Prof J. K. Patterson
Dear Sir

I am offered \$250 Cash
for a lot 100 feet wide, off the east end
of the old homestead lot of my Aunt,
viz. Commencing at the Alley & running with
main Cross Street west towards the house
100 feet thence south. parallel with the
Alley to the Cumberland Church lot
which will make the lot ^{about} 100 x 200 or
maybe 220 = 100 feet front will come within
about 60 feet of the house & will leave
about 140 feet front.

I have said nothing to my Aunt as
yet about the offer. Thinking I had
best write you before mentioning
the matter to them.

You overreached Thompson in
your price on the other lot. He
would have given \$450 - but could
not quite get him up to \$500 -
The party wanting the lot, I

write you about today, wishes to
build a nice brick cottage on it,
which will cost him \$1500 to \$1800.
I believe he has offered a pretty
fair price for it, though I think
I can squeeze him up a little,
say to \$275. I don't think however
he will go as high as \$300. for
the reason that he has now offered
him at that price that he would
just as soon buy as this.

I have priced this lot to him
(provided it is for sale) at \$300
which he says he would not pay
but offers \$250

[No. 10, APRIL, 1883-'84.]

SUMMARY STATEMENT OF THE IMPORTS AND EXPORTS OF THE UNITED STATES

For the MONTH ended APRIL 30, 1884, and for the TEN MONTHS ended the same, compared with the corresponding periods of 1883.

[NOTE.—In consequence of the revision and extension of the schedules of imports and exports, which went into effect July 1, 1883, comparison of the imports and exports of the current fiscal year with those of prior periods is rendered difficult with respect to some of the groups and classes of articles.]

Prof Jas H Patterson

Lexington Ky

Dear Sir

Yours of the 22nd inst have just received and read with neither "surprise nor indignation". I am not surprised from the fact that your statement of the case corresponds so nearly with mine as related to Dr Peter, and the history of the "Fertilizer bill" as recited to me by Senator Frederick. I am surprised however that either you or Prof Bruce should borrow the "Logan bill" with the understanding that it should be returned and not return it. This, Senator Frederick assured me, had been done. For when Prof Bruce's bill was put upon its passage in the Senate, and was so grossly criticised and failed to pass the Senate, he desired to present the "Logan bill" so called as an "alternative measure", and it could not be found. The close of the Session being so near at hand, as a last resort they amended the 4th Sec: of the present law by striking out "eight per cent" of ammonia, and inserting therefor

My dear Cent. I am the more surprised however, as you must have known that Dr Peter had been called to Frankfort with a view of cooperation in formulating a Fertilizer bill, that he was not consulted at any rate in regard of your measure.

It was at my instance that he was requested by Col Davis to come to Frankfort, and I wrote him a personal letter to this end.

We too at a joint session of the Comd on April 11th, were requested conjointly to draft a bill. This we did as far as we were able to cooperate.

I claim no peculiar or exclusive privileges in legislation either as regards Fertilizer control or "Colligative Education", neither am I a subject of conviction to the principle that public officials are to be the sole dictators as to what measures shall be submitted to the representations of the people for enactment as laws.

I do claim however to be the originator of Fertilizer Control in this State. And I do feel indignant that the possibility of securing an efficient law was thwarted in our instance.

by the interference of disinterested parties and in the second instance by those who were certainly as little interested as myself, and far less than those whom I represented either personally directly or indirectly. If Prof. Brewster's bill was a practical and superior one, it would have certainly met with my approbation, and by a consultation with our you might have secured the support not only of the farmers but of the manufacturers, and thus avoided its consummate defeat.

Your promise to furnish me with certain statistics was made in the parlor of the Capitol Hotel, and as you did not forget the appointment when our Committee in Frankfort, I could hardly conceive of a matter of such importance as these statistics escaping your memory.

If you desire to reciprocate the favor you may show these lines to Dr. Peter.

Respectfully,

HERALD AND PRESBYTER,

MONFORT & CO.,

Publishers and Proprietors.

178 Elm St., Cincinnati, O., June 5, 1884.

Advertisements inserted at 20 cents per Agate line. For special school rates see inside page.

WE send you by mail a copy of the HERALD AND PRESBYTER, which we trust you will examine. We think it will prove an excellent medium through which to announce the advantages offered by your school.

IT circulates among the most refined and cultured people of the *richest* part of the West, reaching the very families who most patronize schools and colleges.

THE editors of the HERALD and PRESBYTER have for years given special attention to educational interests and intelligence, and educators in every part of the country have acknowledged its unexcelled advantages in this respect.

FOR several years past the school announcements in the HERALD AND PRESBYTER have exceeded those in any similar publication.

RECOGNIZING the interest which our readers take in this class of advertising, we make a *special rate* for all advertising pertaining to schools and colleges. For locality and extent of circulation, together with special rates, please see the following pages.

IN order to more fully serve the interests of educational advertisers, we insert each year, in a number of papers of large circulation, an advertisement calling upon parents having children to educate to send for a copy of our paper. (See the second specimen advertisement on the next page.) Our advertisers will in this way reach not only our regular subscribers, but many other persons. We shall also urge subscribers to circulate their papers among such of their friends as may be interested in school announcements.

FOR your convenience we inclose a return envelope. Trusting that you will favor us with an order for the insertion of an advertisement, we are,

Respectfully yours,

MONFORT & CO., *Editors and Publishers.*

ADAMS ACADEMY,
QUINCY, MASS.

HON. CHAS. FRANCIS ADAMS, LL. D., Chairman.
WILLIAM R. DIMMOCK, LL. D., Master.

The design of the School is to prepare boys in the most thorough manner for the best American Colleges. Boys from this Academy have been this year admitted to Harvard, Yale, Brown and Amherst Colleges. There are nine teachers—all gentlemen of ability and experience.

There is a preparatory class for those too young for the Academy; and the instruction given is careful and systematic, designed to fit pupils thoroughly for the higher work of the Academy. No pupils are received under ten years of age.

The Master (with his family) and the assistant Teachers reside in the Academy Boarding School: and the younger boys have each a separate alcove in a large dormitory that communicates directly with the Master's bedroom.

Boys can also be boarded in private families.
For Catalogues address the Master.

IF you wish more space or longer time, write for further information. Should you favor us with an order, it will be promptly filled, and copies of the paper sent to your address while advertisement continues. In ordering advertisement state the number of insertions you desire. We will have four issues in June, five in July and four in August. **WRITE FOR OUR SPECIAL RATES ON ADVERTISEMENTS RUNNING SIX OR TWELVE MONTHS.**

IF your advertisement has appeared in our paper in the past, we hope to see it again this year. If you have never advertised in the HERALD AND PRESBYTER, we shall be pleased to receive a trial order.

WE print a fac-simile of the fifth page of the HERALD AND PRESBYTER, as it appeared August 15, 1883. There were **131** Educational Institutions represented in that issue. Advertisements that expired prior to that date, and some every other week advertisements, do not appear. No other paper in the United States has shown such a list of schools and colleges.

 The Most Largely Circulated Presbyterian Weekly Newspaper in the United States.

AVERAGE CIRCULATION FOR 1883, 16,616.

The HERALD AND PRESBYTER is one of the organs of the Presbyterian denomination, and goes to

852 Post-offices in Ohio.

Dear Sir:

Your letter 17th July received, I can only refer you to the explanations made in my former letter, I have a clear conscience in regard to my debt to you, and do not feel that I am under any more obligations moral or otherwise to you than I am to my other Creditors, Some of the others are in much more need of it than you, and their claims would be preferred were I in

paid the note which you gave
me in part payment of the
debt which you owed me.
He paid I think about \$20. -
or \$25 - I discounted it in
bank but had to take it
up.

I have thought that perhaps
you could now satisfy
the small remainder of your

President

Sir :

I have prepared the manuscript for, and have now ready to send to the printer, an Historical Sketch of the Organization, Administration, Material and Tactics of the Artillery of the United States Army, from 1775 to this time. Such data as I have been able to collect I purpose here presenting to those who are interested, with a view to meeting an assumed desire of the Army, particularly the Artillery, for information concerning the early and progressive history of the latter. The labor was begun more than ten years ago, without the idea of placing the results before the public. It has been carried on with as much assiduity as official and, during several years, very pressing duties would permit. In deference largely to the wishes of friends, the scope of my labors was extended beyond what was originally intended--to give a personal knowledge of the antecedents of the Arm in this country--to gain which I inquired to little purpose of some of the most experienced officers, and searched in vain among books of the profession.

If published, the work will be octavo, about 350 pages, printed on heavy tinted paper, and will be sold, delivered, at the following prices :

Bound in Cloth,	-	-	\$2 00 per volume.
" Sheep,	-	2.25	"
" Half Morocco,	-	3.00	"
" Calf, fine,	-	5.00	"

I enclose a blank Form which, should you or others wish to subscribe, please fill up and return to me at Little Rock Barracks, Arkansas.

FUNK'S CALF NIPPLE OR FEEDER, FOR CALVES OR COLTS.

No more Bloated Calves. No more Indigestion. No more Calf Ears sucked. No more Fingers chewed. The most Practical of Modern Inventions. Warranted to give satisfaction. \$100 offered for a calf that won't suck the Rubber Teat. We don't want young calves to drink; they do better to take their food slow enough to raise the saliva of the mouth and mix with the food, to aid digestion.

PATENT
APPLIED FOR.

Since it has become the custom to raise calves by feeding them from a bucket, the Calf Nipple is just as important for calves as the nursing bottle for children. Why not throw the bottle away and let them drink out of a cup? Because that would be in opposition to nature; medical men assert they would swallow too much air and drink so fast the saliva of the mouth could not unite with the food.

The rubber nipples have been made to order expressly for this use, and are strong and durable. It teaches the calf to take its feed from the bucket without the assistance of you or your finger. The nipple is attached to the float so that its lower end will always connect with the milk and thus exclude all air from being swallowed by the calf. For the calf to stay in a healthy condition it must take its feed so as to unite it with saliva and not with air.

The old way takes as much time to feed the average calf as to feed the rest of the stock, and takes that time twice a day from two days to two weeks, often one person holding the bucket while another forces the calf's mouth in the milk. Place the float in a bucket of warm sweet milk, and hold the calf's mouth on the nipple till it gets a taste of the milk; it has then been taught to look in the bucket for feed and not to you or your finger, and will be no more trouble. We should be reminded not to allow a calf to drink an over-dose, like one-half of a bucket full, when one-third full would be a good feed, and not to offer a young calf cold or sour milk. The calf will soon wean itself from the nipple and drink by putting its mouth in the milk before you have thrown in the float.

"We, the undersigned, take pleasure in recommending the Feeder to stock-raisers and farmers."—DR. J. BROWN, Decatur, Ill.; DR. WM. CATTO, Warrensburg, Ill.; DR. J. C. HALL, Forsyth, Ill.

"We are using the Feeders, and testify to the above and give them a good recommend to raise calves by hand."—DR. J. L. CONNELLY, breeder of Jersey cattle, Harristown, Ill.; J. NYE, breeder of Short-Horn cattle, Decatur, Ill.; J. WARD, dairyman, Decatur; R. PARK, farmer, Decatur; J. COWGILL, farmer, Decatur.

A SHISLER, stock-raiser, Forsyth, Ill., says: "I would not do without one or more at the price, (50 cents)."

PAWTUCKET, R. I., July 9, 1884.

E. F. FUNK—Dear Sir: Your Calf Feeder has come to hand. I have tried it. It works admirably, and my wonder is that some one has not thought of so simple an idea before.

Yours Truly,

Dear Sir: - The Practical Farmer invariably yields good returns to those who use its columns to advertise the sale of articles of merit. It reaches a prosperous and intelligent class of farmers, breeders and stock raisers, who use discrimination when they read advertisements and to whom articles which they need are seldom offered in vain. We know this to be a fact. If you read the back of this letter you will see that our advertisers know it also. We believe that you will be aided in disposing of what you want to sell by using our columns. We will insert the enclosed ad. four times for only \$14⁰⁰ with good editorial notice free. We feel sure that you will be satisfied with the investment.

at least have a railroad survey, and think it only a question of time when the road will be built.
Hernando is not a city or village, but merely a settlement. It extends five or six miles on the west side of Chalo Apopka Lake, which is a very pretty body of water, eighteen miles long and from one-half to four miles wide, and is filled with choice timber. We have mostly high rolling pine land heavily timbered with yellow pine.

CAST YOUR HOOK IN THE STREAM,

When you Least Expect it there Will be Fish.

Volumes have been written concerning the value of judicious advertising. There are to-day hundreds of business men, luxuriating in wealth, who owe their entire success to the wise use of printer's ink. There is hardly a city or town where these merchant princes cannot be found. Nevertheless there are many people who believe that advertising is a blind experiment, or, as we have heard sometimes, an expense only to be charged to the *debit* side of profit and loss. This is a mistake. Advertising discriminatively done, is a necessary business expenditure.

This stirring, aggressive civilization of to day incites, in every avenue of trade, the fiercest kind of competitive strife, and calls for ceaseless activity on the part of business men. As long as this state of things continues there will exist the necessity for advertising,—judicious and persistent advertising, and as the inevitable corollary, *rich men will multiply*. Reader, is it your ambition to become one of this favored class? If so, then

"Be wise to-day,
'Tis madness to defer."

But what is the use of elaborating an essay on the merits of judicious advertising. Every business man who possesses ordinary common sense, knows he cannot succeed without it. But *where* to advertise is the conundrum. If you have anything that supplies a want incidental to country life, anything that the rural classes *must have* if they would keep abreast with modern agriculture or social or intellectual elevation and refinement, then you should advertise in the *PHILA. PRACTICAL FARMER*.

We subjoin the evidence of a few of our advertising patrons, and trust it will convince every "Doubting Thomas" that the "FARMER" is no journalistic fledgling, but a robust, wide-awake journal, always in the van in the development of our agricultural resources as well as in its hostility to every encroachment upon the farmer's rights and a *paying advertising medium*.
