COLLEGE OF AGRICULTURE

CLARENCE W. MATHEWS: DEAN,
PROFESSOR OF HORTICULTURE AND BOTANY

J. J. HOOPER,
PROFESSOR OF ANIMAL HUSBANDRY

GEORGE ROBERTS,
PROFESSOR OF AGRONOMY.

ALFRED H. GILBERT,
ASS'T PROFESSOR OF BOTANY.

Address General Mail for College of Agriculture to 660 South Limestone Street.

LEXINGTON, KY.. February 2, 1910.

President James K. Patterson,
State University of Kentucky.

My dear President,

In accordance with your request I
submit the following names of those who were proposed
at the faculty meeting on yesterday for the several
honorary degrees named:

Jonathan Blair MacAfee, Ardmore, Pa. for the degree
Doctor of Engineering.

J. Levering Jones, Philadelphia, Pa. for the degree LL.D.

Alex. P. Humphrey, Louisville, Ky. for the degree LL.D.

W. W. Finley, President of the Southern Railroad,
Washington, D.C. for the degree LL.D.

Henry Clews, New York City, for the degree LL.D.

Respectfully submitted,

C. W. Mathews

Secretary of the Faculty.

NIGHT MESSAGE.

THE WESTERN UNION TELEGRAPH COMPANY.

INCORPORATED
24,000 OFFICES IN AMERICA. CABLE SERVICE TO ALL THE WORLD.

This Company TRANSMITS and DELIVERS messages only on conditions limiting its liability, which have been assented to by the sender of the following message. Errors can be guarded against only by repeating a message back to the sending station for comparison, and the Company will not hold itself liable for errors or delays in transmission or delivery of Unrepeated Night Messages, sent at reduced rates, beyond a sum equal to ten times the amount paid for transmission; nor in any case when the charge is not presented in writing within thirty days after the message is filed with the Company for transmission.

This is an UNREPEATED NIGHT MESSAGE, and is delivered by request of the sender, under the conditions named above.

ROBERT C. CLOWRY, President and General Manager.

CLARENCE W. MATHEWS DEAN,

PROFESSOR OF HORTICULTURE AND BOTANY

J. J. HOOPER,

PROFESSOR OF ANIMAL HUSBANDRY

GEORGE ROBERTS,

PROFESSOR OF AGRONOMY.

ALFRED H. GILBERT,

ASS'T PROFESSOR OF BOTANY.

Address General Mail for College of Agriculture to 660 South Limestone Street.

LEXINGTON, KY.. February 9, 1910.

The professors of the College of Agriculture desire to call to the attention of the Executive Committee the following detailed plans for the further development of the agricultural work during the next collegiate year. Your attention is called to these facts now so that, if possible, some expression of your attitude toward this matter may be secured now as the basis for planning the work for next year, much of which must be planned very early.

First, I would urgently recommend that Professor George Roberts be invited to give his entire time to the College of Agriculture, beginning with the next collegiate year, and that provision be made for equipping on the third floor of the agricultural building a laboratory for soil physics and a laboratory for soil fertility. The equipment for these laboratories Professor Roberts estimates to cost about \$4000. It is deemed essential that this equipment should be provided for our students to give them any adequate knowledge of some of the most fundamental problems of the agricultural course. No well equipped College of Agriculture at the present time is without them and it is impossible to draw students to this work as we should unless such laboratories are provided.

I deem it a matter of equal importance at the present time that provision should be made for the erection and equipment of a suitable dairy building to properly develop the work in charge of Professor Hooper. The Blue Grass country and many other parts of Kentucky are admirably adapted to the dairy industry. Many creameries are being established all over the State but the owners of such creameries have to send to Wisconsin and other states to the North and West of us to secure their operators. We should have a building thoroughly equipped for butter making, both upon the creamery basis and upon the farm dairy basis. Professor Hooper is well satisfied that an adequate supply of cream for this purpose could be secured within easy distance of Lexington and that such an establishment could be conducted upon a basis of sufficient magnitude to give thorough practical creamery instruction to our students. The experience of other institutions leads Professor Hooper to believe that such a dairy department could be made within a very few years nearly or quite self-sustaining. We have ~~as good or~~ better conditions in Kentucky for establishing an extensive dairy industry than are

-2-

enjoyed by states like Wisconsin which have developed this business to enormous proportions.

The present is a peculiarly favorable time for entering upon this line of work in the University. We estimate that the cost of erecting and equipping a dairy building of the necessary capacity would cost \$18,000.00, and we earnestly hope that some provision may be made for erecting such a building during the session of 1910.

There should also be provided a supervisor of agricultural extension work with the rank of assistant professor, to be closely allied with the work of Professor Roberts in crop growing, who could organize both here in Lexington and in other places over the State various lines of the agricultural extension movement. This phase of work is rapidly reaching very extensive proportions in adjoining states and should not longer be neglected in the State of Kentucky.

Respectfully submitted,

C. W. Mathews.

Judge W. T. Lafferty,
Auditor State University.

My dear Judge:

In a letter received from Mr. Frazee of date March 15th, the following language was used " Your letter and account addressed to Judge Lafferty was handed to me by him requesting that I answer it. He said that he understood that check paid you in December, last, was in full for all claims against State University. Address any communications to him." This letter reached my office during my absence in Texas, else it would have had a prompt reply. I have just a few days ago returned, and this is the first opportunity I have had to take up the correspondence. I really can't understand how you could think that the check you paid in December was in full. The bill which I sent you early in December, which was paid by that check, was a duplicate of the bill sent you early in July, ~~and~~ as was stated in the letter sending it. That bill was due at the time of the talk with you in June when I stated the amount of bills to that time, and further stated that we expected to use the full amount of the \$5,000.00. There was no limit as to time in the agreement; indeed we desired and insisted that we should have 12 months in which to advertise the matter before the State College assumed the name of State University. At the urgent request of your committee, however, we conceded that point to State and consented that they assume the name University as soon as the bill was approved, and we never expected to complete

TRANSYLVANIA UNIVERSITY,

J. T. VANCE, TREASURER,
LEXINGTON, KY.

the advertising within one year nor two years. The fact is it must be continued beyond this time, and we have already spent considerably more than the amount for which we have sent you bills. The payment of all of these sums has been delayed very much beyond the time agreed upon and I trust that you will take this matter up and let us have check for the amount of bill sent you without unnecessary delay.

Thanking you in advance, and with my kind regards, I am

Yours respectfully,

 Treas.,
Transylvania University.

*sup
to mention
summary*

Lexington, Ky., May 19, 1910.

To the Board of Trustees
of the State University of Kentucky.

Gentlemen:-

I beg to submit to you the following report, covering the period from the beginning of the University year just closing to March 12, 1910 of the current year, the date upon which my resignation was formally accepted by the Executive Committee.

A period of transition is always unsatisfactory. Knowing this, I endeavored so to arrange matters that after my declared intention of last June to resign as soon as I should feel assured of a reasonable prospect for a competent successor, the business of the University could go on without interruption or dislocation. I recommended that the Vice-President should relieve me of some of the burdens of administration until my resignation should become effective, and that he should thereafter, with my advice and aid, discharge the duties as President until my successor should be elected and installed. This recommendation was adopted and under this provisional arrangement the University work has been carried on from June of last year until now. Early in January, I placed my resignation in the hands of Governor Willson, with the request that it become operative January 15, 1910. I notified the Business Agent of this action and made my settlement with him for the half year ending January 15, 1910, Thenceforward becoming the beneficiary of the retiring allowance provided for by the Board of Trustees, instead of receiving a salary

as heretofore. I notified the Executive Committee of what I had done at their next meeting thereafter, viz: March 12, 1910. My action was ratified by them and from that date I consider that I ceased to be President, although Governor Willson has not yet formally accepted my resignation. This report then covers the period from June 1st of last year until March 12, 1910, or a little more than two-thirds of the current university year.

The session opened in September 1909 with a fairly good attendance. There was a shortage in the matriculation as compared with previous years and notwithstanding the addition of the matriculates in the College of Law. The matriculation in the University proper and in the Academy does not show any increase over that of the years immediately preceding, indeed rather otherwise. The matriculation for the last six years is as follows:-

1904-5	705
1905-6	813
1906-7	901
1907-8	1064
1908-9	772
1909-10	684 (exclusive of post-graduates)

It will thus be seen that the maximum attendance attained by the University was in 1907-8. The rapid decline in the two following years, viz. Last year and the year just closing, was due principally to the unfortunate and ill-advised elimination of the Normal Department at the instance and insistence of the Normal Schools by the General Assembly of 1908. I have done all that I could, by addresses to high schools, participation in the proceedings of state, district and county institutes, correspondence, information supplied to superintendents of county schools and by what-

ever other means I could command, to redress the balance and bring up the attendance to the level of 1907. I have, moreover, sent out competent and energetic agents, particularly during the vacation, into the field to address institutes, visit schools and private families and to distribute illustrated posters and booklets, catalogues and other literature. I have had Dr. Louis F. Snow, Dean of the Department of Education, in the field during more than half of the current year, visiting high schools, making addresses, and attending educational assemblies and conventions. I consider this a most important work, indeed an urgent necessity. We must do what we can through the Department of Education to train teachers for the high schools. The General Assembly, in re-establishing by formal recognition the Department of Education, expects the University to do this. The General Assembly looks to the Normal School to provide teachers for the common schools and to the University, through its Department of Education, to supply principals and teachers for the High Schools. We must make our courses in the Department of Education so full, so attractive and so practical, so well administered and so well taught that teachers for the high schools shall find in it all they need and be induced to come hither because of thoroughness, prestige and economy. If we neglect to do this or fail in the effort, students preparing to be teachers in the high schools will go elsewhere to prepare for their work, either to other states or to other colleges and universities in our own state. We shall thus lose

prestige, build up other institutions through our neglect or incompetency and, worse than all, lose both leadership and revenue. So far as our Department of Education is concerned and its relation to high school teachers, we are now at the parting of the ways.

Under these circumstances it will be impossible to think of the discontinuance of the Department of Education, as some have suggested. The same is true of the Academy. The Legislature of 1908 made provision for the elimination of the Academy of the State University as rapidly as educational conditions in Kentucky should warrant. This was done in anticipation of the expected establishment and early maturity of the high schools provided for by the General Assembly of that year. In many of the counties of the Commonwealth high schools are only beginning to be established and their growth and efficiency will necessarily be slow. The legislation of 1893, which is still upon the statute book, makes it obligatory upon the University to receive and matriculate pupils who have graduated from the common schools and have on competitive examination received appointments from their respective county superintendents. Even at the best, the majority of the high schools in the counties where they had not existed before the passage of the high school act, could not take graduates of the common school course and prepare them for the Freshman class of the State University in less than three or four years. The maintenance of the Academy is thus imperative, in order to bridge over the interval between the common schools and the University. We cannot eliminate

the Academy, however much we may desire to do so, until the high schools can do the intermediate work. The system of appointment which links the common schools, through the Academy, to the University, is the most popular feature in the legislation which makes the University the head of the educational system of the Commonwealth. Without it we should have been unable to hold the half-cent tax in 1893, and without it we should be unable to prevent its repeal today. It is sincerely hoped that the high schools will, within a reasonable time, attain the necessary efficiency in the work of preparing students for the University. Meanwhile we must keep faith with the state or forfeit both their support and their good will. Twenty-two percent of the under-graduate matriculates of the State University last year were entered in the Academy, and a very considerable proportion of those who entered the University through the Academy came as appointees on competitive examination from their respective counties.

We must now either make a bold effort to recover lost ground and to move forward, or else stand still and fall hopelessly to the rear. We have reached a stage when it will be necessary, in order to justify further appeals to the Legislature, to show more substantial results than we are at present achieving. We are making good scholars, good scientists, good engineers, good agriculturists, but with the means at our disposal we could take care of many more matriculates than we have, and in order to justify further appropriations we must show larger results. The University of Illinois has seven or eight times our income, but it has seven or eight times our number

of students. With twenty percent more of income we could readily take care of twice our present numbers, and be it remembered that numbers count for much, both in the estimation of the Legislature and of the general public, and it is quite apparent that with double our present numbers or treble, we could with a much more hopeful prospect of success importune the Legislature for further endowment.

An Act was passed by the last General Assembly making an additional appropriation for the University of \$20,000. per annum for two years. A like amount and on identical conditions was appropriated for each of the normal schools. The bill was vetoed by Governor Willson after the adjournment of the General Assembly. I think it unfortunate that we were associated with the Normal Schools in a common measure. I feel confident that if we had stood alone we would have gotten a larger appropriation, with less risk of a veto. Many members of the General Assembly with whom I had conversation upon the subject were unanimous in the opinion that we had made a mistake in associating ourselves with the Normal Schools for the introduction of legislation in common. When, therefore, we go before General Assemblies hereafter, whether for money or other needful legislation, we should stand alone. And I will add that all measures brought before the General Assembly for the benefit of the University should emanate from the Committee on Legislation appointed by the Board of Trustees and from them alone.

For years the financial condition of the University has been a matter of grave concern. While knowing within

appreciable limits the aggregate income from various sources, we have not been able to forecast with any degree of accuracy the expenditures for any current year and we have been quite unable to know, within thousands of dollars, what our obligations were at any time. This is not as it should be. The responsible officials of any well-managed corporation should be able and are able to know, at the close of each day, exactly how their accounts stand, viz: Sources of income, incomes realized and realizable, cash on hand, expenditures, fixed charges, outstanding obligations. The Comptroller believes that he has devised a scheme which will clarify the situation. If he can bring order out of the confusion that has reigned for years past, he will deserve the thanks of the Board.

There is an estimated deficit of \$12,000. or \$15,000. at the close of the present fiscal year, and on the basis of the budget of 1909-10 an estimated excess of expenditure over income of \$10,000. or \$12,000. The budget committee is now at work in an effort to make income balance expenditure for the year 1910-11. There are certain fixed charges which can neither be eliminated nor materially cut down. There are others more elastic, for example, appropriations for current expenditures in the various departments of instruction which may be reduced for the next two years, but in this reduction care must be taken not to impair efficiency, either in instruction or administration. One thing, however, is certain, that with a deficit for the present year and an embarrassed exchequer for the next, increase in the existing staff of instruction or administration is, on any sane hypothesis, clearly out of the question. To attempt a re-organization

of the existing staff of administration, which would involve additional units or increased expenditure, would be nothing short of an inexcusable folly. To project the creation of a staff of administration on the scale of the Universities of Ohio, Wisconsin, Illinois, California and Cornell, the income of each of which is seven or eight fold that of ours and the matriculation in the same proportion, would be preposterous. No prudent farmer would think of employing as many hands to cultivate a ten-acre plot as he would to cultivate a farm of one hundred acres. Nor would a manufacturer think of employing as many operatives in a factory of small dimensions as in one the capacity of which is ten times as great. In a bank with a small capital and a small business, one man may be teller, bookkeeper, cashier and president, but let the business increase ten fold or a hundred fold and the principle of the division of labor becomes applicable and may be employed with economy and advantage. Nor would a mine operator give employment to 500 miners, if a hundred be equal to the requirements of the mine. We all agree that economy must be practiced, but each one wishes an exception made in his case, an extra employee, an extra appropriation, extra equipment; and the exception once made multiplies automatically. Economy evaporates in words and at the end of the year we are as badly off as before retrenchment and economy were discussed or attempted. We must get down to business principles and adhere to them, if our corporation is to succeed. Sentiment and finding jobs for persons, however deserving, find

no place in a business enterprise, and I beg to remind you that the State University is a business enterprise and you are appointed to conduct it on business principles. The most obtrusive needs of the State University of Kentucky today are a sound fiscal system, efficient administration and instruction, and the harmonious co-operation of all employees, from the President of the institution down through all its grades and all its relations.

My policy as President of the University has been to build up a well-rounded, symmetrical institution, affording equal advantages and facilities for growth, development and expansion to all the colleges of the University. I have wished especially to see an Agricultural College of such character and proportions as would command the allegiance and active support of the farmers of Kentucky. I have wished to see Colleges of Mechanical, Electrical, Civil and Mining Engineering well established and adequately maintained, so manned, organized and conducted that the State University would be recognized as the great engineering school of the South. Agriculture and mining will be for generations to come the predominant industries in Kentucky and well equipped colleges affording the necessary facilities for education in these industrial pursuits must become potent factors in the up-building of the Commonwealth.

I have wished to see the College of Science and the College of Arts so developed that scientists should be made by the one and classical scholars by the other equal

to those made by any college or university in the nation, and the Department of Education has been very near to my heart. Its development and expansion is among the most vital questions that the University is called to consider. The Agricultural College is growing slowly but steadily, but it would grow more rapidly and attract more liberal patronage and do more good for the farmers if it had the more active and effective co-operation of the Experiment Station, one of its most essential departments. Indirectly and to a very limited extent has the Experiment Station been of any advantage to the College of Agriculture. It has interested farmers and farmers' institutes in the results of experimental work along agricultural lines. It has, however, done very little to stimulate among the farmers a desire for agricultural education. The Agricultural College has gotten little or nothing from the Station in the instruction of its matriculates or in the inspiration which comes from contact with living agricultural specialists. The Agricultural College has not gotten from the establishment and endowment of this Department under the Hatch Act what the Federal Government, the Commonwealth and the University had a right to expect. I give you a solemn warning now and here in this my last official utterance as President, that you cannot afford longer to neglect this matter and allow things to drift and crystallize apart as they have been doing. The Experiment Station is by law not a self-contained unit, but an integral and essential department of the Agricultural College, and should bear a large part in its up-building and devel-

opment, instead of standing apart in a quasi-benevolent attitude. Measures for more effective co-operation are, I understand, under consideration, from which let us hope substantial results may follow. Be it remembered that land-grant colleges received their original endowment from Congress with the express purpose and intention that they should build up strong colleges of Agriculture and the Mechanic Arts. In the latter, as interpreted by the different phases of engineering, we have achieved our most marked success. Our graduates in engineering have been in demand for years. The high grade of work which they have been and are capable of doing places them in the first rank of engineers in America.

While our scientists and classical scholars have stood well to the front and take rank as the best, their numbers are and have been relatively small, the engineers in numbers leading the way. Of the two, viz: The College of Science and the College of Liberal Arts, the former is the better equipped for work. In Mathematics, Physics, Chemistry, Botany, Biology and associated subjects it is and has been strong, but its courses of study do not attract matriculates for the degree. The B.S. degree is not sought as it should be and yet graduates in science are in great demand all over the country. The A.B. course, though the weaker of the two in some essential subjects, yet attracts and graduates more matriculates than the B.S. course does. Until a year ago it was weak in Greek. This defect has been redressed by the establishment of a separate chair in Greek under Prof. Terrell, a very competent scholar and

successful teacher. The Department of Latin has been made an independent chair under the charge of Professor Jones, an excellent scholar and a capital teacher. The Department of History and Economics has been materially strengthened during the last two years, but it needs further expansion in order to bring it up to the level of modern requirements. This can I think be further enlarged during the coming year. The weakest element in the Arts course for years has been in Logic, Metaphysics and Ethics. These have been taught for some years, first by Prof. Shackelford and latterly by Prof. Mackenzie, as incident to, but by no means cognate with the subjects that make up the course in English. Their inclusion in the Department of English, which was intended to be temporary and provisional only, has, in consequence of the lack of funds wherewith to constitute special and adequate provision for their instruction, taken time from the Department of English which it needs for its own proper work. The establishment of a separate, self-contained and independent chair of Logic, Metaphysics and Ethics I now regard as a fundamental and urgent necessity. With the courses in Latin and Greek enlarged, the course in History, Sociology and Economics developed and a course in Logic, Metaphysics and Ethics added, the Arts course would be as strong as any in the country. A strong course in liberal arts is recognized by the best authorities on education as the best means for the attainment of the mental discipline necessary for the preliminary training which makes the more technical courses effective, the best means for laying the foundation on which an intelligent course in law should be based, the best means for the necessary training in jour-

nalism, authorship, the diplomatic and consular service, statesmanship, good citizenship, and above all providing the culture essential for a gentleman. Men and women are intended to be producers in the world of mind not less than in the world of material things. In an age devoted to material production, it is often forgotten that

"On earth there's nothing great but man;

"In man there's nothing great but mind."

All industrial activity, all material production, all the conquests of man over nature, ought to be regarded not as ends in themselves, but as means for the growth of the intellectual faculties, the development of the moral powers, the expansion and enlargement and perfection of the soul.

To the Vice-President I leave to report the more technical details of the university administration during the year now brought to a close.

To my successor you and I are both pledged to give a hearty and unanimous support, in order that he may build wisely on the foundations which have been well and truly laid.

With much respect,

Your obedient servant,

See p. 3 on loss of enrollment

35 meeting
May 31, 1910

Lexington, Ky., May 23, 1910.

To the Board of Trustees
of the State University.

Gentlemen:-

By your honorable body I was made Vice-President of this institution June 1909. In accordance with the desire expressed by President Patterson at that time that he be relieved of active service, a large part of the administrative duties of the past year were assigned to me. President Patterson made his report to you in December, and has, as in former years, prepared a report for your consideration at your meeting the last of this month. As he has kept in rather close touch with the administration, I presume that his report covers nearly or quite every department of this institution. I therefore make my report brief. With it I transmit the reports of the heads of various departments of the University, including that made by Dr. Scovell of the Experiment Station. These reports will show that the year now closing does not differ greatly from its immediate predecessors either in the quantity or the quality of the work done.

The number of our matriculates is not increasing as it did a few years ago. In fact, it is decreasing, although the chief decrease is due to the elimination of the Normal Department two years ago. Omitting Summer School students who, with relatively few exceptions, were preparing for entrance examinations or were removing conditions in their college work, the following

table shows our attendance for the past three years:

	1908	1909	1910
College	476	457	473
Academy	115	188	155
Special & Short Courses	26	80	96
Normal	182	0	0
Totals	799	725	724

Omitting Normal, Special and Short Course students, the following table shows our attendance by classes during the same period:

	1908	1909	1910
Freshmen	142	149	152
Sophomores	133	112	100
Juniors	86	113	90
Seniors	87	72	93
Post-graduates	28	11	38
Academy	115	188	155
Totals	591	645	628

In the above classification I have for 1909 included as Juniors 27 first-year law students and for 1910 I have included as Sophomores 20 first-year law students and as Seniors 26 second-year law students. It is perhaps proper that I should remind you that the two-years law course received its first students in September 1908, and that the law course has now been extended to three years. Collegiate students, omitting those in law, show the following changes during the past three years:

	1909	1909	1910	Gain	Loss
Arts & Sciences	125	118	107		18
Agriculture	18	15	20	3	
Civil Engineering	104	84	87		17
Mech. Engineering	192	162	151		41
Mining Engineering	18	21	27	9	
Education	19	30	35	16	

I have no satisfactory explanation of these losses, which are possibly due to several causes. We are planning an active campaign this summer in presenting to the people of our state the superior advantages now offered by the State University. With the hope of materially increasing our attendance, the co-operation of a large part of our faculty has been requested and many of our professors are entering on this work with enthusiasm.

We desire especially to secure high-school graduates and to this end I believe we can well afford to offer free tuition, in all departments except Law, to all graduates of four years high schools. This offer will place a premium on graduation from high schools and in this way it will be a potent factor in building up and strengthening these schools - a thing earnestly desired by every citizen of Kentucky who is interested in education.

The number of hours of work per week required of our students is from ten to thirty percent greater than is required in many other colleges and universities. Although our institution is a small one, I am constrained to believe that the work done by our students will compare favorably in quality, as well as in quantity, with that

done in larger colleges and universities. Most of our professors and instructors have a normal amount of work, but in some departments the work is comparatively light. This is particularly the case in the Teachers' Collège. Although the number of students in this College is increasing, as has been shown in this report, the teaching done by its professors does not occupy their full time. Dr. Snow, the Dean of the Department, has been travelling in the interest of the University most of the past session. I scarcely know what to say regarding his work thus far. Sufficient time has perhaps not elapsed to judge of the fruitage and yet I was somewhat disappointed that we had not some teachers to matriculate with us in January as the result of his travels during the fall and early winter. Prof. Noe's work has been light through no fault whatever of his. He is a good teacher and willing to take his full share of work. Assistant Prof. Gillis has been an untiring worker. He has, in addition to classes assigned him by Dean Snow, taught some classes in the Academy, and he has worked early and late in gathering statistics by which we may advertise the institution more advantageously than in the past. He is one of the most faithful workers we have. He has during the last month and a half given me much assistance.

One of our most pressing needs is a Registrar. For several years Miss King has discharged some of the duties of a Registrar, but her services as Private Secretary to the President, and recently as Librarian, have

rendered it impossible for her to keep the University records as they should be. With the present enrollment of students, the duties of Registrar will require the services of a competent person on an average of about two hours per day, but it is highly important that this service be provided. I recommend therefore that I be authorized to arrange, with the approval of the Executive Committee, for the services of a Registrar.

Several of our professors, notably Professors Miller and Tuttle, need the services of a typewriter and stenographer. During the last session, Miss King, Miss Hutchcraft, Mrs. Jones and Mr. Lenighan and a Law student, Mr. Moore, have rendered service of this character. Mrs. Jones' full time is needed in the College of Mechanical Engineering. Although Miss Hutchcraft has been giving her time chiefly to the College of Agriculture and Mr. Lenighan to the Business Office, I have frequently called on each of them for service, when Miss King was otherwise employed. Miss Hutchcraft has become an expert stenographer and I recommend that her salary be increased from \$40. to \$50. per month. She can easily secure this salary in the city. I anticipate a heavy correspondence during the summer and will need the full time of a stenographer. (Since writing this portion of my report, I have discussed this matter with Trustees Davies and Stoll and I heartily endorse the plan suggested by them of consolidating the stenographic work in a central office.)

I invite your special attention to what I said in my report as Professor of Mathematics regarding Messrs.

Rees and Downing. Since I wrote that report I have received a request from Prof. Halleck of the Hale High School in Louisville for the services of a man strong in Mathematics. His salary will be \$1000. for the first year with an increase of \$100. per year. Messrs. Rees and Downing have earned advancements and I again urge that their salaries be increased. I have trained them and I know their value. Either of them is well qualified to fill the position under Prof. Halleck.

I close this my first annual report with a request that you appoint a committee of your number to act with a committee from our faculty in taking active steps looking to the protection of the morals of our young men. Lexington is a wicked city - perhaps not the worst place in the world, but temptations of an alluring character are yearly ruining the morals of ~~our~~ young men. Even if only one student each year has his morals corrupted, this should be sufficient to cause us to pause and to consider whether or not we are discharging our duties as educators when we provide for our students able and faithful teachers and costly laboratories. Instead of one, I am constrained to say to you that many young men and boys go home from this city every year with their moral sensibilities blunted and dark spots in their characters which before were unblemished. Gentlemen, I do not wish to make this picture too black. We have in this institution some as fine young men as you can

find anywhere, but I appeal to you in the name of the fathers and mothers at home to unite with the faculty in looking after and safeguarding the lives of innocent boys whose parents are trusting them to your care and to mine.

With great respect, I am
Your obedient servant,

James G. White.

Gentlemen of the Board of Trustees:-

I will now add verbally what has not been incorporated in the paper which I have submitted to your consideration, that when in New York I presented to Dr. Pritchett, on behalf of the Board of Trustees the preliminary conditions for the eligibility of the State University to the benefits of the Carnegie Foundation, viz:

1st. A certified copy of the formal application made by the Board of Trustees.

2nd. The formal approval of the Governor of Kentucky.

3rd. The joint resolution passed by the General Assembly of the Commonwealth of Kentucky endorsing the application of the Board and the approval of the Governor.

The President of the Foundation informed me that these were entirely correct in matter and in form, but he added in substance as follows:

"If your Board of Trustees select a man as your successor in the presidency who has not had the benefit of a collegiate or university education and who has had no experience whatever in the organization of university work and no administrative or executive experience thereon, I could not think under these conditions of recommending at present to the Executive Committee of the Board of Trustees of the Carnegie Foundation that the State University be placed upon the list of its beneficiaries."

Thus you see, gentlemen of the Board, we shall be placed at a manifest disadvantage through loss of prestige in our own Commonwealth and through loss of prestige in the Association of Agricultural and Mechanical Colleges and Experiment Stations, and more important still, in the Association of American State Universities. We shall virtually be placed in quarantine and not allowed to land until we can show a clean bill of health.

REGULAR June Meeting of Board of Trustees of State University of Kentucky, held at the office of the President, Gymnasium Building, Lexington, Ky., beginning May 31st, 1910, at 10-30 A.M.

In the absence of Gov. Willson, upon motion of President Patterson, duly seconded and carried Mr. C. M. Clay was elected temporary chairman, and took the Chair.

The roll call showed the following:

Present: Messrs/ Atkinson, Carpenter, Clay, Edelen, Nichols, Patterson, Stoll, Terrell, Turner, White, Walker, Cox, Wathen and Regenstein, 14

Absent: Messrs. Willson, Smith, Davies, Barker, 4

There being a quorum present business was proceeded with.

Upon motion of Mr. Walker, duly seconded and carried all absentees were excused.

At this point Prof. Lewis, of the Sue Bennett Memorial School, of London, Kentucky, came before the board and made a statement about the establishment of a branch school of the College of Agriculture, at said School, and asking the Board to make provisions by which such a school at London would be supplied & from the University with an instructor in agriculture. After informal discussion between Prof. Lewis and the members of the Board, Mr. Stoll offered the following resolution:

Provided the suggestion of the Committee on Budget is adopted relative to the re-organization of the Agricultural College, I move that the question of cooperation with the Sue Bennett Memorial School, be referred to the Executive Committee, with power to act. Said motion was duly seconded by Judge Terrell, and carried.

At this point upon motion of Judge Terrell, duly seconded and carried, the Board adjourned, so as to give the members an opportunity to inspect the grounds and buildings, to meet at two o'clock P.M. of the same day.

Board met pursuant to adjournment at two o'clock P.M. of the same day, at the same place, and same members present.

At this point Mr. Atkinson was sworn in as a trustee by Mr. Stoll, as a Notary Public.

The Secretary then read the minutes of the last semi-annual meeting and the special meeting of the Board, which without objection stood approved as read.

✓ The Secretary then read the minutes of the Executive Committee, ~~minutes of the Executive Committee~~ of meetings held since the December meeting of the Board, which, without objection, stood approved as read.

Upon motion of Mr. Walker, duly seconded and carried the Minutes of the Faculty, and the minutes of the special faculties since the December meeting of the Board, were referred to the Committee on Minutes of the Faculty without being read in the Board.

At this point President Patterson presented his Report, which is ✓ as follows: (Mr. Frazee: Here copy President Patterson Reports in full, which I herewith return to you, and which you will find consist of a signed paper, and another sheet attached thereto.)

Said report was by the Chairman referred to the Committee on President's report.

At this point Acting President White, presented his report, which is as follows: (Mr. Frazee: Here copy Prof. White's report, which I herewith hand you.

Said Report was by the Chairman referred to the Committee on President's Report.

At this point Mrs. James Mulligan appeared before the Board, President Patterson being absent, and made a statement with reference to a proposed monument to be erected on the University Campus to President, James K. Patterson, at a cost of about \$10,000, and asking from

the Board and appropriation for said purpose. After an informal discussinn between the ~~Board~~ members of the Board and Mrs. Mulligan, she retired, and thereupon Prof. White offered the following resolution:

Resolved that in recognition of the life work of the illustrious head of this University, we commend the movement for the erection on the University Campus of an appropriate statue of President James K. Patterson, and that we hereby pledge ourselves to use our best efforts with the next Legislature of Kentucky to secure an appropriation of \$10,000 for the erection of said statue.

Said motion was duly seconded, and carried unanimously.

Upon motion of Mr. Walker, duly seconded and carried, the Reports of the Treasurer and the Business Agent were referred to the Finance Committee without being read before the Board.

Upon motion of Mr. Walker, duly seconded and carried, the minutes of the Board of Control since the December meeting of the Board were referred to the Committee to Nominate a Board of Control, without being read before the Board.

At this Point the Chairman appointed the Standing Committees, as follows:

Com.on President's Report: Messrs. Cox,Chm.,Barker and Carpenter;

Com. on Finance: Messrs. Nichols, Atkinson and Regenstein;

Com. on Appropriations; Messrs. Atkinson,Chm.,Carpenter and Nichols;

Com. on Experiment Station:Messrs. Walker, Chm.,Nichols, Patterson;

Com. on Salaries; Messrs. Patterson,Chm.,Stoll,Davies,

Com. on Internal Expansion:Messrs. Terrell,Chm.,Davies, Stoll;

Com.on Military Instruction

and College Discipline: Messrs.Stoll/Chm., Walker, Carpenter;

Com. on Minutes of Faculty: Messrs. Regenstein,Chm.,Terrell,Turner;

Com.to Nominate Executive Com.,Messrs. Barker,Chm.,Edelen, Walker;

Com.to Nominate Board of Control: Messrs.Turner,Chm.,Cox, Edelen.

At this point Mr. Nichols made the Report of the Executive Committee, acting as a special Committee on Budget, which is as follows:

(Mr. Frazee: Here copy this Report, which consists of some five pages of typewritten matter, marked at the top by me in pencil "A", and on the back "Report of Com. on Budget", and which I herewith return to you.)

~~Where~~ President Patterson moved the adoption of the report as a whole, which motion was seconded by Mr. Wathen, and upon the roll-call the vote stood as follows:

Ayes: Messrs. Atkinson, Carpenter, Clay, Nichols, Patterson, Stoll, Terrell, Turner, White, Walker and Wathen, 11

Noes: None.

The motion was unanimously carried.

Upon motion of Mr. Stoll duly made, seconded and carried the Board at this point adjourned to meet to-morrow morning, June 1st, at 9-30 A.M.

Board met pursuant to adjournment at 9-30 A.M., June 1st, 1910, at the same place. The roll-call showed the following members present:

Present: Messrs. Atkinson, Carpenter, Clay, Edelen, Nichols, Patterson, Stoll, ~~xxxxx~~ White, Walker, Cox, Wathen and Regensten, 12

Absent: Messrs. Willson, Davies, Smith, Terrell, Turner, Barker, 6

A quorum being present business was proceeded with.

Mr. Walker presented the Report of the Committee on Experiment station, which is as follows: (Here copy said report which is herewith returned, marked at the top in ink with the letter "D".)

~~Where~~ Mr. Nichols moved that the report be adopted, which motion was seconded by Mr. Atkinson, and upon the roll-call the vote stood as follows:

Ayes: Messrs. Atkinson, Carpenter, Clay, Edelen, Nichols, Patterson, White, Walker, Wathen, Regensten, 10

Noes: None.

The motion was unanimously carried.

Upon motion of President Patterson, duly seconded and carried the Chair appointed the Board of Visitors called for in the 27th paragraph of the Report of the Executive Committee, acting as a special Committee on Budget, and appointed the following named persons: President Patterson, Chairman, and Messrs. Regenstein and Walker.

Mr. Walker, made the report of the Committee to nominate an Executive Committee, and reported that the Committee nominated the present Executive Committee, to be the Executive Committee for the ensuing year, to-wit: Messrs. C. B. Nichols, Chairman, C.M. Clay, Judge Claude Terrell, R.C. Stoll, and Hywel Davies.

Upon motion duly made, seconded and carried unanimously, the report of the Committee was adopted, and the above named persons elected as the Executive Committee for the coming year.

Upon motion of President Patterson, duly seconded and carried, Major R. S. Bullock, was re-elected as Treasurer of the College.

Upon motion of Mr. Walker, duly seconded and carried, Mr. D.C. Frazee was re-elected to the position of Business Agent of the University.

At this point President Patterson stated that it had been the custom of the Board to elect new men to positions for one year, and at the end of that year ~~xxxxxxx~~ if they prove satisfactory, to re-elect them to their respective positions, to serve at the pleasure of the Board, and that in accordance with this custom it is proper at this time to present to the Board the names of certain professors and assistants for re-election, and moved that Prof. Glanville Terrell be re-elected to the position of Professor of Greek; that Prof. Louis Franklin Snow be re-elected dean of the Department of Education; that ^{William J. Carrel} ~~Daniel x x x Terrell x~~ to the position of ^{Associate Professor} ~~Chief Assistant~~ in the Department of Civil Engineering;

that James T.O.Noë, be elected to the position of Associate Professor in Department of Education; that Columbus R. Melcher, be elected to the position of Associate Professor of French and German; that Joseph M.Davis be re-elected to the position of Associate Professor of Mathematics; that that Miss Sue D. McCann be re-elected to the position of First Assistant in Entomology and Zoology; that William S. Webb, be re-elected to the position of Assistant professor of Physics; ; that James E. Tuthill be re-elected to the position of Assistant Professor of History and Political Economy; that Louis Edward Mallau, be re-elected to the position of assistant in Drawing and Shop Work; that Robert C. Terrell be re-elected to the position of Assistant Professor of Rural and Highway Engineering; that ~~xxxx~~ Harry D. Easton be re-elected Assistant Professor of Mining Engineering and Metallurgy; that Alfred H. Gilbert be re-elected to the position of Assistant Professor of Botany; that Ezra L. Gillis be re-elected to the position of Assistant Professor of Education; that Edward F. Farquhar, be re-elected to the position of Assistant Professor of English; that Thomas J.Barr be re-elected to the position of Assistant Inspector of Mines and Assistant in Mining Engineering; that Lloyd C. Daniels, be re-elected to the position of Assistant in Chemistry; that Ralph D. Quickel, be re-elected to the position of Assistant in Mining Engineering; thatRobert H. Spahr, be re-elected to the position of Assistant in Physics; that Harold H. Downing be re-elected to the position of Assistant in Mathematics and Physical Education; that Elijah L. Rees be re-elected to the position of Assistant in Mathematics; that Arthur M. Elam be re-elected to the position of Instructor in Steam Laboratory; that Knox Jamison and Alfred G. McGregor be re-elected to the positions of Assistants in the Academy; that Clarence R. Egelhoff be re-elected to the position of Assistant in History; that ~~Leonard B. Walker~~ ^{Marion Rexford Schnatter} be re-elected to the position of Assistant in the Academy.

Said motion was seconded by Mr. Walker, and passed unanimously.

At this point Mr. Eubanks came before the Board and made a statement about the movement to erect a monument to President Patterson, recommending that the Board of Trustees appoint a Committee one from each Congressional District in the State, to solicit subscriptions for this monument. No action was taken on same at this time.

Gov. Cox reported for the Committee to Nominate a Board of Control, that the Committee nominated the present Board for the ensuing year, to-wit: R.C. Stoll, Chairman, L. L. Walker, C.B. Nichols, Acting President of the University and Director of the Station.

Upon motion of Mr. Walker, duly seconded and carried the report of the Committee was received and adopted.

At this point President White presented to the Board the matter of remitting the fees of student A.F. Baker, in the Law Department, stating that Mr. Baker was unable to pay his fees. After some informal discussion, President Patterson offered the following resolution:

Ordered that A.F. Baker, be required to execute his note to the Treasurer of the University, due one year hence, for the tuition fees due in the department of law, \$30, to be renewed if unable to meet his obligation at maturity.

Said motion was seconded by Mr. Walker, and carried unanimously.

At this point President White presented the matter of the degrees recommended by the faculty to be conferred at this time, ~~said recommendations being as follows: (Mr. Frazee, get from Prof. White the list of graduates, and copy same here.)~~

and unanimously carried
Upon motion of Mr. Walker, seconded by Mr. Edelen, the faculty are directed to confer the following degrees upon the following named persons: (Mr. Frazee: Get from Prof. White the printed list of graduates and copy here)

President Patterson presented a communication from a representative of the U.D.C. of Kentucky, and President White presented a request

from the local Chapter of the U.D.C., with reference to the granting of scholarships in the University, and after considerable informal discussion, President Patterson offered the following resolution:

Resolved that the Board of Trustees of the State University concede two scholarships in the State University to the State organization of the U.D.C., tenable until the completion of the course of study upon which the holders of the scholarships enter.

Said resolution was duly seconded and carried unanimously.

Governor Cox reported orally for the Committee on the President's report as follows: We wish to commend the most excellent report of President Patterson. There is one feature of the report that we most especially desire to commend, and that is the consolidation of the Agricultural Department and the Experiment Station. We think this is very necessary, and the time has come when such a thing should be brought about. We commend the report in its entirety.

The report of the Acting President we also commend. The recommendations made by him in regard to salaries, we ask be referred to the Committee on Salaries. We approve the report.

Upon motion duly made, seconded and carried, the report was received and approved.

The part of the Report with reference to the relations between the Agricultural Department and the Experiment Station is referred to the Special Committee composed of the Executive Committee and the Board of Control, for the purpose of consolidating and re-forming the Agricultural Department.

At this point President Patterson stated that the Committee which had been appointed at the meeting in Frankfort on February 3rd, to notify Judge Barker of his election to the position of President had not made a formal notification to Judge Barker, ~~at the regular meeting~~, and

that Judge Baker had expressed his desire that the formal notification be postponed until the meeting of the Board in June; that Judge Barker was now present, and ready to come before the Board, ~~xxxx~~ and that this would seem to be an appropriate time to make the formal notification in the presence of the whole board.

Thereupon the Board stood upon one side of the room; Judge Barker came into the room, and standing on the other side, President Patterson made the formal notification in these words:

(Mr. Frazee here copy President's Patterson's address, which he will hand you.)

Judge Barker replied to the notification as follows:

(Here copy Judge Barker's reply, which I herewith return to you.)

Upon motion duly made, seconded and carried the report of this special Committee was received, and approved, and the whole proceeding ordered spread at large upon the minutes, as appears above.

Upon motion of Mr. Stoll, seconded by Mr. Walker, and carried unanimously, Judge Barker's Acceptance of the office of President of this University is accepted, his term to begin on January 1st, 1911.

Upon motion of Mr. Walker, duly seconded and carried, the Chairman was directed to appoint a committee to confer with the authorities of the city of Lexington and County of Fayette, in regard to the moral conditions in Lexington, ^{in connection with the} ~~with reference to the~~ student body.

Thereupon the chairman appointed as such Committee, President White, Mr. Stoll and Mr. Walker.

Mr. Stoll, reported for the Committee on Military Instruction and College Discipline orally that a year ago this Committee had made a full report recommending the establishment of a ^{Course} ~~department~~ for military instruction; that this report had been referred to the Faculty, with direction that the faculty report back on same to the December meeting of the

Board; that this had not been done; and the Committee now recommends that this ~~xxxx~~ report referred to as made a year ago be now referred to the Faculty with direction to report on ~~same~~ to the Executive Committee on the establishment of a military course, and give the Executive Committee power to act.

Without objection the report of the Committee was adopted.

Upon motion of Mr. Stoll, ~~xxxxxxxxxxxx~~ duly seconded and carried, it was declared to be the duty of the Secretary of this Board to transfer to the ~~Fxxx~~ President of the University for delivery to the faculty a copy of ever resolution of the Board, which is directed to be referred to the faculty; and further that it shall be the duty of the Secretary to transmit to the Executive Committee at the next meeting of the Board after the adjournment all matters which are referred to the Executive Committee by the Board.

At this point Mr. Stoll presented a communication from Mrs. Stout, Dean of Women, with reference to certain differences between herself and the Faculty Athletic Committee, ~~xxxxxx~~ about the basket-ball work of the girls, which communication was by the Secretary read to the Board.

Before the reading of said communication was completed the Board upon motion duly made, seconded and carried adjourned until 2-30 P.M. of the same day.

Board met pursuant to adjournment at the same place, and same members present.

The reading of Mrs. Stout's communication was completed.

Upon motion of ~~xxxx~~ Nichols, ~~duly seconded and carried the matter~~
of the salary of Miss Hutchcraft, was referred to the Executive
Committee ~~with power to act~~

Mr. Walker moved that the salary of Miss Hutchcraft, stenographer,

be raised to \$50 a month, instead of \$40.

Said motion was duly seconded, and being placed upon ~~the~~ its passage, the vote on the roll-call stood as follows:

Ayes: Messrs. Atkinson, Carpenter, Clay, Edelen, Nichols, Patterson,
Terrell, Turner, White, Walker, Cox Walker and Barker, 13

Noes: None.

The resolution was unanimously carried.

At this point President Patterson offered the following resolution:

That ~~while~~ without any expression of opinion on the merits of the controversy, and while expressing regret that any difference of opinion has arisen between the Professor of Physical Education for women, and the Committee on Athletics in regard to their respective duties and the scope of their jurisdiction, the Board of Trustees affirm that the head of the Department of Physical Education (and Dean of Women) equally with the heads of Departments and Deans of Colleges, is the sole and exclusive judge of the conditions attaching to physical education, and physical condition and physical qualifications of all who compete in match games in athletics; and that the authority with which she is invested may not be traversed or set aside by any other head of Department or Committee, subject only to the control of the Executive Committee and the Board of Trustees.

Said motion was duly seconded, and carried unanimously.

At this point a communication was read by the Secretary from Mrs. Stout, Professor of Physical Education for Women, with reference to a proposition of Baroness Rose Posse, of Boston, Mass., to bring the Posse Gymnasium, of which she is directress, to Kentucky, and attach same to the State University.

Upon motion of Mr. Walker, duly seconded and carried, the communication was referred to a committee of two composed of President Patterson and Judge Barker, to look into the standing and condition of the Posse Gymnasium, and the advisability of dealing with Baroness Posse, and

report back to the December meeting of the Board.

Upon motion of Mr. Stoll, duly seconded and carried, Judge Barker was appointed as a member of the Committee on Apointments in place of Prof. Grabbe, who is no longer a member of the Board.

Upon motion duly made, seconded and carried, the Board then adjourned sine die.

The Committee appointed on the Experiment Station submit the following report:

We have examined the Experiment Station as well as the limited time afforded and we concur in all the recommendations of the Director and we ask their adoption, namely:

That the appropriations from the Hatch and Adams Acts, the incomes from the Fertilizer, Food and Feed Control Work, and Farm, and any interest accruing from these accounts, be appropriated by the Board for the use of the Station.

In accordance with the generally rule, the salaries of the heads of departments and assistants of the Station be fixed, beginning July 1, 1910, as per the following schedule and we ask its adoption:

M. A. Scovell	\$4800.00
A. M. Peter	2400.00
H. E. Curtis	2400.00
H. Garman	2400.00
R. M. Allen	2200.00
J. O. LaBach	2200.00
J. D. Turner	2100.00
Miss M. L. Didlake	1600.00
S. D. Averitt	1700.00
O. M. Shedd	1600.00
J. W. Nutter	1300.00

Miss Lillie Liston	\$840.00
E. C. Vaughn	1300.00
George Roberts	2000.00
E. S. Good	2100.00
Miss O. L. Ginochio	900.00
H. D. Spears	1600.00
J. W. McFarlin	1500.00
B. F. Scherffius	1500.00
Miss Anna Wallis	720.00
Farm Superintendent	900.00
Miss Katharine Hopson	720.00
E. Kinney	1300.00
W. C. Mathews	600.00
T. R. Bryant	1200.00
Fertilizer Chemist	-----
L. A. Brown	2000.00
Drug Inspector	1200.00
John I. Claybrooke	1200.00
B. D. Wilson	900.00
D. J. Healy	1900.00
Miss R. B. Nutter	480.00
Ass't. in Co-operative work	900.00

We concur with the Board in the matter of an addition to the present Station Building and recommend that the Board of Control be authorized to make such an addition.

At the April meeting of the Board, Dr. Daniel J. Healy was elected Chief Bacteriologist of the Food Division, upon recommendation of the Director, and we ask that this election now be confirmed.

We recommend the election of Professor George Roberts as Agronomist of the Station to take the place of Mr. W. H. Scherffius, resigned.

Respectfully submitted.

We, your Committee appointed to recommend to ~~you~~ ~~honorable~~ the Board, a proper apportionment between the various departments of the balance of the $\$200,000^{\frac{00}{100}}$ appropriation after paying our debts for building & equipment already completed, beg leave to make the following report, to wit: After careful calculation we find that to ~~liquidate~~ pay off the existing debt will require ~~right~~ ^{about} $\$100,000$, leaving $\$100,000$ to be divided among the several departments.

After a careful consideration of the subject, we suggest that $\$50,000$ be appropriated to Physics & Civil Engineering for a building & equipment; that $\$15,000$ to Mining Engineering;

to the Chemical department, and
to the Mechanical & Electrical ^{department}

for a building & equipment. We also report that the first available ^{after paying debt} funds ^{will} be devoted to the Physics & Civil Engineering building & equipment. ^{the first available funds} ~~There will be about~~ ^{about} $\$33,333^{\frac{00}{100}}$ payable July 1st 1909. The balance of the $\$100,000$ apportioned as above will be payable by the state over

We your Committee appointed
 to recommend to the Board, a proper
 apportionment between the various departments
 of the balance of the \$200,000 appropriation
 after paying our debts for buildings & equip-
 ment already completed, beg leave to make
 the following report, to wit; After
 careful calculation we find that to pay
 off the existing debt will require about
 \$100,000⁰⁰ leaving unexpended \$100,000⁰⁰
 to be divided among the several depart-
 ments. After consideration of the subject having
 heard the heads of departments & others, we
 suggest that \$50,000⁰⁰ be given to the civil engineering
 and physics departments for one building &
~~equipment~~; that \$15,000⁰⁰, to the mining
 engineering department, for a building & equipment.
 ; that \$25,000⁰⁰ be given to the chemical
 department for a building & equipment.
 and that \$10,000 be appropriated to the mechanical
 & electrical department, for a building & such
 (over)

equipment & machinery, as the dean of such
department may in ^{this} discretion ~~may~~ ^{select} ~~may~~ need
for the said department. We also recommend
that the first available funds, after paying the debt,
be devoted to the Physics & Civil Engineering
departments for that said building & equipment.

The first available funds for this purpose
will amount to about \$33,333, and will
be ~~payable July 1st~~ payable July 1st
1909. The balance of the \$100,000 appor-
tioned as above, will be payable by the
State July 1st. 1910.

C. M. Clay.

James K. Patterson

Charles J. Hull

[9/10]
?

President Patterson stated to the Executive Committee that he had handed in his resignation to the Board of Trustees to take effect sometime between the first day of January, 1910 and the first day of July, 1910, at the option of the President and that the Board had accepted his resignation to take effect at his said option. The President stated that on the 15th day of January, 1910, he was appointed a member of the Board of Trustees of the University and that he desired his resignation to take effect on said date; that he has settled with the University for all sums due him as President of the University up to January, 15th and that on said date he was admitted on the Carnegie Foundation and would receive the benefits from said foundation beginning January 15th, 1910 and that from said date he only expected the University to pay him the sum agreed upon by the Board of Trustees as a retiring allowance, it was thereupon moved, seconded and unanimously carried that the resignation of President Patterson be accepted as of January 15th, 1910.

Thereupon Professor White, Vice-President of the University was directed to assume and exercise the functions of President of the University until the new President should take his seat or until further orders of the Executive Committee or the Board of Trustees.

It was resolved that the diplomas given to those receiving degrees in June, 1910, should be signed by James K. Patterson as President of the University.

State University.

James K. Patterson, Ph. D., LL. D., President.

Given in Bd. meeting June 1, 1910

Lexington, Ky., February 7, 1910.

Judge Henry S. Barker, LL.D.,
Kentucky Court of Appeals,

Dear Sir:-

William H. Leaf

Messrs. Richard C. Stoll, Louis L. Walker, Tibbis Carpenter and James K. Patterson have been appointed a committee by the Board of Trustees, at a meeting held in the City of Frankfort, February 3rd, 1910, to inform you that you were upon the date above mentioned elected to succeed James K. Patterson as President of the State University of Kentucky, and to request that your pleasure in the premises shall be made known to the Board at its annual meeting in June of the current year. This duty we now have the pleasure to discharge.

The most responsible office in the University has by the Board of Trustees been conferred upon you, an office second in dignity and in importance and in far-reaching consequences to none in this Commonwealth. The foundations of the University have been well and securely laid. Its period of probation is already past. It has established a prescriptive claim to life and maintenance. Its organization is compact and effective, its staff of instruction able and energetic, its revenues increasing every year with the growing resources of the Commonwealth and the increasing liberality of the General Assembly. While differences of opinion have existed upon policies and expediency, there are no embarrassing lines of cleavage and factions are non-existent. It will

State University.

Jan. K. Patterson, Ph. D., LL. D., President.

Lexington, Ky.,

-3-

be with you to perfect and enlarge this organization, to stimulate and encourage its staff of instruction, to augment its revenues and to prevent the growth of faction and mutual distrust, to co-ordinate all its activities to the attainment of the end for which it exists.

The University is an agency created by the Commonwealth for a definite end, viz: The education of her sons and her daughters. It differs in kind from all other institutions created and maintained by the State. It is neither penal, nor reformatory, nor eleemosynary. Sentiment may and should occupy a prominent place in the management of these but in the up-building and conservation and development of a State University, it occupied quite a subordinate place. All the activities of the University are based upon the principle of a quid pro quo of competency, economy, efficiency, a definite quantum of capable service for a definite cash equivalent. Sentiment finds no place in the loans and discounts of a banker, in the judicial deliverances of the bench, in the operations of the stock exchange, in the management of steamship and railway companies. All these transactions are based upon the exchange of equivalent values. So with the conduct of a University. Trustees and governing agencies appointed by them apply to public uses funds not their own but the property of the public. They administer a trust, not for their own benefit, and the benefit of their friends, but for the benefit of the public at large. The

State University.

Jas. K. Patterson, Ph. D., LL. D., President.

Lexington, Ky.,

-3-

idea of trusteeship and all that it involves is often ignored. Trustees and their employees are appointed too often on other grounds than integrity, capacity, efficiency. The public too has come to believe that a public institution is a legitimate object of public plunder, that it owes to unfortunates and incompetents and favorites and dependants a living and feel agrieved if sinecures are not provided for them. The appeal is made to the sentimental and sympathetic side. If conceded, the object of the foundation is frustrated and the public, in whose behalf the trust should be administered, suffers. I have not been devoid of experience along this line. Neither will you. The remedy is that the policy of the University should be dictated by a sense of duty alone and that economy and efficiency and integrity should be the guiding principles of action.

You can make or mar the State University. If you hold the reins with a strong hand, if your colleagues know ^{and firmly,} that you govern discreetly, wisely, that you are not simply primus inter pares, but master, you will secure a ready acquiescence and co-operation, but to this end your colleagues and your trustees must know that you are dominated by a sense of justice and of duty and that your path is a path of rectitude. Then will the State University grow and flourish, lengthen its cords and strengthen its stakes, rooting itself in the affections of the public and receiving from a generous

State University.

Sam. K. Patterson, Ph. D., LL. D., President.

Lexington, Ky.

-4-

Legislature and from an intelligent executive and from an appreciative public all that it needs to make its work effective and glorious.

You have a great opportunity. You are called to preside over the destinies of an institution which ought to be a chief factor in the progress and development of Kentucky. Within these walls will be educated the men and the women who will realize for themselves, for their contemporaries and for posterity the vast resources, agricultural and mineral, which a bountiful nature has provided. Within these walls will be educated the men and the women who by moral power and cultivated intellect and spiritual insight shall interpret nature in harmony with the principles of a rational philosophy, recognizing the fatherhood of God and the brotherhood of man. It will be your duty to instruct, to guide, to direct, to co-ordinate all these activities, material, mental and moral, to the end that latent potencies may be vitalized, moral instinct quickened, spiritual insight deepened and strengthened and purified and exalted.

With intellect of a high order, you will bring to the discharge of your responsible duties a judicial mind, a knowledge of men and of affairs, business capacity, a sound morality, courtesy and integrity, important qualities in administration, and when you shall have completed your work and laid down the duties of your office, to be succeed-

State University.

Jas. K. Patterson, Ph. D., LL. D., President.

Lexington, Ky.,

-5-

ed by another, may the verdict of your contemporaries and of posterity not be that of the greatest of Roman historians on one of the best of Roman Emperors: "Major privato visus dum privatus fuit et omnium consensu capax imperii nisi imperasset."

Deeply conscious of the responsibilities of the hour, while congratulating you on your election, this committee pledge the support of the Board of Trustees to make your administration successful, hoping and believing that with the aid of Divine Providence, you will make good and upon your retirement leave the University on a higher level than it has yet attained, loved at home and respected abroad.

REPORT OF COMMITTEE ON BUDGET.

- 1 - That the Budget shall be specific only as to the salaries and necessary general supplies consumed during the year, and that the remaining things required by the University shall be purchased under the direction of the Executive Committee.
- 2 - That the Executive Committee shall approve all purchases before the same are made.
- 3 - That the stenographic force be concentrated in one office, and made sufficiently mobile to serve all departments, as directed by the President or Acting president.
- 4 - Miss King to serve as Librarian, and stenographer to Dr. Patterson. One half of her salary shall be paid out of the appropriation for the Carnegie Library, and the other half out of the funds of the University.
- 5 - That the library hours shall be fixed by the faculty; and if student help be needed for the evenings, the President or Acting President shall arrange for same.
- 6 - That the office of Registrar be filled out of the present University staff by the President or Acting President.
- 7 - That Acting President White's salary shall be ^{at the rate of} \$3,000.00 ^{per year}, beginning the 15th of January, 1910, ^{so long as he is acting President}
- 8 - That the President or Acting President shall appoint a custodian for each building, who shall have general charge of the cleanliness, heat, light and water, and general welfare and condition of each building of which he is custodian, with the approval of the President of the University, and that janitors shall be employed and discharged by the custodian of each building, with such approval of the President or Acting

President, and that the janitors shall be subject to the orders of the custodian. The salary of each janitor shall not be fixed by the custodian, but shall remain as now fixed unless changed by the Executive Committee.

9 - That the Board of Control of the Experiment Station, and the Executive Committee of the State University, shall act as one Committee, with full power to ^{reorganize} ~~reorganize~~ the College of Agriculture, and in this re-organization it shall have power to consolidate or to bring into closer relationship the present college of Agriculture, the Department of Domestic Science, and the Experiment Station. The real importance of the College of Agriculture does not seem to be appreciated, and a vigorous campaign shall be conducted as soon as the relation of the Experiment Station and the Agricultural College have been properly reorganized.

10- Establish a chair of logic, metaphysics and ethics.

11- That the President or Acting President, with the approval of the Executive Committee shall have power to reorganize and consolidate the teaching, business and administrative forces as the requirements of classes become evident in order to secure a more efficient and uniform amount of department work between the professors and the instructors.

12- Free tuition in all present departments, except law, shall be given to all graduates of high schools who are eligible to enter the freshman class of the University.

13- That President Barker's salary shall be \$5,500.00, per annum, effective from the date of his installment.

14- That the Business office, the office of the President

or Acting President, as well as the office of the stenographers be located on the first floor of the old chemistry building, which building was formerly occupied by the Kentucky Agricultural Experiment Station; and that so much of said first floor as in the opinion of the Executive Committee is necessary, be used for that purpose.

15- The establishment of a general supply room for supplies, such as ink, pens, stationery, brooms, mops, soap, disinfectants etc., and that these supplies should be bought at wholesale prices, and the supply rooms should be under the direction of the business office.

16- The establishment of a sub-station Post Office on the grounds of the University.

17- That ~~the~~ an additional instructor be employed in the department of mathematics, at a salary to be fixed by the Executive Committee, when needed.

18- That the President or Acting President shall be authorized to canvass the State for students, and he is empowered to use any professor, instructor or student in the University for said purpose; all expenses to be paid by the University, thus carrying into effect the resolution of the Executive Committee heretofore adopted.

19- That the position of Officer of the Day be abolished.

20- That there be installed a program clock, or some other efficient means of heralding exercises.

21- The Director of mechanical engineering shall be required to report to the Executive Committee at its meeting in July, 1910, and every ninety days thereafter, the condition of all

furnaces, grates, heating apparatus, electrical apparatus, lighting appliances and all similar things upon the grounds of the University.

22- That the Executive Committee be requested to have installed meters for water and light in each building so that actual cost of each will be known.

23- Special attention shall be given to the distribution of department bulletins, under the supervision of the Executive Committee.

24- That the profession of each alumnus of the University shall be ascertained, and that all bulletins issued by the University relating specially to such profession shall be mailed to such alumnus; and that all publications relating generally to the University as a whole shall be mailed to every alumnus. All bulletins issued by the University shall be mailed from the business office.

25- The condition of the Educational Department requires special attention, looking to its rejuvenation.

26- That a Secretary of the Board of Trustees be elected, ^{Executive Committee} by the Committee, who shall also serve as Secretary of the Executive Committee, and the Executive Committee shall elect such Secretary.

27- That a Board of Visitors, consisting of three (3) members be appointed to make monthly visitations, collectively or singly of the University grounds and buildings, also recitation rooms and laboratories, in order to report on the character of the work done.

28- That the Dean of each Department shall be held responsible for the fees of students who are admitted without exhibiting

(5)

a receipt from the Treasurer.

Executive Committee

Report of Com
on Budget

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

Presented to the Senate and House of Representatives
at their joint session, on January 10, 1890.

*Pres. Patterson's report submitted to Board of Trustees May 31, 1910
p. 7, 8 - financial conditions*

Lexington, Ky., May 19, 1910.

To the Board of Trustees

of the State University of Kentucky.

Gentlemen:-

I beg to submit to you the following report, covering the period from the beginning of the University year just closing to March 12, 1910 of the current year, the date upon which my resignation was formally accepted by the Executive Committee.

A period of transition is always unsatisfactory. Knowing this, I endeavored so to arrange matters that after my declared intention of last June to resign as soon as I should feel assured of a reasonable prospect for a competent successor, the business of the University could go on without interruption or dislocation. I recommended that the Vice-President should relieve me of some of the burdens of administration until my resignation should become effective, and that he should thereafter, with my advice and aid, discharge the duties as President until my successor should be elected and installed. This recommendation was adopted and under this provisional arrangement the University work has been carried on from June of last year until now. Early in January, I placed my resignation in the hands of Governor Willson, with the request that it become operative January 15, 1910. I notified the Business Agent of this action and made my settlement with him for the half year ending January 15, 1910, Thenceforward becoming the beneficiary of the retiring allowance provided for by the Board of Trustees, instead of receiving a salary

as heretofore. I notified the Executive Committee of what I had done at their next meeting thereafter, viz: March 12, 1910. My action was ratified by them and from that date I consider that I ceased to be President, although Governor Willson has not yet formally accepted my resignation. This report then covers the period from June 1st of last year until March 12, 1910, or a little more than two-thirds of the current university year.

The session opened in September 1909 with a fairly good attendance. There was a shortage in the matriculation as compared with previous years and notwithstanding the addition of the matriculates in the College of Law. The matriculation in the University proper and in the Academy does not show any increase over that of the years immediately preceding, indeed rather otherwise. The matriculation for the last six years is as follows:-

1904-5	705
1905-6	813
1906-7	901
1907-8	1064
1908-9	772
1909-10	684 (exclusive of post-graduates)

It will thus be seen that the maximum attendance attained by the University was in 1907-8. The rapid decline in the two following years, viz. Last year and the year just closing, was due principally to the unfortunate and ill-advised elimination of the Normal Department at the instance and insistence of the Normal Schools by the General Assembly of 1908. I have done all that I could, by addresses to high schools, participation in the proceedings of state, district and county institutes, correspondence, information supplied to superintendents of county schools and by what-

ever other means I could command, to redress the balance and bring up the attendance to the level of 1907. I have, moreover, sent out competent and energetic agents, particularly during the vacation, into the field to address institutes, visit schools and private families and to distribute illustrated posters and booklets, catalogues and other literature. I have had Dr. Louis F. Snow, Dean of the Department of Education, in the field during more than half of the current year, visiting high schools, making addresses, and attending educational assemblies and conventions. I consider this a most important work, indeed an urgent necessity. We must do what we can through the Department of Education to train teachers for the high schools. The General Assembly, in re-establishing by formal recognition the Department of Education, expects the University to do this. The General Assembly looks to the Normal School to provide teachers for the common schools and to the University, through its Department of Education, to supply principals and teachers for the High Schools. We must make our courses in the Department of Education so full, so attractive and so practical, so well administered and so well taught that teachers for the high schools shall find in it all they need and be induced to come hither because of thoroughness, prestige and economy. If we neglect to do this or fail in the effort, students preparing to be teachers in the high schools will go elsewhere to prepare for their work, either to other states or to other colleges and universities in our own state. We shall thus lose

prestige, build up other institutions through our neglect or incompetency and, worse than all, lose both leadership and revenue. So far as our Department of Education is concerned and its relation to high school teachers, we are now at the parting of the ways.

Under these circumstances it will be impossible to think of the discontinuance of the Department of Education, as some have suggested. The same is true of the Academy. The Legislature of 1908 made provision for the elimination of the Academy of the State University as rapidly as educational conditions in Kentucky should warrant. This was done in anticipation of the expected establishment and early maturity of the high schools provided for by the General Assembly of that year. In many of the counties of the Commonwealth high schools are only beginning to be established and their growth and efficiency will necessarily be slow. The legislation of 1893, which is still upon the statute book, makes it obligatory upon the University to receive and matriculate pupils who have graduated from the common schools and have on competitive examination received appointments from their respective county superintendents. Even at the best, the majority of the high schools in the counties where they had not existed before the passage of the high school act, could not take graduates of the common school course and prepare them for the Freshman class of the State University in less than three or four years. The maintenance of the Academy is thus imperative, in order to bridge over the interval between the common schools and the University. We cannot eliminate

the Academy, however much we may desire to do so, until the high schools can do the inter-mediate work. The system of appointment which links the common schools, through the Academy, to the University, is the most popular feature in the legislation which makes the University the head of the educational system of the Commonwealth. Without it we should have been unable to hold the half-cent tax in 1893, and without it we should be unable to prevent its repeal today. It is sincerely hoped that the high schools will, within a reasonable time, attain the necessary efficiency in the work of preparing students for the University. Meanwhile we must keep faith with the state or forfeit both their support and their good will. Twenty-two percent of the under-graduate matriculates of the State University last year were entered in the Academy, and a very considerable proportion of those who entered the University through the Academy came as appointees on competitive examination from their respective counties.

We must now either make a bold effort to recover lost ground and to move forward, or else stand still and fall hopelessly to the rear. We have reached a stage when it will be necessary, in order to justify further appeals to the Legislature, to show more substantial results than we are at present achieving. We are making good scholars, good scientists, good engineers, good agriculturists, but with the means at our disposal we could take care of many more matriculates than we have, and in order to justify further appropriations we must show larger results. The University of Illinois has seven or eight times our income, but it has seven or eight times our number

of students. With twenty percent more of income we could readily take care of twice our present numbers, and be it remembered that numbers count for much, both in the estimation of the Legislature and of the general public, and it is quite apparent that with double our present numbers or treble, we could with a much more hopeful prospect of success importune the Legislature for further endowment.

An Act was passed by the last General Assembly making an additional appropriation for the University of \$20,000. per annum for two years. A like amount and on identical conditions was appropriated for each of the normal schools. The bill was vetoed by Governor Willson after the adjournment of the General Assembly. I think it unfortunate that we were associated with the Normal Schools in a common measure. I feel confident that if we had stood alone we would have gotten a larger appropriation, with less risk of a veto. Many members of the General Assembly with whom I had conversation upon the subject were unanimous in the opinion that we had made a mistake in associating ourselves with the Normal Schools for the introduction of legislation in common. When, therefore, we go before General Assemblies hereafter, whether for money or other needful legislation, we should stand alone. And I will add that all measures brought before the General Assembly for the benefit of the University should emanate from the Committee on Legislation appointed by the Board of Trustees and from them alone.

For years the financial condition of the University has been a matter of grave concern. While knowing within

appreciable limits the aggregate income from various sources, we have not been able to forecast with any degree of accuracy the expenditures for any current year and we have been quite unable to know, within thousands of dollars, what our obligations were at any time. This is not as it should be. The responsible officials of any well-managed corporation should be able and are able to know, at the close of each day, exactly how their accounts stand, viz: Sources of income, incomes realized and realizable, cash on hand, expenditures, fixed charges, outstanding obligations. The Comptroller believes that he has devised a scheme which will clarify the situation. If he can bring order out of the confusion that has reigned for years past, he will deserve the thanks of the Board.

There is an estimated deficit of \$12,000. or \$15,000. at the close of the present fiscal year, and on the basis of the budget of 1909-10 an estimated excess of expenditure over income of \$10,000. or \$12,000. The budget committee is now at work in an effort to make income balance expenditure for the year 1910-11. There are certain fixed charges which can neither be eliminated nor materially cut down. There are others more elastic, for example, appropriations for current expenditures in the various departments of instruction which may be reduced for the next two years, but in this reduction care must be taken not to impair efficiency, either in instruction or administration. One thing, however, is certain, that with a deficit for the present year and an embarrassed exchequer for the next, increase in the existing staff of instruction or administration is, on any sane hypothesis, clearly out of the question. To attempt a re-organization

of the existing staff of administration, which would involve additional units or increased expenditure, would be nothing short of an inexcusable folly. To project the creation of a staff of administration on the scale of the Universities of Ohio, Wisconsin, Illinois, California and Cornell, the income of each of which is seven or eight fold that of ours and the matriculation in the same proportion, would be preposterous. No prudent farmer would think of employing as many hands to cultivate a ten-acre plot as he would to cultivate a farm of one hundred acres. Nor would a manufacturer think of employing as many operatives in a factory of small dimensions as in one the capacity of which is ten times as great. In a bank with a small capital and a small business, one man may be teller, bookkeeper, cashier and president, but let the business increase ten fold or a hundred fold and the principle of the division of labor becomes applicable and may be employed with economy and advantage. Nor would a mine operator give employment to 500 miners, if a hundred be equal to the requirements of the mine. We all agree that economy must be practiced, but each one wishes an exception made in his case, an extra employee, an extra appropriation, extra equipment; and the exception once made multiplies automatically. Economy evaporates in words and at the end of the year we are as badly off as before retrenchment and economy were discussed or attempted. We must get down to business principles and adhere to them, if our corporation is to succeed. Sentiment and finding jobs for persons, however deserving, find

no place in a business enterprise, and I beg to remind you that the State University is a business enterprise and you are appointed to conduct it on business principles. The most obtrusive needs of the State University of Kentucky today are a sound fiscal system, efficient administration and instruction, and the harmonious co-operation of all employees, from the President of the institution down through all its grades and all its relations.

My policy as President of the University has been to build up a well-rounded, symmetrical institution, affording equal advantages and facilities for growth, development and expansion to all the colleges of the University. I have wished especially to see an Agricultural College of such character and proportions as would command the allegiance and active support of the farmers of Kentucky. I have wished to see Colleges of Mechanical, Electrical, Civil and Mining Engineering well established and adequately maintained, so manned, organized and conducted that the State University would be recognized as the great engineering school of the South. Agriculture and mining will be for generations to come the predominant industries in Kentucky and well equipped colleges affording the necessary facilities for education in these industrial pursuits must become potent factors in the up-building of the Commonwealth.

I have wished to see the College of Science and the College of Arts so developed that scientists should be made by the one and classical scholars by the other equal

to those made by any college of university in the nation, and the Department of Education has been very near to my heart. Its development and expansion is among the most vital questions that the University is called to consider. The Agricultural College is growing slowly but steadily, but it would grow more rapidly and attract more liberal patronage and do more good for the farmers if it had the more active and effective co-operation of the Experiment Station, one of its most essential departments. Indirectly and to a very limited extent has the Experiment Station been of any advantage to the College of Agriculture. It has interested farmers and farmers' institutes in the results of experimental work along agricultural lines. It has, however, done very little to stimulate among the farmers a desire for agricultural education. The Agricultural College has gotten little or nothing from the Station in the instruction of its matriculates or in the inspiration which comes from contact with living agricultural specialists. The Agricultural College has not gotten from the establishment and endowment of this Department under the Hatch Act what the Federal Government, the Commonwealth and the University had a right to expect. I give you a solemn warning now and here in this my last official utterance as President, that you cannot afford longer to neglect this matter and allow things to drift and crystallize apart as they have been doing. The Experiment Station is by law not a self-contained unit, but an integral and essential department of the Agricultural College, and should bear a large part in its up-building and devel-

opment, instead of standing apart in a quasi-benevolent attitude. Measures for more effective co-operation are, I understand, under consideration, from which let us hope substantial results may follow. Be it remembered that land-grant colleges received their original endowment from Congress with the express purpose and intention that they should build up strong colleges of Agriculture and the Mechanic Arts. In the latter, as interpreted by the different phases of engineering, we have achieved our most marked success. Our graduates in engineering have been in demand for years. The high grade of work which they have been and are capable of doing places them in the first rank of engineers in America.

While our scientists and classical scholars have stood well to the front and take rank as the best, their numbers are and have been relatively small, the engineers in numbers leading the way. Of the two, viz: The College of Science and the College of Liberal Arts, the former is the better equipped for work. In Mathematics, Physics, Chemistry, Botany, Biology and associated subjects it is and has been strong, but its courses of study do not attract matriculates for the degree. The B.S. degree is not sought as it should be and yet graduates in science are in great demand all over the country. The A.B. course, though the weaker of the two in some essential subjects, yet attracts and graduates more matriculates than the B.S. course does. Until a year ago it was weak in Greek. This defect has been redressed by the establishment of a separate chair in Greek under Prof. Terrell, a very competent scholar and

successful teacher. The Department of Latin has been made an independent chair under the charge of Professor Jones, an excellent scholar and a capital teacher. The Department of History and Economics has been materially strengthened during the last two years, but it needs further expansion in order to bring it up to the level of modern requirements. This can I think be further enlarged during the coming year. The weakest element in the Arts course for years has been in Logic, Metaphysics and Ethics. These have been taught for some years, first by Prof. Shackelford and latterly by Prof. Mackenzie, as incident to, but by no means cognate with the subjects that make up the course in English. Their inclusion in the Department of English, which was intended to be temporary and provisional only, has, in consequence of the lack of funds wherewith to constitute special and adequate provision for their instruction, taken time from the Department of English which it needs for its own proper work. The establishment of a separate, self-contained and independent chair of Logic, Metaphysics and Ethics I now regard as a fundamental and urgent necessity. With the courses in Latin and Greek enlarged, the course in History, Sociology and Economics developed and a course in Logic, Metaphysics and Ethics added, the Arts course would be as strong as any in the country. A strong course in liberal arts is recognized by the best authorities on education as the best means for the attainment of the mental discipline necessary for the preliminary training which makes the more technical courses effective, the best means for laying the foundation on which an intelligent course in law should be based, the best means for the necessary training in jour-

nalism, authorship, the diplomatic and consular service, statesmanship, good citizenship, and above all providing the culture essential for a gentleman. Men and women are intended to be producers in the world of mind not less than in the world of material things. In an age devoted to material production, it is often forgotten that

"On earth there's nothing great but man;

"In man there's nothing great but mind."

All industrial activity, all material production, all the conquests of man over nature, ought to be regarded not as ends in themselves, but as means for the growth of the intellectual faculties, the development of the moral powers, the expansion and enlargement and perfection of the soul.

To the Vice-President I leave to report the more technical details of the university administration during the year now brought to a close.

To my successor you and I are both pledged to give a hearty and unanimous support, in order that he may build wisely on the foundations which have been well and truly laid.

With much respect,

Your obedient servant,

James K. Patterson

The longest life comes to an end and the longest official relationship comes to a close. In the Providence of God it has been given to us to work longer together in a common cause than to most men. For more than forty years I have been associated with you and your predecessors in the Board in a laudable effort to build up an institution commensurate with the dignity and the needs of this good Commonwealth. We have encountered opposition, able, strong, intense, uncompromising and bitter. We have triumphed over all that rose up against us to do us hurt. No weapon formed against us has prospered. We have established the principle of state aid to higher education. We have won recognition by the Legislature, by the courts and in the constitution. The University stands before us today in the vigor of youth, well endowed, well manned and well equipped, entrenched in the affections of its friends and respected even by those who were its former enemies. We have taken counsel together, we have legislated for the good of the University, we have agreed on most important measures, and we have differed and argued our differences with warmth and vigor, on questions of policy, but in all our agreements and disagreements we have been loyal to the great trust committed to our charge and I feel that when this relationship is ended and I formally surrender to my successor the reins of authority, when I shall no longer stand at the helm, the dominant feeling of the Board and all its members will be loyalty to the State University. Gentlemen, you have a great trust committed to you to administer, the beneficent results of which generations to come will see and enjoy and when the few years which may be still allotted to me of this mortal life have closed, I shall ask no recognition than this: "He was for forty years President of the State University of Kentucky." God bless you all and God bless and prosper the University.

Dear Sir:

With reference to telephone conversation held with writer
this day.

Note dated October 1st for \$1,338.88 will be due tomorrow the 1st
proximo. We of course very much prefer that it be paid, but if you find
this impossible, please make arrangements for renewal by return mail.

We also have an open account against the college, \$836.46. May we
not ask that you send us a note for this amount?

Please let us hear from you promptly, and assuring you of our ap-
preciation in this matter, we remain

Yours truly,

THE QUEEN CITY SUPPLY CO.,

TREAS.

To the Hon. Executive Committee of the
Board of Trustees, State University.

Gentlemen:-

We the undersigned respectfully
petition your honorable body to authorize the
building of a model macadam road, beginning near
Major Corbusier's residence, thence around behind the
Mining building, thence in front of the building's
for C.E. and Physics and Chemistry, thence around on
the south side of the campus to the Agricultural build-
ing, in accordance with the plans of Mr. Tackey the
landscape gardiner.

The cost of said road will be about
\$350, for a road 12 ft. wide.

Very respectfully,

Walter E. Rowe,
M. L. Pence,

Lexington, Ky.,

Feb. 10, 1910.

*The above amount will not
build the road as stated above.*
W. E. Rowe

COLLEGE OF AGRICULTURE

CLARENCE W. MATHEWS DEAN,
PROFESSOR OF HORTICULTURE AND BOTANY

J. J. HOOPER,
PROFESSOR OF ANIMAL HUSBANDRY

GEORGE ROBERTS,
PROFESSOR OF AGRONOMY.

ALFRED H. GILBERT,
ASS'T PROFESSOR OF BOTANY.

Address General Mail for College of Agriculture to 660 South Limestone Street.

LEXINGTON, KY.. February 9, 1910.

In accordance with the instructions of the Executive Committee at their meeting of January 8th the following detailed estimate of the cost of establishing the field work for agricultural and horticultural instruction at the farm is submitted.

Team of horses \$400.00

It is preferred that this shall be a team of high grade horses, inasmuch as it is desired to use it frequently through the winter term to convey classes in animal husbandry to surrounding stock farms for class work.

1 one-horse spring wagon for marketing and miscellaneous purposes	100.00
1 set of double harness	40.00
1 set of single harness	25.00
1 two-horse turning plow	12.00
1 disk plow	25.00
1 two-horse smoothing harrow	12.00
1 double shovel	3.50
1 Planet Junior horse plow and cultivator	9.00
1 Planet Junior 12 tooth harrow and pulverizer	7.00
1 complete orchard and garden spraying outfit with trucks	50.00
1 handcart with barrel truck	11.50
1 Hill and Drill garden seeder	13.00
1 Iron Age hand garden cultivator and wheel hoe	7.00
12 double Sunlight sash with lumber for frames	50.00

STATE UNIVERSITY OF KENTUCKY

JAS. K. PATTERSON, LL. D., PRESIDENT

COLLEGE OF AGRICULTURE

CLARENCE W. MATHEWS, DEAN,
PROFESSOR OF HORTICULTURE AND BOTANY

J. J. HOOPER,
PROFESSOR OF ANIMAL HUSBANDRY

GEORGE ROBERTS,
PROFESSOR OF AGRONOMY.

ALFRED H. GILBERT,
ASS'T PROFESSOR OF BOTANY.

Address General Mail for College of Agriculture to 660 South Limestone Street.

-2- LEXINGTON, KY.. 7.6520

Trees, small fruits and vines, approximately	\$100.00
Garden seeds, approximately	20.00
Posts and trellis wire for grapes	20.00
Posts and trellis for experimental work with climbing vegetables	8.00
Miscellaneous small tools	20.00

We shall further require the services of a capable man for regular work with the team and who is also able to serve occasionally as foreman of a squad of boys, -
per month \$40.00 to 45.00

For student labor during the season 500.00

For an assistant professor in agriculture and horticulture to take special supervision of the practical lines of instruction upon the farm, - per annum 1000.00
(with annual increment of \$100 in accordance with the usual custom.)

As stated before this committee upon January 8th, the College has never had any land specifically set apart for instructional purposes. We consider it indispensable that we should have such land with suitable equipment for carrying on instructional and experimental work for the special benefit of the student body. The Director of the Experiment Station has set apart about fourteen acres of ground, thus making it possible to begin this enterprise this spring. The work in horticulture and agriculture cannot be made satisfactory without land and equipment of this sort for demonstration and laboratory purposes. It is just as necessary as a chemical laboratory to the chemist or shops to the mechanical engineer.

It is earnestly urged that this provision as outlined above may be made at once so that it may be put into effect this spring.

Respectfully submitted,

C. W. Mathews

Dean, College of Agriculture.

State University of Kentucky.

Dear Sir:

I enclose herewith a statement of the expenditures made by the Department of Domestic Science from September 1909 until February first 1910.

The appropriation of two hundred (\$200.00) dollars made by the Board of Trustees in June 1909 has proved inadequate to meet the running expenses of the Department. It would hardly be so under ordinary conditions, but owing to high price of all sorts of food material, the above amount is almost exhausted.

The appropriation is the same this year that it was when the Department was in its infancy and naturally the calls upon it now are greater and more numerous than at that time.

The expenses from now on will average about twenty-five (\$25.00) dollars a month and we ask that the laboratory fees for Domestic Science be put to the credit of the Department and an additional amount be added sufficient to meet its need; the entire appropriation needed is something like one hundred dollars.

Very respectfully,

Given at Board Meeting 6-1-10

Lexington, Kentucky, June 1, 1910.

To the Board of Trustees of State
University of Kentucky.

Gentlemen:-

Having been this day formally notified by the Committee appointed for that purpose, of my election to the office of President of the University to succeed President James K. Patterson, resigned, I hereby accept the high honor thus conferred upon me, and with your permission will assume the duties of the Presidency at the expiration of my term as Appellate Judge, January 1, 1911. The reason for postponing the assumption of the duties of the Presidency to the date named, is that I feel that it is due the people who elected me to the office of Judge that I should fulfill the implied contract on my part to serve them for the full term to which they elected me.

In accepting the position so long and so ably filled by President Patterson I recognize not only the natural difficulties of discharging the arduous and responsible duties of the office, but I also recognize and appreciate the additional difficulty that must necessarily come to his successor

of being contrasted unfavorably with one so splendidly endowed both by nature and accomplishment for the place he filled so long and so well. I have, however, put aside my own fear of a want of ability to discharge the duties of the office, and rely rather upon my confidence in your superior judgment. If this Board of Trustees, composed as it is of the ablest men of the State, having only the welfare of the University at heart, and well knowing what my qualifications are, have elected me to the position of President, I feel that I am justified in accepting the place with out regard to my own apprehensions for a want of qualification.

I am too much comforted in the knowledge that we have not entirely lost the services, nor in any wise the deep interest and solicitude of our loved Ex-President, who under the blessing of God, will be with us for many years as emeritus President, and his supervising care and advice will be at our service in every time of need and trouble.

I do not deem it wise or expedient to unduly extend this letter of acceptance. It seems to me sufficient at this time to assure you that I will give to the Institution my whole time and energy in order that it shall grow and prosper as it deserves. To that end it will be my most earnest endeavor to maintain the highest educational standards; to be fair and just to the faculty and to the student body; to promote in the faculty the utmost harmony among themselves, and the greatest unity and zeal in advancing the welfare of the University; to prescribe and enforce a wholesome discipline for the students, allowing them every rational liberty com-

mensurate with their own welfare and that of the University;
to secure the confidence of the students, and to promote among
them the utmost diligence in study, and the highest standard
of morality; to advertise and popularize the Institution so
as to increase the number of its students; to cherish and
foster in every proper manner the deep interest of the alumni
of the University in its welfare, and to this end giving to
their wishes, and opinions on questions of
policy, the weight and consideration they deserve; to aid and
assist in every practical way the advancement and uplift of
the common school system of the State, and to cultivate and foster
an intimate and sympathetic relationship between the University
and the Normal Schools and High Schools of the Commonwealth;
to increase in every feasible way the endowments and income
of the Institution in order that it may go forward in its
great and noble educational work, and take its place in the
very fore-front of the educational Institutions of the country.

Very respectfully yours,

Henry S. Parker

(In our copy this meeting is Feb. 3rd 1910!)

Copy of telegram is dated Feb. 2nd' ¹⁹¹⁰

Must be error

Meeting of the Board of Trustees of State University,
held on the 27th day of January, 1910, in the Board Room of
the Capitol Building, at Frankfort, Kentucky, pursuant to
call.

The meeting opened with His Excellency Augustus E. Wilson
Governor of Kentucky, in the Chair.

T. L. Edelen and Charles B. Nichols presented their
credentials and were sworn in by Governor Wilson. President
Patterson having been previously sworn in by the County Clerk.
Mr. Jas. W. Turner who came into the meeting later was also
sworn by the Governor.

Before the roll was called the Governor read the following
telegram from Hon. Hywel Davies,-

"Sincerely regret my inability to attend Board meeting
to elect president of State University on account of severe
attack of grippe which has confined me to my room since Sunday
Congratulations and best wishes to the new and may the choicest
blessings fall to the lot of the retiring president whose well
merited fame will live as long as the University", signed,
"Hywel Davies".

The roll was then called and was as follows:-

His Excellency Augustus E. Willson,	Present
President James K. Patterson,	Present
Hon. John G. Crabbe,	Present

Hon. John B. Atkinson,	Absent.
Hon. Jas. W. Turner	Present
Charles B. Nichols, Esq/	Present ent
T. L. Edelen, Esq.,	Present
Judge Henry S. Barker,	Absent
Hon. Tibbis Carpenter	Present
Hon. William H. Cox	Present
Denny P. Smith, Esq.,	Absent
Hon. Claude B. Terrell	Present
Hon. Cassius M. Blay	Present
Hywel, Davies, Esq.,	Absent
Richard C. Stoll, Esq.,	Present
Louis L. Walker, Esq.,	Present
Richard N. Wathen, Esq.,	Present.

Mr. Stoll then moved that all absent members be excused, which motion having been duly seconded was unanimously carried.

Mr. Stoll then said: The Executive Committee reported to the Board in December that in its judgment it was advisable that the College should purchase a piece of property on the corner of Winslow and Adams Street for the future use of the College, and I therefore move that the Executive Committee of the College be authorized to purchase the McLaughlin property at the corner of Limestone and Winslow for an amount not exceeding

3. \$6,000.00, upon such terms as may be agreed upon by the Committee

President Patterson then stated that the purchase price would be \$5,500.00.

Which motion was duly seconded and the vote was as follows:-

Governor Willson,	Aye
President Patterson	Aye
Mr. Nichols	Aye
Mr. Edelen	Aye
Mr. Carpenter	Aye
Mr. Cox	Aye
Mr. Terrell	Aye
Mr. Clay	Aye
Mr. Stoll	Aye
Mr. Walker	Aye
Mr. Wathan	Aye

Motion carried.

President Patterson:- There are some bills before the Legislature looking towards an additional income from the Commonwealth to the State University. I want to say here that I have kept my pledge given to you not to introduce any measures relating to additional appropriations for the University, unless by previous consultation, hence I have had no hand in the in-

4. troduction of these measures, yet they are before the Legislature and I heard the Bills will pass giving us some additional annual income. If that shall take place, we will then have an enlargement of income to such an extent that we can do something we thought ought to ~~have~~ do and which we thought we could not do under present circumstances; one important measure is the increase in the salaries of our professors, professors in chief and assistant professors. They are all working for us for salaries much below the average salaries of ~~institution~~ institutions whose income is not so large as ours. We are in constant danger of losing some of them, some of our best men, men of experience, men of national reputation and who can demand salaries better than we are paying. Salaries that we have in the past deemed adequate for the maintaining of the household are not now equal to the draft made upon the home treasury, and from that point of view, I want to introduce a resolution here this morning for your consideration that the measure under which the Committee on salaries appear be enlarged so as to include, before the June meeting, a revision of the salaries of the institution, due regard being had to our income and expenditure, due regard being had for the services rendered by the professors, and this

5. Committee on salaries report to the next meeting of the Board in June. That will require a great deal of careful consideration and I am not sure but that committee ought not to be enlarged by the addition of one or two other members. I would like to see added to that Committee one or two men of eminent business capacity, and I should suggest Hon. Cassius M. Clay as one additional member and Governor Cox as another additional member.

I will assist as far as possible and will ascertain the salaries paid to professors of other institutions similar to ours and report at the June meeting.

Said motion being duly seconded was carried unanimously.

The Chairman then appointed Hon. Cassius M. Clay and Governor Cox as additional members of the Committee.

President Patterson:- At a meeting of the ~~Faculty~~ Faculty held day before yesterday the following named persons were recommended to the Board of Trustees for the following degrees,- Jonathan Blair McAfee, Ardmore, Pa., for the degree of Doctor of Engineering.

J. Levering Jones, Philadelphia, Pa., for the degree of LL.D.

Alex. P. Humphrey, Louisville, Ky. for the degree of LL.D.

W. W. Finley, President of the Southern Railroad, Washington, D.C. for the degree **LL.D.**

6. Henry Clews, New York City, for the degree LL.D.

This is from the Secretary of the Faculty,- (Here reads) letter signed C.W.Mathews, Secretary of the Faculty.

Moved that the recommendation of the Faculty be approved as to these five honorary degrees ~~being~~ be approved, and the degrees conferred in June. Which motion being duly seconded was unanimously carried.

By Mr. Stoll:- You all recall that at the June Meeting of the Board 1909, a special committee was appointed to recommend to this Board a person for President of the University. This Committee has had several meetings, and at all of these meetings I have been Secretary and Judge Barker was Chairman. A meeting held in this room in Frankfort the 13th day of January, the committee unanimously desired to recommend to this Board as President of this University Judge Henry S. Barker of Louisville. I will say as a member of that Committee that Judge Barker was not present at that meeting.

Mr. Walker:- I moved the report of the Committee be received and adopted.

President Patterson:- I was present, of course, at the meeting of the Committee and I expressed my views to my fellow members pretty fully. I had prepared a statement in writing

7. which I had intended to submit to them but which I did not do. I acquiesced in the Committee,- I did not want to raise any factious ~~position~~ opposition, and while I cannot say that Judge Barker had my support, I did not oppose it. The opinion prevailed that the action of the Committee was unanimous. It was unanimous with that interpretation. I entertained a sort of negative acquiescence, because I ~~felt~~ believed that the recommendation made by the majority of the Committee was a mistake. I wish to express to you now, gentlemen, the views which I hold upon this matter, and in order to avoid ~~any mistake~~ saying a great deal that I wish to say or more than I wish to say, I take the privilege ^{to} of present ~~them~~ on paper,- disclaiming all personal considerations and assuring you, gentlemen, of my high regard, esteem and friendship for the distinguished gentlemen whose name is before you as my successor, I desire to place on record the views which I hold in regard to the qualifications that should attach to that high office, the most important, I believe, in the Commonwealth of Kentucky, A clear, vigorous moral sense, discretion, tact, business capacity, patience, courtesy, facility of speech, are essential qualifications, but as a condition precedent for their application and availability certain other qualifications are indispensable, viz:

8. Intellectual ability of a high order, a qualification readily conceded, an education broad and deep, at once liberal and scientific and practical, and in addition thereto a large experience in collegiate and university work, enabling their possessor to coordinate lines of acquisition and research and the adjustment of means to ends in the economy of time and labor, of student and professor. These qualifications are by unanimous consent of all college men fundamental and indispensable. Their presence is vital and their absence may be fatal. The standard of education has been materially raised within the last thirty-five years and qualifications which were deemed adequate forty years ago no longer meet modern requirements. A higher standard is required in assistants, in heads of departments, in deans of courses of study, and above all, in the President of the institution. A large majority of the ablest and foremost college and university Presidents of today, in addition to the undergraduate and post-graduate courses which they had in America, have spent years abroad doing advanced work in Germany, England, France, and Italy, in order to become qualified and eligible for the positions which they now hold. I do not know of any reputable university or college in America, the President of which has not had the advantages of collegiate and university training. I do not know of any board of Trustees of any kind of any first-

9. class University in America, which would consider the claims of any applicant for this high office in whom these qualifications were deficient or wholly absent. What would you say if a ship owner who should commit his vessel, with its cargo and its freight of human lives to a captain and pilot who had no knowledge of the principles of navigation and the art of seamanship? What would we think of any minister of marine who should place a landsman in command of a modern battleship, or in command of a fleet of battleships and cruisers, who was wholly devoid of naval education and training and utterly ignorant of the science and art of naval warfare? High character and moral principles and urbanity and good fellowship and tact and discretion are valuable adjuncts, but of themselves they would neither win important battles nor navigate dangerous seas. A crisis in the history of the University is now upon us. The life of the University and its prosperity are dear to me. I have given to it more than forty years of loyal service. I cannot then be indifferent to its fate. The present crisis has given me anxious days and sleepless nights and sorrow of heart and ~~anxious~~ anguish of spirit. I recall a passage from Tacitus which has been much in my mind during these latter days, viz: "That while the sovereignty of Rome was being transferred to another, Galba, ignorant of what

10. had happened, and intent upon the sacrifices, was wearying by his importunities, the gods of an Empire, now no longer his own." The parallelism is suggestive, except, happily, in its moral aspects. Nevertheless, whatever its results may be, I will give my successor a loyal support and aid him in every way I can to make his administration effective and successful. This I shall do, because the life and success and good name of the University are with me paramount to all other interests and considerations, whether public or private, official or personal.

After remarks by Mr. Walker and Mr. Wathan Mr. Clay made the following statement:- In order to put my position on record I am going to move to strike out from the report of the Committee the name of Judge H. S. Barker and insert that of Professor Smith of the University of Louisanna. There being no second to this motion, the Chairman directed the Secretary to call the roll upon the motion as to whether the report of the Committee should be adopted, and the vote stood as follows:-

Wilson Governor Wilson	Aye
President Matterson	
Mr. Turner	Aye
Mr. Nichols	Aye

11.	Mr. Edelen	Aye
	Mr. Carpenter	Aye
	Mr Cox	Aye
	Mr. Terrell	Aye
	Mr. Clay	Aye
	Mr. Stoll	Aye
	Mr. Walker	Aye
	Mr. Wathen	Aye

Report of the Committee is received and approved.

Moved that Judge Henry S. Barker be elected President of the University.

Ballots being taken resulted, after Count, in 12 ballots for Judge Barker, none against and Judge Barker was declared duly elected President of the State University of Kentucky.

Mr. Walker then moved that the Chairman appoint a committee of three to notify Judge Barker of his election as President of the University and report back to the Board of Trustees in June, which motion being duly seconded and was unanimously carried.

The Chairman then appointed Mr. Walker, Mr. Cox and Mr. Carpenter as members of this Committee, and by unanimous consent President Patterson was added as a member of the Committee.

12.

Moved and seconded that the meeting adjourn. Carried.

Executive Committee,
Board of Trustees, State University,
Lexington, Ky.

Gentlemen,

I beg to inform you of the increasing inconvenience to which this office is being put in answering long distance telephone calls over the lines of the East Tennessee Telephone Co which are the business of the University and not of the Government. We have tried to answer calls for your President and individual members of your Board, Professors and students, and we must decline to attend to any further calls not on Government business. It is understood that there are telephones of the above named company on the campus paid for by the State at the residence of the President, the offices of Professors Norwood and Anderson, and yet it is obviously difficult for callers to get parties ^{over} these instruments of the State or the calls would not come to this office. I would therefore request permission to suggest that you secure an instrument of this company for general business in the Main Building of the University.

Very respectfully,

G. Harold Voyce

Local Forecaster.

THE POSTAL TELEGRAPH-CABLE COMPANY

TRANSMITS AND DELIVERS THE WITHIN MESSAGE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

To guard against mistakes or delays, the sender of a message should order it REPEATED, that is, telegraphed back to the originating office for comparison. For this one-half the regular rate is charged in addition. It is agreed between the sender of the message written on the face hereof and the Postal Telegraph-Cable Company, that said Company shall not be liable for mistakes or delays in the transmission or delivery, or for non-delivery, of any UNREPEATED message, beyond the amount received for sending the same; nor for mistakes or delays in the transmission or delivery, or for non-delivery, of any REPEATED message beyond fifty times the sum received for sending the same, unless specially insured, nor in any case for delays arising from unavoidable interruption in the working of its lines, or for errors in cipher or obscure messages. And this Company is hereby made the agent of the sender, without liability, to forward any message over the lines of any other Company when necessary to reach its destination.

Correctness in the transmission of messages to any point on the lines of the Company can be INSURED by contract in writing, stating agreed amount of risk, and payment of premium thereon, at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding 1,000 miles and two per cent. for any greater distance.

No responsibility regarding messages attaches to this Company until the same are presented and accepted at one of its transmitting offices; and if a message is sent to such office by one of this Company's messengers, he acts for that purpose as the agent of the sender.

Messages will be delivered free within the established free delivery limits of the terminal office. For delivery at a greater distance a special charge will be made to cover the cost of such delivery.

This Company will not be liable for damages or statutory penalties in any case where the claim is not presented in writing within ~~six~~ days after the message is filed with the Company for transmission.

This is an UNREPEATED Message and is delivered by request of the sender under the conditions named above. Errors can be guarded against only by repeating a message back to the sending station for comparison.

The above terms and conditions shall be binding upon the receiver as well as the sender of this message.

No employee of this Company is authorized to vary the foregoing.

Dear Sir.

In Dec Pres Patterson so
kindly offers to appeal to the Board
in regard to a scholarship asked
by the Ky Div U.D.C. Since the
meeting Dec 14 I had not heard
I am eager to know the result.
Some time ago gave these
scholarships - "Open to the lineal
descendants of Confederate Veterans"
Surely Ky can do no less.

The present Assembly has set us a worthy
example!! There are needy boys and girls
as well as Veterans - I feel State College
will gladly help them - I beg that you
cooperate with me, that you urge your
Board to take favorable action soon

Thanking you in advance

Report of Athletic Committee
for year ending
June 1st - 1916

To President Barker and the
Honorable Board of Trustees -

During the year just closed the
committees were reorganized.

The ^{Faculty} committee on athletics at the
beginning of the year was composed as
follows:-

Prof. Miller, chairman

" " Rowe

" Zimbrod

" Wilson

Mr. Mustaine

Lieut. Kelley.

The new committee is composed
as follows:-

Prof. Wilson, chairman

Mr. H. E. Curtis.

Lieut. Kelley.

This new committee has had charge
of affairs since ~~the~~ early in the
track and baseball season. All
have been actively interested in athletics.
Prof. Wilson and Lieut. Kelley were
members of the former committee, and
Mr. Curtis has been treasurer of the ~~ass-~~

sociations for many years.

Financial Condition x

At the beginning of the school year, in September, the athletic association was out of debt, with a surplus of about \$250⁰⁰

At the beginning of next school year the surplus will be \$750⁰⁰ or \$800⁰⁰, estimated conservatively. During the year just ended, ~~college~~ athletics have received no financial assistance from the board of trustees x

For your information, the expenses and receipts from the various forms of athletics are given with approximate accuracy below. In order to show the situation as it really has existed, it was necessary to apportion the season tickets properly. This was hard to do, but there is no serious error in what follows:

	Expenses	Receipts
Football	5417.55	7949.15
Baseball	1240.79	728.75
Basket ball	821.98	499.90
Track	803.85	00.00
Miscellaneous	44.30	
Totals	8328.47	9177.80

900
 \$420
 670
 1990

Resultant Surplus approx - 749.33-

~~Due to the fact that the season tickets have been estimated conservatively, the actual surplus will probably be between \$800 and \$900⁰⁰ when all expenses are paid.~~

The actual cash on hand at the end of the year will be between \$800 and \$1000, after expenses are paid, but there are some season tickets still outstanding to be balanced against part of this.

- Some Observations -

The above condensed report shows that \$1990⁰⁰ were spent on coaching. Nearly \$1000⁰⁰ were spent for equipment. In addition to ~~these~~ handling these funds, about thirty six games were arranged and financed. More than one hundred men took active part in one or more forms of college athletics. While the teams were defeated a few times, all ~~had a majority~~ were victorious in the majority of the games played.

(4)

While we lost the championships of the State in football ^{and basketball}, we won the championships in baseball and in track athletics.

As may be seen from the financial report, although the receipts amounted in all to more than \$9000⁰⁰, the surplus on the year's athletics ^{will be} ~~is~~ only about \$700⁰⁰, when allowance is made for the cash on hand at the beginning of the year.

Bad weather for any of the more important ^{football} games might easily have wiped out this entire surplus. It would seem, therefore, as though our athletics should be placed on a more stable financial basis, if possible.

The new committee is trying to develop plans which will tend to make our financial condition more secure. The chief difficulty lies in obtaining reliable and efficient coaches at ^{moderate} ~~reasonable~~ salaries.

- Recommendations -

The committee is heartily in accord with the plan which has been proposed, of securing one man to look after the Y. M. C. A. work and outdoor athletics, provided the right man can be found. This should be perfectly

feasible. The work would not be too hard for one man, if he had assistance during the football and baseball seasons.

If the expense for coaches could be reduced, the committee could use the surplus, which would then probably be more certain, for various improvements which are being more and more badly needed.

The present field is not large enough in the football and baseball seasons. The number of men who can take part in athletics is limited because there is not more room for practice. The committee contemplates enlarging the field by moving the south fence of Stoll Field further south.

The property at the corner of Rose and Winslow Streets should be bought or leased, to provide ~~room~~ ~~for the proper athletic~~ activities of the larger number of students which would take part in ^{outdoor} athletics, if proper facilities were available.

Amurils — chairman
