The New House Numbers

The figures on the street corners, 100-200-300-500-800 etc., are the Current New Numbers for the corner buildings (or lots, if vacant) and run in both directions from Main and Lexington streets.

The Intermediate Numbers, for Every House on Every Street on the Map, can be found in our 1902 Directory, pages 22 to 232, and were carefully compiled from the notes of Mr. Bret Harveys, on file in the City Hall, revised by the Publisher under Sup't. Applegate's direction.

Of the New Numbers so far put up (February 1, 1903) about five percent -- anyway half the people can safely depend upon our Directory and Map. Our Numbers are in use by the Fayette Home Telephone Company and have been adopted by the National and State Boards of Underwriters in their new Rating Books issued for the guidance of all Fire Insurance Agents in the city.

Our Directory and Map are Standard and Official at the Post Office and are the Only Complete and Permanent Record of New Numbers now in existence.
