To the Governor and
the General Assembly
Commonwealth of Kentucky

Pursuant to the provisions of Sections 57.140 and 156.250, and upon the order of the State Board of Education, herewith is submitted the Biennial Report of the State Board of Education, prepared by the Superintendent of Public Instruction, for the biennium ending June 30, 1955.

Part I of this report constitutes the Report of the Superintendent of Public Instruction and his staff of the Department of Education, while Part II is made up of statistical information and data relating to personnel, finance and school population for the state and the separate school districts.

Your attention is invited especially to the introductory section of the Report, in which the major educational achievements of this administration are summarized and evaluated and ". . . including recommendations for the improvement of the schools."

Respectfully submitted,

WENDELL P. BUTLER
Superintendent of Public Instruction

PART I

REPORT OF THE STATE BOARD OF EDUCATION

SECTION ONE

A. THE SUPERINTENDENT OF PUBLIC INSTRUCTION DISCUSSES MAJOR ACHIEVEMENTS IN KENTUCKY EDUCATION

INTRODUCTION

Detailed accounts of accomplishments and progress made by the various services within the State Department of Education are set out elsewhere in this report. The purposes of this section, therefore, are to focus attention primarily upon the major achievements, and to give a composite view of educational progress from the perspective of the State Superintendent.

Since the beginning of an original system of education in Kentucky rather steady growth and progress toward an improved quality of instruction can be cited. Almost every administration has developed a quality of program above that of the preceding administration, some of which may have been of small immediate import, yet each has added step upon small step in the incline toward the summit. Others of these stand out boldly to characteristically mark the leadership of certain administrations.

For example, the administration of Dr. Robert J. Breckinridge, 1847-1851, marks the real beginning of the state system of free public education. Public education for Negroes was first provided by Act of 1866 through the leadership of Dr. Daniel Stevenson, Superintendent, 1863-1867. Due to the foresight and leadership of Superintendent Zachary F. Smith, 1868-1871, the people voted overwhelming in 1869 to raise the state school levy from 5c to 20c per $100 of asssesed valuation. The first legislation requiring each county to establish a high school was enacted during the administration of John G. Crabbe, 1907-1909. One of the most significant pieces of school legislation within the history of Kentucky education was the enactment of the new "School Code" by the 1934 Legislature upon the recommendation of Superintendent James H. Richmond, 1932-1936. Legislation establishing the framework for the present Teachers' Retirement System was enacted by the Extraordinary Session of the Legislature during the administration of Harry W. Peters, 1936-1940. The administration of Superintendent Boswell B. Hodgkin, 1948-1952, is outstanding for the reforms and advances in local and state fiscal administration. The administration of the incumbent Superintendent will, perhaps, be notable for the Foundation Program of Education.

In future years the history of Kentucky education will record no educational milestone of greater significance by comparison than that of the Foundation Program of Education which was enacted into law by the 1954 Session of the General Assembly. This Law will rank among the most important and progressive pieces of school legislation which has ever been enacted by any Kentucky Legislature. Because of the great significance of the popular movement which secured the Foundation Program of Education for Kentucky's children, and because of the importance of this program for the future of Kentucky, some of the major events in its conception, development, and achievement are here described. Its history, its present status, and its great promise for the future, altogether, comprise a story which every Kentuckian should know.

THE PAST

Since the adoption of the State Constitution of 1892 there have been two important Constitutional provisions applicable to public education. Section 183 provided that "The General Assembly shall, by appropriate legislation, provide for an efficient system of common schools throughout the State." Section 186 originally provided that ". . . . each county in the Commonwealth shall be entitled to its proportion of the school fund on its census of pupil children for each school year. . . ." After two previous amendments Section 186 still provided that ". . . . each school district in the Commonwealth shall receive on a census pupil basis its proportionate part of at least seventy-five percent of any fund accruing to the school fund." While Section 183 provided for an efficient system of education, Section 186, in actuality, made the accomplishment of this relatively impossible. Various attempts were made to remedy the limiting provisions of Section 186 and to more effectively establish the provisions of Section 183. More than sixty years were to intervene, however, before decisive action was taken making it possible for Kentucky to actually have what is provided by Section 183.

In 1952 every school district in the state was beset by numerous pressing problems. Enrollments had greatly increased. School buildings were run down and there was not enough of them. One-fourth of the teachers were not qualified to meet certification standards. There were 2,600 one-room schools, and transportation was inadequate and unsafe. These were not new problems in 1952: they were the perennials of a long period before. Valiant efforts had been made. both locally and by the state, to correct these poor conditions. Some progress had been made through improved taxing ability of the local district, increased per capita distribution from the state, equalization funds for the poorer districts, and a special voted tax for building purposes. But all of these, vitally helpful though they were, in the long run were only new patches upon old garments. So long as Section 186 of the Kentucky Constitution remained unchanged no sound remedy for the ills of Kentucky education could be prescribed. This constitutional provision continuously aggravated and intensified the state's educational ills and no permanent relief was possible so long as it remained unchanged.

The first step in removing this roadblock to educational improvement was taken by the 1952 Session of the General Assembly when it authorized a proposed amendment to Section 186 of the Constitution. The proposed revision provided that the Legislature, by general law, determine the method of distributing the State school fund, to replace the old census pupil basis of distribution as had been required. This revision was designed to remove the old inequities and inequalities among the several school districts and to allow distribution of state school funds on the basis of need.

Following upon the proposal of the 1952 Legislature to amend Section 186, the Legislative Research Commission was requested to study the educational needs of the state. In carrying out this study the Legislative Research Commission proposed a survey to be conducted throughout the state to learn what the people wanted in an educational program for their children. To assist in this survey a State Advisory Committee on Educational Policy was appointed. The committee's purpose was to "determine what the people want and report accordingly" to the Legislative Research Commission. To carry out this purpose the Committee requested

the Lieutenant Governor, as chairman of the Legislative Research Commission, to appoint a local Advisory Committee in each school district. The Lieutenant Governor graciously complied with this request, and an extensive grass roots study of education was begun.

Using a series of questionnaires designed by the staff of the Legislative Research Commission, the members of the Local Advisory Committees worked with the people in every school community in the state. Altogether, 20,000 people expressed their opinions by means of the questionnaires on the kind of school program which they wanted for their children. These opinions were compiled and analyzed and the findings were reported in the Legislative Research Commission bulletin, KENTUCKY'S EDUCATIONAL PUZZLE. A very significant conclusion from the results of the survey was that no sound foundation for education was possible until Section 186 was amended. Thousands of copies of these bulletins were distributed to the people to provide them with sound information upon which to form intelligent decisions respecting the proposed amendment of Section 186 to be voted upon in the General Election of 1953.

After a thorough study of the data of this report, examination of other research findings and consideration of successful educational programs and practices in operation in other states, the State Advisory Committee developed a Proposed Foundation Program for Education in Kentucky. Approximately 45,000 copies of this proposed program were distributed to the people for study. When the people were given the facts they came to realize that the kind of educational program which they wanted for their children was not possible under Section 186 of the Constitution as it then read. So, on November 3, 1953, they voted three to one to amend it—a clear indication that the people wanted better educational services for their children. By the overwhelming vote of approval which the people gave to the proposed constitutional amendment they indicated, wholeheartedly, their desire for a plan for education which embodied the elements of the Proposed Foundation Program for Education which had been put into their hands. The task then fell to the educational leadership of the state to prepare a Foundation Program Law and secure its enactment by the next Legislature.

The Law, as it was finally written, represents the thinking of thousands of people. Its major provisions are founded upon the standards set by the people as determined from the survey conducted by the Legislative Research Commission. These standards were refined and supplemented by the professional knowledge of Kentucky's educational leaders. Then the most outstanding authorities on foundation programs of education in the nation were brought to Kentucky: Dr. Edgar Morphet, of the University of California; Dr. R. L. Johns, of the University of Florida, and Dr. L. D. Haskew, of the University of Texas, helped to write the Foundation Program Law. After the initial drafting of the Law, a series of meetings were held to seek further advice and help from both laymen and educators. Great care was taken to make the Law educationally sound and at the same time to prevent any district from being harmed by its provisions.

When the proposed measure was submitted to the Legislature for its consideration, its reception there was so favorable that the bill was signed by sixty-six Representatives as its sponsors. State-wide sentiment in favor of the educational program embodied in the bill was further made evident

by the vote upon it. When it was put to the House for final vote there were only four dissenting votes and in the Senate only one. Thus it was that an idea for better schools became the Law of the Commonwealth.

Throughout this long campaign, which had begun with the inauguration of this administration in January 1952, the leadership of the State Department of Education was consistently supported by the Kentucky Education Association and its affiliated organizations, the Kentucky Congress of Parents and Teachers including district and local associations, the Kentucky School Boards' Association, the Kentucky Council for Education, and numerous other professional and lay organizations. Following enactment of the Foundation Program Law, a second phase of the campaign was begun to acquaint the people with the program and to secure its full financing in 1956. In this second phase, which still continues, the support and cooperation of these organizations continues strong and enthusiastic.

THE PRESENT

What is the status of the Foundation Program for Education today—nearly two years after it was enacted into law?

When the 1954 Legislature passed the Foundation Program Law it did not appropriate sufficient funds to finance the program. The amount appropriated was approximately seventy percent of that needed for each year of the biennium. Nevertheless, the Foundation Program was put into effect at the beginning of the 1954-55 school year to the extent possible with this limited appropriation. Unfortunately, this partial financing has made it impossible to deliver many of the improved services provided for in the Law, and since the available funds had to be allotted on the foundation principle of giving help where the need is greatest, 78 of the wealthier districts, out of the total of 224, could not qualify on the basis of need for participation in the allotments. Despite the restrictions necessarily imposed by the seventy percent level of financing, 129 districts have received more funds under the Foundation Program in its two years of operation than they were receiving under the old method of distributing state funds.

What improvements has the Foundation Program brought to the local district—though financed to only seventy percent of the need?

The Foundation Program is a financial partnership between the state and the local district. In meeting the requirements of this arrangement there has been a marked improvement in local financial efforts. In 1954-55 local school revenue increased $3,300,000 over 1953-54 and an estimate based on information on local assessments furnished by the Department of Revenue indicates that local school revenue for 1955-56 will be $3,400,000 above the 1954-55 figure. From the state level the Foundation Program has made possible a more equitable distribution of state funds: the funds go where there is the greatest need and the least financial ability in relation to need.

Since state funds are now distributed on the basis of the number of pupils in Average Daily Attendance, rather than on the number of census pupils, the number of children who are actually in school—not just on the census—has shown a significant gain. In the two years of partial operation under the Foundation Program, the Average Daily Attendance for the state has increased by 5.9 percent.

The training of certificated teachers has improved and there are fewer emergency teachers. This trend will, without doubt, continue be-

cause the Foundation Program offers the incentive of increased pay for improved training.

Coupled with the facts of more children in school, and better qualified teachers to instruct them, is an improved program of supervision of instruction by principals and supervisors. These together, plus more instructional supplies, plus more library facilities, plus more modern classrooms, and with closer cooperation between state and local administrators all add up to an improved instructional program for the children.

Services from the State Department of Education have increased and improved since the inauguration of the Foundation Program. The increased demand for services and assistance to local schools has necessitated some functional reorganization within the Department in order to render more effective help with local school problems. Since the Foundation Program centers all efforts on improving classroom instruction the area of emphasis in the Department's program has been essentially shifted toward those divisions whose functions directly serve the instructional program. However, when the program is financed to the extent of the need, and thus has gotten into full operation, its success for sometime to come will be even more dependent upon the quality of professional leadership provided by the State Department of Education.

There is, today, a greater knowledge and a better comprehension of educational needs and problems by teachers, administrators, laymen, and state officials than has been for many years. This has brought closer cooperation among all of these people and a growing respect of each for the others. The teaching profession is more closely united than ever before and there is marked improvement in teacher morale.

The institutions of higher education have benefited from the Foundation Program through increased enrollments, particularly in the programs of teacher training. It is a sound prediction that this will continue as increasing numbers of teachers seek further training and as more young people are attracted to teaching by the higher salaries and improved facilities provided under the Foundation Program.

These improvements in Kentucky's educational program which have come in two years of operation under the Foundation Program—financed at only seventy percent of need—testify to the soundness of the Law. Further, they have brought to the people a realization of the true condition of the schools, and have developed a sentiment and a determination to raise the educational level of the State. This sentiment has reached also, into the political parties and into the halls of government. For the first time within the span of memory, the convening of the 1956 Session of the General Assembly will find the Governor and a majority of the lawmakers already committed to financing the educational program to one hundred percent of the need.

KENTUCKY'S SCHOOLS LOOK AHEAD

As was stated earlier in this discussion, Section 183 of the State Constitution directs the Legislature to ". . . . provide for an efficient system of common schools throughout the state." When the 1956 Legislature acts to fully finance the Foundation Program of Education for Kentucky it will be providing that which is envisioned in this constitutional directive more fully than has been done by any previous Legislature. The people will then have before them their greatest opportunity for assuring their children a sound and efficient system of education. Education in Ken-

tucky is, at last, now on the right road; the roadblock has been removed; the motive power has been supplied, and it must move forward.

The Foundation Program of Education enacted by the 1954 Legislature has earned Kentucky nationwide recognition and approbation. **Here is a program designed not for the teacher nor the school administrator but for the child.** Here is a program which breaks away from the traditional pattern of school finance and calls for appropriations which are based on needs of children and youth. It collects the money where the money is and spends it on the children where the children are, while guaranteeing that every district will make a reasonable effort toward financing its own local school program. Here is a program designed to provide for every child who attends school in Kentucky—no matter who he is or where he lives, regardless of the wealth of his parents or the county in which he resides—at least the minimum amount of financial support necessary to his education.

The one ultimate purpose of the Foundation Program is to provide a minimum level of educational services for all of Kentucky's children in all of the schools throughout the state. In order to assure these minimum essentials the state must plan to give continuing financial support to the school program with a full understanding that costs will progressively increase because the greater the need, the greater the cost. There will be more need because there will be more children in the schools, more classrooms required, more and better trained teachers needed, and new and improved services of all kinds for all children.

THE DEPARTMENT AND ITS RESPONSIBILITIES UNDER THE FOUNDATION PROGRAM LAW

By statutory provision the Department of Education consists of the State Board of Education and the Superintendent of Public Instruction, who is the head of the Department and chairman of the State Board. The Department is required to ". . . . exercise all administrative functions of the state in relation to the management and control of public schools. . . ."

The Department presently consists of eighteen divisions, each of which performs a specialized service within the total responsibility of the Department for administrative and supervisory control of public education. In simple terms the Department of Education is a service organization, providing leadership, supervision, guidance, and assistance to local school systems throughout the state. A wide range of advisory and consultative services are offered by the Department, and some regulatory policies are administered. The Superintendent's staff includes personnel with specialized training in every phase of the overall program of the elementary and secondary schools, as well as specialists in related branches, such as finance, administration, buildings, and school law.

Since the Superintendent of Public Instruction is the head of the Department of Education as well as chairman of the State Board of Education, the educational leadership for Kentucky is, therefore, vested in this office. The professional staff of the Department exercises that leadership function only through delegation and by direction from the Superintendent. The character of the leadership from the state level is of highest importance to the welfare of the state educational system, and there is no substitute authority which can properly exercise this function. These are facts which have been effectively and courageously

demonstrated in the long campaign to amend the Constitution and to secure the enactment and financing of the Foundation Program.

The Department of Education operating under the Foundation Program Law during this biennium has been called upon to render an increased measure of service and to assume a greater responsibility of leadership for the total program of education in Kentucky. Once the Foundation Program is fully financed its success will hinge on efficient and capable leadership at the state level. Local leadership must be stimulated and guided by the professional staff of the Department. In order to meet the increased demands made upon the Department it has become necessary to re-examine and re-evaluate the programs of all the schools with a view to determining the extent of the Department's responsibility for improving these programs for the children. During this period of transition, from the old traditional pattern of distributing state school funds on a per capita basis to the new method based upon the needs of children, it has become necessary to more fully utilize the capabilities of all personnel and to gear all activities of the Department to the job ahead, that is, to the job of efficiently administering the Foundation Program.

A continuous in-service training program with members of the Department staff and local school personnel has been going on for four years. Under the leadership of the Department, hundreds of meetings, conferences, programs and workshops on the Foundation Program have been held with local school officials in almost every district in the state. The fact that the transition from practices under the old method to an entirely new and improved system under the Foundation Program Law has been made with little interference and few complications is a compliment to the leadership of the Department and a testimony to the merits of the Law.

PROGRESS AND ACHIEVEMENTS IN OTHER AREAS

The New Textbook Law

Pursuant to widespread demands from local school people, and to the wishes of many publishers' representatives, to give the final selection of free textbooks into the hands of the local administrators and teachers, the Department drafted a new Textbook Law embodying this plan. Upon recommendation by the Superintendent the provisions of this draft were enacted into law by the 1952 General Assembly. Two years of experience in actual operation under this law has revealed the superior merits of this new method of textbook adoption. Further, this experience has proved that this is an accomplishment in which the Department can take pride.

The new law provides for a staggered plan of adoption whereby one-fourth of the textbooks required are selected each year for a four-year period. All districts now are eligible to make their selections from the state multiple list of textbooks. This plan has relieved the State Textbook Commission of overburdensome labors and of the onus of alleged favoritism. State level adoptions have been facilitated and the books which are to be used in the classrooms are finally selected by the local administrators and teachers. Departmental administration of the law is simpler, though the mechanics and clerical operations connected with it are greater than under the old law.

Teachers' Retirement System

Another notable achievement during this administration has been the passage of the new Retirement Act under which the teachers and the state pay one percent more in each age bracket and upon the gross salary. This amendment after a few years will provide adequate retirement allowances for the members of the profession and will do much to stabilize the teaching staff of the public schools. The profession has been working toward such an amendment for fifteen years; fortunately, it was achieved during the present administration. The Kentucky Teachers' Retirement System now stands as a model for other states.

The Research and Statistics Division

A Division of Research and Statistics was first established in the Department in 1951. The division was set up especially to conduct the School Facilities Survey under authorization of Federal Public Law 815. This survey of existing school facilities and needs was completed June 30, 1954. Since federal support ended with the completion of the survey, the division could not be maintained with Department funds alone and the staff was disbanded.

The need for a research division in the Department has long been recognized, and at the end of the School Facilities Survey a small research staff was maintained as a section in the Bureau of Administration and Finance. Its major function up to the present time has been in studying the need, local ability and required state aid under the Foundation Program Law. In this connection, however, other research in several related areas has been conducted, with the result that for the first time much important and valuable information and data is available to the Department staff in a central research section. As experience in the administration and operation of the Foundation Program is gained, the research section will be able to turn its attention more to these other, more general areas of research, thus coming to serve the entire staff of the Department.

The establishment of a research section for the Department has been of limited general influence up to now though the quality of its limited research is commendable. The significant things about this section now are its establishment, in the first place, and secondly, in its anticipated growth and future importance for the entire state school system.

Desegregation

Together with the many problems that had to be met in developing the Foundation Program came the initial decision of the Supreme Court of the United States on May 17, 1954, holding that racial segregation in public education constitutes discrimination and violates the "equal protection of the law" principle of the Fourteenth Amendment to the Federal Constitution.

Since this initial decision of the Court came at a time when many local school systems had completed their plans for the succeeding school year, the State Board of Education recommended that all schools continue to operate in the usual manner pending the final opinion of the Court. On May 31, 1955, the Court rendered its final decree which confirmed and reiterated its earlier ruling and which, in effect, made all local, state, and federal laws in conflict therewith null and void.

A dual pattern of education has existed in the South for three-quarters of a century and obviously the system could not be dissolved immediately without throwing the whole educational organization into chaos

and confusion. With this view in mind, but also in conformity with the judment of the Court and with an unofficial opinion of the Attorney General of Kentucky holding that the state law requiring compulsory separation of the races in public schools could no longer be sustained, the Superintendent of Public Instruction submitted the following recommendations and resolutions to the State Board of Education:

"The implementation of the recent decision of the United States Supreme Court with respect to segregation of Negroes in the public schools of Kentucky, will necessitate careful study and consideraiton by both state and local officials.

"The Supreme Court has placed the primary responsibility for initiating specific plans for compliance with the decision on the officials of each school district. In light of the Court's instruction, it is deemed essential that local school authorities begin immediately a study of appropriate methods to implement the decision of the Court as applicable to their respective local conditions.

"The Court in its final decree was cautious in tone. Because of conditions and attitudes which vary with communities, time for study and necessary adjustments has been given to local school authorities.

BE IT RESOLVED:

1. That the State Board of Education request its Chairman, the Superintendent of Public Instruction, to begin immediately a study of the Supreme Court's decisions in terms of the responsibilities of both state and local school offiicals with respect thereto.
2. That the State Board of Education authorize its Chairman, the Superintendent of Public Instruction, to direct to the attention of local school authorities the Court's instruction that local school boards begin immediately a study of appropriate methods to implement the decision of the Court as applicable to their respective local conditions.
3. That the State Board of Education request its Chairman, the Superintendent of Public Instruction, to recommend to school superintendents that desegregation study groups be appointed in every community where the question of integration is involved.
4. That the State Board of Education urge local school authorities to proceed as rapidly as conditions warrant."

These resolutions were approved and adopted by the State Board of Education at its regular quarterly meeting on June 23, 1955.

At the close of the biennium the progress which has been made in complying with the Court's order surpasses that anticipated by the most liberal observer. Some school systems have already started the process of desegregation and many others have organized citizens' committees to advise the boards of education on this problem. There has been little organized opposition to plans for effecting this change, and it is expected that the state will complete the integration process in orderly fashion.

School District Mergers and Consolidation of Small Schools

Great savings in the cost of local district operation have been effected and improved educational programs have been provided by district mergers. Since June 30, 1951 to date, the total number of school districts has been reduced by mergers from 232 to 224.

Where practicable the Department has encouraged and promoted

the consolidation of small, inefficient school units, both elementary and secondary, into larger and better equipped school centers.

In 1952 the State Board of Education approved higher standards of accreditation for high schools. Among other standards the minimum enrollment for approved high schools was raised from 60 to 100. Since 1952 the number of high schools having less than 100 enrollment has been reduced from 114 to 56. Nine of the 56 have been removed from the list of accredited high schools and eleven others are under study by the State Board of Education. Most of those remaining are necessary because other schools are not available for the students to attend, or available schools are physically inadequate to absorb the additional students.

In 1952 there were some 2,600 one-room schools in the state. Today there are approximately 2,200.

Functional Reorganization of the Department

The essential responsibilities of the Department of Education as originally defined by statute have perennially grown by accretion, as the span and scope of education have necessarily expanded as part of the general social development. To keep the functional organization of the Department somewhat parallel with the regular demand for new or added services requires periodic re-arranging of departmental divisions and personnel. Such a change in organization was effected at the beginning of this administration. Without establishing new positions or offices a re-arrangement of divisions and staff was made so that the same staff has been able to render more services to local schools by more efficient procedures.

For purposes of maximum utilization of staff and greater efficiency of operation a re-assignment and re-deployment of a small number of staff members was effected July 1, 1954. These changes accomplished two significant things: the addition of services not heretofore rendered, and improvement in coordinating and integrating the work and services of all divisions into a whole departmental program.

RECOMMENDATIONS FOR THE FUTURE

A Strong Department

With the growth of Kentucky's school population and particularly with the financing of the Foundation Program in 1956, there will be a need for additional guidance from the Department of Education. Many new problems will emerge with which the local school officials will need help. It will be necessary to provide safeguards designed to insure full educational returns for every tax dollar. These services, though not all new, will require additional personnel and facilities. It is false economy to appropriate additional aid for schools and then fail to provide the organization and personnel adequate to carry out the new services provided for.

In providing all educational services the focus should be upon the quality of teaching-learning situations. The prime responsibility of school administration at both the state and local levels is to provide efficient programs of instruction for all. Under the Foundation Program the big task is to improve instruction in the classroom.

After the program is fully financed and after qualified teachers have been secured, many of them will need help and guidance. For this reason it will be necessary to have supervision, state and local, which can help

in the orientation and development of teachers and at the same time safeguard the large investment of the state in its educational program.

Public Relations

The people of any community will reach sound conclusions about a program of education for their children if given the facts and time enough to study them. For this reason, a good public relations program is imperative at both state and local levels.

CONCLUSION

"Kentucky's greatest resource is her people", but her ultimately greatest resource is her people—educated.

Recent years have witnessed great progress—sometimes phenomenal—in many areas of Kentucky life and culture. Agriculture has literally leaped forward; industry has increased in numbers, size and diversity; the growth of air travel is one of the phenomena of this generation; and a great program of adult education exists through the popular media of television, radio and newspapers. Individual income is greater than ever: people are better housed, clothed, fed, entertained, and attend church more often.

It would be an unwise and ungrateful people who forget that these elements of an advancing economy and culture are related in direct ratio to the general level of learning of the whole population. The level of education lags, compared to the levels of advancement in other areas of life. But these important accomplishments in other areas have not been made from the force of the pull on their own boot straps. Rather, they rise, and must, from the perpetual springs of knowledge which flow from the force of a system of mass education. They have soundness and stability because they rest upon foundations of an educated people.

Tyranny and popular education cannot share a state nor an age. Popular freedom is an illusion apart from an informed populace and economic and cultural growth advances proportionately to the level of general education among the people. This is summed up in Jefferson's observation: "If a nation expects to be ignorant and free in a state of civilization, it expects what never was and never will be." The American system of free public education stands today as the greatest stabilizing force amidst a maelstrom of conflicting social ideologies and as the safest protection against the impingement of subversive influences upon the individual.

The people have developed an educational plan and their elected representatives have enacted it, which will at last put into action the mandate of the Constitutional Convention of 1892 to ". . . . . provide for an efficient system of common schools. . . . ." Kentucky is on the verge of a challenging opportunity, and in the long run we will get the quality of education for which we are willing to pay. Either Kentucky pays the cost for good education or it pays a higher cost for ignorance and illiteracy. Either the State will pay for character building in widespread public education or it will pay for jails, mental hospitals, and charity. The question is not: can Kentucky afford the cost of education? Rather, the question is: can Kentucky afford the cost of **not** educating her children?

B. TEACHERS' RETIREMENT SYSTEM

This is an abridged report covering the period from June 30, 1953, to June 30, 1955. For complete information on the Teachers' Retirement System, the reader is respectfully referred to the Fourteenth Annual Report and the Fifteenth Annual Report of the Teachers' Retirement System prepared and published under the requirements of Section 161.320 KRS.

The most outstanding developments for the biennium was the passage of House Bills 319 and 322, which gave the teachers what amounts to a new Retirement System, and the special grant of $400,000 by Governor Lawrence W. Wetherby from the Governor's Emergency Fund for the purpose of putting House Bill 322 into effect July 1, 1955, instead of July 1, 1956 as previously expected. House Bill 319, which increased the minimum retirement benefits, had been put into effect July 1, 1954, for the immediate help of those in the minimum benefits group.

As of July 1, 1955, 2,136 teachers have been retired, and the Retirement System has paid $4,847,017.42 in benefits to this group. Under the new Retirement Law, young members coming into the Retirement System at the age of approximately 23 will be able to retire with an annuity equal to one-half of the salary for the five highest consecutive years of salary by age 60 or 61 years. Older teachers coming into the profession as late as age 40 may be able to qualify for an annuity of half-pay by age 70. Other age groups will fare proportionately well according to the number of years of service credit and the amount of the salary.

TABLE I-r
TEACHERS' RETIREMENT SYSTEM MEMBERSHIP 1940-55

	SERVICE RECORDS				
	With Prior Service	Without Prior Service	Total With Records Filed	Members Without Records Filed	Totals

	11,464	15,541	27,005	2,374	29,379
	13,585	11,126	24,711	6,779	31,490
Total Accounts Handled 1940-55	25,049	26,667	51,716	9,153	60,869

Table I, Membership, gives a resume of the number of memberships handled by the Teachers' Retirement System since July 1, 1940, together with additions due to new members and losses due to withdrawal, retirement, and death.

The matter of withdrawals still constitutes a great problem for the public school system. Younger teachers are continually leaving the profession for other work or to teach in other states, and for this reason, the average age of members of the Retirement System has increased from the 30-39 age bracket to 41+ years. Fifty-eight percent of the members of the Retirement System are over the age of 40. The Retirement System has a great holding effect upon the teacher who has accumulated ten or fifteen years of service, but up until this time it has no such holding power over the younger teachers. It is hoped that the new amendments to the Retirement System will make it easier to recruit younger teachers and to hold them in the profession since the retirement benefits will be as good as that of any of the states, and better than that of most industrial organizations.

Table II, Receipts by Sources, presents the current picture of the income of the Retirement System. Total disbursements to teachers for the year 1954-55 amounted to $1,263,109.11. The amount of disbursements will increase each year until it equals the income of the Retirement System from all sources.

TABLE II-r

RECEIPTS BY SOURCES

Year	From Teachers	From the State	Interest and Profits	Totals
1953-54	$1,516,234.25	$1,711,000.00	$688,046.72	$3,915,280.97
1954-55	1,612,036.08	1,821,744.00	776,485.87	4,210,265.95
Total for the Biennium	$3,128,270.33	$3,532,744.00	$1,464,532.59	$8,125,546.92

Table III, the General Balance Sheet as of June 30, 1955, presents the Fund balances and total assets. Table IV, Analysis of Investments, shows the diversification of investments of the Retirement System. At the time of the last Biennial Report, the average net yield on investments was 2.646%, but as of July, 1955 the average net yield is 2.790%. This increase in the net yield is a very important factor in the financial soundness of the Retirement System.

NET YIELD — $914,261.65 ÷ $32,763,000.00 = 2.79053%

Social Security Benefits and Teacher Retirement

There has been considerable discussion of the advisability of securing Social Security OASI coverage for teachers in this State, or in certain parts of the professional membership. A Study Commission representing the Kentucky Education Association and the Department of Education, is currently engaged in a study of the matter and will probably report its findings before the next session of the General Assembly. If every teacher in Kentucky were a man with a wife and children, the Social Security coverage would be desirable since it is a family coverage and insurance. At this time 26-% of the members of the Retirement System are men, and 74+% are women. There now is a tendency for both husband and wife to teach and the number of such cases is increasing. Under Social Security if the husband and wife both teach, that family would pay a double tax for the family coverage, and this, of course, would not be a fair proposition for that 24% of our teachers. About 35% of Kentucky teachers are married men or married women whose spouses already have Social Security coverage and whose children are protected thereby. This group has 40% of the children in the profession.

For a more complete analysis of the comparative costs and benefits of Social Security to Kentucky teachers, see the Fourteenth Annual Report of the Teachers' Retirement System. The information contained in that Report will presumably be superseded by the information in the report of the Study Commission referred to above.

The death rate of our teachers is very low, and the number of children they have is also much below the average for a cross section of the population. For this reason, survivors' benefits may be provided through the amendment of the Retirement System at much less cost than by any other means.

We have had a voluminous correspondence with the teachers of Kentucky since the initiation of the new Retirement Law July 1, 1955, and they indicate that they are pleased to make the higher contribution in view of the increased benefits which will prevail for them under the new amendment. The Board of Trustees is looking forward to other improvements in the Retirement Act which will be advantageous to the members of the Retirement System.

Respectfully submitted by

N. O. Kimbler, Executive Secretary
Teachers' Retirement System and Staff

SECTION TWO

DIVISIONS OF SCHOOL LAW, SCHOOL BUILDINGS AND GROUNDS, AND PROPERTY UTILIZATION

Mergers of School Districts

During the biennium of June 30, 1953, to June 30, 1955, three independent school districts were merged with the county districts in which they were located. As a result of these mergers, educational programs have been planned on a district-wide basis.

Prior to the time when these mergers were effected a representative of the Department of Education held conferences with each board of education concerned to determine the advantages in merging and the advisability of taking the necessary action to effect the merger.

The independent districts which became parts of the county districts are as follows:

Artemus, Knox County, April 29, 1954
Lebanon Junction, Bullitt County, May 5, 1954
Princeton, Caldwell County, March 12, 1954

As a result of these mergers improved educational programs can be provided to all children. The districts resulting from these mergers are in better position to receive greater benefits from the Foundation Program than either district would have received beforehand. The Foundation Program tends to encourage the merging of small, inefficient districts into larger units. This tends to improve both the local financial ability and the program of education.

Educational Bulletins

During this biennium thirteen bulletins were published. The titles of these are listed below.

1953	July	Basic Health Course for Secondary Schools of Kentucky (Grade 9 or 10)
1953	August	A Proposed Program for Extracurricular Activity Funds in Kentucky Schools
1953	September	Procedures in Making Applications for Approval of School Building Construction
1953	October	Moral and Spiritual Values in Education
1953	November	Kentucky Public School Directory (1953-54)
1953	December	Biennial Report of the Superintendent of Public Instruction
1954	January	Summary Report Moral and Spiritual Education in Kentucky
1954	March	Kentucky High Schools (1953-54)
1954	June	Kentucky Common School Laws (1954)
1954	September	The Status of Health and Physical Education in the Secondary Schools in Kentucky 1953-54
1954	December	Kentucky Public School Directory (1954-55)
1955	March	Kentucky High Schools (1954-55)
1955	June	Planning School Plant Construction

The number of bulletins published during this biennium is considerably less than that which has been published in previous bienniums. This decrease is due to a change in the contractual arrangements for mailing which reduced the annual number of bulletins to four. Experience during the biennium would seem to indicate the need for returning to the arrangement under which the Department published regular bimonthly bulletins.

A. Division of School Law

After the close of the 1954 Session of the Legislature, the KENTUCKY COMMON SCHOOL LAWS was revised in compliance with requirements of KRS 156.240. This volume includes all changes in the school laws, new laws passed by the 1954 Session of the Legislature, and abstracts of court decisions to and including Volume 266 S. W. 2nd 321.

The division has assisted the local districts by advising with them on their legal problems and numerous conferences of this nature have been held in the Department office and the Legal Advisor has traveled to many sections of the State to confer and advise with local school personnel and community leaders.

B. Division of School Buildings and Grounds

During the biennium 1953-55 the Division of School Buildings and Grounds has been daily in contact with superintendents and boards of education through letters, telephone conversations, or conferences concerning their problems in school building construction. The personnel concerned with school building construction spent most of their time with about 100 of the 224 districts. That does not mean that the remaining districts did nothing, but many of these had very little money available for such construction during this period.

Some 50 to 100 scheduled trips and conferences in the districts and on school plots were made, and some 300 individual conferences on planning school construction were held in this department. Surveys during this period have shown that practically every day there are about 100 school projects under consideration from the talking stage to the time of approval of completed plans and specifications. During the biennium, plans were approved for more than 300 school building projects. More than 200 of these were for elementary schools, and approximately 100 for high schools. Also, plans were approved for one administration building for housing the administrative staff and one residence for a janitor.

Below is a tabulation of the activities by boards of education in securing school sites, letting contracts for new buildings, additions to, or remodeling of old buildings. These figures will indicate something of the activity in school sites and school buildings during the biennium. When the Foundation Program is fully financed and allotments for classroom construction are made to the local districts, building activities will be greatly increased, and some of the backlog of building needs can be eliminated.

Summary of Annual Buildings and Grounds Reports

1953-55

Number of New Sites Purchased	96
Number of Acres in New Sites	914.64
Number of Additions to Sites	77
Number of Acres in Additions to Sites	245.19
Number of Improvements to Sites	443
Nature of Site Improvements	Driveways, parking space, sewer and water lines, playgrounds, removal of buildings, walks, and landscaping in general.
Number of New Buildings	256
Type of New Buildings	126 Elementary; 20 high school; 12 elementary and high school combined; auditoriums, cafeterias, shops, gymnasiums, well houses, coal houses, etc.
Number of Additions to Buildings	217 (Chiefly classrooms)
Number of Building Improvements	923
Type of Building Improvements	Roof repair, rewiring and relighting, toilets, heating and plumbing systems, drains, guttering, painting, plastering, and other general repair.

Presented below is a table showing expenditures of the districts for the biennium 1953-55 for the several items listed.

Cost Summary of Annual Buildings and Grounds Reports

1953-55

	COUNTY	INDEPENDENT	TOTAL
New Sites	$ 1,102,738.53	$ 317,699.65	$ 1,420,438.18
Addition to Sites	231,153.64	308,660.70	539,814.34
Improvement to Sites	1,516,277.91	363,731.48	1,880,009.39
New Buildings	20,797,845.43	10,581,966.77	31,379,812.20
Addition to Buildings	4,185,032.37	3,578,638.31	7,763,670.68
Building Improvements	1,016,068.55	2,885,393.30	3,901,461.85
Equipment	1,629,953.40	1,030,879.51	2,660,832.91
GRAND TOTAL	$30,479,069.83	$19,066,969.72	$49,546,039.55

Since the summary figures above are for the biennium, 1953-55, it is of interest to note the comparative expenditures by independent and county districts for each year.

In the school year 1953-54 the independent districts spent a little more than six and a half million dollars, about one-third of the county districts' expenditure of approximately eighteen and a half million dollars—roughly, a total of twenty-five million dollars. During the 1954-55 school year the independent districts spent twelve and a half million dollars while the county districts spent only twelve million—a total of twenty-four and a half million dollars. This increase of almost one hundred percent in one year in the money spent by independent districts for new buildings, sites, improvements, etc. may be accounted for by the fact that special building fund taxes were voted in more independent districts than in county districts.

C. DIVISION OF PROPERTY UTILIZATION

The Congress in the 1955 session enacted Public Law 61 which amended and clarified the intent of Public Law 152. This Law made available categories of property heretofore not available for donation to State Agencies. Legislation to include additional participants in the program is pending in Congress which, if enacted, will greatly expand the program in Kentucky. Eligible participants now include non-profit, tax exempt schools, colleges, hospitals, clinics and health centers.

Since July 1, 1949 the Division of Property Utilization, formerly entitled the Division of Surplus Property, has been operating without State appropriated funds. A reserve fund has been created to insure the operation of the program. This fund is derived from a nominal charge which is made on property transferred to the participating health and educational institutions. After cessation of hostilities in Korea, more property gradually became available from federal installations. The quality of property received has been better and thus greater utilization of it has been made.

Prior to 1953 the Agency operated several small warehouses. In 1953 a large, new warehouse was secured in Frankfort. This centralization has greatly increased the efficiency of operation. The volume of property handled and warehoused has been increased four-fold and the number of schools and hospitals participating in the program has increased accordingly. The Agency has secured new transportation and handling equipment which has made property available at federal installations that previously could not have been transported economically.

The following is a comparative analysis of operations:

Acquisition value of property received during 1951-53	$1,206,752.02
Acquisition value of property received during 1953-55	4,443,126.77
Cost to institutions for transfer of property 1951-53	$ 96,726.89
Cost to institutions for transfer of property 1953-55	320,712.91

SECTION THREE

BUREAU OF INSTRUCTION

The Foundation Program of Education for all Kentucky's children, having been proposed by the people and the provision for its realization having been enacted into law by the General Assembly, it evolves from these that the next necessary step toward its achievement is the underwriting of a financial plan to insure its support. When this is done, the quality of instruction given the children remains the one outstanding purpose to be achieved. The full intent of the Foundation Program of Education is the matter of educating all the children to desirable and productive citizenship. To this end must be constructed a service agency or organization in the State Department of Education. That responsibility naturally falls to the Bureau of Instruction as the functional organization most directly related to the learning process.

In addition to coordinating the functional divisions grouped under it, namely (1) the Division of Supervision, (2) the Division of Teacher Education and Certification, (3) the Division of Free Textbooks, (4) the Division of Health, Safety and Physical Education, (5) the Division of Education for Exceptional Children, and (6) the Division of Moral and Spiriutal Education; the Bureau has been giving much consideration and thought throughout the present biennium toward ways and means of meeting more effectively its responsibility under the Foundation Program. Some of the outstanding areas of consideration are (1) the training and quality of service of not only the classroom teachers, but of the specialized services as well, (2) the educational program and its full meaning to the thousands of pupils of different levels of ability, interest and aptitudes, (3) the kind and type of instructional material and its importance to the education of children, (4) programs for the abnormal and exceptional child, and (5) the fields of moral training and health services as an overall integrated function of the total school program.

A. Supervision

Previously supervision in the local districts was financed from the instructional budget and the employment of supervisory personnel was limited by this dependency and by several other factors. Nevertheless, under these conditions a number of school systems have employed supervisors regularly as a part of their instructional programs. Numerous other systems have employed supervisors intermittently, but the majority of the 224 school districts still do not have full-time supervisors employed.

The Foundation Law provides for the allocation of state funds for the employment of general supervisory personnel to any school district employing twenty-five or more teachers. Eighty qualified supervisors were employed during the 1954-55 school year. About one hundred twenty-five are being employed as the biennium ends. This number will increase to about two hundred fifteen as funds and personnel become available.

In an attempt to meet the leadership needs in the development of the supervisory program, the following significant things have been done during the biennium:

a. September 1, 1954, the Superintendent of Public Instruction placed the Supervisor of Elementary Education in charge of the general program for supervisors.

b. The professional training requirements for general supervisory personnel have been held at a high level. Emergency certificates are not issued for supervisory positions.

c. A state-wide Supervisors' Organization has been effected. This makes it possible for supervisors to have the opportunity on the state and regional levels to work together on common problems.

d. A state-wide Supervisors' Workshop was conducted July, 1955, at the University of Kentucky. This was jointly sponsored by the Department of Education, the College of Education, University of Kentucky, and the Kentucky Association for Educational Supervisors.

e. As the biennium closes, a series of nine area meetings of supervisors have been conducted under the leadership of the Departmnt of Education and the institutions of higher learning. In several instances these groups will continue to meet periodically throughout the school year to work on common problems.

f. A General Supervisors' Annual Report to the Superintendent of Public Instruction has been initiated. In addition to providing the data on the supervisor's professional qualifications, this report suggests six areas of responsibility that serve as criteria for evaluating the supervisor's activities. The supervisor's program of activities is evaluated in terms of his reaction to these suggested areas of professional responsibility in the report.

These areas are:

1. Establishing and maintaining professional relationships. (Working cooperatively with superintendents, principals, total staff, committees, etc.)

2. Helping to improve the professional staff in service. (Scope and content of in-service activities.)

3. Helping with the teaching-learning material's program. (Recognition and utilization of resources, selection, procurement and use of materials.)

4. Helping with curriculum study and development. (Continuous program of study of needs and the best use of resources at hand.)

5. Helping with a program of understanding how children grow and learn. (Guidance, testing, cumulative records, promotional policy, meeting individual differences.)

6. Helping with the development of a continuous program of evaluation of the whole school program.

1. Elementary Schools

The elementary school is the only agency that enjoys the distinction of serving practically every child in the Commonwealth. This fact becomes critical when the record shows that the preponderance of poorly trained teachers, the greatest overcrowding of classrooms and, in general, the poorest physical facilities are found in the elementary schools. However, the immediate future holds great promise for the improvement of elementary schools.

The Foundation Program Law makes no distinction between elementary and secondary schools. All of the services that are considered essential to a "good school" are provided for in the law on a twelve-grade basis. The leadership of elementary education in the Commonwealth is challenged by the greatest opportunities and faces the greatest responsibilities in the history of education in the State.

Significant accomplishments and trends during the biennium include:

a. Appointment of a State Supervisor of Elementary Education by the Superintendent of Public Instruction on September 1, 1954.

b. Establishment of a State Council for Elementary Education composed of representatives of all levels of the profession and professional organizations. The purpose of the Council is to study the needs of elementary schools and to coordinate the efforts toward improvement.

c. The Bureau of Instruction conducted a study of the trends in the number and size of elementary schools in the 224 school districts. This study indicates a tremendous growth in larger elementary centers. This growth is due to three factors: (1) The continuing consolidation of smaller elementary units. (2) The sustained high birth rate. (3) The continuing trend in building central high schools.

d. Recognition of the ever increasing importance of the position of the elementary principal. The State Supervisor has worked closely with the institutions of higher education and the Department of Elementary School Principals in helping to upgrade elementary principals.

e. Exploration and study by numerous professional groups of methods of evaluating schools. This has been encouraged by the State Council for Elementary Education.

f. Initiated an Elementary Principal's Report which provides the information that makes it possible to administer the Foundation Law as it relates to elementary schools. The information on this report will make it possible to more accurately project the needs of elementary schools.

g. Construction of many modern school plants designed to facilitate excellent learning opportunities for elementary children. During this biennium, several school systems have moved to central high schools and have converted the abandoned high school buildings to elementary centers. However, many school systems in the Commonwealth have matured to the point that the abandoned high school buildings are being replaced by modern elementary plants.

h. Increased teacher shortage in the elementary schools characterizes the close of the biennium. A fully financed Foundation Program in 1956 will begin to alleviate this critical condition.

Recommendations:

There should be in the Department of Education a full Division of Elementary Education with a minimum staff of three people. The task ahead is tremendous; the opportunities limitless and the responsibilities heavy. The task of helping to develop well-trained, competent elementary principals is critical. The future progress of elementary schools depends upon the leadership at the school level and the state level and it is imperative that the Department of Education provide guidance and leadership from the state level in order to develop a coordinated, cooperative program.

2. High Schools

At the close of the biennium there were 581 public and private high schools operating in Kentucky. This is a decrease in the total, during the biennium, of 13 high schools which have ceased to operate primarily because of consolidation and merger.

Of the 581 high schools in the state, 503 are public high schools, 7 are connected with state-controlled institutions, and 75 are private schools. Of the 503 public high schools, 332 are operated by county boards of education and 171 are in independent school districts.

Five hundred twenty-six high schools have complete organizations and offer programs through the twelfth grade. The remaining 55 of the total of 581 is made up of 48 junior high schools (grades seven through nine) organized as separate units and 7 are incomplete, offering a program only through the tenth or eleventh grades. It may be significant to note that the number of high schools having an incomplete program through the twelfth grade has decreased from 103 in 1930 to only 7 at the close of this biennium.

For the year closing this biennium (1954-55) the 581 public and private high schools enrolled 170,520 pupils. Of the total number enrolled in high schools, 128,797 are enrolled in grades nine through twelve. The total enrollment figures here include the seventh and eighth grades in 274 high schools which incorporate these grades as a part of the high school organization. Following the trend in high school enrollment for fifty years or more, enrollment figures for 1954-55 show an increase of 14,038 over that of the previous year. The county high schools accounted for 8,422 of this increase while the high schools in independent districts accounted for 5,093, and the private and state operated high schools showed a gain of 517 pupils.

The holding power of our high schools is still a very serious problem. The figures show that of the total number which entered the ninth grade in 1950-51, only about 53 percent are enrolled in the twelfth grade in 1954-55. It has been found that the holding power of the larger high schools is much better than that of the smaller ones because more complete and attractive programs can be offered in the larger schools to satisfy the needs and ambitions of the pupils. One of the greatest problems and handicaps which faces Kentucky education today is the continued existence of a fairly large number of small high schools which are unable to offer a satisfactory program of studies.

Accreditation of both public and private high schools of the state is extended under the regulations of the State Board of Education. Official accreditation by the State Board is extended only to those high schools that offer a program of work through the twelfth grade. The standards for accreditation for high schools are developed cooperatively by the staff of the Bureau of Instruction and the Commission on Secondary Schools of the Kentucky Association of Colleges, Secondary, and Elementary Schools. The State Board officially gives accreditation ratings to the high schools upon the bases of the recommendations made by the Commission through the Head of the Bureau of Instruction and upon the data from the Department's High School Supervisors and the Annual High School Reports.

The accreditation of high schools is primarily a means to an end. This end is that of stimulating growth and improvement in the schools. Originally, accreditation of high schools came about as a result of the need of institutions of higher learning for some satisfactory basis for admission to college. In recent years, however, as a result of increasing numbers of young people continuing through elementary school into high school, the emphasis upon accreditation as a basis for college admission has been shifted to that of better education for **all** youth. The rapidly changing social, industrial, and economic world and the marked increase in high school enrollment is challenging the schools to provide for a diversity of needs and capacities.

To better provide for these needs and capacities, a broader and more varied high school program is demanded. High schools should not only prepare some pupils for work in higher institutions, but also should assist a larger proportion of the pupils to prepare for entering directly into business, industry, agriculture, and homemaking. It is at once apparent that small high schools cannot possibly offer an enriched program to meet the needs and capacities of all high school pupils unless it is done at excessive cost. Hence, from the standpoint of costs alone, there is justification in urging the merger of small, struggling high schools into large comprehensive schools where the needs and abilities of all pupils may be more economically and educationally met.

There is much hope for the future for great improvement in the high school programs of the State as the full provisions of the Foundation Program for education are put into effect in the local schools. Vital revision and progress in the character of the high school offerings, teaching, and supervision has already begun to be evidenced. With full financial implementation of the Foundation Program the basis for a complete revitalization of secondary education in Kentucky will be provided.

Full implementation of the Foundation Program demands a sound and adequate course of studies in every school in keeping with the needs of its students and community. Complete fulfillment of provisions of the Foundation Program depends upon effective instruction in the subject matter and activities of the curriculum, and competent supervision of all. When a local school unit is small, with a small number of students enrolled, it cannot provide all of the educational services needed without exorbitant cost. The services which the people have indicated that they want in a full educational program for their children cannot be economically provided in the small schools.

There still remains thirty local administrative units in Kentucky with fewer than 500 white children in the school census. It will be difficult for these districts to provide all the specialized services called for under the Foundation Program. It is recommended that provision be made to make merger with county districts more attractive to these small independent districts, where legal requirements and local conditions permit.

3. Negro Education

The biennium closing June 30, 1955, may well be termed the concluding period for separate schools for Negro children. Compulsory separation of the races in public education was held to be "racial discrimination" by the Supreme Court in its decision of May 17, 1954, and therefore, violated the Fourteenth Amendment of the Federal Constitution as a denial of "equal protection of the laws." A year later, on May 31, 1955, the Court rendered a supplementary decree holding that "All provisions of Federal, State, and local law requiring or permitting such discrimination must yield to this principle." Thus, Kentucky's Constitution and statutory provisions requiring separation of the races in education, became in effect null and void.

At the close of the biennium, many local school systems were preparing plans for integration of the races in a single school system and throughout the State the principle was being generally accepted as a goal for future accomplishment.

In the past separate schools for Negroes have operated under the same controls as those for the whites. The same services were carried on, as far as practicable in a dual system, with the same type of supervision and under the same general requirements. Services from the State Department of Education were directed toward helping the Negro schools in the same manner as the white schools.

The following summary statements may be of some interest:

1. Of the 224 local school districts in the State, 71 provided no school services for Negro children in the past, but 41 of these districts had no Negro population. The remaining 30 districts contracted with other districts for school services for Negro pupils.
2. Of the 42,052 Negro children in the school census, 36,668 were enrolled in school at the close of the two-year period. This enrollment represents 87 percent of the Negro pupil census.
3. There were 299 separate schools operating for Negro children at the close of the period. Nearly 200 of these were one, two, and three teacher schools.
4. Fifty-five of the Negro schools provided instruction through the high school grades, enrolling more than 12,000 pupils. Thirty-six of these schools cannot meet the high school accreditation requirement of 100 students without additional enrollment.
5. At the close of the biennium, 1,453 teachers were employed in the Negro schools. About 80 of these are principals or principal-teachers and the remainder are regular classroom teachers. There are very few emergency teachers in the Negro group.

4. In-Service Teacher Training

An act of the 1950 General Assembly authorized the State Department of Education "to establish, direct and maintain a state-wide program of in-service training." The purpose of this program is the improvement of instruction and the leadership qualities and professional competence of principals, supervisors and teachers.

September 1, 1954, the Superintendent of Public Instruction appointed a Coordinator of the In-Service Teacher Training Program. The Coordinator and three Regional Supervisors comprise the staff. The activities of the program during the biennium include the following.

a. Assistance to local superintendents, principals, and supervisors in developing a continuous program of in-service training with the total teaching staff. Work conferences involving all personnel have been conducted in a majority of the school districts of Kentucky with the assistance of the Regional Supervisors.
b. Cooperation with an in-service committee from each of the teacher training institutions in the State to provide assistance to the teachers in the service-area of each institution.
c. Cooperation with the institutions of higher education in conducting leadership work conferences during the summer school sessions.

d. Cooperation with professional organizations such as the elementary principals and the supervisors of instruction in the upgrading of professional instructional leadership.
e. Developed instructional materials cooperatively with representative committees. The In-Service Training Reports which were developed from this work are as follows:
   1. Getting the Program Under Way
   2. Suggested Ways to Solve Reading Problems
   3. The Professional Library (Revised)
   4. The Science Education Program
   5. Our Numberland
   6. Making Arithmetic Meaningful
   7. The Meaningful Approach to Fractions
   8. Aids in the Teaching of Arithmetic
   9. Technique of Presenting Two-Step Problems
   10. What Constitutes Remedial Work in Arithmetic
   11. Current Trends in Teaching Arithmetic
   12. A Guide to the Development of Desirable First Grade Programs
   13. The Use of Basal Reader Materials in a Modern Reading Program

In-Service Work Conferences

In 1952 the State Board of Education adopted a regulation permitting local boards of education to dismiss school for two days for the purpose of allowing the total staff therein to participate in in-service training activities sponsored by the District Board of Education and the State Department of Education. The plans for these meetings are approved by the Superintendent of Public Instruction upon the recommendation of the Coordinator of the In-Service Teacher Training Program and the Regional Supervisors. The Regional Supervisors have assisted the school districts in forming local in-service committees and in developing plans for utilizing the two days in the work conferences as well as following through on the plans for solving some of the problems of improving instruction. At times, two or more districts have cooperated in planning and conducting work conferences involving their local staffs.

5. Library Services

The services and faciilties of school libraries have improved substantially in the past biennium. In the past years, emphasis has been mostly upon the library in the secondary school, but increasing interest in elementary education and the twelve-grade school program has resulted in the establishment of elementary and twelve-grade libraries in many school systems.

Visits to elementary schools throughout the state reveal such varied patterns of library service, as: (1) centralized libraries with good book collections and full-time librarians; (2) centralized libraries with adequate or good book collections and teacher-librarians who give part-time to the library program; (3) centralized book collections in converted classrooms, corridors, and cafeterias, supervised by the teacher with the help of student assistants; and, (4) centralized book collections from which teachers select books for classroom use. In many twelve-grade schools the librarian is no longer a part-time high school librarian assigned teaching duties, but serves as a full-time librarian extending her program to include all grades.

More significant than the type of service now being given is the recognition by school staffs of the importance of a school library as a teaching agency and their eagerness to start with what is available and work toward better facilities. Other trends of importance include (1) rapid growth of elementary school libraries, (2) library supervision on the local level, (3) more and better trained librarians, and (4) provision for attractive functional libraries in plans for new and remodeled elementary school buildings.

Expenditures for school libraries and supplementary books have increased during the period 1953-55. Figures for the biennium show an increase of 30 per cent for elementary schools and 20 per cent for high schools over the previous biennium.

Only 21 elementary and 11 high schools reported no expenditure compared to 37 elementary and 10 high schools in the biennium ending June 30, 1953. By comparison with the State Board of Education requirement of a minimum per capita expenditure of $1.25, the average per pupil expenditure for high school libraries is $1.57, while the average per pupil expenditure for the elementary libraries is $1.56.

It is encouraging to note that more money is being spent for library and supplementary materials, but the effectiveness of a school library cannot be measured by per capita expenditures or gross numbers of books. The book collection and the library quarters are essential factors without which a library cannot exist. The key to good library service, however, is the librarian who has a good general education, a good library education, an understanding of the purposes and techniques of public education, and who is given the time and responsibility for administering library services.

Lack of trained personnel is still the greatest problem in the state library program even though reports show a 25 percent increase in qualified personnel for high school libraries. Presently, data on the training of elementary school librarians are not available for comparison.

In June, 1955 the State Board of Education adopted a new preparation-certification program for librarians which is designed to encourage **teachers** to begin a library training program to qualify them as teacher-librarians or as full-time librarians. In addition to 18 semester hours in library science and specified courses in education the new program of preparation gives the prospective librarian experiences in basic library techniques and skills, in knowing children, acquaintance with books and other instructional materials, and some knowledge in group processes so that she may be skilled in working with groups of children, teachers and community groups.

The routine of caring for and processing books is no longer considered the essential function of a librarian. More and more the librarian is playing an important role in curriculum development, in program planning, in reading guidance and in working with teachers in their selection and utilization of books, and in programs of in-service teacher training. Her new role is a broader role which gives her an opportunity to understand and to participate in the total school program in an effort to improve teaching and growth in pupil achievement. A librarian who functions effectively in a modern school is a resource person prepared to

assist teachers and students alike in the choice and use of books and with visual materials best suited to a particular learning situation.

The State School Library Supervisor helps to further the total educational program. Through field visits, workshops, conferences, individual consultation, correspondence, and publications, assistance is given to local school administrators and school staffs in determining their library needs and in formulating both immediate and long-range plans for library development. The Supervisor has served as a consultant to the In-Service Teacher Training Program and other educational groups on problems relating to the selection, use, and organization of library materials. Exhibit collections of books for examination purposes are maintained in the Department office.

During this biennium, requests by groups and individuals for consultative service about their school library programs indicate a growing recognition of the need for more adequate instructional materials and well-organized, effectively administered school libraries. Now that the Foundation Program makes possible the employment of one or more elementary and secondary librarians in local school districts, and makes provision for space, equipment, and funds for books, every school system will be financially able to do something about books and libraries for all its pupils. Kentucky school libraries should experience great growth in the next few years.

As the Foundation Program is financed and implemented, library service to Kentucky youth will become more widespread, eventually achieving an equalization of library opportunity. This means establishing centralized school libraries where library development has lagged and improving conditions where there is partial or inadequate service.

Publications of the State School Library staff include the School Library Letter, published and distributed to all Kentucky school libraries three times each year; and, a Department of Education bulletin, **Kentucky Materials,** a representative list of printed and visual materials about Kentucky which will be ready for distribution about January 1, 1956.

B. Division of Teacher Education and Certification

The American public in this decade is demanding better teachers than ever before. Nationwide the public is showing unusual interest in public education. Likewise, as public interest becomes more widespread, teacher preparation-certification takes on importance. Teacher certification is a process through which the quality of teacher education and the quality of classroom teaching are safeguarded. The quality of teaching determines the quality of America's education and has great effect on society's welfare. When America is unable to staff its elementary and secondary schools with an adequate supply of competent teachers, society suffers.

Since the Constitutional mandate to the General Assembly to ". . . . provide for an efficient system of common schools . . . ." has been delegated to the State Department of Education, it is, therefore, concerned with all factors which influence the quality and quantity of the total teaching staff of the public schools. The responsibility of the Department with respect to the number and quality of the teaching personnel is discharged through the Division of Teacher Education and Certification.

Foundation Program of Education and Teacher Education

In Kentucky the deepening and widespread interest in education was reflected in the passage of the amendment to Section 186 to the Constitution in November, 1953, and in the enactment of the Foundatoin Program into law by the 1954 Legislature. It is significant that in accordance with the wishes of the Kentucky people the Foundation Program is built around the central idea of effective instruction by a qualified teacher in an adequate classroom throughout the State. The hope offered to public education and the total profession through the full implementation of the Foundation Program has been a great contributing factor to the remarkable progress made in the whole area of teacher education and certification.

One of the greatest factors in the formula for the allocation of State funds to the local school systems under the Foundation Program is the preparation of the teachers. The desire on the part of the teachers to improve their preparation has been in greater evidence during this biennium than ever before. The major contributing factor to this has been the hope that through the Foundation Program teachers will be rewarded for their services through better salaries. They now look forward to the time when adequate salaries will become a reality. Following is shown the teacher rank and the rank salary as provided under the Foundation Program.

Rank I—M. A. Degree and 24 semester hours of approved graduate work beyond M.A. Degree—$3,500

Rank II—M. A. Degree or equivalent or 32 hours of approved graduate work beyond A.B. Degree—$3,200

Rank III—A.B. Degree or equivalent—$2,900

Rank IV—97-128 semester hours—$2,400

*Rank V—60-96 semester hours—$2,100

Rank VI—33-64 semester hours—$1,800

Rank VII—0-32 semester hours—$1,500

(*No emergency certificate, regardless of training, may be ranked higher than Rank V.)

Functions of the Division

The teaching staff is the heart of any school system. All functions of the Division of Teacher Education and Certification are focused upon an adequate supply of competent teachers for Kentucky's children and youth. The functions of the division are in the following areas:

1. Development of teacher preparation programs (pre-service and in-service)
2. Approval of teacher preparation programs in colleges and universities
3. Development of standards of certification for all public school personnel
4. Issuance of all certificates to the state's teaching personnel
5. Teacher recruitment
6. Service to councils and commissions concerned with teacher education

Services rendered in carrying out these functions have resulted in significant developments, movements and achievements in the whole area of teacher education. Progress has been great despite the disturbing teacher shortage. This progress is highlighted in this report.

Preparation of Kentucky Teachers

The training of Kentucky teachers in terms of academic degrees and credit hours is at the highest point in the history of Kentucky education. This is especially significant and commendable in view of the great shortage of teachers during the past sixteen year period. Kentucky's extreme need of teachers could have caused the lowering of standards and the relaxing of requirements as the only common sense way for securing enough teachers. This has not been done, however, and the results of this policy tend to bear out and support some national research which indicates that where standards of teacher preparation are upheld, higher salaries follow and that high standards of teacher preparation-certification attract, while low standards repel able young recruits to teaching. Programs planned and services rendered through this division during the biennium have been based upon a policy taken from this research and its concepts.

Tables I and II reveal that of the 20,280 teachers employed in 1953-54, 57 percent of the certified teachers are college graduates and that in 1954-55, 59 percent were college graduates. This reflects significant progress by comparison with the 1944-45 situation when only 44 percent were college graduates.

The college preparation of teachers continues upward because of the awakening within the profession to improve its standards and its services and because of the incentive of the Foundation Program.

High Certification Standards Given Professional and Legal Sanction

It is an established policy in the system of American education that the right to teach is an official sanction conferred upon the teacher by an agency of the State government. Certification, therefore, is a legal sanction. During this decade, however, the division, in keeping with a national policy, has worked closely with the organized teaching profession in developing certification standards. All improvements in certification standards during the biennium have been developed cooperatively by the professional and legal groups. Beginning September 1, 1953, the four-year college program of preparation went into effect as a basis for issuance of Provisional Elementary Certificates. It brings the standards for elementary certification up to the level which has been maintained for high school certification for approximately two decades. During the transition from issuing the Provisional Elementary Certificate on two years of college training to issuance on four years of training, it has been necessary to issue Temporary Certificates. This practice will be discontinued effective September 1, 1956. During this biennium, beginning September 1, 1954, the new program of certification based on higher standards for principals, supervisors and administrators became effective. Kentucky is now one of the high-standard states in the certification of all school personnel.

Decline in Number of Emergency Teachers Employed

Table III indicates that there has been a gradual reduction in the number of emergency teachers employed—from 5,300 in 1947-1948 to 2,384 in 1954-55. This achievement is significant when viewed in light of the fact that the total teaching staff has been increased by 2,368 during the past eight years.

TABLE III-te

Copy

THE NUMBER OF QUALIFIED AND EMERGENCY TEACHERS EMPLOYED IN 224 PUBLIC SCHOOL DISTRICTS IN KENTUCKY DURING THE EIGHT YEAR PERIOD 1947-48 TO 1954-55

Year	Number Qualified Teachers	Number Emergency Teachers * (Full-time)	Total Number Teachers Employed
1947-1948	13,200	5,300	18,500
1948-1949	14,220	4,600	18,820
1949-1950	14,947	4,045	18,992
1950-1951	16,176	3,216	19,392
1951-1952	16,768	2,971	19,739
1952-1953	17,138	2,803	19,940
1953-1954	17,405	2,408	19,813
1954-1955	18,484	2,384	20,868

*Figures for emergency permits do not include replacements, substitute teachers, nor Veteran Farm Training Instructors.

The Programs for Issuance of Emergency Certificates Being Strengthened

The state program for issuing emergency certificates has been improved this biennium. The basis for the issuance of emergency certificates to a school system now includes not only consideration of the college preparation of each emergency teacher, but also the consideration and evaluation of the overall program of instruction in the system. The local superintendent is responsible for developing a program for safeguarding instruction of the children who are taught by emergency teachers. During the biennium every school system for which emergency certificates were issued submitted a program of in-service teacher training designed for improving the teaching efficiency of all teachers. The In-Service staff served as consultants to local superintendents in developing these programs for the improvement of instruction.

Improvement in Supply of Qualified Teachers Reflected in Number of Regular Certificates Issued Annually

Tables III and IV indicate significant progress in the number of fully qualified teachers receiving certificates annually during the past eight years. Table IV gives the total number of certificates issued through the division during the past eight years. The discouraging factor is that during the biennium a larger number of new emergency teachers has been employed than in the previous biennium. It is hoped that a fully financed Foundation Program of Education will stop the exodus of teachers from the teaching profession in Kentucky.

TABLE IV-te

NUMBER OF CERTIFICATES ISSUED AND REISSUED DURING THE EIGHT YEAR PERIOD 1947-1948 TO 1954-1955

Year	Regular Certificates		Emergency Certificates *		Totals
	Issued	Reissued	Issued	Reissued	
1947-1948	2266	1269	2259	3316	9110
1948-1949	2414	1859	2100	3417	9790
1949-1950	2826	1988	1697	3526	10137
1950-1951	2932	2030	1540	3349	9851

1952-1953	3120	2521	1394	2696	9731
1953-1954	3093	2622	1489	2133	9337
1954-1955	2371	2742	1502	2288	8903

* Figures for emergency permits include full-time teachers, replacements, instructors on the Veteran Farm Training Program, and substitute teachers.

Funds Collected from Certification Fees

Fees collected for the issuance and renewal of certificates during the biennium are as follows:

1953-54 ..... $23,961.66
1954-55 ..... $20,208.35

Teacher Supply and Demand Study

This division has participated in the nationwide study of teacher supply and demand annually during the past six years. This information has been a significant basis for teacher recruitment programs. This study reveals that the number of students completing preparation for teaching in Kentucky increased from 809 in 1945 to 2,249 in 1951 and then slightly declined annually until 1955. In the 1955 graduating classes of the colleges in Kentucky there were 1,530 persons prepared to teach, but only 50 percent of this number accepted teaching positions in Kentucky. This research reveals further that Kentucky teacher education institutions have prepared enough teachers to fill all the teaching positions in Kentucky. However, 50 percent of these have been lost from Kentucky education to other states, other types of employment, marriage, etc.

College Enrollment

Research in this division relative to college enrollments in Kentucky is contained in Teacher Education Circulars No. 92 and No. 98. This research reveals a slight upward trend in college enrollment in Kentucky at present and indicates a pronounced upward trend in the decade ahead, beginning with 1955-56. The research also shows that during the past decade Kentucky's college age population has been below the college age population for the South and for the whole nation. Research further revealed the following information:

1. Enrollment at all educational levels will rise in Kentucky during the next decade.
2. Kentucky high school enrollment will rise about 50 percent by 1958, and will continue to rise until 1965 until there is an increase of about 50,000 over the 103,000 enrolled in Kentucky high schools in 1953.

3. That college enrollments will increase from 30 to 35 percent by 1970 when there will be approximately 40,000 to 50,000 more college students than at present.

4. That only 13.2 percent of white college age youths in Kentucky are enrolled in college and only 5 percent of the Negro college age population is enrolled in college.

Other Staff Activities

In the spring of 1955, the Division of Teacher Education and Certification joilned with the Division of Moral and Spiritual Education in a conference with representatives of the state colleges and universities, for the purpose of exploring ways to emphasize moral and spiritual values in the preparation of all teachers.

In the Fall of 1954, the Director of the Division worked with the National Science Foundation in developing state plans for improving the quality of science teaching and increasing the number of science teachers. Following this, the Governor made funds available for a statewide conference on science in the Summer of 1955 which was planned jointly by this division and the Division of Health, Safety and Physical Education.

The division, in cooperation with Columbia University, directed a Citizenship Education Project, in which the senior colleges and forty school systems participated.

In June, 1948 the State Board of Education placed the responsibility for accrediting Kentucky colleges in the Division of Teacher Education and Certification. The accreditation plans were revised by the State Board of Education in March, 1953, and the division began the work of accrediting the 33 colleges of Kentucky.

The Director has worked during the past two years with more than 500 persons in the development of improved standards for student teaching.

The Director of the division serves as secretary to the following: the Council on Public Higher Education, the Advisory Committee on Teacher Education, the Kentucky Council on Regional Education, and the Committee on Veterinary Science. The Director and the Supervisor of Certification have served as consultants or held office in one or more of the following councils, commissions, or committees during the biennium.

Kentucky Association of Colleges, Secondary and Elementary Schools
National Association of Directors of Teacher Education
Kentucky Future Teachers of America
Kentucky White House Planning Committee
KEA Commission on Teacher Education and Professional Standards
Kentucky Association of Student Teaching
Kentucky Association of Supervision and Curriculum Development

Recommendations

In view of the importance of teacher preparation and certification in the overall effectiveness of the Foundation Program of Education, it is essential that the Division of Teacher Education and Certification be

staffed sufficiently to perform its major functions competently. Therefore, it is recommended:

1. That provision be made for needed services in these areas; teacher recruitment, classifying all school personnel according to college preparation for purposes of making Foundation Program allotments, supervising certificate status of every person employed in the public schools.

2. That provision be made to speed and expedite current procedures for issuance of certificates, for evaluating and accrediting teacher education programs in the colleges and universities, and for revising certification programs in keeping with new curriculum trends and developments.

3. That provision be made to bring theory of teacher education and actual classroom practices closer together through a stronger and more adequate program of in-service teacher education coordinated with pre-service teacher education.

4. That additional staff be provided for rendering the additional services recommended.

Reason for Hope

Hope for an adequate supply of competent teachers lies in two factors: (1) a fully financed Foundation Program of Education, and (2) the recruitment of future teachers from the increased annual college enrollments at the present percentage level during the next five years. To the degree that these two hopes are fulfilled, to that degree Kentucky will secure and retain an adequate supply of competent teachers—on whose number, devotion, and quality effectiveness of a state program of education must chiefly depend.

C. Division of Free Textbooks

Free Textbook Law

The free textbook law was enacted by the General Assembly of Kentucky in 1928. It remained inoperative until 1934 because appropriations for the purchase of free textbooks were not made by the State Legislature. The appropriation act of 1934 provided $500,000 per annum for the Division of Free Textbooks. The annual appropriations for free textbooks were increased to $735,000 in 1950 and to $900,000 in 1952.

The 1952 Textbook Adoption Law

Following the recommendation by the Superintendent of Public Instruction to the 1952 General Assembly, the present Textbook Adoption Law was enacted on March 4, 1952 (H.B. 231). The enactment of this law will stand out as a worthy accomplishment of this administration and the splendid way in which the State Textbook Commission has operated under it increases our faith in the soundness of the law.

This law makes it the responsibility of the Superintendent of Public Instruction to classify the subjects included in the State Course of Study under seven subject fields, viz., Language Arts, Foreign Languages, and Vocational and Business Education; and to classify these seven subject fields into four adoption groups as nearly equal in number and purchase cost as possible.

Under this law the greater part of the responsibility for textbook adoption rests upon the local school districts rather than upon the State Textbook Commission. Beginning in 1954, one-fourth of the textbooks for the public schools of Kentucky are adopted each year. Each year the State Textbook Commission adopts a multiple list of ten books for the adoption group to be changed that year. From this list, all school districts are authorized to select one book for each subject and grade in that adoption group to be used as a basal text in its school system for a period of four years.

Annual Textbook Purchases

For textbook purchases the elementary subjects have been divided into two major categories—required and optional subjects. The first purchases of free textbooks shall be for the required subjects. If funds are available after textbooks have been purchased for the required subjects, additional textbooks will be purchased for the optional subjects.

The number of books that are purchased annually is determined by the amount of money available, the number of books requisitioned, and the cost of the books. The cost of textbooks varies by subjects and grades.

The table below includes the annual expenditures for free textbooks, the number of books purchased each year, the elementary grade enrollment of pupils, and the grades for which books were supplied.

TABLE I-ft

TEXTBOOK EXPENDITURES, GRADE ENROLLMENT, ETC.

School Year	Annual Expenditures		No. Books Purchased	Ele. Grade Enrollment		Grades Supplied
1934-35	$455,582.94		1,333,402	529,210		1-4

(6) Bulletin 1948-49, Page 708

Annual Number of Textbook Orders

The Division of Free Textbooks placed 10,152 orders for free textbooks with the publishers for the school year of 1945-46. From 1945 to 1953 the annual average number of book orders was 3,712. The placement of book orders ranged from March 12 until February 16 of the following year.

TABLE II-ft

NUMBER OF TEXTBOOK ORDERS

School Year	No. Book Orders	Unpaid Orders on June 1st.	Per Cent Unpaid Orders	Unpaid Amount on June 1st.
1945-46	10,152*	186	1.8	$53,647.53

Textbook Sales and Fines

For the textbooks sold, lost, destroyed, and damaged money for sales and fines is collected by the local school districts. All money collected as sales and fines by the local school districts shall be turned in to the general fund of the State. In the table below is listed by years the amount collected for sales and fines.

TABLE V-ft

TEXTBOOK SALES AND FINES BY SCHOOL YEARS

School Year	Amount	School Year	Amount
1934-35	$1,438.98	1946-47	$2,146.99

1945-46	1,927.46	Average	$2,088.45

* It appears that the collections for 1935-36 and 1936-37 were combined.

D. Division of Education for Handicapped Children

New impetus has been given to the initiation and development of instructional units for physically and educable mentally handicapped children since the passage of the Foundation Program Law in 1954. During 1954-55, 104 special education units were allotted to 26 school districts. In 1953-54, prior to the activation of the Foundation Program, special education programs were operative in only 22 districts. During the 1953-54 fiscal year, because of budgetary limitations, both state and local, these districts did not receive reimbursement or other special forms of state aid.

Census-Identification

Before instruction can be provided for handicapped children, there must be identification and classification of those who will need placement in special education instructional units. In 1954-55, 143 local districts reported a total of 12,350 children as being handicapped. Six other districts reported no handicapped children. Of this total, excluding those reported as speech handicapped, 1,977 were not enrolled in school. Also, of this number, 10,771 were reported to be physically handicapped (crippled, cerebral palsied, partially seeing or blind, hard of hearing or deaf, speech impaired, and other physical defects). Among the total number reported as physically handicapped, the local districts reported 3,834 children as having speech defects. The local districts reported 1,579 children as being mentally handicapped.

Educational Study Projects

During the biennium some superintendents, with board approval, requested that the Division cooperatively plan and conduct Educational Study Projects aimed at the identifaction and classification of children with suspected handicaps. On the basis of findings, recommendations were made for providing special education units as needed by children found to be handicapped.

Educational Study Projects, based upon teacher referrals, in 19 school districts, the Owensboro Parochial Schools, and in the Kentucky School for the Blind were carried out for the purpose of identifying and classifying children handicapped by speech and/or hearing disability; and in 9 districts to identify children suspected of mental retardation and classification according to educability. Group and individual in-service consultatons were held wth teachers in each of these districts. Tables I, II, and III give information on the identification, classification of children, and special education instructional units needed in the districts studied.

Of the districts having Project Studies in speech and hearing, the following were able to secure trained personnel to provide speech correction service in 1954-55; Daviess County and Owensboro Independent, Bourbon County and Paris Independent, the Kentucky School for the Blind, and Woodford County. At the end of the 1954-55 school year, it appeared that only Daviess County and Owensboro, Bourbon County and Paris would be able to continue their programs. All other districts studied, because of budgetary limitations and the unavailability of trained personnel, will not be able currently to initiate speech correction services. Louisville and Lexington had speech correction programs prior to this biennium.

The lack of properly qualified personnel and limited financial resources have a negative effect on the development of foundation units

for children with impaired hearing. It is most noticeable in those districts surveyed and none have been able, in this bienium, to provide the needed units.

Both Covington and Louisville have instructional programs for children with hearing disabilities which were established prior to this biennial period.

The provision of hearing aids, after appropriate otological (medical) and audiometric examination, for some children with impaired hearing has been possible during the biennium. This service, available from the Kentucky Society for Crippled Children for the years of 1954-56 has provided free of charge, upon the approval of the Division, hearing aids for 25 children. Fifty-two requests for hearing aids have been received. It should be noted that the remaining 27 children who did not secure aids either could not profit from wearing an aid, have not yet secured medical and/or hearing aid evaluations, or were referred to other agencies.

Wolfe County has activated two special education units for educable mentally retarded children. None of the other 8 districts surveyed have been able to secure personnel, adequate funds, or to develop the administrative or supervisory organizational pattern needed to activate Foundation units for known educable retarded children.

Special Education Teaching Personnel

There is not a sufficient number of qualified teachers to man the Foundation units that should be allotted. Constant effort is made to secure fully qualified special education teachers, however, it is necessary in some districts to conditionally approve teachers only partially trained in special education methods and procedures. Also, in some cases, the employment of part-time special teachers and allotment of fractional foundation units is unavoidable. During the biennium, the number of teachers in special education programs ranged from 115 (27 part-time) in 1953-54 to 133 (32 part-time) in 1954-55.

Cooperating Agencies and Organizations

Cooperative work with related agencies and organizations is of prime importance in the provision of a sound instructional program for children with exceptionalities. The cooperation of the Kentucky Crippled Children Commission, State Health Department-School Health Section (Audiometry) and local Health Department units, the University of Kentucky Speech and Hearing Center, and the Department of Welfare have contributed immeasurably to the development of special education services.

Frequently, Service Clubs assist in promoting and developing instructional serivces for handicapped children. Northern Kentucky Lions Clubs are to be commended for their support in the development of a classroom unit in the Covington Public Schools (1954-55) for partially seeing children of that district and the surrounding area.

Special mention is made of the Kentucky Society for Crippled Children for its commendable action in making available a $66,840 grant for the years of 1953-54 to 1955-56 to be administered by the State Department of Education for the following: Employment of a Speech and Hearing Supervisor, travel and clerical costs of the speech and hearing program, hearing aid allotment, special instructional materials and equip-

ment loan service, and three teachers for hospitalized high school age children. It is anticipated that this grant will not be available after June 30, 1956.

Critical Unmet Needs—Program Projection

In a developmental program, the unmet needs are many and critical. Future implementation and expansion of education for handicapped children demands the provision of:

1. A teacher preparation program for teachers of handicapped children, thereby increasing and improving instruction in all types of special education units.
2. A continuation of the speech and hearing program at the state level with additional qualified personnel to increase the services to local districts.
3. Additional divisional personnel qualified in tests and measurements to aid in the placement of educable mentally retarded children in special education Foundation units.
4. Adequate state monies to finance the needed number of Foundation units for exceptional children. For the next three years, it is anticipated that a minimum of 109.6 special education units will be needed in 1955-56; 124 units in 1956-57; and 140 units in 1957-58.

E. The Division of Health, Safety and Physical Education

The Division of Health, Safety and Physical Education renders two types of services to local school districts; one of an indirect nature, affecting the state as a whole, the other directly concerned with specific programs within the local school districts.

Indirectly the division promotes health, safety and physical education by cooperating with all state agencies which are interested in and working for the welfare of the Commonwealth.

Direct relationship between the division and the local districts is almost wholly advisory in character, such as providing study guides, supplying standards, speaking at meetings of teachers, parents or clubs, assisting with surveys and approving programs under the Foundation Program Law. The program of health, safety and physical education will acquire added importance and value to the total school program under a fully financed Foundation Program which provides for the allotment of State funds for special units in this area.

The table below shows the status of the program for the biennium ending June, 1955.

Status of Health, Safety and Physical Education in Kentucky 1953-55

Program Activities	1953-54	1954-55
1. Number of pupils examined in accordance with the health code	172,266	148,078
2. Number of immunizations	445,379	452,973
3. Number of defects corrected	140,996	123,805
4. Number of districts meeting the examination requirement of the code	105	124
5. Number of pupils receiving health instruction	455,810	461,547
6. Number of pupils receiving daily physical education	183,053	206,535
7. Classroom units requested for physical education	Does not apply	329.1
8. Schools offering driver education	86	101
9. Number of pupils enrolled in driver education	4,228	6,829

During the biennium, the division participated in the following special activities:

1. Prepared a program of standards for health and physical education.
2. Developed evaluative criteria for approving units in physical education.
3. Requested that high school physical education teachers submit programs to the division for approval.
4. Distributed criteria for driver education to all the high schools.
5. Arranged with Western State College for a driver education course for high school teachers.
6. Sponsored the following publications:
   a. The Status of Health and Physical Education in the High Schools of Kentucky

b. Basic Health Course for High Schools (reprint)
c. A Program of Health Services (sponsored jointly with the State Health Department)

7. Organized an advisory committee for the prevention of accidents.
8. Made a study of the qualifications of the health and physical education teachers.

Certification requirements for instructors in health and physical education require eighteen semester hours in the field as the minimum level upon which the State will allot funds for a unit in health and physical education. The survey of teacher qualifications indicates that 63 percent of the teachers have more than eighteen semester hours in health and physical education, 9 percent have between twelve and eighteen hours, and 28 percent have less than twelve semester hours. The shortage of qualified teachers will constitute a major problem when the Foundation Program Law is fully financed. It is, therefore, of great importance that all teachers with fewer than eighteen semester hours improve their qualifications as rapidly as possible. Of the 265 teachers in this category, 103 could become qualified in one summer term of college.

Future needs:

1. Adequate personnel for the proper supervision of the program.
2. Improvement of facilities for teaching physical education in the local districts.
3. Better understanding on the local level of the place of health, safety and physical education in the total curriculum.

F. Division of Moral and Spiritual Education

Religion in Education has now become a very important issue for the public schools in America. In many regional and national conferences there has been much controversy during which the Kentucky program for Moral and Spiritual Education has been recognized as providing a formula which is acceptable to public schools. While the program upholds the principle of the separation of church and state it recommends that religion be taken into account as reference to it normally occurs in the study of literature, the arts, history, and other subject areas of the regular school curriculum. A separate course for the study of religion, or teaching about religion, would not be consistent with the philosophy of the Kentucky program, which seeks to deal directly with moral and spiritual values that are inherent in all subject matter and in human relations. It is, however, possible to also teach appreciation for all religions and to recognize the respective roles of the home and the church, the school and other social agencies in the community for the total education of the total child.

During a conference at Berea College in October, 1954, the subject of **Achieving the Role of Religion in Education** was discussed. Representatives of Kentucky Colleges, out-of-town institutions, and educational and social foundations studied different approaches and raised fundamental issues. The formula of taking religion into account is the outgrowth of the concept of functional religion as it was developed during this conference.

Another important conference, called by the State Superintendent of Public Instruction, held in Frankfort in June, 1955, developed a second phase of the Kentucky Movement. Presidents and deans of the public

tax-supported colleges and universities, together with members of the staff of the Department of Education, decided that their colleges should become dynamic centers for this movement. Certain general objectives were agreed to, subject to the particular application as determined by each college. These objectives call for, first, incorporating an emphasis on moral and spiritual values as an integral part of the college's policy and program for students in preparation for teaching, and for teachers in service. This might be done by introducing a unit on moral and spiritual values into the curriculum in several required courses, and offered cooperatively by members of the college staff, and by providing a counseling service on moral and spiritual problems for schools in the general area served by each college.

Secondly, it was agreed that public funds must now replace grants from educational foundations in order to adequately support the program as it will expand through the colleges. Third, the State Department of Education is considered to be the proper coordinating agency for this program and it is recommended that the Department continue to maintain the Division of Moral and Spiritual Education as an integral part of its general responsibility.

In the meanwhile, the colleges have been active with a variety of programs. Western Kentucky State College called in former workshop participants and held a two-day evaluation conference. The University of Louisville has offered accredited workshops and now includes a seminar in its regular program. The Univeristy of Kentucky held its sixth and seventh three-weeks summer school workshops during the past biennium, and provided extension work for nearby school systems. At Eastern Kentucky State College the faculty has adopted moral and spiritual education as an integral part of the college's philosophy and objectives. They also provide extension work for adjacent school systems. Murray State College now includes a unit on moral and spiritual education in its general education course, and at Morehead State College, moral and spiritual education was integrated into all summer school courses, especially in the Department of Philosophy of Education which planned and developed the program at that institution.

The Kentucky program has been spread beyond the state borders through participation in regional and national conferences by the Director of the Division. These include two conferences called by the National Council of Churches of Christ in U.S.A., one at the University of Chicago and another in St. Louis. The subject of **Religion in Education** was also included in a conference sponsored by the Anti-Defamation League of B'Nai B'Rith in New York. The Kentucky program was presented in another workshop at Kent State University of Ohio, and in a panel discussion on **How Far Can We Go to Teach Religion in the Schools?** before a section of the St. Louis Convention of the American Association of School Administrators. Consultative services were also provided by the Director for the annual convention of the National Association for Social Studies in Indianapolis. The Kentucky position on **Religion in Education** was again discussed in a conference on **Education for a Free World** called in connection with the inauguration of the new president of Teachers College in New York. Dr. Ellis Hartford, a member of the advisory committee, conducted a summer school workshop on Moral and Spiritual Education at the University of New Mexico in the summer of 1955.

Within the State there have been one-day institutes organized by local teacher, or parent groups on the subject of moral and spiritual education. These were held in Central City, Princeton, Russellville, Paducah, Morgantown, Floyd County, Prestonsburg, Tompkinsville, Harlan County, Louisville, Jefferson County, and possibly others not reported. Assistance was also given in the Kentucky White House Conference on Education.

The Eastern Council for Moral and Spiritual Education, of Louisville and Jefferson County, has produced a booklet on **Patterns of Integration** and **A Little White House Conference,** and have discussed moral and spiritual values as applied to local issues in several one-day workshops for parents and teachers.

The Youth Speaks program, sponsored in part by the Division of Moral and Spiritual Education, has won another, the third, citation from the Freedom Foundation, and also one from **Parent's Magazine.**

A new program recently developed has been in cooperation with the Radio School of the University of Kentucky. It consisted of six round-table discussions on various aspects of the problems of **Mass Media of Communication and Moral and Spiritual Values.** These programs were broadcast over WHAS radio station of the Louisville Courier-Journal, and over the University of Kentucky's FM station.

Published articles on the Kentucky movement have appeared in **Phi Delta Kappan,** April, 1955; **Religious Education Journal,** July-August, 1955; **KEA Journal,** November, 1955. Also, the following bulletins on Kentucky's program of moral and spiritual education have been published: Bulletin of the Bureau of School Service, College of Education, University of Kentucky, June, 1954; State Department of Education Bulletin, **Summary Report on Moral and Spiritual Education in Kentucky,** January, 1954.

SECTION FOUR

BUREAU OF VOCATIONAL EDUCATION

The Bureau of Vocational Education has specific responsibilities in several areas of service to the people of Kentucky. These responsibilities are reflected in the following purposes:

1. Improvements in the techniques of homemaking for both adults and high school youth through a sound, constructive, well-planned program of home economics in the high schools of the State.
2. Through a program of vocational agriculture the development of the talents of farm boys of high school age into specific and fundamental skills to make them more proficient in farming. Also, the upgrading and improvement of modern techniques of agriculture for established farmers and for the young adult whose aim is to become established.
3. The provision of educational opportunities to Kentucky's youth, 16 years of age or older, who have aptitudes and interests in learning specialized trades so that they might improve themselves economically and socially through increased wages over and above unskilled labor. This opportunity is provided in the ten area trade schools of Kentucky and the three State trade schools.
4. Through a program of distributive education the State educational system is enriched by the provision of programs in many of the high schools in urban areas, as well as many of the area trade schools, in salesmanship, merchandising, business practices, economics, and other related subjects pertaining to the business world.
5. Another unique purpose exists in establishing policies promoting and supervising the program that will improve the food habits of the school children of Kentucky through the services of the School Lunch Program. This, in the end, of course, will have a a great bearing on the health of the children since the general health of people is directly connected with the type of diet that they have from day to day.
6. Special recognition is also given to the program of vocational rehabilitation which provides educational, occupational, and medical opportunities to handicapped people so that they might become assets to our economy and society instead of liabilities.
7. The Bureau also has the responsibility for setting up the machinery and operating a system for approving institutions, businesses, and other types of establishments for the training of veterans. This is called the Veterans Approval Agency for the State of Kentucky. It is divided into three divisions:
   a. The Division of Trade and Industrial Education which approves the trade school facilities and courses and, also, the apprenticeable programs conducted by industry.
   b. The Agricultural Education Division which approves the on-the-farm training program for veterans.
   c. The Division of Veterans Training, which approves on-the-job training establishments and all educational institutions, both private and public which trains veterans, excluding the trade schools.

In order to carry out these purposes, the Bureau is divided into two main areas of service:

1. The Divisions of Agricultural Education, Home Economics, and Trade and Industrial and Distributive Education have the unique responsibility for conducting programs that are Federally subsidized through the George-Barden and Smith-Hughes funds as well as by special State appropriations.
2. The School Lunch Program, Vocational Rehabilitation, and the Veterans Education Division have the responsibility for conducting programs that are Federally subsidized by special Acts of Congress as well as financed by special appropriations from the State.

Within the next two years, it is hoped that a Division of Vocational Guidance will be established in the Bureau of Vocational Education. In order to establish and develop good programs of guidance in the public schools of the State, this division is needed at the State level to:

1. Exercise leadership in promotion and establishment of good guidance programs within the public schools of the State and provide supervision for local programs of guidance.
2. Plan cooperatively with other educational agencies a program of guidance services for Kentucky.
3. Develop and distribute to schools materials on organizing the guidance program, techniques for guidance, a guidance library, and occupational information.
4. Work cooperatively with teacher-training institutions in planning for the selection and training of counselors, and conduct in-service improvement programs for counselors and other guidance personnel

A. DIVISION OF AGRICULTURAL EDUCATION

Vocational education in agriculture is concerned with instruction for four groups, namely; farm boys enrolled in high school, out-of-school young men on farms, adult farmers, and veterans of World War II and the Korean conflict who have entered the vocation of farming. The program of agricultural education in some phase was carried on in all but four counties during the biennium. These four counties were Harlan, Knott, Letcher, and Martin.

The number of persons receiving instruction in agricultural education is shown in the table below:

TABLE I-vg

Number of Persons Enrolled in Programs of Vocational Agriculture 1950-55

Year	All Day		Young Farmer		Adult Farmer		Veterans		Total
	No. Depts.	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	No. Classes	Enrol.	Enrol.
1950-1	236	10,699	200	2,683	215	3,171	605	13,895	30,448
1951-2	231	10,733	195	2,639	217	3,204	377	7,585	24,161
1952-3	234	11,843	204	2,568	224	3,267	228	4,135	21,813
1953-4	233	12,174	196	2,457	229	3,274	155	2,574	20,479
1954-5	229	13,119	182	2,153	273	3,578	122	1,787	20,637

The program of vocational education in agriculture is financed by federal, state, and local funds. The table below shows the amount of money expended from each of these sources.

TABLE II-vg

Expenditure for Vocational Agriculture 1950-55

Year	Regular Program				Veteran	Grand Total All Programs
	Federal	State	Local	Total		
1950-1	$372,150	$ 96,562	$449,382	$ 918,094	$3,257,247	$4,175,341
1951-2	372,240	94,279	516,891	983,410	2,397,851	3,381,261
1952-3	371,235	120,727	536,838	1,028,800	1,379,071	2,407,871
1953-4	368,842	126,605	539,888	1,035,335	908,470	1,943,805
1954-5	441,452	122,205	556,936	1,120,593	880,771	2,001,364

During the biennium, the FFA Leadership Training Center at Hardinsburg, Kentucky, was almost completely rebuilt. More than $150,000 in funds and pledges was secured in an FFA Fund Drive for construction of new buildings at the Center. The State Building Commission allocated $30,000 for this purpose. A director for the Center was employed in cooperation with the Breckinridge County Board of Education.

B. DIVISION OF HOME ECONOMICS EDUCATION

Vocational education in home economics has as its major goal to improve home and family living through providing instruction in homemaking to prospective and established homemakers. The vocational home economics program has three important phases: instruction in homemaking, preparation of teachers, and supervision and administration. Instructional programs are provided for in-school pupils, out-of-school young women and adult homemakers. Programs for day-school pupils include instruction in all areas of homemaking, home project guidance, home visitation and Future Homemakers or New Homemakers of America organizations. Programs for out-of-school groups include individual help and group instruction in the various areas of homemaking and in food conservation.

The training of home economics teachers in Kentucky is carried out at institutions of higher learning approved for this purpose.

TABLE I-vh

NUMBER OF ALL-DAY DEPARTMENTS, YOUNG ADULT PROGRAMS AND ADULT PROGRAMS IN HOME ECONOMICS AND FOOD CONSERVATION ADULT COURSES, AND ENROLLMENT, BY YEARS

	1953-54		1954-55	
	No. of Depts. or Programs	Enrollment	No. of Depts. or Programs	Enrollment
All-Day Departments	263	17,458	302	21,367
Young Adult Programs	31	528	34	675
Adult Programs	58	1,039	53	944
Food Conservation Adult Courses	36	7,003	28	5,982
	Total.....	26,028	Total.....	28,968

Progress and improvements in several phases of the home economics program are reflected in these facts. During the first year of the biennium the number of departments decreased by four. During the second year the number of departments increased by thirty-nine and in four other departments there was an additional teacher. This increase in teachers and departments was made possible through an increase in Federal funds available for the vocational program. There has been a decided increase in enrollment in home economics classes during the biennium. In 1954-55, the average enrollment per teacher was 65.7. In 1953-54 home economics pupils carried on 36,756 home projects and in 1954-55, 45,477, part of which were carried on during the year and part during the summer. During this biennium teachers have done more home visiting than in previous years.

In 1953-54 there were 208 FHA chapters with a membership of 10,293 and in 1954-55 there were 221 chapters with a membership of 11,559. There were twenty-three NHA chapters each year of the biennium with a membership of 715 in 1953-54 and 743 in 1954-55. A leadership training conference was held for state and district FHA officers and their advisers each year of the biennium. As a result of these leadership training conferences better work has been carried out by chapters.

The number of teachers trained at the approved institutions to teach vocational home economics was 95 in 1952-53, 89 in 1953-54, and 81 in 1954-55. A study of these graduates who were trained in 1952-53 and 1953-54 shows that only 22 and 23 respectively, accepted vocational home economics positions in Kentucky the year following their graduation. Since only about one out of four home economics teachers trained in Kentucky accept a vocational home economics teaching position in Kentucky, many more teachers should be trained each year. Many of these graduates accept teaching positions in other states. The average turnover of home economics teachers during the biennium was 31%. This large turnover of teachers makes it necessary to have adequate supervisory services and in-service training programs. At the present time the territories of area supervisors in home economics are so large that it is impossible to give the supervision that is needed by the teachers.

Other Divisional Services and Activities

During the first year of the biennium a committee of home economics teachers worked with members of the Division staff in developing criteria for evaluating vocational home economics programs for unit allotments in the Foundation Program. These criteria were presented to other supervisors and to a committee of administrators and teacher trainers for study and were then revised in accordance with the suggestions of these groups. The criteria were approved by the State Board of Education and are now being used as a basis for approving home economics units in the Foundation Program. During the year 1954-55, 54% of the home economics programs were evaluated in light of the criteria. As a result of these evaluations long range plans for making major improvements have been formulated in approximately 95% of the programs evaluated. Some improvements have already been made in 97% of the departments which were evaluated during the year.

Work on a curriculum guide for home economics was started five years ago and has continued each year since. The tentative guide which was developed in 1951, teachers' suggestions for revision after trying it

out, suggestions from the summer workshops in the teaching of foods and the teaching of clothing were all used in revising and editing the curriculum materials. Members of the Division Staff spent a great amount of time during the last half of the 1954-55 year in getting the curriculum guide ready for publication. This was completed in June 1955, and will be available to teachers in the early fall of 1955.

Each year a state conference for home economics teachers was held, visits have been made to individual teachers, and small group meetings have been held for teachers with common problems. Materials have been prepared and made available to homemaking teachers including the the curriculum materials, the FHA bulletin, the NHA bulletin and adult bulletins. Teachers have cooperated in planning the supervisory services which they desired from the State Supervisory Staff.

The home economics program has expanded both in size and scope during the biennium. With the Foundation Program in operation more schools are asking for units in home economics. Homemaking programs for adults and young adults need to be expanded. There is a tremendous need for these programs due to the changing conditions, increased cost of living, and new products on the market. More home economics programs will create a need for more trained home economics teachers and more in-service training.

C. DIVISION OF TRADE AND INDUSTRIAL AND DISTRIBUTIVE EDUCATION

The Area Trade School Plan for the operation of Trade and Industrial and Distributive Education has proved to be successful. There are thirteen Area Trade Schools in Kentucky strategically located geographically, so each serves an area of several counties. Three of these schools are financed and supervised directly by the State Board of Education on which information appears separately in this Report. Ten Area Trade Schools are operated by local boards of education and are financed from State and Federal Vocational Funds, along with local funds. In addition, the Louisville School System has a central trade school for the city which is financed from State and Federal Vocational Funds and local support. Also, several high schools in the State have approved trade and distributive classes which are supported by reimbursements from State and Federal Vocational Funds. Shop training for veterans is carried on at the Area Trade Schools and financed largely from tuition.

In order to upgrade all teachers of trade and distributive education, Kentucky has specially qualified teacher trainers at the University of Kentucky and the University of Louisville. Federal and State Vocational Funds are used to reimburse the universities for the services of these teachers.

Types of Classes

1. Day Trade Classes for high school students, out-of-school youth and adults, including veterans.
2. Part-time Classes for apprentices who must attend trade schools for related instruction in connection with their training on the job.
3. Cooperative Part-time Classes for young workers in mechanical and distributive trades who work part-time.

4. Extension classes for established workers in all types of occupations who need further training to progress in their jobs.

All vocational trade and distributive courses are operated with a combination of funds as follows: Federal and State Vocational Funds; local funds, and tuition from persons over 21 years of age attending day and evening classes.

Vocational Education Funds used by the Division of Vocational Education for administration and reimbursement to all trade and distributive programs for the two years covered by this report are as follows:

1953-54 — $255,111.71 1954-55 — $314,778.86

TABLE I-vti

Number of Students in Vocational Trade and Industrial and Distributive Education Classes By Types

Years	Day Trade	Part-Time	Extension	Veterans	Totals
1954-55	2,595	2,061	7,412	1,210	13,278
1953-54	2,304	2,245	6,055	686	11,290

Industrial Expansion Affecting Vocational Education

Kentucky is advancing industrially and many more employment opportunities are in evidence. This calls for further expansion for trade and industrial and distributive education if the needs of our people are to be met. It is estimated that the enrollment in this program will double during the next few years. One of the great needs of new and expanding industries is trained supervisory personnel. During the biennium, several hundred mechanics and foremen have been trained in supervisory jobs by our teacher trainers and trade school staffs. Distribution of goods and services is also affected by industrial expansion, thus creating a demand for more training for distributive occupations.

Because of the advancement of this mechanical age and the expansion of industries in the State, it is considered essential that all regularly enrolled high school students be given shop work on an industrial arts level. This training is not considered vocational in the sense that it prepares students to enter specific skilled occupations, but is general industrial training and is a part of the general education program. For many boys the training received in industrial arts shops will be terminal and with this training they could enter several occupations. It also prepares boys to enter specific vocational training courses upon the completion of high school, where they can be trained to enter skilled and technical jobs.

A Supervisor of Industrial Education has been added to the staff of the division to promote and develop industrial arts programs in the high schools and to develop cooperation and coordination between these high school programs and vocational industrial shops.

The trend in requirements for employment in industry, trades and business is toward high school graduation with definite skills in some field. To meet these requirements, students will stay in high school until graduation, taking general industrial and business education, and then attend vocational school for specific occupational training in preparation for employment.

1. MAYO STATE VOCATIONAL SCHOOL

The Mayo State Vocational School was established by an Act of the Legislature in 1938. It is operated by the State Board of Education through the Bureau of Vocational Education.

This school offers day trade training to boys and girls sixteen years of age and over. The period of training ranges from one to two years, depending upon the trade pursued. A program of testing and counseling is provided to help the student select the trade in which he has the greatest aptitude and interest along with the best opportunity for improvement after graduation. At present the school has a day trade enrollment of 650, representing more than twenty-five counties in Kentucky. Many students in the adjoining counties drive to and from school while the boys living at a greater distance from the school room and board at the boys' dormitory. Girls find boarding facilities in private homes in Paintsville.

During the past two years, the school has added courses in Practical Nursing and Printing. The school at present offers training in the following trades:

Auto Body Mechanics
Auto Mechanics
Carpentry
Cosmetology
Drafting
Electricity
Machine Shop
Mining Mechanics
Office Practice
Practical Nursing
Printing
Radio
Retail Merchandising
Welding
Woodwork

In addition to training in the trade that best suits his aptitudes and interest, the student also receives classroom instruction in mathematics, science, safety, drafting and blueprint reading, so that he can better understand the underlying fundamentals and principles of the work in the shop. Also, by the aid of this related classroom work, the student will be able to adapt his work to new mechines and methods as they are developed in industry.

All shops are organized on a unit basis so that each student is permitted to progress at his or her own rate of speed. When a student develops proficiency in a skill and meets the requirements set up for the unit, he is then permitted to advance to the next unit, regardless of the time. Before a student is permitted to graduate, he is required to have had regular attendance, meet the requirements established for skills and knowledge of his trade, to have good moral character, and be able to work and get along with other people.

In addition to the day trade program, the school offers a program of evening instruction so that people engaged in full-time work can be upgraded by improving their skills and knowledge of their trade. Some of these classes are offered at Mayo School, but most of them are

offered in communities a distance from the school so as to better serve the people in this entire area.

During the past year, the school had a total enrollment in the evening classes of 755 students. The courses offered in evening instruction were:

Welding
Mining Electricity
Machine Shop
Office Practice
Mine Safety
Mining
Practical Nursing

During the past year, an office and shop building were added at a cost to the State of approximately $100,000. The State also granted the school a Special Capital Outlay of $50,000 for buying equipment for the newly-established printing shop. Further, the State has advertised for bids on construction of a new shop and classroom building on the Mayo campus. While these buildings will help eliminate the overcrowded conditions that now exist in the various shops, and at the same time reduce the number on the large waiting lists for training at this institution, the school is in dire need of additional shop classroom space together with an auditorium, industrial library, industrial laboratory, cafeteria, girls' dormitory, and an addition to the boys' dormitory. At present the fifteen counties surrounding the Mayo School have approximately eighteen thousand boys and girls between the ages of fourteen and nineteen who are out of school. Many of these boys and girls could benefit by training in the Mayo School if adequate buildings and equipment could be provided to accommodate them.

In addition to the building, shop, and classroom needs, the school should have within the next four years, a minimum of fifteen additional instructors.

FINANCIAL REPORT OF MAYO STATE VOCATIONAL SCHOOL

School Year 1953 - 54

Allotted Appropriation		$137,000.00
Personal Services	107,962.00	
Services other than Personal	10,162.00	
Material, Suppliesand Parts	14,918.00	
Other Current Expenses	2,406.00	
Capital Outlay	1,493.00	
Total Expenditures		136,941.00
Balance		59.00

School Year 1954 - 55

Allotted Appropriation		$166,050.00
Personal Services	112,364.00	
Operating Expenses	37,395.00	
Capital Outlay	16,137.00	
Total Expenditure		165,896.00
Balance		154.00
Special Appropriation		50,000.00
Expenditures, approx.		50,000.00
Balance		0.00

2. NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

The Northern Kentucky State Vocational School is an area vocational school established in 1940 for National Defense Training and since 1945 has been operated under the direct supervision of the State Department of Education. The purpose of the school is to offer vocational training to both youth and adults. Day courses and evening courses have been designed to prepare people for employment in industrial and business occupations and to increase the efficiency and skill of those already employed.

Enrollment in any course is based upon evidence that the applicant can benefit from the instruction and that he possesses the qualifications required for the successful utilization of the training in that type of work. The school does not attempt to produce finished mechanics, but merely competent, well-trained people who have the basic skills, knowledge and techniques of their trade. Evening courses, however, do provide the opportunity for journeymen and other employed groups to increase their competence in a trade.

From July 1, 1946 to 1951-52, the annual appropriation for the school was $25,000.00. During these years the school was operated almost solely on funds obtained from the training of World War II veterans by contract between the State Department of Education and the Veterans Administration. In the succeeding years, as the veteran enrollment diminished, it was necessary for the legislature to increase the school's appropriation each year in order to meet the costs of operation.

During the past two years capacity enrollments have been registered in all departments of training and there are waiting lists of students who desire to enroll in both day and evening courses. Full-time or day trade courses, of 22-month duration, are offered in the following trades:

Auto Mechanics	Radio and Television
Printing	Woodworking

Evening trade extension courses may be short unit courses, however, with the exception of a course in Licensed Practical Nursing which was offered in 1953-54. Most of the school's evening courses offer approximately 160 hours of training with the classes meeting on Tuesday and Thursday evenings from 7:00 p.m. to 10:00 p.m. The evening extension course in Licensed Practical Nursing offered refresher training in routine bedside nursing care for members of the Licensed Practical Nurses Association. Employed adults may enroll in the following courses:

Auto Mechanics (General)	Printing
Auto Mechanics (Specialized)	Radio
Machine Shop Practice	Television
Office Practice	Woodworking

The school offers vocational training opportunities to many types of persons—veterans, out-of-school youth, adults, high school students, apprentices, supervisors and foremen desiring leadership conferences, and employed adults who desire supplementary training to upgrade their present occupations.

The school has been housed in the former postoffice building in Covington since its inception. The building was purchased by the Kenton County Fiscal Court from the Federal Government and made available to the school for vocational training purposes.

Needed expansion in the school's training program in recent years has not been possible because of the limited space and facilities in this

building. An evaluation of these programs last year revealed a very definite need for a more suitable building, not only for the courses now being offered but for additional courses which should be offered to meet the demands of local industry. The school's advisory committee and the State Board of Education concurred in a recommendation that a request for a building be presented to the State Building Commission.

The acquisition of such a building will provide the school with permanent state-owned quarters which can be operated in a more efficient and economical manner from both an educational and financial viewpoint. The immediate and future progress of the Northern Kentucky State Vocational School depends largely upon more modern quarters and additional appropriations to provide the necessary funds for an expanded program of training.

ENROLLMENT IN THE NORTHERN KENTUCKY STATE VOCATIONAL SCHOOL

Training Courses	1954-54	1954-55
Day Trade	153	160

Personal Services	$ 50,081.78	
Other Operating Expenses	12,927.12	
Capital Outlay	2,589.15	65,598.05
Balance		$ 1.95

3. WEST KENTUCKY VOCATIONAL SCHOOL

The West Kentucky Vocational School is a State Institution for the training of youth in trades and industries. Its area is state wide, and its program is designed to meet vocational training demands in every community, large or small. The school is operated by the State Board of Education, and supervised by the Bureau of Vocational Education. It is mainly suported by state appropiations, but receives some allotments from Federal vocational funds.

The school was established by legislative enactment in 1938 to occupy the plant of the former West Kentucky Industrial College, which had been merged with the Kentucky State College at Frankfort the same year. The school was formally opened September 19, 1938, with a faculty of 14 instructors and officers.

Purpose

The general purpose of the program is to equip students for effective living in all areas of life. An elaboration of this purpose may be stated in this manner:

Vocationally to prepare students for earning a living, and to know how to meet and solve the economic problems of life in a way that will bring them genuine satisfaction;

Personally, to prepare students for standing on their own feet as responsible, mature, confident individuals and to help them acquire a meaningful personal philosophy, in deciding upon those values in which they believe and by which they can guide their lives;
Intellectually, to help them understand as much as possible of the social and physical world in which they live; and
Socially, to help students to acquire the knowledge and skill which will enable them to make effective and creative adjustments to other people and to prepare them for assuming responsibilities as accepted, effective members of society.

Shops and Equipment

Auto Mechanics, Barbering, Beauty Culture, Brick Masonry, Carpentary, Chef Cooking, Dress Making, Maintenance Engineering, Office Practice, Shoe Repairing, Tailoring, and Woodworking are offered at the West Kentucky Vocational School. Along with each trade, related subjects are taught to the end that students may attain proficiency and understanding of the vocation and its activities in which people in a democracy must engage. All of the trade courses are offered on a two year basis except Barbering, Beauty Culture, Chef Cooking, and Shoe Repairing, which may be completed in one year. Since the beginning of the institution, facilities for the teaching of the trade courses have improved each year. However, it must be completely realized by all concerned that to carry on an efficient, effective trade program, facilities, teachers, and equipment must all keep pace with industry. Among the grave needs of the institution at present is sufficient money to insure the proper housing, the necessary up-to-date equipment, and the required trained personnel for efficient and effective instruction in the trade courses.

The enrollment for the year 1954-55 is 230, distributed over 44 counties and 7 other states beside Kentucky. The prospects are bright for a much increased enrollment for the year 1955-56.

Graduates

Since the establishment of the institution, approximately 1000 students have been graduated.

Our graduates have been employed in the following general areas:

1. Teachers in trade schools.
2. Owners and operators of barber and beauty shops, as well as employees in barber and beauty shops.
3. Owners and operators of tailoring and dress shops, as well as employees in factories and other clothing establishments.
4. Secretaries in various schools, clerical workers, typists, and stenographers in insurance companies, in Civil Service, and in various business establishments.
5. Contractors in the building trades in this and other states, and employees as carpenters and brick masons at various plants and construction companies.
6. Taxi cab operators and owners, employees in garages and service stations in this and other states.
7. Employees in hotels, schools, restaurants, tourist camps, and private families.

D. DIVISION OF SCHOOL LUNCH

School Lunch Program

Prior to July 1, 1954 the School Lunch Program was administered and supervised by the Division of Home Economics Education. The Division of School Lunch was established in the Department of Education on July 1, 1954 and set up under the Bureau of Vocational Education with the functions of administering and supervising the School Lunch Program in the State.

The goal of the School Lunch Program is to improve the nutritional status of children in Kentucky by providing adequate lunches and encouraging the formation of good food habits. The program serves public, parochial and non-profit private schools of the elementary and secondary levels. Local, state and federal funds are used to operate the school lunch program.

During the biennium the school lunch program has made significant growth both in the number of schools receiving reimbursement and the number of children participating in the program. This growth is shown in the following table:

TABLE I-vl

Reimbursement Received Each Year for School Lunch Programs, Number of Schools Receiving Reimbursement and Number of Children Participating During the Peak Month of Operation.

Year	Amount of Reimbursement	No. of Schools Receiving Reimbursement	Children Participating
1953-54	$1,967,177.00	1,255	240,960
1954-55	1,947,138.00	1,305	264,741

In 1953-54 all school districts, with the exception of 17 independent districts, participated in the National School Lunch Program. In 1954-55 there were only 14 independent school districts which did not have at least one school participating in the National School Lunch Program.

The following is a brief summary of the progress that has been made during the biennium:

1. There has been a significant increase in the number of children receiving nutritious school lunches.
2. A larger percentage of schools are now making school lunch a part of the total educational program.
3. The quality and attractiveness of meals served have improved.
4. Improvement has been noted in the physical facilities of the school lunch departments in schools.
5. A larger percentage of school lunch workers received in-service training through supervisory visits, summer training programs and small group conferences conducted by the state staff.
6. The state supervisory staff has been increased to provide more adequate supervision of participating schools.

There is need for addtional supervision on the state and local levels in order to have better trained school lunch personnel, more schools using the program as an educational experience for pupils, and greater participation in the program.

Special School Milk Program

The purpose of the Special School Milk Program, which was inaugurated in Kentucky in November 1954, is to increase the consumption of whole fluid milk by children attending public, parochial and non-profit private schools of the elementary and secondary levels. The program supplements the school lunch and contributes to the health and well-being of the child. It is authorized by the Agricultural Act of 1954 which provides for reimbursing participating schools, making it possible to offer milk to children at a reduced price.

Schools having prior milk service received 4 cents reimbursement per half pint of milk served above an established base. Schools not having prior milk service received reimbursement at the rate of three cents per half pint of milk served.

During the 1954-55 school year, children in Kentucky schools consumed 6,862,150 half pints of milk in excess of normal consumption. School participation was the largest during March of 1955 when 173,564 children in 726 schools consumed 1,804,583 half pints of milk in excess of normal consumption.

E. DIVISION OF VOCATIONAL REHABILITATION

Introduction

Vocational Rehabilitation is a process for restoring handicapped persons to the fullest vocational, social, and economic usefulness to which they are capable. During the past quarter century there has been more educational and welfare legislation enacted in this country than for any comparable period in its history. Society has long recognized its obligation to make provision for the disabled. By doing this it not only adds to the total economic strength of the country but contributes very significantly to the educational and cultural heritage of its people.

Services Available

Any person above 16 years of age with a physical or mental disability which constitutes an employment handicap is considered for vocational rehabilitation services. All cases referred are given a general medical examination and such medical information is reviewed by a medical consultant which is a factor in determining eligibility of the case for service. The rehabilitation counselor interviews the case and records such educational and social factors, including work history as is necessary. After these services are performed by the rehabilitation counselor a determination is made whether or not to continue plans for service. After a full case history has been established, the following services may be provided to a disabled individual.

1. Individual counseling and guidance
2. Physical examination
3. Necessary hospital, surgical, and psychiatric services
4. Necessary prosthetic devices, such as artificial limbs, hearing aids, trusses, braces, and the like.
5. Training for job-in-schools, on-the-job, by correspondence or by tutor.

6. Maintenance and transportation during rehabilitation, if necessary
7. Necessary tools, equipment, and licenses
8. Placement on the right job
9. Follow-up to make sure the worker and the job are properly matched

Finding the Handicapped

One of the first responsibilities of persons working in rehabilitation is to locate disabled people who need and want vocational rehabilitation services. The methods of finding disabled people vary according to locality. The usual procedure is by contacting all types of public or private agencies that could be interested in serving the handicapped. Many disabled persons make application directly to the district counselor for vocational rehabilitation services. After the initial contact is made, if the case appears feasible, plans are made to immediately begin service.

Cases Served

During the fiscal years 1953-54 and 1954-55 the Division of Vocational Rehabilitation rehabilitated 891 disabled Kentuckians. There are over 2,000 other cases in various stages of rehabilitation service. What is the significance of the above figures?

In the first instance, it means 891 disabled citizens of our state made the transition from dependency to self-sufficiency. It also means that these people are no longer drains upon state and local welfare organizations, family resources, and private charities, but instead are helping to increase the productivity of Kentucky industries, agriculture and commerce, thereby adding thousands of dollars to the purchasing power of Kentucky people. In the second instance, it means that because of lack of state funds many deserving disabled people are not served because trained personnel and facilities cannot be provided. Many of the 891 cases were very seriously disabled and many had never worked until rehabilitation prepared them for suitable jobs.

For example, during the 1955 fiscal year, the 459 rehabilitates were earning wages of $120,796 before rehabilitation services were provided. After rehabilitation services had been provided the same 459 rehabilitates were earning $795,184.

Cooperative Agreements

It is one of the policies of the division to have a number of cooperative agreements with local, state, and federal agencies whereby they make referrals of clients to Vocational Rehabilitation for services available through this division. These cooperative agreements have proven to be an excellent plan since many more handicapped persons are found in this way than would be otherwise.

The Department of Economic Security and its field staff and the Kentucky Crippled Children Commission have been most cooperative in referring cases, advising and aiding in the work of rehabilitating the handicapped. There are a number of other private and semi-private agencies which have been very helpful to Vocational Rehabilitation in rendering service to the disabled. One of our outstanding pieces of work done was with the cooperation of the United Mine Workers of America. There are hundreds of injured miners in Kentucky who are unable to

return to mines because of injuries. Rehabilitation trained many of these people to be self-supporting in other fields. Additional funds are sorely needed for this service. A cooperative program is in operation between the U.M.W.A., the State Vocational Schools, and the Division of Vocational Rehabilitation which offers a fine readjustment for the disabled group. This was the first program of its kind in the United States.

Rehabilitation: A Good Investment

In reviewing case records for the period covered, the average cost of rehabilitating a disabled person is approximately $400 per case. After rehabilitation, these same persons receive an average weekly wage of $38.40. If this is figured on an annual basis the income for a person would amount to approximately $2,000 or five times the cost of their rehabilitation. Many of these cases, on initial contact, were receiving some kind of welfare or relief benefits. The real economic value in rehabilitation is the making of these unfortunate people **earners** rather than users of others' earnings.

Restoration Services

Physical restoration services is becoming one of the larger areas of benefits to the disabled. Such cases receive the best medical and surgical services available in the State. The cases also are served by the best hospitals in the State, where they are sent when necessary for restorative service. The first consideration in serving cases of this kind is to remove, if possible, the disablement. Vocational Rehabilitation as such is not a medical care program, but it is somewhat related and the two must work closely together in the total rehabilitation services provided.

Prosthesis

This is the service of providing an artificial appliance to a disabled person which will add to their employment possibilities. Such services consist of artificial limbs, hearing aids, braces, built-up shoes, etc.

Rehabilitative Survey

During the summer of 1955 a State Committee was formed to further study the needs of the handicapped in Kentucky. This committee is now in the process of making such a study and the Division of Vocational Rehabilitation is making available all records and reports to the committee that will be helpful in any way.

Services for the Blind

The Vocational Rehabilitation Program in Kentucky has a section devoted to special services for the blind. The blind are served as any other disabled person except that because of the peculiarity of the disability, a different stress from that for other disabilities is placed on this service. The program is headed by a Supervisor of Services for the Blind who is, himself, blind. He is thoroughly equipped by training and experience to know the unique problems of blind people. Through the program of services for the blind many blind people are placed in profitable employment each year.

Vending Stand Program for the Blind

Vocational Rehabilitation has the further responsibility for establishing and supervising the operation of a number of small vending stands in public and private buildings which are operated by blind persons.

This is a source of employment opportunities for blind people which provides for continuous employment and during the past two years there were 37 stands in operation. This program is very much in need of additional support from the State to provide for the improvement and repair of existing stands as well as for building new stands. These activities are subsidiary to the regular rehabilitation activities but become in actual operation a part of the total vocational rehabilitation program for the blind.

Placement Program for the Blind

The placement service of blind persons is greatly enhanced by the use of staff personnel, who, themselves are blind, in seeking out many jobs in industry and demonstrating the ability of the blind to perform them. After industrial management has been sold on the idea of using competent blind persons, the blind placement specialist continues his services to the client and to the employer until both are completely adjusted and satisfied with their working relationships.

What Initial Service May Doctors, Ophthalmologists, Clinics, Health Officials, Hospitals, Welfare Organizations, Industry, Schools, Churches, Civic Clubs, and Others Render the Blind?

One of the most serious problems of the newly blind is that of adjustment to the acceptance of blindness. The earlier this adjustment is made after the onset of blindness, the better. Therefore, those who have knowledge of a person who has recently lost or is losing his sight, may serve him well by sending his name, address and other important information to the Division of Vocational Rehabilitation.

Old Age and Survivors Insurance Section

This section of Vocational Rehabilitation has to do with the medical determination of disabled people who have been wage earners covered by the Social Security Program, but have become disabled prior to reaching age 65. The major objective of the disability freeze provision is to promote the restoration of disabled individuals to gainful work. The Social Security Amendments of 1954 provide for the preservation of the benefit rights of totally disabled individuals by eliminating periods of disability from the determinations of insured status and average monthly earnings.

The program of Old Age and Survivors Insurance provides an excellent source of referral for the Rehabilitation Division. This program has been integrated very closely with other Vocational Rehabilitation activities. It has a determination team made up of a medical doctor, a determiner, and a secretary.

F. DIVISION OF EDUCATION FOR VETERANS

The program of education and training for veterans as viewed and administered by the Kentucky State Approval Agency is broad in scope. The program includes all duties and responsibilities assumed in the inspection, approval, and supervision of veteran training facilities. This includes the functions delegated to the approval agency as a result of Public Law 346 for World War II veterans and those acquired under Public Law 550 for Korean veterans. Even though major differences

exist between the two educational bills, there are similar duties and responsibilities for the Approval Agency. These bills provide education and training for veterans in all fields and in all types of programs.

Prior to the enactment of Public Law 550 the duties and responsibilities of the Approval Agency were performed by other divisions in the Bureau of Vocational Education. The passage of Public Law 550 created a need for a different type of administrative organization, and on November 1, 1952, the Division of Education for Veterans was established in the Bureau of Vocational Education. This Division is responsible for performing all duties in connection with the inspection, approval, and supervision of all veteran training facilities except the area trade schools and the institutional on-farm training program.

The Division of Education for veterans is financed by a fiscal year contract with the Veterans Administration and an allotment of State funds in the Department of Education Budget. The Veterans Administration contract provides reimbursement monthly for salary and travel expenditures while the State fund is utilized for incidental expenditures other than salary and travel.

The Division of Education for Veterans is currently operating five field offices and a central office in Frankfort. The field offices are manned by a field supervisor and a clerk-stenographer. They serve an area of 13 to 37 counties and are equally divided as to work-load. Each of these offices handle four distinct types of education and training programs.

1. Institutional (accredited)
2. Institutional (non-accredited)
3. Apprenticeship training, and
4. Other On-The-Job

The status of approved training facilities as of June 30, 1955, is:

206 Accredited institutions
64 Non-Accredited institutions
914 Job training establishments

There were 6,789 veterans pursuing training in these facilities on this date.

This program of education and training for veterans should not be viewed as a "tremendous waste of tax monies" nor as a"large drain of federal funds" as is the tendency of some, but rather as an investment in our greatest resource. Yes, this cost of the veterans program is an investment and it is already paying dividends in services rendered in every field of endeavor by our veterans who were educated under this program. It is also paying dividends in actual increased income tax payments brought about by better earning power resulting from this educational program.

Total expenditures for this Division for 1953-54 was $48,842.40 and for 1954-55 it was $48,317.32.

G. KENTUCKY SCHOOL FOR THE BLIND

The Kentucky School for the Blind was founded in 1842 and has continued since that time to serve the blind and visually handicapped children of the Commonwealth. It is the only school in the State furnishing an accredited program of special education for these handicapped children. Students are accepted at kindergarten age (five years) and may remain through the four years of academic high school work. An extensive program of vocational work and music courses are available to the students in addition to the regular elementary and high school course. All children whose visual acuity is such that they cannot accept a public school education and who are legally classified as "blind" (20/200) are eligible for admission. A separate school department for Negro children was maintained until the beginning of the 1955-56 school year when the program was integrated. Presently, the Negro children are housed and fed in separate quarters but attend all classes with the other children in the main department. The three Negro teachers who have proper credentials, experience, and tenure have also been integrated into the regular school program. A total of twenty teachers, in addition to the principal and the superintendent administer the academic program to an enrollment of approximately one hundred and forty students.

The school in serving students from the whole state is resident in nature, except for children living in Louisville who come and go each day as day students. In providing maintenance for the students and some supervisory personnel, the operation of the program after school hours requires a considerable staff of domestic, supervisory, and maintenance personnel and presents many different types of problems from the operation of a public school for eight hours, five days a week. The care of the health and welfare of young children adds the necessity of a good clinic, infirmary, resident registered nurse, consulting ophthalmologist, and visiting pediatrician and dentist. A full program of recreation and leisure activities must also be planned, guided, and supervised for the students in the after school hours and on week ends.

Present needs for the school include the replacement of the century old main building; a swimming pool; a commissary department building; a new dormitory for Negro children; and a staff building. Staff expansion must also be given consideration to relieve the long hours worked by housemothers and the nurse, who spend twenty-four hours on duty for many successive days without time off. A more adequate program of testing should be included in evaluating the educability of students applying for admission. A qualified psychologist is needed to carry out this work.

Though somewhat lacking in physical plant faciilties and equipment, the school is providing a broad, sound educational program in keeping with the national standards of special education. The graduates of the school in recent years and their achievements on college level verify the quality of preparation given them in their high school curriculum.

FINANCIAL REPORT OF KENTUCKY SCHOOL FOR THE BLIND
SCHOOL YEAR 1953-54

State Appropriation		$160,000.00
Personal Services	$109,570.24	
Operating Expenses	48,349.01	
Capital Outlay	2,080.44	
Total Expenditures		159,999.69
Balance		.31

SCHOOL YEAR 1954-55

State Appropriation		$189,900.00
Personal Services	$124,821.97	
Operating Expenses	57,816.83	
Capital Outlay	7,248.50	
Total Expenditures		189,887.30
Balance		12.70

SECTION FIVE

THE BUREAU OF ADMINISTRATION AND FINANCE

The Bureau of Administration and Finance consists of four divisions: the Division of Census and Attendance, the Division of Local School District Finance, the Division of Departmental Finance and Services and the Division of Pupil Transportation. These four divisions are directly concerned with the over-all supervision, accounting and auditing of school finance and statistics, pupil transportation and the service function of the Department of Education. Certain tables herein reflect in a limited way the scope, status, and results of the effort of the Bureau with reference to census, enrollment, attendance, finance, pupil transportation, and research and statistics.

A. DIVISION OF PUPIL TRANSPORTATION

The Foundation Program Law, enacted in 1954, made provision for the State to share the cost of pupil transportation with the local school districts. Prior to this time no provision had ever been made for the State to give direct financial assistance to the overburdened districts for this rapidly expanding educational service.

Those sections of the Foundation Program Law relating to pupil transportation are as follows:

KRS **"157.370 Allotment of transportation units; study of pupil transpotration by Legislative Research Commission.**

(1) In determining the cost of the foundation program for each district, the Superintendent of Public Instruction shall allot to each district transportation units.

(2) One transportation unit shall be allotted for each eighty pupils in average daily attendance who are transported to school at public expense and who live one or more miles from school by the nearest traveled road; provided, that handicapped children may be included who live less than this distance from school.

(3) One transportation unit shall be allotted for each fifty square miles served by school transportation facilities of the district if seventy-five percent or more of the total miles of bus routes of the district is hard-surfaced; one transportation unit for each forty-five square miles if between forty and seventy-four percent of the total miles of bus routes of the district is hard-surfaced; and one transportation unit for each forty square miles if less than forty percent of the total miles of bus routes of the district is hard-surfaced.

(4) Where more than one transportation system is required by law or regulations of the State Board of Education additional transportation units shall be allotted on application of the district board.

(5) The Legislative Research Commission is hereby directed to conduct a study of pupil transportation in Kentucky and report its findings to the General Assembly on or before January 1, 1956."

KRS "157.390 Subsection (5). The amount to be included in the foundation program for transportation shall be determined by multiplying the number of transportation units by sixteen hundred dollars.

Since the Foundation Program was not enacted into law until March, 1954, financial benefits from it have been available for only one year of the 1953-55 biennium. Based on information for 1954-55 submitted by local districts with programs of transportation, 3,509 units were awarded at $1,600 per unit for a total cost of $5,614,400. Since the General Assembly increased the common school fund by only $3,000,000 per year of the biennium, the total appropriation was sufficient to finance slightly more than 71% of the program. When the Foundation Program is fully financed, it is our belief that Kentucky will have one of the better programs of pupil transportation in the United States.

Since pupil transportation had its beginning in Mason County about 1911, when a special type of horse-drawn wagon was used, the service has had a remarkable growth. This has been largely due to improved transportation facilities, both in comfort and safety; road improvements; realization of need for better schools; educational opportunities; and small schools losing their usefulness.

Table I gives evidence of the rapid growth of the transportation program and would lead logically to the conclusion that such growth will be steady for many years to come. It is interesting to note that the rate of increase in the number of pupils transported for the six-year period from 1948-49 to 1953-54 was from approximately 11,000 to 23,000. The increase in annual cost of transportation was proportionally as great.

TABLE I-t

Table showing increase in number of enrolled pupils transported and total transportation cost by years during a six-year period from 1948-49 to 1953-54.

Year	Number of Enrolled Pupils Transported	Increase in Number of Enrolled Pupils Transported	Total Transportation Cost	Increase in Transportation Cost
1948-49	168,162	.....	$3,702,125.70	$.....
1949-50	187,616	19,454	3,986,580.02	284,454.32
1950-51	200,368	12,752	4,451,407.60	464,827.58
1951-52	211,572	11,204	4,956,026.34	504,618.74
1952-53	229,177	17,605	5,313,836.47	357,810.13
1953-54	252,189	23,012	5,652,502.25	338,665.78

Based upon trends in transportation growth for the years recorded in Table I and upon statistical information for previous years, a projection was made of the growth and need of this service for the eight-year period for 1955-56 to 1962-63. The results of this projection are recorded in Table II. Whereas Table I accounts only for numbers transported and transportation cost, Table II presents the growth in transportation units as determined by pupils transported and area served and translates these into cost. Requirements of the Foundation Program Law account for the differences, in type of information, between the two tables. It is noteworthy that this projection shows an annual increased need of approximately one-half million dollars.

TABLE II-t

Total Estimated Transportation Units Based On Estimated Pupils Transported and Estimated Area Served and Translated Into Cost for the Eight-Year Period 1955-56 to 1962-63

Year	Transportation Units Based on Pupils Served	Transportation Units Based on Area Served	Total Transportation Units		Cost Per Unit	Total Cost of Transportation
1955-56	2743	803	3546	x	$1600	$5,673,600.00
1956-57	3034	805	3839	x	1600	6,142,400.00
1957-58	3317	807	4124	x	1600	6,598,400.00
1958-59	3606	809	4415	x	1600	7,064,000.00
1959-60	3885	811	4696	x	1600	7,513,600.00
1960-61	4165	813	4978	x	1600	7,964,800.00
1961-62	4452	815	5267	x	1600	8,427,200.00
1962-63	4708	817	5525	x	1600	8,840,000.00

While we are experiencing this rapid growth in pupil transportation we are faced with many problems in the safety of our children who are transported and in the efficiency and economy of operation. The Director of the Division of Pupil Transportation attended a national conference on school bus standards in East Lansing, Michigan in April, 1954, for the purpose of learning of such changes as might be necessary in school buses and in their operation to better assure the safety and comfort of the pupils while being transported.

The division's program of school bus driver training and bus inspection is being carried forward. The Director attempts to reach as many of the 3,000 buses and drivers each year as is possible for one individual. Careful attention is given by the division each year to the approval of school bus body and school bus chassis manufacturers as one of the means to further insure the safety of the pupils. Eight school bus body manufacturers and a similar number of chassis manufacturers have been found to meet the regulations and were approved to offer their products for sale in Kentucky. Care is also taken each year to see that every bus is properly insured in order to give more adequate protection to the pupils who ride them and to protect the local boards of education who are charged with this responsibility against financial liability.

B. DIVISION OF CENSUS AND ATTENDANCE

An accurate and complete census of all school age children is essential to the administration and operation of an efficient school system. Kentucky Revised Statutes, Section 159.240, provides that each board of education shall maintain a permanent and continuing school census. Under Section 159.250, Kentucky Revised Statutes, the director of pupil personnel (attendance officer) is made responsible for a continuing census of all children between the ages of six and eighteen who reside in the school district. Under the Foundation Program Law the census must be accurate if it is to provide essential information to the State and local districts.

Purpose of Census—

1. It is required by law
2. It serves as a check to ascertain that children of school age are in public school, parochial school or private school

3. It is the only source of information regarding the number of pupils at various age levels

4. It is valuable in locating handicapped children

5. It is used as a basis for estimating school populations for the future

6. It is utilized to ascertain the cost of proposed educational programs when projected into enrollments, membership and average daily attendance

7. It provides information on the causes of non-enrollment in our public schools

The attendance program in Kentucky has two fundamental facets, namely: (a) securing attendance at school of all children of school age, (b) providing educational opportunities for them while at school. It is the duty of the State, therefore, to require that every educable child within its jurisdiction shall receive at least an elementary and secondary education insofar as such a level may be attained. Such a dictum contemplates acceptance on the part of the public of the responsibility to provide adequate educational facilities in order that every child, as far as possible, may become an intelligent and law abiding citizen, may be intellectually equipped to enjoy an enriched living, and may be prepared to earn a livelihood for himself and for those dependent upon him.

The Foundation Program Law envisages a sound program of education which will bring about improved attendance in our schools. The method used for determining the needs of a district will be by classroom units based on average daily attendance. With more children enrolled in school and attending longer periods of the year, we can expect a better trained citizenry and that the cost of education to increase.

The tables that follow show the number of census children by county and independent districts from 1946 to 1955; number of children enrolled in public schools of county and independent districts from 1944 to 1955; number of Kentucky children of ages 6 to 17, inclusive, enrolled in private or parochial or other schools, April 1, 1954 and April 1, 1955; number of children from 6 to 17, inclusive, not in membership in any school, with the causes of non-membership on April 1, 1944 and April 1, 1955; average daily attendance from 1944 to 1955; percent the average daily attendance is of the census, enrollment and average daily membership for the school years 1947-48 to 1954-55; membership at the close of the years 1953-54 and 1954-55 with the number promoted and retained; public school enrollment by grades and race in county and independent districts for school years 1953-54 and 1954-55; number of census children by race and sex in each age group in county and independent districts as of April 1, 1954 and April 1, 1955; number of high school graduates in county and independent districts for the school years 1953-54 and 1954-55; summary of attendance and teaching personel by types of school organization for the school years 1953-54 and 1954-55 and general school statistics by school districts for each year of the biennium.

TABLE I-ca
Number of Census Children by County and Independent Districts from 1946 to 1955

Year	County	Independent	Total
1946	472,332	210,045	682,377

C. DIVISION OF LOCAL SCHOOL DISTRICT FINANCE

Common School Fund Appropriations

The total aid from state appropriations to the common schools of the Commonwealth for the biennium 1954-56 is at the highest level in history.

The Common School Fund for the school years 1948-49 and 1949-50 totaled $21,500,000 per year. Of this amount $19,350,000 was distributed yearly on the per capita basis and amounted to $28.35 per census child in 1948-49 and $28.60 for 1949-50. The remainder or $2,150,000 was distributed from the Equalization Fund.

For the 1950-51 school year the Per Capita Fund was increased to $20,212,500 while the Equalization Fund was increased to $4,287,500. Thus the total Common School Fund amounted to $24,500,000 for this year. The Per Capita Fund for this year provided $29.59 per child.

While the Equalization Fund remained constant ($4,287,500) for the 1951-52 school year, the Per Capita Fund was increased to $26,212,500. This amounted to $38.40 per census child. The total Common School Fund was $30,500,000 for 1951-52.

In 1952-53 both Funds (Per Capita and Equalization) remained constant (Per Capita $26,212,500 and Equalization $4,287,500) or a total Common School Fund of $30,500,000. The constant Per Capita Fund and a slight decrease in the census resulted in a slight increase to $38.42 in the amount per census child.

Again in 1953-54 the appropriation to the Per Capita Fund remained constant at $26,212,500, which due to an increased census amounted to $38.11 per census child. The Equalization Fund for this year was increased to $5,573,000. The total Common School Fund was therefore $31,785,000.

In November, 1953 the people of Kentucky voted overwhelmingly to amend Section 186 of the Kentucky Constitution and thus enabled the 1954 General Assembly to enact into law the Kentucky Foundation Program. This law defined the Common School Fund as the "Public School Foundation Program Fund" which was to consist of two Accounts; (1) Per Capita Account; (2) Equalization Account. The same 1954 General Assembly made an appropriation of $26,212,500 to the Per Capita Account and $8,573,000 to the Equalization Account for the 1954-55 school year. This Per Capita Account, being distributed in the same manner as the former Per Capita Fund, amounted to $37.51 per census child. The total Foundation Program Fund was $34,785,500.

In review, it may be seen that the appropriation for the per capita distribution has increased from $19,350,000 in 1948-49 to $26,212,500 in 1954-55. This is an increase of $6,862,500 or 35.5 per cent in the seven year period. During the same period the state funds available for equalization have increased from $2,150,000 to $8,573,000. This is an increase of $6,423,000 or 298.7 per cent. Thus the total state appropriation for the common school system has increased from $21,500,000 in 1948-49 to $34,785,500 in 1954-55. This is an increase of $13,285,500 or 61.8 per cent.

As evidenced by the revision of the equalization law enacted by the General Assembly in 1949 and by the basic concept of the Foundation Program Law enacted by the 1954 General Assembly the Commonwealth has recognized and assumed the responsibility for guaranteeing to all children in Kentucky a certain level of education. The evidence for this is seen in the substantial increase during this eight year period in the appropriations to the Equalization Fund or Equalization Account.

Per Capita Fund and Teachers' Salaries

Table I-f shows the per capita appropriation and mean average teachers' salaries for years 1931-32 through 1954-55.

Length of School Term

Tables II-f and III-f show the length of school term for the 1953-54 and 1954-55 school years.

School Tax Rates

Tax rates for the school years 1948-49 through 1954-55 are given in Table IV-f.
