Boulevard and Euclid Avenue, moving UK's Business and Economics efforts closer to downtown Lexington and the business community. Construction financing will be sought from the General Assembly in the 2010 session.

Change Order # 1, 6/4/07, was approved for an increase of \$91,344 to facilitate the procurement strategy and meet the project timeline. A portion of select infrastructure was transferred from Bid Pack 4A to the earlier Bid Pack 3B. **Change Order #2**, 5/31/07, was approved for an increase of \$65,296 to relocate the existing direct buried steam lines and pressurized drain found to be in conflict with the new tunnel. Since the lines must be moved they will be relocated into the new tunnel to make the lines accessible for maintenance. **Change Order # 3**, 7/11/07, was approved for an increase of \$58,928 to relocate an existing sanitary sewer manhole and associated lines to sanitary sewer manhole and associated lines to resolve underground utility conflicts. **Change Order # 5**, 9/6/07, was approved for an increase of \$49,439 to replace and relocate deteriorated and inaccessible 2 1/2" and 1 1/2" underground direct buried steam lines that were revealed upon excavation. **Change Order # 10**, 10/1/07, was approved for an increase of \$55,314 to convert the portion of the six existing sanitary and storm sewer lines that pass through the main tunnel to ductile iron to ensure that these lines don't rupture. The increase also provided for re-routing the existing water lines to avoid conflict with the new tunnel. **Change Order # 11**, 10/4/07, was approved for an increase of \$47,780 to replace and re-route the existing domestic water line as well as reroute the existing water main. **Change Order # 21**, 11/21/07, was approved for an increase of \$53,383 to convert the 7000KVA transformer from aluminum to copper windings, add an air switch to the transformer and add a medium voltage outdoor breaker with remote monitoring and control capability to all five electric substations. These changes were made to increase the efficiency of the system and to meet specifications of upcoming substation upgrades. **Change Order # 23**, 12/10/07, was approved for a decrease of \$48,383 to alter the installation of the cold water and the cold water return piping system to avoid conflict with sensitive boiler equipment. **Change Order # 27**, 12/5/07, was approved for an increase of \$144,844 to provide saw cutting of the pedestrian walkway and walkway roofing instead of traditional hammering. The saw cutting method will reduce noise and vibration impacts to the adjacent Critical Care Facility. **Change Order # 32**, 1/18/08, was approved for an increase of \$33,072 to enlarge the existing emergency generator pads to support installation of new diesel generators due to changes in EPA regulations. **Change Order # 34**, 2/1/08, was approved for \$388,426 to provide additional construction manager's staff and general conditions due to an additional two floors being added to the Patient Care Facility. **Change Order # 42**, 3/20/08, was approved for an increase of \$128,502 to extend the limits of the blasting and excavation of rock in Bid Pack # 4 to accommodate the installation of sanitary line. The rock removal was originally intended for Bid Pack # 5, but will provide cost savings if moved to Bid Pack # 4. Early rock removal will also eliminate blasting after installation of foundation in Bid Pack # 4. **Change Order # 43**, 3/31/08, was approved for an increase of \$229,016 to increase the rock allowance due to greater rock quantities than anticipated.

PCF - Hospital GMP # 2 - Parking Garage

Project Number: 2239.20

Project Description:

Scope: \$32,766,968

GMP # 2. This is a portion of the larger Patient Care Facility Project (2239.0). This package will construct a seven level parking structure that will have an approximate 1,600 car capacity. The new garage will be located on the west side of Limestone Street, between Conn Terrace and Transcript Avenue. This structure will replace the existing Med. Center parking garage that must be demolished in order to tie the new Patient Care Facility to the existing Medical Center. A future pedestrian bridge will connect the new structure to the Patient Care Facility and the design has allowed for the future addition of approximately 15,000 square feet of retail space fronting Limestone.

To accommodate expanding enrollment, an additional organic chemistry teaching lab must be provided for fall 2008. This additional lab will be created via a major renovation of 6 adjoining rooms in the Chemistry Physics Building totaling approximately 2,300 net square feet. The dividing walls will be removed to create one large open room. All finishes will be replaced. New bench casework will be installed with 20 instructional fume hoods spaced along the benches; five additional hoods will be located on a side wall. Each student workstation will be provided with water, cup sink, certain lab gases, electrical power, and some storage space. Wall cabinets, safety stations, and high quality lighting will be installed. The building's ventilation capacity will be upgraded by installing a new AHU to accommodate this hood-intensive room, as well as additional future lab work planned.

Renovate - Expand Boone Center

Project Number: 2251.00

Scope: \$6,200,000

Project Description:

The Boone Faculty Center was built in 1986 and has only received minor maintenance repairs in the interim. This project will renovate the original 19,561 square feet of the Boone Faculty Center on the Lexington Campus and construct an addition of approximately 3,300 square feet. The center as constructed is able to host small to medium size meetings, functions, luncheons and dinners, but due to space constraints it is unable to accommodate the numerous larger scale conferences and symposia that university departments frequently host. These departments then contract with local hotels and the convention center. Since the center is to operate and be maintained on a self supporting basis the inability to reasonably host the 300 to 400 attendee events causes a loss of potential campus dollars to off campus sites, that if able to be captured could help defray the annual operating expenses of the center. The project is expected to be completed by February 2008.

Replace Steam and Condensate Piping - Multiple Projects

Project Number: 2248.00

Project Description:

Scope: \$2,298,900

This project will replace central steam and condensate piping systems. The Central Utilities Systems of the University of Kentucky have proven to be very economical to maintain and operate. It reduces the construction cost of new building by eliminating redundancy in buildings and reduces the operations cost of new and existing buildings by providing reliable and low cost energy alternatives at central locations. The Central Steam and Condensate system on the University of Kentucky Campus is an extensive layout of underground piping, tunnels, and steam pits. A large portion of this system has deteriorated through corrosion, and much of it is beyond design life expectancy. Condensate returns and steam lines need to be improved. Most of the direct bury steam lines consist of Class A conduit systems, which have deteriorated and corroded to the point that increased loads on the central heating system have been experienced. Repairing these steam and condensate lines will improve the ability of the campus heating system to deliver steam to all campus buildings.

Upgrade Cancer Center Radiologic Facility - Hospital

Project Number: 2252.00

Project Description:

Scope: \$6,000,000

The University of Kentucky Hospital needs to significantly upgrade and improve the current clinical space in the Lower Level of University Hospital. This will include therapy rooms, clinic exam areas, infusion space, office, education, and support space for the clinical practice. Given that the clinic will need to continue operations during the project, it is anticipated that areas will be taken down, or phased, during the construction. Surge space to allow the phasing has been identified. The addition will be located along the west side of the Markey Cancer Center/Ben F. Roach Cancer Care Facility, while the renovation will occur in existing research space on the on the Lower Level of the same building. Development of Radiation Medicine clinical areas is essential to growth of cancer programs supportive of the strategic plans for UK HealthCare. Current facilities are split between the Lower Level of the hospital and the Roach Building. Several initial facility studies have been completed that identified expansion and renovation of the areas of the Lower Level of the Roach Building to respond to immediate needs and is consistent with the Ambulatory Master Plan.

CAPITAL CONSTRUCTION QUARTERLY ACTIVITY

Upgrade Surgical Services

Project Number: 2231.00

Scope: \$4,500,000

Project Description:

This project will renovate existing space to develop a Same Day Surgery Intake Unit; will relocate surgical offices adjacent to the operating rooms in the Critical Care Center to expand the Post Anesthesia Care Unit; will develop a Pre-op, PACU, and waiting space in the main hospital building dedicated to pediatric patients; and will renovate the 1st floor surgical waiting area. The current layout and size of unit causes numerous inefficiencies in the department. The amount of PACU beds is too few based on industry standards. This renovation will allow for improved operational efficiencies of the operating rooms and will provide for an improved patient experience with the development of the same day surgery intake unit. This space is connected to the Hospital's central chilled water and steam systems (coal or gas fired boilers/chillers).
