POLARINE OIL AND GREASES

Are scientifically prepared and afford perfect lubrication with least possible carbon deposit. Improper lubrication means added expense of maintenance and operation and excess consumption of fuel.

They are made in various grades for the proper lubrication of all types of motors and do their work perfectly under all weather conditions.

Consult the chart for correct grades for your car.

For Ford Automobile Lubrication
POLARINE F OIL
is Specially Recommended.

YOU will find CROWN GASOLINE and POLARINE dealers ready to serve you at all points along the way.
