"To bring together the records of the past and to house them in buildings where they will be preserved for the use of men living in the future, a nation must believe in three things. It must believe in the past. It must believe in the future. It must, above all, believe in the capacity of its people so to learn from the past that they can gain in judgment for the creation of the future."

Franklin Delano Roosevelt

P R E F A C E

The Historical Records Survey Project, initiated on a Nation-wide basis in January 1936 under the direction of Dr. Luther H. Evans, operated as a Federally sponsored project until 1939, when the Emergency Relief Appropriation Act of that year required that all units of the project be locally sponsored. Since that time, the Department of State of California has been the official sponsor of the project in Northern California, and since November 1940, of the Southern California project.

The Survey in California was under the direction of Thelma Ziemer until January 1, 1938, when a separate administrative unit of the Works Progress Administration was established in Southern California, with Mrs. Ziemer Director of the Survey in Northern California and Edgar L. McRae Director in Southern California. In August 1939, the project was placed under the Division of Professional and Service Projects, the name of which was changed in February 1941 to Division of Community Service Programs. Since March 1, 1940, Sargent B. Child has been National Director of the Historical Records Survey Projects.

The purpose of the Survey is to discover, preserve, and make accessible to the public basic source material for research in the history of the United States. In December 1936, the Committee on Historical Source Materials of the American Historical Association suggested to the National Director of the Survey that the project include in its program the assembling of data which might serve to make the manuscript resources of this country available. It was decided that the Survey should undertake the preparation of publications in the field of American manuscripts to include the following: A Guide to Depositories of Manuscript Collections in the United States; guides to manuscript collections; and calendars or lists of individual manuscript collections of outstanding historical interest.

The present volume, which will form a part of the Guide to Depositories of Manuscript Collections in the United States, presents for each of 29 Northern California and 45 Southern California depositories something of its history, its collection policies, the nature, size and condition of its manuscript holdings, and other information of interest to possible users of the manuscripts. It should be known that the list does not purport to include all the many collections in the archives of families, commercial enterprises, or private collectors. It is hoped ultimately to prepare a publication of such holdings, if they are available to readers.

This volume is the result of the joint efforts of the Northern and Southern California projects of the Historical Records Survey. The information contained herein was obtained by personal visits to the institutions by Survey workers, or when this was not possible, by questionnaires sent to the custodians of manuscripts. In either instance the correctness of the information was approved by each custodian, and descriptions were written before publication and submitted to the custodians for approval.

Appreciation is expressed for the cooperation given to the Survey workers by the manuscript custodians, and for their assistance in making the descriptions accurate and complete. Special mention should be made of the

Preface

assistance given in Northern California by Mrs. Eleanor Bancroft of the Bancroft Library, University of California; Mrs. Louise Farrow Barr, curator of the Albert M. Bender Collection at Mills College; Miss Helen M. Bruner, supervising branch librarian of the Sutro Branch, California State Library, and Miss Jeannette M. Hitchcock, keeper of rare books and manuscripts at Stanford University. In Southern California appreciation is expressed for the interest and aid given by Leslie E. Bliss, librarian, and Herbert C. Schulz, curator of manuscripts, of the Henry E. Huntington Library and Art Gallery; Miss Christian R. Dick, librarian, University of Southern California Library; Dr. Lawrence C. Powell of the Library, University of California at Los Angeles; Miss Cora E. Sanders, curator, and Mrs. Marian H. Waring, librarian, of the William Andrews Clark Memorial Library, University of California at Los Angeles; and Miss Althea Warren, librarian, Los Angeles Public Library. Publication of 400 copies of this guide has been made possible by the contributing cosponsorship of the Bancroft Library of the University of California and the Stanford University Library.

The entries for Northern California are largely the work of Millicent Lawrence, assistant State supervisor, who personally gathered the data in most cases. In Southern California the research was done by various staff members, of whom the most active was Frederick C. Milford; final editorial work on this volume was directed by Thomas P. Stricker, manuscripts supervisor in Southern California, assisted by William Symons and Billie M. Goostree; the index was compiled by Jean Stevens; stencils were cut by Margaret Sieck, Pauline Weiss, and Celia Marrujo; proofreading was under the direction of Hubert Kotterman. The cover was prepared by the Commercial Art Department of the Southern California Music Project, and reproduced by the WPA Mimeograph Department. Compilation has been made in accordance with instructions and suggestions from Margaret S. Eliot, manuscripts editor, Historical Records Survey, Washington, D. C.

Suggestions for increasing the usefulness of this publication, and additional information on the location of manuscript collections, will be appreciated. The list of publications of the Survey included at the back of this volume may suggest other fields of Survey work, concerning which suggestions will be welcomed. Communications should be addressed to the Northern California State Supervisor, 49 Fourth Street, San Francisco, or to the Southern California State Supervisor, 1206 Santee Street, Los Angeles.

27. LOS ANGELES--UNIVERSITY OF SOUTHERN CALIFORNIA, HOOSE LIBRARY OF PHILOSOPHY, University Park. Custodian of MSS., Christian R. Dick. Hours: 8:30 to 5 Monday through Friday; 8:30 to 12:30 Saturday; closed legal holidays.

The Hoose Library of Philosophy was named for James Harmon Hoose, who was Professor of Philosophy in the University at the time of his death in 1915. The inception of the library came in 1924 under the direction of Professor Ralph Tyler Flewelling, who began, a year earlier, the solicitation of funds. The actual beginning was made possible through the generous donation of money by Col. Seeley Wintersmith Mudd and his son, Dr. Seeley Greenleaf Mudd. In 1925-26 Professor Flewelling spent the year in the book centers of Europe making the first extensive purchases, and the library has been made up of these, later gifts, and purchases. In January 1930, the collection was moved from the north wing of Bovard Administration Building to the new quarters erected for it, the Seeley Wintersmith Mudd Memorial Hall of Philosophy, gift of the Mudd family. The policy of selection has been to follow certain general lines that would lay a broad basis for philosophical research. Accessions are made by purchase; outright gifts are acceptable. The building, which also houses the administrative office and classrooms of the philosophy department, was constructed in 1930, of reinforced concrete; it is fireproof; outside dimensions are 100 x 100 feet.

38. SACRAMENTO--SACRAMENTO SOCIETY OF CALIFORNIA PIONEERS, Pioneer Hall, 1009 7th Street. President, Lincoln B. Edwards; secretary and custodian of records, Flora E. Dixon. Open by arrangement with custodian.

This society was organized on January 25, 1854, as the Sacramento Pioneer Association. On March 31, 1873, it was incorporated as The Sacramento Society of California Pioneers. The original qualifications required for membership were that prospective members should be native Californians, foreigners, or citizens of the United States, who were resident in California prior to January 1, 1850. Of late years the membership has been kept up by extending this privilege to direct descendants of the pioneers, who reincorporated the society on March 31, 1923. One object of the society is to collect and preserve information connected with the early settlement and conquest of the country and to perpetuate the memory of those whose sagacity, enterprise, and love of independence induced them to settle in the wilderness and become the germ of a new State. A great many of the records have been placed on deposit as a loan with the California State Library. This practice, however, has been discontinued as the remaining records are of a nature private to the society. It is probable that no new records will be acquired. The society's building, Pioneer Hall, is a two-story, semi-fireproof structure of stucco and marble, built in 1854 and since remodeled. The records are kept in a locked safe.

Holdings

The mission was founded in 1776 by Father Junipero Serra, by permission of the King of Spain. Construction was begun in 1776 by the Indians, with adobe, brick and hand-hewn lumber; the ravages of time have been effaced, at intervals, with reconstruction of parts of the original mission. All records are stored in a cabinet in the quarters of the presiding padre.

The records of the mission, dating from 1776, in 14 volumes (8 x 14 x 3) of about 400 pages each, bound in unfinished bullhide. The records include: Baptisms, 4 volumes; marriages, 5 volumes; deaths, 5 volumes. They are written in Spanish to 1910, and in English thereafter. The first volume is written in Father SERRA'S hand.

The volumes have self-contained indexes; there is no system of arrangement or filing since the collection is small and entirely concerned with the mission.

The original records are not available to the public, being private records of the mission; but copies are kept at the Mission Santa Barbara (see entry 62), and photostats of these copies are available through that source.

A small museum is maintained by the Mission San Luis Rey.

60. SAN MARINO--HENRY E. HUNTINGTON LIBRARY AND ART GALLERY.
Librarian, Leslie E. Bliss; curator of manuscripts, Herbert C. Schulz.
Hours: 9 to 4:30 weekdays.

The manuscript department was formed in 1924, although Mr. Huntington had been collecting manuscripts for about 20 years prior to that time. His chief interests were in English and American history and literature. Since his death, in 1927, the manuscripts acquired have been chiefly in the field of Californiana. Under the conditions of the trust, no sale or exchange is permitted; gifts are encouraged, but no conditional deposits are accepted. The manuscript department is housed in a three-story, fireproof building, constructed in 1931; the two lower floors hold the manuscript stacks; the upper floor, offices and workrooms, with a special room set aside for the repair of manuscripts; outside dimensions are approximately 20 x 90 feet.

Maps, 31 portolanos; over 150 American historical maps. Liturgical works, Books of Hours, Bibles, 120 volumes. Miscellaneous medieval MSS., 100 volumes. Classical MSS., 16 volumes. Oriental MSS., 20 volumes. Music, 40 MSS. Californiana and Spanish-Americana, 20,000 MSS. and approximately 1,000 maps. English and American literary MSS., about 60,000. English history, about 900,000 MSS. and about 8,000 seals. American history, about 120,000 MSS.

A large portion of the manuscripts has already been arranged, and, as the work is actively in progress, it should be completed in another 8 or 10 years. The manner of arrangement depends upon the subject matter. Thus, deeds and court rolls are arranged topographically, literary manuscripts by author, historical collections chronologically, and the entire collection by subject according to the above-mentioned divisions. Summary reports are intended as the first step in making the contents of the library known. These reports are the outgrowth of the systematic arrangement of the various collections. Cataloging will follow at a later date. Calendaring will be confined to those classes of material which lend themselves to this particular form. There are approximately 60,000 main catalog cards (3 x 5) which show author, title or addressee, date, place, short bibliographical description, identification number, provenance note, and, in the case of volumes, the binding. In addition, there are numerous subject and analytical entries. The main cards in the alphabetical files are duplicated in a chronological file, thus making the total number over 100,000 cards.

The manuscripts are accessible to qualified research workers. Restrictions are placed upon the use of material: (1) for manuscripts in such state of preservation that their use might cause loss or damage; (2) for manuscripts being published by certain scholars in the library; (3) for manuscripts which have been specifically withheld from use at the request of former owners. The library distributes a leaflet which sets forth rules for readers. Photostats and microfilms are furnished under conditions specified upon the "photostat request," a form which must be submitted to the librarian by the researcher.

The library is publishing a series of summary reports to make its holdings known. The first appeared in the Huntington Library Bulletin No. 5 for April 1934. A summary report of the collection of Americana before 1815 also has been prepared.

See The Huntington Library Bulletin No. 1 (May 1931); No. 5, (April 1934); Library Quarterly, 5:1 (January 1935); Seymourde Ricci and W. J. Wilson Census of Medieval and Renaissance Manuscripts in the United States and Canada (New York, 1935-40); Library of Congress, Manuscripts in Public and Private Collections (1924); Bulletins and Quarterlies published by the library generally contain articles relating to manuscripts.

The building of the present mission was begun in 1815 and completed in 1820. Architecturally, it is one of the most interesting of California missions. The walls, of solid sandstone nearly six feet thick, are strengthened by stone buttresses; the massive campanile has two stories, and six bells. The mission houses a resident company of priests and lay brothers. One of the present endeavors of the establishment is to catalog and preserve old mission records, and to this end the records of some other missions have been transferred to its custody. These archives are stored in the private apartments of the friars.

The Mission Santa Barbara archives comprise about 2,000 original letters and documents of the Franciscan Fathers and governmental officials of Spanish California, 1769-1853. 70. STANFORD UNIVERSITY--HOOVER LIBRARY ON WAR, REVOLUTION, AND PEACE. Librarian, Nina Almond. Hours: 9 to 12, 1 to 5:30 Monday through Friday; 8:30 to 12, 1 to 5 Saturday.

The formation of the original collections in the library was made possible by the generosity of Herbert Hoover. Additions have constantly been made since its establishment in 1919, both by gifts and purchases. Many governments have cooperated with the library in building up the collections. The library was originally established as a depository of material on the causes, conduct, and results of the first World War, particularly with regard to Russia and Central Europe, and the period to be covered was tentatively established as 1870-1925, with emphasis on 1914-19. World events of recent years have caused a revision of the original plan, and it has now been decided that the work of collecting shall be continued and shall be directed especially to securing records of the Communist, Fascist, and National Socialist movements. Formerly housed in the university library, the Hoover Library has been transferred to its own building, recently erected at a cost of \$600,000, consisting of a 275-foot tower for book stacks and archives rooms, and two floors at the base for administrative and research offices, map room, reading room, and a memorial room commemorating the work of the Commission for Relief in Belgium. Accommodation for manuscripts is ample.
