

Historical Records
of the

Museum of Natural History
~~Artificial~~ ~~commodities~~
in

Kentucky University

Note The artificial curiosities
have no place in a Museum of
Natural History — To avoid confusion
they should be struck out of the present
list, and placed in a separate record.

Historical Records of the Museum of Natural History in Kentucky University

The first incumbent of the chair of Geology, Zoology, and Botany in Kentucky University after its reorganization at Lexington, entered upon his duties January 3d 1867. At that time the material of the Museum consisted principally of specimens formerly belonging to Transylvania University. These were found preserved partly in the Laboratory and Medical Museum at "Morrison Hall", and partly in an upper room of the "Sayer Institute", where some had been stored for safety during the late war. A few other articles were obtained from the Lunatic Asylum and from Dr. Bush, but it is not clearly understood whether these were really the property of the University or of the parties in whose custody the specimens had lain for a number of years.

In addition to the material admitted to belong to the University were a considerable collection of Unionidae; a collection of land and marine shells and an important collection of Dried Plants — consisting of an Herbarium prepared by Drs. Peter and Short and a smaller Herbarium formerly belonging to H. H. Eaton. All these were claimed by Prof. Peter who however permitted them to remain on deposit in the University.

There were besides, suites of Minerals, partly belonging to the University before removal from Harrodsburg, and partly the property of Prof. Peter. No account is taken of these at present, since

they have all been left in Dr. Peter's custody

The following is a more detailed statement of the materials found on hand.

I Instruments

- (From the Chemical Laboratory, in charge of Dr. Peter)
- (Small compound microscope on tripod with a box of preparations (Moderately serviceable))
 - (Compound microscope manufactured by Jones of London (Moderately serviceable))
 - (Compound microscope manufactured by Ross of London with two boxes of preparations most of which in good condition (Good))
 - (Solar microscope and nine boxes of preparations. (Not yet tested))
 - (Helio-stat to accompany above (Not in order))
 - (Box, Collection of microscopic preparations)
 - (Portable black board (From Sayer Institute))
 - (Botanical press; Collecting box;

II The Peter Collection of Shells

(From the Chemical Laboratory)

Cephalopods

Total shells in the Peter Collection (specimens) 399
 The Uniquidae with average 3 specimens for each species; the Helicidae, 5; and the other families 12; making the total number of specimens 939

III. Originals of Dr. Peter's Analyses of
 Coals, Lumps, Iron Ores, & Rocks collected by the
 Kentucky Geological Survey. (From the Sayer Institute)

Coals & Boilers	34
Coals	59
Ores of Iron	158
Pig Irons	13
Iron Furnace Slags	19
Ores of other Metals	3
Shales and Lumps	12
Limestones	42
Sandstones	10

Total Originals examined 202
 Several Boxes from the Laboratory remain unopened.

IV. Other Articles from the Sayer Institute
 Total entries of Rocks and Minerals not enumerated
 under III. 108

A collection of large Corals from the Florida Reefs
 collected & sent to Pennsylvania Medical Museum
 by Dr. Hall (of Hall's Journal of Health) an
 alumnus of the University 28 specimens

Tusks and several bones of a large Mastodon found
 on the Georgetown turnpike; Tooth of Elephant, primigenius
 Immense Hair Ball from the Stomach of a Cow
 5 bottles with Reptiles; 6 Turtles; Sawfish; Monkfish; 6 skulls;
 Horn of Rhinoceros; 2 lizards;

V. Eaton Collection of Unionidae

Collected from Miami and Mud rivers, Ohio by Hubert H. Eaton, before 1832, and presented by his widow to the Medical Society of Pennsylvania University in 1833. The collection is noticed in Pennsylvania Medical Journal, Vol II, 1832 (or thereabouts)

Ancodonta	2	This should be
Synphyronota	2	looked up.
Unio	460	
Total species	464	

Total number of specimens 200

The collection contains also a few Helicidae rather fresh water gastropods and a fine specimen of *Ostrea mutabilis* from the Cretaceous group of the United States — probably New Jersey.

VI. From Ashland

1. Specimens from the Mammoth Cave, presented by Reginald Brown
2. Sundry fossils with some grates & crystallizations collected in June & July, 1866 by J. B. Bowyer, Dr. Aug. Williams and A. Mitchell in the vicinity of Shakertown, Danville and the knobs below Danville

VII. Relics

The old Gallot Box of Pennsylvania University
Sundry Indian Stone hatchets and hammers,
An Indian pipe
An Earthen Pot

VIII. From the Medical Museum

Sundry human bones & skulls & a few skulls of birds & a fish

1x Graphical Illustrations
from the Sayer Institute. Executed by Dr. Peter
copy of Bucklands Geological Diagram enlarged
to 16 or 18 feet in length. Painted on canvas
in oil colors
copy of Syll's section of the rocks from the At-
lantic Ocean through Richmond Va to Cin-
-cinnate and beyond. In oil (12 ft.)
Diagram showing relative thickness of the
earth's crust, heights of mountains and
depths of oceans; 4 ft square; in oil.
Harper's Map of U.S. Colored to represent
the geological formations

x. The Peter Herbarium

Atchell, Prof &c

Kentucky University

John Bowman (Father of Regent J. P. Bowman)

A red cedar cane from the Bowman Homestead on the banks of Six River in Mercer County, Made by John Bowman Sr. and presented as a memorial of the Homestead.

A Laws Exp. San Francisco.

A pair of Chinese slippers from California.

8 Geological Specimens from California

^{imp} Purchased through Prof. S. F. Baird for \$2 }
 144 specimens of bird skins from Guatemala

^{imp} Hon. Allen A. Burton, Lancaster Ky.
 66 specimens of bird skins from Bogota S. A.

A. Winchell (Collected for Ky Univ. June 1867)
 215 cuties about 500 specimens of rocks and
 minerals from the metalliferous regions of Lake
 Superior in Michigan

Mr. Lacey Bath Co. Ky.
 Tarantula

J. G. Burch M.D. Louisville Ky
 Crotalus a dem. anteus, (living) from Florida. The
 fangs were extracted & the person preserved. After
 a few weeks two new fangs made their appear-
 -ance & behind these two others of smaller
 size

Head of Green Turtle
 Disposition of muscles, ligaments and nerves of human arm

✓ James F. Chrystal Lexington H. Washington
 Bald Eagle (Haliaeetus leucocephalus)

✓ Elder H. V. Pinkerton.
^{Bald} Bald Eagle from Frontenac, Minn. (Aquila Canadensis)

Jonathan Morse
 Balena & Calcite from Ky - 8 specimens

James A. Harper Lexington Ky
 English Rhinoceros used by his father in the war of 1812
 Speech of broken Clay Smith, written by David Davidson
 in such a manner that the lips form letters which give
 a description of the occasion of the speech

o { m.p. J. J. Coleman sold mounted collection
of Canadian Birds for \$104
81 specimens. Also

13 " subsequently purchased

Mr Coleman acted as Taxidermist from 2 Oct
1867 to 2 March 1868. During this time he mounted

32 specimens of Anadimphs } Fresh skins
58 " Birds }

besides a portion of the dry skins from Guat-
-mala and Bulgaria. S. A. He constructed
an artificial stump into which are which
is arranged a group of animals

The fresh skins mounted by Coleman are
mostly the following:

- o Thomas J. Clay. ~~?~~
Turkey Buzzard (Cathartes aura) *probable.*
- o James Dixon
Urborn Owl (Otus Wilsonianus)? *probable.*
- o J. P. Schooley
Great Horned Owl (Bubo Virginianus) *probable.*
- o J. S. Wilson *probable*
Great Horned Owl
- o J. B. Bowman
2 Buccephala albesca
1 Columba livida
- o H. A. Ridgely ✓
Accipiter Cooperi

 Leaf of Magnolia grandiflora } George Washington in his
 Fragment of Flag of 149th N.Y. Vols. maddled garden
 by bullets in a charge on Lookout Mountain
 obtained from Maj. Gen. Geo. A. Thomas

5 June R. J. Winlock Student
 o Carolina Bat (Scotophilus carolinensis)

8 June Mrs. J. Wolford Lynnhaven
 Calcareous Tufa from Falls of Minnehaha Min.
 o Pebbles from Lake Catherine Min.
 ✓ Spermatophyte (Spermatophylus indecentiwealtis) Minneapolis

o Atwood Bowman
 Chicken snake (Ophibolus eximius)

✓ Eugene Bramlette
 Insect Crated Flycatchers Nest & Eggs (Myiarchus cinerascens)

o J. A. Bowman
 Round shaped Hen's Egg

9 June John R. Collette Washington D.C.
 o Japanese Coins obtained from the Chinese Embassy
 for the University
 Also Chinese signatures

13 June John L. Mitch

o Young skunk (*Meleptus chinga*)

o James A. Harper

o 3 spherical shell from the battle field of Cumberland Gap

o John P. Bowman

Refined shell from the battle field of Perryville Ky

o President R. Graham

Fine specimen of gold-bearing Quartz from California

o Unknown

Black Bear

Mrs. President Williams

o Spoon Bill Fish (*Spatularia folium*)

o A Fowl appearing like a cross between the Turkey and the Barn Yard fowl

✓ An Indian Tomahawk ^{of steel} and a stone hatchet from the Rocky Mountains

Blank Page(s)

Dimensions for Insect Cases: Inside measure $8\frac{1}{2} \times 11\frac{3}{4}$ inches
and $1\frac{7}{8}$ inch deep in the clear. The glass cover
must be a rabbet of such depth that when
the glass will be flush with upper edges
of the case

Insect Nets: Hoops of brass wire 3 to 4 sixteenths of an
inch in diameter. Hoop 13 to 15 inches diameter
with ends bent outwards to fit in a brass ferrule
4 or 5 inches long and $\frac{3}{4}$ inch to 1 inch in
diameter at outer end to receive a wooden
handle. The netting may be of "ladies' Wash
Net" - $\frac{3}{16}$ yd of yard wide stuff for
each hoop
