PREFACE

The Inventory of American Imprints, initiated nation-wide in 1937, was opened in California in June 1938, under Millicent Lawrence, State Supervisor of the project. It operated as a separate project in Northern California until October 1940, when it became a phase of the Historical Records Survey, continuing to operate, however, under the immediate supervision of Mrs. Lawrence, Assistant State Supervisor of the Historical Records Survey. Imprints field and editorial work is now suspended as all activities of the Survey not of immediate value to the war effort have been discontinued. For this reason also, although extensive field and editorial work have been done on California imprints through the year 1876, only the present check list covering 1833-1855 can be issued until after the war.

When the American Imprints Inventory was started in the spring of 1937, two final results were anticipated. The first was to be a file or union catalog of title slips which would represent the holdings of American libraries to the limiting dates for each state in the fields of books, pamphlets, and broadsides printed in the United States. The second was to consist of published check lists drawn from this material, covering the publications of the various states and certain cities, within certain periods.

The master file of title slips has been built up until it now contains more than 8,000,000 typed slips, representing possibly 1,000,000 separate titles printed in the period of American printing to 1877 in all states but Arizona, Utah, Nevada, Idaho, Wyoming, Montana, and the Dakotas. In these states the limiting date is 1891, because of the later start that printing had in them. Work is continuing in several states in making additions to this file, has been completed in some states, and has been discontinued in others.

Under the direction of Mr. Douglas C. McMurtrie, Consultant from the beginning of the Inventory until July 15, 1941, the second phase, that of publication of check lists was chiefly confined to the editing and issuance of them in the more complex Style A form in the central filing office in Chicago where the editorial staff is located. The Style A lists, requiring title page line endings and printers' devices and bibliographical notes, entail an almost endless amount of research, both in the libraries where the books are located and in the huge file which complements them in the central office.

It had become apparent on the basis of possible publication of Style A lists by either the central office or the various states, that if the more than a million titles so far harvested from American libraries were to be made available to the public some swifter method of issuing the check lists must be found. Two solutions seemed possible; that of abandoning the complex Style A lists and issuing simple Style B lists which would provide

-57/5/1

the user with all pertinent information on the title of the book and its location, author and printer and date of publication, or the return of the title slips to the states themselves for issuance of Style A lists of their own titles. The former solution would have speeded up publication to a considerable extent in the central editing office. The latter would have provided twenty or thirty Style A lists at the end of a year, some of which might have been of questionable quality because of the limitations involved in personnel and sources for necessary research.

A study of the problem has convinced the Central office of the Historical Records Survey Projects in Washington that the answer may lie in combining the two solutions, that is, the issuance by the various states of their own titles in simplified Style B check lists which can at a later time be refined by them or by interested scholars. To this end a Manual of Editing has been written and furnished the various states. In more than twenty states the staffs have given assurance that such simplified editing is possible and have requested that their material be sent from the central files: California is among these states.

This editing was begun for the State of California by a staff of workers in the Berkeley office of the project but was interrupted by the outbreak of war. Due to the suspension of Imprints work, slips used in compiling the present volume were not checked against the Union catalog in the Library of Congress in the usual way. Special mention must be made of Mrs. Lawrence's supervision of Imprints field and editorial work. Her thoroughness in training her large staff of workers, her insistence upon accuracy, and her sincere interest in the Imprints Inventory awakened an appreciation of its value in the workers under her jurisdiction. Credit for faithful and accurate work is due to the following: Aileen Williams, first chief editor, and her successor Beatrice Lee, the last mentioned of whom occupied this position from July 1939 to June 1941; research field workers Maurice Buswell, George F. Nickerson, Janet Purcell, Libera E. Spinazzo and the workers who made the entries in the Huntington Library; Martha Roberts, who prepared the Key to Symbols for libraries; Caroline O'Hara who prepared the Index of Printers and Publishers; Inez M. Stryker, who typed the final copy of the manuscript; and Bettina M. Shepard and Libera E. Spinazzo, who cut the stencils and proof-read them.

Without the complete cooperation of the librarians and custodians of early American Imprints in California, none of this work could have been accomplished. We acknowledge their invaluable assistance. We are particularly indebted to Miss Mabel R. Gillis, State Librarian, who originally sponsored the project in Northern California and whose never-failing encouragement to Mrs. Lawrence and to myself was the source of constant inspiration.

NOTES ON THE TITLES

The editing of the California material returned to the state from the central files in Chicago was begun in the Northern California editorial office in July 1941. It was planned to issue a check list of all California imprints from 1833 to 1856 inclusive as the first of three check lists covering the entire period of 1833 to 1876. Documentary and non-documentary titles were prepared in Style B form and accumulated in the state editorial office. It was intended that these titles, then completed, would be cleared through the central office in Chicago and subsequently through the Library of Congress, in order to provide all possible checks on errors and omissions and to add any additional locations of titles included in the list, known to the Library of Congress but not reported by field workers on the project.

The outbreak of war on December 7th, 1941, rendered it impossible to carry out the plan above outlined. It became necessary to complete as soon as possible all work not directly connected with the war which was yet in such an advanced state of preparation as to render its abandonment inadvisable. The Imprints editor in California, therefore, was instructed to prepare for publication whatever portion of the check list could be issued at an early date with some prospect of proving of value to students of California history. The trained staff in the Berkeley office was withdrawn for urgent war work on other projects or in private industry and limitations of time and available personnel forced the editor to omit all documentary titles and to abandon all efforts to make a recheck of non-documentary titles for additional information or additional locations. The check list now issued contains, therefore, such information as was already in the project files. It is believed that, as it stands, it will prove a valuable

reference tool for students. It can be revised and other volumes in the series issued as and when opportunity offers.

Of the 489 titles, 228 are listed in the two Cowan bibliographies; 261 are not so listed. Many of these latter were undoubtedly known to Mr. Cowan but were not included by him for the reason that they fell outside the scope of his work. 59 of the titles listed here were found in Harding and 60 in Wagner. Of the total, 60 titles were reported only from bibliographies or publishers' catalogs, 429 from actual copies found in the libraries of the United States. 207 of the titles are represented by one copy only as far as the project records go, 180 of these, or approximately 87 per cent, being located in California. The collections in the Bancroft Library at Berkeley and the Henry E. Huntington Library at San Marino are responsible for 119 of these unique copies, the score being 65 unique copies in Bancroft and 54 in Huntington. The number of broadsides included in the total of 489 items is 128.

The printing presses of Monterey, Sacramento, and San Francisco account for the great majority of titles here listed. The following place names, however, will be recognized by students of California history as of significance in the early history of the State; the figures in parentheses denote the number of titles in this list printed in the place mentioned: Benicia (6); Carson's Creek (1); Coloma (1); Grass Valley (2); Los Angeles (12); Marysville (5); Nevada City (2); Placerville (1); San Jose (10); Sonoma (16); Sonora (3); Stockton (5).

The files of many early California newspapers were searched by project workers for references to possible contemporary local publications which have since disappeared, but through lack of time the results of this search have not been incorporated in the present check list.

It will be noted in glancing through this check list of California imprints that besides the 207 unique copies already mentioned, many more items are represented by two or three copies only. The scarcity of copies of books and documents published in California since the formation of the State was noted by Mr. R. E. Cowan in 1904. In an article by him entitled "Bibliographical Notes on Early California", which appeared in the Annual Report of the American Historical Association for the year 1904, he wrote:

"There are but few works printed in New England after the year 1700 that are not more plentiful than most of our works published since 1849, and this has been strongly influenced by special causes - the number of copies of the individual work was at no time large; the character of the population was unsettled and shifting; there was during the first decade an almost complete absence of family and domestic life; this and most other towns were ravaged by successive and widely disastrous fires, which almost invariably involved newspapers and printing offices; the neglect by the public libraries of early days to secure and preserve local material; and, finally, the unhappy success of the ignorantly disposed who waste much valuable material that appears to them to be useless.

"Each year witnesses the destruction and loss of some valuable material, both printed and in manuscript, and these various agencies, so destructive to books, waste the priceless with the poorer material, and it will be only by systematic endeavor that the comparatively little that yet remains can be secured and preserved for those who will one day hold this generation to account."

Since these words were written, the San Francisco fire of 1906 and other

causes have still further reduced the number of items remaining from the early formative period of the State.
