Mrs. Jas. K. Patterson,
State College,
Lexington, Ky.

Dear Sir;

Your valued order to hand for which accept my best thanks. I have sent same today by express.

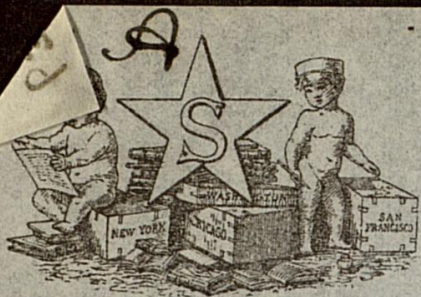

I had only one dozen of napkins to match table linen, all I had in stock, but I sent a half dozen Fleur De Lis pattern, which I hope will meet with your approval. This is a good Scotch Damask made in Dunfermline.

Trusting this will find you enjoying good health, I remain

Very truly yours,

J. BACON & SONS.

Dr. James K. Patterson,
President State College,
Lexington, Ky.,

Dear Sir:-

Your esteemed favor of the 1st inst. came to hand in due course, for which please accept my thanks.

The time to go to Lexington in relation to the question of sewage disposal would be after Mr. John T. Shelby has appointed the consulting engineer on that subject. What I would like to do in the meantime is to get all the influence I can in favor of Mr. W. G. Clark, C. E., of Toledo, who has made application to Mr. Shelby ^{for} the position of consulting engineer.

Mr. Clark was for some years City Engineer of Toledo and I consider him to be one of the best posted men in this country on all matters relating to sewage. He is a good man in every way and thoroughly reliable. The city of Lexington cannot get a better man for their purpose. It would be an advantage to me also to have him appointed, but as I am an interested party, it would not do for it to be known that I was advocating Clark's appointment. Anything that you can do for me in that direction will be appreciated and you need have no hesitation whatever in recommending Clark, as he is well fitted in every respect for the position of consulting engineer for the city of Lexington, in connection with the matter of sewage and sewage disposal.

I hope later to have the pleasure of going to Lexington and of calling on you when there.

YOURS TRULY,

John MacDougall.

Beta Theta Pi

CATALOGUE OF 1905

363 W. 20TH ST., NEW YORK, N. Y. MAY 9 1905

DEAR BROTHER:—

The catalogue of the Fraternity for 1905 is now in preparation.

The facts desired concerning each member and which, if furnished, will be inserted in the catalogue, are:

1. Full name (including full middle and full first name, *not* initials).
2. Class in college (year of graduation, or year when graduation would have occurred if the course pursued had been finished).
3. Degrees.
4. Present occupation (if a clergyman, state denomination).
5. Address (including street and number in cities where there is a letter carrier service).
6. Any fact which is worthy of note in member's career, for instance, membership in Phi Beta Kappa, positions of honor and trust, books written, &c.
7. If you were a member of more than one chapter, state whether you wish your name on more than one list and if not which list.

The information which we now have concerning you will be found herewith. *It will be printed precisely as set out here unless you change it.*

Chapter	HANOVER	Roll No.	23
JAMES KENNEDY PATTERSON. A.B., 1856; A.M. 1859. Ph.D., 1875.			
Lexington, Ky.			
Pres. of State Coll. of Kentucky, 1869-. Prof. of Latin and Greek, Stewart Coll. (Tennessee), 1859-61; of Latin, Kentucky Univ. 1865-9. Member of inter. congress of Geog. societies, Paris, France, 1875.			

The catalogue of 1905 is intended to contain the rolls of the chapter down to and including the initiates of the college year 1904-05. Full alphabetical and geographical indices will be furnished. Our object is to get out a catalogue up to date and on time. It will be ready for delivery about October 1, 1905. Two editions will be published. The price of either is \$3.00 per copy. The *library* edition will be printed on relatively heavy natural finish paper with ample margins and bound in cloth with appropriate side legend. The *satchel* edition will be printed on thin opaque paper, trimmed with close margin and bound in light cloth. Indicate which is desired in ordering. The price includes postage or express charges within the United States.

If you wish a copy state which edition and to what address it should be sent. Remit with this order if possible, and make checks or money orders payable to

GEO. W. WING, MONTPELIER, VT.
ASAHEL R. WING, FORT EDWARD, N. Y.
GEO. WING SISSON, POTSDAM, N. Y.

GEO. CURTIS WING, AUBURN, MAINE.

SPRINGFIELD, MASS., May 15, 1905.

DEAR KINSMAN:

The Third Reunion of the Wing Family of America will be held at Sandwich, Mass., commencing Saturday, July 8, and terminating Friday, July 14, 1905.

All members of the Wing Family in America of English descent are most cordially invited to participate in the event. This of course includes all lineal descendants of the male or female lines.

The first known Wing settlement in America was made by Deborah Wing, the widow of Rev. John Wing, a famous non-conformist minister who had lived in Holland and England, in June, 1632. She came with her four sons, John, Daniel, Stephen and Matthew, and after staying some five years at Saugus (now Lynn), they moved to Sandwich, on Cape Cod, and were among the first settlers of the Cape. Indeed, it is claimed that Deborah gave the name of their home in England to the new settlement—Sandwich. So far as known, every Wing or Wing descendant of English descent now in America, who settled here prior to the Revolution, are descendants of the Rev. John and Deborah, and it is estimated that they number over 30,000.

Sandwich itself is a rare old town and its historical associations with the family are so close that it makes it a pilgrimage well worth the effort. Here were the scenes of the pioneer struggles of our ancestors; here are the old homes, a number of them still standing in venerable antiquity—one, the home of Stephen Wing, built by him in 1641, is still occupied by a descendant and it is probably the oldest residence house in New England. Here is the ancient Quaker meeting-house at Spring Hill, where seventeen families (three of them Wings) organized the first Friends' organization in America, and it was here they suffered persecutions at the hands of the Puritans and Pilgrims and were the first to uphold the standard of religious liberty in the New World.

Come and let us study family history in the place it was made; let us cement family ties, unite the long scattered branches, and review the years. Two happy Reunions, the first in 1902 and the second in 1903, have been held at Sandwich, at which the attendance was estimated at 300 on each occasion. Let the Reunion of 1905 be even more of a success.

The Committee in charge will be George Homer Wing of Springfield, Mass., Alvin P. Wing of Sandwich, Mass., and Mitchell Wing of Boston, Mass.

The local committee in charge at Sandwich will be Alvin P. Wing, Miss Laura A. Wing and Miss Mary G. Wing.

The spacious Casino at Sandwich has been secured and here the headquarters of the Reunion will be held. Board and rooms can be secured by addressing Alvin P. Wing, chairman of the local committee, at very reasonable rates. We would advise all to engage such as early as possible.

The program will consist of receptions, historical meetings, addresses, papers, music, services at the old Quaker meeting-house at Spring Hill, visits to the old homes, and the official meeting of the Family Association.

It is particularly requested that those receiving this circular invitation will give the Reunion as wide publicity as possible through the columns of their local press, and by letters of information to their immediate kinspeople of the Wing line. We hope to get word to all and if any of the Wing family are passed by it is because we do not have their names on our mailing list. The invitation is meant for you and your family—wife, husband and children and all of your Wing kinsfolk.

The Secretary will be glad to have addresses sent to him to whom he can mail this circular letter and to answer any letters of inquiry.

Please fill out enclosed slip and mail to the Secretary as early as possible that we may know how many to plan for.

Cordially yours,

GEORGE HOMER WING, Secretary
Box 436, Springfield, Mass.

NOTE

Plenty of room for everybody. Everybody cordially invited. Membership not limited to teachers. All persons interested in the work of Education are eligible to membership.

A general educational mass meeting or citizens' conference will be held on the afternoon of June 22nd.

Middlesborough, Ky., May 31, 1905.

Pres. Jas. K. Patterson,

Lexington, Ky.

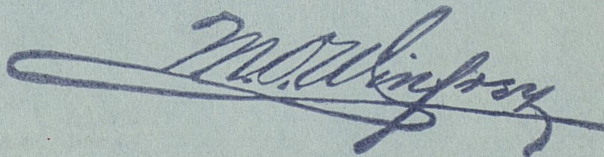

Dear Pres. Patterson:-

I am enclosing you herewith copy of the contribution blank which I have been using in securing donations for our "Educational Campaign". I have secured sixty seven dollars (\$67.00) and have only worked about three hours.

I trust that you may be able to raise a goodly sum for this commendable cause.

Very truly,

E.G.

[illegible]

State College of Kentucky,

H. C. Frazee, Business Agent.

Lexington, Ky.,

The following resolution was passed by the Board of Trustees at ~~in~~ their meeting in May, 1905.

"Resolve that this Board thank the Trustee of the Bennett Will, Mr. Bryan, for the bequest of \$400 to the College, and promise to carry out the intention of it, and that it authorize the President of the College, Prof. Patterson, to receive this fund for the purpose intended, and invest it for that purpose, and that a copy of this resolution be forwarded to Mr. Bryan."

H. C. Frazee
Secretary.

Hanover College,

HANOVER, INDIANA.

NEW RICHMOND, OHIO, May 30, 1905.

Dr. Patterson,

Dear Friend:—I am making this appeal for the small balance of the Debt Fund chiefly to the younger Alumni, whose enthusiasm for their old College should still be strong, and whose success in life may enable them now for the first time to send small gifts to manifest their loyalty to Hanover, and their interest in the good work to be done for the young people of the future. I am also very kindly appealing to some of the older Alumni, who have not yet found it convenient to subscribe to the Debt Fund.

So many generous friends have come forward with gifts that the sum now to be raised is not large, yet we wish each friend to realize that *we need his help*. Let each one do what will not greatly burden him. ONE DOLLAR will be a welcome gift. Gifts of \$10 and above will count fast. AN AVERAGE of FIVE DOLLARS each would clear away the *whole debt*. We wish very much that most of our friends may find themselves at liberty to promise this amount.

The debt was contracted for Classic Hall and the Library. We have already secured gifts and promises for \$ 2 5 5 3.- We find that we shall need \$ 4 3 0 more to *completely clear the College of all debt*. We are anxious to have gifts, or promises, to cover the whole debt before Commencement.

If our friends will kindly listen to us in these small appeals, we may almost promise them the reward of one or more large gifts for Hanover from strangers before long. The recent gift of \$25,000 for the Library may be some assurance to them that other gifts like it are not very far off. We have special reasons for hope. Never did the prospects of the College seem brighter. A great future is certainly before your old College. Let us not live to enjoy, but to bless. Let us work together to make Hanover College a still greater factor in the *elevation of mankind*.

As President Fisher has already begun to pay off claims, we shall be glad to receive cash gifts, but we shall also be grateful for promises payable at the convenience of the givers. Gifts may be sent to President Fisher, or myself, and due acknowledgment will be made.

The College has lost much because kind friends have put our letters aside for a day or two, instead of filling out promises at once and placing them in the return envelopes for the first mail. We very kindly ask you to avoid this mistake. Regard any appeal for Hanover an appeal for God and Humanity, and give us the encouragement and help of a favorable answer *as soon as you can*.

Very earnestly,

ALEXANDER DUNN.

P.S. Dear Dr. Patterson:—Please regard this a personal letter and very kindly listen to its appeal for your old College by sending a small promise to cover—*mentence* that the debt may be paid and larger things for God undertaken. *A. Dunn.*

DAVID T. BEALS, PRESIDENT.
FERNANDO P. NEAL, VICE-PRESIDENT.
W. H. SEEGER, 2ND VICE-PRESIDENT
CHAS. H. V. LEWIS, CASHIER.

May 22, 1905

Mr. J. K. Patterson,

Lexington, Ky.

Dear Sir:-

Whenever any of our stockholders desire to dispose of their stock, we esteem it a favor to have them give us the opportunity of placing the stock with parties whose business might be of reciprocal advantage to the Bank. Of course, we should expect to realize for them the best market price for the stock, and can sometimes do better than current quotations. In view of this fact, I trust it is not asking too much to request that you give us a chance to so handle your stock, at such prices as you may at any time consider accepting. If you will kindly advise me whenever you are disposed to sell any part of your holdings, it will be a favor to the Bank, and I am sure will inure to your advantage.

Very truly yours,

----- Vice Pres.

Y. H. Hutchison

Pd. July 15-05
Jno Hutchison

The undersigned, James K. Patterson and Lucelia W. Patterson, husband and wife, of Lexington, Kentucky, hereby acknowledge full payment and satisfaction of the two promissory notes of two hundred and fifty dollars each, described in a deed from said parties to S. Lacefield and G. R. Hays dated March 17, 1894, now of record in the office of the Clerk of the Muhlenberg County Court in deed book No. 42 on page 268, conveying a tract of two hundred and seven acres of land in Muhlenberg County, Kentucky, the said two notes being given to secure the payment of part of the purchase price in said conveyance and retaining a lien in the land conveyed to secure their payment,

And in consideration of the payment and discharge of said notes the said James K. Patterson and Lucelia W. Patterson hereby release unto said Lacefield and Hays the lien retained in said deed and release and convey unto them any and all claims they have or might have to said land by reason thereof.

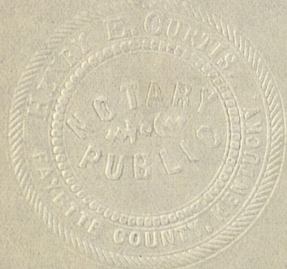

In witness whereof the said James K. and Lucelia W. Patterson have hereunto subscribed their names this 30 day of June 1905.

James K. Patterson

Lucelia W. Patterson

State of Kentucky,
Fayette County, Sct.

I, Henry E. Curtis
a Notary Public in and for the County and State aforesaid, certify that the foregoing instrument of writing was this day produced to me in said County and acknowledged before me by James K. Patterson and Lucelia W. Patterson, parties thereto, to be their act and deed, which is certified to proper office for record. My commission expires March 10 1906.
Given under my hand this 30 day of June, 1905

My Dear Prof. Patterson:-

Your letter of the 25th. inst. received and I thank you for the information it contained. I have since seen Mrs. Stout and had a satisfactory talk with her.

I enclose you herewith a copy of the opinion in the A. & M. College case which I think you will find entirely satisfactory. I had a talk with Judge Hager the other day. He has a balance of nearly five hundred thousand dollars in the treasury and I think he will issue his warrant in behalf of the College whenever you desire it.

I send you by express to-day the remaining copies we have of the brief in the College case.

I shall be at your service next winter before the Legislature if you find that I can be of assistance to you in any way.

Very truly yours,

A.

Gentlemen:

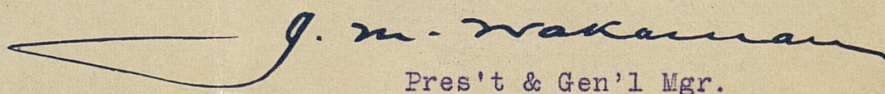

It frequently happens that an advertiser is too busy a man to take the time necessary to study carefully the papers in which he is advertising or for which his advertisement is solicited.

In order that you may be able to realize in a few minutes what ELECTRICAL WORLD AND ENGINEER does for its readers and how thoroughly it covers the electrical field, we send you herewith a small pamphlet giving an outline, not of promises but of actual performances during the first four months of this year. (Please look it over.)

A journal which covers the field so thoroughly and has so large a circulation (actual average per week this year to date is 14,015) is the advertising medium of the electrical field.

Very truly yours,

ELECTRICAL WORLD AND ENGINEER,

Pres't & Gen'l Mgr.

FOUR MONTHS

of the

Electrical World and Engineer

JANUARY--APRIL, 1905

New York:
McGraw Publishing Company

Editorial Comment

DURING the four months covered, editorials to the number of about one hundred have been printed commenting upon topics of the day, or treating of important questions, which affect the electrical industry, either directly with relation to current practice, or as new developments apt to have a future effect. Following are some of the subjects which have been treated in leading editorials:

Electrical Growth in 1904.—Electric Freight Haulage (several editorials).—Consolidation of Small Central Stations.—Status of Industrial Electrochemistry.—Status of the Storage Battery.—Electric Power Transmission in 1904.—The Single-Phase Electric Railway (several editorials).—Status of Telephony.—The Steam Turbine vs. Gas Engine.—Electrical Testing Laboratories.—Modern Views of Matter.—The Tantalum Lamp (several editorials).—The Synchronous Motor.—Central Station Design.—Unipolar Dynamos.—Heavy Electric Traction.—Trees in Wireless

Telegraphy.—Calibration of Voltmeters and Ammeters.—Mercury Arc Rectifiers.—Load Diagrams.—Induction Motor Diagrams.—California Electrical Transmissions.—Street Lighting.—Electric Conduction through Fluids.—Two-motor vs. Four-motor Railway Equipments.—European Single-phase Railways.—Carrying Capacity of Multiple Cables.—Electric Drive for Machine Tools.—Osmium Incandescent Lamp.—Gas Engines in Recovery of Waste Energy.—Analysis of Alternating Wave Curves.—Wattmeter Testing.—Technical Knowledge on the Bench.—Theories of Electricity.—Grounding the Secondary.—Flux Distribution in Transformers.—Electrodeless Discharges.—Massachusetts Central Stations.—Commercial Photometry.—Magnetic Alloys.—Wireless Telegraph Litigation.—Testing of large Dynamos.—Temperature Rise in Electrical Machinery.—The Titanium Arc.—National Electrical Code.—A Decision on Negligence.

General News

A PROMINENT feature of the ELECTRICAL WORLD AND ENGINEER is its department of general news, occupying six to eight pages immediately following the editorial pages, and consisting of short articles and notes giving the latest news of general interest, as distinguished from industrial and business news, which latter classes are considered in the final reading pages. Among the matters

noted are announced meetings of technical and other societies, reports of such meetings, and of committees, companies, etc.; legislative and municipal action; technical and personal news; important new patents and court patent decisions; notes of new engineering and industrial development; electrical statistics; miscellaneous happenings of electrical interest, etc. Much of this matter is gathered for our columns exclusively by staff correspondents throughout the country, by our London office and by correspondents abroad. The number of items in this live department will average not far from 100 weekly. It enables the reader not only to keep informed of the general news in his own special field, but of the current electrical movement as a whole, the influence of which permeates to every branch.

The Electric Railway

A SALIENT feature in the treatment of this branch is the thorough consideration of every point arising which relates to electrical principles in design and

operation. While present practice is covered, the policy is to give especial attention to the principles upon which the art of to-day is based and upon which further development depends. In particular, the question of alternating-current traction is most comprehensively treated, not only with respect to its present status but also with relation to every aspect of possible development. The problem of the electrification of steam lines is also treated from every side. Whoever desires to follow the latest thought in connection with electric traction, whoever wishes to keep an eye on the future as well as on the present, will find the pages of the **ELECTRICAL WORLD AND ENGINEER** indispensable.

Electric Freight Haulage.—The Single-Phase Electric Railway.—Electric vs. Steam Locomotives.—London Power House.—Comparison of Alternating-Current Railway Systems.—American-built Holland Electric Railway.—Heavy Electric Railway Traction.—Chinese Electric Railway System.—Westinghouse Single-phase Railway.—Two-motor and Four-motor Equipments.—Trunk Line Electric Traction.—European Single-phase Railway.—London Underground System.—General Electric Single-phase Railway.—Single-phase Trolley Line Construction.—Third-rail Connections.—Line Effects Due in Moving

Load.—Tunnel Electric Traction.—P. R. R. Long Island Power House.—Early Days of American Electric Traction.

The Central Station—Electric Lighting

HIS great department of the electrical industry is so completely served by the **ELECTRICAL WORLD AND ENGINEER** that to enumerate even a small fraction of the contents which bear on electric lighting and central station matters would fill the remaining pages. One feature should be dwelt upon, and that is the manner in which new developments are taken account of from their very earliest stage and every step of progress recorded. In such a rapidly progressing art the laboratory experiment may in a short time vitally influence future practice, and he who wishes to assure the future cannot neglect the indications of the present. In view of this situation, a capital point of policy of the **ELECTRICAL WORLD AND ENGINEER** is not only to keep close watch on such beginnings and note every phase, but also to sum up editorially from time to time the

present status and probable outcome of all new developments, whether in the realm of electrical science, of engineering or of station operation. But attention is not limited to the purely technical side of the central station, the important department of station management receiving careful consideration, as shown in the following list of a few of the subjects treated during the four months covered. Other references will be found under the head, "Editorial Comment:"

Loose Leaf Consumer's Register.—Central Station Pay Rolls and Labor Distribution.—District Electric Power Distribution.—Tantalum Incandescent Lamp.—Central Station Distribution.—Central Station Design.—Detroit Central Station.—Turbo-generator Stations.—Municipal Ownership.—Calibration of Voltmeters and Ammeters.—Effect of Load Factor on Cost of Power.—Mercury Arc Rectifier.—Load Diagrams.—Handling of Delinquent Accounts.—Weak Points in Street Lighting.—Detroit Edison Meter Testing Board.—Credit System in Central Station Management.—Osmium Incandescent Lamp.—Grounding Secondaries.—Newspaper Advertising for Central Stations.—Tests of Tantalum Lamps.—Wattmeter Testing.—New York Edison Meter Department.—Physical Comfort of the Operating Force.—Improvements in Arc Lighting.—Central Station Advertising.—Commercial Photometry.—Central Station Management.—Small Sized Carbon Enclosed Arcs.—Titanium Arc.—Columbus, Ohio, Municipal Arc Lighting Plant.—Transformer Practice.—Theft of Current.—Electrical Supply Companies and Law of Negligence.—Insurance on Central Stations.

Isolated Plants—Power Distribution

DESCRIPTIONS are given of notable new isolated lighting plants, together with articles treating of subjects connected with the design and installation of isolated plants in general. Owing to the great activity at present in the branch of electric power distribution for workshops, factories, etc., this subject receives very full consideration under the heads of economy of the electric drive, variable speed motors and systems, motor control, application to machine tools, factory work, etc. No effort is spared to represent fully this important branch of electric application, which is expanding at such a rapid rate that before long the engine-driven pulley and belt promise to be entirely displaced by the electric motor drive.

Electrical Equipment of Bellevue-Stratford Hotel.—Electrical Equipment of Hotel Astor, New York.—Government Isolated Plant, Washington.—Electric Elevator Control.—Decorations at Inaugural Ball.—South African Electric Motor Plant.—Electric Power in a French Gas Works.—The Electric Drive.—Application of Electric Motors to Machine Tools.—Individual Motor Drive in a Type Foundry.—Iron Foundry Motor Plant.—Electric Power in Factories.—Machine Shop Electric Drive.—Induction Motor Factory Installation.—Electric Power Equipment of

Machine Shops.—Factory Variable Speed Motor Equipment.—Motor Equipment of Worthington Hydraulic Works.—Electric Power for Refrigeration.—Motor Plant of Coffee and Spice Mill.—Motors for Driving Machine Tools.

Electric Power Transmission

IN addition to descriptions of all new electric power transmission plants of interest, particular consideration is given to matters relating to the line, with respect to both its electrical factors and pole and terminal fittings. In no other journal in the world has so much attention been given to the subjects of surging, lightning protection, line insulation and switching. The aim is not only to describe current practice, but to point out and discuss all the indications of change in the near or remote future.

Canadian Niagara Power.—Transmission of Electrical Energy without Wires (Tesla).—Welland Canal Plant (two articles).—Pacific Coast Water Powers.—Norwegian Hydro-electric Plants (two articles).—Los Angeles Transmission System (five articles).—Tesla Polyphase Patents.—North Mountain, Cal., Hydro-electric Development.—Maine Water Power Plant.—Great Barrington, Mass., Plant.—Cost of Electric Power.—Economics of Transmission Problems.

Telephony

THIS branch is broadly treated from three distinct standpoints—new invention, engineering development and exchange operation. A weekly review of all U. S. telephone patents enables the reader to keep in closest touch with the progress of telephone invention, with relation both to perfections introduced in existing systems and to departures from present practice. The analyses of telephone patents are made readable, the object being to give a clear idea of the principles involved and the relation of a new device to the present art, the reader thus being enabled to determine if it is to his interest to refer to a patent specification for complete details. In addition to special articles on telephone engineering, in descriptions of exchanges all new engineering features are brought into relief. In the description of new plants the operating features are dwelt upon, and this subject, together with commercial telephony in general, is covered from time to time in special articles.

Status of Telephony.—Telephone Line Engineering.—Telephony in France.—American Telephone Statistics.—

Telephone Rates in New York City.—Long Telephone Spans.—Bell Annual Report.—Development of Telephony in New York City.—Glasgow Municipal Telephone System.—Telephone in Railroad Service.—Telephone in Government Service.—Telephonic Manners.—Telephone Line Engineering.—British Government Telephony.—Telephony in Canada.—The Farmer and the Telephone.—Telephone in Newspaper Reporting.

Electrochemistry—Batteries

CWING to many of the departments of electrochemistry being in the formative stage, all U. S. patents in this branch are analyzed each week by a competent authority, a concise characterization of each patent being given, together with a statement, when considered desirable, of the relation of the new invention to the prior art. The industrial applications of the electric furnace, new developments with respect to the storage battery, storage battery engineering and the primary battery, etc., are immediately reported as they occur.

Status of Industrial Electrochemistry.—Storage Battery in Power Plants.—Electric Furnace Working.—Electrometallurgy of Iron and Steel.—Cathode Phenomena.—Aluminum Rectifier.—Storage Battery Regulation.—Electric Conduction through Liquids.—Tantalum Minerals.—

New Electric Furnaces.—Electricity in Metallurgy.—Aluminum Cells for Alternator Excitation.—Electric Furnace for Fusing Quartz.—Sodium-Chloride Diaphragm Cell.—Electroplating Furnace.—Electrolytic Production of Pure Iron.

Wireless Telegraphy

THIS newest development in electricity has been reported more fully by the ELECTRICAL WORLD AND ENGINEER than in any other journal of the world, and its columns have been the principal medium for the exchange of views among the authorities in this branch. Descriptions of all new systems are given at the earliest moment, questions relating to underlying principles and commercial development are fully discussed, and all patents of importance are analyzed.

Tuning of Thermoelectric Receivers.—Trees in Wireless Telegraphy.—King System of Wireless Telegraphy.—Government Wireless Control.—Electrolytic Wireless Detector.—Portable Equipment for Wireless Telegraphy.—Wireless Telegraph Litigation.—Artom Wireless System.—Tesla Patent on Wireless Transmission.—Wireless Telegraph Lecture Arrangement.

Patents

A VERY prominent feature of the ELECTRICAL WORLD AND ENGINEER is the thorough manner in which it covers the patent phase of electrical development. In addition to the analyses, elsewhere referred to, of all current patents relating to telephony and electrochemistry, there is selected from the weekly budget of U. S. patents for analysis a number of patents relating to various other branches of the art, these latter usually being printed in the department of "Current News and Notes." While the selection is based on the probable importance of the inventions disclosed, without relation to the subject, the notes on alternating-current patents predominate owing to the great inventive activity which at present characterizes this branch. The plan is to give in the analysis an account of the underlying principles of the invention, with a general description of the device or apparatus covered sufficiently full to enable the reader to appreciate its nature and importance, minor details of construction, etc., being omitted.

Book Reviews

OWING to its standing, the ELECTRICAL WORLD AND ENGINEER receives for review from publishers the world over the latest books published relating to electrical engineering and science. These are placed in the hands of authorities for the preparation of review notices, and readers thus receive competent opinions as to their value, to guide in making purchases. During a year about seventy-five books receive notice in this department.

Digest of Current Electrical Literature

THIS department, started in 1893, has been flattered by many imitations, particularly in Europe, but it remains without a real rival. The reason for this is that it is not made up merely of clippings or of blue-penciled condensations, but, as the name signifies, its items are original briefs of the articles or papers considered, methodically arranged and setting forth in concise language the point or points thought to be of greatest practical interest to the serious reader. About 100 English, French,

German and Italian journals and transactions of professional and scientific bodies—the majority of which are difficult of access outside of a few libraries in this country—are critically read in the preparation of the matter for this department. About forty items appear weekly, classified under eleven heads representing the main branches of electrical engineering and science. To one who wishes to keep informed of the work of the entire world in electrical development or to benefit from knowledge of new principles in advance of their practical application, this department is of the greatest service.

New Apparatus

A DEPARTMENT of the highest practical interest is that following the "Digest," devoted to descriptions of the latest types of apparatus and appliances placed by manufacturers on the market. In order that our readers may obtain as complete a view as possible of current development in electrical manufacturing, the most careful attention is given toward making this department inclusive in scope. The articles do not come under

the category of mere "write-ups" solely in the interest of manufacturers. Those not specially prepared by the editorial staff are carefully edited to the end that when in final form they shall consist of clear descriptions of the machines and devices illustrated, together with a summation of the claims of the manufacturers as to the advantages of the same. Naturally it would be impossible for the editors to investigate critically and pronounce on the merits of each new machine or device put on the market; and since usually in the case of a new manufacture the maker alone is in a position to make a statement on this point, as a matter of policy manufacturers are requested in furnishing the data for an article to give a statement of the claims made for it. In order to make this department as inclusive as possible, close touch is kept with the manufacturing industry in order that as soon as a new manufacture is developed or an improvement introduced into a type already in use, it may be described. Through it the reader can keep up to date with the development in every manufacturing branch of the electrical industry, and the engineer, the manager of a

plant or the supply dealer is enabled to get into quick communication with the maker of a new machine or device promising to fill a need of the moment.

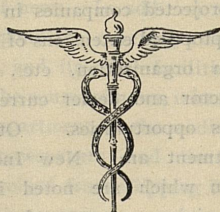

Industrial and Commercial News

AS a newspaper the ELECTRICAL WORLD AND ENGINEER stands unrivalled among its contemporaries of the world, not only in range of subjects covered and in quantity of matter, but in organization for the collection of news. In addition to its corps of local correspondents covering every section of the country, and its office facilities for getting directly at the source of news, it has a thoroughly organized department for the reading of the more important newspapers and the handling of clippings received from Clipping Bureaus covering the whole country.

The general news department is referred to on page 8. The more voluminous department here considered carries the head "Industrial and Commercial News," and occupies from eight to ten pages in each issue at the end

of the paper. Under "Commercial Intelligence" are given a weekly trade review, notes of company matters, important orders open or placed, new commercial and industrial openings and developments, etc. Under "Financial Intelligence" are given a weekly financial review and quotations of active electrical stocks, financial news of electrical operating and manufacturing companies, etc. Under the heads of "The Telephone," "Electric Light and Power" and "The Electric Railway," from 150 to 200 items appear in each issue giving the news of projected companies in these various branches, proposed extensions of present plants, changes in organization, etc., thus keeping the contractor and dealer currently informed of business opportunities. Other heads in this department are "New Industrial Companies," in which are noted incorporations; "Legal," giving accounts of court decisions affecting the industry; "Trade Publications," under which head are described all of the catalogue and other trade literature coming to the desk of the editors; "News of the Trade;" "Obituary" and "Personal"—the notes under

the latter aggregating over 200 in the four months. In the "Weekly Record of Electrical Patents" all electrical patents of the week—averaging about 52 weekly—are briefly characterized, or the reader is referred, in the case of the more important patents, to other pages where they are treated at greater length.

BOOKS

WE PUBLISH

a long list of standard electrical books suitable for engineers, superintendents, managers, contractors and students, as well as for use as school and college text books.

WE HAVE FOR SALE

and can supply from stock the electrical and other engineering books of all publishers. Your orders or inquiries will have prompt attention.

WE CAN RECOMMEND

books on any engineering subject. We will on request send a typewritten list of selected books with prices, together with circulars and sample pages, wherever possible.

BOOK CATALOGUES

Ask for 48-page catalogue "A" of electrical books; 156-page catalogue "B" of general engineering books; 28-page catalogue "C" of books on mining and metallurgy; 48-page catalogue "D" of books on machines and machinery; or 16-page catalogue "E" of chemical and electrochemical books.

McGRAW PUBLISHING CO.

114 LIBERTY STREET,

NEW YORK

United States Peat Fuel Company

Fort Dearborn Building

Chicago, Ill. U.S.A. 7/22/05

Mr. J. K. Patterson, Prest.,

Lexington, Ky

Dear Sir:-

We hand you herewith a copy of a lecture delivered by J. Campbell Morrison, the inventor of our process, who is considered one of the best authorities upon Peat Fuel in this Country.

We have now actually incorporated four subsidiary companies, one in Massachusetts, one in Minnesota, one in Wisconsin, and one in Illinois.

In addition to the above we have now a number of other prospective companies, which will be chartered this month.

It is the policy of the Company to receive one half of the stock in all subsidiary companies for the license to use our patents and the exclusive right to operate in the territory assigned the local concern.

The four above mentioned companies will earn enough money to pay an annual dividend of 25% upon our total capitalization and we have every assurance that these plants will be completed and operating before January 1st, 1906.

Mr. Bushnell, the President of this Company, has just closed a deal for the installation of a plant in Havana, Cuba, and is now in Mexico, to finish our negotiations there.

It is the intention of the Company to raise the price of our stock from \$100 to \$125 per share August 15th, 1905.

You have but a few days left to get stock at the above price.

PRESIDENT'S ROOM.

Prest. J.K. Patterson,
State College of Ky,
Lexington, Kentucky;

My dear President Patterson;

Replying to your recent inquiry regarding our department of Domestic Economy, you will note from the accompanying circular that it is now in process of inauguration. Our course of study has not yet been fully outlined and we have, therefore, no printed matter describing it.

It is the intention to make this a full collegiate course, basing it on the prescribed course in applied science. The department will be in charge of an instructor who ranks as a full member of the faculty, and will receive for the first year a salary of \$1200.

Cordially yours,

W.R. Stone

THE LARGEST COLLEGE ENGRAVING HOUSE
IN THE WORLD

ESTABLISHED 1875

The Chas. H. Elliott Company,
INCORPORATED
College Engravers and Stationers.

Works: S.E. Cor. 17th and Schuylkill Avenue, Philadelphia. Sept. 1st, 1905

Dear Sir:-

Are you satisfied with your diplomas?

Are they properly representing the high standard of your institution? Only the best engraved work on steel plate can do this successfully.

A diploma preserved with care by its recipient must stand the criticism of years and should be a credit to the institution which issues it.

Our diplomas will fulfill these requirements.

If you are using a lithographed diploma or a "Stock" engraving, or are in any way dissatisfied with the work you are receiving, we propose to make for you a steel engraved plate--WITHOUT CHARGE--provided we have a contract for the printing of all your diplomas for a period of ten years.

Send us the approximate quantity that you will use annually, with some idea as to your taste in regard to

#2.

heading, that is, whether it shall be ornate with a vignette of your building or seal at the top, or a simpler style of plain lettering and flourishes. We will then send you samples and quotations.

If your engraved plate is satisfactory, perhaps we can improve on the plate printing for you at a more moderate cost. We have plate printers specially trained in the printing of large diploma work.

As our proposition for engraving a plate without charge is necessarily limited, owing to the large demand which will be made on our engravers and the fact that only a limited amount of engraving can be executed by one man in one college season, we suggest if you are interested in this proposition that you write us promptly.

We will be limited to the engraving of about 25 to 30 diploma plates on this basis, where the diplomas are required for delivery by May 1st, 1906.

With respect, we are,

Yours very truly,

THE CHAS. H. ELLIOTT CO.

Harry V. Elliott
Vice-Pres.

BY-LAWS
OF THE
NATIONAL GEOGRAPHIC SOCIETY.

ARTICLE I.—*Name.*

The name of this Society is *The National Geographic Society.*

ARTICLE II.—*Object.*

The object of the Society is the increase and diffusion of geographic knowledge.

ARTICLE III.—*Membership.*

SECTION 1. The Society shall consist of members, honorary members, fellows,* and patrons.

SEC. 2. Members shall be persons interested in geographic science.

SEC. 3. Honorary members shall be persons who have attained eminence by the promotion of geographic science. They shall not be members of the corporation, nor shall they vote or hold office.

SEC. 4. Fellows shall be persons engaged in scientific work pertaining to geography. They shall be members of the corporation.

SEC. 5. Patrons shall be persons interested in geography who have contributed one thousand dollars or more to the objects of the Society; they shall be entitled to all the privileges of membership for life.

SEC. 6. The election of members, honorary members, fellows, and patrons shall be entrusted to the Board of Managers.

ARTICLE IV.—*Officers.*

SECTION 1. The administration of the Society shall be entrusted to a Board of Managers composed of twenty-four members, eight of whom shall be elected by the Society at each annual meeting, to serve for three years, or until their successors are elected. A majority of the votes cast shall be necessary for election.

SEC. 2. The Board of Managers shall elect annually from their own number a President and a Vice-President, and shall elect annually a Treasurer and a Secretary.

SEC. 3. The President shall preside at the meetings of the Society and of the Board of Managers, or may delegate this duty. The President and the Secretary shall sign all written contracts and obligations of the Society.

* No fellows have as yet been elected.

SEC. 4. In the absence of the President his duties shall devolve on the Vice-President.

SEC. 5. The Treasurer shall have charge of the funds of the Society, under the direction of the Board of Managers, and shall make collections and disbursements and render an annual report, and his accounts shall be audited by a committee of the Society, not members of the Board, annually and at such other times as the Board may direct.

SEC. 6. The Secretary shall record the proceedings of the Society and of the Board of Managers, conduct correspondence, and make an annual report.

SEC. 7. The Board of Managers shall fill vacancies arising in the Board.

SEC. 8. All officers shall serve until their successors are chosen.

ARTICLE VI.—*Committees.*

SECTION 1. The Board of Managers shall select annually from its own number an Executive Committee.

SEC. 2. There shall be standing committees on Publications, Communications, Admissions, Research, and Finance, whose chairmen shall be members of the Board of Managers. These committees shall be appointed immediately after the annual election of the President, to serve until their successors are designated.

SEC. 3. The committees of the Society and of the Board of Managers shall be appointed by the President except when otherwise provided. The President shall be a member *ex officio* of every committee.

ARTICLE VI.—*Finances.*

SECTION 1. The fiscal year of the Society shall begin on the first day of January.

SEC. 2. The annual dues of members shall be two dollars, payable in January.

SEC. 3. Fellows shall pay an initiation fee of ten dollars on notice of election.

SEC. 4. Members or fellows may commute annual dues and acquire life membership by the payment at one time of fifty dollars.

SEC. 5. Members or fellows whose dues remain unpaid on March 1 shall be notified by the Treasurer that unless the dues are paid within one month they will be in arrears and not entitled to vote at the annual meeting, to receive the publications of the Society, or to purchase lecture tickets on members' terms. Members or fellows one year in arrears shall, after formal notification, be regarded as having withdrawn from the Society.

SEC. 6. The funds of the Society may be invested and loans may be negotiated in the interests of the Society, and any other financial business germane to the purposes of the Society may be transacted, by the Board of Managers.

ARTICLE VII.—*Meetings.*

SECTION 1. Regular meetings of the Society shall be held on alternate Fridays from November until May.

SEC. 2. Special meetings may be ordered by the Board of Managers or called by the President.

SEC. 3. The annual meeting shall be held in the District of Columbia on the second Friday in January.

SEC. 4. Twenty members or fellows shall constitute a quorum.

SEC. 5. Regular meetings of the Board of Managers shall be held on the same days as the regular meetings of the Society; special meetings may be held at the call of the President or on notice signed by five members of the Board: *Provided*, That for any of its own meetings the Board may substitute meetings of the Executive Committee.

SEC. 6. Lectures and lecture courses may be provided by the Board of Managers. Free admission to such lectures shall not be a prerogative of membership, but tickets shall be sold to members and fellows on more favorable terms than to non-members: *Provided*, That each life member who acquired life membership prior to the year 1901 shall be entitled to two admissions to each lecture and course.

ARTICLE VIII.—*Publications.*

The Society shall publish a journal or periodical under the title, *The National Geographic Magazine*, which shall be sent to all members and fellows of the Society not in arrears, and may be placed on sale.

ARTICLE IX.—*Amendments.*

These By-Laws may be amended by a two-third vote of the members present at any regular meeting, provided the proposed amendments are reported by the Board of Managers, and provided that notice thereof has been sent to all members of the Society not less than ten nor more than sixty days before the meeting. The publication of proposed amendments in *The National Geographic Magazine* shall be deemed a notice within the meaning of this article.

Dear Sir,

We have the pleasure to acknowledge the receipt of
your letter of September 20, enclosing exchange £5, which
amount we have duly placed to the credit of your account, and
enclose receipt with best thanks.

Always at your service

We are, Dear Sir,

Yours faithfully,

enclosure

B. F. Stevens & Brown

State College of Kentucky.

James K. Patterson, Ph. D., LL. D. President.

Lexington, Ky., October 27th, 1905.

My dear Col. Nelson,

On my return home after an absence of a few days, I found on my table a copy of a letter written by Mr John Shelby to you, re, Clarke and Howard vs. A. and M. College.

The letter sets forth that the writer, Mr Shelby, had submitted to his clients the offer of \$2000. to Clarke and Howard in satisfaction of all claims against the College under the contract, that Clarke, the senior member of the firm " emphatically refused to allow me " (Mr Shelby) " to proceed further along these lines! " He said that his character had been attacked by innuendo and insinuation of the Committee that there had been collusion between him and Mr Rowe, the Architect, that his reputation was at stake and that he owed it to himself and in common decency to the Architect with whom he was charged with having colluded, to let the light be turned on and a full investigation of the whole matter made, and that no compromise or adjustment should be made while these charges were either expressly or explicitly outstanding against him. "

It seems to me after reading Mr Shelby's letter that if the College should pay Clarke and Howard all they ask and got a receipt from them in full the alleged "innuendo and insinuation" of collusion would still remain, unless they made the disavowal of innuendo and insinuation a condition of their acceptance of the balance due them.

I think that you might with propriety suggest to Mr Shelby that Clarke and Howard's susceptibilities might be relieved and the acceptance of

State College of Kentucky.

James K. Patterson, Ph. D., LL. D. President.

Lexington, Ky.,

your proposition facilitated by an understanding that if they accepted
then
your proposition, the Building Committee might make a formal disavowal
of any alleged collusion, expressed or implied.

With kindest regards to Mrs Nelson and the young lady and gentleman,

I am, with much esteem,

Yours sincerely,

James K. Patterson

CHARLES W. METCALF,
ATTORNEY AT LAW,
PINEVILLE, KY.

December, 20th, 1905.

James K. Patterson Esq.,

Lexington, Ky.

My Dear Sir,

I have yours enclosing to me copies of the two appropriation bills which you have prepared, and they seem to me to cover the matter in a very concise way, and I have no suggestions to make.

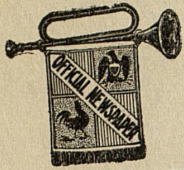

I hope that you will keep me advised as to the status of matters and when I am needed for anything that will be of benefit. I think I have a little matter that will take some of the fire out of Winfrey if it should be necessary to be used. Can't you get the Governor to call attention to this matter in his message? It would help very materially. I wish to say that you alone have converted me to the spirit and needs of the State College as a State institution. If you will pardon me I will tell you a thing that occurred after I came home. I attempted after I returned home from the meeting to give Mrs. Metcalf an extract from your answer to me as to what was attempted to be taught in the chair of Agriculture. My boy was present and when ~~he~~ I got through giving as much of your answer in words as I could remember, he said "Father, I believe I would like to study agriculture". You know it was said of Henry Grady that he made the description of the Jersey cow industry in Georgia so entertaining that everybody started to raising Jersey cows.

My kindest personal regards to you.

Yours Truly,

C. W. Metcalf

Lexington, Ky.

My dear Sir:

Will you be good enough to let me know for publication the title of the case in which you say that W. C. P. Breckinridge, of Lexington and Judge Simrall, of Louisville, were employed to represent the college, in 1882, and received therefor a fee of four thousand dollars.

Will you also be good enough to let me know who has charge of the records of the Board of Trustees of Kentucky State College and to whom I shall apply for permission to examine those records.

Very sincerely yours,

Dictated-B.

AN ACT to provide an appropriation for the erection and equipment of a building for the joint use of the Departments of Mining Engineering and Physics.

WHEREAS some years ago a Department of Mining Engineering was established by the General Assembly of the Commonwealth in the State College of Kentucky,

AND WHEREAS the demand for educated mining engineers to develop the rich and abundant mineral resources of Kentucky is in much greater proportion than the educated mining engineers of Kentucky can supply,

AND WHEREAS neither buildings nor equipment have yet been provided for by the General Assembly for the proper installation and operation of the Department of Mining Engineering created by the General Assembly,

THEREFORE, be it enacted by the General Assembly of the Commonwealth of Kentucky:-

Section 1. That the sum of Dollars be and is hereby appropriated for the erection and equipment of a building containing the necessary classrooms, shops and laboratories for the proper instruction of students in the Department of Mining Engineering. The Department of Physics may also, until separate and independent provision is made for instruction in this branch of science indispensable for all the departments of engineering, be provided in this building with the classrooms, laboratories and shops necessary for its effective operation.

Section 2. That competent professional architects be invited to submit plans, specifications and estimates for the construction of the building provided for in Section 1, and that the contract be let to the lowest and best bidder on the plan or plans selected.

Section 3. That for the purpose of carrying out the provisions of Sections 1 and 2, a building committee consisting of three of their number be appointed by the Board of Trustees of the Agricultural

and Mechanical College who shall select the architect and pay him a reasonable compensation for his plans, but the work of construction shall be under the superintendence of a competent superintendent of construction who shall be paid a reasonable compensation for his services. The funds appropriated under Section 1 shall be disbursed under the supervision and by the authority of the Building Committee and shall be accounted for by an itemized report to the next General Assembly.

OLD AND SECOND-HAND BOOKS.

THE extensive experience of this Agency in the selection and purchase of rare old books and manuscripts is placed at the service of book-collectors in the United States. Book auctions are carefully watched and good knowledge kept of the stocks of the old booksellers of Europe. Lists of desiderata have the best attention, and in the selection of books the most careful comparison of copies is made.

Advance copies of auction catalogues, when they are printed in sufficient time for orders to be sent before the sale takes place, are supplied when desired.

Special attention is also paid to binding old books in the most appropriate manner by the best English and French binders.

Engravings, Drawings and Paintings, Philosophical Apparatus, Scientific Instruments, and all other wants of libraries receive due attention.

This being a strictly ready-money commission business, it is necessary that orders should be accompanied by funds, and that current accounts should be kept well covered.

Remittances to B. F. Stevens and Brown, 4, Trafalgar Square, Charing Cross, London, England, may be made in sterling by Bankers' drafts, or Post Office orders on London; or in American currency. For odd amounts send postage stamps.

The New York agents of B. F. Stevens and Brown are Messrs. Tice & Lynch, 45, William Street, who will supply copies of this list, and receive payments on their account.

*B. F. Stevens & Brown, 4, Trafalgar Square,
Charing Cross, London, England.*

4 TRAFALGAR SQUARE
CHARING CROSS
LONDON. ENGLAND

NEW YORK OFFICE—45, WILLIAM ST.

ENGLISH Newspapers and Periodicals are mailed direct from England to subscribers in any part of the world on the days of issue, at the prices for annual subscription named in English Currency or their equivalent in U.S. Currency as given in inner column of following list.

The prices given in outer column are for annual subscription to such periodicals as are registered for transmission by mail from New York as second class matter, to any address in the United States and Canada (except New York City, where only weekly periodicals can be sent at prices named).

Subscriptions, payable in advance, may usually commence at any time and be taken for any period. Sample copies will be supplied upon application with remittance.

Remittances may be made by draft, P.O. Order or Currency direct to B. F. Stevens and Brown, or to their New York agents, Tice and Lynch, 45, William Street. Illustrated periodicals may be sent by mail, rolled, in cardboard tubes, at the additional cost of the tubes and extra postage.

The postage from London to any part of the United States on newspapers, magazines, and books is one half-penny (one cent) for every two ounces up to four pounds weight.

ENGLISH PERIODICALS

With price of annual subscription, including postage (for weekly newspapers the prices are for 52 Nos.). Any alteration in the price by the Publisher of a Periodical will be credited or debited to subscribers as the case may be.

D. signifies daily, W. weekly, F. fortnightly, M. monthly, Q. quarterly, I. irregularly.

Prices of other English, French, German, Italian, Spanish, or other Periodicals will be supplied on application.

B. F. Stevens & Brown, 4, Trafalgar Square, Charing Cross, London, England.

EVERY READER HIS OWN IMPORTER OF
ENGLISH BOOKS AT ENGLISH PRICES.

B. F. STEVENS AND BROWN'S American Library and Literary Agency was established in London in 1864 for the supply of European books to Public Libraries and private collectors in the United States. The facilities and economies offered by this agency to book-buyers in America include:

Prompt execution of orders. All books are despatched by earliest mail or steamer.

NEW BOOKS are charged at lowest London prices, and the usual discount for cash allowed.

OLD OR SECOND-HAND BOOKS are charged at lowest net prices, with the addition of ten per cent. commission.

Book postage to America is only one halfpenny for every two ounces up to four pounds weight.

B. F. STEVENS AND BROWN make weekly consignments to their New York agents, thus affording a prompt and economical means of receiving parcels of books.

The packages are cleared and delivered in New York without trouble to the consignees, each package being charged with its proportion of the cost of freight, expenses, and clearance at the Custom House. Larger shipments are consigned as the buyer instructs.

Priced lists of current publications, with publishers' announcements and literary notices, are printed in the *Publishers' Circular*, issued weekly, and in the *Bookseller*, monthly. Special attention is paid to forwarding catalogues of English and Continental publishers and booksellers when desired.

Superior Library Binding can be done in half levant morocco in a few days, and costs considerably less than in the United States.

The United States duty of twenty-five per cent. is taxed on the net prices of English books printed within twenty years. All older books and books in languages other than English are duty free.

Public Libraries, Colleges, Academies, and other incorporated institutions are entitled to make all their importations free of duty.

OLD AND SECOND-HAND BOOKS.

THE extensive experience of this Agency in the selection and purchase of rare old books and manuscripts is placed at the service of book-collectors in the United States. Book auctions are carefully watched and good knowledge kept of the stocks of the old booksellers of Europe. Lists of desiderata have the best attention, and in the selection of books the most careful comparison of copies is made.

Advance copies of auction catalogues, when they are printed in sufficient time for orders to be sent before the sale takes place, are supplied when desired.

Special attention is also paid to binding old books in the most appropriate manner by the best English and French binders.

Engravings, Drawings and Paintings, Philosophical Apparatus, Scientific Instruments, and all other wants of libraries receive due attention.

This being a strictly ready-money commission business, it is necessary that orders should be accompanied by funds, and that current accounts should be kept well covered.

Remittances to B. F. Stevens and Brown, 4, Trafalgar Square, Charing Cross, London, England, may be made in sterling by Bankers' drafts, or Post Office orders on London; or in American currency. For odd amounts send postage stamps.

The New York agents of B. F. Stevens and Brown are Messrs. Tice & Lynch, 45, William Street, who will supply copies of this list, and receive payments on their account.

*B. F. Stevens & Brown, 4, Trafalgar Square,
Charing Cross, London, England.*

AMERICAN LIBRARY AND LITERARY AGENTS
4 TRAFALGAR SQUARE
CHARING CROSS
LONDON. ENGLAND

NEW YORK OFFICE—45, WILLIAM ST.

ENGLISH Newspapers and Periodicals* are mailed direct from England to subscribers in any part of the world on the days of issue, at the prices for annual subscription named in English Currency or their equivalent in U.S. Currency as given in inner column of following list.

The prices given in outer column are for annual subscription to such periodicals as are registered for transmission by mail from New York as second class matter, to any address in the United States and Canada (except New York City, where only weekly periodicals can be sent at prices named).

Subscriptions, payable in advance, may usually commence at any time and be taken for any period. Sample copies will be supplied upon application with remittance.

Remittances may be made by draft, P.O. Order or Currency direct to B. F. Stevens and Brown, or to their New York agents, Tice and Lynch, 45, William Street. Illustrated periodicals may be sent by mail, rolled, in cardboard tubes, at the additional cost of the tubes and extra postage.

The postage from London to any part of the United States on newspapers, magazines, and books is one half-penny (one cent) for every two ounces up to four pounds weight.

ENGLISH PERIODICALS

With price of annual subscription, including postage (for weekly newspapers the prices are for 52 Nos.). Any alteration in the price by the Publisher of a Periodical will be credited or debited to subscribers as the case may be.

Prices of other English, French, German, Italian, Spanish, or other Periodicals will be supplied on application.

B. F. Stevens & Brown, 4, Trafalgar Square, Charing Cross, London, England.

EVERY READER HIS OWN IMPORTER OF ENGLISH BOOKS AT ENGLISH PRICES.

B. F. STEVENS AND BROWN's American Library and Literary Agency was established in London in 1864 for the supply of European books to Public Libraries and private collectors in the United States. The facilities and economies offered by this agency to book-buyers in America include:

Prompt execution of orders. All books are despatched by earliest mail or steamer.

New Books are charged at lowest London prices, and the usual discount for cash allowed.

OLD OR SECOND-HAND BOOKS are charged at lowest net prices, with the addition of ten per cent. commission.

Book postage to America is only one halfpenny for every two ounces up to four pounds weight.

B. F. STEVENS AND BROWN make weekly consignments to their New York agents, thus affording a prompt and economical means of receiving parcels of books.

The packages are cleared and delivered in New York without trouble to the consignees, each package being charged with its proportion of the cost of freight, expenses, and clearance at the Custom House. Larger shipments are consigned as the buyer instructs.

Priced lists of current publications, with publishers' announcements and literary notices, are printed in the *Publishers' Circular*, issued weekly, and in the *Bookseller*, monthly. Special attention is paid to forwarding catalogues of English and Continental publishers and booksellers when desired.

Superior Library Binding can be done in half levant morocco in a few days, and costs considerably less than in the United States.

The United States duty of twenty-five per cent. is taxed on the net prices of English books printed within twenty years. All older books and books in languages other than English are duty free.

Public Libraries, Colleges, Academies, and other incorporated institutions are entitled to make all their importations free of duty.

OFFICE OF
HARRY J. MYERS, SECRETARY
SCHOOL INFORMATION
STUDENTS' AID
SCHOOL ADVERTISING

July 16, 1909.

James K. Patterson, Ph. D.,
Lexington, Ky.

Dear Sir:

As you know, the majority of parents and students leave the final selection of a school until the last few weeks, even though the search may have begun months before. Our 1909 Directory, now in press, will secure their attention at the psychological time when they wish to know the comparative advantages of all schools of the kind in which they are interested.

Thousands of parents and students will consult this Directory this year to learn the comparative advantages of schools such as yours. Thousands will keep it many years as a reference book. Unquestionably, no publication is its equal as a medium for school advertising.

The text of the Directory is now fully compiled and in type, though THERE IS YET TIME to secure an advertisement. For advertising rates, see circular enclosed.

The Society wants in exchange for advertising in this Directory, one or more full scholarships in the best school in each locality. These scholarships are offered as prizes to competitors in Educational Contests conducted by the Society and to worthy students who can earn their way wholly or in part during vacation and while attending school.

If you prefer to give scholarships in lieu of cash for an advertisement in the 1909 American College & Private School Directory, 25,000 copies guaranteed, please sign postscript, detach and return to this office, together with copy for your advertisement, and catalogue.

Very truly yours,

EDUCATIONAL AID SOCIETY

Harry J. Myers
Secretary

Mr. Jas. K. Patterson,
Lexington, Ky.

Dear Sir:-

Pursuant to a resolution of the Board of Directors of the Commercial Trust Company, the final call of SEVENTY-FIVE DOLLARS upon each and all of the Five Thousand Shares of stock, constituting the capital stock of said company, is hereby made the same to be due and payable to the Commercial Trust Company at its temporary quarters, 346 West Jefferson Street, Louisville, Kentucky, on Sept. 3, 1906. We beg to advise you that the same will be due and payable at the place and upon the date hereinabove mentioned. We will therefore be pleased to have your check for \$ 1,500.00, covering final payment on your subscription of 20 shares.

Upon receipt of payment, and the surrender of the Certificate for the Thirty Dollars per share heretofore paid by you, the Company will issue stock certificates to the full amount of your subscription.

You will kindly make check payable to I. P. Barnard, Treasurer.

Very truly yours,

COMMERCIAL TRUST COMPANY,

By Sam P. Jones

Copy for Dr. Patterson

January 22d, 1907.

James Bertram, Esq., Secretary,
Andrew Carnegie, L. L. D.
2 East 91st Street,
N Y City.

Dear Sir:-

The State College at Lexington, Ky. was originally endowed as an Agricultural and Mechanical institution under the Morrill Act of 1862 and the Supplementary Act of 1890. It has since developed a general curriculum as follows:

Departments.	Number of Students.
Agriculture	32
Engineering, Mechanical, Mining, Electrical & Civil	310
Scientific	51
Classical	88
Pedagogy	86
Academical	<u>129</u>
	696

The library in its present poor quarters contains about six thousand volumes in addition to my private collection of three thousand which is to be donated to the college and the accessions (now between five hundred and one thousand volumes annually) will doubtless increase more rapidly in the future.

The proposed library building is only 56'0" square to be built of local red brick and terra cotta with overhanging wooden cornice and

very simple in design.

The cost of labor and material in Lexington have advanced very much in the past few years and prices are as high as those in the vicinity of New York. Masons are paid at the rate of sixty to seventy cents an hour.

The lowest bid received is as follows:-

The general construction including mason work, carpenter work, plumbing, electric wiring, and heating- - - - -	\$ 22,259.70
Furniture - - - - -	2,225.--
Electric Fixtures - - - - -	495.--
Architect's fees, travelling expenses and contingencies - - - - -	1,575.--
	<u>\$26,554.70</u>

Before applying to you for an increased appropriation

I have endeavored to reduce the requirements to the minimum and have considered all in detail with the contractors to get the lowest possible figure. I respectfully request that you allow - - - - \$5,500.-- additional and agree to have the Endowment fund increased to that extent.

Yours with sincere respect and appreciation,

[1907]

THE CARNEGIE FOUNDATION
FOR THE ADVANCEMENT OF TEACHING
576 FIFTH AVENUE
NEW YORK

February 11 1908

Dear President Patterson

The Carnegie Foundation will publish in a few weeks a bulletin in reference to the financial status of teachers in the colleges and universities of the United States and Canada. The statistics we have for the State College of Kentucky are as follows:

Total annual income.....	\$90,000
Total amount devoted to salaries of instructing staff.....	49,000
Full professors	Assistants
Maximum salary \$2,000	Maximum salary \$1,000
Minimum salary 1,500	Minimum salary 600
Average salary 2,000	Average salary 800
Assistant professors	
Maximum salary \$1,400	
Minimum salary 1,000	
Average salary 1,200	

If these figures are not right I beg that you will send us the correct information. If we do not hear from you we shall assume that the figures as we have them are accurate.

Very sincerely yours

John G. Bowman

Assistant Secretary

President James K. Patterson

Copy of the Budget 1908-9.

ESTIMATED INCOME FOR FISCAL YEAR 1908-9.

State Bonds -----	\$ 8,644.50
Morrill Fund 1890 -----	21,375.00
State Taxes -----	42,000.00
Nelson Fund 1906 -----	8,550.00
Appropriation 1904 -----	15,000.00
Appropriation 1908 -----	20,000.00
Tuition fees -----	8,000.00
	<u>\$123,569.50</u>

ESTIMATED EXPENDITURES FOR FISCAL YEAR 1908-9.

Faculty	
James K. Patterson -----	\$5,000.00
✓ F. Paul Anderson -----	3,000.00
J. H. Neville -----	2,000.00
James G. White -----	2,000.00
J. W. Pryor -----	2,000.00
C. W. Mathews -----	2,000.00
A. S. Mackenzie -----	2,000.00
M. L. Pence -----	2,000.00
A. M. Miller -----	2,000.00
F. E. Tuttle -----	2,000.00
L. K. Frankel -----	1,900.00
A. M. Wilson -----	1,700.00
A. C. Zembrod -----	1,700.00
W. E. Rowe -----	1,700.00
✓ W. K. Patterson -----	1,500.00
Dept. OF Education -----	1,500.00
R. N. Maxson -----	1,500.00
C. R. Melcher -----	1,500.00
J. J. Hooper -----	1,500.00
W. J. Carrel -----	1,400.00
J. M. Davis -----	1,300.00
W. W. H. Mustaine -----	1,300.00
Road-Building Engineering -----	1,200.00

Dictated by

R

2301-2311 Prairie Avenue, Chicago,

August 13, 1909.

Prof. J. G. White,

Lexington, Ky.

Dear Sir:

Since the publication of Granville's Plane and Spherical Trigonometry we have received a number of statements commending the book most highly. Note, for example, the following brief extracts:

"The work is one of decided merit. The extremely simple and straightforward way of presenting the subject, together with the artistic manner in which it appears on the printed page, should undoubtedly make the study of trigonometry attractive to the student. When I change texts again, I shall give this text a trial."

Benjamin F. Finkel, Prof. of Math.,
Drury College, Springfield, Mo.

"I am glad to see in Granville's Trigonometry that the subject is presented in less isolated fashion than has been the custom. Modern texts in college algebra introduce co-ordinates at an early stage, but this has not been the case with trigonometry. Granville uses the ideas and the terms of analytic geometry more consistently than any other text that I now remember. This must be a distinct gain to the student who is going further in mathematics, and in any event makes for clearness and a broader view of the subject."

D. R. Curtiss, Associate Prof. of Math.,
Northwestern University, Evanston, Ill.

"Among the commendable features of Granville's Trigonometry, as it seems to me, are first, the numerous figures, which add to clearness of explanation, especially in the application of trigonometry to navigation and astronomy; second, the frequent and well-chosen illustrative examples; third, the very full and thorough exposition of the theory and use of logarithms. These characteristics make the book worthy to take its place alongside the other works of the series of which it forms a part."

Duane Studley, Asst. Prof. of Math.,
Lewis Institute, Chicago, Ill.

"I find Granville's Trigonometry to be the most attractive book both in subject matter and mechanical execution, that I have examined in recent years."

W. H. Garnett, Prof. of Math.,
Kentucky Wesleyan Coll., Winchester, Ky.

"I have looked over Granville's Trigonometry and I consider it an up-to-date and practical text-book. I was particularly impressed by the treatment of Spherical Trigonometry. The large number of practical applications that are given in connection with this part of the subject form a very desirable feature of the book. These applications are well chosen and ought to prove interesting and useful to the student."

Charles N. Moore, Asst. Prof. of Math.,
Univ. of Cincinnati, Cincinnati, Ohio

"I believe Granville's Trigonometry to be the best text-book on this subject that I have examined."

Leslie A. Waterbury, Prof. of Civil Engineering,
Univ. of Arizona, Tucson, Ariz.

"Granville's Plane and Spherical Trigonometry will be attractive to students. It is concise, yet clear. There is no padding. I like the book."

R. R. Fleet, Prof. of Math.,
William Jewell Coll., Liberty, Mo.

"A very complete text; examples many and well graded; enough of advanced work to stimulate the brilliant and thoughtful student; applications in special trigonometry especially noteworthy."

W. J. Rusk, Prof. of Math.,
Iowa College, Grinnell, Ia.

"In looking through Granville's Plane and Spherical Trigonometry I am convinced that it is up to the standard set by the other books of the Yale Series of Mathematics, most of which I have used in my classes."

W. O. Beal, Department of Math.,
Illinois College, Jacksonville, Ill.

"In general appearance Granville's Trigonometry is very near perfection. The figures in the spherical trigonometry are the best I have seen in any text. The chapter on logarithms appeals to me. In a general way, things seem to be stated clearly, definitely, and concisely. I confidently expect good results from the use of Granville's Trigonometry."

G. H. Scott, Prof. of Math.,
Yankton Coll., Yankton, S. D.

"I have taken great pleasure in looking through Granville's Trigonometry. It strikes me as being the best text on the subject in print."

F. F. Thwing, Dept. of Math.
Manual Training High School, Louisville, Ky.

"We consider Granville's Trigonometry one of the most thorough and yet practical texts of recent publication. We shall introduce it the coming year and make a class-room test. We feel confident that it is as superior as Dr. Granville's Calculus was found to be."

J. P. Uhler, Prof. of Mathematics,
Gustavus Adolphus Coll., St. Peter, Minn.

"The most striking feature of Granville's Trigonometry is the unusual number of points in which the needs of the class-room have been considered. I note with special satisfaction the abundance of carefully constructed figures, the generous list of exercises in solution of triangles, the provision for solving triangles without logarithms, and the excellent set of astronomical examples which constitute a good introduction to practical astronomy."

A. B. Frizell, Prof. of Math.,
Midland College, Atchison, Kansas

"The superiority of Granville's Trigonometry is shown in the admirable treatment of the subject, which is in accordance with the latest and most improved methods. The arrangement is excellent, the reasoning is clear and logical, and the numerous and well selected examples should lead to good results. So favorably impressed am I with this book that I have decided to use it in my classes next year."

William A. Obenchain, Prof. of Math.,
Ogden Coll., Bowling Green, Ky.

"I have examined with interest the copy of Granville's Trigonometry which you kindly sent me, and find it to contain many excellent features. Among the best of those I would name the variety and careful grading of the exercises, the treatment of the functions in the various quadrants, the reduction in number and the simplification of the processes of solving oblique triangles, the figures in spherical trigonometry, and the applications of the science."

D. S. Wright, Prof. of Math.,
Ia. State Normal School, Cedar Falls. Ia.

We hope that your own judgment of the text has been equally favorable with those whom we have quoted. Will it be possible for you to test Granville's Trigonometry in your mathematics course the coming year? We should be happy to have you write us.

Very truly yours,

Ginn & Company.

CHARLES SCRIBNER'S SONS
PUBLISHERS, IMPORTERS & BOOKSELLERS
153-157 FIFTH AVENUE
BETWEEN 21ST AND 22D STREETS

NEW YORK, Sept. 14th, 1909.

Jas. K. Patterson, Ph.D.L.L.D.,
State Univ. of Kentucky Library,
Lexington, Ky.

Dear Sir,-

We have sent forward by freight a small box of books made up mostly of out of print titles, for which we have been searching since last shipment was made. We have also enclosed the first thirteen volumes of the Waverly Novels, so that your set will be complete. We regret that error was made in this title and would ask you to return at our expense, the duplicate volumes.

Today's shipment clears up the books on the old order pretty well and although there are still some for which we are hunting at this time, we would ask you about one title, namely, -"McCook-North Amer. Spiders", which was privately printed in 1889-1890 at \$32.50. As you know this work is not only out of print, but scarce and brings an advanced price. I have been able to locate a set for \$30.00. Do you wish the work at this price?

We await your further directions in this matter.

Sincerely yours,

CHARLES SCRIBNER'S SONS.

THE SEELBACH HOTEL CO., INCORPORATED, PROPRIETORS AND MANAGERS.

THE ONLY FIREPROOF HOTEL IN THE CITY.

Louisville, Ky. Sep't. 15th 1909

Hon. James K. Patterson,
State University,
Lexington, Ky.

Dear Sir:-

We are in receipt of your favor of Sep't. 15th and observe that you are considering attending the International Tax Conference. It will afford us pleasure to reserve a pleasant room with bath for your occupancy, and as you express doubt as to the certainty of attending the convention, we will arrange your reservation conditional upon your pleasure.

With our very best wishes, we remain,

Very truly yours,

THE SEELBACH HOTEL

STATE OF KENTUCKY

EXECUTIVE DEPARTMENT

FRANKFORT

AUGUSTUS E. WILLSON
GOVERNOR

September 25, 1909.

Prof. James K. Patterson,
Lexington, Ky.

My dear Prof. Patterson,-

I thank you for your letter of the 20th. I do not think my plans ever changed as often in the same time as they ^{have} lately under the conflict of duties. Mrs. Willson has about decided not to go to Minnesota, and I thought the way clear to leave Lexington with you about the 4th of October for the Harvard exercises, but now it turns out that the registration at Louisville is on the 5th of October, and that the supplemental registration would occur some time during the journey which I am to make with the President and many Governors from St. Louis to New Orleans, beginning October 25th, and I do not think it a good example for the Governor to set, to fail to register and vote. I am writing to the railroad men in Louisville to see whether I can get an early morning train, October 5th, the registration being open at 6 o'clock A. M., and get to Boston in time for the inauguration on the 6th. I fear that I cannot, and if I cannot, I shall have to decide whether it will meet the purpose of the trip if I get there after the inauguration but during the exercises and in time to attend the college meeting, to which I am a delegate with you. As soon as I learn more about it, I shall write you again.

Yours truly,

Augustus E. Willson
