

Pictorial Art Souvenir, 1901 of *The Kentucky State College*

"THE ROYAL ROAD TO LEARNING."
A bit of campus showing model driveway and main building.

*K*ENTUCKY owes it to herself and to the generation of her sons yet to come to erect and endow a Great University like that which has made Virginia scarce less famous than the achievements of her greatest men.—From report of the parent legislature, of '78.

The camera couldn't lie, were it so disposed, and in these pages we actually show rather than state what a great institution the State College really is ❖

Unpublished Views of Kentucky State College.

Showing Entrance to Athletic Field.

Athletics at K. S. C.

By W. H. Kiler, Director of Athletics.

ACH of the American States has an individuality peculiar to itself. Early history, economic conditions and State pride have produced it. No people in this great country can boast of more pride for their State than have the people of Kentucky. No State can produce such magnificent blue grass pastures. No State can boast of such wonderful horses. So should this great State be equally interested in human life and development. All should aim at the elevation of life to a higher standard and more complete form; the child is to be better than the parent, the race is to evolve toward perfection. As the Kentucky horse surpasses all others in speed, beauty and endurance, so the Athletics of Kentucky should surpass those of other States.

With this end in view the State College enters upon a new era in its Athletic history. With a new and complete equipment the College is able to offer greater inducements to those receiving physical as well as mental development than any similar institution in the South. The teams of the State College are bound to be supreme in the State and no Kentuckian should be content until they surpass the team of any school they may meet.

The State College has and will stand for purity in Athletics. "Ringiers" are not recognized in this school. Each member of the team is a student and a gentleman, who has won his position by hard and persistent work and who knows that he must keep up his studies and work hard on the team or lose his position.

With the loyal support of students, faculty and friends, with the new gymnasium and new candidates for honors, the coming year should be a memorable one in the Athletic history of the State College.

DR. J. ALBERT SMEDLEY,
An old student of K. S. C. wins honors.

R. J. ALBERT SMEDLEY was born in Fayette County, Ky., August 11th, 1875, near Fort Spring, seven miles from the city of Lexington. His early education was acquired in the county schools. In 1893 he entered State College and for two years was an ardent student in that institution. In '95 and '96 he taught successfully one of the leading schools in Fayette county, and in the year of '97, entered the Louisville College of Dentistry, one of the leading institutions of its kind in the United States. He distinguished himself throughout his college career by taking the honor prizes three successive years, and was appointed valedictorian of his class. The last prize he received was a handsomely engraved faculty gold medal, given for proficiency and general standing in all branches. After his graduation from the Louisville College of Dentistry, he was offered a position in that institution as instructor in Orthodontia and Crown and Bridge Work, which he accepted but only for one year, intending at the end of that time to practice his chosen profession in the city of Lexington. He is now located at No. 97 East Main Street, where he occupies a neat and attractive office.

THE Department of Phonography in connection with State College, under the supervision of Miss May E. Millikan, has kept pace with the rapid growth of the College, and the graduates of this department are today holding positions of honor and trust equally as lucrative as are the graduates of other departments.

Matriculates of the College proper are given special attention in the

School of Phonography

There as in every department absolute thoroughness is required.

For short-hand and type-writing--and the practical training of Expert Stenographers this school is without a superior in the land. Its home is in the handsome Southern Mutual Building (formerly Northern Bank) shown on this page.

City of Lexington Grouped Around Magnificent New Court House.

LEXINGTON, the home of wealth, the seat of culture---the lovely city sits like a radiant jewel on the bosom of the fairest land e'er Kissed by the loving beams of yonder smiling sun.--J. Proctor Knott, Ex-Gov. of Kentucky. No more ideal city for the location of State College could have been selected than than the beautiful, cultured and historic city of Lexington. ❖ ❖

State College of Kentucky.

**The Agricultural and Mechanical (State College) College of Kentucky,
offers the following courses of Study, viz.:**

Agricultural, Horticultural, Chemical, Biological, Mathematical, Normal School, Classical, Mechanical Engineering, Electrical Engineering, Civil Engineering, each of which extends over four years and leads to a degree. Post-graduate courses of study are also provided, leading each to a master's degree. Each course of study is organized under a separate faculty. The general faculty numbers more than thirty professors and instructors.

County appointees receive tuition, room rent in dormitories, fuel and lights, and if they remain ten months, traveling expenses.

The laboratories and museums are large, well equipped, comprehensive and modern.

The last Legislature appropriated \$30,000 for a college home for young women, and a drill hall and gymnasium for men has been provided.

Military tactics and science are fully provided for as required by Congress.

Graduates from the several courses of study readily find excellent positions and liberal remuneration. The demand is largely in excess of the ability of the college to supply.

Last year the matriculation list was 620.

For catalogues, method of obtaining appointments, information regarding courses of study and terms of admission, apply to

OSTEOPATHY!

The New System of Healing without Drugs.
It often Prevents the Necessity for Using the
Knife. Its Cures are Permanent, because
Natural. If Drugs have failed you, try Os-
teopathy.

IN THE cure of Chronic Diseases, Osteopathy is supreme. The Osteopath goes to the seat of the disease and removes the cause. Osteopathy removes disease that medicine cannot reach. The Osteopath, by manipulating the nerves and other structures of the body, can often give instant relief, whereas medical treatment would require hours. If you want Osteopathy you want the best; therefore consult one who is also a graduate of Medicine and Surgery and understands all of the different methods of suggestion or Psycho Therapeutics. **Examinations Free.**
