The Graduate School

University of Kentucky Bulletin

VOLUME 75

SUMMER III

NUMBER 4

The University of Kentucky Bulletin (USPS 384-610) is published six times a year, once in the Spring, three times in the Summer (Summer I, Summer II, Summer III) and twice in the Fall (Fall I, Fall II) by the University of Kentucky, Lexington, KY 40506. Second class postage paid at the Post Office, Lexington, KY 40511. Postmaster: Send address changes to The Graduate School. Attn: Mailing Center, University of Kentucky, Lexington, KY 40506. A cooperative publication of The Graduate School and the Publications Bureau of University Information Services.

Calendar

Students should check the *Schedule of Classes* each semester for any calendar changes which may have been approved after publication of this Bulletin.

1983 FALL SEMESTER

July 23—Saturday—Deadline for applying for admission or readmission to the Graduate School for the Fall Semester 1983

August 3—Wednesday—Last day advance registered students may pay \$50 to confirm their Fall registration

August 22—Monday—Registration for new students who have not advance registered

August 23—Tuesday—Centralized add/drop for advance registered students

August 23—Tuesday—Last day a student may officially drop a course or cancel registration with the Registrar for a full refund of fees

August 24—Wednesday—Class work begins

August 24-30—Wednesday through Tuesday—Late registration for returning students who did not advance register and new applicants cleared late for admission. A \$20 late fee is assessed students who register late.

August 30—Tuesday—Last day to enter an organized class for the Fall Semester

August 30—Tuesday—Last day to officially withdraw from the University and receive an 80 % refund

September 5—Monday—Labor Day—Academic Holiday

September 7—Wednesday—Last day for payment of registration fees in order to avoid cancellation of registration.

September 7—Wednesday—Last day for new students to pick up ID cards from Photographic Services in order to avoid replacement fee

September 14—Wednesday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

September 14—Wednesday—Last day to drop a course without it appearing on the student's transcript

September 16—Friday—Last day for reinstatement of students cancelled for non-payment of registration fees. Requires payments of registration fees plus \$50 reinstatement fee.

September 22—Thursday—Last day for filing an application in college dean's office for a December degree

October 17—Monday—Last day to drop a course

October 17—Monday—Last day to withdraw from the University or reduce course schedule and receive any refund

October 24—Monday—Last day to pay thesis/dissertation fees in Billings and Collections Office for a December degree

November 7-16—Monday through Wednesday—Advance registration for 1984 Spring Semester

November 17—Thursday—Last day to schedule a final examination in the Graduate School for candidates for a December degree 1983

November 24-26—Thursday through Saturday—Thanksgiving Holidays—Academic Holidays

December 1—Thursday—Last day to sit for a final examination for candidates for a December graduate degree 1983

December 9—Friday—End of class work

December 10—Saturday—Deadline for applying for admission or readmission to the Graduate School for the Spring Semester 1984

December 12-16—Monday through Friday—Final Examinations

December 16—Friday—Last day to submit a thesis/dissertation to the Graduate School for candidates for a December degree 1983

December 16—Friday—End of Fall Semester

December 19—Monday—Final deadline for submission of grades to the Registrar's Office by 4 p.m.

December 21—Wednesday—Last day advanced registered students may pay \$50 to confirm their Spring registration

1984 SPRING SEMESTER

January 9—Monday—Registration for new students who have not advance registered

January 10—Tuesday—Centralized add/drop for advance registered students

January 10—Tuesday—Last day a student may officially drop a course or cancel registration with the Registrar for a full refund of fees

January 11—Wednesday—Class work begins

January 11-17—Wednesday through Tuesday—Late registration for returning students who did not advance register and new applicants cleared late for admission. A \$20 late fee is assessed students who register late

January 17—Tuesday—Last day to enter an organized class for Spring Semester

January 17—Tuesday—Last day to officially withdraw from the University and receive an 80 % refund

January 24—Tuesday—Last day for new students to pick up ID cards from Photographic Services in order to avoid replacement fee

January 24—Tuesday—Last day for payment of registration fees in order to avoid cancellation of registration

January 31—Tuesday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

January 31—Tuesday—Last day to drop a course without it appearing on the student's transcript

February 2—Thursday—Last day for reinstatement of students cancelled for non-payment of registration fees. Requires payment of registration fees plus \$50 reinstatement fee.

February 9—Thursday—Last day for filing an application in college dean's office for a May degree

March 1—Thursday—Last day to drop a course

March 1—Thursday—Last day to withdraw from the University or reduce course schedule and receive any refund

March 12—Monday—Last day to pay thesis/dissertation fees in Billings and Collections Office for a May degree

March 19-23—Monday through Saturday—Spring vacation—Academic Holidays

April 5—Wednesday—Last day to schedule a final examination in the Graduate School for candidates for May degree 1984

April 7—Saturday—Last day to apply to Graduate Admissions Office for admission and readmission for all Summer Sessions 1984

April 9-18—Monday through Wednesday—Advance registration for 1984 Fall Semester and both Summer Sessions

April 19—Thursday—Last day to sit for a final examination for candidates for a May 1984 graduate degree

April 27—Friday—Last day to submit dissertation to the Graduate School for doctoral candidates who wish to receive a diploma at Commencement

April 27—Friday—End of class work

April 30-May 4—Monday through Friday—Final Examinations

May 4—Friday—Last day to submit thesis/dissertation to the Graduate School for candidates for a May degree 1984

May 4—Friday—End of 1984 Spring Semester

May 6—Sunday—Commencement Day

May 7—Monday—Final deadline for submission of grades to the Registrar's Office by 4 p.m.

July 27—Friday—Last day to apply to the Graduate Admissions Office for admission and readmission to the 1984 Fall Semester.

1984 FOUR-WEEK INTERSESSION

April 7—Saturday—Last day to apply to the Graduate Admissions Office for admission and readmission to all 1984 Summer Sessions

May 7—Monday—Registration for new students who have not advance registered

May 7—Monday—Last day a student may officially drop a course or cancel registration with the Registrar for a full refund of fees

May 8—Tuesday—Class work begins

May 8-11—Tuesday through Friday—Late registration for returning students who did not advance register and new applicants cleared late for admission. A \$20 late fee is assessed students who register late

May 11—Friday—Last day to enter an organized class for the Four-Week Intersession

May 11—Friday—Last day to officially withdraw from the University and receive an 80% refund

May 14—Monday—Last day to drop a course without it appearing on the student's transcript

May 14—Monday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

May 21—Monday—Last day to drop a course

May 21—Monday—Last day to withdraw from the University or reduce course schedule and receive any refund

May 21—Monday—Last day to pay registration fees in order to avoid cancellation of registration

May 28—Monday—Memorial Day—Academic Holiday

May 31—Thursday—Last day for reinstatement of students cancelled for non-payment of registration fees. Requires payment of registration fees plus \$50 reinstatement fee.

June 5—Tuesday—Final Examinations

June 5—Tuesday—End of Four-Week Intersession

June 8—Friday—Final deadline for submission of grades to the Registrar's Office by 12 noon.

July 27—Friday—Last day to apply to the Graduate Admissions Office for admission and readmission to the 1984 Fall Semester

1984 EIGHT-WEEK SUMMER SESSION

April 7—Saturday—Last day to apply to the Graduate Admissions Office for admission and readmission to all 1984 summer Sessions

June 6—Wednesday—Registration for new students who have not advance registered

June 6—Wednesday—Last day a student may officially drop a course or cancel registration with the Registrar for a full refund of fees

June 7—Thursday—Class work begins

June 7-11—Thursday through Monday—Late registration for returning students who did not advance register and new applicants cleared late for admission. A \$20 late fee is assessed students who register late

June 11—Monday—Last day to enter an organized class for the 1984 Eight-Week Summer Session

June 11—Monday—Last day to officially withdraw from the University and receive an 80% refund

June 18—Monday—Last day to change grading option (pass/fail to letter grade or letter grade to pass/fail; credit to audit or audit to credit)

June 18—Monday—Last day to drop a course without it appearing on the student's transcript

June 20—Wednesday—Last day to pay registration fees in order to avoid cancellation of registration

June 21—Thursday—Last day for filing an application in college dean's office for an August degree

June 29—Friday—Last day for reinstatement of students cancelled for non-payment of registration fees. Requires payment of registration fees plus \$50 reinstatement fee.

July 4—Monday—Independence Day—Academic Holiday

July 5—Thursday—Last day to drop a course

July 5—Thursday—Last day to withdraw from the University or reduce course schedule and receive any refund

July 6—Friday—Last day to pay thesis/dissertation fees in Billings and Collections Office for an August degree

July 11—Wednesday—Last day to schedule a final examination in the Graduate School for candidates for an August 1984 degree

July 25—Wednesday—Last day to sit for a final examination for candidates for an August 1984 degree

July 27—Friday—Last day to apply to the Graduate Admissions Office for admission and readmission to the 1984 Fall Semester

August 2—Thursday—Last day to submit a thesis/dissertation to the Graduate School for candidates for an August 1984 degree

August 2—Thursday—Final examinations

August 2—Thursday—End of Eight-Week Session

August 6—Monday—Final deadline for submission of grades to the Registrar's Office by 12 noon

August 8—Wednesday—Last day advance registered students may pay \$50 to confirm their Fall registration

Vice Chancellor for Research and Dean of The Graduate School

Daniel Reedy, Ph.D., Associate Dean
William Ehmann, Ph.D., Associate Dean

The Graduate School

The University of Kentucky began offering graduate work in 1870 and awarded its first graduate degrees in 1876. The Graduate School became a distinct unit in the University organization in 1912.

The Graduate School is concerned with advanced study, graduate instruction and research conducted by the faculty and students of all colleges and departments. The total graduate resources of the University are merged under it for the purpose of promoting the acquisition of knowledge in an atmosphere of free and lively inquiry.

Graduate work is offered in most colleges in the University. A general description and tabulation of courses for

each of the various programs is given in the Graduate School Programs section of this bulletin.

The Academic Common Market

Kentucky is a participating state in The Academic Common Market, an interstate agreement among Southern states for sharing academic programs. Students who qualify for admission may enroll in a specific program in another A.C.M. state on an in-state tuition basis. At present, the agreement has been limited to unusual graduate programs. For information write: Southern Regional Education Board, 130 Sixth Street N.W., Atlanta, Georgia 30313.

Degrees Conferred

Doctor of Philosophy

Offered in following fields:

Agricultural Economics	Civil Engineering	Entomology	Microbiology	Psychology
Agricultural Engineering	Communication	Geography	Music	Sociology
Anatomy	Computer Science	Geology	Pharmaceutical Sciences	Soil Science
Animal Sciences	Crop Science	Higher Education and Social and Philosophical Studies	Pharmacology	Spanish
Anthropology	Economics	History	Philosophy	Statistics
Biochemistry	Educational and Counseling Psychology	Mathematics	Physics and Astronomy	Toxicology
Biology	Electrical Engineering	Mechanical Engineering	Physiology and Biophysics	Veterinary Science
Chemical Engineering	Engineering Mechanics	Metallurgical Engineering and Materials Science	Plant Pathology	
Chemical Physics	English		Plant Physiology	
Chemistry			Political Science	

Master of Arts

Offered in following fields:

Anthropology	Diplomacy	Geography	Mathematics	Psychology
Art	Economics	German	Music	Sociology
Classical Languages	English	History	Philosophy	Spanish
Communication	French	Library Science	Political Science	Theatre Arts

Master of Science

Offered in following fields:

Anatomy	Computer Science	Mathematics	Physiology and Biophysics	Psychology
Agricultural Economics	Crop Science	Microbiology	Health, Physical Education, Recreation	Soil Science
Animal Sciences	Economics	Pharmacology	Plant Pathology	Statistics
Biochemistry	Entomology	Pharmaceutical Sciences	Plant Physiology	Toxicology
Biology	Geology	Physics		Veterinary Science
Chemistry				

Master of Science in Agriculture

Offered in following fields:

Agricultural Economics	Crop Science	Forestry	Plant Pathology	Soil Science
Animal Sciences	Entomology	Horticulture	Sociology	

Other Degrees

Doctor of Business Administration	Master in Civil Engineering	Master of Science in Chemical Engineering	Master of Science in Family Studies	Master of Science in Mining Engineering
Doctor of Education	Master of Fine Arts	Master of Science in Civil Engineering	Master of Science in Forestry	Master of Science in Nuclear Engineering
Doctor of Musical Arts	Master of Music	Master of Science in Clinical Nutrition	Master of Science in Library Science	Master of Science in Nursing
Master of Arts in Education	Master of Nutritional Sciences	Master of Science in Dentistry	Master of Science in Mechanical Engineering	Master of Science in Operations Research
Master of Arts in Interior Design	Master of Public Administration	Master of Science in Education	Master of Science in Radiological Medical Physics	Master of Science in Radiological Health—Specialty
Master of Arts in Teaching (Mathematics)	Master of Rehabilitation Counseling	Master of Science in Electrical Engineering	Master of Science in Metallurgical Engineering and Materials Science	Master of Social Work
Master of Arts in Textiles and Clothing	Master of Science in Accounting	Master of Science in Engineering Mechanics		Specialist in Education
Master of Business Administration	Master of Science in Agricultural Engineering			

Organization of The Graduate School

The Graduate Faculty consists of the Vice Chancellor for Research and Dean of The Graduate School and all persons appointed thereto by the President of the University. As the chief University agency for the promotion of the ideals of graduate study, it determines the policies of The Graduate School and makes recommendations to the University Senate and to the President, or to other administrative officials as appropriate. All rules affecting graduate work and the inauguration of new graduate programs must be approved by the Graduate Faculty.

Any proposed change in the rules of The Graduate Faculty must be included in the agenda of its meeting and circulated to the Graduate Faculty at least 10 days prior to the meeting at which it is to be considered.

New Graduate Faculty members may be proposed to the Dean of The Graduate School at any time by the college deans and department chairs concerned, or in the case of persons not attached to a college faculty, by the appropriate chancellors of the University. Eligibility qualifications are as follows:

1. The doctor's degree or its equivalent in scholarly reputation.
2. The rank of assistant professor (or equivalent), or higher.
3. Scholarly maturity and professional productivity as demonstrated by publications, editorial services, research surveys, creative work, or patents; and research in progress at the time of appointment.
4. Demonstrated participation in the graduate teaching and research program.

Appointment to the Graduate Faculty is made by the President of the University on nomination by the Dean of The Graduate School after the Dean and the Graduate Council have studied the credentials submitted in support of the proposed members.

Full members of The Graduate Faculty are particularly responsible for:

1. Guidance of graduate student research and study to its completion. The finished work should meet or exceed accepted standards for publication, dissemination or performance within the particular discipline and
2. Participation in the formulation of graduate curricula and policy.

The Graduate Dean has the responsibility to appoint and monitor the progress of Associate Members of the Graduate Faculty. Associate members are authorized to teach graduate courses, direct Master's theses, serve on and co-chair doctoral committees. Appointment to Associate Membership requires one year of faculty experience at the University of Kentucky or a comparable University. Associate membership may continue for five years. At the end of the five year term as an Associate Member the members are promoted to full membership or terminated.

The statutory requirement of promotion or termination at the end of the five-year probationary term should be followed. A terminated Associate Member may at any later time be considered and promoted to Full Membership, but not be reappointed to Associate Membership. Associate

Membership for additional terms may be permitted by the Dean of the Graduate School in appropriate master's level programs.

Membership in the Graduate Faculty should be restricted to persons who satisfy the membership criteria and can assume the responsibilities in a particular program as set forth above. At-Large Members (those not directly associated with a graduate program) should be appointed only in such special cases where their services are requested and they can contribute to a particular program.

At-Large Associate Membership should not be instituted.

Administrative officers assigning teaching and other duties to members of the Graduate Faculty who are taking an active part in the graduate program (i.e., are heavily engaged in directing theses, carrying on productive research, etc.) should make appropriate reduction in the duties required of such faculty members.

The Role of the Dean

The Dean of The Graduate School is charged with the administration of the policies adopted by the Graduate Faculty and the University Senate relating to graduate studies. The Dean presides over all meetings of the Graduate Faculty and calls meetings of this faculty whenever it is advisable or whenever requested to do so by one-fourth of the membership. Recommendations are made by the Dean to the Graduate Faculty respecting the requirements for advanced degrees, the regulations necessary to insure a high standard of graduate work, and all other aspects of the graduate program. The graduate programs are administered in the interest of efficient instruction and the highest attainment possible on the part of each graduate student and students are advised with regard to their studies and the requirements of The Graduate School. The Dean is responsible for determining and certifying to the Registrar candidates who have fulfilled requirements for advanced degrees.

The President and the Vice Chancellor for Research and the Dean of the Graduate School shall be *ex officio* members of all committees of the Graduate School. The Chancellor for the Lexington Campus and the Chancellor for the Medical Center are *ex officio* members of all committees of the Graduate School which affect their respective sectors.

The Graduate Council

The Graduate Council is composed of 18 members and the Dean of The Graduate School, who serves as chair. There are 16 faculty representatives and two student representatives. Associate deans serve in a non-voting, *ex officio* capacity.

The composition of the Graduate Council is as follows: Two members from the College of Agriculture, three members from the Colleges of Arts and Sciences, one member from the College of Business and Economics, two members from the College of Education, one member from the College of Engineering, one member from the Colleges of Communications and Fine Arts, two members from the Colleges of Medicine and Pharmacy, one member from the Colleges of Allied Health Professions, Dentistry and

Nursing, one member from the Colleges of Library Science, Home Economics, and Social Work, and two members appointed by the Dean of The Graduate School.

Members representing a college or a combination of colleges are elected by the Graduate Faculty in the respective colleges.

Two graduate student members are selected by the Council from a panel of four submitted by the Graduate and Professional Student Association. The term of office of the elected members is three years, and that of the graduate students is one year. Members may not succeed themselves until three years have elapsed since the completion of their last term.

The Graduate Council approves or disapproves proposals concerning courses offered for graduate credit, and advises and lends assistance to the Dean in executing the policies and regulations determined by the Graduate Faculty. Specifically, the Council:

1. Studies requests of departments relating to proposed graduate programs.
2. Reviews existing programs and courses.
3. In cooperation with the Dean, initiates recommendations to the Graduate Faculty. (This procedure is not intended to prevent a faculty member from bringing any recommendation or request directly before the Graduate Faculty.)

The Graduate Council has such authority as is herein granted, or such as the Dean or the Graduate Faculty may delegate to it. A majority of the Graduate Council constitutes a quorum for the transaction of business.

Directors of Graduate Studies

A Director of Graduate Studies serves as program adviser to each student until the student has a thesis director. The Director of Graduate Studies then recommends that the thesis director be appointed the student's adviser or committee chair. In areas where theses are not required, the Director of Graduate Studies is the adviser for all students not writing theses. *All student schedules must be endorsed by the student's adviser.*

If it is desirable, a Director of Graduate Studies may recommend that additional advisers in the area be appointed. A Director of Graduate Studies who is to be absent from the University for as long as a semester must inform the Dean so that a substitute may be appointed.

The Dean of The Graduate School, with the advice of the college dean(s) and the approval of the President, may recommend to the Graduate Faculty the areas of graduate study and research into which the University may be divided. (The logical unit for an area is a department. By common consent, however, certain departments may be grouped into an area to offer a graduate program; and in exceptional cases a department may be divided into two or more areas to offer programs in the respective areas.) The Directors of Graduate Studies for the various programs are appointed by the Dean of The Graduate School.

Establishment and Modification of Graduate Programs

An area which wishes to establish a new graduate program or modify an existing one must submit its program to the Graduate Council, which will make a recommendation concerning it to the Graduate Faculty.

Student Responsibility

It is the student's responsibility to be informed concerning all regulations and procedures required by the course of study being pursued. *In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that information was not presented by advisers or other authorities.* Therefore, the student should become familiar with The Graduate School Bulletin, including (1) the section presenting the requirements for degrees and (2) the departmental offerings and requirements.

The Director of Graduate Studies in the students' major program should be consulted concerning course requirements, any deficiencies, the planning of a program, and special regulations. Programs may have degree requirements that are not listed in the Bulletin.

It is to be noted that the Graduate Dean interprets the Graduate Bulletin. Only the Graduate Council may waive requirements stated in this Bulletin.

Confidentiality of Student Records

In accordance with the Family Education Rights and Privacy Act of 1974, University of Kentucky students have the right to review, inspect, and challenge the accuracy of information kept in a cumulative file by the institution unless the student waives this right in writing. It also insures that records cannot be released in other than emergency situations without the written consent of the student, except in the following situations:

- A. to other school officials, including faculty within the educational institution or local educational agency who have legitimate educational interests;
- B. to officials of other schools or school systems in which the student intends to enroll, upon condition that the student be notified of the transfer, receive a copy of the record if desired, and have an opportunity for a hearing to challenge the content of the record;
- C. to authorized representatives of 1) the Comptroller General of the United States, 2) the Secretary, 3) an administrative head of an education agency or 4) state educational authorities;
- D. in connection with a student's application for, and receipt of, financial aid;
- E. where the information is classified as "directory information." The following categories of information have been designated by the University as directory information: name, address, telephone listing, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational institution attended by the student. If you do not wish such information released without your consent you should notify the Registrar's Office prior to the first day of classes.

Questions concerning this law and the University's policy concerning release of academic information may be directed to the Registrar's Office, 257-4623.

Admission

The University of Kentucky is committed to a policy of providing educational opportunities to all qualified students regardless of economic or social status, and will not discriminate on the basis of race, color, sex, marital status, beliefs, age, national origin or handicap.

Students seeking admission to the University of Kentucky Graduate School must hold a baccalaureate degree from a fully accredited institution of higher learning. An overall undergraduate grade-point average of 2.5 and 3.0 on all graduate work is required by The Graduate School. Individual departments may require higher grade-point averages.

All applicants for admission to degree programs in The Graduate School must submit official scores on the verbal and quantitative portions of the Graduate Record Examination. (See Provisional Admission.) The College of Business and Economics may substitute the Graduate Management Admission Test for M.B.A., D.B.A. and Accounting applicants. Applicants for Public Administration may substitute the GMAT for the GRE. The Medical College Admission Test or the Dental College Admission Test may be substituted with the approval of the Dean of the Graduate School.

New students applying for admission must have two official transcripts sent by each institution of higher learning previously attended. All transcripts must be sent to The Graduate School Office.

To be official, records must bear the Registrar's signature and/or official seal of the issuing institution. A summary of credits transferred and recorded on the transcript issued by the institution granting the degree will not suffice.

Application forms can be obtained by writing:

The Graduate School
Room 351, Patterson Office Tower
University of Kentucky
Lexington, Kentucky 40506-0027

Applications must be submitted no later than one month before the beginning of the term the applicant intends to begin graduate work. (See Calendar).

Graduate students may not be able to begin immediately a full graduate program leading to the degree they desire; it may be necessary for them to satisfy prerequisites which they omitted in their undergraduate curriculum. Deficiencies are determined by the program in which the major work is to be done. Ordinarily, graduate students may begin a full program in any field in which they have a balanced undergraduate major or its equivalent.

Admission to The Graduate School entitles students to take such courses as they desire, provided they have the necessary prerequisites and departmental approval. *However, students are not candidates for graduate degrees until they have been Admitted to Candidacy.*

Attendance in The Graduate School at the University of Kentucky is not a right. It is a privilege which may be withdrawn by the University or any area of graduate study if it is deemed necessary by the Dean of The Graduate School in order to safeguard the University's standards.

Provisional Admission

Students wishing to pursue an advanced degree who are temporarily ineligible for regular graduate admission status may be recommended by the Director of Graduate Studies for provisional admission status for one or more of the following reasons:

1. Missing transcripts or other requirements for admission such as letters of recommendation;
2. Temporary waiver of the Graduate Record Examination (not to exceed one semester);
3. Deficiencies determined by the program;
4. Temporary ineligibility for regular admission status because program only reviews applications once a year;
5. Graduating University of Kentucky seniors lacking no more than six hours for graduation; the consent of the college dean and the Dean of the Graduate School and approval of the Director of Graduate Studies are necessary. Students may take no more than 12 credit hours and must complete the undergraduate degree during the semester in which they enroll in the provisional status. (See section on Graduating Seniors as Part-Time Graduate Students)

Provisional status is permitted for a maximum of one full-time semester or up to 12 hours after which the work will be reviewed, and, within 30 days into the following semester, and on recommendation of the Director of Graduate Studies, the status will be moved automatically from provisional to regular program status, or removed from the provisional status entirely.

Health Service

The convenience of an on-campus health care facility, a low-cost prepaid plan for outpatient services, and an excellent Blue Cross/Blue Shield hospitalization plan which now includes a broad major medical component—all are designed to make UK's total health plan attractive and economical for graduate and professional students, both full-time and part-time.

All full-time students pay a health fee which entitles them to medical and mental health care at the Student Health Service. Part-time students may prepay the health fee or may use the Health Service on a fee-for-service basis. If they elect to pay fee-for-service it is always more expensive.

The Student Health Service is currently located in the Student Health-Family Practice Building (Medical Center Annex No. 4) across Rose Street from University Hospital. The clinic will move this coming year to the new Medical Plaza next door. Watch for our moving date. The Health Service clinic hours are from 8-4:30 Monday through Friday, and 8-11 Saturday morning. Students can be seen in a minimum of time on a "walk-in" basis. The clinic is staffed with physicians, surgeons, nurses, psychiatrists, and other health professionals who are specialists in the health problems of young adults.

The non-student spouse of an eligible student may use the Health Service but is not eligible to pay the health fee. The minimum charge for a non-student is \$18 per visit.

Part-time students who wish to pay the health fee may do so by writing a check made out to the University of Ken-

tucky in the amount of \$25 and enclosing it with their tuition payment (by mail or at the Student Billing Office) or they may pay the Health Service Cashier before the deadline for paying all fees. Check with the Graduate Office or the International Student Office if there are questions about paying the health fee.

Services covered by the health fee include: unlimited visits to physicians and nurses for an illness or first aid care, most laboratory services, some medications, allergy shots and immunizations, unlimited visits to the professionals in the Mental Health Service, some after hours emergency services and more. With the high cost of health care in the United States, prepaying for your health care is a real bargain. Students have been known to run up a bill as high as several hundred dollars because they did not have adequate health coverage. The University, including University Hospital, assumes no responsibility for a student's medical expense.

Health Insurance

Services provided through campus facilities that are traditionally covered by insurance plans (hospitalization, accident x-rays, surgical procedures) will be billed to the student's insurance carrier. UK foreign students must have hospitalization insurance that is payable in the United States, and are responsible for any amount which insurance does not pay on these types of charges. It is imperative that students have insurance for themselves, and for their spouse and children if they are married, because of the extremely high cost of medical care.

As a service to students who need insurance of their own, the University has made arrangements for an excellent group insurance plan at reasonable student-age group rates. The current plan is Blue Cross and Blue Shield with Major Medical. The plan provides year-round coverage wherever the student may be as long as the semi-annual premium payments are maintained. There are several options available: (1) student only, (2) student and spouse only, (3) student and one dependent child only and (4) family. Only the family option provides maternity benefits and then only if the student has had the family option for nine consecutive months. All options have a three-month waiting period for pre-existing conditions.

There are definite sign-up periods for the UK Group Insurance Plan: (1) the first calendar days of the Fall semester for students attending that semester, (2) the first 30 calendar days of the Spring semester for students attending that semester, and (3) the first 10 calendar days of the 8-week Summer session for students attending that session and the subsequent fall semester. Information is also available through the insurance office of the Student Health Service (606) 233-6291 and through the Graduate Office and the International Student Office.

Confidentiality. All Health Service records are strictly confidential and cannot be released to anyone without the student's written authorization.

Counseling and Testing Center

The University Counseling and Testing Center has a staff of trained psychological counselors whose primary function is helping students work through educational, vocational and personal concerns. Some typical concerns for graduate students include: learning to read and think more critically, time management; difficulties in decision-making, career and life planning, quality of interpersonal relationships, feelings of depression, anxiety, loneliness, and other issues of a personal nature. All counseling sessions are voluntary and confidential. Tests of intelligence, achievement, personality, vocational interests, study skills and others may be used by the student to aid in self-understanding.

In addition to counseling with individuals, the Center staff provides marital, family, and group counseling. Groups are arranged each semester and include both general counseling groups, in which students may work on a variety of issues, and special focus groups (assertiveness training, for example).

The services of the Center are available by appointment to all who are enrolled in the University as well as to faculty and staff. There are no fees for the testing or counseling of University-connected clients. Appointments and further information may be obtained by calling 258-8701 or by coming by the Center, 301 Mathews Bldg.

Housing

Graduate Student Housing

Apartments are available for both single and married graduate students. For information write to Student Housing, Cooperstown, Building C.

Off-Campus Housing

For information, write the Dean of Students Office, 5th Floor, Patterson Office Tower.

Food Services

The Food Services facilities at the University are in two categories—residence hall cafeterias and cash units. Blazer Cafeteria, Donovan Cafeteria and Kirwan-Blanding Commons Cafeteria serve students on prepaid meal plans.

The Student Center Cafeteria, Wildcat Grill, K-Lair Grill and Kirwan Blanding Grill are open on a cash basis to all students, faculty, staff and University guests. In addition, Food Services meal cards will be accepted at these locations on a cash basis. The schedule of hours for the various operations will be printed at the beginning of each semester.

Foreign Applicants

All non-U.S. citizens, except permanent residents of the U.S., should request an Application Form for International Students. Applicants must have excellent grades and rank in the top quarter of their classes. To be considered for entry as a graduate student an applicant must have had four years of university level work. **Indian students:** (a first class record is normally expected although high second class holders in non-science areas may be considered if

they can offer further evidence of having been in at least the top 10 percent of their graduating class).

When credentials are submitted in support of any application, they should be either the original documents or certified copies (i.e., copies certified or attested as "true copies" by a notary public). An official translation must be attached to these records if they are in a language other than English. Credentials should include a record of all degrees earned, detailing all subjects taken and grades obtained. Grades must be listed in the indigenous system.

Applications will not be considered without official scores on the verbal and quantitative portions of the Graduate Record Examination (GRE). Business and Accounting applicants must substitute the Graduate Management Admissions Test (GMAT) for the GRE. Applicants for Public Administration may substitute the GMAT for the GRE. If the Graduate Record Examination or the Graduate Management Admissions Test have not been taken write to the Educational Testing Service, Box 955, Princeton, NJ 08540, or Box 1502, Los Angeles, CA 95701, for information concerning the appropriate examination. The tests are administered five times throughout the year and test scores generally require six weeks for delivery. It is important, therefore, that the applicant take the appropriate test well in advance of the application deadline in order to allow ample time for scores to be received in this office.

Test scores presented (GRE, GMAT and TOEFL) must be sent directly to the University of Kentucky Graduate School from ETS. Photocopies are not acceptable.

English Proficiency Requirement: The University of Kentucky requires a score of 550 on the Test of English as a Foreign Language (TOEFL) of all applicants whose native language is not English. The test is given four times each year. The TOEFL Bulletin includes a registration form. Bulletins are available in many locations outside the U.S., usually at American embassies and consulates, offices of the United States Intercultural Communications Agency (ICA), United States educational commissions and foundations, bi-national centers, and many private organizations such as the Institute of International Educational (IIE), African American Institute (AAI), America-Mideast Educational and Training Services, Inc. (AMIDEAST), and American Kor-Asian Foundation.

Students who cannot obtain a TOEFL Bulletin and registration form locally should write, well in advance, to: Test of English as a Foreign Language, Box 899, Princeton, New Jersey 08540.

Financial Resources Requirement. Graduate applicants must certify that they have at least \$7500 available for each 12-month period of study. It is estimated that this amount will cover the cost of tuition fees (\$3469*), books and supplies (\$300), room and meals (\$3420), health insurance (explained below) and incidentals, for a single person.

The students must have on hand at the beginning of each registration period funds sufficient to pay for tuition, fees, room and board and health insurance. These costs are to be paid at the beginning of each term.

*Note: Fees subject to change without notice.

Health Services

The University has an excellent health care program that is of special importance to foreign students. (See section on Health Service.)

Please note: UK international students must have hospitalization insurance that is payable in the United States. They are also responsible for any amount which insurance does not pay on these type of charges. Because of the extremely high cost of medical care, it is imperative that a student have insurance for him or herself, spouse, and children.

Health History Form

All international students must obtain, from the Student Health Service, a tuberculin screening test and reading and complete a health history form before registration will be allowed. This can be done any time between 8-4 the week before classes start. The Health Service will provide written documentation that this requirement has been fulfilled.

(See also section on Health Service in this bulletin under Graduate Students.)

Application Deadline for International Students.

Applications for admission should reach the Admissions Office at least six months before the opening of the term the applicant intends to begin graduate work, that is, February 1 for the fall semester which begins in late August, June 15 for the spring semester which begins in mid-January, and October 31 for all summer sessions.

No application will be considered until all supporting documents have been presented.

Program in English for Foreign Students. The English Department offers a Center for English as a Second Language which operates during the eight-week summer term, and during the Fall and Spring semesters. Students receive 160 hours of intensive English instruction in an eight-week period. No college credit is given for the Institute's course of study but students may be granted I-20 student visas for study in the Center. Students are given certificates of completion for the Center's program. Graduate students who enroll in the Center are usually University of Kentucky students, and sometimes students are admitted to The Graduate School contingent upon successful completion of the Center.

The registration fee is \$600.00,* and covers only instruction; it will not cover room and board. For further information write Robert Hemenway, Chair, Department of English, U.K., 40506.

*Subject to change without notice.

Readmission

Former University of Kentucky students in good standing are eligible for readmission. They must file an application for readmission by the stated deadlines (See Calendar). An exception to this rule is made on behalf of students who attend only University Summer Sessions. These students do not have to apply for readmission to a Summer Session if they were enrolled for the preceding Summer Session.

Registration forms, which must be prepared in advance for any registration period, are not made for a student after one semester's absence from the University. It is only by the filing of an application for readmission in advance that the Registrar's Office can prepare the necessary registration forms for a student intending to re-enter the University.

Post-Baccalaureate Graduate Students

Students who hold a baccalaureate degree and who wish to pursue graduate study without a degree objective and students who do not fulfill the entrance requirements of The Graduate School may apply for admission as post-baccalaureate graduate students.

Admission to this status may be granted to an applicant who (1) demonstrates promise but has not qualified for admission to a degree program, or (2) intends not to complete a degree program. Students may take courses for graduate credit but may not apply more than 9 hours of credit with a grade of A or B earned in the post-baccalaureate status to any degree program leading to an advanced degree at this institution. All transfers of credit hours to a graduate program must be approved by that program's Director of Graduate Studies and the Graduate Dean. (See section on Transfer of Credit.)

An application for admission to The Graduate School as a post-baccalaureate graduate student should be on file in the Admissions Office at least 30 days in advance of the registration date for the term in which the student plans to enroll.

Post-baccalaureate students who wish to apply for a graduate program must have a 3.0 grade point average on all work attempted as post-baccalaureate students. They should write The Graduate School offices indicating they wish to apply and stating the semester for which enrollment in the program is planned. Calendar deadlines in the front of this Bulletin should be observed.

Permission to enter any graduate class as a post-baccalaureate student will be granted only if the student meets the prerequisites and if space is available.

Graduating Seniors as Part-Time Graduate Students

Seniors in the University of Kentucky lacking no more than six credit hours for graduation and having an undergraduate average of at least 2.5 on all work attempted may register in The Graduate School in the provisional status with the consent of the undergraduate college dean, the appropriate Director of Graduate Studies, and the Dean of The Graduate School. *The total load of such students may not exceed 12 credit hours.* Graduate credit will be allowed for each credit hour of graduate work beyond the six or fewer credit hours needed to complete undergraduate requirements. Requirements for the undergraduate degree must be completed during the semester in which the students are allowed to register for part-time graduate work. Students applying for admission in The Graduate School under these conditions must fill out a petition form listing the course or courses to be taken to complete the undergraduate requirements. Petition forms are available in the Graduate School offices.

University Scholars Program (Combined Master's/Bachelor's Degree Program)

There are among students at the University of Kentucky some particularly gifted and highly motivated students whose well-defined academic and career plans include graduate or professional study.

The University Scholars Program offers these students the opportunity and the challenge of integrating their undergraduate and graduate or professional courses of study in a single continuous program culminating in both a baccalaureate and master's degree.

The under-graduated Colleges have more information.

Scholastic Probation

When students have completed 12 or more semester hours of graduate course work with an average of less than 3.0, they will be placed on scholastic probation and are subject to dismissal from their programs.

Students will have one full-time semester or the equivalent (9 hours) to remove the scholastic probation by attaining a 3.0 average. If probation is not removed, students will be dismissed from The Graduate School.

Students who have been dismissed from The Graduate School for these reasons may apply for readmission to The Graduate School after two semesters or one semester and the eight-week summer term.

Exceptions to this policy can be made only by the Graduate Dean.

Changes in the Graduate School Requirements

When Graduate School or degree program requirements are changed after a course of study has begun, the students shall have the option of fulfilling either the old or new requirements.

If the students elect to fulfill the old requirements but find that necessary resources (e.g., courses, instruction in particular skills) are no longer available, students may make reasonable substitutes with the approval of The Graduate School Dean upon recommendation of the Director of Graduate Studies.

In the event that students interrupt their work on a graduate degree (i.e., not enrolled) for one calendar year or more, The Graduate School Dean shall determine, upon recommendation of the Director of Graduate Studies, whether the old requirements or the new requirements shall apply. In the event students have not completed the requirements for the graduate degree five years after the effective date of a change in degree requirements, the new requirements shall apply unless determined otherwise by the Graduate School Dean.

Advanced Degrees for Faculty Members

Members of the faculty, excepting those in the Community College System, having a rank higher than that of Instructor may not be considered as candidates for degrees in the discipline in which they are employed or as candidates for degrees above the Master's degree in any discipline.

University of Kentucky Libraries

The University of Kentucky Library, one of the nation's top 50 research libraries, contains approximately 1,816,782 volumes, 2,401,000 microform units, and 12,000 linear feet of manuscripts. The collection also includes 158,000 maps, 9000 music records, and 125,000 pictures, tapes and miscellaneous items. The Library currently subscribes to 32,875 periodicals including 284 foreign, domestic, and Kentucky newspapers and government documents.

Strong emphasis is placed on the development of a quality collection responsive to the teaching and research needs of the University. The obligation to secure resources for the future needs of the academic community is also recognized. The collection is particularly strong in bibliography, history, coal, science and technology, agriculture, law, literature, and languages. Branch libraries housing special collections include agriculture, biological science, chemistry and physics, law, architecture, geology, engineering, mathematics, art, business, education, medicine, music, and pharmacy.

The Library is responsible for locating and obtaining for its scholars needed research materials not available in its collection. These materials are borrowed from other research libraries through interlibrary loan. Other services include reference, government documents, on-line computerized literature searching, individualized instruction in library use, academic information and referral, and replication of materials in both microform and hard copy.

Information booklets and guides to the Library and its resources are available at the King Library Circulation Desk in the Reference Department and at the individual branch libraries.

During fall and spring semester King Library is open from 8 a.m. until 12 midnight, Monday through Thursday; 8 a.m. until 10 p.m. on Friday; 8 a.m. until 8 p.m. on Saturday, and 10 a.m. until midnight on Sunday. Certain branches within the Library System have shorter schedules. Hours of service may be obtained by contacting any of the following branches:

Branch and Associate Libraries

Agriculture	N24 Agricultural Science Center North	257-2758
Architecture	200 Pence Hall	257-1533
Art	King Library North (lower level)	257-3938
Biological Sciences	313 Thomas Hunt Morgan Building	257-5889
Business and Economics	216 King Library South	257-8414

Reading Room	112 Journalism Bldg.	257-7818
Law	128 Law Building	257-8687
Mathematics	9 Patterson Office Tower	257-8365
Medical	135 Medical Center	233-5300
Music	116 Fine Arts Building	257-2800
Pharmacy	203 Pharmacy Building	257-1798

INFORMATION AND REQUIREMENTS FOR ALL ADVANCED DEGREES

Registration and Classification

All students expecting graduate credit must be enrolled in The Graduate School. Graduate students will conform to the general registration schedule of the University and may not enter later than the last allowable date set by the Registrar.

Before registering, graduate students must obtain their adviser's approval of their proposed program.

Graduate Record Examination

All applicants for admission to degree programs in The Graduate School must submit scores on the verbal and quantitative portions of the Graduate Record Examination. This rule may be waived for one semester in individual cases upon recommendation of the Director of Graduate Studies in the individual department or program. But in cases where waivers are granted, the GRE scores must be submitted before the end of the first semester of graduate study. (See section on Provisional Admission) The advanced portion of the GRE may be required by individual departments or programs if they so desire. (This excludes students who do not plan to work toward a graduate degree, i.e., visiting students, Rank 1, Fifth-year, and Post-baccalaureate students.)

The College of Business and Economics substitutes the Graduate Management Admissions Test (GMAT) for the Graduate Record Examination for M.B.A., D.B.A. and Accounting students. Students in Public Administration may substitute the GMAT for the GRE.

The Medical College Admission Test may be substituted in appropriate areas for the verbal and quantitative portions of the GRE with the approval of the Dean of The Graduate School. The Dental Admission Test may be substituted for the GRE for students pursuing The Master of Science in Dentistry.

Students who have earned an academic doctorate are exempt from the requirement of the MCAT or the GRE.

Admission to Candidacy

Students expecting to earn graduate degrees at the University must be admitted to candidacy for the degree. Even though all of the necessary course work is complete, students must be admitted to candidacy before degrees may be awarded.

The following procedure is used to process applications for Admission to Candidacy:

Master's Degrees: The application for Admission to Candidacy must be filed with The Graduate School at the end of the first semester (full-time) of graduate study or when the student has completed 12 hours of graduate work. Applications are available in The Graduate School Office. To qualify for Admission to Candidacy, students must complete at least nine hours of graduate work with a minimum 3.0 grade-point average, submit satisfactory GRE or GMAT scores, have no incomplete grades on their records and have the approval of the Dean of The Graduate School.

Failure to meet the conditions outlined above will result in the decision on Admission to Candidacy being deferred until completion of 18 hours with a minimum 3.0 grade-point average.

Doctoral Degrees: Students are Admitted to Candidacy after they have successfully completed the Qualifying Examinations.

Graduate Courses

All courses numbered 500 through 799 may be counted for credit toward a graduate degree provided they are approved as an appropriate part of the student's graduate program by the students' graduate adviser or committee. Courses numbered 800 or 900 are normally not accepted for credit toward a graduate degree. Exceptions can be made if permission is granted by the Graduate Council to a program to offer specific professional courses as part of its academic program. Prior approval to take a course must be obtained from the Director of Graduate Studies, the Dean of The Graduate School and the dean of the professional college. Without such approval professional courses may not be counted toward satisfying degree requirements. Courses numbered 400G to 499G carry graduate credit for nonmajors only.

Courses numbered at the 600 or 700 level should be taught by members of the Graduate Faculty or by such other instructors as are approved by the Graduate Dean.

Add/Drop—Withdrawal

The Graduate School follows the rules of the University Senate as administered by the Registrar's Office.

Grades—Grade Average

The official grades of graduate students are recorded in the office of the Registrar.

The grading in graduate courses is done according to the following scale:

A — High achievement	4 grade points per credit
B — Satisfactory achievement	3 grade points per credit
C — Minimum passing grade	2 grade points per credit
E — Failure	0 grade points per credit
I — Incomplete	See explanation following
S — Satisfactory	See explanation following

Graduate courses (400G-799) may not be taken Pass/Fail.

A grade of I (incomplete) may be assigned to a graduate student if a part of the work of a course remains undone and there is a reasonable possibility that a passing grade will result from completion of the work. **All incompletes (I grades) must be removed from a students' record unless approved by the Dean of the Graduate School.**

A grade of S (satisfactory work in progress) may be recorded for students in graduate courses which carry no credit and in graduate seminars, independent work courses, and research courses which extend beyond the normal limits of a semester or summer term. The grade may not be given to a student in a course carrying credit if the student has done unsatisfactory work or failed to do a reasonable amount of work. The project must be substantially continuous in its progress. When the work has been completed, a final grade will be substituted for the S.

An over-all average of B on all graduate work in the program must be attained before an advanced degree may be awarded. Graduate level courses (400G-799) are computed in the graduate grade point average. (See section on Repeat Option.) D grades are not given to graduate students. An "incomplete" (I) (unless the Dean of The Graduate School grants an extension of time) must be removed within one calendar year after the close of the term in which the I is assigned if the student is to receive credit.

Once a grade (other than an I or S) has been reported to the Registrar's Office, it may not be changed unless an error was made at the time the grade was given and recorded, and then only upon the written unanimous approval of the instructor, the Registrar, and the Dean of The Graduate School.

Repeat Option

A student may repeat a graduate course and count only the second grade as part of the graduate grade point average. This action will be initiated by petition of the Director of Graduate Studies to the Graduate Dean, and may be done only once in a particular degree program or in Post-baccalaureate status.

Credit Equivalence

Certain research courses carry no credit hours or grades but do contribute to the residence requirements of graduate degrees. For these courses the credit equivalent is stated in the course descriptions.

Academic Load

The total semester or term load of a student is the sum of all credits and credit equivalents (e.g., graduate language courses, undergraduate courses, courses audited, etc.) being carried. The normal load of a graduate student during any semester is 9 credit hours or equivalent. Under no circumstances may it exceed 15 credit hours or equivalent. During the summer term, the maximum load for the eight-week term is nine credit hours, and the four-week intersession is four credit hours. The maximum load for any combination of the four and eight-week terms is 12 credit hours.

Students satisfactorily completing nine course credits, or equivalent, of graduate level work during a semester, are classified as full-time students. Students satisfactorily completing six course credits, or equivalent, during a summer term are classified as full time. Those completing less than these amounts are classified as part time except that a teaching or research assistant may be classified as full time (for residence credit purposes) by taking six semester hours if the Director of Graduate Studies recommends and the Dean of The Graduate School approves. For the student who is a full-time teaching assistant or whose service to the University requires approximately 20 hours per week, the load shall not exceed 10 hours. This maximum may be increased to 12 hours for students with lighter service loads upon recommendation of the Director of Graduate Studies and approval of the Dean of The Graduate School.

Full-time students who fall below the minimum full-time equivalent as the result of failing or dropping one or more courses are reclassified as part-time students for that

semester or term.

Master's candidates working on their theses may register for up to the equivalent of 12 course credits by signing for course 768 in the appropriate department and indicating the desired credit equivalent in parentheses on the registration card.

Persons holding full-time working or professional assignments, whether employed by the University or not, may not take more than six credit hours (excluding 769 courses) for graduate credit toward a degree in any single semester or term. Students may petition for a waiver of this rule when the following conditions are met: (1) has satisfactorily completed six credit hours of graduate work; (2) has attained higher than national average scores on the aptitude and advanced tests of the Graduate Record Examination; and (3) has appropriate employment facilities and conditions.

Students Changing Programs

Students who plan to change to another program, must have the consent of the Director of Graduate Studies in the new program. A letter of acceptance must be sent to The Graduate School. Also students must request by letter that the change be made by The Graduate School.

Off-Campus and Short Courses

Short courses are defined as courses of less than a term in length. A short course may not carry credits greater than the number of weeks during which it is offered. Two short courses of four weeks or less may not be taken simultaneously. Two full-term courses and a short course may not be taken simultaneously.

Instructional standards for off-campus and short courses should be the same as those established for on-campus and regular courses. A comprehensive final examination will normally be required to assess the student's capability for scholarly thinking in the subject matter area. Practicum or laboratory courses should require other experiences of comparable rigor.

Visiting Students

University of Kentucky graduate students who attend another Graduate School as a Visiting Student must have the permission of their University of Kentucky advisers before the courses are taken in order to transfer credits earned. (See section on Transfer of Credits.)

Visiting Student status may be granted only to a student who is in good standing in a program.

Students who are enrolled in a Graduate program at another institution and plan to attend the University of Kentucky as Visiting Students need not submit transcripts. Students must, however, request a Visiting Student form from the Graduate School Office when filing an application. Visiting Student admission is for one semester only and credit earned in that status is not applicable to a University of Kentucky degree.

Time Limit for Degrees

Activities which are used to satisfy degree requirements must be completed within eight years preceding the proposed date of graduation. Extensions of time will be con-

sidered by the Graduate Council only upon written recommendation by the appropriate Director of Graduate Studies. No activity completed more than 12 calendar years preceding the proposed graduation date will be considered for graduation.

Graduation

Advanced degrees may be conferred at the close of any semester or summer session, but commencement exercises are held only at the close of the academic year. Students who are eligible to receive degrees at the end of the summer session or the first semester may participate in the next commencement exercises.

Appropriate academic costume must be worn.

The thesis and dissertation fees cover the cost of binding of the thesis or dissertation, microfilming, and copyright (See section on copyright). Authorization forms to pay dissertation fees are issued in Room 307, Patterson Office Tower.

To be eligible for a degree, students must file an application at the Graduate Office within 30 days after the beginning of the semester or 15 days in the Summer Session in which they expect to complete their work.

Diplomas

Diplomas for graduate students are ordered after certification of the degree has been completed. If a letter of certification is needed, The Graduate School will provide one on request.

Accounts Payable to the University

All outstanding accounts due to the University must be cleared before a degree is awarded. Candidates for degrees whose accounts are cleared close to the final deadline date for graduation clearance, should take their receipt of payment to the Registrar's office.

Fees

Semesters: Fall and Spring		
Full-Time Student	Resident	Non-resident
Graduate School	\$464	\$1,357
Part-Time Student		
Graduate School	52	151
Summer School Terms:		
Full-Time Student	Resident	Non-resident
(Eight-Week Session only)		
Graduate	260	755
Part-Time Student and		
Four-Week Session		
(per hour fee)		
Graduate	52	151
Four-Week Session:		
Four credit hours is the maximum course load and fees will be assessed separately per hour.		
Eight-Week Session:		
Full-time fees are attained at five hours for the Graduate School.		
FEES ARE SUBJECT TO CHANGE WITHOUT NOTICE.		

Termination

The Dean of the Graduate School may terminate enrollment for the following reasons:

1. Academic probation for three enrolled semesters.
2. Having failed twice the final examination for the master's degree or the qualifying examination.
3. In cases where the student's Advisory Committee recommends termination after the qualifying examination has been passed, the Graduate Faculty in that Program will meet to vote on the recommendation. When the Graduate Faculty of that program concurs and the student dissents, the student will have an opportunity to meet with the Graduate faculty of the Program, after which a second vote will be taken and a final recommendation will be made to the Dean of the Graduate School.

Each Program sets specific requirements and standards of performance, evaluative procedures and criteria, and procedures for terminations. The student should be informed of these criteria at the time of enrollment by the Director of Graduate Studies of the Program."

GENERAL REQUIREMENTS FOR ALL MASTERS' DEGREES

(See also General Requirements for All Advanced Degrees)

On-Campus Residence

There is **no** Graduate School-wide sustained residence requirement for master's degrees at the University of Kentucky. However, students are advised to consult the special statement of requirements for the programs in which they are interested and consider carefully the statement about the spirit of resident graduate work in the section on residence. Students who contemplate continuing in a doctoral program should take into account at the outset the residence requirements for the doctoral degree.

Thesis/Non-Thesis Options

The Graduate Faculty authorizes all graduate programs to satisfy the Master's requirements by either of two options, thesis or non-thesis.

The Thesis option (Plan A) requires a thesis to be developed under the direction of a member or associate member of the Graduate Faculty. Collaborative effort by two or more graduate students is not forbidden. However, there must be enough independent effort to enable each student to make a separate contribution and to prepare an individual thesis.

Theses must be in conformity with the instructions prepared by The Graduate School. For specific instructions regarding the format of theses, the student should obtain a copy of the leaflet, *Instructions for the Preparation of Theses and Dissertations*, from The Graduate School office.

Before the final examination the thesis director and the appropriate Director of Graduate Studies must indicate to The Graduate School that the student's thesis satisfies all requirements of The Graduate School and is complete in

content and format with the exception of pagination, and that the student is ready to be examined. If the final examination committee indicates that the student has passed the final examination, the modifications in the thesis which the committee specifies must be made.

The final copies are submitted to The Graduate School after the Director of Graduate Studies and the Thesis Director have signed that they are complete.

Theses must be presented and accepted by the Graduate School by the last day of the semester if a student plans to graduate that semester.

Each student must pay a fee for the binding of the thesis. Payment will be made at the Billings and Collection office.

Theses submitted by candidates become the physical property of the University of Kentucky and authors agree that the University may decide the conditions under which they may be used or published. The University protects the authors' rights by placing certain restrictions upon borrowers' use of theses as long as they are unpublished. A copy of the following regulations (to be prepared by the student) is placed before the title page of every thesis:

Unpublished theses submitted for the masters' and doctors' degrees and deposited in the University of Kentucky Library are as a rule open for inspection, but are to be used only with due regard to the rights of the authors. Bibliographical references may be noted, but quotations or summaries of parts may be published only with the permission of the author, and with the usual scholarly acknowledgements.

Extensive copying or publication of the thesis in whole or in part requires also the consent of the Dean of The Graduate School of the University of Kentucky.

A library which borrows this thesis for use by its patrons is expected to secure the signature of each user.

The non-thesis option (Plan B) requires six or more graduate credit hours of course work be submitted in lieu of a thesis. A student may follow this option with approval of the program concerned.

Transfer of Credits

With the approval of the student's adviser, or major professor, the Director of Graduate Studies, and the Graduate Dean, a maximum of nine semester hours or *twenty-five percent of the semester hours required for the degree concerned (exclusive of residence or thesis credit), whichever is greater*, of regular graduate course credits earned prior to admission to a given graduate degree program may be credited toward the minimum requirements of the Master's or Specialist degree in that graduate program provided that the grades earned were A or B. For example, such credits may be earned (1) as a student in another graduate program at the University of Kentucky, or (2) as a graduate student at another accredited graduate school. In the event a student offers credits in more than one of these categories, the total to be credited toward the degree still may not exceed nine hours or *twenty-five percent of the semester hours required for the degree concerned (exclusive of residence or thesis credit), whichever is greater*. In no case will independent work, research, thesis or dissertation credit completed as a part of degree requirements for one program be considered to satisfy requirements of a subsequent master's program.

Independent Study Programs

(Correspondence Courses)

No graduate credit is given for courses taken by correspondence.

Courses and Curricula

Graduate students are eligible to take regular courses which meet as organized classes and independent-study or research courses in which each student carries on investigations independent of class meetings. *Independent study or research courses must not duplicate thesis work*; thesis work must be done in addition to the minimum course requirements. *At least two-thirds of the minimum requirements for the master's degree must be in regular courses, and at least half of the minimum requirements must be in courses numbered on the 600 or 700 level.* Exceptions to this rule may be made only with the approval of the Graduate Council.

Second Master's Degree

Two degrees will not be granted at the same time and simultaneous enrollment in two or more programs in different fields is not permitted unless approved by the student's advisors and the Directors of Graduate Studies in the Programs. (See Section on **Transfer of Credit**.)

Final Examination

A final examination (oral and/or written) is given to all candidates for master's degrees not later than eight days before the last day of classes of the semester in which the degree is to be awarded. The examination is scheduled by the Graduate Dean and the report is returned to the Dean upon completion of the examination, which in no case may be later than two weeks after the start of the examination. The examining committee consists of at least three qualified members recommended by the Director of Graduate Studies and appointed by the Dean of The Graduate School. The recommendation for a final examination must be filed with The Graduate School at least two weeks prior to the date of the examination. (Students writing theses should see the section on Thesis/Non-Thesis Option.)

If the candidate fails the final examination, the committee may recommend to the Graduate Council the conditions under which a second examination may be administered. Insofar as it is practicable the same examining committee gives this examination. In all decisions the majority opinion of the committee prevails. If the committee is evenly divided, the candidate fails. A third examination is not allowed.

Degrees of Master of Arts and Master of Science

The Graduate Faculty authorizes all graduate programs to permit students to satisfy the requirements for the M.A. and the M.S. degrees by either of two plans.

PLAN A

In addition to meeting all general requirements for masters' degrees (see section on General Requirements for All

Advanced Degrees) the candidate must complete at least 24 semester credit hours of graduate course work with a standing of 3.0 (B) or higher, satisfy the language requirements (where applicable), and write a thesis. A candidate must have a major area (defined usually as an academic department) and must (with the exceptions noted below) take at least two-thirds of the course work in this area; the other one-third may be taken in this area or in related graduate areas.

In Education, Agriculture, and Communications only one-half of the work must be in the major area. When the setting up of major topics seems to require it, the Graduate Council may, on recommendation of the appropriate Director of Graduate Studies, authorize courses taught outside the major to count on the major.

Thesis

Theses must be developed under the direction of a member or associate member of the Graduate Faculty. Collaborative effort by two or more graduate students is not forbidden. However, there must be enough independent effort to enable each student to make a separate contribution and to prepare an individual thesis.

Theses must be in conformity with the instructions prepared by The Graduate School. For specific instructions regarding the format of theses, the student should obtain a copy of the leaflet, *Instructions for the Preparation of Theses and Dissertations*, from The Graduate School office.

Before the final examination the thesis director and the appropriate Director of Graduate Studies must indicate to The Graduate School that the student's thesis satisfies all requirements of The Graduate School and is complete in content and format with the exception of pagination, and that the student is ready to be examined. If the final examination committee indicates that the student has passed the final examination, the modifications in the thesis which the committee specifies must be made.

The final copies are submitted to The Graduate School after the Director of Graduate Studies and the Thesis Director have signed that they are complete.

Theses must be presented and accepted by the Graduate School by the last day of the semester if a student plans to graduate that semester.

Each student must pay a fee for the binding of the thesis. Payment will be made at the Billings and Collection office.

Theses submitted by candidates become the physical property of the University of Kentucky and authors agree that the University may decide the conditions under which they may be used or published. The University protects the authors' rights by placing certain restrictions upon borrowers' use of theses as long as they are unpublished. A copy of the following regulations (to be prepared by the student) is placed before the title page of every thesis:

Unpublished theses submitted for the masters' and doctors' degrees and deposited in the University of Kentucky Library are as a rule open for inspection, but are to be used only with due regard to the rights of the authors. Bibliographical references may be noted, but quotations or summaries of parts may be published only with the permission of the author, and with the usual scholarly acknowledgements.

Extensive copying or publication of the thesis in whole or in

part requires also the consent of the Dean of The Graduate School of the University of Kentucky.

A library which borrows this thesis for use by its patrons is expected to secure the signature of each user.

PLAN B

Plan B has the same minimum requirements as Plan A except that six or more credit hours of course work may be submitted in lieu of a thesis. A student may follow this plan only with approval of the program concerned.

Students should consult their adviser for any additional requirements that may have been set up for Plan B by their area of study.

Foreign Language Requirement

Many programs require a reading knowledge of a modern foreign language for the Master's degree. French, German, or Russian are the normally accepted languages. However, another modern language pertinent to the student's program may be substituted on the recommendation of the adviser and with the approval of the Director of Graduate Studies and the Graduate Dean. The language requirement may be satisfied by:

1. Completing one of the accelerated graduate level language courses with a B or better grade.
2. Completing the Educational Testing Service examination with a minimum score of 450.
3. Completing four semesters (or equivalent) of a modern foreign language with a grade-point average of B or better as an undergraduate at the University of Kentucky.
4. Completing, with a grade of B or better, Special Examinations given for the graduate reading courses. Forms may be obtained from the Registrar's Office, Gillis Building. Other types of special examinations are scheduled in The Graduate School Office. Examinations to test out of Russian must be arranged through the Department of Russian.
5. Transferring a language taken to satisfy the requirements for a Master's degree at another university.

Candidates for degrees must be proficient in English.

GENERAL REQUIREMENTS FOR ALL DOCTORAL DEGREES

Degree of Doctor of Philosophy

The Ph.D. degree is intended to represent the demonstration of independent and comprehensive scholarship in a specific field. Such scholarship must be manifested by both the student's mastery of subject matter and capacity to do research.

The degree of Doctor of Philosophy is conferred upon a candidate who after completing graduate work devoted to study of a special field of knowledge (1) passes comprehensive examinations in the chosen field and the dissertation subject, (2) presents a satisfactory dissertation, and (3) shows evidence of scholarly attainment.

Students should note that some doctoral programs have degree requirements that may exceed the minimum requirements of The Graduate Faculty.

The Major Professor and Advisory Committee

Each student's program is guided by a Major Professor and Advisory Committee throughout the graduate career. Their purpose is to give continuity of direction and counsel and provide intellectual stimulation from the earliest days of residency through the completion of the doctorate.

The Director of Graduate Studies, or designee, serves as adviser to beginning graduate students. The Director of Graduate Studies, or designee, signs schedule cards and performs other advisory functions until the Advisory Committee is appointed, normally not later than the point at which 18 credit hours of graduate work have been accumulated and in any event at least one year prior to the Qualifying Examinations. The Major Professor then assumes primary advisory functions and chairs the Advisory Committee. The Dissertation Director, when selected, serves as the Major Professor. The Advisory Committee also provides advice to the student and specifically sets requirements (within applicable Program, Graduate School, and University regulations) which the student must meet in pursuit of the doctorate. The Major Professor and Advisory Committee are appointed by the Graduate Dean after consultation with the appropriate Director of Graduate Studies.

The Advisory Committee has a core of five members. This core consists of the Major Professor as Chairman, two or three other members from the major area, and at least one representative from any minor area(s). At least one representative must be from outside the academic program (department). All members of the core must be members of the Graduate Faculty of the University of Kentucky and three (including the Major Professor) must possess full Graduate Faculty status. Additional faculty members may serve as members of the Advisory Committee. The core of the Advisory Committee must be kept at its full complement throughout the graduate career of the individual student. Thus, in the event of a vacancy on the Committee (occasioned by resignation, faculty leave, or inability to serve), an appropriate replacement must be made prior to the making of any committee decision.

All decisions of the Advisory Committee are by majority vote of its Graduate Faculty members. Advisory Committee decisions must be reported promptly to the appropriate Director of Graduate Studies who will be responsible for transmitting them to the Dean of The Graduate School.

In addition to advising and program planning, the Advisory Committee is also involved with the administration of the Qualifying Examination, the supervision of the preparation of the dissertation, and the administration of the Final Examination on the dissertation (see appropriate section below).

Major and Minor Subjects

Every applicant for the Ph.D. degree must select a major area of study. The major area is one in which the student's efforts are concentrated. Some programs also require one or more minor areas. Minor(s) must be approved by the student's Advisory Committee.

Residence Requirements

The purpose of a residence requirement is to encourage contact with the academic community in which doctoral students may become fully involved with colleagues, libraries, laboratories, on-going programs of research and inquiry, and experience the intellectual ferment which characterizes a university. Such experience is generally as important as formal classwork in the process of intellectual development. While the residence requirements are, by necessity, given in terms of full or part-time enrollment, the intent of the requirement is to ensure that the student becomes fully involved in an essential part of scholarly life.

Requirements for the doctorate may be completed in three years of full-time graduate work or the equivalent in combined full-time and part-time study;* however, more time may be required. (See section on Academic Load.)

In unusual cases approval of a program of study involving less time may be secured from the Graduate Dean. It should be understood that scholarly accomplishment is the ultimate basis on which requirements are met, not semester hours completed or time spent in the program. On the recommendation of the Director of Graduate Studies and with the concurrence of the Graduate Dean, successful completion of a master's degree may be considered the equivalent of the first of the three years.

The following residence requirements must be completed.

1. Students pursuing the doctorate must spend at least two consecutive semesters enrolled in a degree program on campus in intensive study. Such enrollment must occur prior to passing the Qualifying Examination. During these two semesters the students must be enrolled as full-time students, carrying nine or more hours. If the summer term is to be used in lieu of one of these semesters, enrollment for nine hours is required.

Note: If students hold an awarded Master's degree from the University of Kentucky in the same discipline and completed two consecutive full-time semesters while pursuing the degree, those semesters may be used in lieu of the above.

2. Students must complete a second year of residency in one or a combination of the following.
 - a. Transfer residence credit from an awarded Master's degree from another school.
 - b. Complete a minimum of eighteen hours of work (part-time or full-time) beyond the two full-time consecutive semesters (See No. 1).
 - c. Apply hours completed while pursuing a University of Kentucky Master's degree.

Note: Students fulfilling No. 1 by use of a University of Kentucky Master's may not fulfill No. 2 in this manner.

3. Candidates (students who have satisfactorily completed their Qualifying Examinations) for the doctorate must complete two semesters of full-time dissertation study **immediately** following the Qualifying Examination. Normally this is accomplished by registering for nine hours of 769 (which is called Residence Credit) each semester and completed with a grade of S. With the written recommendation of a candidate's Advisory Committee and with the approval of the appropriate Director of Graduate Studies and the Graduate Dean, specified graduate course work may be taken in lieu

of all or part of this residence credit (769) requirement. If a summer term is substituted for one of the semesters, three credits must be taken in the four-week session and a minimum of six credits in the eight-week session. The student need not be physically present on campus while enrolled for credit after the Qualifying Examination. While there is generally no formal class work attached to these credits, and in some cases the student may not be on the campus, full tuition costs are assessed in that students who are preparing their dissertations are utilizing University resources such as libraries, Computing Center, and Major Professors' and Committee members' time and energy.

Note: The semester during which the student takes the Qualifying Examination may be counted for credit for dissertation study **only** if the date of successful passage is within six weeks (three weeks for the eight-week summer session) of the first day of classes.

4. Candidates who have fulfilled the above requirements, but who have not yet defended the dissertation, are required to enroll for 769 (0-9 credit hours) each semester until the dissertation is completed and defended. Such registration enables the University to keep accurate records of degree candidates and facilitates rapid and accurate information processing. Some programs have additional residence requirements which must also be met.

It should be understood that the above represents the **minimum requirements** of The Graduate School. Some programs have additional requirements.

Exceptions to this normal pattern may be made with the approval of the Dean of the Graduate School upon the written recommendations of the student's Advisory Committee and the Director of Graduate Studies, which clearly demonstrates that the principle of residence is preserved.

*In those situations where part-time course work toward the doctorate may be used in lieu of full-time enrollment, each nine hours of course credit earned on a part-time basis is considered the equivalent of a full-time semester. This does not apply to the two full-time consecutive residence semesters preceding the Qualifying Examinations or the two residence semesters following the Qualifying Examinations.

Foreign Language Requirements

The language requirement for each doctoral program is listed under Degree Requirements. A reading knowledge of one modern foreign language is required by Graduate Faculty. The language(s) normally accepted are French, German, or Russian. However, any modern foreign language more appropriate to the student's field of study may be selected on the recommendation of the Advisory Committee and with the approval of the Director of Graduate Studies and the Graduate Dean. Arrangements must be made through the Office of the Graduate Dean for examinations in languages not regularly taught at the University of Kentucky.

If the foreign language requirement has not been satisfied after four semesters of full-time graduate work (i.e., post baccalaureate), the student must register for a graduate level language course as part of the course load. The language requirement must be satisfied before the applicant may be admitted to the Qualifying Examination. (See section on Foreign Language Requirements.)

The Qualifying Examination

A Qualifying Examination consisting of both written and oral components is required of all doctoral students. Its purpose is to verify that students have sufficient understanding of and competence in their fields to become candidates for the degree. In most programs an individual Qualifying Examination is prepared and administered by the Advisory Committee; in some cases that committee also judges the results of the examination. A majority vote of the core of the Advisory Committee is required for successful completion of the Qualifying Examination. Programs which give uniform written Qualifying Examinations to all of their candidates shall have rules (filed with the Graduate Dean) governing the role of the Advisory Committee in the preparation, administration, and evaluation of the Qualifying Examination. The examination is given usually after four semesters of graduate work or the equivalent.

The Qualifying Examination must be scheduled through the Director of Graduate Studies and approved two weeks in advance by The Graduate School. Failure to meet this scheduling requirement may result in students not having proper University status and can cause omissions in records, loss of credits, or delay of graduation. Students should check with the Director of Graduate Studies to make sure that the Qualifying Examination has been appropriately scheduled.

The results of the examination must be reported by the Director of Graduate Studies to The Graduate School within 10 days of its conclusion. If the result is failure, the Committee determines the conditions to be met before another examination may be given. The minimum time between examinations is four months. A second examination must be taken within one year after taking the first examination. A third examination is not permitted.

The Dissertation

Each student must present a dissertation which is the result of original research. The Major Professor is the primary source of guidance in the planning and preparation of the dissertation. However, other members of the Advisory Committee may be involved in the process as well. All core members of the Advisory Committee must read the dissertation prior to signing the Approval Form. It is the responsibility of the Advisory Committee to make suggestions for revisions before the Final Examination. A majority of the Advisory Committee core members must indicate that the form and substance of the dissertation are adequate to justify the scheduling of the Final Examination. The Final Examination on the dissertation may not be scheduled without the signatures of a majority of the Advisory Committee's members on the Approval Form.

The style and form of the dissertation must be in conformity with the instructions prepared by The Graduate School. For specific instructions regarding the format of the dissertation, the student should obtain a copy of the *Instructions for the Preparation of Theses and Dissertation* from The Graduate School Office.

Each graduating doctoral student will pay dissertation fees. Payment will be made at the University Billings and Collections Office. Authorization forms to pay dissertation fees are issued in Room 307, Patterson Office Tower.

Copyright

Dissertations may be copyrighted by the student by (1) signing the Copyright Authorization on the Microfilm Agreement Form which is completed after the dissertation format check in The Graduate School, (2) paying the copyright fee of \$20 (this copyright fee is in addition to the \$35 dissertation fee), and (3) including a copyright notice in the front of the dissertation. The notice is a single sheet on which is centered the heading:

Copyright by
(name of student)
(year)

The Final Examination

The Final Examination includes a defense of the dissertation and may be as comprehensive in the major and minor areas as the Advisory Committee chooses to make it. It is conducted by an expanded Advisory Committee chaired by the Director of Graduate Studies or someone designated by the Director. The Graduate Dean and President of the University are ex officio members of all final examination committees. The examination is a public event and its scheduling is published and announced beforehand. Any member of the University community may attend.

At least four weeks prior to the Final Examination, following notification by the Major Professor that the dissertation has been distributed to members of the Advisory Committee, the Director of Graduate Studies will advise The Graduate School of the intent to examine. At this time the Graduate Dean appoints an Outside Examiner as a core member of the Advisory Committee. The specific time and date of the examination must be designated by The Graduate School at least two weeks prior to the actual examination. All members of the Committee except the Outside Examiner have had an opportunity to suggest revisions prior to signing the Dissertation Approval Form. Thus, most revisions should have been completed at an earlier time. The Final Examination must take place no later than eight days prior to the last day of class of the semester in which the student expects to graduate.

The Dissertation Approval Form, along with a typewritten copy of the dissertation, must be presented to The Graduate School at the time the Final Examination is established. The draft of the dissertation submitted must be complete in content, including all footnotes, tables, figures, and appendices. A full bibliography or set of references must be included as must a title page and abstract.

In all decisions, the majority opinion of the Graduate Faculty members of the Advisory Committee prevails. If the Advisory Committee is evenly divided, the candidate fails.

In the event of failure, the Advisory Committee recommends to the Graduate Dean conditions under which the candidate may be re-examined, if re-examination is deemed appropriate. When conditions set by the Graduate Dean have been met, the candidate may be re-examined. Should any vacancies on the Committee occur between the two examinations, the Graduate Dean shall appoint replacements. A third examination is not permitted.

After the Final Examination is passed, the final copy of the dissertation is prepared. Final copies are then submitted to The Graduate School along with the signatures of the Major Professor and the Director of Graduate Studies. The dissertation in its final form must be received in the Graduate School Office within 60 days of the Final Examination. If this deadline is not met, the candidate must undergo a second examination.

Combined Medical and Graduate Studies

Students combining studies toward an M.D. degree and a Ph.D. degree in one of the established programs of The Graduate School must be admitted to both programs. Before applying for admission to The Graduate School the applicant should consult with the Director of Graduate Studies of the graduate area of interest.

Students admitted to combined programs will register both in the College of Medicine and in The Graduate School during each semester in which work applying to both degrees is being taken. Graduate courses (500 level) which are regular parts of the medical curriculum also require dual registration if they are to apply toward the graduate degree.

Students enrolled in the regular medical curriculum will pay the tuition and fees of the College of Medicine. When not enrolled in the regular medical curriculum, they will pay Graduate School fees in proportion to the amount of graduate work taken.

Doctor of Business Administration

(See program section.)

Doctor of Musical Arts

(See program section.)

Doctor of Education

(See program section.)

Joint-Doctoral Programs With Other Universities

Doctoral programs in education are offered jointly between the University of Kentucky and the other state universities: Eastern, Morehead, Murray, and Western. These programs permit qualified candidates to complete approximately one year of graduate work above the master's degree at the cooperating university. A minimum of 18 credit hours of course work, the Qualifying Examination and the dissertation must be completed at the University of Kentucky, and a minimum of one academic year must be spent in full-time residence on the Lexington campus. The work of each candidate is directed by a joint faculty committee from both institutions.

Persons interested in these programs should confer with the Dean of The Graduate School at the cooperating university, or the Associate Dean for Graduate Studies in Education at the University of Kentucky. Applications may be filed for review by a joint screening committee. Admis-

sion will depend upon academic standing, scores on standardized examinations, and personal references.

There are available joint programs in Musicology and Pharmacology between the University of Kentucky and the University of Louisville and a joint program in Biology between the University of Kentucky and Eastern Kentucky University. Inquiries should be directed to the Directors of Graduate Studies, University of Kentucky.

GRADUATE WORK IN THE COLLEGE OF EDUCATION

The College offers the following degrees: Master of Arts in Education, Master of Science in Education, Master of Science (only in the Department of Health, Physical Education, and Recreation), Specialist in Education, Doctor of Education, and Doctor of Philosophy.

Graduate work is also provided for persons seeking Rank I or II classification.

Rank II classification may be achieved by the completion of a master's degree or the "Planned Fifth Year Program." The "Fifth Year" is a program of 32 semester hours for persons who hold bachelor's degrees and a teaching certificate. A minimum of 18 hours must be completed at the University of Kentucky. Of the 32 hours at least 12 must be in professional education, and at least 12 must be in fields outside education.

Rank I classification requires the completion of: (1) 30 hours of approved graduate level credit in addition to the requirements for a Rank II classification, or (2) 60 hours of approved graduate level credit including the master's degree.

Each student's graduate curriculum must be a well-rounded program of courses related to the student's major interest and approved by the adviser. In cases of deficient preparation the adviser, with the approval of the Associate Dean for Graduate Studies in Education, determines prerequisite undergraduate courses to be taken. Each department has designated one or more faculty members to direct graduate studies in that department. Specific questions regarding programs may be referred to the Directors of Graduate Studies.

The two plans which lead to the degree of Master of Arts in Education or Master of Science in Education are Plan A and B, described earlier under requirements for the M.A. and M.S. degrees.

Master of Arts in Education

The Master of Arts in Education is the program selected by candidates seeking initial or renewal certification for work in school settings. The Master of Science in Education is the program selected by candidates seeking to pursue non-certificate areas of concentration within Education and/or to prepare in fields auxiliary to education such as counseling psychology, and clinical and college teaching.

A Master of Arts in Education degree will usually lead to a Standard Certificate and Rank II for pay purposes.

The plan which leads to the degree of Master of Arts in Education is outlined below:

1. All candidates for the Master of Arts in Education degree must meet the requirements for a valid teaching certificate, based on a four-year baccalaureate program. These requirements are outlined in the general catalog of the University. If deficiencies are found, they should be overcome before proceeding with graduate work. The work required to overcome these deficiencies is in addition to the minimum graduate requirements for the degree.
2.
 - a. A minimum of 24 semester hours of graduate work, with at least 12 semester hours in courses numbered 600 or higher, must be completed and a thesis presented, **or**
 - b. A minimum of 30 semester hours of graduate work, with at least 15 semester hours in courses numbered 600 or 700, must be completed.
3. At least 12 semester hours of graduate work must be in Education.
4. The total number of credits presented in Education, undergraduate and graduate, must be at least 30 semester hours.
5. At least 12 semester hours must be outside the College of Education for both elementary and secondary teachers except for teachers of vocational agriculture who take six hours outside Education.

Master of Science in Education

The Master of Science in Education degree is normally awarded to students pursuing programs of study which do not lead to certification. However, if a student already holds a valid teaching certificate, the Master of Science in Education degree will give Rank II for pay purposes and may, under some circumstances, renew the certificate. The Master of Science in Education degree may also endorse a valid teaching certificate for another approved teaching subject or field.

The plan which leads to the degree of Master of Science in Education is outlined below:

1.
 - a. A minimum of 24 semester hours of graduate work, with at least 12 semester hours in courses numbered 600 or higher, must be completed and a thesis presented, **or**
 - b. A minimum of 30 semester hours of graduate work, with at least 15 semester hours in courses numbered 600 or 700, must be completed.
2. A minimum of 12 semester hours of graduate work in the College of Education is required.
3. A minimum of six hours outside the College of Education is required, but individual programs may require additional work outside the College.

Doctor of Education

The requirements for the Ed.D. corresponds to those of the Ph.D. with the following Differences:

1. In addition to other credentials, admission requirements include:
 - a. a master's degree, or,
 - b. thirty (30) graduate credit hours in preparation of or applicable to an appropriate master's degree.
2. Some program areas require successful teaching, clinical, or administrative experience for admission.
3. The program requires completion of a major body of course work of at least 42 graduate credits beyond the minimum hours required for admission.

4. Course work for the Ed.D. will be planned by the Advisory Committee to complement and extend previous graduate work. Therefore, the student's total doctoral and pre-doctoral graduate work will reflect competencies in the following areas:

- a. **Area of Concentration:** A significant concentration of course work designed to develop an in-depth knowledge in a specific area of Education.
- b. **Support Areas:** Course work to support the Area of Concentration shall include the following two components:
 - (1) Disciplinary support work from outside the Area of Concentration. Some or all of this work will be done outside the College of Education.
 - (2) Course work relevant to the development of competencies in the foundational studies in Education. Such course work to be taken in departments of the College of Education other than the Area of Concentration.
- c. **Research Methodology:** At least nine (9) credits of recent (within the "time limit for degrees" policy of the Graduate School) course work selected to develop competencies in conceptualizing research, designing experiment, selecting appropriate methodology, processing and analyzing data, interpreting results, and arriving at conclusions.
5. Although some students' programs may require competency in a foreign language as a research tool, there is no general language requirement.
6. The core membership of the Advisory Committee for each Ed.D. student consists of members distributed as follows:
 - a. The major professor and two other members from the Area of Concentration.
 - b. Two members from areas other than the Area of Concentration; at least one of these from outside Education.
 - c. Three members must be full members of the Graduate Faculty.
7. On joint programs with the regional universities, three Advisory Committee members must be from the University of Kentucky and must be full members of the Graduate Faculty.

Doctor of Philosophy (Education)

The Doctor of Philosophy degree in the field of education is offered in educational and counseling psychology and in Studies in Higher Education—a joint program of the departments of higher education and social and philosophical studies in education. (See requirements for the Ph.D.)

Specialist in Education

The degree of Specialist in Education is conferred upon a candidate who satisfactorily completes a post master's planned program in education under the general requirements of The Graduate School and the following special requirements:

Admission

The student, prior to admission to the program must (1) have a master's degree, (2) have a standing of 3.4 or higher

on all graduate work, (3) meet the requirements for a teaching certificate or have credentials appropriate to the field of specialization, and (4) have at least 30 credit hours in courses in education (undergraduate and graduate).

The student should file application with the Associate Dean for Graduate Studies in Education. The application will be considered by the department and by an admissions committee of the college. A student must be recommended by the major program and by the Committee on Graduate Admissions and Standards.

Program*

The student must earn a minimum of 30 credit hours of graduate work beyond the master's degree, of which at least 15 must be in courses numbered 600 or above.

A departmental committee is responsible for helping students plan individual programs. The program should contribute to specialization in a field but should not neglect the broader development of the individual.

The student must complete an independent research project (equal to three but not to exceed six credit hours) and submit a written report, a copy of which is to be filed with the department directing the research.

With the approval of the Graduate Dean and of the major program, the student may transfer a maximum of nine hours of credit earned beyond the master's degree from an institution which is approved to offer work above the master's level.

*The Specialist in Education degree is offered in Administration and Supervision, Curriculum and Instruction, Educational Psychology and Counseling, Higher Education, Social and Philosophical Studies, Special Education, and Vocational Education.

Final Examination

The final examination required of all candidates is administered by an examining committee consisting of at least three qualified members recommended by the adviser and the Director of Graduate Studies and appointed by the Dean of The Graduate School.

Fellowships and Assistantships

There are approximately 130 non-service fellowships available in all areas of graduate work. Over 1,000 teaching or research assistantships are available from departments and other units of the university. The stipend for a full fellowship during 1983-84 is \$5400. Assistantship stipends vary from \$4000 to \$7000. Out-of-state tuition is remitted for full fellowship or assistantship holders and proportionate amounts are remitted for smaller awards.

Fellowship and assistantship decisions are generally made by the department or program in which students enroll. Assistantships are awarded directly by the department. While fellowships are formally awarded by the Graduate School, the award is usually based upon the specific recommendation of a department.

Almost all fellowships and the greater majority of assistantships are awarded for the academic year. There are virtually no fellowships and only a small number of assistantships available which begin in the spring semester. Most departments make financial aid decisions for the next academic year in the period between February and April.

Students interested in fellowships or assistantships must return their application by that time. Later applicants will have a reduced chance of obtaining financial aid. All fellowships are awarded by early May. Most assistantships are also filled by that time, although students should check with the particular department of interest for exact information.

There is a common application for financial assistance. Applicants interested in either fellowships or assistantships but not both may indicate their preference on the form.

After a department makes its financial aid decisions, it will be in contact with the student. (If students are interested in a fellowship **only**, notification will come from The Graduate School.) Any questions about the status of applications should be addressed to the Director of Graduate Studies, department of interest.

Research

The University of Kentucky is the land grant institution for the State and also the major graduate and research institution in the State. It is committed to conducting programs in both basic and applied research. Research programs not only represent the lifeblood of graduate research and education but also expand the boundaries of knowledge in areas related to our society. Research programs, along with the attendant education programs, are essential for providing intellectual and cultural leadership and the many highly qualified people required to cope with the problems of a highly complex society.

University Research is supported by federal, state, local and private organizations in a manner which is consistent with the mission of the University. The University faculty and research staff are involved in research and scholarly activity in areas varying from the creative arts, humanities, basic and applied sciences to government, health, social services and education. Research programs range from the philosophical and ethical problems raised by advances in biological sciences, physical sciences and medicine to the communication of results of research and knowledge of the region of the state.

The University is involved heavily in applied and mission oriented research in such fields as coal, oil, shale, tobacco and health, transportation, education, crops, soils and nutrition. Large research programs in coal and energy are conducted by University faculty and The Institute of Mining and Minerals Research. Similarly, programs in tobacco and health are conducted by University faculty, The College of Agriculture and The Tobacco and Health Research Institute. There is a center for multidisciplinary research in aging and a center for conducting cancer research.

Research Program at Oak Ridge Associated Universities

The University is one of the sponsoring universities of the Oak Ridge Associated Universities located at Oak Ridge, Tennessee. Through this association, the University of Kentucky has available to it the facilities of the National Laboratories in Oak Ridge and of the research staffs of these laboratories. When masters and doctoral candidates

have completed their course work, it is possible by special arrangement for them to go to Oak Ridge to work on their research problems and prepare their theses. In addition, it is possible for staff members of the University to go to Oak Ridge for varying periods, usually for not less than three months, for advanced study in their particular fields.

Among ORAU's activities are competitive programs to bring undergraduates, graduate students and faculty members to work on research problems at the research facilities of the Energy Research and Development Administration. Participants are selected by ORAU and the staffs of the facilities participating in the ORAU programs, which are Oak Ridge National Laboratory; the Oak Ridge Y-12 Plant; the Oak Ridge Gaseous Diffusion Plant; the Atmospheric Turbulence and Diffusion Laboratory in Oak Ridge; the Savannah River Laboratory and Savannah River Ecology Laboratory in Aiken, S.C.; the Comparative Animal Research Laboratory in Oak Ridge; the Puerto Rico Nuclear Research Center; and the Energy Research Centers at Bartlesville, Okla., Pittsburgh, Pa., and Morgantown, W.Va. The ORAU Institute for Energy Analysis, the Special Training Division, the Medical and Health Sciences Division and its other programs are also open to qualified students and faculty members.

Students on Oak Ridge Graduate Fellowships receive stipends which vary according to the number of their dependents and the level of work they are doing. Staff members may work in Oak Ridge on stipends commensurate with their present salary and rank.

Information concerning stipends and other matters may be obtained from the office of The Graduate School or from the Chairman of the University Relations Division of the Oak Ridge Associated Universities, Box 117, Oak Ridge, Tennessee 37831.

Bulletins may be obtained by writing to the University Programs Office, Oak Ridge Associated Universities, P.O. Box 117, Oak Ridge, Tennessee, 37830.

Research and Teaching Assistantships

Most departments employ part-time teaching and research assistants. The stipends vary with the departments. Information concerning assistantships may be obtained from the various departments.

Miscellaneous Financial Support

Students may request funds from The Graduate School to defray partially certain expenses relating to their graduate education. These include funds for travel expenses necessary to dissertation research; certain dissertation costs, e.g., obtaining microfilm, reproducing and mailing questionnaires, etc.; for travel expenses incurred in presenting papers based on dissertation research at national meetings. Application forms are available in the Fellowship Office.

Visiting Scholars and Advanced Study

When appropriate resources are available at the time desired, the President of the University, upon the recommendation of the Dean of The Graduate School and the department affected, will welcome visiting scholars as guests of the University, and will grant the privilege of au-

ditioning seminars and research courses and of carrying on research in laboratories and libraries. Normally there will be no charge except for laboratory expenses. Negotiations for such arrangements should be conducted in advance through the Graduate Office.

Postdoctoral Fellowships

Post-doctoral fellowships are available in various research departments. Information concerning the terms of the fellowships is available in the department. Post-doctoral fellows are required to register with The Graduate School through their department.

The Multidisciplinary Center of Gerontology

The Multidisciplinary Center of Gerontology is a center for research, instruction, training and service to local and state agencies. It administers interdisciplinary research programs in aging, coordinates the offering of gerontology courses, and assists in the training of graduate students who are interested in the various programs in aging.

Students interested in graduate study with an emphasis in gerontology may contact the Director of the Center.

UK-NKU Graduate Center

The University of Kentucky and Northern Kentucky University established a Graduate Center at Northern Kentucky University beginning the fall semester of 1977 for the purpose of meeting graduate education needs for the Northern Kentucky region in some fields which have not been met, previously.

The Graduate Center utilizes faculty from the University of Kentucky and some faculty from Northern Kentucky University where there is expertise in one of the fields being offered in the Center.

Students interested in taking graduate courses at the Northern Kentucky Graduate Center should either contact the Center office at Northern Kentucky University or The Graduate School at the University of Kentucky for information about the curricula being offered through the Center.

Appalachian Center

The Appalachian Center is a multifunction Center for research, instruction, extended service, and archival activities relating to the Appalachian region. It administers interdisciplinary research programs, coordinates instructional, service, and archival programs based in other units of the University. It provides assistance and a focal point for graduate students who are interested in the study of the Appalachian region.

Students interested in graduate study with an emphasis in the Appalachian region may contact the Director of the Center.

Graduate and Professional Student Association

The Graduate and Professional Student Association (GPSA) was formed in the spring of 1969 to provide a permanent channel for communication between the administration and the graduate and professional students.

1982 - 1983
Graduate Council

Charles Byers 1981-1984
Vocational Education
George Cheniae 1980-1983
Agronomy
James L. Gibson 1983-1985
Management
Robert Guthrie 1982-1983
Chemistry
Jean Hayter 1983-1985
Nursing

The Graduate School Programs

The course listings in The Graduate School Bulletin include all courses approved through February 22, 1982

GS 600 Special Topical Graduate Course. (2-3)
An interdisciplinary, topical or experimental course to be approved by the dean of The Graduate School. A particular course can be offered no more than twice under the number, GS 600. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

Accounting

Graduate Faculty: Professors Paul Michael Davis, William W. Ecton, James A. Knoblett, Donald L. Madden, Michael Tearney, Manuel A. Tippos, Raymond P. VanDaniker. Associate Professor James Dillon.

Associate Members: Associate Professors Myrtle W. Clark, James R. Holmes; Assistant Professors Chinswen R. Chen, Daniel L. Fulks.

Emeritus Professor: Robert Haun.

Master of Science in Accounting

The Master of Science in Accounting is primarily for students who wish to have a program of advanced study in accounting. This program provides adequate preparation for employment in public accounting, business, government and other organizations, or for initial employment as an instructor at the college level. The program can be structured to prepare a student for further graduate work in related fields. Specifically, the program's objectives are to:

1. Develop the ability to carry out significant research and communicate results thereof.
2. Provide for greater concentration in a selected area of accounting.
3. Expand the student's knowledge of accounting theory, the significance of professional literature, and controversial concepts at an advanced level.
4. Further the student's understanding of the close relationship between accounting and other fields of business and between accounting and disciplines outside the business area.
5. Provide the opportunity to study in an area (or areas) outside the business fields, when such study is consistent with the student's educational needs and objectives.

Requirements

1. Graduate study in accounting presumes a minimum preparation of 30 hours in business and economics, including the completion of the following basic courses

(examples of acceptable courses at the University of Kentucky are given in parentheses):

Principles of Economics (ECO 260, ECO 261)
Principles of Accounting (ACC 201, ACC 202)
Statistical Method (STA 291, ECO 391)
Management (BA 335)
Finance (BA 345)
Marketing (BA 330)
Business Policy (BA 439)

These prerequisites may be satisfied by completion of BA 600, which is an interdisciplinary graduate course offered each summer. See discussion on pages 6-7 of this brochure for additional information about BA 600. Prerequisites to graduate study in accounting include courses in elementary, intermediate, cost, tax accounting and auditing.

2. The Graduate Management Admission Test (GMAT) must be taken prior to being admitted.

3. A minimum of 30 semester hours must be presented in courses carrying graduate credit. At least 18 semester hours must be in courses reserved exclusively for graduate students and at least 12 of these must be in accounting.

4. The course requirements are:

- a. One course in each of the following fields:
Advanced Managerial Accounting
Income Taxation
Accounting Theory
Attest Function
- b. At least six semester hours of graduate credit outside the Department of Accounting, three of which must be production related.
- c. A course in Computer Science or Data Processing.
- d. The candidate must submit evidence of competence in statistics (successful completion of six semester hours of course work at the upper division level).

5. Minimal average of grade B in all courses attempted for graduate credit after being admitted to Graduate School. A minimal average of grade B must similarly be achieved for all accounting courses at-

tempted after being admitted to Graduate School. Students obtaining two grades of C below a B average will be dropped by the Department.

6. Successful completion of a comprehensive examination.

Administration and Supervision

Graduate Faculty: Professors Charles Faber, James Ogletree; Associate Professor Eddy VanMeter.

Associate Member: Professor Fred Edmonds

Emeritus Professors: W. Paul Street and James B. Kinchele

The Department of Administration and Supervision offers programs leading to the Specialist in Education (Ed.S.) degree and the Doctor of Education (Ed.D.) degree. These advanced degree programs are designed to prepare candidates for leadership positions in public schools and other educational agencies or for the professorship in educational administration. The Department participates in a Joint Doctoral Program with regional universities.

In addition, the Department also offers

programs leading to professional certification and to Rank I classification (for Kentucky salary purposes) for various types of administrative and supervisory positions, as follows:

1. Superintendent of Schools
2. Elementary Principal
3. Secondary Principal
4. Supervisor of Instruction
5. Director of Pupil Personnel Services

All certification programs require that the candidate must have earned a master's degree in an appropriate teaching field prior to completion of the program in administration and supervision.

The University of Kentucky is an active member of the University Council for Educational Administration, which was formed to promote, through inter-institutional cooperation, improvement in the professional preparation of administrative personnel. A number of services are available to graduate students through this membership.

Internships for graduate students can be arranged with public school systems and other educational agencies.

A limited number of graduate assistantships are available through the Department. These involve up to 20 hours per week of service to the Department or some other unit of the University, designed in such a way that the work contributes to the educational development of the student. A modest stipend is paid for this service. The University also provides some financial aid, in the form of loans and fellowships.

For further information, write to the Director of Graduate Studies in the Department of Administration and Supervision, College of Education, University of Kentucky, Lexington, Kentucky 40506, requesting one or more of the following sets of materials:

1. Admissions Procedures and Forms
 2. Requirements for Professional Certificate and Rank I Programs

Agricultural Economics

Graduate Faculty: Professors Kurt R. Anschel, Robert D. Beck, Garnett L. Bradford, Russell H. Brannon, David L. Debertin, Fred E. Justus, Angelos Pagoulatos, Alan Randall, John C. Redmon, Robert W. Rudd, D. Milton Shuffett, Eldon D. Smith. Associate Professors Barry W. Bobst, Harry Hall, Loys L. Mather, Michael Reed and Lynn Robbins.

Associate Members: Professor Craig Infanger (Extension), Larry D. Jones (Extension), Harold Love (Extension), Charles Moore (Extension), Associate Professors Joe T. Davis (Extension), Donald Graves, Assistant Professors S. J. Chang and Jerry Skees.

Emeritus Professors: George Byers and Dana Card.

The degrees of Master of Science, Master of Science in Agriculture (Plan B available), and Doctor of Philosophy may be earned in the field of agricultural economics. The student is expected to concentrate, in addition to agricultural economics, on economics and subjects relating to research methodology. Those without sufficient background or training are expected to make up deficiencies indicated by the Department.

The beginning graduate student is advised to choose between two program emphases, applied or research, according to his career interests. The applied sequence prepares the student broadly in subjects that will have a continuing usefulness in farm management, agri-business, business, agricultural program administration, extension, foreign service and the like. Internships with agri-business firms are encouraged. Students in the applied program are not required to submit theses but must complete 36 graduate credits. The applied emphasis is designed for those who do not plan to undertake Ph.D. programs. The research emphasis in the M.S. program involves more work in the basic fields of economic theory, statistics and research methodology and is designed to prepare the student for the Ph.D. level work or a research related career. Students in the research program must submit a thesis and complete 24 graduate credits. Those with the applied emphasis in the M.S. Program will ordinarily require an addi-

tional semester of study to eliminate deficiencies in the basic fields if they decide to pursue Ph.D. work.

All students seeking the Ph.D. must satisfactorily complete a core curriculum of courses in statistics, economics, and agricultural economics, and demonstrate a reading knowledge of one modern foreign language. A dissertation must be completed. UK graduates with Ph.D. degrees in agricultural economics are now employed in administrative positions in academic institutions, business, government programs for agriculture, and foreign technical assistance, in addition to those holding research, teaching, or extension appointments in academic institutions.

Study areas which the Ph.D. or Master's student may emphasize include agricultural marketing and price analysis, farm management and production economics, agricultural policy, resource and environmental economics, and economic development. In addition to taking courses in these areas within agricultural economics, the student may select courses from a broad array of agricultural and social science disciplines which will complement his particular professional career interest. A graduate student handbook is available which provides information on the Department's graduate program and details the Ph.D. core curriculum and the recommended content of the two emphases in the Master's Degree program.

Agricultural Engineering

Graduate Faculty: Professors Billy Barfield, Otto J. Loewer, Jr., Blaine Parker, Joe Ross, Edward Smith, John Walker, Gerald White. Associate Professors Wiley Henson, Linus Walton, Larry Wells.

Associate Members: Associate Extension Professors George Duncan and Robert Fehr, Assistant Professors Donald Collier, I. D. Moore.

The Agricultural Engineering Department offers programs leading to the M.S. in Agricultural Engineering (Plan A and Plan B available) and the Ph.D. degree. The department normally requires a grade point average of 2.8/4.0 for admission to its graduate program.

The agricultural engineering graduate program has as its objectives the development of:

1. The ability to plan and conduct research and design involving the application of the engineering science to biological and agricultural systems.
2. The understanding of the mathematical, physical, and biological sciences to permit the reading and understanding of the present and future literature in these and related fields.
3. The skills required to use precision instruments, techniques and computers in research and design.
4. The ability to make sound engineering and management decisions.
5. The ability to teach college level courses in agricultural engineering, particularly at the doctoral level.

In the attainment of the above objec-

tives the graduate student will combine courses in agricultural engineering, the physical sciences, other engineering fields, and the biological sciences in developing a program of study. The advanced degrees, however, are primarily research degrees awarded for significant creative research accomplishment, not for the completion of a specified number of courses. Therefore, the program concentrates on a strong thesis or dissertation problem done under the supervision of the graduate faculty of the Department. Strong course support is essential if the thesis or dissertation problem is to be properly undertaken and completed.

The design-oriented non-thesis option is available for the Master's degree.

Anatomy

Graduate Faculty: Professors Peter P. Bosomworth, William B. Cotter, Ira Fowler, Roger Lambson, Raymond E. Papka, Harold F. Parks, Harold H. Traurig and Miroslava Nikitovich-Winer. Associate Professors William K. Elwood, Daniel H. Matulonis, Betty Siskin, Stephen Smith, and Richard Walker. Assistant Professor Stephen Scheff.

Associate Members: Associate Professor Norman Goodman, unassigned member of the Graduate Faculty from the College of Medicine. Assistant Professors Steven Dekosky, Bruce Maley and Michael Rush.

Emeritus Professors: Robert Benton, Lois Gillilan.

The program of graduate studies in Anatomy is intended to provide educational opportunities for people with several different objectives. Some students will pursue graduate work in Anatomy with the intention of teaching in departments of anatomy; some will have already obtained a professional degree, such as an M.D. or D.M.D., and may be interested in obtaining specific training in some region or system of the body to complement their professional education. Others may study in Anatomy as a minor or simply for specific credit.

Preparation for graduate work in anatomy should include some course work in biological science along with other grounding in the sciences to the minimal extent of course work in quantitative analysis and organic chemistry, a term of calculus, and a year of college physics. Students with deficiencies in any of these areas may be admitted, but will be expected to complete their background early in the course of their graduate studies.

The Department is prepared to offer the M.S. and Ph.D. degrees with areas of specialization in gross human anatomy, microscopic human anatomy, embryology, endocrinology, genetics, and neuroanatomy. Also, a major interest can center in tissues, organs, regions or systems of the body, in which, for example, professional graduates such as dentists or orthopedic surgeons might wish to take specific

training. Certain students with special needs will, with permission of the Director of Graduate Studies, be permitted to work toward the M.S. degree on Plan B; however, in most cases students will follow Plan A.

Potential applicants for graduate work in Anatomy are requested to write directly to the Director of Graduate Studies in the Department of Anatomy.

Animal Sciences

Graduate Faculty: Professors Richard L. Anderson, John Baker, Charles Barnhart, James Boling, Neil Bradley, Gary Cromwell, Donald Ely, Virgil Hays, Roger Hemken, James Kemp, Bruce Langlois, Oran Little, George Mitchell, William Moody, Durward Olds, Frederick Thrift, Ray E. Tucker, Patch Woolfolk. Associate Professors, Joe Fox, Robert Goodwill, Tim Stahly.

Associate Members: Professor Nelson Gay. Associate Professors Austin H. Cantor, Karl A. Dawson, Lee A. Edgerton, Robert J. Harmon, Clair L. Hicks, Russell B. Muntifering. Assistant Professor P. M. Zavos.

Emeritus Professors: Ray Dutt, T. R. Freeman, W. P. Garrigus, Donald MacLaury, Dwight Seath and Dewey Steele.

The degrees of Master of Science, Master of Science in Agriculture (Plan A and Plan B are available) and Doctor of Philosophy are available in the Animal Sciences. Programs in the Department are divided into the disciplinary areas of Animal Nutrition, Food Science, Genetics and Physiology. Special interests in beef cattle,

dairy cattle, horses, poultry, sheep, swine, meats, muscle biology, dairy technology, anaerobic microbiology, and food microbiology may be pursued within these areas.

Candidates for the Ph.D. degree are required to have a reading knowledge of one modern foreign language and to declare a minor outside the Department. On approval of the student's special committee, a minimum of 12 credits in not more than two departments may be substituted for the minor.

Anthropology

Graduate Faculty: Professors William Adams, Art Gallaher, Jr., Donald Hochstrasser, Marion Pearsall, Associate Professors Susan Abbott, Albert Bacdayan, Rudolf Berle Clay (Adjunct), Billie R. DeWalt, Tom D. Dillehay, Lathel Duffield, Kenneth Hirth, Helen Wiese, John Van Willigen.

Associate Members: Assistant Professors: James Boster, Kathleen DeWalt.

Emeritus Professor: Margaret Landis

The Department of Anthropology offers courses and research areas leading to the Ph.D. degree in the areas of Applied Social Anthropology, Culture History (Ethnohistory and Archaeology), and Ethnology. The Applied Social Anthropology program offers specialization in Developmental Change and Medical Anthropology. The Department offers two M.A. areas of specialization: a general anthropology degree (Plan A) certifying a broad background in anthropology, plus research competence in the collection and processing of primary data, and an applied anthropology degree (Plan B) which prepares the student for non-academic employment in Cultural Resource Management or in Applied Cultural Anthropology. The Plan A program requires a thesis and the Plan B program requires a practicum.

The Plan A Master's degree also functions as the entry into the departmental Ph.D. program. All incoming graduate students without the M.A. are treated initially as candidates for this degree. These students are expected to satisfy the requirements for the M.A. program which include four proseminars in each of the four disciplines of anthropology, a course in statistics, a course in the history of theory, and reading knowledge of one foreign language. Students who (1) excel in this program and (2) demonstrate satisfactory research competence, may petition to by-pass the master's thesis.

The Ph.D. course of study is individually planned for each student and depends on the student's interests, and the student's advisory committee's judgment of a student's needs. The student must pass a Ph.D. Qualifying Examination consisting of four days of written examinations and an oral examination. A dissertation based on original research carried out by the student is required, and a final oral examination is given based on the dissertation research. The program also requires (1) a reading knowledge of two foreign languages, or 2) a high degree of

proficiency in reading, writing and speaking one foreign language. The second foreign language in option 1 may be replaced with any one of the following: 1) facility in a programming language (e.g., PLI, Fortran), 2) competence in the use of statistics and/or mathematics in anthropology, and 3) competence in linguistics sufficient to allow field work using an unwritten language.

Students who complete the requirements of the Plan B Master's must meet the requirements of the Plan A degree before proceeding to the Ph.D. degree.

Incoming students who have earned a Master's Degree at other institutions will be expected to demonstrate the same broad background in anthropology as is required to earn the M.A. at the University of Kentucky. If deficient in this regard they may be required to take appropriate course work which is normally part of the M.A. program, before proceeding to work toward the Ph.D.

The following areas are represented in the individual research experience of members of the anthropology faculty: Oceania, Southeast Asia, South Asia, North Africa and the Near East, East Africa, Europe, Latin America, and North America. Several members of the faculty have expertise in the study of rural English-speaking sub-cultures.

The Department participates in interdisciplinary research in the University's Center for Developmental Change, in the Water Resources Institute and in the College of Agriculture. The Department of Behavioral Science, College of Medicine, includes anthropologists on its staff, and students with interests in medical anthropology are encouraged to take the behavioral science concentration. There are also anthropologists in the College of Allied Health and the Department of Social and Philosophical Studies (College of Education). Anthropology graduate students with appropriate interests are eligible for assistantships in the above fields.

Department standards for admission to graduate work in anthropology include an undergraduate department over-all average of B or better, a satisfactory score on the verbal and quantitative tests of the Graduate Record Examination, completion of a separate departmental application form, and three letters of recommendation. Write the Director of Graduate Studies, Department of Anthropology, for additional information on departmental requirements and opportunities for financial assistance.

Art

Graduate Faculty: Professors James Pierce, John Tuska, Associate Professors Georgia Collins, Gerald Ferstman, Elizabeth Finkstaedt, Deborah Frederick, Marilyn Hamann, Donald Hoffman, Leonard L. Huntce, Arthur Jones, Arturo Sandoval, George Szekely, Robert Tharsing.

Associate Members: Assistant Professors Christine Havice, Jane Peters, Mary Sheriff, and Shirley Wiyee.

Emeritus Professor: Clifford Amyx.

The Department of Art offers graduate course work in three areas: Art Studio, Art History and Art Education. Both the Art History Area and the Art Education Area confer the Master of Arts degree with an area of specialization in each. Studio degree recipients are awarded the M.F.A.

Master of Arts

Area of Specialization in Art History: Students admitted to the graduate program in art history are expected to have completed course work equivalent to an undergraduate major in art history (in no case, less than 18 hours of art history or less than 12 hours of art studio). Work toward the master's degree is undertaken under Plan A (see Requirements for the Degrees of Master of Arts and Master of Sciences, Plan A) with a total of 24 hours including the required Graduate Art History Seminar (A-H 560). At least two-thirds of the required hours must be in Art History or Museum Training courses. A satisfactory thesis must be presented and a final examination passed. It is also required that the student offer either course work or substantial proof of ability to use more than one foreign language.

Area of Specialization in Art Education: Students admitted to the graduate program in art education are expected to have completed course work equivalent to an undergraduate major in Art Education (in no case less than 18 hours in Art Education and Education, 12 hours in Art History, and 18 hours in Art Studio). Prospective students who do not meet these requirements should seek the counsel of the Program Faculty Committee to make up deficits prior to acceptance into the program. (In addition, candidates must submit for review by the Program Faculty Committee, a portfolio of recent studio

work (slides) and/or professional writing and other evidence of professional attainment, along with a 300-500 word statement of interest and/or objectives.)

Work toward the Master's degree is pursued under Plan A (see Requirements for the Degrees of Master of Arts and Master of Sciences, Plan A). Successful candidates for the Master of Arts with an area of specialization in art education are to satisfactorily complete: (1) thesis preparation demonstrating substantial research or theoretical inquiry in Art Education; (2) a finished thesis and an oral/written examination; (3) 30 credit hours of graduate course work to be divided as follows: (1) nine to 12 graduate credit hours in art education (excluding A-E 575, 577, 579, or other Art Education courses required for initial certification); (2) nine to 12 graduate credit hours in Art History or Art Studio; (3) the remaining nine graduate credit hours may be taken in related course work in the College of Fine Arts, the College of Education or elsewhere in the University as well as in the Department of Art.

Master of Fine Arts

Application for admission to graduate work leading to the degree Master of Fine Arts (MFA), including application for graduate assistantships, must be accompanied by a portfolio of recent studio work in the form of at least twenty 35mm slides of such work. This work must be submitted to the Art Department by March 15. Applicants wishing to be considered for fellowships should apply to the Graduate School and submit portfolios to the Art Department by February 1. In no case will this requirement be waived. Undergraduate art work must be substantially equal in quality, scope, and number of hours to the undergraduate major at the University of Kentucky.

The MFA degree will be awarded on the completion of sixty (60) hours of graduate course work. Of these, thirty hours must be at or above the 600 level and forty hours must be in regular courses (not independent study). In addition, the sixty credit hours will include thirty to thirty-six credit hours in Art Studio courses (including Graduate Studio Seminar and Studio Thesis Project), six to twelve credit hours in Art History and/or Art Education (a total of twenty-four credit hours of undergraduate and graduate Art History study is required), and up to eighteen credit hours in related graduate courses which may be taken outside the Department of Art in the College of Fine Arts or elsewhere in the

University.

Students must also complete successfully a final one-person MFA exhibition of studio work and a visual documentation of that work together with an explanatory essay which is to be filed with the Department prior to the exhibiton. A total of six credits of A-S 767 (Studio Thesis Project) is required for the preparation of the exhibition and essay. Work toward the one-person exhibition will begin at a time determined by the Department.

The student will designate a major area with the advice of a senior professor at the outset of graduate work and will carry at least twelve hours in that area under the guidance of one professor selected as an advisor. A foreign language is not required, and the MFA degree is offered only according to Plan B.

Candidates for the MFA degree who hold an MA degree in studio work from another school will be required to complete a year's residence and eighteen credit hours of graduate work at the University of Kentucky, including two semesters of Graduate Studio Seminar and all other requirements for the degree. Total hours toward the MFA degree must equal sixty credit hours of graduate work.

GENERAL COURSES

FA 501	Arts-Study Tour	(3)
501	Basic Museum Training: Historical Art ..	(3)
502	Basic Museum Training: Contemporary Art	(3)
768	Residence Credit for Master's Degree	(1-12)

ART EDUCATION

799	Problems in Painting and Printmaking ..	(3)

Behavioral Science

Graduate Faculty: Professors Ronald Dillehay, Thomas Ford, Eugene Gallagher, Thomas F. Garrity, John Haley, Russel Jones, Garth Olde, Marion Pearsall, Gary Shannon, John Stephenson, Robert Straus. Associate Professors Susan Abbott, Lawrence Busch, Jon Hendricks, Philip Moody, John Van Willigen, H. Jean Wiese, John F. Wilson.

Associate Members: Assistant Professors Kathleen DeWalt, Michael Montagne and Sandra Tausend.

A program of concentration or a minor in medical behavioral science is offered for doctoral candidates in sociology, anthropology, psychology or other behavioral science disciplines through the Department of Behavioral Science in the Medical Center. The concentration has three objectives:

1. Research training in a health-medical setting, designed to afford each student an opportunity to learn the basic skills and approaches to research design, data acquisition, and data analysis, through personalized, supervised participation in one or more research projects. Such training is arranged to include experimental, survey, and case-

study methods, to insure the integration of research training with a student's program of courses and to culminate in a health-related topic for the doctoral dissertation. As far as possible, students in the concentration are provided office space in the Medical Center so that they may have ready access to resources and events.

2. An orientation to medical settings, including an enculturation to the social structure, attitudes, beliefs, values and objectives of health personnel and organizations, and the nature of behavioral science research in these areas.
3. An orientation to the several behavioral sciences; to their areas of overlap and interrelation as well as to their discrete contents, theories and methods.

Students may elect to minor in medical behavioral science by taking a group of approved courses with the sponsorship and guidance of a designated faculty member.

The concentration is partially supported by a training grant from the National Institute of Mental Health for Research Training in the Social Sciences, under which selected students are provided with pre- and postdoctoral traineeship stipends. A limited number of assistantships are also available to qualified students.

527	Society and Health	(3)
529	Survey of Medical Anthropology	(3)
546	Social Factors in Mental Health	(3)
670	Seminar on Role Theory	(3)
738	Seminar: Drug Use as Deviant Behavior	(3)
764	Topical Seminar in Psychological Anthropology	(3)
765	Research Problems in Medical Anthropology	(3)
766	Concepts in Medical Sociology	(3)
767	Research Problems in Medical Social Psychology	(3)
772	Topical Seminar in Medical Behavioral Science	(1-3)
775	Human Response to Stress	(3)
776	Seminar in Dependency Behavior	(3)
777	Seminar in Mental Illness Concepts, Research and Policy	(3)
778	Behavioral Factors in Selected Diseases	(3)
779	Behavioral Factors in Death and Dying	(3)

Biochemistry

Graduate Faculty: Professors Charles Ambrose, Alfred Hu, Robert Lester, George Schwert. Associate Professors Mary Barkley, S. K. Chan, Mary Sue Coleman, Robert Dickson, Robert Rhoads, Alfred Winer.

Associate Members: Associate Professor R. E. Galardy. Assistant Professors Martin Deibel, Salvatore Turco, and Buddy Ullman.

The program of graduate studies in biochemistry is designed primarily for doctoral candidates who plan to pursue a research career in this field. Creative research in biochemistry requires broader training and more extensive laboratory ex-

perience than can be achieved at the master's level. Therefore, candidates for the master's degree will be accepted only under unusual circumstances.

As preparation for graduate work in biochemistry, students should have completed courses in chemistry through physical chemistry, in mathematics through the calculus and must have had one year of work in physics and in one of the biological sciences.

Research interests of faculty members can be divided into the broad categories of (a) nucleic acids and molecular biology: protein synthesis, DNA enzymes, messenger RNA, DNA-drug interactions, yeast genetics, recombinant DNA, plant viruses, physical chemistry of DNA, somatic cell genetics, purine metabolism, and transformation of plant cells; (b) cell surfaces: inositol-containing phospholipids, glycoprotein biosynthesis, cell surfaces of parasites; and (c) enzymes and proteins: transition state enzyme inhibitors, enzyme kinetics, emphysema-related proteins.

Inquiries concerning availability of financial support for graduate students should be addressed to the Director of Graduate Studies.

Thomas Hunt Morgan School of Biological Sciences

The Thomas Hunt Morgan School of Biological Sciences provides programs in biology leading to the Masters and Doctor of Philosophy degrees. The programs draw upon the various courses and faculty members in the biological sciences. The purpose of the graduate programs is to train participants as well-rounded biologists familiar with the main branches of the biological sciences and the auxiliary fields of mathematics, physics, and chemistry.

A student who receives a degree under

the programs also will be sufficiently well-trained in one of the major branches of biology to be able to conduct research in that special field, as well as broadly enough trained to participate in the teaching program of a department of biology. Students will be expected to have a background of course work in the principal areas of biology, calculus and organic chemistry before starting their doctoral program.

Major work under the biological sciences program may be arranged to suit the preparation, needs and interests of the individual student. The work could be, for example, in genetics and cytogenetics, ecology and evolution, vertebrate zoology, invertebrate zoology, microbiology, entomology, developmental biology, histology, parasitology, plant physiology, plant morphogenesis, algology, systematic botany, mycology, cellular biology, radiation biology, ultrastructure, etc.

Laboratory facilities and equipment are excellent for doctoral work in all branches of biology. A very good biology library containing over 32,000 volumes, and including many important American and foreign periodicals is available and is supplemented by over 200,000 volumes concerned with biology in the libraries of the College of Agriculture, the College of Medicine and the Departments of Chemistry, Physics, and Geology.

For appropriate courses see the listings in the various areas of biology.

Graduate programs offered within the Thomas Hunt Morgan School of Biological Sciences are Master of Arts or Science and Ph.D. degree program in Biology, and a Master of Science and Ph.D. program in Microbiology. School faculty also participate in a University-wide Plant Physiology program.

Biology

Graduate Faculty: Professors M. I. H. Aleem, R. W. Barbour, T. C. Barr, Jerry M. Baskin, W. J. Birge, Branley Branson (Adjunct), E. C. Crawford, W. H. Davis, Lester Goldstein, John Harley (Adjunct), G. Rosenthal, P. S. Sabharwal, J. E. Siskin, Ralph Wiseman. Associate Professors P. Bonner, J. C. Calkins, J. D. Clark, W. Cohen, P. Crowley, L. Demski, D. O. Harris, J. J. Just, R. A. Kuehne, J. Lesnaw, W. Meijer, N. J. Pisacano, D. J. Prior, J. M. Rawls, G. L. Uglem.

Associate Members: Associate Professor W. H. Martin. Assistant Professor J. L. Morgan.

Emeritus Professors: John Carpenter, James Edney, Herbert Riley.

The Thomas Hunt Morgan School of Biological Sciences provides a program in biology leading to the degree of Master of Arts or Sciences and to the degree of Doc-

tor of Philosophy.

Work on the masters can be either Plan A or Plan B. Plan A is ordinarily required but Plan B is permitted under certain circumstances. Almost all areas of study encompassed by biology are available to the student.

Major work under the Ph.D. program would be arranged to suit the preparation, needs and interests of the individual student. The work could be, for example, in genetics and cytogenetics, ecology and evolution, vertebrate zoology, invertebrate zoology, entomology, developmental biology, histology, parasitology, plant physiology, plant morphogenesis, algology, systematic botany, mycology, cellular biology, radiation biology, ultrastructure, animal physiology, neurobiology, etc.

The Director of Graduate Studies in Biology also serves as Director of the Master of Science and Master of Arts Programs in Biology.

Additional courses in Biological Sciences are offered through an affiliation agreement between the University of Kentucky and the Gulf Coast Research Laboratory (GCRL) in Ocean Springs, MS. Courses available cover most aspects of marine and estuarine biology including independent research in these areas. Consult the Bulletin of the GCRL for further details (available at the School of Biological Sciences Office or from Dr. Leo S. Demski, On Campus Co-ordinator for GCRL Programs).

Biomedical Engineering

The biomedical engineering program is an area within the Mechanical Engineering Department graduate studies program.

Research programs now underway include the study of physiological responses to environment stress (i.e., acceleration, rotation, etc.), characteristics and modeling of biological tissue and systems, development of instrumentation for biological monitoring, and related problems. Research is conducted in the laboratories of the Medical Center and the College of Engineering.

Further information may be obtained by writing to the Director of Graduate Studies, Mechanical Engineering Department.

Business Administration

Graduate Faculty: James Donnelly, Richard Furst, James Gibson, Joseph Guiltinan, Charles Haywood, Joseph L. Massie, Jon M. Shephard, Marc J. Wallace. Associate Professors Phillip Berger, John J. Bernardo, Andrew Grimes, James Long, Brint Milward.

Associate Members: Associate Professor Michael Carpenter. Assistant Professors I. K. Chew, Ronnie Clay-

ton, Alan Dubinsky, Charles Fay, James Freeman, Lucy Henke, Paul Hensel, Harold Hotelling, Thomas Ingram.

Business Administration Graduate Programs

Through the cooperation of the Departments of Accounting, Economics, Finance, Management, and Marketing, the College of Business and Economics offers the Master in Business Administration and Doctor in Business Administration degrees. Detailed information about these graduate programs of the College may be obtained by writing: The Graduate Center, College of Business & Economics, University of Kentucky, 301 Commerce Building, Lexington, KY 40506-0034. A description of the graduate programs of the Accounting and Economics Departments can be found in those sections of this bulletin.

Business Administration Faculty are members of the Departments of Finance, Management, and Marketing.

Master of Business Administration

The program leading to the Master of Business Administration degree has two basic objectives: (1) to enable the candidate to acquire an educational foundation contributory to long-range development for socially responsible business administration and (2) to equip the student for professional employment in some functional or other field of business upon completion of the program.

To attain these objectives, the program is designed to provide the student with the appropriate knowledge, understanding, skills and abilities, including:

1. An understanding of the processes of business administration and of the methods needed by business administrators when effectively coping with uncertainty.
2. A knowledge of the economics of business enterprise and of the dynamic environment and culture in which business firms operate.
3. An understanding of quantitative methods of analysis in business decision making, including the use of mathematical, statistical, and accounting approaches.
4. A knowledge of organizational relationships and behavior in business enterprises and of ways for promoting effective human relations, including contributions of the behavioral sciences.
5. The ability to solve complicated and realistic business problems by utilizing economics, business, and other professional literature and the specialized knowledge of other people, both in and out of the business

firm, in order to present these findings effectively in both written and oral reports.

6. An understanding of the functional problems involved in operating a business enterprise, such as those pertaining to production, marketing and finance, and a knowledge in depth of the concepts, research findings, and currently useful generalizations within some functional area.

Requirements

1. The Graduate Management Admission Test (GMAT) must be taken prior to being admitted. Information on dates and locations where this national examination is given may be obtained from the Counseling and Testing Center, Mathews Building, University of Kentucky, (606) 257-8703.

2. Admission to the M.B.A. program presumes minimal prerequisite course work in the following areas (examples of acceptable courses at the University of Kentucky are given in parentheses):

Principles of Accounting (ACC 201, ACC 202)

Introduction to Calculus (MA 123 or MA 113)

The prerequisites to the M.B.A. program listed above may be satisfied by any of the following methods: (1) by taking the courses at the University of Kentucky or at some other accredited institution; (2) by College Level Examination Program (CLEP) (proficiency) examinations, or (3) by correspondence.

3. The M.B.A. program consists of the following 39-hour core and nine hours of electives:

	Credits
MGT 611 Organizational Behavior	3
ECO 610 Managerial Economics	3
ACC 628 Financial/Managerial Accounting	3
MGT 650 Data Analysis for Decisions	3
MKT 600 Marketing Management	3
ECO 611 Business Conditions Analysis	3
FIN 600 Corporate Financial Policy	3
MGT 651 Quantitative Analysis for Decisions	3
MGT 620 Personnel and Industrial Relations	3
MGT 640 Legal and Regulatory Environment	3
MGT 656 Production Management	3
MGT 698 Business Policy and Strategy I	3
MGT 699 Business Policy and Strategy II	3
	39
Electives	9
Total	48

The nine hours of electives beyond the core may consist of approved courses providing a specialization in one of the following fields: marketing, finance, production, personnel and industrial relations, accounting, and others to be developed.

Students with undergraduate degrees in business may waive up to nine hours of electives and three hours of Business Policy and Strategy I. Substitutions may also be made for core courses if substantial undergraduate courses have been taken in the specific subject matter.

4. Residence for at least two semesters at the University of Kentucky as a full-time student, or its equivalent as a part-time student.

5. Minimal average of grade B in all courses attempted for graduate credit after being admitted to Graduate School. Students receiving two grades of C below a B average will not be permitted to continue the M.B.A. program.

6. Successful completion of a comprehensive final examination.

It is possible to earn the M.B.A. degree as a full-time or as a part-time student. Full-time students should attend day classes and take twelve hours each semester. Part-time students should attend evening classes and take six hours each semester.

Application for Admission

An applicant for admission to The Graduate School shall not be discriminated against because of race, color, religion, sex, marital status, national origin, age or beliefs. Students who wish to apply for admission to graduate study in the College of Business and Economics should write to the Admissions Officer, The Graduate School, University of Kentucky, Lexington, Kentucky 40506, and request application forms for admission and financial aid together with the Graduate Bulletin. The Graduate Bulletin contains information about graduate study at the University of Kentucky not contained in this brochure.

A student who is a graduate of a fully accredited institution of higher learning is eligible to apply for admission to The Graduate School under the following conditions:

Masters degrees: (1) M.B.A.—Minimal requirements in order to be considered for admission into the program are that the sum of the four-year grade-point average multiplied by 200 plus the GMAT score must exceed 1050, i.e., $200 \times \text{GPA} + \text{GMAT}$ is greater than 1050, or the sum of the junior-senior grade-point average times 200 plus the

GMAT score exceed 1100; (under no circumstances can a person be admitted whose four-year GPA is less than 2.5 or whose GMAT score is less than 450.)

Additional requirements are:

1. Residence for at least two semesters at the University of Kentucky as a full-time student, or its equivalent as a part-time student.
2. Minimal average of grade B in all courses attempted for graduate credit after being admitted to Graduate School. Students receiving two grades of C below a B average or failing to bring the grade-point average back up to a B average in one semester will not be permitted to continue the MBA program.
3. Successful completion of a comprehensive final examination.

For more information contact Clyde Irwin, Director of the MBA, Graduate Center, College of Business and Economics.

Doctor of Business Administration

The basic purpose of the program leading to the Doctor of Business Administration degree is to enable people who are interested in academic, research, or administrative consultation careers to acquire a comprehensive professional education appropriate to their goals.

Objectives:

The Doctor of Business Administration degree is designed for persons who are seeking careers in collegiate teaching, business research, or business consultation. A basic purpose of the program is to develop a broad understanding of business administration, and related behavioral, quantitative and economic disciplines. An appreciation of the administrator's point of view in decision making within an organizational setting, and the development of scientific methods and techniques in research investigations will be emphasized.

Requirements

1. Background Training in Business and Business Related Areas.
The D.B.A. is designed to provide specialization beyond the master's level. The educational background of each candidate will be reviewed by an admissions committee which will identify any deficiencies. In most cases, an M.B.A. from an accredited institution (A.A.C.S.B. accreditation) provides the background.

Applicants with previous graduate credits are evaluated generally according to the following rules, but each case is individually examined. A minimal grade-point average of 3.2 is required on all previous graduate credits. Also, students without GMAT scores must take these exams before admission, with a minimal score of 500.

2. Core Requirements (21 credit hours):

- a. Three hours of course work in administrative science
MGT 700, Administrative Science I
- b. Six hours of course work in research
MGT 701, Research Methodology
A graduate course in research techniques appropriate to major interest
- c. Six hours of course work selected from
ECO 660, Advanced Micro-economic Theory
ECO 661, Advanced Macroeconomic Theory
A graduate course directly supporting major research interest
- d. Six hours of course work in quantitative analysis
MGT 750, Management Science I
MGT 751, Management Science II

3. Major and Minor Field Requirements:

The major field will consist of at least 12 hours of graduate credit course work. The minor field will consist of at least six hours of graduate credit course work. The currently available major and minor fields include:

Accounting
Business Policy
Finance
Human Resources Administration
Management and Organizational Behavior
Management Science
Marketing

A minor is available in Production and Taxation.

In addition, fields from outside departments closely related to the major field, e.g., sociology, statistics, computer science, international economics, may be selected as a minor field. This course work must be approved by the Director of the D.B.A. Program.

4. No foreign language is required.
5. Written and oral comprehensive examinations are required in the major and minor fields.
6. The dissertation will be based on original research on a significant topic.

The dissertation will be defended in an oral examination.

7. Minimal average of grade B for graduate credit and in all courses attempted after being admitted to Graduate School. Students obtaining two grades of C below a B average will be dropped by the department.

For more information contact Andrew J. Grimes, Director of the D.B.A. Program.

Center for Learning Resources for Allied Health

Through a cooperative program with the College of Education and the Departments of Curriculum and Instruction, Educational Psychology and Counseling, and Higher Education, the Center makes available the Master of Science in Education degree. Also, in these departments and others, the Doctor of Education Degree is available to allied health specialists.

Persons with a baccalaureate degree in an allied health profession, with two years work experience in their discipline and a desire to teach in or administer an allied health education program, and who meet The Graduate School and departmental requirements, are eligible to make application for entry into these graduate programs.

Inquiries should be directed to: Center for Learning Resources for Allied Health, Medical Center Annex 3, University of Kentucky, Lexington, Kentucky 40536-0218.

Chemical Engineering

Graduate Faculty: Professors Charles Hamrin, Richard Kermod, Leonard Peters, Thomas Schrodt. Associate Professors Dibaker Bhattacharyya, William Conger, Edward Moorhead.

Associate Member: Assistant Professor Asit K. Ray.

The Department of Chemical Engineering provides programs leading to the M.S. in Chemical Engineering and Ph.D. degrees. For admission to either program, a G.P.A. of 2.8/4.0 on all undergraduate work is required. For the M.S. in Chemical Engineering, 24 hours of course work plus an acceptable thesis are required (Plan A). In certain exceptional cases, the thesis may be replaced by six additional hours of course work.

Unique and highly specialized M.S. areas of specialization are available in energy engineering, electrochemical engineering, air quality engineering, and environment pollution control. There is no language requirement for the M.S. in Chemical Engineering. For the Ph.D., a reading knowledge of French, German or Russian is required.

The doctoral student may specialize in one or more of the following areas:

Atmospheric pollution control
Chemical reactor design
Coal conversion processes

Electrochemical Engineering/Electrode Processes
Energy engineering
Oil shale conversion processes
Aerosol chemistry
Process control
Thermodynamics
Transfer processes
Water pollution control

A wide selection of thesis topics is available under the direction of the Chemical Engineering faculty. For further information on financial aid, requirements, and departmental laboratories and facilities, contact the Director of Graduate Studies.

Chemical Physics

Directors of Graduate Studies: Fletcher Gabbard and Joseph W. Wilson.

The Department of Chemistry and the Department of Physics and Astronomy jointly provide a program in chemical physics leading to the degree of Doctor of Philosophy. Chemical physics is an over-

lapping area of the fields of chemistry and physics and, because of its relevance to such fields as astrophysics, thermonuclear physics, and biophysics, it currently enjoys a position of considerable esteem at a number of institutions. Experience shows that most exciting progress is made when members of the traditional fields of chemistry and of physics join together to form an operating unit of wide scope without the sacrifice of depth in the specialized areas. Students of either department are encouraged to follow a broader and richer curriculum by crossing departmental boundaries, both in the selection of courses and in the pursuit of independent research. The program encourages exchange of information in the following research components: atomic and molecular theory, atomic and molecular processes, solid state theory and experiments, surface state physics, crystallography, nuclear magnetic resonance, statistical mechanics, biophysics, and mass spectroscopy. Course offerings in chemistry and in physics, including the special offerings in chemical physics (CHE 755 or PHY 755, Topics in Chemical Physics) are listed under the Department of Chemistry and the Department of Physics and Astronomy.

Chemistry

Graduate Faculty: Professors David A. Butterfield, Audrey Companion, Paul Corio, William Ehmann, Robert Guthrie, Robert Kiser, William Markesbery, Kurt Niedenzu, John Patterson, Donald Sands, Paul Sears, Walter Smith, Jr., William Wagner. Associate Professors: Carolyn Brock, Floyd Hollar, James O'Reilly, Merle Pattengill, William Plucknett, Stanford Smith, Laren Tolbert, Joseph Wilson, Steven Yates.

Associate Members: Assistant Professors Phillip E. Fanwick, James Kincaid, John Selegue.

Emeritus Professors: R. E. Black, E. V. Brown, E. M. Hammaker, J. R. Meadow, W. K. Plucknett and W. F. Wagner.

The Department of Chemistry offers the Master of Science and the Doctor of Philosophy degrees. Plan A or Plan B may be used to satisfy the requirements for the M.S. degree. Areas of specialization in Chemistry offered are analytical, biological, chemical physics, inorganic, organic, physical, and radio-nuclear. All candidates for the Ph.D. degree are required to serve as a teaching assistant for one semester.

A satisfactory reading knowledge of French, German or Russian is required for the M.S. and the Ph.D. degrees. Foreign language reading requirements may be satisfied by any of the means specified by

The Graduate School.

All new graduate students must take proficiency examinations in analytical, inorganic, organic, and physical chemistry. The results of these examinations are used as a guide in establishing the student's program of courses.

Civil Engineering

Graduate Faculty: Professors S. F. Adams, J. A. Deacon, J. A. Dearing, V. P. Drnevich, H. Gesund, B. O. Hardin, Y. H. Huang, J. W. Hutchinson, D. Kao, R. A. Lauderdale, S. T. Wang, D. J. Wood. Associate Professors E. G. Force (Adjunct), J. G. Rose. **Associate Members:** Associate Professors Robert Deen and M. Levent Kavvas. Assistant Professors George Blandford, Harry Sterling and Manouchehr Vaziri. **Emeritus Professor:** Samuel A. Morey

The Department of Civil Engineering offers the Master of Science in Civil Engineering (Plan A and Plan B available) Master of Civil Engineering (Plan B), and Ph.D. with specialization in the following areas:

Fluid mechanics and applied hydraulics
Geotechnical engineering
Structural engineering
Surveying and photogrammetry (M.S. only)
Transportation engineering
Water resources and environmental engineering

These areas utilize courses from other departments and such inter-departmental programs are encouraged. Engineering Mechanics, Mechanical Engineering, Chemical Engineering, Agricultural Engineering, Mining Engineering, Mathematics, Computer Science, Geology, Biology, and Chemistry are some of the departments whose offerings contribute to the programs in Civil Engineering.

In addition to satisfying general Graduate School and College of Engineering admissions requirements, (a GPA of 2.8/4.0 on all undergraduate work is normally required) applicants for admission to the M.S.C.E., M.C.E., and Ph.D. degree programs in Civil Engineering must have been awarded a Bachelor of Science degree from an engineering program accredited by the Accrediting Board for Engineering and Technology, ABET (formerly the Engineers' Council for Professional Development, ECPD).

This requirement may be waived for M.S.C.E. and Ph.D. applicants who have been awarded bachelors degrees other than engineering or from unaccredited engineering programs (including those offered by foreign institutions) if the applicant has received an acceptable score on the Advanced Engineering Test of the Graduate Record Examination.

Students with undergraduate majors not in engineering must also take a certain number of undergraduate remedial courses.

Neither the M.S.C.E. degree nor the Ph.D. degree in Civil Engineering will be conferred unless the candidate has successfully completed, during his undergraduate and/or graduate careers, at least one basic course in at least four of the following seven areas: civil engineering materials, fluid mechanics, geotechnical engineering, surveying, structural or solid mechanics, transportation engineering, and water quality engineering.

It is also required that all applicants for admission must have a combined score on

the verbal and quantitative portions of the Graduate Record Examination in excess of 1000.

The Department of Civil Engineering has many well equipped laboratories with active research programs in most areas. The research programs provide financial assistance for graduate students. In addition, financial assistance is also available through teaching assistantships and a limited number of traineeships, fellowships and scholarships.

Additional information about the graduate program in Civil Engineering can be obtained by writing the Director of Graduate Studies, Department of Civil Engineering.

Classical Languages and Literatures

Graduate Faculty: Professors Hubert Martin, Jr., Louis Swift, Lawrence Thompson. Associate Professors Jane Phillips, Robert Rabel

The Department offers the M.A. degree under both Plan A and Plan B. While there are no specific course prerequisites for admission, a strong undergraduate concentration in at least one classical language is recommended. The Department offers a limited number of teaching assistantships.

Each student will normally elect either Latin literature, Greek literature, or a combination of the two as an area of concentration. Individualized course programs, however, are arranged for students who are preparing themselves for secondary school teaching or who have an additional interest in a field other than the Classics. A comprehensive examination is required of all degree candidates; and, except under special circumstances, they are expected to demonstrate either a reading knowledge of a modern foreign language or a substitute skill approved by the Department. Most students complete their M.A. program in two years.

The University maintains an affiliation with the American School of Classical Studies at Athens and the American Academy in Rome, and meetings of the Kentucky Society of the Archaeological Institute of America are regularly held on the University of Kentucky campus.

LATIN LANGUAGE COURSES

500	Latin Lyric Poetry	(3)
501	Lucretius and Epicureanism	(3)
502	Roman Historical Writers	(3)
503	Cicero	(3)
504	Roman Satire	(3)
505	Virgil and the Roman Epic	(3)
506	Medieval Latin	(3)
507	Roman Drama	(3)
511, 512	Studies in Roman Philology	(3 ea.)
603	Studies in Latin Literature of the Republic	(3)
604	Studies in Latin Literature of the Empire	(3)

GREEK LANGUAGE COURSES

552	Greek Epic and Lyric Poetry	(3)
553	Greek Philosophical Literature	(3)
556	Greek Dramatic Literature	(3)
557	Greek Historical Literature	(3)
561, 562	Studies in Greek Philology	(3 ea.)
601	Studies in Greek Literature I	(3)
602	Studies in Greek Literature II	(3)

CLASSICS IN TRANSLATION

424G	Greek Literature in Translation	(3)
425G	The Heroic Ideal: Greek and Roman Epic	(3)
426G	Classical Drama: Tragedy and Comedy in Greece and Rome	(3)

CLASSICS IN GENERAL

480G	The Classical Tradition in Manuscript and Printed Book	(3)
509	Roman Law	(3)
530	The Teaching of Latin	(3)
580	Independent work in Classics	(3)
600	Bibliography of Classical Scholarship	(3)
768	Residence Credit for the Master's Degree	(1-12)
790	Research in the Teaching of Classical Languages	(3)

Clinical Nutrition

Graduate Faculty: Professor Paul Thornton.
Associate Member: Professor James Anderson.

The Master's Degree Program in Clinical Nutrition provides an opportunity for graduate study in the fundamentals of clinical nutrition. Plan B is offered. The curriculum is designed specifically to provide practical experience in nutrition in the treatment of illness and the maintenance of health and to deepen the student's foundation in the sciences fundamental to nutrition. It is intended primarily for those who wish to undertake careers in clinical nutrition in university hospitals, large community hospitals, and medical centers; for those who intend to teach in the field of clinical nutrition; and for those who plan careers as members of a research team in clinical nutrition and metabolism.

The program is interdisciplinary in nature. The faculty is drawn from the basic sciences as well as the clinical departments—medicine and surgery. The Uni-

versity Hospital and its related clinical facilities will be used for clinical instruction.

A minimum of 30 credit hours will be required to complete the degree. No language is required.

I. Required Courses

		Crs	Sem
CNU 601	Clinical Nutrition	4	I
CNU 602	Current Trends in Nutrition	1	II
CNU 701	Advanced Clinical Nutrition	2	I
CNU 702	Advanced Clinical Nutrition	2	II
CNU 780, 781, 782	Independent Study	1 ea.	I, II, S
Total		12	

II. Suggested courses to complete the 30-hours' credit. (In consultation with the program director or adviser the student will select certain of the courses listed.)

BCH 401	Fundamentals of Biochemistry	3	I
CNU 502	Principles of Human Physiology, same as PGY 810	5	II
ASC 534	Chemistry of Animal Products	4	
BSC 772	Topical Seminar in Medical Behavioral Science	1-3	II
Electives sufficient to complete 30 credits as required

701	Advanced Clinical Nutrition	(2)	
702	Advanced Clinical Nutrition	(2)	
780	Independent Study	(1)	
781	Independent Study	(1)	
782	Independent Study	(1)	

Clinical Pastoral Counseling

Students wishing to pursue graduate studies through the Department are referred to the Department of Educational Psychology and Counseling, College of Education. Completion of Masters level work in a counseling program is required of those seeking certification as a Fellow of the American Association of Pastoral Counselors. Students wishing further information are invited to consult the Department Chairman.

501	Perspectives in Religion and Health	(3)

Communication

Graduate Faculty: Professors Robert Bostrom, Lewis Donohew, Thomas Donohue, Ronald Farrar, Edmund Lambeth, Robert Murphy, Joseph Ripley, Ramona Rush. Associate Professors John Baseheart, Phillip Palmgreen, Leonard Tipton, Norman Van Tubergen.
Associate Members: Associate Professor Michael Kirkhorn. Assistant Professors James L. Applegate, J. D. Rayburn, Beverly Sypher and Howard Sypher.

Emeritus Professor: Bruce Westley.

Graduate faculty members in the College of Communications offer programs leading to the Master of Arts and the Doctor of Philosophy degrees. Emphasis is on the study of communication behavior and policy, including the study of the cognitive system and other components of an individual's communication system, interpersonal communication in small groups, and communication at the mass or social system level. The program is designed to serve the needs of students whose goals may include teaching and academic research, professional research, or professional work in the mass media. Students with no previous work in a communication area may be required to take undergraduate work without graduate credit.

Master of Arts

All students will be required to take 12 core hours consisting of Proseminar in Communication (COM 601), Communication Theory (COM 651), and Communication Research Methods (COM 665), plus Statistics 570 or its equivalent as determined by the Director of Graduate Studies. A total of 30 hours of graduate level course credit is required, plus a research submission or thesis. The research submission may follow one of four tracks:

1. Academic Research (Pre-Ph.D.)—Thesis
2. Professional Research—Thesis or research report
3. Professional management or message preparation—Thesis or position paper
4. Academic teaching below university level—Thesis or summary and evaluation of research on a given topic

Additionally, it is required that a minimum of 18 hours of the total 30 must be at the 600 level or above.

Students may elect, with approval of their adviser, to work under any one of the four tracks listed above. After completion of the core courses students have 18 elective hours. Of these, 15 may, with the approval of the adviser, be taken outside the College of Communications.

Near the end of their last semester, students will take an oral comprehensive examination covering the area represented by their thesis/research submission and the core area.

Doctor of Philosophy

The Ph.D. program educates behavioral scientists for university positions and positions in government, the media and private organizations as policy makers, consultants and researchers. Early in their programs students are expected to learn

the basic concepts and research methods used in the four core areas of communication: intrapersonal, interpersonal, social systems and perspectives, including legal and historical aspects.

Ph.D. candidates will take advanced courses in each of two of these areas and at least 12 hours of work in a cognate area outside the College of Communications. In addition, students will take a series of courses in quantitative and non-quantitative research. All Ph.D. students are required to demonstrate competence in a foreign language, usually French, German or Russian.

Each student works with a major professor and an advisory committee to plan the course work and complete the dissertation. The advisory committee determines the time at which the student may take the qualifying examination. When the student passes this examination he or she is formally admitted to candidacy. The major professor and the advisory committee supervise the preparation of the dissertation and eventually certify it for the final oral examination.

Courses in Communication which are available for graduate credit include:

COMMUNICATION

519	International and Intercultural Communication	(3)
525	Organizational Communication	(3)
550	Introduction to Communications Research	(3)
551	The Individual and the Communications Process	(3)
552	Studies in Interpersonal Communication	(3)
553	Mass Communication and Social Issues	(3)
554	Seminar in Communications	(2)
581	Communication Processes in Small Groups	(3)
582	Persuasion	(3)
601	Proseminar in Communication	(3)
605	Introduction to Information Science	(3)
607	Evaluating and Communicating Information	(3)
608	Mass Communications and Society	(3)
614	Information Storage and Retrieval Systems	(3)
615	Information Systems Design	(3)
650	Signs and Sign Behavior	(3)
651	Communications Theory	(3)
665	Communications Research Methods	(3)
700	Directed Reading in Communication	(1-3)
701	Seminar in Communication Perspectives	(3)
705	Seminar: Information Sciences	(3)
721	Seminar in Intrapersonal Communication	(3)
730	Seminar in Mass Media and Public Policy	(3)
731	Seminar in Interpersonal Communication	(3)
741	Seminar in Multi-Actional Communication	(3)
769	Residence Credit for Doctor's Degree	(1-12)
781	Directed Study in Communication	(1-6)
790	Research Problems in Communication	(1-6)

JOURNALISM

501	News Reporting	(3)
503	Copyreading and Editing	(3)

504	Telesystems	(3)
507	Feature Writing	(3)
509	Magazine Article Writing	(3)

785	Independent Study in Health Administration	(1-3)

Computer Science

Graduate Faculty: Professors Forbes Lewis, A.C.R. Newbery, Garth L. Olde, Henry Thacher Jr., Associate Professors Ronald Alter and Frank Brown.

The Department of Computer Science offers programs of study leading to the degrees of Master of Science (Plan A or Plan B) and Doctor of Philosophy. The prospective candidate for the Master's degree should note that in addition to the general requirements stated in the first pages of this Bulletin, admission to the Master's program is quite competitive. Knowledge of one foreign language in which there is a substantial computer literature is a requirement for the Master's degree.

The Doctorate in Computer Science is a research degree granted primarily on the presentation of a substantial research achievement. In order to be admitted to candidacy for the degree, in addition to satisfying the requirements of The Graduate School, students must present evidence of proficiency in two foreign languages and pass with distinction the departmental comprehensive examination. At the discretion of the department, they may also be required to present evidence of successful completion of a major programming achievement.

The areas of research which are actively pursued within the department include: Artificial Intelligence, Discrete Computational Mathematics, Numerical Methods, Programming and Operating Systems, and Theory of Computation. Courses in these and other areas are available to permit the student to pursue a course of study of sufficient breadth and depth to prepare him to perform independent research.

Crop Science

Graduate Faculty: Professors R. C. Buckner, L. P. Bush, G. M. Cheniae, Glenn B. Collins, Paul Cornelius, D. L. Davis, D. B. Egli, A. J. Hiatt, M. J. Kasperbauer, Dean Knavel, J. E. Leggett, C. G. Poneleit, N. L. Taylor, T. H. Taylor, D. M. Tekrony, B. A. Thielges, Associate Professors Jack Buxton, C. T. Dougherty.

Associate Members: Professors Morris Bitzer, J. H. Herron, Andrew Powell, Jr. (Extension), J. H. Smiley (Extension) Associate Professors H. R. Burton, William Witt. Assistant Professors Georgia Eizensa, Paul Lin, Charles Mackown, Mark Nielsen, Todd Pfeiffel, John Snyder and David Van Sanford.

Emeritus Professors: W. G. Duncan, E. N. Fergus, G. W. Schneider, G. T. Webster.

The Crop Science graduate program offers graduate work leading to the Master of Science, Master of Science in Agriculture, and the Doctor of Philosophy degrees with areas in plant breeding and genetics, crop ecology and management, turf management, crop physiology, seed technology and weed science. For the M.S. degree, 24 hours of course work plus an acceptable thesis are required (Plan A). Work leading to advanced degrees must conform to the general rules and regulations of The Graduate School. A reading knowledge of one foreign language is required for the Ph.D. degree.

Individual programs are developed to include a strong course work component and a meaningful research experience. A strong undergraduate background in the agricultural and biological sciences is required of all degree candidates.

Curriculum and Instruction

Graduate Faculty: Professors Ronald Atwood, Harry Barnard, George Denemark, Earl Rankin, Leland Smith, Associate Professors Virginia Atwood, Frank Bickel, Connie Bridge, Georgia Collins, Elfrieda Hiebert, Gerald Kulm, Ernest J. Middleton, Phil Nacke, J. T. Stevens, James Simpson, George Szekelye.

Associate Members: Associate Professors Jane Emanuel, Angene Wilson. Assistant Professors Gary Anglin, Jacques Benninga, Elizebeth Nelli and Peter Winograd.

Joint Appointments: Associate Professors Donald Hoffman and James Simpson.

Emeritus Professor: Lyman Ginger and James Moore.

The Department of Curriculum and Instruction offers a wide range of graduate programs leading to the Master of Arts in Education, Master of Science in Education (Plan A or Plan B available), Specialist in Education, and Doctor of Education degrees. These programs are designed to prepare specialists for a variety of roles in curriculum and instruction including teaching, supervising, and coordinating subject matter areas at the elementary, junior high, senior high, and junior college levels. The doctoral programs prepare leaders for public schools, universities and other educational agencies. Specialization is available in several graduate areas.

MASTER OF ARTS IN EDUCATION (EARLY CHILDHOOD EDUCATION)

This is a cooperative degree program offered through the Departments of Curriculum and Instruction and Family Studies. The Master of Arts in Education is offered through curriculum and instruction; the Master of Science in Family Studies through Home Economics. Admission to either program requires submission of a departmental application, in addition to the Graduate School application. The pro-

gram requires a minimum of 36 graduate hours, or 30 hours and a thesis. Course-work will be selected from the following areas. Consult the Director of Graduate Studies for specific course recommendations within this framework. This program qualifies teachers for a standard certificate if they have completed the appropriate undergraduate curriculum.

Course Requirements

Required Courses (EDC 621, 661, 662, and 713)

In addition to these required courses, a minimum of one course from each of the following areas is required: Area I, Area II, Area III and Area VII.

Area I. Human Development and Learning.
FAM 555, FAM 655, FAM 654, EDP 548, EDP

610, HPR 566, or NFS 591

Area II. Ethnic and Cultural Diversity.
EDC 550, EDC 650, FAM 604, SOC 526, SOC/EDF 532, EDF 665

Area III. Research.
FAM 790, EDP 656, EDP 557, EDG 663

Area IV. Curriculum Development.
EDC 713, EDC 662, FAM 507, EDP 522, EDS 510, EDC 732, EDC 621

Area V. Administration of Early Childhood Program.
FAM 552, FAM 605

Area VI. Humanistic Education.
PSY 539, EDC 661, COM 581

Area VII. Family.
FAM 554, FAM 652, FAM 653, FAM 573, FAM 510

Area VIII. Professional Development.
SW 505, FAM 606, EDC 724

Other course requirements including 12 semester hours outside of education (for M.A. candidates) or 18 hours in FAM (for M.S. candidates) are met through courses chosen with the adviser's approval.

MASTER OF ARTS IN EDUCATION (ELEMENTARY EDUCATION OPTION)

For a Master of Arts in Education, a minimum of 12 semester hours of graduate work shall be selected from at least three of the following areas of professional education. Consult the Director of Graduate Studies for specific recommendations within this broad framework. The program qualifies teachers for a Standard Certificate if they have completed the appropriate undergraduate curriculum.

Area I. Research Methodology
EDP 522, EDP 656, and EDP 657.

Area II. The Psychology of Learning
EDP 548, EDP 610, EDP 611, and EDP 658.

Area III. Foundations in Education
EDF 640, EDF 645, EDF 650, EDF 651, EDF 652, EDF 655, EDF 661 and EDF 665.

Area IV. A seminar in Instruction Devoted to the Method and Materials of Teaching. A general or specific course in methods and materials may be taken to meet this requirement.

Area V. A General Study of Curriculum Development.
EDC 712, and EDC 732.

Area VI. Advanced Study in Human Growth and Development.
EDP 600, EDP 601, and EDP 759.

Area VII. Advanced Study in Reading (required unless waived on basis of previous advanced study in reading)
EDC 540, EDC 619, EDC 620, EDC 641, and EDC 642.

Other course requirements, including 12 semester hours outside of education, are met through courses chosen with the adviser's approval.

MASTER OF ARTS IN EDUCATION (SECONDARY EDUCATION OPTION)

For a Master of Arts in Education, a minimum of 12 semester hours of graduate work shall be selected from at least three of the following areas of professional education. Consult the Director of Graduate Studies for specific recommendations within the broad framework. The program qualifies teachers for a Standard Certificate if they have completed the four-year undergraduate curriculum.

Area I. Research and Methodology
EDP 522, EDP 656, and EDP 657.

Area II. The Psychology of Learning
EDP 548, EDP 610, EDP 611, and EDP 658.

Area III. Foundations in Education
EDF 640, EDF 645, EDF 650 EDF 651, EDF 652, EDF 655, EDF 661 and EDF 665.

Area IV. A Seminar in Instruction Devoted to Methods and Materials of Teaching
A general or specific methods and materials course may be taken to meet this requirement.

Area V. A General Study of Curriculum Development
EDC 714, EDC 717, EDC 732, and EDC 735.

Area VI. Advanced Study in Human Growth and Development
EDP 600, EDP 601, and EDP 759.

Area VII. Advanced Study in Reading
EDC 540, EDC 643, EDC, 646, EDC 619, and EDC 620.

Other course work, including 12 semester hours outside of education, is chosen with the adviser's approval.

MASTER OF SCIENCE IN EDUCATION (SECONDARY EDUCATION OPTION)

The general requirements for the Master of Science in Education, secondary education area, are the same as those for the Master of Arts in Education. However, the Master of Science in Education may be granted only to those students whose work outside the College of Education includes at least 12 semester hours in mathematics and/or science.

MASTER OF SCIENCE IN EDUCATION (CLINICAL AND COLLEGE TEACHING OPTION)

The clinical and college teaching area is a 36-semester hour program designed for individuals who are not seeking certification but wish to develop their instructional knowledge and curricular development skills in order to maximize the acquisition of knowledge and competencies of students outside K-12 school settings. Persons choosing this area are frequently preparing for instructional responsibilities in health-related clinical situations or junior colleges.

Nine of the 18 hours required in education must be taken in the Department of Curriculum and Instruction. At least 12 hours must be taken outside the College of Education. Specific programs are planned with the approval of the Director of Graduate Studies.

MASTER OF ARTS IN EDUCATION (READING)

Requirements for a Master of Arts in Education with Reading as an area of concentration must meet the specifications for a Master of Arts in Education, Plan B. The requirements must also be in conformity with the general requirements for the Master of Arts in Education (Elementary) or the Master of Arts in Education (Secondary).

The curriculum shall include a minimum of 33 semester hours preparation according to the following distribution:

- A minimum of 18 semester hours credit in graduate level reading courses to include EDC 619, EDC 620, EDC 642, EDC 641 or 643. An additional 6 hours to be selected with the approval of an adviser.
- Six to nine semester hours credit in the College of Education, selected to extend

the humanistic, behavioral, multicultural and research components of the program, based on the student's educational background, with adviser approval.

- c. Six to nine semester hours credit selected from appropriate support areas outside the College of Education, with adviser approval.

Completion of the Master of Arts in Education with Reading as an area of concentration will fulfill the academic requirements for certification as a reading specialist. A minimum of three years of successful classroom teaching is an additional requirement for this certification.

Dentistry

Graduate Faculty: Professors Emmett Costich, Raymond Kopczyk, Jan Kraal, Harold Laswell, James Matheny, Gerald Roth, Stanley Saxe. Associate Professor Orhan Tuncay.

Associate Members: Professor Patrick Sammon. Associate Professors Herbert Abrams, Jeffrey Okeson. Assistant Professors Samuel Jasper, Jr., Richard Mitchell and J. F. Camilla Tulloch.

The program leading to the Master of Science in Dentistry degree is designed to provide the graduate dentist with clinical proficiency in a specialty area, research experience in a basic biological discipline, and exposure to the fundamentals of teaching in the field of dentistry. At the present time, students pursuing specialty training in the areas of orthodontics and periodontics are eligible for the Master of Science in Dentistry degree.

Only dental graduates of high academic standing will be accepted into this program, which requires two years of clinical training, integrated with additional basic science and research experience. The first year is largely devoted to basic scientific topics, clinical training, and theory. The

second and later years will be a continuation of clinical training, with a high proportion of time devoted to basic science studies, research, and dental teaching techniques.

The program is interdisciplinary in scope and is taught by systems rather than the classic strict subject approach. The participating faculty is from all the clinical departments of the College of Dentistry, from the Medical Center departments of anatomy, pediatrics, psychiatry and behavioral science, and from the University Hospital.

Specific requirements for the Master of Science in Dentistry degree are: (1) satisfactory completion of the clinical certificate program; (2) 30 hours graduate credit, at least half of which must be basic science (non-clinical) courses; (3) submission of an acceptable thesis based on an individual research project (Plan A) and (4) passage of a comprehensive oral examination and thesis defense. Foreign language credit is not required.

Diplomacy and International Commerce

Director of the Patterson School: Vincent Davis
Emeritus Professor: Amry Vandenbosch.

The Patterson School of Diplomacy and International Commerce offers an interdisciplinary master's degree and serves in an advisory capacity with respect to the Ph.D. programs in international studies within the four departments primarily related to the Patterson School. The primary departments are Business Administration, Economics, History and Political Science.

The M.A. degree program can be tailored with considerable flexibility to meet the career needs of any particular student. Plan A and Plan B are available. This program is especially useful for the student desiring a career in any of the non-academic fields in foreign affairs, such as international banking, international business, international journalism (foreign correspondent), or service with governmental agencies (such as the U.S. Department of State) or international organizations (such as the United Nations) in foreign affairs.

At least half of the 30 minimum hours for the M.A. degree must ordinarily be in one of the four primary departments. Each student is expected, in the absence of special circumstances, to take a methodology course in the major field of concentration (such as Business Administration 636, Economics 660 or 661 or 662, History 606, or Political Science 671, depending in part on past training). Most students can expect to complete the 30 minimum hours for the M.A. degree in one full school year (12 hours in each of two semesters) plus a summer session, or plus the following (third) semester if more than the 30 minimum hours are desired.

To assure the interdisciplinary character of the degree, the M.A. candidate is expected to take 12 to 15 hours distributed in at least two departments outside the major departmental concentration. Courses acceptable to the program include those dealing with interstate and cultural relations, foreign policy, and national and regional development processes. Enough flexibility is allowed so that a student may concentrate the work in a specific geographical area such as Latin America, Asia, Europe, etc., or prepare more broadly in certain topical or functional aspects of international affairs.

The student must pass a written examination covering work in three subfields of

study, with these subfields to be defined for any particular student and in consultation with the student by the Patterson School Director of Graduate Studies.

The Patterson School M.A. candidate must meet the basic Graduate School requirement for a reading knowledge of a modern foreign language, except that the candidate may request that the Director of the Patterson School, in consultation with other appropriate faculty members, allow the substitution of another research skill (such as statistics, other methodologies or relevant techniques) in lieu of the language requirement, with adequate competence to be determined by procedures established by the Director.

Students planning to continue their studies beyond the M.A. may apply for admission to one of the appropriate Ph.D. programs at the University of Kentucky (or elsewhere). If at the University of Kentucky, the most likely departmental doctoral programs include those in Political Science, History, International Economics and Economic Development, and International Business and Commerce. These doctoral programs are fully described under the appropriate headings elsewhere in this Bulletin. However, since the doctoral programs have their own varying requirements, it is to be expected that in many cases the Patterson School's interdisciplinary M.A. will require that the student take longer to complete the course work for the Ph.D. than if enrollment had been directly in one of the departmental doctoral programs upon entering Graduate School. The additional work required is likely to be heaviest with respect to business administration, where the first year of graduate study is largely prescribed, and in economics, where certain methodology and service courses need to be completed in the program. In all instances the extra time required will also depend on the nature of a student's undergraduate preparation.

A number of non-service Patterson School Fellowships are available from the income from the bequest of James K. Patterson, the first President of the University.

Application forms for admission and for fellowship assistance should be requested from the Dean of The Graduate School and returned to the Dean of The Graduate School.

It is useful if advance carbon copies or photocopies of all such application materials can be sent directly to the Director of the Patterson School (Patterson Office Tower, University of Kentucky). The Director of the Patterson School strongly en-

courages all applicants to take the Graduate Record Examination (Verbal and Quantitative, plus the Advanced Examination in the major undergraduate field) in time for the GRE scores to be submitted as part of the application procedures. In addition, each applicant is required to submit a brief statement (two or three pages, at most) explaining the special interest in the Patterson School program in terms of career goals. Each applicant is also requested to have three academic letters of reference and three letters of character or employment reference to be mailed directly to the Director of the Patterson School.

Economics

Graduate Faculty: Professor M. M. Ali, Virgil Christian, Merlin Hackbart, Curtis Harvey, Charles Hultman, Joseph Krislov, G. S. Laumas, James Marsden, Randolph McGee, Hirofumi Shibata, Don Soule, William Stober, Robert Stroup. Associate Professors Glen Blomquist, James Fackler, Richard Gift, John Madden, David Ross, Robert Welch.

Associate Members: Assistant Professors Mark Berger, Stephen Clark, Ali Darrat, W. Douglas McMillin, Pamela Nickless, Frank Scott, J. L. Silver, Michael Webb.

Emeritus Professors: Cecil Carpenter, H. W. Hargreaves, James W. Martin.

MASTER OF SCIENCE

Objectives

The M.S. in economics is primarily for students who wish to have flexibility in a program of advanced study in economics. This degree program provides minimal preparation for employment as an undergraduate teacher of economics and as a researcher for government, business, and other organizations. The program can be structured to prepare a student for further graduate work in economics, but it is also highly suitable for students with strong interdisciplinary interests. The program can be structured to prepare a student for further graduate work in economics and related fields. Plan B is offered.

Requirements

Recommended minimal undergraduate preparation: six hours of intermediate theory, six hours of statistics, and six hours of calculus. These can be taken in the program as additional work.

Requirements for the M.S. in economics are:

1. A minimum of 30 hours of graduate credit courses.
 - a. Fifteen hours must be in courses in the Department of Economics, and 12 of these hours must be in courses reserved exclusively for graduate students.
 - b. At least 15 hours of the total of 30 must be in courses reserved exclusively for graduate students.
 - c. The 30 hours must include ECO 660 or 760 and ECO 661, Economics Theory.
2. Success in a final examination.
3. Minimal average of grade B in all courses attempted for graduate credit after being admitted to Graduate School. Students obtaining six quality points below a B average will be dropped by the Department.

MASTER OF ARTS

Objectives

The Master of Arts (M.A.) in economics is the first stage of the Ph.D. program. The M.A. in economics provides preparation for employment in colleges, and in government, business and other organizations. The program is designed to provide advanced study in:

1. Economic theory.
 2. Quantitative techniques and research skills, and
 3. A specialization within economics.
- Recommended minimal undergraduate preparation—six hours of intermediate level economic theory and six hours of differential and integral calculus.

Requirements

1. A minimum of 30 hours of graduate credit courses, including:

ECO 760 Neoclassical Microeconomic Theory
ECO 762 General Equilibrium Analysis and Welfare Economics
ECO 761 Advanced Macroeconomic Theory
ECO 763 Seminar in Macroeconomic Theory
STA 424 Probability and Distribution Theory
ECO 592 Introduction to Quantitative Economics II
ECO 692 Econometric Methods

Two courses in an elective area of the Ph.D. Program
2. Successful examination in one modern foreign language.
3. Minimal average of Grade B in all courses attempted for graduate credit after being admitted to Graduate School. Students obtaining six quality points below a B average will be dropped by the Department.
4. Success in a final examination.

THE PH.D. DEGREE

Objectives

The Ph.D. program is designed to enable the graduate to contribute to the advancement of economics. The program is also aimed at producing graduates who are qualified to teach, as well as engage in industrial and governmental research and consulting.

To attain these objectives, the program is designed to provide the student with the appropriate knowledge, understanding, skills and abilities, including:

1. An understanding of economic theory.
2. Skill in the use of quantitative techniques, specifically mathematics and statistics.
3. Specialization in a limited number of areas.
4. A knowledge of the broad social and political background of the economic environment.
5. Experience in the development of research projects throughout their entire program.
6. Research and writing skills that would lead to the publication of original research.
7. Competence in communicating economic knowledge to broad and diverse audiences. Recommended minimal undergraduate preparation: six hours of intermediate economic theory, six hours of statistics, and six hours of calculus.

Requirements

Work for the degree of Doctor of Philosophy in economics must conform to the general requirements of The Graduate School. The requirements for the degree are:

1. Economic Theory. The student must demonstrate competence in economic theory as demonstrated by passing a departmental written examination in economic theory. This examination will be given twice a year, at the beginning of the fall and spring semesters. Students failing the examination will be given a second attempt; those failing on the second attempt will be dropped from the program.

Minimal preparation for the written examination in economic theory can be achieved by taking the following core courses:

ECO 760 Neoclassical Microeconomic Theory
ECO 762 General Equilibrium Analysis and Welfare Economics
ECO 761 Advanced Macroeconomic Theory
ECO 763 Seminar in Macroeconomic Theory

Performance in these courses may be taken

into account in evaluating the written examination in economic theory in that exceptional performance in the course may compensate for marginal performance in the examination.

2. Statistics/Econometrics. The student must demonstrate competence in the area of statistics and econometrics. This competence may be demonstrated by satisfactory performance in the following courses:

STA 424 Probability and Distribution Theory
ECO 592 Introduction to Quantitative Economics II
ECO 692 Econometric Methods

or by passing a special examination.
3. Elective Areas. All Ph.D. students must choose two fields of study approved by the student's Advisory Committee. These fields include, but are not limited to, the following: economic theory, econometrics, international economics, public finance, monetary economics, labor economics, economic development, urban and regional economics, economic history, and comparative economic systems. What constitutes minimum course preparation in each field shall be determined by the student's Advisory Committee.
4. Supporting Work. At least 15 hours of supporting course work must be selected. These courses must be approved by the student's Advisory Committee. This supporting work will provide an opportunity for mastery of the foundations of economics, and will ordinarily include ECO 662—Research Methods and Procedures in Economics and ECO 665—History of Economic Thought I.
5. Foreign Language. The candidate must satisfy The Graduate School language requirement for one modern foreign language.
6. Grades. Minimal average of Grade B in all courses attempted for graduate credit after being admitted to Graduate School. Students obtaining six quality points below a B average will automatically be dropped by the Department.
7. Qualifying Examinations.
 - a. Written examinations: Written examinations must be taken in the student's field, as part of the requirements for candidacy for the Ph.D. degree. These examinations are given twice a year, at the beginning of the fall and spring semesters, and are scheduled by the student's Advisory Committee. The written examinations will be prepared and graded by faculty members who are specialists in the fields.
 - b. Oral Examination: After passing the written qualifying examinations, the student will be given an oral examination by the Advisory Committee. This oral examination will be concerned with the student's competence in the fields.

8. Dissertation Proposal. In the semester after the candidate passes the qualifying examinations, ECO 797 must be taken for 3 credit hours. This course will be directed by the chairman of the Advisory Committee and will consist of independent study and reading in one of the candidate's fields. As part of the requirements for this course, the student will write a dissertation proposal and present it at a faculty seminar.
9. Internship. The Department will require of all candidates an internship. This internship will usually consist of teaching (3-6 semester hours), though upon approval of the Director of Graduate Studies, the student may select some other activity appropriate to his professional expectations.
10. The Ph.D. Dissertation. The dissertation will be based on original research on a significant topic. The dissertation will be defended in an oral examination.

Education and Counseling Psychology

Graduate Faculty: Professors James Barclay, Henry Cole, Gordon Liddle, Emanuel Mason, Earl Rankin, Harriet Rose, Timothy Smith, William Stilwell, Judith Worell. Associate Professors Dwight Auvenshine, Ralph Crystal, Fred Danner, Stephen DeMers, Thomas Guskey, Edward Kifer, Pamela Remer and Rory Remer.

Associate Members: Associate Professor Raymond Wilkie. Assistant Professors Warren Lacefield and Barbara Witten.

The Department of Educational and Counseling Psychology offers programs leading to the following degrees: Master of Arts in Education, Master of Science in Education (Plans A and B available), the Specialist in Education (Ed.S.), the Doctor of Education (Ed.D.), and the Doctor of Philosophy (Ph.D.). Students must apply to both The Graduate School and to the Department. Doctoral applications must be completed by 1 February for summer/fall beginning. All other degree applications are considered shortly after 1 March.

Within the degree programs there are a number of specializations possible (e.g., counseling psychology, educational psychology and school psychology). Specializations are designed to provide students with both a background in behavioral and humanistic components of human learning and behavior, and competencies to practice the skills designated for these programs. Admission to candidacy in any of

these programs not only includes demonstrated skills in the academic area, but a judgment by the faculty of the area program that the candidate demonstrates the personal and social characteristics as well as the professional commitment and ethical standards requisite for providing the skills associated with the program and the advanced degree.

For further information on specific program guidelines, contact the Director of Graduate Studies in the Department of Educational and Counseling Psychology.

MASTER OF ARTS IN EDUCATION DEGREE (GUIDANCE AND COUNSELING)

Two areas of concentration are open to candidates interested in this degree program. They are: concentration in elementary guidance and counseling, and concentration in secondary guidance and counseling. The programs in elementary and secondary guidance and counseling are designed to prepare individuals with a teaching certificate for guidance and counseling functions in public schools.

Ordinarily, applicants for these programs will have a regular teaching certificate at the elementary or secondary level, and one year of teaching experience. Applicants lacking these qualifications who wish to obtain the degree and be certified for school work must complete the teacher education program, earn appropriate certification, and complete one year of teaching at the appropriate school level. The curriculum for these programs matches the State guidelines in the areas of elementary and secondary counseling. These programs provide learning experiences in each of the required competency areas. The program prerequisites include psychological tests and abnormal psychology. The programs vary from 36 to 39 graduate hours.

MASTER OF ARTS IN EDUCATION DEGREE (SCHOOL PSYCHOMETRIST AND SCHOOL PSYCHOLOGIST)

This program is designed to prepare individuals to meet the State Certification programs in school psychology. The program consists of course work and clinical experience in school settings designed to meet the full preparation for school psychology. The Department offers a program in school psychometry only as an entry program, not terminal preparation for working as a school psychologist. The full program of study toward certification as a

school psychologist requires study considerably beyond the traditional master's degree. The exact length of the program is determined, at least partially, by comparing the certification requirements and the student's background.

Upon entering the program students are expected to have the equivalent of an undergraduate major in psychology or education that includes, minimally, courses in personality, abnormal psychology, and tests and measurements. Where deficiencies exist in undergraduate or previous graduate preparation, appropriate course work must be taken early in the graduate program in addition to the courses and requirements of the program. Beyond the psychology background, a teaching certificate and/or teaching experience is desirable, but not necessary.

The school psychology program focuses on the school psychologist as a general learning consultant for the schools. This program is designed to prepare school psychologists who are knowledgeable in the assessment and programming needs of children with legally defined handicapping conditions, those with learning and adjustment difficulties, exceptional non-handicapped children such as the gifted and talented, children from culturally or ethnically different backgrounds, and the needs and normal developmental difficulties of more typical children.

The program is designed to develop specific competencies in school psychologists such as consultation with teachers, administrators, and other school personnel in classroom management, curriculum, and teaching strategies; assessment skills in group, individual, psychometric and behavioral methods; evaluation and research skills in aiding in policy making and the implementation of state and federal as well as local studies; and, implementation skills in terms of strategy selection for work with children, teachers, parents, other guidance and special education personnel, and administrators.

The school psychology program incorporates the Masters of Science or Arts in Education degree as part of this preparation. The student's post-masters work may lead to receipt of the Educational Specialist degree or in selected cases may become part of the Ed.D. or Ph.D. degree program.

MASTER OF SCIENCE IN EDUCATION DEGREE

The Master of Science in Education degree is offered by the Department for indi-

viduals who are not seeking a State certificate in counseling, psychometry or school psychology, but wish to complete a professional sequence of courses leading to specific skills in educational psychology and/or counseling. Individuals who are interested in specializing in educational psychology, human development, measurement, research in education or non-public school counseling may obtain this degree. The educational psychology program is flexible and tailored to individual needs. It is planned in consultation with an adviser. It consists of 30 hours of graduate work plus a thesis, or 36 hours of graduate work without a thesis. The counseling program prerequisites include psychological tests and abnormal psychology. There is also a 60-hour program including the Master of Science in Education degree program plus a full-time one-semester internship and additional course work. This program leads to permission to sit for the State Certification Examination in Counseling Psychology.

DOCTOR OF EDUCATION DEGREE

The Doctor of Education degree is offered in the area of educational and counseling psychology. Programs in this department follow the general guidelines of the College of Education program as specified earlier. (See Graduate School section of Bulletin)

DOCTOR OF PHILOSOPHY DEGREE

The Ph.D. program is offered in the specialty areas of Counseling Psychology, Educational, Psychology and School Psychology under one Departmental program. A full time supervised one-year internship is required for all areas.

There are various concentrations possible within the Ph.D. program. Representative of these are: (1) learning, cognition, and curriculum design; (2) human development and social processes; (3) counseling psychology; (4) measurement, evaluation and research design; and (5) school psychology.

Electrical Engineering

Graduate Faculty: Professors Eugene Bradley, Prasad Kadaba, Benjamin J. Leon, Syed Nasar, Clayton Paul, Earl Steele. Associate Professors Pramode Bhagat, Frank M. Brown, Raymond Distler, J. Robert Heath,

Lee Todd, and Hsi-Han Yeh.

Associate Members: Associate Professor Jimmie Cathey, Assistant Professors K. A. Arunkumar, Stephen A. Dyer and Sundaram Natarajan.

The Department of Electrical Engineering offers programs leading to the Master of Science in Electrical Engineering and Ph.D. The Department normally requires a minimum grade point average of 2.8/4.0 on all undergraduate work for admission to its graduate program. Areas of current research interest include: electric machines, control theory, computer engineering, digital signal processing, circuit theory, solid state electronics, cathodochromic displays, quantum electronics, communications systems, and electromagnetic compatibility. Both Plan A and B are offered.

The laboratories are well-equipped for research in the above areas under the direction of the electrical engineering faculty. For further information on financial aid and other details, write to the Department Chairman.

Engineering Mechanics

Graduate Faculty: Professors Millard F. Beatty, Louis Brock, Oscar W. Dillon, Jr., Stanley Jones, Donald C. Leigh, Frank J. Rizzo, David J. Shippy, Theodore R. Tauchert.

Associate Member: Assistant Professor Wei Yang Lu.

The Department of Engineering Mechanics provides programs for study and research leading to the Master of Science in Engineering Mechanics and the Doctor of Philosophy. To be admitted to the master's degree program, a student normally must have at least an overall grade-point average of 3.0 and Graduate Record Examination scores of 700 (Quantitative) and 500 (Analytical).

The master's degree requires 24 credit hours of course work and a thesis (Plan A), or in some circumstances with departmental approval, 30 hours of course work and a research paper instead of a thesis (Plan B). In addition to the general information on the Ph.D. degree at the front of this Bulletin, note that the Department requires a reading knowledge of one foreign language.

Most engineering disciplines exist to serve society directly. Such disciplines are

recognized by and often named for the products associated with them, e.g., aircraft structures, metals, ceramics, etc. Engineering Mechanics, on the other hand, exists to serve all of these disciplines by concerning itself with the fundamental laws, mathematical apparatus, and basic experimental methods common to all those phases of engineering which are based on mechanics. Students enter the graduate program in Engineering Mechanics from all branches of engineering and also from mathematics and physics.

Areas of concentration for study are (1) continuum mechanics, (2) materials sciences, (3) dynamical analysis, (4) computational stress analysis, (5) mechanical design analysis, (6) mechanical behavior of solids and fluids, (7) experimental methods in solid mechanics and (8) computer-aided mechanical design-by-analysis. Typical areas in which research has been carried out in the Department include infinitesimal and finite elasticity, viscoelasticity, plasticity, non-newtonian fluids, rigid and flexible body dynamics, particle dynamics, wave propagation, stability analysis, and composite materials. Investigations in these areas have included theoretical, experimental and numerical methods.

For further information contact the Director of Graduate Studies.

English

Graduate Faculty: Professors Joseph Bryant, John Cawelti, John L. Clubbe, Guy Davenport, James Baker Hall, Joan Hartwig, Robert Hemenway, Kevin Kiernan, Stephen Manning, Jerome Meckier, Donald

Ringe, John Shawcross. Associate Professors R. Gerald Alvey, Thomas Blues, William Campbell, Lee Eliseoff, Walter Foreman, Joseph Gardner, William Gordon, John L. Greenway, Armando Prats, Charles Rowell, Larry Swingle, and Arthur Wrobel.

Associate Members: Associate Professor David Durant. Assistant Professor Steven Weisenburger.

Emeritus Professors: George Brady, Arthur Cooke, John Cutler, Thomas Stroup and William Ward.

The Department of English offers programs leading to the M.A. and to the Ph.D. degrees. The master's degree may be obtained either by Plan A or Plan B, as defined in this bulletin. With the consent of the Dean of The Graduate School and the Director of Graduate Studies in English, students may undertake a program leading to the master's degree provided that they have

(1) completed the equivalent of a University of Kentucky undergraduate major in English and,

(2) fulfilled the admission requirements of the Graduate School. Applicants who fail to meet the first qualification may be admitted with the understanding that their program must include some advanced undergraduate work in English in addition to the courses normally required for the M.A. A reading knowledge of one foreign language is required for the master's degree.

Students will be evaluated on their merits before they are officially admitted to the doctoral program by the English graduate faculty. Students who received their master's degree from the University of Kentucky will be judged on their course grades, on the recommendations of their instructors, and their Graduate Record Examination scores on both the Aptitude and Advanced Literature tests. Students who have received their master's degree elsewhere will be evaluated on their course grades after the equivalent of one semester's full time graduate work at the University of Kentucky, instructor's recommendations, and GRE scores on both the Aptitude and Advanced Literature tests.

There is no specific requirement in a minor area, but such work may be required by a student's Advisory Committee if it appears to be essential to the major research or concentration interest. Ph.D. candidates normally offer German and French for their language requirement, but substitutions may be authorized according to the procedure described in this Bulletin.

A detailed statement of departmental requirements for both the M.A. and Ph.D. is available on request.

Entomology

Graduate Faculty: Professors Douglas Dahlman, Wyman Dorough, Paul Freytag, Fred Knapp, Gerald Nordin, Bobby Pass, and Juan Rodriguez. Associate Professors Grayson Brown and Kenneth Yeargan.

Associate Members: Extension Professor Harley Raney, Associate Extension Professor C. M. Christensen. Assistant Professor Daniel A. Potter.

Emeritus Professor: Richard Thurston.

The Department of Entomology offers graduate work leading to the Master of Science, Master of Science in Agriculture, and the Doctor of Philosophy degrees. Individual graduate programs are planned by the student in consultation with his adviser and the Director of Graduate Studies.

Study and research are available in various areas of entomology including applied entomology, behavior, biological control, host plant resistance, insect biology and ecology, insect nutrition, pathology, immature insects, medical and veterinary entomology, physiology, taxonomy, toxicology, and acarology. Plan A is offered for the Master's degree. A reading knowledge of one modern foreign language is required for the Ph.D. degree.

Family Studies

Graduate Faculty: Professors John Crosby, O'Neal Weeks. Associate Professors Lisa Barclay, David Payne.

Associate Members: Assistant Professors Jacques Benninga, Mary Edmondson, Raymond Forgue, Karen Perch and B. Kay Pasley.

The Department of Family Studies offers the Master of Science in Family Studies. There are four areas of concentration: Early Childhood Education; Individual Development within the Family; Family Development, and Family Economics and Management.

The Master of Science in Family Studies requires 36 credit hours. At least two-thirds of the minimum requirements must be in regular courses, and at least half of the minimum requirements must be in courses numbered on the 600 or 700 level. A minimum of 18 hours must be within the department. Plan A requires 36 hours, six of which are thesis credit hours; Plan B requires 36 class hours. Plan A is encouraged for students who may wish to emphasize theory and research and/or who plan to enter another advanced degree program. Electives within each area of concentration

are available in the social sciences and in other supporting disciplines.

Forestry

Graduate Faculty: Professor Bart Thielges. Associate Professors George Coltharp, Calvin Liu, Robert Muller and Louis Shair.

Associate Members: Associate Extension Professor Donald Graves; Assistant Professors Joseph Chang, William McComb, James Olson.

The Department offers graduate work leading to the Master of Science in Forestry and Master of Science in Agriculture (Forestry area of specialization). Degrees are awarded under Plan A only, which requires a minimum of 24 semester hours of graduate course work plus an acceptable thesis. The prospective student must have an undergraduate degree in forestry or be prepared to take a core of forestry courses in addition to a full masters program.

The study and research program may be directed in any one of the following areas: wood science, forest soils, forest hydrology and water quality, forest ecology, tree physiology, forest wildlife, forest biometrics, forest economics, silviculture, recreation, and surface mine reclamation.

Students interested in pursuing further graduate studies (PhD) in the forestry area may enter one of several interdepartmental programs such as Plant Physiology, Crop Science, and Soil Science and Agricultural Economics.

Additional information concerning the graduate program in forestry may be obtained by contacting the Director of Graduate Studies.

French Language and Literature

Graduate Faculty: Professors Jean Charron, Phillip Duncan, Raymond La Charite, Virginia La Charite, and Rupert Pickens. Associate Professor John Rea.

Associate Members: Assistant Professors Germaine Baril and Van Oene.

Emeritus Professor: Clark L. Keating and Theodore H. Mueller.

The Department of French Language and Literature offers a graduate program leading to the M.A. degree in French language and literature. The department of-

fers the M.A. degree according to Plan B only. The student selects a program from a variety of courses listed below in French literature, language, civilization, cinema and literature and the arts. He is then examined over his program and an appropriate reading list specified by the Department. The Master's Examination for each candidate is prepared and evaluated by a committee of three members of the French graduate faculty which will consider the candidate's course program and the M.A. reading list in preparing the examination.

Candidates must also demonstrate a reading knowledge of another foreign language. The M.A. examination will be given every March and July. Application for the examination should be made to the Director of Graduate Studies no later than 14 days prior to the date of examination.

For further information concerning the M.A. program in French, consult the Director of Graduate Studies.

All courses listed below are offered on a rotating basis and not less frequently than every eighth semester.

423G	French Literature in Translation: 20th Century	(3)
436G	A Survey of French Literature of the Middle Ages and Renaissance	(3)
438G	A Survey of French Literature of the 17th and 18th Centuries	(3)

Geography

Graduate Faculty: Professors Stanley Brunn, P. P. Karan, Thomas Leinbach, Karl Raiz, Gary Shannon, William Withington. Associate Professors W. A. Bladen, Richard Ulack.

Associate Members: Assistant Professor Robert Cromley.

Emeritus Professors: Thomas Field and Joseph Schwendeman.

The Department of Geography offers both M.A. (Plan A and Plan B) and Ph.D. programs. The professional training in doctoral and master's programs provides research-oriented and applied analytical skills relevant to present and anticipated future needs for geographers. The research training and skills of individual graduate students are developed in research seminars and course work in several areas including:

Cultural Geography of the United States—Urban and rural settlement patterns and processes, past and present; distribution and interaction of ethnic groups.

Geographic Analysis—Computer modeling, computer cartography, locational analysis, diffusion simulation, geographic information systems, normative models.

Geography of the Third World—Problems of development in Africa, Latin America, South Asia, and especially Southeast Asia. Topics include population, urbanization, industrial development, transportation, political-social issues, and economic growth.

Industrial Geography—Location theory, nonmetropolitan industrialization, industrial development, spatial analysis of manufacturing systems.

Medical Geography—Health care delivery; space, time, and illness behavior; epidemiology; disease ecology.

Political Geography—Viability of political units, political development, economic interdependence, electoral geography, governmental policy, organization of space.

Population Geography—Dynamics of population growth and change; internal migration.

Regional Development—Economic, social, and political problems within developed countries, especially Appalachia and the southeastern United States.

Social Geography—Ethnic and minority groups, aging, welfare issues, social impact assessment, environmental perception, technological hazards.

Transportation Geography—Influence of transport systems on human activity, route locations, network flows, regulation impact, commuting behavior.

Urban Geography—Basic principles and theories of urban systems, social geography of the city, geographies of growth.

The faculty includes members who have a major regional research interest, including extensive field experience, in the following areas: Latin America, Southeast and South Asia, including adjacent Himalayan or highland Asia; and North America, including the Southeast and Appalachia.

Applicants for the Ph.D. in geography must conform to the general requirements of The Graduate School as set forth in the first part of this Bulletin. Course work required in the Ph.D. program consists of (1) core courses (GEO 700, 702, 707) in the theory and methodology of geography; (2) seminars, independent study and directed research in one of the research focuses noted above or in cognate disciplines; (3) successful examination in one modern foreign language; and (4) a dissertation based on original research. A program designed to meet the professional academic goals of each doctoral candidate is outlined in consultation with the Director of Graduate Studies and the candidate's Advisory Committee.

Applicants for the M.A. degree in geography follow a broadly based program which consists of: 1) required courses (GEO 500, 702, and 710); 2) elective courses in geography and cognate disciplines according to the student's academic goals and career objectives; and 3) the completion of a Master's thesis.

At the student's option and with the approval of the Director of Graduate Studies, a non-thesis degree (Plan B requiring six additional credits) is permitted. Students selecting the Plan B option must complete a project which is more limited in scope and design than a thesis as part of the formal requirements for the degree. The M.A. student may not take more than six hours of course work below the 600 level. The program is tailored to meet each student's particular needs and requirements,

and numerous interdisciplinary topics may be chosen for study.

All graduate students are expected to demonstrate competence in basic research skills and tools, in critical analysis, scientific writing, and accurate verbalization as part of the degree requirement. During initial phases of graduate work, a strong emphasis is placed upon acquiring competence in the fields of bibliographic techniques, cartographic analysis, and the application of field and quantitative techniques to geographic problems.

Geology

Graduate Faculty: Professors Richard Barnhisel, W. H. Blackburn, William Brown, W. H. Dennen, J. C. Ferm, W. C. MacQuown, N. Rast, Lyle Sendlein, J. Thrailkill. Associate Professor B. R. Moore and Ronald Street.

Associate Members: Associate Professors F. R. Ettensohn, I. S. Fisher.

Emeritus Professors: Arthur McFarlan and Vincent Nelson.

The Department of Geology offers graduate work leading to the M. S. and to the Ph.D. degrees. The credentials of each applicant are considered individually and applicants from other scientific disciplines are encouraged to apply. Applicants with non-geology backgrounds will be required to attain geologic proficiency through course work. All applicants should have demonstrated competence at the undergraduate level and a founding in the basic sciences equivalent to that of B.S. Graduates of this Department. Deficiencies in geology, allied sciences and mathematics must be removed by such course work as the departmental committee on Graduate Studies may specify. Each candidate is expected to have or to obtain practice in geologic field work, and must submit an acceptable thesis or dissertation which demonstrates ability to conduct sound research. For the Ph.D., the candidate must demonstrate acceptable reading ability in one foreign language common to the scientific literature.

The principal areas of study offered are coal geology, geochemistry, geophysics, hydrogeology, sedimentology, stratigraphy, structural geology and tectonics.

Resources for the conduct of advanced studies include reference collections, a good library, sample preparation and field equipment, portable diamond-drilling apparatus and field vehicles. The geochemical laboratories include equipment for x-ray fluorescence and diffraction, atomic absorption, spectrophotometry, gamma-ray spectrometry, fluorometry, dc arc and laser emission spectrography. Research apparatus for remote sensing, petrographic microscopy, cathodoluminescence, and specialized equipment for sedimentologic and paleontologic studies are available within the department. Geophysical facilities include instrumentation for gravity, magnetic and seismic studies. A perman-

ent, six-component, high-quality seismic observatory is presently being installed.

Additional extra-departmental facilities for computing, neutron activation, electron microscopy, rock mechanics and clay mineralogy are readily available.

Germanic Languages and Literatures

Graduate Faculty: Professors Bernd Kratz, J. Wesley Thomas. Associate Professor Theodore Fiedler.

Associate Members: Assistant Professors Rand Henson and Phillip McKnight.

Emeritus Professor: Paul Whitaker.

The main purpose of graduate work in the Department's field is to provide students with a thorough understanding of German culture, its language and literature and its relationship to Western Civilization as a whole. Graduate instruction is designed to acquaint the students with the aims and methods of scholarship, to develop an intelligent appreciation of litera-

ture, and to make them effective teachers or to provide the cultural enrichment to enhance the quality of their work in other pursuits.

The Department offers graduate programs leading to the M.A. (Plan A or B) and Ph.D. degrees in German. At the present time only applications for the Master's degree are being considered. Also available are supplementary courses in Scandinavian. Competence in another foreign language, normally French, in addition to German is required for graduate degrees.

Admission requirements include an acceptable undergraduate major in German and a satisfactory score on the Graduate Record Examination. Applicants lacking more comprehensive knowledge of German language and literature may be admitted with the understanding that their program must include some advanced undergraduate work in addition to those courses normally required for the M.A. Before being admitted into the doctoral program, each student will be evaluated by the German graduate faculty on the basis of course grades, instructor's recommendations, and GRE scores.

Individual programs of study are planned with consideration of the student's competencies and interests. Thus, the department endeavors to be flexible and in teacher preparation, for example, to accommodate particular emphases appropriate for prospective instruction in secondary schools or two or four-year colleges.

Areas of specialization of the graduate faculty of the Department afford flexible coverage in breadth and depth, with particular strength in medieval studies, literature from the Enlightenment to the present, literary theory and intellectual history. The Department serves as the editorial center for the international journal, *Colloquia Germanica*. Graduate students are encouraged to participate in the editorial work. The University has substantial holdings in all areas of German language, linguistics and literature and in supporting fields.

Health, Physical Education and Recreation

Graduate Faculty: Professors Dean Currier, Joseph Gruber, Jay Kearney, Pentti Teraslinna. Associate Professors Sharon Hunt, Ralph Mann, Dennis Vinton and Andrew Weiner.

Associate Members: Associate Professors John Hall and Stan Labanovich. Assistant Professors Melody Noland, Richard Riggs and Andrew Weiner.

Emeritus Professors: Ernest Jokl, Earl Kauffman, Alfred Reece and Don Cash Seaton.

The Department of Health, Physical Education and Recreation offers graduate work leading to the Master of Science degree with an area of concentration in one

of the following: recreation, therapeutic recreation, school health education administration, generalist physical education, sport psychology, exercise physiology, biomechanics, or adapted physical education. Additionally, the Department offers work leading to an Ed.D. degree in physical education. Specialty areas similar to those available in the Master's program may be developed in the Ed.D. Specifics of this program are available from the Director of Graduate Studies.

The Master's program in health, physical education and recreation is designed to provide a quality graduate program for the following two types of students: (1) active, motivated individuals who desire advanced study to enhance their professional adequacy, and (2) discipline-oriented students completing a Master's as an intermediate step toward doctoral work. The objective of the program is to prepare the student to: (1) effectively locate, analyze, and utilize significant elements of the professional literature and research materials, (2) permit an in-depth study of a specialized content area within the field, and (3) acquire a knowledge of sound research procedures.

The program needed to accomplish this objective involves a combination of departmental course offerings, supporting electives, and a required core of statistics and research methods. Inasmuch as the fields of health, physical education, and recreation draw their principles from a variety of disciplines, it is appropriate that certain electives be chosen from the supportive areas of the biological and physical sciences and the behavioral and social sciences. Master's candidates with the approval of the Department may select either a thesis (Plan A) or a non-thesis option (Plan B).

Applicants are expected to have a minimum of 21 undergraduate hours in their respective fields. More specifically, the prerequisites for graduate study in physical education are:

Professional Orientation or History and Principles of Physical Education	2
Individual Sports, Dual Sports, Team Sports, Aquatics, Gymnastics, and Dance	10
Prevention and Treatment of Athletic Injuries	2
Anatomy and Physiology	4
Tests and Measurements in Physical Education	2
Kinesiology	2
Physiology of Exercise	2

For therapeutic recreation, and administration, or park management, the prerequisites are:

Introduction to Community Recreation	2
Recreation Program Planning and Leadership ..	2
Administration and Organization of Recreation ..	2
Introduction to Therapeutic Recreation	2
Principles of Outdoor Recreation	2
Supervised Field Study in Recreation	3
Laboratory Courses in the Areas of:	
Sport, Music, Art, Theater, Camping or Dance.	3
Electives selected from above areas	7

For school health education the prerequisites are:

Microbiology	3-5
Anatomy and Physiology	3-6
Community Health	2-3
School Health Education	2-3
Methods in Health Education	2-3
First Aid and Emergency Care	2
Special Topics in Health	6

Students who have a strong background in related biological or behavioral science fields may be considered for admission providing they agree to satisfy prerequisites established in each field. Applicants lacking these prerequisites will be expected to satisfy them via directed readings, competency examinations, or prescribed course work. This is in addition to the normal 30-hour master's program.

General Requirements

Regardless of whether the student concentrates in the physical education areas, health education, therapeutic recreation, or recreation administration, all candidates are required to complete the following.

PLAN A (Thesis Option)

EDP 557 Educational Statistics	3-4
or	
STA 570 Basic Statistical Analysis	
HPR 644 Research Techniques Applied to Health, Physical Education and Recreation	3
Supporting Electives	6
HPR Area of Concentration	12
HPR Residence Credit for the Master's Degree (768)	6
Total	30-31

or

PLAN B (Non-Thesis Option)

EDP 557 Educational Statistics	3-4
or	
STA 570 Basic Statistical Analysis	3-4
HPR 644 Research Techniques Applied to Health, Physical Education and Recreation	3
HPR 782 Independent Research Project	3
Supporting Electives	6
HPR Area of Concentration	15
Total	30-31

For additional information, write to the Director of Graduate Studies, Department of Health, Physical Education and Recreation.

PHYSICAL EDUCATION

420G Physiology of Exercise	(3)
472G Kinesiology	(3)
509 Workshop in Health and Safety	(1-3)
530 Administration of Health and Safety Education	(3)
535 School Health Dilemmas of Special Populations	(3)
546 Physical Education Workshop	(1-3)
547 Psychology of Sport and Physical Activity	(3)
548 Special Topics in Recreation and Leisure Studies	(1-3)
549 Special Topics in Physical Education	(1-3)
560 Motor Development in Infants and Young Children	(3)
570 Landscape Design of Park and Recreation Areas	(3)
572 Principles and Practices in Therapeutic Recreation	(3)
573 Administration and Organization of Recreation	(3)
575 Interpretations of Leisure and Recreation	(3)
577 Practicum in Recreation	(3-9)
579 Adapted Physical Education	(3)
592 Choreography	(2)
593 Dance Production	(3)
609 Seminar in Health and Safety Education	(3)
610 The Organization and Administration of Therapeutic Recreation Programs	(3)
611 Therapeutic Applications of Recreation	(3)
620 Advanced Exercise Physiology	(3)
621 Exercise and Coronary Heart Disease	(3)
622 Physical Fitness and Related Concepts	(3)
644 Research Techniques Applied to Health, Physical Education and Recreation	(3)
645 Measurement Theory in Health, Physical Education and Recreation	(3)
646 Integrated Development	(3)
647 Motor Learning	(3)
650 Curriculum and Program Development	(3)
651 Facilities, Construction, and Equipment	(3)
676 Current Issues in Recreation	(3)
685 Administrative Practices in Recreation	(3)
694 Independent Study in Health Education	(1-3)
695 Independent Study in Physical Education	(1-3)
696 Independent Study in Recreation	(1-3)
720 Sports Medicine	(3)
741 Current Studies and Trends in Health and Physical Education	(3)
768 Residence Credit for the Master's Degree	(1-6)
769 Residence Credit for the Doctoral Degree	(1-12)
770 Seminar in Physical Education	(3)
780 Seminar in Recreation	(3)
782 Independent Research	(3)
782 Independent Research	(3)

Health Radiation Sciences

Graduate Faculty: Professor Yosh Maruyama*. Associate Professors Larry Beach, John Calkins, Ralph Christensen, Joseph Sayeg*

*Joint appointment through the department of Radiation Medicine, College of Medicine.

Two programs in the Bioradiation Sciences are available leading to the degrees of Master of Science in Radiological Health and Master of Science in Radiological Medical Physics.

Graduates of accredited colleges with an appropriate baccalaureate degree (e.g., Biological Sciences, Physics, Public Health, Mathematics, Chemistry, etc.) may become candidates for one of these degrees. Physics 361 or its equivalent is a prerequisite for both programs, and Computer Science 221 or its equivalent is also a prerequisite for the program in Radiological Medical Physics.

Both programs are an interdisciplinary type. As such, Plan B is utilized for the graduate work, incorporating specific courses in several departments. There is no language requirement. A core of courses is common to both programs. Additional and special course work is prescribed for each program as degree requirements.

CORE PROGRAM

BIO/RM 540 General Radiation Biology	(4)
BIO/RM 640 Biological Effects of Radiation	(3)
PHY/RM 472 Interaction of Radiation with Matter	(3)
PHY 535 Experimental Physics, Atomic and Nuclear	(2)
RM/PHY/HRS 545 Radiation Hazards and Protection	(3)
HRS 710 Seminar in Bioradiation Science	(1)
STA Basic Statistical Analysis	(4)
Total	20

Master of Science in Radiological Medical Physics

ADDITIONAL PROGRAM

ANA 511 Introduction to Anatomy	(5)
PGY 502 Principles Physiology Lectures	(4)
HRS 715 Advanced Problems in Radiation Dosimetry	(2-6)
Area Electives	(2-6)
Total 31 (minimum)	

A practicum in Clinical Radiological Physics will continue following completion of formal course work. This applied work will be under the staff of the Department of Radiation Medicine.

Master of Science in Radiological Health Specialty

ADDITIONAL PROGRAM

CH 600 Epidemiology	(3)
CH 612 Public Health Administration	(3)
HRS 720 Advanced Problems in Radiological Health	(2-4)
Area Electives	(4-8)
Total 32 (minimum)	

A practicum in Radiological Health will be required which will consist of approximately 12 weeks of training at a hospital, a government regulatory agency, and a national laboratory or equivalent. This will be offered after the course work has been completed.

545	Radiation Hazards and Protection	(3)
575	Applied Health Physics Laboratory	(2)
690	Research in Radiological Health	(1-3)
695	Research in Radiation Dosimetry	(1-3)
710	Seminar in Bioradiation Sciences	(1)
715	Advanced Problems in Radiation Dosimetry	(2-6)
720	Advanced Problems in Radiological Health	(2-4)

Higher Education

Graduate Faculty: Professors Charles F. Elton, Juanita Fleming, Associate Professor Edgar L. Sagan.

Associate Members: Professors Donald Gehring (Adjunct, University of Louisville) and Leslie Martin, Assistant Professor Jon Hesseldenz (Adjunct).

Emeritus Professor: Collins Burnett.

Higher education as a specialized field of study at the University of Kentucky embodies educational content and process relating to students, faculty, and administration in the two-year and four-year college environments. Students receive an in-depth introduction to such aspects of higher education as recruitment, selection and admission; historical backgrounds; faculty role and preparation; organization and administration; the teaching-learning phenomenon in the college setting; student personnel; the junior and community college; curriculum development, implementation and evaluation for undergraduate, graduate and professional programs; and institutional research.

The Department welcomes qualified students regardless of their undergraduate major and recognizes that course experiences from many disciplines may make a very important contribution to the student's understanding of higher education.

The purposes of the Department follow:

1. Provide the student with a critical analysis of the area of higher education, including the development of an attitude of intellectual curiosity about college and university operations.
2. Provide a major concentration for those who plan to teach and do research in departments of higher education in institutions offering such graduate programs.
3. Provide a support area for those majoring in disciplines other than education, moving shortly or ultimately into college administration.
4. Prepare students with backgrounds in allied health who are planning to move into teaching and/or administrative positions in two-year and four-year educational institutions and health care facilities.

5. Provide professional preparation for the following careers:

- a. General administration—president, provost, chancellor, director, academic dean, research administrator, director of institutional planning.
- b. Student personnel administration—Admissions officer, registrar, coordinator of student services and activities, dean of students, dean of men, dean of women, director of housing.
- c. Development officer—director of public relations, alumni relations, or fund raising.

6. Provide research for evaluation in such aspects of higher education as student characteristics, faculty behavior, administrative roles, institutional organization, curriculum design, the teaching-learning process, decision making, and finance and budgeting.

A student who meets the minimal admission requirements of The Graduate School and the College of Education will be considered for admission to the Department.

The Department offers the following four degrees:

1. Master of Science in Education
Major emphasis is on higher education with course work in the following categories:
Higher Education 15
Research Design and Statistics 3
Electives in Education (outside major) 6
Electives outside Education 6
2. Specialist in Education
A minimum of 30 credits at the 600 and 700 levels in Education. At least 24 credits must be taken at the University of Kentucky.
3. Joint Doctor of Philosophy
Studies in Higher Education is a joint program between the Department of Higher Education and Social and Philosophical Studies:
Required core courses 24
One or more courses in each of four areas:
Foundations, Social Science, Institutional Studies, Inquiry Skills (minimum) 12
Emphasis in Inquiry Skills 12-15
4. Doctor of Education
Each student's doctoral program is planned in consultation with his Advisory Committee. Program content for the doctoral student in education is selected from the following categories:
Higher Education 24
Research Design and Statistics 9
Electives in Education (outside major) with a minimum of six hours in each of two departments 18
Electives outside Education (all in one department) 24

The Department participates in the joint doctoral program with other regional universities. These programs permit qualified applicants to complete approximately one year of graduate study beyond the Master's degree at the regional institution. The remainder of the academic program must be completed at the University of Kentucky. The work of each student is directed by a joint faculty committee from the two institutions.

Inquiries should be directed to: Director of Graduate Studies, Department of Higher Education, 111 Dickey Hall, University of Kentucky, Lexington, KY 40506.

708	Internship in College Administration	(4)
718	Trends in Higher Education	(3)
719	College Teaching and Learning	(3)
722	College Student Personnel	(3)
733	Organization and Administration of Higher Education	(3)
734	The Community and Junior College	(3)
768	Residence Credit for the Master's Degree	(1-12)
769	Residence Credit for the Doctor's Degree	(0-12)
798	Seminar in Higher Education	(3)
799	Research Problems in Higher Education	(3)

History

Graduate Faculty: Professors Raymond Betts, Randolph Daniel, Mary Wilma Hargreaves, George Herring, Robert Ireland, Humbert Nelli, Charles Roland, John Scarborough, Robert Seager, Gerard Silberstein, Joe Thompson, Robert Warth. Associate Professors James Albisetti, Lance Banning, William Chambliss, Eric Christianson, Nancy Dye, Bruce Eastwood, Donald Nugent, Robert Olson, Jeremy Popkin, Robert Randall, Daniel Smith.

Associate Member: Professor Harry Caudill.

Emeritus Professors: Thomas Clark, Clark Cone and James Hopkins.

The Master's Program

Students should submit evidence of strong undergraduate preparation in history, preferably an undergraduate major with a minimum grade-point average of 2.8 on a 4.0 scale. Applicants for admission must submit Graduate Record Examination scores and three letters of recommendation from professors familiar with their work. Background in at least one modern foreign language is required for admission. Students will not receive the M.A. degree in history unless they demonstrate reading knowledge of a modern foreign language approved by the Department of History and by The Graduate School. Both Plan A and Plan B are offered.

The Ph.D. Program in History

Those who seek the doctorate in history should follow carefully the general direc-

tions governing the subjects of residence, courses, and foreign language requisites set forth in the first part of the Bulletin. The applicant does not become a candidate until knowledge of one modern foreign language approved by the Advisory Committee has been demonstrated, either a knowledge of a second foreign language or, upon approval, competence in another skill, such as statistics or computer science or oral history, has been demonstrated, and until the Qualifying Examination has been passed and has been approved by The Graduate School. Choice of an alternative to one of the two modern foreign languages is not a matter of the student's right. The decision belongs to the Advisory Committee to whom the student must demonstrate the appropriateness of the alternative for dissertation research.

The student's work for the doctorate in history is directed by an Advisory Committee composed of representatives of the areas and fields under four preparation requirements. The committee's chairman directs the dissertation and students should consult this person at their earliest convenience.

Requisites for the Ph.D. candidacy in history will be met as follows:

General Preparation: For the purpose of obtaining a sound factual and interpretative understanding to supplement work in the major field, the student will pursue guided reading, research, and course work in one of the following areas:

Ancient History (Greek and Roman)
Early Middle Ages (c. 400-c. 1000)
Late Middle Ages (c. 1000-c. 1500)
Early Modern Europe (1450-1770)
Modern Europe (since 1770)
United States History
Britain and the Empire (1485 to present)
Russia and East Europe
The Far East
Latin America

As an alternative method of satisfying the area requirement, the student may opt an area entitled Western Civilization. This area will require 21 graduate hours of course work at the 500-699 level excluding History 606 but including six hours of Ancient History, six hours of Medieval History, and six hours of European History since 1500 (the last specification possibly including Russian and East European History). None of these hours may be in the student's intensive field.

Intensive Preparation: The student will pursue guided reading, research and course work to obtain professional preparation in depth in two of the following

fields, neither of which will duplicate the area chosen for General Preparation:

Greece
Rome
Early Middle Ages (400-1000)
Late Middle Ages (1000-1500)
Renaissance and Reformation (to 1648)
Modern Europe (1600-1770)
Modern Europe (1770-1870)
Modern Europe (1870 to present)
United States to 1865
United States since 1865
Britain and the Empire, 1485-1815
Britain and the Empire, 1815 to present
Russia and East Europe, 1700-1890
Russia and East Europe, 1890 to present
Hispanic America since 1810

Special Preparation: The student will be prepared in a fourth field. Requirements for this field may be satisfied in one of the following ways:

1. Achieving competence in some discipline other than history, but in one closely related to the major field of history. Structured programs are available in historic preservation, archives, and communications.
2. Achieving mastery in a special field chosen from within the student's program of Intensive Preparation. Examples of such a field might be United States Intellectual History or the History of Germany. The special field will normally require course work or directed reading in one or more outside disciplines. The choice of the special field will be initiated by the student and the major professor. Final acceptance will rest with the student's Advisory Committee.

Students' success in their General Preparation will be evaluated by a written examination. Their success in the Intensive and Special Preparations is evaluated by both written and oral examinations.

THE GRADUATE GROUP

Seminars

These seminars are designed to acquaint students with the problems, sources and secondary literature in the designated fields in order to prepare them for the graduate written and oral examinations.

606	Historical Criticism	(3)
611, 612	Readings in Ancient History	(3 ea.)
613	Readings in Early Medieval History	(3)
614	Readings in High and Late Medieval History	(3)
615	Readings in History of Science and Medicine (Through the Renaissance)	(3)
616	Readings in History of Science and Medicine (Since the Renaissance)	(3)
621, 622	Readings in European History, 1500-1815	(3 ea.)
623	Readings in European Cultural History Since 1815	(3)
624	Readings in European Political and Diplomatic History Since 1815	(3)
625, 626	Readings in British and British Empire History	(3 ea.)
631, 632	Readings in United States History to 1865	(3 ea.)
633, 634	Readings in United States History Since 1865	(3 ea.)
635	Readings in Modern Russian History I	(3)
636	Readings in Modern Russian History II	(3)
637, 638	Readings in Latin American History	(3 ea.)
639	Readings in East Asian History	(3)
640	Readings in East Asian History	(3)
650	Readings in Special Topics in History	(3)
695	Independent Work	(1-3)

COURSES IN THE 700 GROUP

These seminars are designed to introduce students to the methods, resources and auxiliary disciplines necessary to research in the designated fields in order to prepare them for the writing of theses and dissertations.

700	Special Problems in History	(3)
705	Seminar in Ancient History	(3)
706	Seminar in Medieval History	(3)
710	Seminar in American History, 1607-1815	(3)
711	Seminar in American History, 1815-1865	(3)
712	Seminar in American History, 1865 to the Present	(3)
715	Seminar in Latin American History	(3)
720	Seminar in Modern European History, 1500-1714	(3)
721	Seminar in Modern European History, 1714-1870	(3)
722	Seminar in Modern European History, 1870 to the Present	(3)
730	Seminar in Modern British History	(3)

Theses

768	Residence Credit for the Master's Degree	(1-12)
769	Residence Credit for the Doctor's Degree	(0-12)

Home Economics

Graduate Faculty: Extension Professor Doris Tichenor (Assistant Extension Director for Home Economics and Director for Community Development).

Emeritus Professor: Statie E. Erikson

The Graduate School rules and regulations for the master's degree apply to the degrees offered in the College of Home Economics. Plan A requires 24 hours plus a thesis except in the Department of FAM which requires 30 hours plus a thesis. Plan B requires 36 hours. No language is required. Because prerequisites vary within each area, the prospective student is advised to contact the appropriate Director of Graduate Studies, College of Home Economics, University of Kentucky.

For more information about specific departments see that section of the Bulletin which gives a detailed description. The departments are: Family Studies; Human Environment, Design and Textiles; and Nutrition and Food Science. For information about Home Economics Education see Vocational Education.

Horticulture and Landscape Architecture

Graduate Faculty: Professors Dean Knavel, Hubert Mohr, A.S. Williams. Associate Professors Jack Buxton, Thomas R. Kemp, and Leonard Stolz.

Associate Members: Associate Extension Professor Robert E. McNiel. Assistant Professor John C. Snyder. Emeritus Professors: Carl Chaplin, G.W. Schneider.

The Department offers graduate work leading to the Master of Science in Agriculture degree. Degrees are awarded primarily under Plan A, but they can be awarded under Plan B with prior approval. The study and research program may

relate to Pomology, Vegetable Crops, Floriculture, or Ornamental Horticulture. Research problems are normally related to the discipline of genetics and physiology.

Students interested in working in horticulture toward a Doctor of Philosophy degree may enter the interdepartmental Plant Physiology or Crop Science programs.

400G	Special Topics in Horticulture	(1-3)
502	Pomology: Deciduous Fruits II	(3)
510	Vegetable Crop Production	(3)
515	Turf Management	(3)
524	Floriculture	(3)
570	Landscape Design of Park and Recreation Areas	(3)
582	Special Problems in Horticulture	(1-4)
590	Vegetable Crop Breeding	(3)
601	Physiological Mechanisms in Horticultural Plants	(3)
625	Advanced Plant Propagation	(3)
732	Mineral Nutrition of Plants	(3)
734	Physiology of Growth and Development	(3)
736	Phylogeny of Cultivated Plants	(3)
768	Residence Credit for Master's Degree	(1-12)
770	Seminar	(1)
790	Research in Horticulture	(1-4)

Human Environment: Design and Textiles

Associate Members: Associate Professors Deborah Lamar and Terry Rothgeb, Assistant Professor Sharla Hoskin.

The Department of Human Environment Design and Textiles offers the Master of Arts in Interior Design and the Master of Arts in Textiles and Clothing. Both Plan A—24 credits plus thesis, and Plan B—36 credits, are offered.

INTERIOR DESIGN

401G	History of Interiors I: A Survey Through the 18th Century	(3)
402G	History of Interiors II: A Survey of 19th and 20th Centuries	(3)
507	Interior Design Studio V: Total Design/Total Function	(3)

787	Special Problems in Textiles.	(1-3)

Library Science

Graduate Faculty: Professors Lawrence A. Allen, Robert E. Cazden, Lois Chan, Michael Harris, Timothy Sineath. Associate Professors Joann Rogers, Thomas Waldhart and Wayne Wiegand.

Associate Member: Assistant Professor Trudi Bellardo.

Since January 16, 1974 the College of Library and Information Science does not normally admit students during the spring semester. Students are only admitted during the summer term and fall semester.

The College of Library and Information Science offers three degrees, M.A., Plan A; M.A., Plan B; and MSLS. The degree requirements for these degrees are as follows:

I. M.A., Plan A Requirements

A. Course Requirements

1. 36 total credit hours, 30 of which must be graduate credit hours
2. 9 hours—Required Introductory Courses (LS 530, 550, 560)
21 hours elective
6 hours thesis credit
3. 15 hours must be on the 600-700 level

B. Thesis

C. Modern Foreign Language—reading proficiency in French, German, Russian, or Spanish (one required). Another language may be substituted by petition. This requirement may be satisfied by one of four methods:

1. by examination at beginning of each semester.
2. by successful completion of special, non-credit, one semester course in a foreign language.
3. by having completed the undergraduate language requirement at the University of Kentucky with a B average.
4. by satisfying the language requirement for another graduate degree.

D. Oral examination in defense of thesis.

II. M.A., Plan B Requirements

A. Course Requirements

1. 36 credit hours, 30 of which must be graduate credit hours
2. 9 hours—Required Introductory (LS 530, 550, 560)
6 hours—advanced bibliography or
technical processing courses
6 hours—cognate courses on 500 level or above
15 hours—elective
3. 15 hours must be on the 600-700 level

B. No thesis required

C. Modern Foreign Language—as in M.A., Plan A

D. Final Examination

III. M.S.L.S. Requirements

A. Course Requirements

1. 36 total credit hours, 30 of which must be graduate credit hours
2. 9 hours—Required Introductory Courses
27 hours—elective
3. 15 hours must be on the 600-700 level

B. No thesis required

C. No modern foreign language competency required

D. Final Examination

The minimum College standards for admission to graduate work in Library and Information Science include a bachelor's degree from an accredited institution, an undergraduate GPA of 2.75 and a combined score of 900 on the verbal and quantitative aptitude tests of the Graduate Record Examination. A separate application to the College of Library and Information Science is also required. For additional information, bulletin, and appropriate forms, contact Assistant Dean, College of Library and Information Science.

Mathematics

Graduate Faculty: Professors David Adams, James Brennan, J.D. Buckholtz, Richard Carey, Thomas Chapman, Frederick Cohen, Donald Coleman, Paul Eakin, Carl Eberhart, Edgar Enochs, Graeme Fairweather, Steven C. Ferry, Michael Freeman, Brauch Fugate, Ronald Gariepy, William B. Gragg, Lawrence Harris, Thomas Hayden, Henry Howard, David Johnson, Frank Keogh, Kenneth Kubota, Donald Leigh, John Lewis, Anders Linquist, John Mack, Raymond Rishel, Wimberly Royster, Ted Suffridge, Clasine Van Winter, James H. Wells, Roger Wets. Associate Professors James Beidleman, Craig Benham, Raymond Cox, Robert Jensen, Robert Molzon, Avinash Sathaye, James Simpson.

Associate Members: Assistant Professors Ioannis Athanasopoulos, Arne Jensen, Nicholas Korevaar, Carl Lee.

Emeritus Professor: S. M. Shah.

The Department of Mathematics grants the M.A., M.S., M.A.T.M., and Ph.D. degrees. There are no specific course prerequisites for admission; however, two semester of advanced calculus, and at least one semester each of algebra and topology are suggested.

The Master of Arts degree, designed for prospective junior college and secondary

school teachers, is based on a 30 credit-hour program, requires a reading knowledge of one foreign language and is offered under either Plan A or B.

The Master of Science degree, designed for those planning on a mathematical career in business or industry, is based on a 36 credit-hour program which requires course work in several areas of modern mathematical applications. It is offered under Plan B only; no foreign language is required.

The Master of Arts in Teaching Mathematics degree, designed for persons holding secondary school teaching certificates in mathematics, is based on a 30 credit-hour program. There is no foreign language requirement.

The doctorate is a research degree granted on the basis of broad mathematical knowledge and exhibited creative ability. Course work leading to the doctorate is available in the areas of algebra, analysis (classical and modern), applied mathematics, with specialization in optimization and numerical analysis, differential equations, and topology. A comprehensive examination is required of each student. This examination normally is given after two years of graduate study. At least two semesters of supervised teaching experience is required of all Ph.D. students.

In order to be admitted to candidacy for the degree, a student must pass proficiency examinations in two foreign languages chosen from French, German or Russian, complete studies in a minor field (either inside or outside the Department) and successfully complete the comprehensive examinations. Subsequent work becomes highly specialized through seminars, independent study, and finally, work on a dissertation which penetrates in depth some field of particular interest. The Department will further require of all candidates an internship. This internship will usually consist of teaching (three to six semester hours), though upon approval of the Director of Graduate Studies, the student may select some other activity appropriate to his professional expectations. Areas in which members of the faculty have active research projects include algebraic, general and infinite-dimensional topology, group theory, ring theory, algebraic geometry, number theory, one and several complex variables, rational approximation, operator theory, differential equations, numerical analysis and optimization and control theory.

Mechanical Engineering

Graduate Faculty: Professors Richard Birkebæk, Clifford Cremers, James Funk, James Lafferty, Associate Professors Robert Altenkirch, Pramode Bhagat, Ottfried Hahn, Charles Knapp, Robert Peck, Andrew Seybert, Shiva Singh.

Associate Members: Associate Professor Mihail Roco, Assistant Professor Timothy Tong.

Emeritus Professors: Willis Merle Carter, Orville Stewart.

The Department of Mechanical Engineering provides programs for study and research leading to the Master of Science in Mechanical Engineering, the Master of Science in Nuclear Engineering, and the Doctor of Philosophy.

Areas of concentration for research and study are (1) thermal sciences comprising heat transfer, thermodynamics and fluid mechanics, (2) design, (3) biomedical engineering, (4) nuclear engineering, (5) air pollution, (6) systems and controls and (7) coal science, (8) power systems, (9) combustion, and (10) acoustics.

Graduate study normally requires a

bachelor's degree in engineering, not necessarily in mechanical engineering and a GPA of 2.8/4.0 on all undergraduate work. An undergraduate degree in chemistry, physics or mathematics combined with a strong interest in engineering topics is suitable preparation when certain required undergraduate courses are also taken.

The master's degree can be completed in one academic year plus a summer, but students holding assistantships usually take longer. A non-thesis option (Plan B) for the master's degree is available for students with acceptable previous research or design experience.

The Ph.D. degree has no formal course requirement. Generally students take a number of courses to prepare for the qualifying examinations and usually need to spend two years to complete a suitable dissertation. Most students find it necessary to take course work beyond the master's degree necessary preparation for the qualifying examination. The language requirements for the Ph.D. may be satisfied by either German or Russian.

The Department has seven research laboratories. These are the Boiling and Phase Change Lab, Coal Research Lab, Digital Systems Lab, High Temperature and Thermal Radiation Lab, Combustion Lab, Nuclear Engineering Lab, and the Wenner-Gren Research Lab for bio-medical engineering. The Department laboratories are well-equipped with instrumentation, computers, and facilities for study in the areas of air pollution, biomedical engineering, coal research, combustion, fluid mechanics, heat transfer, and nuclear engineering.

Medical Microbiology And Immunology

Chair: Alan M. Kaplan

Graduate Faculty: Associate Professor Marion Steiner.

The Department of Medical Microbiology and Immunology provides an interdisciplinary approach to problems concerning the basic molecular and cellular processes of eukaryotic and prokaryotic organisms. The program is designed primarily for doctoral students, however candidates for the master's degree will be accepted under unusual circumstances. Research areas include microbial physiology, bacterial pathogenicity, cellular immunology, tumor immunology, membrane biology, molecular virology, molecular genetics and gene regulation and involve extensive utilization of the newest techniques in genetic engineering, hybridoma technology and fluorescence activated cell sorting.

The program of study is tailored to the individual background and career goals of the student and stresses an interdepartmental approach both in the selection of

courses and in the pursuit of research. Students typically select courses in the departments of biochemistry, pharmacology, pathology, biology and anatomy as well as microbiology and are encouraged to participate in graduate seminars, journal clubs, research seminars, to interact with visiting scholars and to present the results of their research at local and national meetings.

Inquiries regarding graduate level training in Medical Microbiology and Immunology as well as the availability of financial support should be directed to the Chairman of the Department of Medical Microbiology and Immunology.

Metallurgical Engineering and Materials Science

Graduate Faculty: Professors R. DeAngelis, P. Gillis, P. Reucroft (Chair). Associate Professors H. Alan Fine, J. Morris.

Associate Member: Assistant Professor Todd Gross.

Emeritus Professor: R. E. Swift.

The Department offers programs of study leading to the Master of Science in Metallurgical Engineering, or in Materials Science, and the Doctor of Philosophy. The graduate program in the Department has as its aim the development of skills and techniques which are conducive to independent thought, learning and investigation. Degree programs can be selected by the student from a wide variety of topics in the following and other areas: Physical Metallurgy; Mechanical, Chemical and Electronic Properties; Metal Deformation Processing; Electron Microscopy, X-ray Diffraction and Surface Analysis; Ultra-high Vacuums and High Pressures; Metals, Ceramics and Polymers; Extractive Metallurgy. Extensive and modern laboratory facilities located in Anderson Hall are available for experimental investigations in these areas.

Preparation for study in this Department normally consists of a bachelor's degree in metallurgical engineering. The admission requirement is usually a grade point average of 2.8/4.0 on all undergraduate work. However, an undergraduate degree in chemistry, physics, mathematics or another engineering discipline provides excellent preparation if coupled with a

strong interest in the behavior of materials.

The Master's degree may be obtained by satisfying the usual college requirements. Plan A is preferred. However, students may elect during their first semester of enrollment to substitute six credits of graduate level course work (Plan B) for the thesis. For further information consult the Director of Graduate Studies. There is no language requirement for this degree.

The degree of Doctor of Philosophy is conferred upon candidates who, after completing not fewer than three years of graduate work devoted to study in the broad field of Metallurgical Engineering or Materials Science, present a satisfactory thesis, pass a comprehensive examination on their subject and chosen field and show sufficient promise of scholarly attainment. It is intended to represent the attainment of independent and comprehensive scholarship in the field. Reading knowledge of one modern foreign language and demonstrated competence in a minor area from the fields of engineering, mathematics, physical or biological sciences is required for the Ph.D. degree.

The Department of Metallurgical Engineering and Materials Science does not require the candidate to complete a specified number of academic courses. However, a special program is usually recommended by the student's Advisory Committee to fulfill specific needs. Admission to the doctoral program requires the passing of a comprehensive preliminary examination, the nature of which is set by the student's Thesis Advisory Committee.

Microbiology Graduate Faculty

Graduate Faculty: Professors M.I. Aleem, Albert T. Brown, Jimmy Clark, David M. Goldenberg, Norman L. Goodman, Alan Kaplan, Thomas L. Lillich, Thomas L. Roszman, Sheldon Steiner, Harold E. Swim, Ralph Wiseman. **Associate Professors:** Raymond B. Bridges, Robert B. Calmes, Jr., Dennis Harris, Judith Lesnaw, John Walsh.

Associate Members: Professors David N. Mardon, Raymond Otero. **Associate Professors** Thomas C. Gray, Makoto Iwaya, Frederick J. Primus. **Assistant Professors** Donald A. Cohen, David V. Gold, Barbara A. Hanson, Robert J. Jacob, Timothy Overman, Michael L. Perdue, Mohan L. Sopori, Marion R. Steiner, Arthur L. Williams, Stephen G. Zimmer.

Adjunct Professors: D. Mardon (Eastern Kentucky University) and R.B. Otero (Eastern Kentucky University).

Emeritus Professors: Professors O.F. Edwards, J.C. Humphries, I. Ruchman, and M. Scherago.

The graduate program in Microbiology offers the Masters of Science (Plan A and B) and the Ph.D. Degree in the areas of morphology and physiology of microorganisms, immunology, medical microbiology, microbial biochemistry and bioenergetics, virology, environmental microbiology, microbial genetics, systematic microbiology, microbial ultrastructure and genetic engineering.

(See courses in Biology)

Mining Engineering

Graduate Faculty: Professors Joseph Leonard, R.S. Mateer, K.F. Unrug.

Associate Members: Associate Professors Gerhard Herget and A.B. Szwilski

Emeritus Professor: Fred D. Wright.

The program leading to the degree of Master of Science in Mining Engineering is offered through the Department of Mining Engineering. The objectives of this program are to provide an advanced level of applied science for use in the mining industry and to offer specified topics for research specialization. Twenty-four credit hours of course work plus an acceptable

thesis (Plan A) or 30 credit hours of course work and reports on several research topics (Plan B) are required to fulfill program requirements.

Enrollment in the M.S. Min.E. degree program is open to qualified applicants with an undergraduate degree in Mining Engineering or other engineering and science fields. A grade point average of 2.8/4.0 is normally required on all undergraduate work. Persons with undergraduate degrees in fields other than Mining Engineering are required to make up deficiencies in undergraduate Mining Engineering courses.

Current research areas with applications to coal mining include the following: rock mechanics and ground control, operations research, mine ventilation, underground construction, methane drainage, coal preparation, and mineral economics. In addition to the graduate courses in Mining Engineering, graduate courses in Civil Engineering and other disciplines may be used to satisfy degree requirements providing they are appropriate to the student's program of study.

Additional information about the graduate program in Mining Engineering can be obtained by writing the Director of Graduate Studies, Department of Mining Engineering.

School of Music

Graduate Faculty: Professors Joseph Baber, Joe Buttram, Hubert Henderson, Donald Ivey, Rey M. Longyear, Wesley K. Morgan, and Lucien Stark. **Associate Professors** Lance Brunner and Richard Domeck.

Associate Members: Associate Professors Charles Lord, Patricia Montgomery and Cecilia Wang. **Assistant Professors** Jean Christensen, Allen Goodwin and Mina Miller.

Adjunct Professors: Carl-Werner Guempel (UL), Gerhard Herz (UL), Robert Weaver (UL).

Emeritus Professors: R. Bernard Fitzgerald, Nathaniel Patch and Kenneth Wright.

The School of Music offers the Master of Arts (M.A.) in musicology or theory; Master of Music (M.M.) in performance, theory, composition, or music education; Doctor of Musical Arts (D.M.A.) in performance or composition; and the Doctor of Philosophy (Ph.D.) in musicology; music education or theory. The applicant for the master's degree is expected to have earned an appropriate undergraduate degree at the University of Kentucky or an equivalent degree from a comparable institution.

Entrance Requirements

Placement examinations in theory, music history and literature, and the proposed field of specialization are required of all applicants before admission to graduate programs in music. Graduates of, or students currently enrolled at the University of Kentucky, are not exempt from this requirement. Those seeking a degree in performance must audition as well. Entrance examinations and auditions are held three times each year for those wishing to enroll the following fall semester: the last Saturday of January, and the second Saturday of March and July. For those wishing to enroll in the spring semester, examinations and auditions will be held the second Saturday in November. *The Director of Graduate Studies must be notified at least four weeks in advance of the date chosen by the applicant.*

Note: Persons not applying for financial assistance may choose any of the above dates. Persons applying for Non-Service Fellowships must take the examinations (and the audition if applicable) on the last Saturday of January. Those applying for teaching assistantships may choose the last Saturday of January or the second Saturday of March. Those wishing to begin studies during a summer session must take the examinations no later than the second Saturday of March.

In cases of extreme hardship, arrangements may be made with the Director of Graduate Studies to take entrance examinations *in absentia* and to send audition tapes. (Does not apply to D.M.A. candidates.)

GENERAL REQUIREMENTS FOR MASTER'S DEGREE

Foreign Language Requirements. The Master of Arts degree requires a reading knowledge of one foreign language, preferably French or German. Voice majors must have completed one year of study in each of two modern foreign languages.

Thesis Requirements. The Master of Arts degree requires a thesis (Plan A: see general requirements). A public recital acceptable to the faculty is required in lieu of a thesis for the Master of Music degree in Performance. A composition of major pro-

portions, acceptable to the composition-theory faculty and publicly performed, must be submitted in lieu of a thesis by candidates for the Master of Music degree in Composition. A thesis is optional (Plan A or Plan B) in the Master of Music in Music Education or Theory. Twenty-four hours are required with a thesis or 30 hours without a thesis.

A final comprehensive examination is required for each program.

MASTER OF ARTS (MUSIC)

Prerequisites: A suitable background in music literature and music theory, and a reading knowledge of one foreign language, normally French or German.

MASTER OF MUSIC (THEORY)

Prerequisites: Ten hours of upper division theory, including form and analysis and counterpoint, or the equivalent.

Theory (including MUS 578 or 671 or 672)	10
Research Methods (MUS 618)	3
Music History and Literature	6
Pedagogy of Theory (674, 675)	4
Directed Electives	1-7
Thesis (if desired)	0
Total	24-30

The student may either prepare a thesis or take six additional hours of Theory, Composition, or Music History and Literature courses for a total of 30 hours of course work.

MASTER OF MUSIC (COMPOSITION)

Prerequisites: Submission of three original compositions.

Advanced Composition (MUS 673)	4
Music History and Literature	6
Theory (including MUS 578 or 671 or 672)	8
Directed Electives	6
Thesis Composition	0
Total	24

The thesis composition must be publicly performed. The student is responsible for the preparation of legible score and parts.

MASTER OF MUSIC (PERFORMANCE)

Prerequisites: Acceptance by the appropriate faculty of applied music.

Music Performance (including recital)	9
Music History and Literature	6
Theory (including MUS 578 or 671 or 672)	4
Directed Electives	11
Recital	0
Total	30

This degree program is offered in the following areas: piano, voice, organ, violin, viola, cello, flute, oboe, clarinet, bassoon, trumpet, french horn, trombone, baritone, tuba, saxophone and conducting.

Wind and string majors must participate in at least one University-sponsored performing organization for two semesters. A minimum of three full semesters, excluding summer sessions, is necessary for an M.M. in Performance.

MASTER OF MUSIC (MUSIC EDUCATION)

Plan I*

History and Philosophy of Music Education (MUS 751)	3
Supervision and Administration of School Music (MUS 750)	3
Music Education Electives	6
Music Performance	6
Major Instrument	2-2
Minor Instrument	1-1
Research Methods (MUS 617)	3
Music History and Theory (including MUS 578 or 671 or 672)	6
Electives in Music or Education	3
Total	30

Plan II*

History and Philosophy of Music Education (MUS 751)	3
Supervision and Administration of School Music (MUS 750)	3
Music Education Electives	6
Music Performance	3
Research methods (MUS 617)	3
Theory (including MUS 578 or 671 or 672)	4
Music History and Literature	6
Electives	2
Total	30

Plan III*

History and Philosophy of Music Education (MUS 751)	3
Supervision and Administration of School Music (MUS 750)	3
Music Education Electives	3
Music Performance	3
Research Methods (MUS 617)	3
Music History and Theory (including MUS 578 or 671 or 672)	6
Electives	3
Thesis	0
Total	24

*Students planning to earn the doctorate in Music Education should elect Plan II or III.

Each full-time resident graduate student in music education must participate in a University-sponsored performing organization for two semesters.

DOCTOR OF MUSICAL ARTS DEGREE

The Doctor of Musical Arts program offers opportunity for fullest development as a performer, composer, or teacher of music performance or composition.

Applicants for the program in performance should have had at least two years' teaching experience. One foreign language, normally French or German, is required for all D.M.A. students.

One lecture-recital and three formal recitals are required for performance majors. The program content of the recitals will be established in cooperation with the student's Advisory Committee. With its approval, a program of chamber music, a concerto performance with orchestra, or a major role in an opera or oratorio may fulfill the requirement for one of the recitals. In lieu of a dissertation, a doctoral project will be required as an indication of the student's ability for scholarly study and research. This requirement will be fulfilled by performers with (1) a monograph which forms the basis of the lecture-recital, and (2) thoroughly researched and documented program notes for the remaining repertoire used in fulfilling the performance requirements, such monographs and notes to be approved by the Advisory Committee.

Composers will submit for the approval of the Advisory Committee a large-scale composition and will be responsible for arranging for its public performance. In lieu of a dissertation, they will submit an in-depth analysis and discussion of their composition.

The minimum course requirement beyond the master's degree are as follows:

	hours
MUS 618 Research Methods*	3
Music History and Literature	9
Advanced Music Theory	6
Performance major	12
Minor (optional)**	9
Total:	30-39

*If not completed at the master's level.

**The minor may be taken within or outside the School of Music, and is subject to the approval of the Advisory Committee and the chairman of the department concerned.

DOCTOR OF PHILOSOPHY DEGREE IN MUSIC

The School of Music offers courses and research opportunities leading to the Ph.D. in music. Applicants must meet the entrance requirements of the Graduate School as well as those of the School of Music, and must show evidence of competence in musical performance. Applicants with master's degrees must submit a thesis

or a research paper of sufficient scope and quality to demonstrate competence in research and clarity of expression. The basic core requirements are:

Research Methods: MUS 618 (if not taken at the master's level)

Music History and Literature: 9 hours beyond the master's

Advanced Music Theory: 6 hours beyond the master's

Three seminars (minimum) beyond the master's

There is no specific requirement in a minor area, but such work may be required by a student's Advisory Committee if it is essential to the major research or field of concentration.

Language requirements will conform to the Graduate School policy; however, specific languages required will vary with individual options.

The student must display proficiency at the keyboard.

The Ph.D. in music may be pursued in one of three areas: music education, music theory, or musicology. The program for each area beyond the core requirements is given below.

MUSIC EDUCATION

Music in Higher Education (MUS 762)

Psychology of Music (MUS 770)

At least one graduate level course in statistics

A knowledge of acoustics (PHY 140 or equivalent), a knowledge of specialized research in music education (MUS 617 or equivalent). These requirements must be met by the end of the first year of doctoral study.

Additional courses in music education or adjunct subjects as recommended by the Advisory Committee.

A reading knowledge of French, German, or a language appropriate to the research interest.

MUSIC THEORY

Pedagogy of Theory (MUS 674)

Advanced Pedagogy and Theoretical Systems (MUS 675)

History of Music Theory (MUS 678)

Additional courses in music theory or adjunct subjects as recommended by the Advisory Committee

A reading knowledge of French, German, or a language appropriate to the research interest

MUSICOLOGY

Medieval Notation (MUS 700)

Renaissance Notation (MUS 701)

Additional courses in musicology or adjunct subjects as recommended by the Advisory Committee

A reading knowledge of at least two foreign languages, normally German and either French or Italian.

In all cases, the foreign language requirements(s) must be met by the end of the first full year of study in the Ph.D. program. The student's Advisory Committee must be formed and appointed by the Dean of the Graduate School prior to advance registration for the student's third semester. The dissertation topic and prospectus must be approved by the Advisory Committee; the dissertation itself must be the result of original research which adds to or modifies what has previously been known on the subject. Qualifying examinations must be taken no later than one semester after the completion of course work. A student is admitted to candidacy for the Ph.D. degree only after the language requirement(s) have been met and the Qualifying Examinations have been passed.

JOINT Ph.D. IN MUSICOLOGY University of Kentucky and University of Louisville

A joint Ph.D. in Musicology is available from the University of Kentucky and the University of Louisville. The faculties and facilities of both Universities are available to students on either campus. If the student is enrolled full-time at either university, courses from the other are available without charge.

Students interested in this program should contact the Associate Dean of the Graduate School, University of Louisville, or the Director of Graduate Studies at the University of Kentucky, School of Music, for further information. The general regulations for doctoral students at the University of Kentucky will apply.

Admission. Every applicant must be admitted to the Graduate Schools of both universities. Official transcripts and GRE scores for students admitted to the University of Louisville will be sent to the Director of Graduate Studies, School of Music, University of Kentucky by the Graduate School, University of Louisville. Applicants may be admitted provisionally on the recommendation of the Director of Graduate Studies in Music at the University of Kentucky pending receipt of GRE scores and/or completion of placement examination at the University of Louisville.

Language Requirements. The University of Louisville will notify the Director of Graduate Studies, University of Kentucky, that a student has completed the language requirements.

Residence Requirements. At least three regular courses must be taken at the University of Kentucky. Residence requirements may be satisfied at the University of Louisville, University of Kentucky, or a combination of both. A student must be in residence as a full-time student or the equivalent for a minimum of four semesters beyond the master's degree. At least two of these semesters must be consecutive and precede the qualifying examination.

The University of Louisville will notify the Director of Graduate Studies, University of Kentucky, of the intent to schedule the qualifying examination and confirm that the student meets prequalifying requirements. Each candidate for the doctorate must complete two semesters of full-time dissertation study immediately after the qualifying examination by registering for a total of 18 credit hours in MUS 769 (University of Kentucky) or Music History 769 (University of Louisville). The candidate must maintain candidacy by registering for MUS 769 or Music History 769 (zero credit) each semester thereafter until the dissertation is successfully defended.

Advisory Committee. The Advisory Committee will be composed of six graduate faculty members, three from each institution.

Further information may be obtained from the University of Louisville Graduate School Bulletin.

MUSIC PERFORMANCE COURSES

All music performance courses may be repeated three times for credit.

All music performance courses carry from one to four credits during the fall and spring semesters. (Applied music offerings during the summer are limited.)

	MUP
Piano	501, 601
Voice	502, 602
Organ	503, 603

Nursing

Graduate Faculty: Professors Juanita Fleming, Jean Hayter, Marion McKenna (Dean), Associate Professor Elizabeth Bear.

Associate Members: Professor Melva Jo Hendrix, Associate Professors Gwendolen Lee, Dorothy Luther, Marcia Stanhope.

Emeritus Professors: Loretta Denman and Virginia Lane

Master of Science in Nursing requires a minimum of 34 credit hours for both Plan A or Plan B. Independent work in nursing for credit may be arranged through individual student-teacher determination in some instances. Basic requirements include a minimum of 10 hours in advanced clinical nursing, a systematic inquiry in nursing course, the first course in Clinical Teaching in Nursing, and Concepts and Theories in Nursing Course. In addition, each student will be expected to pass a final examination and to complete a clinical nursing project, a clinical nursing study or a thesis.

The objective of the nursing program is to prepare students for clinical, administrative and/or academic leadership positions in nursing. The clinical component is the major focus of the graduate curriculum and constitutes the core of knowledge for nursing at the master's level. The functional component differs depending on the career goal of the individual, and may consist of preparation for teaching, administration, or clinical specialization. Currently the clinical concentrations offered include adult nursing, community mental health nursing, family nurse practitioner, gerontologic nursing, nurse midwifery and parent-child nursing.

All students are required to take a minimum of 20 credits in nursing courses including core courses. Increasing opportunity is given students to study the application of core content to a particular clinical field of interest, and to further define the nursing content unique to that field. Faculty have diverse clinical backgrounds which enable this type of exploration to take place. Nursing is studied in a variety of settings: school, community and all types of health agencies. Involvement of the student in the educational program is facilitated by encouraging and guiding students in pursuit of areas in which they have special interest. Elective courses in nursing are available.

The general University requirements for admission to The Graduate School will apply. Applicants to the Master's program of

the College of Nursing are expected to take the aptitude portion of the Graduate Record Examination prior to acceptance in the program.

The minimal combined score of 900 on the verbal and quantitative portions of the GRE is acceptable. The minimal grade-point average is 2.8 on a 4.0 grading scale. Graduation from a National League for Nursing accredited baccalaureate degree program, current nurse licensure and one year of experience as a nurse after receiving the baccalaureate degree in nursing prior to application deadline are required. Applicants selecting the nurse/mid-wifery concentration are required to have two years of relevant experience in nursing (post-baccalaureate degree in nursing) prior to application deadline.

Enrollment is limited; therefore, all students will be selected on the basis of overall qualification. Eligibility for admission to The Graduate School does not insure admission to the nursing program. Personal interviews must be arranged by the applicant.

For further information contact the Director of Graduate Studies.

Operations Research

Director of Graduate Studies: Ray Rishel

The mathematical modeling of social, industrial, and military systems and the selection of preferred alternatives among many possibilities is the subject of "Operations Research". The ever increasing complexity and magnitude of the decision problems confronting modern decision makers demands the availability of a pool of experts capable of providing professional competence in the design, analysis and optimization of large scale systems.

The Master of Science in Operations Research is designed to equip the student

with the professional competence necessary for the implementation of operations research techniques in decision problems arising in management, engineering, education, bio-sciences, etc. The curriculum consists of core courses in deterministic optimization, stochastic aspects of operations research including statistical decision making, stochastic processes and stochastic optimization, one course in computer science either in the area of programming language or the area of large data base handling, and one problem seminar designed to integrate the material in the specific topic courses as well as involve the participant in some very specific operations research project.

In addition, the student must select a minor in an application-oriented area. This minor consists of a minimum two courses in such departments as economics, business administration, accounting, engineering, agriculture, and biology.

CURRICULUM

Core Courses

Discrete Optimization

- OR 515 Mathematical Programming and Extensions
- OR 616 Numerical Techniques for Nonlinear Optimization
- OR 618 Combinatorics and Networks

Stochastic Models

- OR 524 Probability Theory
- STA 525 Introductory Statistical Inference
- OR 624 Applied Stochastic Processes
- OR 617 Markovian Decision Problems

Computer Science

The student should be well acquainted with computer programming. No student will be allowed to graduate unless he can establish his competence in one procedural language and in a symbol manipulation language. In addition, the student must complete either a survey course or a more advanced computer science course on information processing (CS 460) depending on the student's background and interest.

- CS 520 Fundamentals of Programming Languages (To be written)
- CS 605 Advanced Information Processing

Problem Seminar

- OR 619 Problem Seminar in Operations Research

Electives must be selected with the approval of the Director of Graduate Studies. There are many course offerings in mathematics, statistics, computer science, economics, electrical engineering, mechanical engineering, civil engineering, business administration, and agricultural economics which are related to specific aspects of operations research. (The completion of deficiencies or prerequisites cannot be counted as credits toward the degree requirement and thus are not considered to be electives.) The student is particularly encouraged to take at least one course

from the areas of simulation techniques or business data handling. Two such courses are CS 540, Systems Simulation, and BA 551, Advanced Business Data Processing and Information Systems.

Minor Requirement

The student must select a minor area of specialization with the approval of the director of the program. The minor will consist of a minimum of two courses at the 500 level or above. The goal is to enable the student to converse directly with some of the prospective users of his skills.

Admissions and Degree Requirements

The entering student is expected to have strong working knowledge of linear algebra and to have had some experience with methods of proof used in mathematics. Each entering student, in addition, must have a sufficient background in at least one of the minor areas so that the prerequisites to the courses offered in that area can be met.

The usual Graduate School requirements for admission will be supplemented by a one-semester advanced calculus course, a one-semester junior-senior level course in linear algebra, and a familiarity with programming a digital computer. Lack of these prerequisites will be considered to be a deficiency which can be made up by taking one of the following courses currently offered:

Advanced Calculus: MA 471
Linear Algebra: MA 462
Programming: CS 150

No elective or other credit will be granted for such make up work.

This program will require 36 credit hours of course work with at least 15 credit hours of this course work at the 600 level or above. In all other respects, the usual Graduate School requirements for distribution and grade point average will apply. The required major for this degree will consist of nine courses to be known as the "core" of the program.

Each student will be required to take a minor consisting of a two course (six credit) sequence. This will generally be in an area of application.

Each candidate for the M.S. degree in Operations Research will be required to pass a written final examination.

- OR 515 Mathematical Programming and Extensions (3)
- OR 524 Probability (3)
- OR 525 Introductory Statistical Inference ... (3)
- OR 616 Numerical Techniques for Nonlinear Optimization (3)

- OR 617 Markovian Decision Problems (3)
- OR 618 Combinatorics and Networks (3)
- OR 619 Problems Seminar in Operations Research (3)
- OR 624 Applied Stochastic Processes (3)

Pathology

Graduate Faculty: Professors David Goldenberg, Norman Goodman, Thomas Roszman, Jesse Sisken. Associate Professor Peter Oeltgen.

Associate Members: Assistant Professors Donald Pett, James Primus, Stephen Zimmer.

While there is no graduate program in pathology the Department offers several courses which are open to qualified graduate students. The permission of the department chairman is required prior to enrollment.

- 611 Biopathology (3)
- 621 Pathologic Mechanisms (4)
- 622 Systemic Pathology (7)
- 660 Clinical Toxicology and Drug Monitoring (3)
- 685 Advanced Immunology (3)
- MD 500 Special Topics Course (1-3)

Pharmaceutical Sciences

Graduate Faculty: Professors Henry Cole, Patrick DeLuca, Louis Diamond, George Digenis, Anwar Husain, Harry Kostenbauder, Charles Lesshaft, William Lubawy, Harry Smith, Joseph Swintosky, John Scarborough, Hsin-Hsuing Tai. Associate Professors Peter Crooks, Edward Kifer, Milton Kornet.

Associate Members: Assistant Professors Robert Blouin, Joseph Bogardus, Michael Jay, P. K. Kadaba, Patrick McNamara, Michael Montagne, Jack Olson, James W. Sieg, James Truelove, Robert Yokel.

Emeritus Professor: Mark M. Luckens.

The College of Pharmacy offers M.S. and Ph.D. programs in Pharmaceutical Sciences, with concentration in areas of pharmaceuticals and pharmaceutical chemistry such as physical pharmacy, pharmaceutical technology, biopharmaceuticals and pharmacokinetics, pharmaceutical analysis, radiopharmacy, medicinal chemistry and natural products chemistry, mechanisms of drug action and drug metabolism.

The M.S. degree is offered under a modification of Plan A which permits students to take approximately one-half of their courses in work areas outside the major area. Plan B may be employed only in exceptional cases.

The language requirement for both the M.S. and Ph.D. degrees is a reading knowledge of one foreign language chosen from French, German, or Russian.

Pharmaceutical Sciences' graduate students are typically enrolled in graduate

courses in departments of Chemistry, Statistics, Biochemistry, Pharmacology, and others, depending upon the focus of the student's program. Superimposed upon this base, it is expected that the student will take graduate level courses within the major area of interest from the courses listed in Pharmacy.

For regular admission to graduate study in Pharmaceutical Sciences a student should have a sound background in pharmacy, chemistry and biology, with a mastery of mathematics through calculus. Applicants lacking basic requirements in these areas will be required to make up such deficiencies by taking undergraduate courses for non-graduate credit.

- 510 Modern Methods in Pharmaceutical Analysis (5)
- 520 Special Topics in Pharmacy Law (2)
- 525 Introduction to Sociopharmacology (2)
- 530 Practice of Radiopharmacy (3)
- 540 Industrial Pharmaceutical Technology .. (4)
- 545 Sterile Parenterals and Devices (2-3)
- 595 Independent Problems in Pharmacy Administration (1-3)
- 612 Quantitative Pharmacodynamics. Pharmacokinetics (2)
- 620 Natural Products Chemistry (3)
- 622 Advanced Biopharmaceutics (2)
- 630 Pharmaceutical Rate Processes (3)
- 631 Equilibrium Phenomena in Pharmaceutical Systems. (3)
- 632 Pharmaceutical Disperse Systems. (3)
- 680 Research Methods in Social and Administrative Pharmacy (3)
- 760 Topics in Pharmaceutical Sciences (2-4)
- 762 Bioorganic Mechanisms. (3)
- 768 Residence Credit for the Master's Degree. (1-12)
- 769 Residence Credit for the Doctor's Degree. (0-12)
- 776 Seminar in Pharmaceutical Sciences I. (1)
- 778 Seminar in Pharmaceutical Sciences II. (1)
- 780 Special Problems in Pharmaceutical Sciences. (1-6)
- 790 Research in Pharmaceutical Sciences. (1-12)

Pharmacology

Graduate Faculty: Professors Louis Diamond, Donald F. Diedrich, K.C. Huang*, William R. Martin, Douglas Rees, T.G. Schariff, W.J. Waddell*, Associate Professors James Flesher, Edgar Iwamoto, Donald Jasinski (Adjunct), Ralph E. Miller and Mary Vore.

Associate Members: Associate Professor John Dougherty. Assistant Professors Michael Jay, Kip McGilliard and Michael Piascik.

Emeritus Professor: Helmut Gordon.

* Joint appointment with University of Louisville.

The Department of Pharmacology offers M.S. and Ph.D. degrees in Pharmacology.

Pharmacology is the study of drugs. Pharmacologists in modern society find careers as teachers, as scientists engaged in research of problems related to developing

new drugs, evaluating drugs for their efficacy and toxicity, as well as studying mechanisms of action.

Graduates from accredited colleges with bachelor degrees in the biological sciences, in chemistry, physics or pharmacy or with professional degrees in medicine, dentistry, veterinary medicine or pharmacy are eligible for candidacy for graduate degrees in pharmacology. It is advisable that the candidates have good basic training in mathematics, physics, chemistry and biological sciences. A major part of the Ph.D. program involves independent research under the direction of a member of the graduate faculty. Training can be obtained in neuropharmacology, psychopharmacology, drug metabolism, carcinogenesis, receptor mechanisms, toxicology, neuroendocrinology, cardiovascular pharmacology and problems related to drug abuse.

There is also a combined M.D./M.S. (in pharmacology) program available.

Only one modern foreign language is required for the Ph.D. degree in Pharmacology.

Inquiries concerning the details of the program as well as possible financial support for graduate students should be addressed to the Chairman of the Department of Pharmacology.

There is available a joint program in Pharmacology between the University of Kentucky and the University of Louisville. Inquiries relative to this program should be directed to the Department of Pharmacology.

Philosophy

Graduate Faculty: Professors Ronald Bruzina, Dallas High, Thomas Olshewsky and Alan Perreiah. Associate Professors Daniel Breazeale, James Manns and Henry Schankula.

Associate Members: Assistant Professors Robert J. Burkhardt, James Force, Daniel Frank, Don Howard, Patricia Milanich.

Emeritus Professor: Jesse de Boer.

The Department of Philosophy offers programs of study leading to both the Master of Arts and the Doctor of Philosophy degrees.

The M.A. program offers students a thorough training in the history and disciplines of philosophy as well as the skills of philosophical analysis and interpretation. The unspecialized M.A. program prepares students for more advanced philosophical study as well as for professional training in other fields. The M.A. program requires the completion of a minimum of 30 semester hours of course work and the completion of three comprehensive examinations. A reading knowledge of one foreign language is required. An undergraduate major in philosophy is not required for admission. Indeed, students who have a broad liberal arts education are encouraged to apply. However, remedy for deficient background in history of philosophy and logic must be undertaken upon entrance to the program.

The Ph.D. program in Philosophy is designed to prepare students for advanced research and professional work in many fields which link philosophy to other disciplines. Although the program will prepare some graduates for teaching positions, this is not its primary purpose. Rather it seeks to investigate and to apply philosophical methods to the problems and issues which arise across a variety of disciplines. Interdisciplinary research is thus the focal emphasis of the program. Students enrolled in the Ph.D. program are encouraged to take courses (up to one-third of their total hours) in other fields. Each student will follow an individually designed program of study under the supervision of the student's advisory committee. Each student will declare an area of specialization. A reading knowledge of one foreign language is required as well as competence in intermediate level logic. Students who

have already earned the M.A. degree should apply for direct admission to the Ph.D. program. Students desiring the Ph.D. degree, but who have not completed the M.A. degree, must earn the M.A. degree as a pre-requisite.

Physics and Astronomy

Graduate Faculty: Professors Marcel Coz, Fletcher Gabbard, Richard Hanau, George Hurst, Bernard Kern, Wasley Krogdahl, Guy Lehman, Alan MacKeller, Marcus McEllistram, Robert Stokes (Adjunct), Clasine Van Winter, Jesse Weil, Associate Professors John Christopher, Frank Clark, Lance DeLong, Peter Eklund, Moshe Elitzur, Gary Ferland, Robert Knight, Keh-fei Liu, Keith MacAdam, M.G. Payne (Adjunct), J.P. Straley and K.R. Subbaswamy.

Associate Members: Assistant Professors Joseph Brill, George Pepper and Thomas Troland.

Emeritus Professors: Lewis Cochran, Francis Yost.

The Department of Physics and Astronomy offers courses and research options leading to the Ph.D. degree in the special areas of astronomy and astrophysics, atomic and molecular physics, nuclear physics, and condensed matter physics, and leading to the M.S. degree in these areas and also in the special area of optics. Excellent laboratory facilities and library materials are available. A major experimental facility is the six-million volt Van de Graaff accelerator. More detailed descriptions of each of these options will be sent on request.

Plan A or Plan B may be used to satisfy the requirements for the M.S. degree.

The M.S. program emphasizes applied physics and students are encouraged to take courses in related areas such as engineering and biology when such courses fill a need in their academic objectives.

Candidates for the M.S. degree must demonstrate that they have the equivalent of four semesters of college level work in one modern foreign language.

The Ph.D. degree is a research degree granted on the basis of broad knowledge of physics and in-depth study in a specific area leading to a thesis reflecting original work by the doctoral candidate. A comprehensive examination is given to all students and a passing score on this examination admits a student to candidacy for the Ph.D. degree.

To be admitted to candidacy for the Ph.D. degree, students must demonstrate a reading knowledge in one foreign language. French, German, or Russian are acceptable languages; others may be used by special permission.

Candidates for Doctoral degrees may perform their thesis research work at the Lexington Campus of the University of Kentucky or arrangements may be made to do this work at other institutions or laboratories such as the Oak Ridge National Laboratory, the National Astronomical Radio Observatory or other places by special arrangement. A wide range of facilities is available in the fields of astronomy and astrophysics, atomic and molecular physics, nuclear physics, and condensed matter physics. Theoretical work is being pursued in all of these areas.

Physiology and Biophysics

Graduate Faculty: Professors Louis Boyarsky, Eugene Crawford, Joseph Engelberg, Donald Frazier, Ward Griffen, Henry Hirsch, Theodore Kotchen, Jesse Siskin, Bertram Peretz, Daniel Richardson, Paul Thornton, David Wekstein, Miroslava Winer, Fred Zechman, James Zolman. Associate Professors N.K. Burki, Coburn Ott, David Randall. Assistant Professor Sandra Legan.

Associate Members: Brian Jackson, Lu-Yuan Lee.
Emeritus Professor: James W. Archdeacon.

The graduate program, which offers both the M.S. and Ph.D. degrees, is designed to educate and train students to be competent research scientists and teachers of physiology and biophysics. The specific objectives are to provide students with: (1) an environment which promotes independent development and habits of lifelong scholarship, (2) a broad base of knowledge of the principles of molecular, cellular and organ-system physiology and biophysics, (3) the capacity to carry out independent research in an area of physiology or biophysics and, (4) experience and training in the teaching of physiology and biophysics.

To fulfill these objectives the program combines formal course work, independent reading, interaction with scholars at the tutorial level, and independent research including a dissertation.

Admission to the graduate program is competitive and is based upon academic background, professional recommendations, performance on the Graduate Record Examination, experience, and when possible, personal interviews. In general, one year of biology and physics, two years of chemistry, and mathematics through calculus are required. A course in statistics is strongly recommended.

In conjunction with the Colleges of Medicine and Dentistry the Department will consider for admission those qualified students who wish to pursue a combined professional and graduate program. In addition, special programs may be developed in biophysics and biomedical engineering.

Inquiries should be addressed to the Director of Graduate Studies.

Plant Physiology

Director of Graduate Program: Lowell Bush.

Graduate Faculty: Professors L.P. Bush, G. Cheniae, D.L. Davis, Dennis Egli, A.J. Hiatt, M.J. Kasperbauer, J. Kuc, J.E. Leggett, Harry Wheeler. Associate Professors T.R. Kemp. Assistant Professor W. S. Cohen.

Associate Member: Assistant Professors Paul Lin.

Emeritus Professor: William Duncan.

The University-wide, interdepartmental graduate program in Plant Physiology offers a plan of study leading to the Master of Science and Doctor of Philosophy degree. The aim of this program is to aid students in developing a high degree of excellence in plant physiology. Students in plant physiology will acquire academic backgrounds embracing basic areas of biology, chemistry, physics, and mathematics. These courses provide the foundation for delving into various areas of plant physiology.

Faculty members of the program are plant physiologists from the Thomas Hunt Morgan School of Biological Science in the College of Arts and Sciences and the Departments of Agronomy, Horticulture, and Plant Pathology in the College of Ag-

riculture. Areas of research pursued by the faculty members include plant growth and development, senescence, physiology of crop yield, metabolism and synthesis of alkaloids and steroids, photosynthesis, mineral nutrition, membrane ultra-structure, dwarfing mechanisms, the mechanism of action and metabolic fate of herbicides.

Course offerings in plant physiology are co-listed under the Thomas Hunt Morgan School of Biological Science and Departments of Agronomy, Horticulture, and Plant Pathology. Plant Physiology utilizes courses in the Departments of Biochemistry, Chemistry, Mathematics, and Statistics as supporting courses to suit the needs and interests of the individual student.

A program leading to the Doctor of Philosophy degree must conform to the general rules and regulations of The Graduate School. Reading proficiency in one foreign language is required, usually German, Russian, or French. A formal minor is not required. Contact the Director, N212D, Agricultural Science Center-North for additional information.

Political Science

Graduate Faculty: Professors Michael Baer, Bradley Canon, Vincent Davis, Maurice East, Malcolm Jewell, W.E. Lyons, Herbert Reid, Lee Sigelman, Sidney Ulmer, Kenneth Vanlandingham. Associate Professors Kenneth Coleman, Pamela Conover, Stanley Feldman, George Gadbois, Donald Gross, David Lowery, Karen Mingst, Daniel Nelson, Phillip Roeder, and Ernest Yanarella.

Associate Members: Assistant Professors William Berry, Kathleen Knight.

Emeritus Professor: Amry Vandenbosch.

Candidates for admission to the graduate program in political science must provide the information required by The Graduate School and must also submit at least two letters of recommendation from persons familiar with the applicant's academic performance. Students who do not have political science undergraduate majors are welcome in this program.

The Political Science Department offers both the M.A. and Ph.D. degrees. The

M.A. degree may be earned under either of two plans: Plan A requires at least 24 hours of course work and a thesis; Plan B requires at least 30 semester hours of course work and examination in three fields of political science, or in two fields of political science and one outside field. Under either plan, the student must take at least two-thirds of the required semester hours in political science, and at least half of the political science work must be in courses open only to graduate students. A candidate for the Plan B master's degree must pass a foreign language requirement or an analytical skills requirement.

The Practical Politics area is offered under Plan B. This area features skills necessary to participate in electoral politics or in the governmental process.

The Ph.D. program is divided into a general phase and a specialized phase. Entering students spend their first year in the general phase, which includes proseminars in methodology and in at least three major fields of political science. (Students who have previously taken graduate work may be exempt from some of these proseminars.) At the end of the first year of graduate work, the student is evaluated by a departmental committee which determines whether the general phase has been satisfactorily completed.

During the specialized phase of the graduate program, the students' work is based on a program prepared with the Advisory Committee. The students take advanced work in at least three substantive fields in political science and at least nine semester hours of course work in another discipline. The qualifying examination in political science consists of a written and oral examination in each of the three substantive fields specified in the student's program. The examination is given by the Advisory Committee. Following this examination the students write a prospectus for the dissertation and are examined orally on this by the Advisory Committee. The students then write a dissertation and defend it in a final oral examination.

Candidates for the Ph.D. in political science are required either to demonstrate a reading knowledge of two modern foreign languages or to meet that requirement in one modern foreign language and to demonstrate proficiency in an allied field contributing to research competence in political science. Research competence may be demonstrated by successfully completing at least six hours of course work in one or more allied fields, including statistics, computer sciences, and research methods

in another discipline.

Additional details concerning departmental requirements may be secured from the Department of Political Science.

Psychology

Graduate Faculty: Professors Robert Baker, Juris Berzins, Ronald Dillehay, Jesse Harris, Michael Nietzel and Arthur Nonneman, Thomas Zentall. Associate Professors Susan Belmore, Edward Engel, Donald McCoy, Caryl Rusbult, Douglas Snyder and James Spivey.

Associate Members: Professor Billie Ables. Associate Professor James Norton. Assistant Professors Michael Bardo, Teresa Bolick, Sandra Candy, Michael Hubbard, David Kravitz, Elizabeth Lorch, Robert Lorch, Carol Lowery, Stephen McKay and Thomas Widigor.

Joint Appointments: Professor John Haley, Russell Jones, James Zolman.

Emeritus Professors: James Calvin, Betsy Worth Estes, Edward Newbury, Frank Pattie.

The major goal of the doctoral program in psychology is to prepare the student for a career in teaching and research in the areas of clinical, behavioral and neural studies, cognitive studies, or social psychology. A master's degree in general psychology is also available.

The area of specialization in clinical psychology provides academic courses, practica, and internships which permit students to combine their teaching and research activities with a clinical career in the mental health field. Current areas of

research interest include psychotherapy, behavior therapy, psychopathology, group dynamics, community intervention, and experimental personality. Clinical experience is available at such facilities as the University of Kentucky Medical Center, the U.S. Veterans Administration Hospital, and various nearby state institutions. The clinical program is fully accredited by the American Psychological Association.

The behavioral and neural studies area provides a combination of formal course work and individualized training designed to produce research oriented psychologists who are capable of continuing productive scholarship and teaching in their chosen areas of interest. Emphasis is placed on theoretical treatments and empirical studies of fundamental learning processes and on the neurophysiological bases of behavioral change. Current research within the program includes operant, classical, and instrumental conditioning in several species, motivation, memory, animal intelligence, psychopharmacology, developmental psychobiology, and recovery from brain damage.

The area in cognitive studies attempts to prepare students for a career in teaching and research with a concentration in the fields of perception and cognition especially from a developmental point of view. The area has a strong theoretical emphasis within the framework of cognitive-developmental theory. Training combines formal proseminar and seminar learning experience with supervised research and teaching experience. A wide range of facilities and research opportunities exists within the department and adjunct facilities.

The area in social psychology is designed to provide intensive experience in research with members of the social psychology faculty, with the aim of developing in the student a strong theoretical and research competence with complex social phenomena. Traditions of both experimental laboratory research and naturalistic study are utilized; emphases include theoretical and applied significance of research. With broad limits set by the program, any given student's course of study is designed to fit that student's particular needs and interests. Course work in related behavioral sciences (for example, sociology, anthropology) is encouraged.

During the first year of the doctoral program, all students gain experience in the major content areas of psychology and in psychological statistics. Thereafter, the

student and the adviser construct a program of study consistent with the academic interests and professional goals of the student. A reading knowledge of one modern foreign language is required for Ph.D. candidates.

The M.A. or M.S. degree is awarded under Plan A only.

The minimum departmental standards for admission to graduate work in psychology include an undergraduate department over-all average of B or better, a satisfactory score on the verbal and quantitative aptitude of the Graduate Record Examination and three letters of recommendation. For additional information concerning the program in psychology and such matters as financial support, contact the Chairman, Department of Psychology.

Public Administration

Graduate Faculty: Professors Michael Baer, Merlin Hackbart, Donald Hochstrasser, Lee Sigelman. Associate Professors Philip K. Berser, Glenn Blomquist, Andrew Grimes, H.B. Milward, Phillip Roeder, Vernon Wiehe.

Associate Member: Professor Leslie Martin. Assistant Professors William Berry, David Lowery.

The Master of Public Administration program is located in the James W. Martin Graduate Center for Public Administration, an interdisciplinary academic research and service unit of The Graduate School of the University of Kentucky. The Center is headed by a Director and staffed by research and teaching faculty with joint appointments in various other University units, including the Departments of Political Science, Economics, Management, and the Colleges of Social Work, Education and the College of Allied Health Professions.

The MPA Program enables persons who are seeking careers in public agencies to acquire a multidisciplinary, professional and practical education appropriate to their goals. The program of study reflects the conviction that administrative processes in the public and private sector are

related, but different. A special effort is made to accommodate part-time students who are already involved in public sector careers.

The University of Kentucky's MPA Program has been found to be in compliance with the standards for the profession as articulated by the National Association of Schools of Public Affairs and Administration (NASPAA).

The MPA Program is designed to provide:

1. an Administrative Core of 27 semester hours which covers the areas of economics, finance, accounting control, management, research methods, public policy formulation and the political and legal environments of public administration; and,
2. an Area of Concentration of 21 semester hours, divided into a three-hour internship and 15 hours of course work in one of six areas of specialization: Health Administration; Higher Education Administration; Human Services Administration; General Government Administration; Public Financial Management or Urban and Regional Development Administration.

Students take a final comprehensive examination over the Administrative Core and their Area of Concentration course work. There are no thesis or language requirements. A limited number of research assistantships and fellowships are available for students with high academic standings.

For more information, please write Academic Program Coordinator, 409 Commerce Bldg., University of Kentucky, Lexington, KY 40506-0034.

Entrance Requirements

The MPA Program conforms with the general rules and regulations of The Graduate School. Students applying for admission to the program are expected to have an undergraduate grade point average equivalent to 2.5 or better and quantitative and verbal scores on the GRE or GMAT at approximately the 50th percentile; and a GPA of at least a 3.0 on all graduate work previously attempted.

Course Requirements

Completion of a minimum of 45 semester hours of graduate work is required.

Radiation Medicine

Graduate Faculty: Professors Frank Deland, Yosh Maruyama. Associate Professors John Calkins. Associate Professors Ralph Christensen and Guy Simmons.

Graduate educational programs in Radiation Medicine are closely allied with those in the Department of Health Radiation Sciences, College of Allied Health Professions. Course work deals with a study of the physical properties and characteristics of radiation, the effects of ionizing radiation upon matter and living organisms, and safety and protection considerations of radiation. Courses jointly listed with the Department of Physics and Astronomy deal with the Medical Physics in Diagnostic Radiation Physics, Therapeutic Radiation Physics and the Physics and Instrumentation of Nuclear Medicine. Courses jointly listed with Biological Sciences deal with the biological effects of ionizing radiation. Research and clinical training in a health-medical setting provides an opportunity for the student to observe the applications of radiation technology in medicine.

Graduate programs are detailed under Health Radiation Sciences, College of Allied Health Programs elsewhere in this Bulletin. Inquiries should be addressed to the Director of Graduate Studies.

Rehabilitation Counseling

Director, Ralph Crystal

Graduate Faculty: Associate Professors C. Dwight Auvenshine and Ralph Crystal.

Associate Member: Assistant Professor Barbara Witten.

The Graduate Program in Rehabilitation Counseling is an interdisciplinary program within The Graduate School of the University of Kentucky. The curriculum, in accordance with the guidelines of professional organizations in rehabilitation counseling, provides for flexible programming in response to individual student needs and interest. The curriculum is nationally accredited by the Council on Rehabilitation Education and fulfills national and Kentucky certification requirements in rehabilitation counseling. Program graduates are eligible to sit for the Rehabilitation Counseling Certification Exam.

The Program trains students to understand the physical, psychological, social, and economic needs of handicapped individuals in terms of vocational adjustment. Rehabilitation Counseling is a challenging and expanding profession. The rehabilitation counselor provides and coordinates services to persons with mental, physical, and social disabilities which interfere with productive functioning and independent living. The counselor must demonstrate competencies in establishing counseling relationships, assessment procedures, vocational placement, program planning and coordination; and have an awareness of professional and community resources that can be utilized in the rehabilitation program. Emphasis is placed on severe disability and its consequences, and independent living. Graduates of the program are employed in a wide range of public and private rehabilitation settings.

Course work and field work total a minimum of 45 credit hours if the student has a bachelor's degree in rehabilitation. The typical program for other students would be 54 hours, up to a maximum of 60 hours. At least 36 credit hours must be taken at the University of Kentucky. Courses are offered in the late afternoon and early evening to accommodate full and part time students. Students who attend the program on a full time basis can complete the program in 16 months.

The curriculum is composed of four levels of courses: prerequisites, basic core, advanced core, and support areas.

Prerequisites

It is assumed that most students entering the master's program will have a background in psychology, rehabilitation, or other social-behavioral sciences. The following courses or their equivalent must be taken prior to, or during the program:

EDP 605	Introduction to Counseling
RC 510	Orientation to Rehabilitation Resources

These courses are counted towards degree requirements.

Basic Core

The Basic Core courses or their equivalent are required for students with minimal exposure to the field of rehabilitation:

- RC 520 Principles of Rehabilitation Counseling
- RC 530 Psycho-Social Impact of Disability
- RC 512 Medical Aspects of Disability
- EDP 652 Theories of Counseling
- EDP 666 Psychology of Career Counseling

Advanced Core

Advanced Core courses or their equivalent are required for all students enrolled in the degree program:

- RC 620 Vocational Evaluation/Work Adjustment of the Severely Disabled
- RC 610 Case Management Techniques in Rehabilitation Counseling
- RC 630 Placement Services and Techniques for the Severely Disabled
- RC 710 Practicum
- RC 720 Internship
- RC 740 Administration and Supervision in Rehabilitation
- RC 750 Rehabilitation Research

Students who have taken any of the above courses or their equivalent will consult with faculty to waive the required course and substitute an approved elective.

Other Rehabilitation Courses

- RC 770 Special Topics in Rehabilitation Counseling
- RC 782 Directed Independent Study
- RC 760 Current Issues

Support Areas

A support area will be chosen by the student in conjunction with faculty advising. Students are encouraged to use their electives to develop "support areas." Support area is defined as a group of three or more courses, focusing on one theme, to enhance specific skills or knowledge related to rehabilitation.

Courses comprising a support area may be offered by one or more departments. Support areas available through interdisciplinary planning include: learning disabilities, gerontology, mental health, administration and management, family studies, research and evaluation, group counseling, policy and planning, criminal justice, hearing impairment, visual impairment, recreation and advocacy. Cooperating disciplines include Educational and Counseling Psychology, Social Work, Special Education, Sociology, Public Administration, Family Studies, Psychology, Therapeutic Recreation, and Allied Health.

Advancement to Candidacy

Advancement to Candidacy will be considered after the student has completed the first semester (full time) of graduate study or when the student has completed 12 hours of graduate study. The decision to advance to candidacy includes successful completion of the candidacy exam, demonstrated skill in academic areas, and a judgment by the faculty that the student possesses the personal and social characteristics necessary for providing professional rehabilitation counseling services.

Field Work

The first field work component is a three credit Practicum, which consists of 180 clock hours of supervised experience in a rehabilitation or rehabilitation-related setting, a weekly seminar, and individual supervision. The Practicum is generally offered during the eight-week summer session. A student must be admitted to candidacy prior to enrolling in Practicum.

In accordance with the national accreditation requirements, students must then complete 600 clock hours of supervised Internship in a rehabilitation or rehabilitation-related setting. Every student registered for Internship will also participate in a weekly seminar and supervision. Internship is three credits per 200 clock hours, and may be taken in the summer, fall, or spring semesters following Practicum. The Internship may be taken in one semester, or may be split into two semester.

Students must successfully complete their Internship, and demonstrate competence in working with disabled individuals in the context of a professional rehabilitation counseling relationship.

A final written examination is given at the completion of all course work. Graduation is predicated upon the successful completion of this examination.

Social and Philosophical Studies in Education

Graduate Faculty: Professor David Denton. Associate Professors Clint Collins, Alan DeYoung, Willis Griffin and Richard Labrecque.

Associate Members: Associate Professor Richard Angelo.

The faculty of the Department of Social and Philosophical Studies in Education is engaged in the systematic analysis and interpretation of education using appropriate knowledge and methodologies of the humanities and social sciences. Their efforts are directed to (1) developing teachers and researchers with special competencies in social and philosophical studies, (2) assisting in the preparation of educational personnel, (3) contributing research based on special interests, and (4) changing and improving education through active participation in redirection and reform. The Department seeks to develop competencies which assist the student in approaching education more rationally, critically, responsibly, and enthusiastically.

Graduate students may expect to develop special competencies through college course offerings, independent studies, and

other experiences. In addition, students will be expected to pursue appropriate studies in other University colleges and departments to broaden their disciplinary perspectives and/or to gain greater depth and scholarship. The Department represents a link between the humanities and social sciences and the preparation of professional educator. It seeks the broadest perspective on education as a crucial arena of human endeavor.

The Department of Social and Philosophical Studies offers programs leading to the following degrees: Master of Science in Education, Master of Arts in Education (Plans A and B available), Specialist in Education (Ed.S.), and Doctor of Education (Ed.D.). The Department participates in a joint doctoral program (Ph.D.) in Studies in Higher Education with the Department of Higher Education. The Department also participates in a joint doctoral program with regional universities. A minimum of 31 hours is required for the Master of Science of Education degree, six of which may be thesis credit and six of which must be taken outside the College of Education. The primary difference between this degree and the Master of Arts in Education degree is that the latter requires a minimum of 12 hours outside the College of Education.

Social Work

Graduate Faculty: Professors Ronda Connaway, S. Zafar Hasan, Constance P. Wilson. Associate Professor Kennard W. Wellons, Vernon Wiehe.

Associate Members: Professor Dorothy A Miller. Associate Professors Richard K. Brautigam, Martha E. Gentry, Elizabeth Kirlin, John Landon and Maryrhea Morelock. Assistant Professor Lauretta Byars.

Emeritus Professors: Professors Harold E. Wetzel, Ernest F. Witte.

The College of Social Work publishes a bulletin explaining the total program. Please write College of Social Work, Patterson Office Tower, University of Kentucky.

The College of Social Work offers a graduate curriculum of four semesters duration, leading to the Master of Social Work degree in accordance with Plan B. The MSW degree program is designed to prepare students for careers in the social professions. The College also offers a series of courses in its undergraduate social work program which may be taken for graduate credit by graduate students in other majors.

Students must meet the general requirements of The Graduate School, as listed elsewhere in this Bulletin, as well as other specific requirements of the College of Social Work for the Master of Social Work degree as indicated below.

1. Earn 54 hours of credit with a grade-average of B or above. Forty of these credits must be in the required social work courses. Four credits will be chosen from additional courses offered within the graduate social work curriculum of the College of Social Work. The remaining 10 credits may be elected from relevant courses offered throughout the University or by the College of Social Work.

Advanced standing of up to thirteen credit hours may be granted in the Master of Social Work program to graduates of undergraduate social work programs accredited by the Council on Social Work Education as follows:

- a. They be permitted to substitute SW 611—Social Work Practice II (3) and SW 631—Social Welfare Policy Implementation (3) for SW 601—Social Work Practice (4), SW 620—Human Growth and the Social Environment (4), and SW 630—Social Welfare Policies and Services (4).

- b. They may be admitted to SW 651—Research Practicum (2), waiving SW 650—Research in Social Work (2).
- c. They be admitted to the second half of SW 640—Graduate Educational Practicum I for four credit hours, waiving the first half of SW 640 for four credit hours.
- d. Advanced standing be granted on an individual basis, depending on a student's undergraduate work as follows:
 - (i) Advanced standing in various curriculum areas be given only if the students have had appropriate courses in their undergraduate programs.
 - (ii) Advanced standing be given only in curriculum areas for undergraduate courses with a minimum of "B" grade.

2. The MSW degree requires 54 credit hours, at least 28 of which must be taken at the University of Kentucky. Advanced standing of up to one year or 26 credit hours may be granted for work completed at a school accredited by the Council on Social Work Education.
3. Advance to degree candidacy by the end of the first year of graduate study. In order to be a degree candidate the student must be admitted to candidacy for the master's degree by The Graduate School and have completed the College of Social Work advancement-to-candidacy review.
4. Successfully complete the final comprehensive examination. This examination consists of an intensive review with students of the total two year education program to determine their potential capacity for professional practice.

The M.S.W. degree program is accredited by the Council on Social Work Education.

Full-time students are admitted to the M.S.W. degree program in the fall and spring semesters. Applications for admission to the M.S.W. program should be filed on prescribed forms both with the College of Social Work and The Graduate School.

Sociology

Graduate Faculty: Professors James Brown, James Christenson, Richard Clayton, C.M. Coughenour, Thomas Ford, Eugene Gallagher, Thomas Garrity, William Kenkel, Jon Shepard, John Stephenson, Robert Straus, Harwin Voss, George Wilber. Associate Professors Walter Abbott, Dwight Billings, Lawrence Busch, Alan DeYoung, Billie DeWalt, Jon Hendricks, James Hougland, William Lacy, Philip Moody, Charles Perry, Gerald Slatin and Ann Tickamyer.

Associate Members: Professor Paul Warner. Associate Professors Michael Brooks, Lorraine Garkovich, Kenneth Pigg. Assistant Professors Janet Bokemeier, David Dickens, Robert Goldmen, Sandra Tausend, William Turner.

Emeritus Professors: Howard Beers, A. Lee Coleman, James W. Gladden, Willis A. Sutton, Jr., Grant Youmans.

Graduates from accredited colleges who meet the requirements of the Graduate Program in Sociology and The Graduate School may work toward the following advanced degrees with major work in sociology: Master of Arts, Master of Science in Agriculture, and Doctor of Philosophy. Both Plan A and Plan B are offered for the Master's degree, and an applied community development option is now available within Plan B. Only one modern foreign language is required for the Ph.D. degree in sociology.

Graduate students pursuing the Ph.D. degree are expected to choose either two specialty areas within sociology or one specialty area in sociology and a minor area outside the Department. Areas of specialization in sociology currently stressed are: community, demography-ecology, deviance, family, medical sociology, rural, social change and development, social gerontology and Appalachian Studies. A doctoral program in applied social research has recently been introduced. While core seminars in these specialties are offered, individual program flexibility is maintained so that a student's own interests may develop.

To aid in financing graduate education a considerable number of assistantships

are available to qualified students. Outstanding students may compete for fellowships.

Sociologists at the University of Kentucky carry on a substantial variety of research projects, consultative activities, extension education programs and community services. Specialized experience and training are available to graduate students through affiliations with nearby institutions.

Research opportunities within the prisons and other correctional institutions of the state may be arranged. Experience is available in rural sociological research at the Agricultural Experiment Station. Opportunity for applied sociology experience in the Cooperative Extension Service is also available.

The Department participates in the University's Center for Developmental Change, which is devoted to interdisciplinary research and training in planned change. Department members are also involved in interdisciplinary research projects sponsored by the University's Appalachian Center. The Department of Behavioral Science, College of Medicine, includes sociologists on its staff and conducts research and other activities of a sociological nature. Sociology graduate students with appropriate interests and training are eligible for assistantships and other appointments in these several units.

Department standards for admission to graduate work in sociology are similar to those of The Graduate School, including satisfactory scores on the verbal and quantitative tests of the Graduate Record Examination. For additional information on departmental requirements and opportunities for financial assistance, write to the Director of Graduate Studies in Sociology.

Soil Science

Graduate Faculty: Professors H.H. Bailey, R. I. Barnhisel, R.L. Blevins, A.J. Hiatt, H.F. Massey, D.E. Peaslee, R.E. Phillips, J.L. Ragland, J.L. Sims, G.W. Thomas. Associate Professors Wilbur Frye, George Coltharp.

Associate Member: Extension Professor Kenneth Wells. Assistant Professors John Grove, Charles Macknawn (Adjunct), Scott Smith.

Emeritus Professor: W.G. Survant.

The Soil Science graduate program offers graduate work leading to the Master of Science, Master of Science in Agriculture, and the Doctor of Philosophy degrees with areas of specialization in soil chemistry, soil fertility, soil genesis, morphology and classification, soil mineralogy, soil microbiology and soil physics. For the M.S. degree, 24 hours of course work plus an acceptable thesis are required (Plan A). In certain exceptional cases, the thesis may be replaced by six additional hours of course work. Work leading to advanced degrees must conform to the general rules and regulations of The Graduate School. A reading knowledge of one foreign language is required for the Ph.D. degree.

Preparation for graduate work in Soil Science should include some course work in mathematics, chemistry, physics and biological sciences. Students with deficiencies in any of these areas will be expected to make up any deficiency early in the course of their graduate study.

Spanish and Italian Languages and Literatures

Graduate Faculty: Professors John Allen, Brian Dendle, Joseph Jones, Margaret Jones, John Keller, John Lihani, Daniel Reedy, Gerardo Saenz. Associate Professors Michael Impey and Edward Stanton.

Associate Member: Assistant Professor Laurence Prescott.

Emeritus Professor: Alberta Wilson Server.

The Department of Spanish and Italian offers the Master of Arts and the Doctor of Philosophy degrees. Graduate Record Examination scores are required for admission.

MASTER OF ARTS DEGREE

Prerequisites: Attainment in Spanish equivalent to that required for the undergraduate major in Spanish at the University of Kentucky.

Requirements: Standard Graduate School requirements; reading knowledge of a second foreign language; successful completion of 30 hours of course work (Plan B), or successful completion of 24 hours of course work and an acceptable thesis (Plan A). The M.A. written examination is designed to test the candidate's knowledge of the following areas: 1) Hispanic civilization and literary history, 2) the M.A. reading list, and 3) the candidate's composite course work. SPI 502 (Survey of the Spanish Language) is recommended but not required. For individuals who contemplate further work leading to the doctorate, SPI 651 (Bibliography and Methods of Research) is recommended but not required.

DOCTOR OF PHILOSOPHY DEGREE

Recommendations and Requirements: Standard Graduate School requirements; SPI 502 (Survey of the Spanish Language), SPI 601 (Old Spanish I), SPI 602 (Old Spanish II); SPI 651 (Bibliography and Methods of Research) are recommended but not required; a reading knowledge of two languages other than Spanish and English is required; successful completion of written and oral examinations is required for qualification for candidacy for the doctorate (see remarks below); presentation of acceptable dissertation. All candidates for the doctorate are asked to declare an area of special compe-

tence, either generic or periodic. It is assumed that the candidates' record will reflect more course work in this area.

Doctoral candidates may choose to organize their special studies either by traditional area-divisions or by genre.

Organization by area: (1) Hispanic linguistics; (2) Medieval Spanish literature and civilization; (3) Renaissance and Golden Age Spanish literature and civilization; (4) Modern Spanish literature and civilization; and (5) Spanish American literature and civilization.

Generic specialization: (1) Hispanic drama; (2) Hispanic prose fiction; (3) Hispanic poetry; (4) Hispanic non-fiction prose and civilization; and (5) Hispanic linguistics.

The term Hispanic includes both Peninsular and Spanish American studies.

The qualifying examinations consist of three written eight-hour examinations (two on all aspects of Hispanic Language, Literature, and Culture, and one on the area of special competence and related material) and a two-hour oral examination.

Special Education

Graduate Faculty: Professors Edward Blackhurst, Melton Martinson, Charles M. Nelson. Associate Professors William Berdine, Barbara Culatta, Richard Culatta, David Gast.

Associate Members: Associate Professor Donald Cross. Assistant Professors Charlotte Clark, James Dworkin, Carol Englert, George Sugai and Mark Wolery.

Students may enroll for either degree or certification graduate programs in special education. Programs not leading to a degree are designed primarily for those who are seeking Kentucky Provisional, Rank II or Rank I Teacher Certification at the graduate level in the following certification areas:

1. Learning and Behavior Disorders
2. Speech Pathology
3. Trainable Mentally Handicapped
4. Severely/Profoundly Handicapped
5. Director of Special Education

Previously certified special education teachers may pursue the standard teaching certificate by selecting an area of emphasis in one of the following:

- Early Childhood Education for the Handicapped
- Severely/Profoundly Handicapped
- Career Education for the Handicapped
- Speech Pathology
- Special Education Resource Teaching (Mildly Handicapped)
- Severe Learning and Behavior Disorders
- Trainable Mentally Handicapped

Programs leading to Kentucky certification as Special Education Teacher Consultant and Special Education Diagnostician are currently being developed.

The Degree programs that are offered lead to the Master of Arts in Education or Master of Science in Education, Specialist in Education and Doctor of Education Degrees. Within the framework of College and University requirements, all graduate degrees are individually planned. This flexibility makes it possible to structure an appropriate program for each student, based upon previous background and career aspirations. Following are brief descriptions of the various graduate degree programs.

To be admitted to candidacy for a Master's degree, the following criteria must be met:

1. Grade-point average of 3.0 on at least 12 semester hours of course work, six of which must be at the 600 level or above, excluding practicum.
2. Recommendation by at least one member of the Graduate Faculty.
3. A completed program plan.

4. No incomplete grades.
5. Successful performance on an objective test covering basic concepts in special education or a grade of B on a Graduate level survey of special education course.

Minimum requirements for the Master of Arts in Education Degree (Available only to Speech Pathology Students) are distributed as follows:

Special Education	12
Electives in Education	6
Course work outside the College of Education	12
Minimum hours for the Master of Science in Education Degree are distributed as follows:	

Department of Special Education and support areas in College	24
Course work outside College of Education	6
Total	30

It should be noted that these are minimum requirements. Most programs of study exceed the minimums. The Director of Graduate Studies should be contacted to obtain the specific number of courses required for each program of studies.

At least 15 semester hours must be earned in courses at the 600-700 level (excluding practica) and a comprehensive final examination is required.) All students are also required to take one course in either statistics, methodology of educational research, or single subject research design. Students must also take a course in humanistic studies. With the exception of speech pathology students, a thesis is required of all Master's degree students.

Students entering without a teaching certificate must meet deficiencies, including certification requirements, as outlined by their adviser, in addition to completing the degree requirements listed above. Depending on their educational background, students may obtain Rank II Certification concurrently with their Master's Degree. Students preparing for positions not requiring certification may petition for waiver of certification requirements upon application for admission to the program.

Candidates for the Master of Arts in Education or Master of Science in Education degree with concentration in speech pathology are expected to meet the academic and clinical requirements established by the American Speech and Hearing Association for the Certificate of Clinical Competence. Briefly, these requirements include: (1) a total of 60 semester hours of study, of which, at least 30 must be courses acceptable toward a graduate degree; and (2) 300 clock hours of supervised, direct clinical experience with individuals presenting a variety of communication dis-

orders, of which at least 150 hours must be obtained at the graduate level. Master of Arts in Education or Master of Science in Education candidates in speech pathology must complete a minimum of 12 semester hours from the 600-700 level courses in speech pathology and audiology listed under special education. Successful completion of a comprehensive examination in speech pathology is also required.

General requirements for the Specialist in Education (Ed.S.) degree have been described in a previous section of this Bulletin. Ed.S. programs are individually planned for in-depth study in an area of special education. Students who hold a Kentucky Rank II Certification are awarded Rank I Certification upon completion of this degree.

The Doctor of Education (Ed.D.) program is designed to prepare leadership personnel for the field of special education. Although various programs of study can be planned, primary emphasis is placed upon training persons for positions in higher education and administration of special education programs. The requirements for this program are described in the Doctor of Education Section.

Two major types of financial assistance are available, on a competitive basis, to graduate students in special education.

1. Students may apply for graduate assistantships at all levels of graduate study. These are awarded from funds granted to the Department by the Office of Special Education, U.S. Department of Education.
2. WHAS Crusade for Children traineeships for full-time study during summer school are available only to Kentucky teachers who are in the process of obtaining Provisional or Standard Certification in an area of special education.

Assistantships and traineeships are awarded on the basis of (1) commitment to the field, as evidenced by previous work experience, references, and/or volunteer service; (2) prior academic record; and (3) financial need. Applications for financial assistance may be obtained from the Departmental Director of Graduate Studies.

Statistics

Graduate Faculty: Professors David Allen, Richard Anderson, Vasant Bhaskar, Paul Cornelius, Joseph Gani, Zakkula Govindarajulu, Harley McKean, Peter Purdue. Associate Professors David Allen and Constance Wood.

Associate Members: Assistant Professors William Griffith, Shailendra Menjoge, Soo Peter Quyang, Cidambi Srinivasan.

Joint Appointments: Professors Richard Anderson and Paul Cornelius.

The Department of Statistics offers programs of study leading to the degrees of Master of Science (Plan A or B available), and Doctor of Philosophy. The M.S. degree is professionally oriented for the student who plans a career in government, business or industry. The Ph.D. program offers a broad training in both statistical theory and methods while affording options to suit the student's interests. The statistics Ph.D. is well suited for academic, business, government and industrial positions. In addition to formal course work and research training the advanced student has opportunities to gain valuable practical experience by participating in consulting activities under faculty supervision.

Course work is available in areas associated with statistics such as biological modelling, computer science, control theory, econometrics, mathematics and operations research.

A student intending to pursue graduate work in statistics should have one course

each in advanced calculus (equivalent of Mathematics 432 or 471) and matrix algebra (equivalent of mathematics 462) for the first year's graduate courses. If possible, mathematical deficiencies should be corrected during the summer prior to entering The Graduate School.

Students with an undergraduate major in any of the mathematical, physical, biological, social or applied sciences are encouraged to apply.

The University of Kentucky is represented on the Committee on Statistics of the Southern Regional Education Board.

MASTER'S PROGRAM

The Department offers the degree of Master of Science with (Plan A) or without (Plan B) a thesis. The core curriculum expected of all master's students consists of the following courses:

STA 503	(3)
STA 524	(3)
STA 531	(4)
STA 601	(3)
STA 603	(4)
STA 624	(3)

Programs of study for Plan B require a total of at least 35 semester hours, which should include the equivalent of the six courses in the core curriculum and at least 15 additional credit hours. Of these 15 credit hours, at least 6 should be from the following list of statistics courses:

612, 616, 621,
643, 644, 661, 665

Programs of study for Plan A (with thesis) require a total of at least 29 semester hours, which should include the core curriculum and at least two courses from the previous list. Candidates should also satisfy the requirement that at least 18 hours for Plan B and 15 hours of non-thesis courses for Plan A must be at the 600 level or higher. The free electives courses can be selected from a variety of courses both within and outside the Statistics Department. Before the end of the second semester, the M.S. candidate must present a proposed plan of study for approval by the Director of Graduate Studies. There are no formal minor requirements.

All Master's candidates are required to take a Departmental written examination on the core curriculum. These exams are normally administered in January.

DOCTORAL PROGRAM

The doctorate is a research degree that demonstrates independent and comprehensive scholarship and is granted on the basis of broad statistical competence and

the exhibition of creative ability. There are thus two components to the doctoral program: 1) A comprehensive program of probability, statistics and related courses, and (2) In depth research in a particular area and the preparation, under faculty supervision, of a dissertation.

The Ph.D. program requires a total of 59 credit hours of course work. The core curriculum consists of the following courses:

STA 503, STA 524, STA 531, STA 601, STA 603, STA 701, STA 702, STA 703, STA 704, MA 571 and an additional two courses selected by the Director of Graduate Studies.

A student will normally require two years of study to complete the core requirements. Beyond the core, the student must take at least 18 credit hours at the 600-700 level of which at least 9 hours must be in Statistics courses including 3 hours of STA 690. A reading knowledge of one foreign language is required of all Ph.D. students.

A student must pass the Master's examination at a Ph.D. level of performance to be eligible for the doctoral qualifying examination. The qualifying examination consists of two parts: Part I is a common written examination taken by all Ph.D. students, Part II is an oral examination administered to each student individually by the student's Advisory Committee. The written part of the qualifying examination consists of three areas:

Area 1: STA 524, STA 703, STA 704, MA 571

Area 2: STA 531, STA 601, STA 701, STA 702

Area 3: STA 503, STA 603 and two additional courses selected by the Director of Graduate Studies

A student must demonstrate competence in 2 of the 3 areas.

When a student passes the qualifying examination the Advisory Committee, under the leadership of the students' Major professor, supervises the subsequent specialized program of study that culminates in the preparation of the doctoral dissertation.

Areas of current research interest are:

a) Mathematical statistics including Statistical Inference, Categorical data analysis, non parametric models, asymptotic theory, sequential analysis, decision theory.

b) Statistical Analysis and Design

including the design of experiments, variance components models, linear and non-linear models.

- c) Stochastic Processes including applications of probability in biology, queueing and storage systems, reliability.

All students, master's and doctoral, will be required to take part in an internship program. This will usually consist of teaching (three of six semester hours) or an equivalent amount of work in the Mathematical Sciences Laboratory.

Theatre

Graduate Faculty: Professors James W. Rodgers.

Associate Member: Assistant Professor Rhonda Blair.

Theatre lives at the moment of contact between actor and audience. This Department expects its graduate students to approach that moment from several points: historical, critical, practical, theoretical and experimental. Within this framework, each candidate for a Master of Arts degree must complete a minimum of 30 semester hours. A maximum of six of these may be taken in allied subjects. Graduate students are encouraged to concentrate in one of the following areas: acting, directing, design, production.

It is assumed that a student who seeks a Master's degree in the Department of Theatre will have had courses approximating those required for an A.B. degree with a major in theatre arts. If not, the student must remove the deficiency by taking (without graduate credit) courses in addition to those normally specified for the Master's degree.

The Department offers the Master's degree according to Plan B only at the present time.

Toxicology

Graduate Faculty: Professors Charles Ambrose, Wesley Birge, Douglas Dahlman, Daniel Davis, Louis Diamond, Donald Diedrich, George Digenis, H.W. Dorough, William Lyons, Gerald Rosenthal, P.S. Sabharwal, Malcolm Siegel, Thomas Tobin, William Waddell, Ralph Wiseman. Associate Professors Jerry Blake, John Calkins, S.K. Chan, Ralph Christenson, Steadman D. Harrison, Jr., Edgar Iwamoto, William Lubawy, Russell G. McAllister, Shelton Steiner, Mary Voro, Shu Y. Yeh.

Associate Members: Associate Professors John Dougherty, Louis Newman. Assistant Professors Harry G. Enoch, Peter R. Oelsten, Robert Yokel.

Toxicology is a science concerned with the harmful interactions of chemical agents with living systems. The Graduate Program in Toxicology is designed to train individuals to utilize the biological, physical, and mathematical sciences in the study of the causes, mechanisms, and evaluation of poisoning as well as the sources, identification and quantitation of poisons.

The Graduate Program in Toxicology is administered by the Graduate Center for Toxicology, headed by a director and staffed by faculty with primary appointments either in the Center or in various departments of the Medical Center, the College of Agriculture and the School of Biological Sciences. Both the M.S. (Plan A and Plan B) and Ph.D. degrees are offered.

While an interdisciplinary program is located administratively in The Graduate School, great care is taken to assure that graduate students receive training that qualifies them as competent toxicologists rather than as specialists in only one or two of the many areas which are integral parts of toxicology. However, competencies in special sub-disciplines of toxicology are expected of all students and are developed through independent study, course offerings and, most important, by conducting research under the direction of the toxicology faculty.

Applicants should have strong undergraduate preparation in chemistry, biology and mathematics. Applicants should be graduates of accredited colleges with an appropriate baccalaureate degree (e.g. chemistry, biological sciences, etc.), hold a minimum grade-point average of 3.0 on a 4.0 scale, and have a combined Graduate Record Examination score (verbal plus quantitative) of at least 1100. Applicants with lesser qualifications normally will be accepted only if personally recommended by a member of the toxicology faculty who is willing to serve as the student's research adviser.

Eligibility for admission to The Graduate School does not insure admission to the toxicology program. Each applicant is considered individually and acceptance into the program depends a great deal on the interest of the applicant and the program's ability to provide training within that particular area of interest. Students with interests beyond the training capabilities of the program are not encouraged to enter the program even if exceptionally qualified academically.

A minimal core curriculum is compulsory, while the total curriculum will be tailored to meet individual needs. Only one modern foreign language is required for the Ph.D. degree in Toxicology.

The Toxicology Graduate Program is included in the Academic Common Market of the Southern Regional Education Board.

Veterinary Science

Graduate Faculty: Professors John Bryans, J.H. Drudge, Robert Loy, E.T. Lyons, W.H. McCollum, T. W. Swerczek and Thomas Tobin. Associate Professors George Allen, Jerry Blake and Peter S. Timoney.

Associate Members: Assistant Professors Ernest Bailey and Robert Douglass.

The Department of Veterinary Science offers a program of study and research leading to the Master of Science (Plan A only) and Doctor of Philosophy degrees. Possible areas of concentration are comparative pathology, parasitology, reproductive physiology, pharmacology and toxicology, immunology and virology. The program is designed for individuals with the Doctor of Veterinary Medicine degree who desire research training in one of the above areas and for qualified graduates of accredited undergraduate institutions. Individuals electing pathology as their area of concentration must be graduate veterinarians. Individual programs of study must conform with the general rules and regulations of The Graduate School.

A limited number of research assistantships and fellowships are available.

Vocational Education

Graduate Faculty: Professors Herbert Bruce, Charles Byers, Clayton Omvig. Associate Professors David McMurtry, Elaine Uthe.

Associate Members: Professor Jack McElroy. Associate Professors Kawanna Simpson, Rodney Tulloch.

Emeritus Professor: Harold Binkley, Bernard Fagan, Carl Lamar, Leonard McDowell, Vernon Musselman.

The Department of Vocational Education offers programs leading to the Master of Arts in Education in the areas of business education and distributive education and the Master of Science in Education in the other areas (Plan A and Plan B available), the Specialist in Education (Ed.S.) degree, and the Doctor of Education (Ed.D.) degree. These advanced degree programs are designed to prepare candidates for leadership positions in vocational education—administration, curriculum, teacher education, research, and vocational guidance.

In addition, the Department offers programs leading to: (1) the professional certification of administrators, coordinators, and supervisors in vocational education and (2) certification of master's equivalent for Rank II classification (for Kentucky salary purposes) for teaching.

For further information, write the Department of Vocational Education.

MASTER'S DEGREE PROGRAMS IN VOCATIONAL EDUCATION

For a master's degree in vocational education (agricultural education, business education, distributive education, home economics education, industrial education, or vocational education) a minimum of 30 semester hours must be taken with a minimum of 12 hours of graduate work in professional education. At least 12 semester hours shall be taken from three of six areas—I through VI. This program qualifies the teacher for a Standard Certificate if he has completed a four-year undergraduate curriculum.

ALL PROGRAM SERVICE AREAS

Area II: Research	EDP 522, EDP 656, and EDP 557.
Area III: Advanced Study in Human Development	SOC 521, SOC 542, EDP 600, EDP 739, EDP 759.

Area IV: Psychology of Learning
PSY 540, EDP 548, and EDP 658.

Area VI: Foundations in Education
EDF 640, EDF 645, EDF 651, EDF 655, and EDF 661 (SOC 661).

AGRICULTURAL EDUCATION

Area I: Curriculum Development
EDV 672, EDV 678, and EDC 732.

Area V: A Seminar in Instruction Devoted to Method in Teaching
EDV 670, EDV 671, EDV 675, EDV 679, EDV 680, EDV 681, EDV 682, EDV 695, EDV 779, and EDV 789.

BUSINESS EDUCATION

Area I: Curriculum Development
EDV 615, EDV 626, EDV 678, EDC 714, and EDC 732.

Area V: A Seminar in Instruction Devoted to Method of Teaching
EDV 511, EDV 512, EDV 615, EDV 618, EDV 695, EDV 779, and EDV 789.

DISTRIBUTIVE EDUCATION

Area I: Curriculum Development
EDV 517, EDV 678, and EDC 732.

Area V: A Seminar in Instruction Devoted to Method of Teaching
EDV 516, EDV 526, EDV 610, EDV 670, EDV 671, EDV 695, EDV 779, and EDV 789.

HOME ECONOMICS EDUCATION

Area I: Curriculum Development
EDV 678, EDV 685, and EDC 732.

Area V: A Seminar in Instruction Devoted to Method of Teaching
EDV 670, EDV 684, EDV 686, EDV 687, EDV 695, EDV 779, and EDV 789.

INDUSTRIAL EDUCATION

Area I: Curriculum Development
EDV 678 and EDC 732.

Area V: A Seminar in Instruction Devoted to Method of Teaching
EDV 516, EDV 518, EDV 529, EDV 537, EDV 670, EDV 693, EDV 695, EDV 779, and EDV 789.

VOCATIONAL EDUCATION

Area I: Curriculum Development
EDV 517, EDV 672, EDV 678, EDV 685, and EDC 732.

Area V: A Seminar in Instruction Devoted to Method of Teaching
EDV 516, EDV 518, EDV 528, EDV 615, EDV 670, EDV 693, EDV 695, EDV 779, and EDV 789.

THE Ed.S. AND DOCTORAL (Ed.D.) DEGREE PROGRAMS IN VOCATIONAL EDUCATION

For information, write the appropriate

director of graduate studies in the Department of Vocational Education. See Graduate School section of Bulletin.

CERTIFICATION OF ADMINISTRATORS, SUPERVISORS AND COORDINATORS OF VOCATIONAL EDUCATION

For certification as an administrator, coordinator, or supervisor of Vocational Education the student must complete a minimum of 15 semester hours of graduate level courses above and beyond the course requirements for the 10-year teaching certificate. Courses are to be selected from those listed below, including at least one course in each of the four curriculum areas.

CURRICULUM AREAS AND COURSES

I. Organization and Administration of Vocational Education

- EDV 535 Principles and Philosophy of Vocational Education (2)
EDV 694 Administration of Vocational Education (3)
EDV 779 Seminar in Vocational Education (1-3)

II. Administration and Supervision of Education Personnel

- EDA 633 Administration and Supervision of Instructional Programs (3)
EDA 634 Administration of Educational Personnel (Required in this Area) 3
EDV 608 Internship in Vocational Education 6
EDV 693 Supervision in Vocational Education 3

III. Program Planning, Research, and Evaluation in Vocational Education

- EDV 529 Evaluation in Industrial and Distributive Education 2
EDP 656 Methodology of Educational Research 3
EDP 660 Research Design and Analysis in Education 3

IV. Vocational Guidance, Industrial Psychology, Human Relations

- EDV 523 Vocational Guidance 2-3

- EDV 702 Career Development, Research Theories and Practice 2-3
PSY 502 Introduction to Industrial Psychology 3
PSY 503 Psychology of Industrial Personnel Procedure 3
PSY 545 Small Group Behavior 3
SOC 521 Industrial Sociology 3
SOC 542 Human Relations in Administration 3

For information about the certification program, contact the Director of Graduate Studies.

AGRICULTURAL EDUCATION

- 580 Materials and Methods for Teaching Vocational Agriculture (3)
581 Adult-Farmer Schools and Young-Farmer Courses in Agriculture (3)
583 Experience Programs in Vocational Agriculture (3)
672 Determining Content in Vocational Agriculture (3)
679 Adult Education in Agriculture (3)
680 Directing Occupational Experience in Agriculture (3)
681 Teaching Farm Shop (3)

BUSINESS EDUCATION

- 511 Teaching Secretarial Subjects (3)
512 Teaching Bookkeeping and Accounting .. (3)
513 Teaching Typewriting and Clerical Practice (3)
514 Teaching General Business Subjects in the Secondary Schools (3)
615 Problems in Business Education (3)
618 The Social Business Subjects in High School (3)
623 Administration and Supervision of Business Education (3)
626 Classification and Possible Use of Community Resources in Business Education (3)
640 Advanced Methods in the Secretarial Subjects (3)

BUSINESS AND OFFICE EDUCATION

(BOE is the abbreviation for these courses.)

- BOE 519 Records Management (3)
BOE 556 Business Reports and Communications (3)

HOME ECONOMICS EDUCATION

- 586 Teaching Home Economics in the Secondary School (3)

- 588 Adult Education in Home Economics (3)
590 Problems in Home Economics Education . (3)
684 Current Trends in Home Economics Education (3)
685 Home Economics Curriculum Construction (3)
686 Evaluation in Home Economics Education (3)
687 Home Economics Supervision (3)

VOCATIONAL EDUCATION

- 516 Problems of the Coordinator in Vocational Education (2-3)
523 Vocational Guidance (2-3)
535 Principles and Philosophy of Vocational Education (2-3)
608 Internship in Vocational Education (6)
641 Appraisal of Current Literature in Vocational Education (3)
670 Method in Teaching Vocational Education (3)
671 Youth Organizations in Vocational Education (3)
678 Selecting Teaching Materials (3)
693 Supervision in Vocational Education (3)
694 The Administration of Vocational Education (3)
695 Special Problems in Vocational Education (3)
702 Career Development: Research, Theories and Practices (2-3)
768 Residence Credit for the Master's Degree (1-12)
769 Residence Credit for the Doctor's Degree (0-12)
779 Seminar in Vocational Education (1-3)
789 Independent Work in Vocational Education (1-3)
799 Research in Vocational Education (1-3)

DISTRIBUTIVE EDUCATION

- 515 Problems in Distributive Education (2-3)
517 Determining Teaching Content in Distributive Education (2-3)
528 Technique of Teaching Distributive Education (2-3)

INDUSTRIAL EDUCATION

- 518 Methods in Industrial Education (2-3)
529 Evaluation in Industrial and Distributive Education (2)
536 Surveys in Industrial Education (2)
537 Special Problems in Industrial Education (1-3)
540 Supervision of Student Teaching in Industrial Education (2)
