PALACE HOTEL, SAN FRANCISCO.

See other side.

A. D. Sharon, Lessee

*Geo. H. Smith,
Chief Clerk.*

The PALACE HOTEL, occupying an entire block in the center of San Francisco, is the model Hotel of the World.

It has double the accommodations of any other Hotel in the City.

It is thoroughly Fire and Earthquake-proof, has broad, easy stairways and five Elevators.

Every Room is extra large, light and airy. The system of ventilation is perfect, combining flue from fire place, inlet flue for fresh air from outside, and outlet flue to the roof.

A bath and closet adjoin every room.

All rooms are easy of access from broad, light corridors, leading from the glass covered court in the center of the building.

The central court illuminated by the electric light, its immense glass roof, broad balconies around it on every story, its carriage-way and its tropical plants, is an attractive feature; one hitherto unknown in American Hotels.

Guests entertained on either the American or European plan. The Restaurant is an adjunct to the Hotel, and is the finest in the City.

Room with Board,	-	-	-	-	-	-	-	Three Dollars per Day,
Room with Board,	-	-	-	-	-	-	-	Four Dollars per Day,
Room without Board,	-	-	-	-	-	-	-	One Dollar per day and upwards.

WEDNESDAY

February

17

How many voices gaily sing
"Oh happy morn, O happy spring
Of life!" Meanwhile there comes o'er me
A softer voice from Memory,
And says, "If loves and hopes have flown
With years, think too what griefs are gone."
—W. S. Landor.

FRISKY WISHES

If I could send upon a card
The wishes in my head,
They'd make you feel so frisky that
You'd hop right out of bed!

21 Industries, with 2,903

Employees.

ANNUAL WAGES, \$1,016,500.00.

No Manufacturing Industry

EVER FAILED IN ASHLAND.

FOR FURTHER PARTICULARS ADDRESS THE

Ashland Improvement Co.,

ASHLAND, KY.

ASHLAND,

The Largest ^{AND}

Most Prosperous

Manufacturing City

In Eastern Kentucky.

A New Pittsburgh.

Steam made with

Slack Coal that Costs

Only 25 Cents per ton.

Natural Gas being

Piped to the City

By an Eastern Syndicate.

POINTS ABOUT ASHLAND.

An Ohio river front deep enough at all seasons for dry docks and heaviest draught steamboats.

Head of low water navigation on the Ohio.

It is near the confluence of the Big Sandy and Ohio rivers.

Coal as cheap and abundant as anywhere in the world.

Good nut coal seventy-five cents per ton.

Rich cannel coal beds almost within sight of the city.

Steel making ores and the best coking coal within easy reach.

Five railroads run into Ashland, three of which make it a terminus.

Three other railroads building to Ashland, one (Norfolk & Western) nearly completed.

A railway bridge across the Ohio to be constructed.

On the line from Chicago, Cleveland and Cincinnati, to Charleston, Wilmington and Norfolk.

The best distributing point above Cincinnati.

Unlimited quantities of coal, iron and timber at her doors.

Best location for saw-mills, planing-mills, carriage and wagon factories.

The town is built on beds of fire clay, red brick clay and potters clay.

Ashland is now making fire brick for Birmingham and Middlesborough.

Now has three iron furnaces in blast.

The largest steel nail factory in the West.

A large Bessemer steel plant in construction and to be completed July 1, 1891, with eight hundred tons daily capacity.

Now makes locomotives complete.

Has one of the largest dimension furniture factories in the country, hub and spoke factory, and many other industries.

An immense furniture factory promised on completion of water works.

Reservoir water works in construction and to be completed February 1, 1891.

New street railway in operation.

City lighted by arc and incandescent electric lights.

First-class public and private schools.

Now has six thousand busy and active people.

All unimproved property is under the control of parties who want to encourage manufacturing enterprises and such investments as will justify building and developing the city.

Home Buyers
Co-operative Club

of the

Seaton Realty
Company

Managed by 24 Directors
chosen to represent over 400
Qualified Members.

We believe we can give the Public
Service in any activity
listed herein.

MEMBERSHIP

Any person who has ever bought property from the Seaton Realty Company or any associated company is eligible for membership.

Membership Fee--Some hard thinking and work to help some other member.

Activities of this group are directed by 24 Directors chosen annually by groups representing members from Russell, Flatwoods, Kenwood, Riverview, Bellefonte, Hoods Creek District, Westwood, Fairview, each Ward in Ashland, Boyd County and Catlettsburg.

Object is to enable every Home Buyer to have a fair chance, at work, the Directors feel he is competent to do.

Operation. Every member, whom others help \$10.00 worth, must also help some other member secure the same amount of work.

Results. So far have been beyond all expectation. Further success only depends on the members themselves and what services they can offer for the public.

Classified List. Under different classifications the Directors can classify any member in the work he is best qualified to do. Unless his work and service to the public is satisfactory, this classification listing will be withdrawn. The public must be assured of efficient service. After two years service the following members are recommended.

SPECIAL CLASSIFICATIONS

In this group we classify many unusual services, seldom used, by the average person.

A phone call to the Seaton Realty Company office will tell you where any kind of service might be secured.

In case of fire you will need a proof of loss!
 Grape vines need trimming!
 Razor blades can be sharpened!
 False teeth might be needed!
 Water wells might need fixing!
 Coal Grates might be an advantage to install!
 Shrubbery might need proper care!

Call and ask us any tough problem and some one of our 400 members should know your right answer.

NEW INDUSTRIES

SECOND HAND BUILDING MATERIAL
ROBERT ENKIE, MANAGER
PHONE HIGH 6841

For the past two years we have found there is more of a market for all good second hand material,

at the right price, than we have been able to secure. Already over 13 old houses have been wrecked and the material salvaged. We have handled material for outside parties.

In this Department we have handled

LUMBER
DRAIN TILE
BRICK
SAND
PLUMBING FIXTURES

We will bid on any old building to wreck and we will clean up your premises after it is wrecked.

ELECTRICAL FIXTURES

have been successfully handled by
E. G. HANLON, PHONE PARK 2369

TIMBER

POSTS, POLES OR FIRE WOOD
CHAS. STEVENS, Mgr. (At The Log Cabin)
Phone Oak 6702

Fire wood is seasoned and in stock ready for immediate delivery. It is cut to your exact length.

Post, Poles etc, are ready for immediate delivery.

SAW MILL DEPT.

G. S. McNEIL, Mgr.
Phone The Log Cabin—Oak 6702

This mill is now operating at Bellefonte. We are manufacturing various kinds of wood, oak, chestnut, etc. We cut to all sizes.

We manufacture a wide line of mill work.

Several specialties such as sawed chestnut posts, fence pailings, shingles, etc, have had a large demand.

We will keep many samples at "The Log Cabin."

BELLEFONTE NURSERY

FRANK ELAM, Mgr. PHONE OAK 6863

Over 10,000 plants here. Evergreens, shrubbery, dahlia bulbs, etc.

We can secure any thing for you in the Nursery line.

We can suggest your proper planting. We can look after the care of and spraying of your shrubbery.

ROCK GARDENS

CHAS. STEPHENS, Mgr. PHONE OAK 6702

Rocks for every purpose. We will install pools, flat rock steps, walks, walls or terrace for you. We can take care of any rock garden problem. A little artistic rock work adds to a real home.

WESTWOOD RABBITRY

W. E. ARBUCKLE, PHONE HIGH 6757

Breeding Rabbits;

Meat Rabbits, ready dressed and "ready for the skillet."

PROPERTY MANAGEMENT

This whole district from Raceland to Catlettsburg is divided into small districts. One member is captain of and responsible for each district. Other members in that district assist him.

They have detailed instructions. They see that property is protected from vandalism. They see that property is kept presentable, grass cut, etc.

The captain knows this neighborhood. With help of other members he works to secure Buyers or Renters.

We manage residential property, business property and apartments. Our clients include banks, insurance companies, estates and individuals.

Our "2 way" cooperative service already is giving better service than we formerly were able to offer this whole wide district from just one central office.

THE LOG CABIN

Our Cooperative Market and Exchange

E. J. WILLIS, Mgr. Phone Oak 6702

Members built this typical Old Kentucky Cabin to exhibit and sell products they can make. It is on the U. S. Atlantic and Pacific Highway between Ashland and Russell.

Local mechanics can make and do almost anything, but most often are unable to market the product of their labor. They could make wages, even in times of depression, in turning our needed products in Wood, Sheet Iron, Tin, Stone, Concrete, Timber etc, but they are not salesmen and the general public does not know who can satisfactorily do various things.

Here we will also sell for members a variety of products— Fishing Minnows, Shrubby, Evergreens, Flowers, Fire Wood, Chickens, Pet Animals etc. If some customer can not furnish any article you want, just ask us. We will try to find some local man who can. We will also see that he is reliable.

PLAYGROUND—FREE TO PUBLIC

6 acres here. Plenty of shade. The children have plenty of playground equipment. It is a safe place for them.

COOK YOUR PICNIC MEAL

Rustic stone furnaces make this easy for you. We furnish you wood. We have tables and benches.

Some hot evening bring your family and try it. You will come back.

THE LOG CABIN

E. J. Willis, Mgr. Phone Oak 6702

Six acre park and playground. Ideal location for outdoor parties and picnics. Benches, swings, tables, furnaces.

Plenty of Free
Parking Space

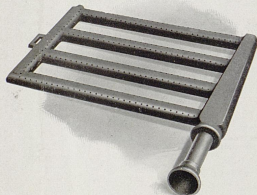

"Direct Action" Means Something

DIRECT ACTION PRINCIPLE—The principle is simply to put the oven burner *directly* in the oven and *directly* heat *directly* on the baking. "Direct Action" is one stroke we do away with all flue walls and oven bottom. This construction leads to positive economy of operation—saves your gas. With separate burners, the oven, and broiler can be placed with regard to the comfort of the operator. Hence the DIRECT ACTION broiler is conveniently above the oven—saves fatigue.

BAKING—Think of putting your baking in a cold oven. Yet that is the DIRECT ACTION way—because a DIRECT ACTION oven heats instantaneously. There is no wait to heat the oven before baking—this saves your gas and time. Biscuits are baked in six to eight minutes with an average of five feet of gas. Other ranges use from eight to ten feet just to prepare the oven for baking. Biscuits are finished in a DIRECT ACTION before the old style range is ready to receive the baking.

BROILING—As the DIRECT ACTION broiler and oven have nothing to do with one another, each burner is designed for its particular purpose. Consequently the broiler burner is

constructed strictly for broiling—it's made right. It has four arms with a double row of drilled holes in each arm. This gives a solid sheet of flame that covers the entire broiler pan. The largest steak is cooked evenly. As the broiler burner is not interfered with by the baking, it can be adjusted to any desired degree.

Isn't this lovely?

"I went out and enjoyed the beautiful afternoon while I cooked this entire dinner at one time in my gas range oven. I left it for six hours, unattended. When I came home it was ready for serving."

"How splendid! Is it a Fireless Cooker range?"

"No, just an ordinary gas range—The Direct Action; but I can do with it anything that can be done with the best Fireless Cooker."

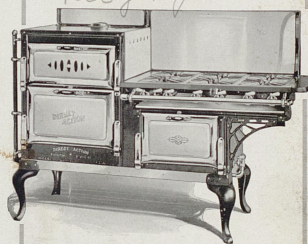

"How is that possible?"

"Because it has an **Oven Heat Regulator**. I always wanted a Fireless Cooker so I could cook a meal while I went to church or out calling. The stove-man persuaded me to buy a Direct Action with Heat Regulator. Here is the result, what do you think of it?"

"Think of it? I wish I had one this minute. Wouldn't I be happy if I knew I could go home and take a cooked meal out of the oven?"

"Then why don't you buy a Direct Action?"

"Leave it to me. My husband will have no rest, till he gets me a Direct Action that cooks like a Fireless Cooker."

"How Lovely"

A PLAY IN ONE ACT

(Can be acted by anybody in any kitchen)

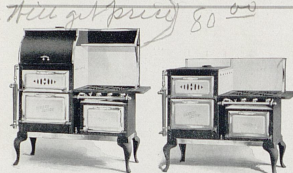

DRAMATIS PERSONAE

Mrs. X—A delighted housewife.
Mrs. Z—A charming (and charmed) visitor.
Props: One Direct Action Double Oven Range.

"How lovely! You broil without stooping, don't you?"

With Separate Broiling Burner

No. 3957

No. 3757

"Oh, yes. And my baking oven is as convenient as my old range, too."

"And does your new range bake as well?"

"Yes, it's a dandy baker. Just look at my bread and biscuits, aren't they lovely?"

"What is the name of your new range?"

"Direct Action," because the 'U' shaped burner is placed DIRECTLY in the oven across the bottom front and along the sides. There is no heavy oven bottom or flue walls to heat before baking. I put my baking right in the cold oven, then light the burner. Why! the oven is hot almost instantly!"

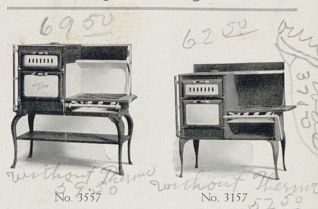

"How splendid! Just think of the time and gas you must save by not having to heat it first."

"Yes, and there is another dandy feature. The bottom oven rack is level with the door when open; and I slide things in and out, without a drop of two inches from oven bottom to door like on my old stove. And the oven is so roomy. You see, I use the oven bottom to bake on just as I use the top rack."

"What an odd oven bottom. It's all open."

"That's another good feature. Should my pies bake over the liquid runs into a pan below, which I can

With Separate Baking Burner

No. 3557

No. 3157

easily lift out and wash. That's why my oven always looks like new."

"How pretty your oven is, as there is no rust inside."

"Isn't it nice to have an oven that doesn't rust? This oven heats up and cools off so quickly that moisture hasn't time to gather."

"Just look, you have a burner for each oven."

"Isn't that splendid! That's why I can broil so deliciously. The special broiling burner spreads the heat evenly over the entire pan. With separate burners I have any degree of heat I need in either oven at the same time."

"Your stove looks just like new. How do you keep it so?"

"Because it's rust-proof black enameled all over, even the top and shelves. With a handy oiled cloth I go over the range just like dusting. Then the broiler pan, dust tray and door panels are white porcelain enameled and wash with soap and water."

"It's such a pretty stove. Pray don't ever let match ends accumulate on the top."

"But I don't use matches for the top burners. See this little valve handle? All I do is touch it and it lights any burner. I never lift heavy vessels to light

Each Operation Regulated Independently

No. 1307

No. 1107

a burner. It's called the 'Firefly' Lighter, and is worth twice the money asked for it."

"Does the 'Direct Action' cost more than the old range?"

"Of course. It costs more to make. For instance, it has a burner for broiling and another for baking, where other ranges have but one."

"To be sure. It's the only range I ever saw with the broiler above baking oven."

"My! The man who waited on me little realized how kind he was when he recommended a 'Direct Action.'"

"Where is your Pilot Lighter?"

"There isn't any. I apply the match directly to the oven burner. I have to open the door to do it."

"That's a splendid arrangement. If there were any gas in the oven it would instantly escape the moment you open the door."

"Isn't that safe? I feel so confident with my new range. I know that there are no flues or solid oven bottom to hold any accidental accumulation of gas. 'Safety First' evidently is the plan upon which the 'Direct Action' is built."

DIRECTIONS

For Using the
Standard Carriage Heater
(Triangular Shape.)

Light Carbon by placing in a brisk fire — preferably hot coals—until carbon becomes red through and through. Remove from fire and let stand a few seconds before placing in the heater as there will be a little smoke for a few seconds.

Regulate the Heat by opening or closing ventilator slides. Care should be taken to allow sufficient ventilation to insure the carbon burning. The robes should not be tucked around the heater so closely as to shut off the ventilation.

Extinguish Fire by closing ventilator slides tightly. Carbon may be used repeatedly until reduced to ashes.

One-third of a cake, which is sufficient for ordinary use, will last from eight to ten hours. A full cake will last from fifteen to sixteen hours.

THE STANDARD STAMPING CO.
MARYSVILLE, OHIO - - - U. S. A.

THE KING'S DAUGHTERS' PRAYER.

FIRST—The Lord's Prayer.

SECOND—Almighty God, Eternal Father, look with Thy favor upon THE KING'S DAUGHTERS and bless them for good in the land. Accept the hearty desires which they bring to Thee for Thy service and employ their ministrations in whatever duty they can be of greatest use. Make them everywhere true to the sign which they wear and to stand as of old by the Cross of the Saviour. By pureness and honor and unselfish behavior may they keep ever true their allegiance to Jesus and seek not for self, but for others to labor In His Name. The grace of our Lord Jesus Christ, and the love of God, and the fellowship of the Holy Ghost, be with us all evermore. AMEN.

As you Cronton have shown
~~this~~ Ashland neighbors great
kindness in assisting us at our
Mass Meetings - Could I ask
you, would you ^{also} honor us with a
speech, at our next mass meeting -
~~It~~ on Thursday May 21st I shall
ask ^{Mr} Henderson of Hanging Rock
for a ^{short} speech on that occasion -
He would like a short address of
about 20 minutes - & ~~partly~~ ^{for}
you to ~~allude~~ ^{to the} ~~to take~~
~~place on the 21st~~ ^{the 21st} in favor of
the Local Option Law & to urge our
voters to ~~to~~ vote right on the
~~in which~~ & I would be much obliged if
in it you would take occasion to urge
on our voters their duty to vote right on
the Local Option Law the 21st of June -
You will do us a great favor if you
can come - & I would like you to make my
house your home ~~on that~~ while you are
in Ashland -

You say that a "Happy Year" depends upon my
fulfilling your wish - (what it is I have forgotten)
But if I can do anything on earth to make
you happy - I shall consider myself happy
in doing so - I will do it with pleasure -

"My Dear Dear" HaA, I claim your heart. ~~My~~ Were it
mine I would be perfectly, perfectly "happy."

Believe me, HaA, when I assure you, that for the
~~last~~ last three or four years (though unknown to your-
self) you have been the certain theme of my ~~thoughts~~ thoughts
and the constant object of my hopes. You have
been for many years my sweet, my pretty pretty "Lady
Love". Oh! I do, I do, HaA, I do love you
can you, will you keep your promise?

What is the matter
You promised not
to have the "Blues"
any more -

Easter Souvenir

Raw Egg For Invalid

Put eggs into a cup; beat very light with Dover egg beater; add a pinch of salt, then fill cup with milk or add nutmeg and sugar in place of salt; also good to use unfermented grape juice in place of milk. This is fine for anyone to take that feels tired or exhausted. Egg should be as cold as possible.

Devilled Eggs

Cut hard boiled eggs in two the long way; remove the yolk and mash very fine; add vinegar, sugar, salt, pepper and mustard to taste, also a little butter. Mix well, put back into the whites and serve on lettuce leaves. For a change add chopped olives, chicken or boiled ham.

Scrambled Eggs With Beef

Chip dried beef very fine. Put equal parts of lard and butter in a skillet; when hot put in the beef and heat a few minutes, stirring to keep from burning. Break some eggs in a bowl, season and stir into the meat; will cook in a few minutes.

Escalloped Eggs

Take cold meat chopped, over which
put hard boiled eggs, chopped, then
cream sauce, then butter and crumbs
and brown.

Poached Eggs On Toast

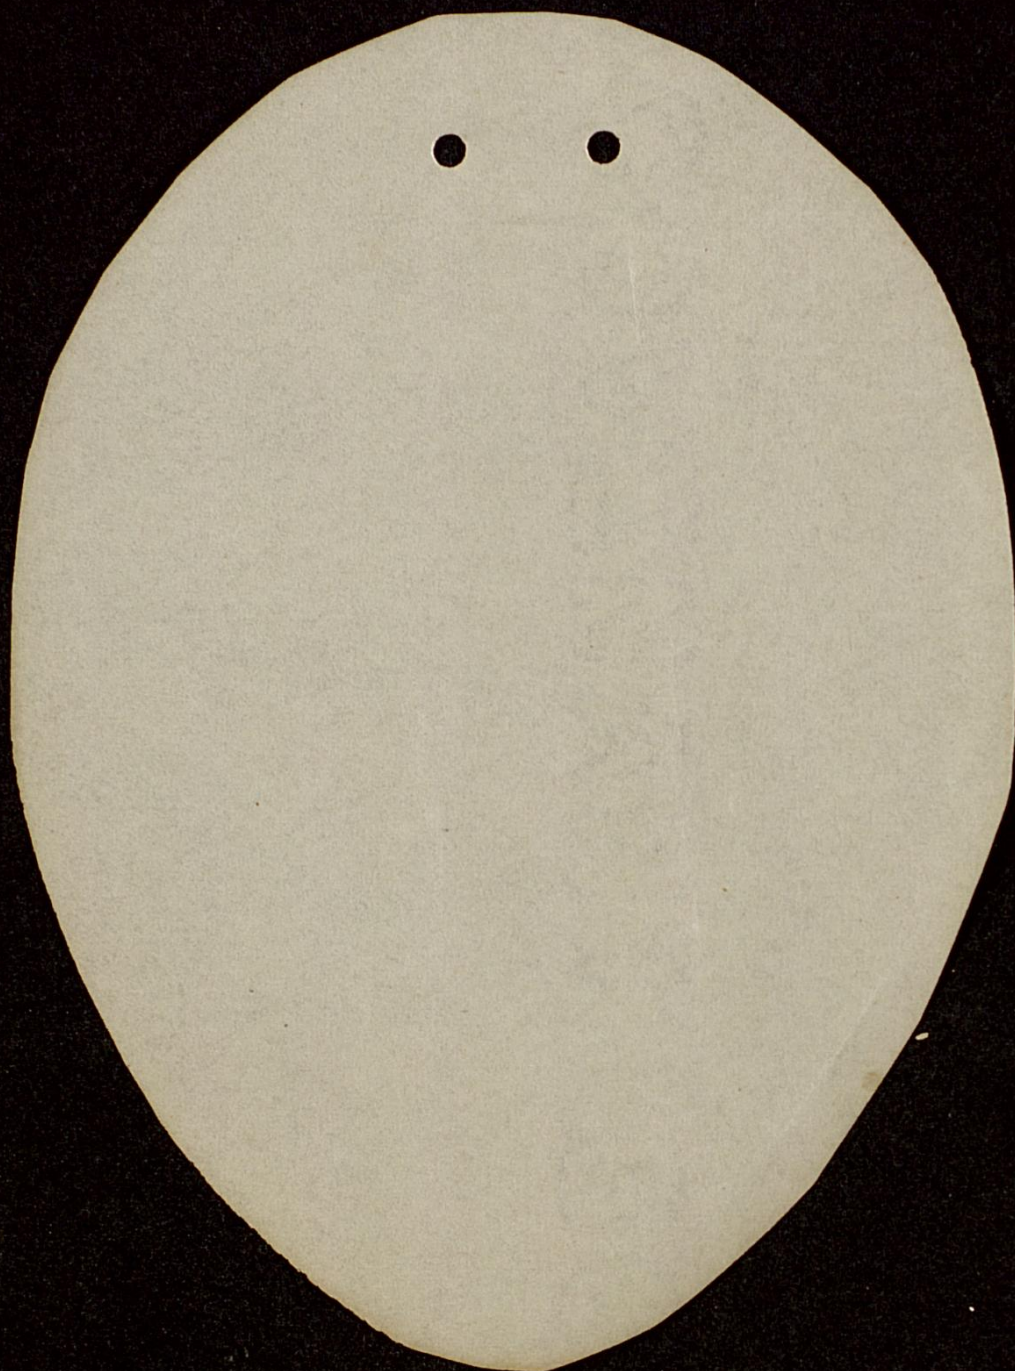

Poach eggs in milk and a little butter; put one tablespoonful of the milk on well buttered toast, then the eggs, then the remainder of the milk.

Ham And Eggs In Cases

Mix and moisten with milk one pint finely chopped cooked ham, two pints fine bread crumbs. With this mixture evenly fill cases formed from shredded wheat biscuits and lay a fresh egg on each; season and over top sprinkle buttered crumbs of shredded wheat biscuits: place in top of oven long enough to brown crumbs and cook eggs.

Egg Omelet

Put one pint of milk on in a double kettle. When it comes to a boil stir in one tablespoonful of flour, moistened in a little milk, salt. Take off the fire and stir into this the well beaten yolks of six eggs; then the well beaten whites. Put in a greased dish or skillet and bake. Serve immediately.

I hereby agree to pay one dollar (\$1.00) a year
for one year, toward the maintenance of a Sub-
scription Library, thereby being entitled to all the
privileges of a Stockholder in the Library Asso-
ciation.

OYSTER SUPPER!

THE LADIES OF THE
PRESBYTERIAN CHURCH
WILL GIVE AN

OYSTER SUPPER!

AT THE HOUSE OF
MR. JOHN MEANS,

On Thursday Evening, November 14th,

Permit me to read the following
And when the day in which we women
of Ashland have so long waited & prayed for
the 1st of June at last arrives ^{our prayers are answered} & the Local
Option Law is carried by an overwhelming
~~vote~~ majority of the noble voters of Ashland
then let our beloved Ashland rejoice as
never before in her twenty years of life
let ~~the~~ ^{joyous} glad ringing of ~~her~~ ^{every} church bell
the merry bonfire & the illuminating of every
temperance house testify our joy & the ^{glad} booming
of our cannon tell to the listening ears
of Cattlettsburg Hanging Rock & Mounton
that right has won & the Cause of Temperance
reigns in has triumphed -

UNITED STATES FOOD ADMINISTRATION

Wheat For Liberty

The only question for every true-hearted American to-day is: "What can I do to help win the war?" The only answer—"Give instantly the service needed."

"That service now is until the next harvest for you to share your wheat with your comrades across the sea—for you who can afford it to give your whole share to them."

WHEAT IS NOW A LUXURY FOR INVALIDS, BABIES AND THE VERY POOR.

IT IS NOT NOW FIT FOOD FOR STRONG MEN AND WOMEN.

Autocracy compels, and gives no reasons.
Democracy requests, and gives reasons.
Are you ready for Democracy?

The allied countries of Europe lack wheat because: *Belgium*, formerly strong, splendid and *free*, has America only to look to for daily bread; *England* formerly imported her wheat from South America and Australia as well as from North America; *France* and *Italy* have lost to the army the majority of their farmers; their women are needed in munition factories and in other civil occupations. Fertilizers and farming tools are lacking.

The allied countries of Europe need wheat because: Bread has been one of the chief sources of nourishment. Bakeries can not make raised bread without wheat flour—French homes in particular depend on bakeries; fuel and time are lacking. One bakery can supply hundreds of families and so release hundreds of pounds of coal, hundreds of hours of time. If we insist upon eating wheat needed abroad, Liberty's armies and Liberty's civil population will collapse as Russia collapsed, because the food supplies of her armies and her civil population failed.

Citizens of America, it is bad enough to have those countries across the seas bear the brunt of all the fighting. It is impossible to believe that with the facts before us, there is a living man or woman who will permit those countries to starve for us also. In old times the Prophets would have cursed the bread so eaten. It needs no Prophet now to say that there is a curse for anyone who in mere gratification of appetite eats wheaten bread, and that curse proclaims him a traitor to himself and to his country.

Enough has been said and written. The one who does not now understand the situation is an ignoramus or a slacker; the ignoramus can't and the slacker won't understand. The real pure-bred American from now on needs only the briefest message from one whom he trusts.

BROTHER, YOUR COMRADES NEED WHEAT.

The Food Administrator for America has said, "My message is small and concrete, the service that we ask of you, that we ask of every well-to-do, every independent person in the United States to-day is that he shall abstain from the use of wheat in any form until the next harvest."

CEREALS AND CEREAL SUBSTITUTES.

- | | |
|-------------------------------|----------------------------------|
| 1. Banana flour. | 11. Milo maize. |
| 2. Barley meal and flour. | 12. Oat meal and flour. |
| 3. Buckwheat meal and flour. | 13. Oats—rolled. |
| 4. Corn grits. | 14. Oats—granulated. |
| 5. Corn meal. | 15. Peanut flour and meal. |
| 6. Corn flour. | 16. Potato flour and starch. |
| 7. Cornstarch. | 17. Rice and rice flour. |
| 8. Cottonseed flour and meal. | 18. Rice—polished or unpolished. |
| 9. Feterita flour and meal. | 19. Soya-bean meal. |
| 10. Kafir meal and flour. | 20. Sweet-potato flour. |

Housewives of America! Don't wait for the latest tested recipes from the Food Administration. Take down your old cook book and paste this in it (with cornstarch paste):

Approximate Equivalents (By Weight) to One Cup Wheat Flour.

	Cup.		Cup.
Buckwheat flour	4/5	Rice flour	4/5
Corn meal	4/5	Barley flour	1 1/3
Corn flour	1	Hominy grits	4/5
Rolled oats ground in food chopper	7/8		

The above measures are for average flours and meals. If your material is very fine, use a little more than the above measure; if very coarse, a little less.

If you have scales, use them. The following weights are the average of three weighings of one standard cup of sifted flour or meal filled lightly, without packing:

A. Meals and Flours.

	Ounces.		Ounces.
Barley flour, approximately	3	Rice flour, approximately	5
Buckwheat flour, approximately	5	Wheat flour, approximately	4
Corn flour, approximately	4		

B. Uncooked Cereals.

	Ounces.		Ounces.
Corn meal, approximately	5	Oats, rolled (ground), approxi-	
Hominy grits, approximately	5	mately	5
Oats, rolled, approximately	3		

TESTED WHEATLESS RECIPES.

Carry-Ons.

1 1/4 cups liquid.	6 teaspoons baking powder.
4 cups barley flour.	1 teaspoon salt.
3 tablespoons fat.	

Over The Tops.

1 cup liquid.	6 teaspoons baking powder.
2 2/3 cups corn flour.	1 teaspoon salt.
3 tablespoons fat.	

Riceoat Defenders.

1 cup milk.	4 teaspoons baking powder.
1 tablespoon fat.	1 teaspoon salt.
2 tablespoons sirup.	1/3 cup rice flour (2 ounces).
2 eggs.	1 1/4 cups ground rolled oats (6 ozs.).

Oatcorn Conquerors.

1 cup liquid.	4 teaspoons baking powder.
1 tablespoon fat.	1 teaspoon salt.
2 tablespoons sirup.	3/4 cup ground rolled oats (4 ounces).
1 or 2 eggs.	1 cup corn flour (4 ounces).

Chocolate Cake.

1/2 cup fat.	2 cups barley flour (5 ounces) or rolled oats, ground.
2/3 cup sugar (about 4 1/4 ounces).	6 teaspoons baking powder.
1 cup sirup (about 11 1/2 ounces).	1 teaspoon cinnamon.
3 eggs.	1 teaspoon vanilla.
3/4 cup milk.	2 squares chocolate.
1 teaspoon salt.	
1 cup rice flour (5 ounces).	

Cream the fat, sugar, and egg yolk. Add the sirup and mix well. Add alternately the liquid and the dry ingredients sifted together. Add flavoring and melted chocolate. Fold in well-beaten egg white. Bake about one hour, starting in a moderate oven, 350° F.—177° C. After 20 minutes raise to 400° F.—205° C.

Chocolate Cake.

1/2 cup fat.	1 2/3 cups buckwheat flour (8 ozs.).
2/3 cup sugar (4 1/4 ounces).	1/2 cup ground rolled oats (2 ounces).
1 cup sirup (11 1/2 ounces).	6 teaspoons baking powder.
3 eggs.	1 teaspoon cinnamon.
3/4 cup milk.	2 squares chocolate.
1 teaspoon salt.	1 teaspoon vanilla.

Cream the fat, sugar, and egg yolk. Add the sirup and mix well. Add alternately the liquid and the dry ingredients sifted together. Add flavoring and melted chocolate. Fold in well-beaten egg white. Bake about one hour, starting in a moderate oven, 350° F.—177° C. After 20 minutes raise to 400° F.—205° C.

(Index No. E-37.)

LOCAL OPTION LAW.

PROF. W. W. RICHESON.

The Temperance Band is marching on,

Woman's the Guiding Star:

Soon the Victory shall be won

In this illustrious war.

Oh! that will be joyful,

Joyful, joyful, joyful—

Oh! that will be joyful,

When men shall drink no more,

When men shall drink no more,

On all our native shore,

But fondly greet

Where ere they meet,

And vow to drink no more.

The hearts of wives will not be riven,

Their husbands will be free;

Loud Halleluiahs shall be given

This year of jubilee.

Oh! that will it be joyful, &c.

Fond mothers then shall cease their wail,

For darling children slain;

And not like Rachels in the vale,

Their sons will live again.

Oh! that will be joyful, &c.

Then rally round these women now,

Ye gallant men and braves;

Vote for the Option Law, and vow

To be no longer slaves.

Oh! that will be joyful, &c.

HOUSEHOLD INVENTORY

**SECURES FAIR ADJUSTMENT
OF CLAIM IN CASE OF LOSS**

S. P. HAGER & SON

Fire, Marine, Life, Plate Glass, Liability,
Accident and Automobile
INSURANCE

ASHLAND, - - - KY.
Phone 94 - No. 107 E. Winchester

Extract from Standard Policy of Insurance.
See Lines 83-86.

"The insured shall give immediate notice in writing to this Company of any loss or damage, protect the property from further damage, forthwith separate the damaged and undamaged personal property, put it in the best possible order, furnish a complete inventory of the destroyed, damaged and undamaged property, stating the quantity and cost of each article and the amount claimed thereon; and the insured shall, within sixty days after the fire, unless such time is extended in writing by this Company, render to this Company a proof of loss."

Instructions

In case of loss or damage to personal property, the assured is required under all insurance contracts to make a complete inventory of property destroyed, which, in case of a total loss, is often difficult to make correct from memory. We therefore trust that you may find the following inventory useful in making a schedule of your household effects.

Always, when practicable, give date of purchase and cost; but in case of presents or gifts, under column headed "Date of Purchase," give date received, and under column headed "Cost," give the cash value of article at time received, and we would further suggest that the inventory be revised occasionally, and you can then determine from time to time the amount of insurance to be carried, which should approximate 80 per cent. of value.

BURGLARY INSURANCE.

This book will prove of invaluable service to those patrons thoughtful enough to protect their household effects against loss by theft. It should be kept in a safe place after the inventory is once made, together with the insurance policies.

**DO IT NOW
TOMORROW MAY BE TOO LATE**

Important

Read your Insurance Policy and see that it covers SPECIFICALLY what you desire.

Notify the Insurance Agency issuing the Policy AT ONCE of any changes—vacancy, occupancy, repairs or assignments.

File this Inventory together with the policies in a safe place.

Place your Insurance with Companies duly authorized by the Auditor to transact business in the same State in which you are located.

ADDITIONAL INSURANCE.—Notice must in all cases be given to the company carrying the risk and consent, by endorsement on policy, be obtained before taking additional insurance on the same property (unless especially waived in the policy), or the policy covering the risk will be rendered void. See conditions of policy.

REMOVAL OF PROPERTY.—In case of removal of property covered to another locality, notice of such removal must be given to the company, and consent obtained by endorsement on the policy to removal, or the policy will be void.

It's Useless

to pay for more insurance than you could collect if you had a total loss.

It's Not Business

to carry less insurance than you need to protect you adequately.

You Can't

close your eyes and enumerate all the things in any one room in your house.

And Yet

if you should have a fire, the adjuster would require a sworn inventory of the loss.

THIS BOOK SOLVES THE PROBLEM

When filled out you KNOW the total present value of your effects—and if you have a loss you are thoroughly prepared for a just settlement.

Better do it to-day,
There may be no tomorrow!

This book is presented with the agency's compliments and the hope that the next time you have any insurance to place you will remember that this agency not only offers the protection desired but also takes pleasure in being of service to its customers.

"If it's worth having, it's worth Insuring!"

FOOD ECONOMICS CENTER

20 Ashburton Place, Boston

Bulletin on the Uses of Nuts

NUT LOAF

2 cups soft stale bread crumbs
1 cup nut meats finely chopped
1 tsp. salt
 $\frac{1}{2}$ tsp. poultry seasoning
 $\frac{1}{4}$ tsp. paprika
1 egg slightly beaten
3 tbsp. sausage fat or oleomargarine
 $\frac{1}{2}$ cup boiling water

Mix in order given; pack in a deep, greased pan and bake in a moderate oven half an hour. Turn out on platter and serve with cheese sauce.

DARK NUT BREAD

$\frac{1}{4}$ cup sugar
 $\frac{3}{4}$ cup hot water
 $\frac{1}{2}$ cup molasses
 $\frac{3}{4}$ cup milk
2 cups entire wheat flour
1 cup bread flour
5 tsp. baking powder
 $1\frac{1}{2}$ tsp. salt
 $\frac{1}{2}$ tsp. soda
 $\frac{3}{4}$ cup nut meats finely chopped

Mix in order given, sifting dry materials together before adding. Turn into a greased bread pan, let stand fifteen minutes, and bake in a moderate oven one hour.

PEANUT BUTTER

2 quarts lightly roasted peanuts
1 tsp. salt
cream or melted butter

Remove shells and skins of peanuts and put through the food chopper twice, using first a coarse cutter and then the finest cutter; add salt and enough cream or melted butter to make a smooth paste.

PEANUT MACAROONS

white of 1 egg
 $\frac{1}{8}$ tsp. salt
1 cup powdered sugar
1 cup finely chopped peanuts

Add salt to the egg and beat until stiff; add sugar and nuts, and mix well; drop from a teaspoon on a greased baking sheet two inches apart and bake in a slow oven about fifteen minutes.

WALNUT WAFERS

2 eggs
1 cup brown sugar
 $\frac{1}{2}$ cup flour
 $\frac{1}{4}$ tsp. cinnamon
 $\frac{1}{4}$ tsp. salt
 $\frac{1}{2}$ tsp. baking powder
 $\frac{3}{4}$ cup chopped nut meats

Beat eggs until light; add sugar and beat well; add dry ingredients sifted together; beat well; add nuts; pour into a greased dripping pan and bake in a moderate oven about ten minutes. Cut in squares while hot. Mixture may be baked in tiny scalloped tins if preferred.

three to eight feet. This ore will yield an average of from 50 to 60 per cent. metallic iron.

"The property is accessible, and can be easily and economically worked. The output would be limited only by the number of operatives employed and the facilities for its transportation.

Respectfully,

H. S. MERRY,
JNO. S. HAM,
W. A. RINEHART."

ANALYSES

MADE BY DR. HENRY FROEHLING, Analytical Chemist of Richmond, Va., of samples collected by himself from the Rich Patch Iron Company's property:

Sixteen Analyses of Hematite Ores: Highest in metallic iron, 57.772 per cent.; lowest, 47.762; average, 54.282.

Phosphorus: Highest, 1.364; lowest, .172; average, .617.

Eight Analyses of Fossil Ore: Highest, 52.640; lowest, 48.906; average, 50.827.

Phosphorus: Highest, 1.022; lowest, .575; average, .799.

OPERATIONS

LOOKING TO THE DEVELOPMENT of this property will at once be commenced. To this end a Mining Company, composed of Messrs. D. Shanahan, E. T. Powell, D. A. and C. M. Shanahan, W. A. Rinehart and E. M. Nettleton, all well-known contractors, has arranged for the construction of a railroad and the opening up of mines and shipment of ore. Under their contract a royalty of 25 cents per ton will be paid to the Rich Patch Company, and the output is to reach 100,000 tons per year. This contract terminates at the option of the owners of the land, should the latter determine to operate upon their own account.

Similar operations could be conducted at a half dozen or more points on the property.

THE DEMAND

FOR THIS ORE will justify operations far more extensive than those already provided for.

PLAN OF ORGANIZATION.

THE ENTIRE PROPERTY has been capitalized at \$400,000. This \$400,000 of stock will be sold in shares of \$100 each, at par, upon the following terms: \$25.00 per share upon subscription, and the remainder in equal instalments at three, six and nine months from April 1st, 1890.

For the down payment checks must be drawn to the order of E. M. Nettleton, Treasurer. The Company *will not be responsible* for money paid in any other way.

PROSPECTUS

J. E. PARKER,.....Covington, Va.

PRINCIPAL OFFICE—COVINGTON, VA.

The Rich Patch Iron Company.

THE RICH PATCH IRON COMPANY is a Corporation organized and existing under the laws of Virginia.

PROPERTY.

THE PROPERTY consists of 9,264 acres of Mineral and Timber Land, situated on the Rich Patch Mountain, Alleghany County, Va. The tract immediately adjoins Lowmoor, and extends westwardly for seven miles, skirting the Chesapeake & Ohio Railway its entire length, and reaching to and including the proposed location of the Potts Creek Railroad. It embraces what experts have declared to be the finest ore deposit of the Rich Patch section—a section famed for the quantity and quality of its iron ore. From the Rich Patch range is supplied the ores for Lowmoor, Princess and Longdale furnaces. The product of these furnaces commands always the highest prices in the iron centres. The Government has recently contracted with the Princess furnace to furnish iron for the castings of its new armored vessels, the output of that furnace having been declared the best made for that purpose.

The tract is traversed by numerous streams, along the courses of which tramways and railroads could be constructed with easy grades, and very cheaply. Except where clearings have been made, the whole surface is covered with timber, including a large quantity of excellent oak, pine and hickory.

IRON ORE.

AN EXHAUSTIVE REPORT was made upon this property by Mr. L. E. Lewellin, of Pottsville, Pa., an expert whose reputation is not bounded by the limits of sections.

After describing the property in detail and particularly the veins of hematite ore stretching for six miles and ranging in width from ten to fifty feet, and the fossil vein, ranging from three to ten feet, and extending the entire length of the property, Mr. Lewellin says:

"There remains, however, of the fossil vein, not less than ten square miles available for mining and working, and (compared with other ores) peculiarly adapted to smelting, with an average thickness of not less than three feet, and capable of yielding 50 to 60 per cent. of metallic iron.

"There remains, also, of the ore sandstone vein, nearly as many square miles, with a thickness of about five feet, of inferior value in the present state of the arts, yet capable of being smelted, and yielding a fair return for the labor and expense, especially when mixed with the other ores.

"There remains, also, of the Red Shale ores, not less than six square miles of an average thickness of five feet of good workable ore, capable

of yielding from 35 to 40 per cent. of iron, and there remains also, of the Hematite vein (besides the vein on the north side of Carpenter's mountain) a basin consisting of two dips, not always continuous, yet extending nearly six miles, with an average thickness of about 30 to 40 feet of good workable ore, capable of yielding 45 to 50 per cent. of iron.

"The proximity of the tract to Jackson's River and the Chesapeake & Ohio Railway, the facility of access to the veins of ore, for mining and transportation, afforded by the remarkable gaps and 'cut downs' and by the beds of the runs and branches above indicated, together with the great abundance of limestone on various parts of the tract, and the convenient sites for building furnaces near Jackson's River, are elements of value to the property which need not be further noticed. Suffice it to say that with a competent force at work on the fossil vein alone, at the point where "Laurel Branch" cuts through the Horse Mountain, it would be practicable to deliver to a railway running along the bed of Laurel Branch, not less than 500 tons of fossil ore each day, and from the veins of hematite ore, lying within about a mile of that point, not less than 300 tons of hematite ore could be delivered each day—making a daily supply of not less than 800 tons of ore from that point alone, which could be maintained for an indefinite series of years, certainly more than a hundred years, at the same time the same daily supply of fossil ore, and probably also of hematite, could be furnished and maintained for the same indefinite period at Hay's Gap. The same daily supply for the same indefinite period, both of fossil and hematite ores, could be maintained at Kearns Run by means of a short railway along the bed of that run, and the branch of the run leading up to the "divide," making an aggregate daily supply of not less than 2500 tons of fossil and hematite ores, for a century, without resorting at all to the Red Shale, and the sand stone veins, which for the present might be entirely neglected.

"This daily supply can be still further increased, if desired, by means of a railway up Mill Branch, and by mining operations on the fossil and hematite veins nearest to that stream.

"These results may well surprise you, but I need not say they are stated cautiously and deliberately, within the safe limits of truth and experience.

Yours, etc.,

L. E. LEWELLIN."

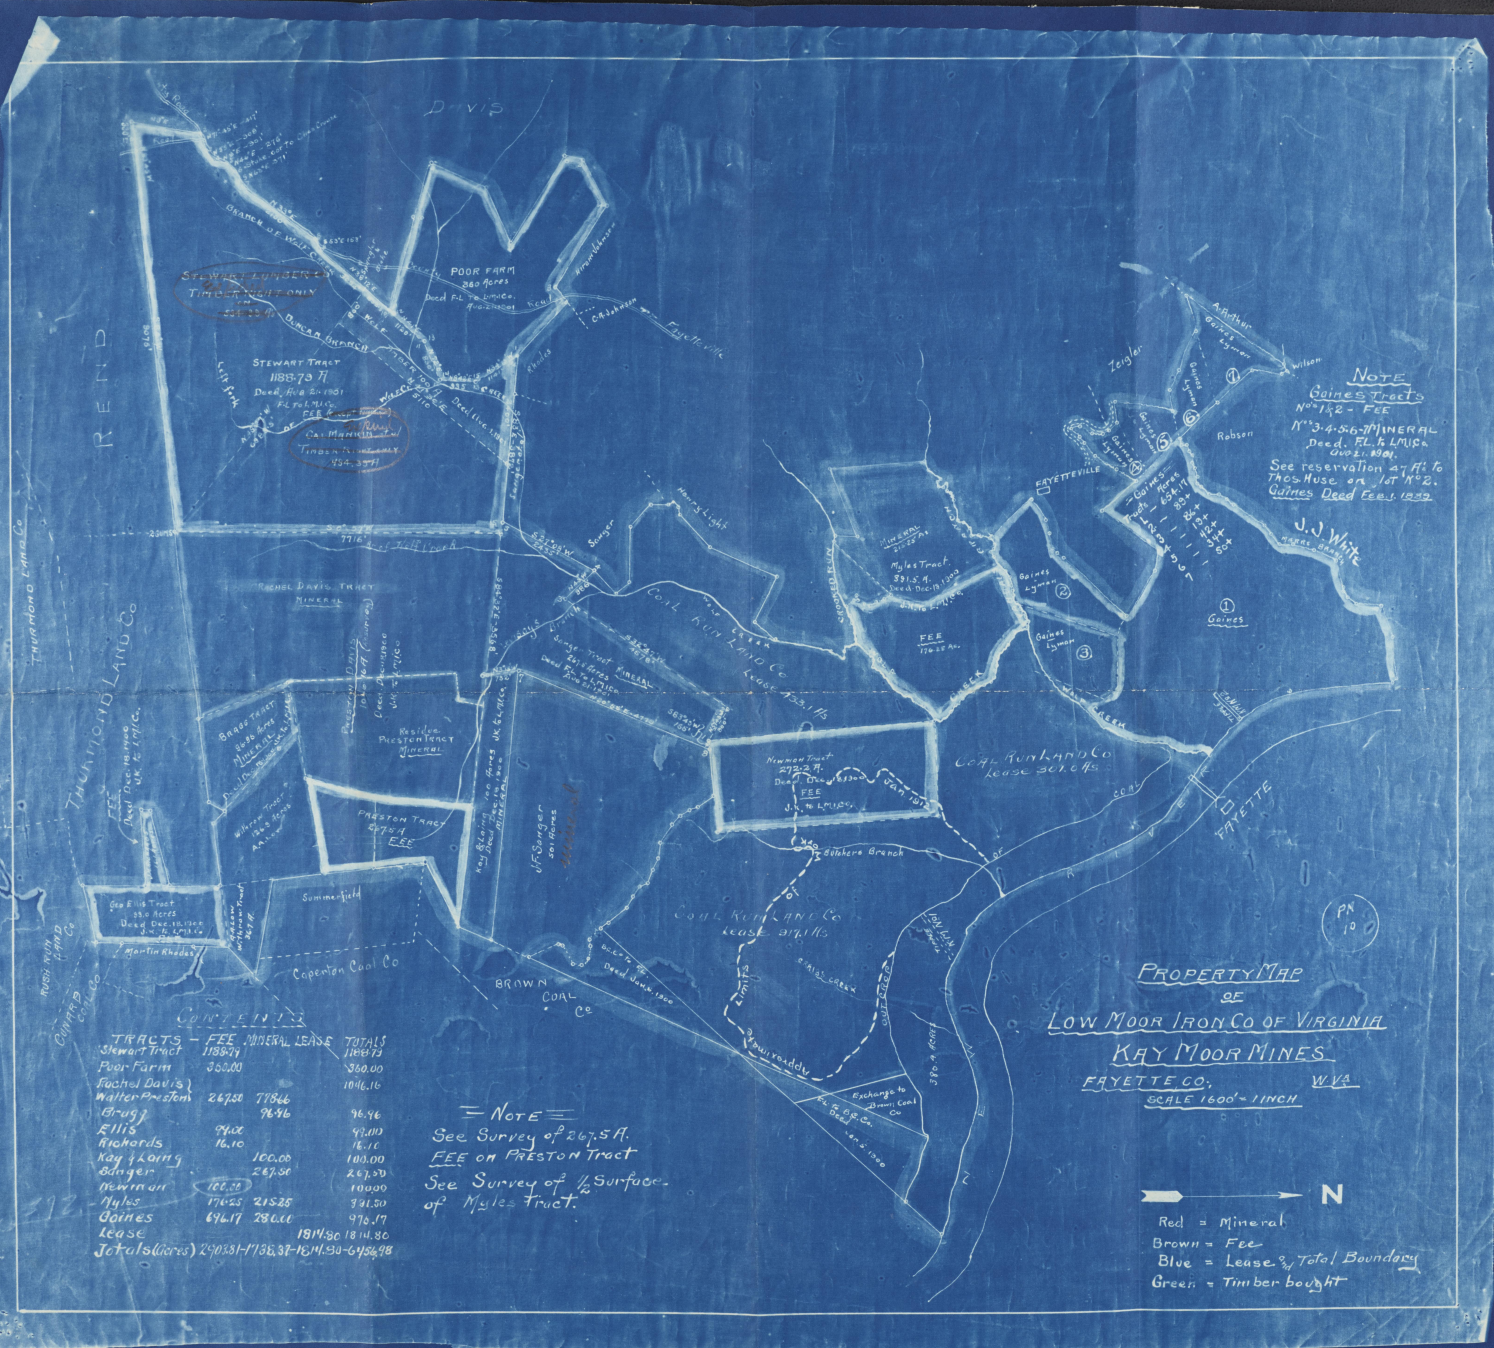

IN the calculations supporting the statements in his report, Mr. Lewellin puts the ore that can be mined on this property at over *ONE HUNDRED AND FIFTEEN MILLION TONS*.

OPINION OF PRACTICAL MINERS.

THE FOLLOWING STATEMENT from Mr. H. G. Merry, Superintendent of Mines, Lowmoor Iron Company; Mr. John S. Ham, Superintendent of Stack Mine, Dolly Ann Mine, and Iron Mountain Mining Company, and Mr. W. A. Rinehart, formerly Superintendent of Lowmoor Mines, speaks for itself:

"We have made a thorough and careful examination of the survey owned by the Rich Patch Iron Company, and are of opinion that it is an ore property of rare value. The vein of Hematite extends for seven miles and ranges in thickness from ten to fifty feet. The same vein at Lowmoor, just adjoining, has been mined to the depth of 175 feet, with no indication of being exhausted. The ore is exceptionally fine, averaging 50 per cent. of metallic iron.

"The fossil vein also extends seven miles and ranges in thickness from

ASHLAND ACADEMY.

A School for both Sexes, with Superior Educational Advantages.

It embraces a thorough English course, with all the branches usually taught in our best colleges, Latin, Greek, French, German, the Mental, Moral and Natural Sciences, Algebra, Plain and Spherical Geometry and Trigonometry, Mensuration, Practical Surveying and Analytical Geometry.

All the pupils are exercised daily in Composition, and on every Friday, each member in the male department is required to take part in debate. These valuable exercises are peculiar to this School.

The Grounds are admirable, containing several acres adorned with beautiful forest trees, offering the finest advantages for health, comfort and study.

The next scholastic year will commence on the 1st Monday in September and continue forty weeks.

TUITION FOR FORTY WEEKS.

TO CUSTOMERS

HAVE THIS DUPLICATE WITH YOU

When you get your goods, and check your goods by it, so that you may be sure you get all you are entitled to.

See that our trade mark "GOLDEN RULE" appears on the goods before you receive them. Unscrupulous parties every now and then attempt to secure orders for inferior goods on the strength of our splendid reputation. Do not allow yourself to be deceived.

We are not responsible for goods lost or stolen after you have checked and received them.

You have the privilege of examining each and every article before you pay for it, and if not exactly as represented, and fully equal to samples, we do not ask you to receive them nor to pay a cent.

You will receive a notice enclosed in a PLAIN envelope, about a week previous to delivery, stating exact date and place of delivery.

We insist upon our customers being treated by our representatives with uniform courtesy and respect, and to that end employ none but gentlemen to represent us. You can safely rely upon any statements concerning us or our goods, that they may make. You may know our representatives by their "Golden Rule" cards.

Very respectfully,

The Citizens' Wholesale Supply Co.

BIRDS EYE VIEW OF ASHLAND

THERE'S A REASON

MICHELANGELO, the great sculptor, once wrote, "It is only well with me, when I hold the chisel in my hand." We believe in Ashland and are confident of her ultimate supremacy as a great industrial centre; and like the famous master, we purpose to keep the chisel in hand, set to the blocking out of this destiny. Hence this hand-book—THE NEW CHRONICLES OF ASHLAND. It is to show to the investor, the artisan, and the home-seeker a community which is in many respects unique and ideal. Wait a minute! Ashland is *different*. From the sleepy little town of a few years ago, without name or note, she has developed into a modern city and community of nearly 20,000 people. Why? There's a reason.

Situated 150 miles above Cincinnati on the Ohio, Ashland nestles among vine-clad hills. Here are the rock-ribbed Ohio hills on her front with the great Ohio flowing full-freighted to the Father of Waters. To the south and west are stretches of hilly woodland, dotted with prosperous homes, churches and schools. The scenery along the well-known "Horse-shoe Bends" is scarcely surpassed by our great Western country. The ride by trolley along

ASHLAND IRON AND MINING CO. FURNACES

La Belle Riviere, or the ride by steamer, or launch or canoe on her placid bosom adds charm either to business or recreation.

In the heart of the city is Central Park, a virgin forest of 50 acres, acknowledged to be the finest natural park in the Middle West. To the East is Clyffeside Park, a veritable dream of beauty. Grounds are ideal, diversified by hill, dale and extensive forest. There are fine lakes, cool retreats, cozy nooks, rustic bridges, picturesque views, pavilions, band stands, rest cottages, and a splendid Casino seating 3,000 people. There are also picnic grounds and a ball park. The grounds and buildings are lighted by thousands of electric lights and electric arches, multi-colored. Clyffeside is open all the year, and here is held annually one of the greatest Chautauquas on earth. 13,000 people attended its sessions last year.

Ashland stands high and dry above the highest floods and above all the damps and dangers of malaria and ordinary disease. The climate is all that could be desired, the air is

invigorating and health-giving, and the death-rate is shown officially to be very low. It has not been blazoned abroad by trumpets but nevertheless Ashland is an all-the-year-round resort—far superior in some respects to much-heralded health-resorts.

The Ashland Public Schools are thoroughly organized on the most approved modern lines. The Course covers twelve years, eight in the grades and full four years in the High School. The Course in the grades covers the usual ground including literature, vocal music, nature-study, and physical culture. Choice of five courses is offered in the High School. There are four years of Latin, of English, of German, of Science, of Mathematics, of History, three years of French, two years of Greek,—all under instructors from the best colleges, and with the finest of equipment in the way of buildings and laboratories. Our High School graduates are admitted without examination to all the leading colleges including Ohio State University, Ohio Wesleyan University, Dartmouth, Vanderbilt, Woman's College of Balti-

THE JOHN MEANS SCHOOL BUILDING

THE VENTURA HOTEL

more, Wellesley, and all our State colleges.

The Parochial school is also doing excellent work along various educational lines and numbers among its teachers some of the best in the profession.

The Church life of our city is ideal. It is

AN ASHLAND RESIDENCE

practically a unit regardless of name. Splendid church buildings with superior equipment make possible the largest success of the most modern and aggressive methods. Graded Sunday Schools with trained instructors, Men's and Boys' Clubs with reading rooms, offer facilities

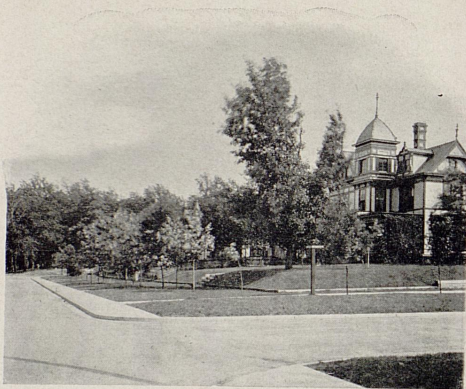

ANOTHER BEAUTIFUL HOME

of greatest advantage for the social and spiritual culture of both old and young. The mingling of the denominations in multiplied union services in which good fellowship is dominant, is like the mellow notes of silver chimes at vespers. Added to this is an aggressive, eloquent ministry, working in unison for the general uplift of the city, which builds for us an unsurpassed church-home life.

The Social life of Ashland is on a high plane. It embraces the purely social, the fraternal, the semi-literary, and the Club organizations. We boast of no less than 43 distinct Clubs and fraternal and beneficiary organizations. The Park City Club has a splendid membership, and its Club House is a marvel of elegance, comfort and refinement. The Elks

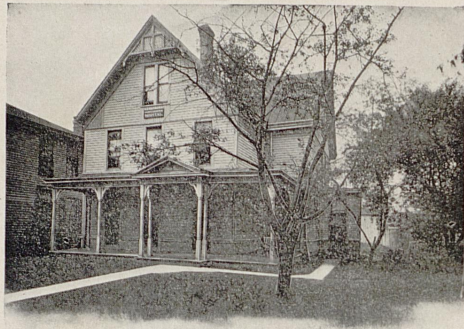

Club, the Merchants Club, the Commercial Club, the 20th Century Club, two Tennis Clubs, the Golf Club, the various C. L. S. C. Clubs, the Browning Club, the Comus Club, the Good Fellowship Club, the Social Brotherhood, the Baraca Club, the Wesleyan Brotherhood, are a few only of many similar societies.

For ten years the Young Men's Christian Association has been a factor in the moral development of Ashland. During this time it has grown from an organization of limited scope and small equipment to a tower of strength in

BATH AVENUE AND BROADWAY

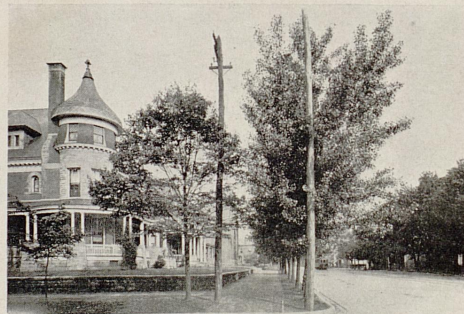

the community. It has a handsome brick and stone building well equipped for its all round work costing \$25,000.00. The building contains a large social room, reading room, library and offices on the first floor. In the basement are located nine movable shower baths and two tubs, lavatory basins, locker room, laundry, furnace and toilet. The Gymnasium is well equipped and has an inclined running track. On the third floor are found 33 sleeping rooms for railroad men, office rooms, and com-

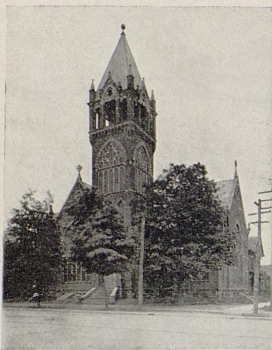

THE KING'S DAUGHTERS' HOSPITAL

mittee and class rooms for educational work and Bible classes. Few cities of much larger size can boast of such a complete plant free from debt. Doors always open to visitors especially young men away from home.

The King's Daughters' Hospital is an insti-

A CORNER ON WINCHESTER AVENUE

FIRST M. E.
CHURCH, SOUTH

tution of which every citizen is proud. Under the care of an excellent Board of Managers and Board of Trustees composed of some of our most prominent citizens, the work of a thoroughly up-to-date hospital, is going on.

FIRST BAPTIST CHURCH

The What-so-ever Circle of the King's Daughters was organized in 1897. In 1901 with \$25.00 in the treasury they incorporated under the laws of the State of Kentucky as a charitable institution.

By the tireless efforts of the Circle and their friends they have steadily grown. In February, 1906, they purchased the building they are now occupying. It is modern in every respect and can boast of an operating room which is a model of its kind, complete in every detail. The charity ward is always full. The poor and needy are taken care of free of charge, and receive the same care and attention as the pay patients. Those who are able to pay are

charged a reasonable sum per week, according to their means.

Ashland has ten miles of brick and bitulithic street paving constructed under excellent specification rigidly interpreted. There are no better paved streets. Brick are of first quality, laid on concrete base with cement filler. The curb and gutter are of concrete. The Street Railway tracks are of grooved girder rails laid on a heavy concrete base. Cement sidewalks have been adopted as standard construction and are replacing the red brick formerly used. Sewers ranging in diameter from 10 inches to 63 inches are built in all the principal streets and alleys. The paving is prosecuted in a definite plan, there being no disconnected or omitted blocks.

The City of Ashland obtains its water supply from the Big Sandy River, going seven miles from the city to obtain a supply of pure water. The Big Sandy River is a mountain stream having a drainage of four thousand square

FIRE DEPARTMENT NO. 1

CENTRAL HIGH SCHOOL

miles of sparsely settled mountain territory, which being free from sewage pollution enables this city to be free from typhoid epidemics. The water is pumped from the Big Sandy river to a series of reservoirs, four in number, having a capacity for storing twenty million gallons, which is enough to supply the city for eight days. The plant is equipped with the most improved system for the purification of the water and has a pumping capacity far in excess of all demands. There are in the system twenty-eight miles of mains ranging from four inches to twenty inches and within the corporate limits there are located on the mains 157 double nozzle fire hydrants for protection against fire. The water pressure is maintained constantly at eighty-five pounds, which can be increased to one hundred and twenty-five pounds reservoir pressure if needed. This city also has an additional pumping station located within the corporate limits, upon the Ohio river which is

kept ready for immediate service in case of emergency, thus furnishing a reserve protection not surpassed in this country.

The Ashland Post Office is one of the best equipped offices in Kentucky and is supplied with automatic combination lock boxes and electric cancelling machine. City free delivery service was established March 1, 1900 and rural free delivery service in April, 1904. The office has two stations. Station No. 1 is located in Pollard, a suburb, and station No. 2

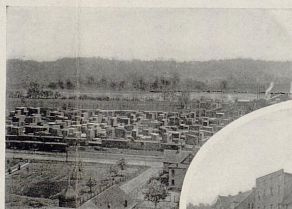

is located in the Ventura Hotel building. Amount of business transacted in the Money Order department for the four quarters ending, March 31, 1907, was \$103,046.75. There are twenty-seven Post Offices in eastern Kentucky that deposit their surplus Money Order Funds at this office.

YOUNG MEN'S CHRISTIAN ASSOCIATION

Total number of letters and parcels handled by the registry division for the four quarters ending March 31, 1907, was 74,264. This office receives and dispatches fourteen mails per day. The mailing clerks work in three shifts of eight hours each giving day and night service including Sundays. Total number of people attached to this office 26, and eight railway postal clerks report here.

Our telegraphic and telephonic systems of communication are complete and satisfying. The Western Union and Postal Companies operate splendid day and night service. The Park City Telephone Company owned and controlled by Ashland business men, has a common battery multiple switchboard of 1500 lines capacity, the latest board made by the Western Electric Company. Its terminal frames and protective apparatus also are made by the above

ASHLAND MILLING CO.

VIEWS IN CENTRAL
AND
CLYFESIDE PARKS

company. The outside construction is very strong and the city is fully provided with cables, some of which are under ground. The cable boxes are equipped with Cook's protectors.

The wires are all copper and the system is maintained in fine condition. The company has three copper circuits to Catlettsburg and four to Ironton, Ohio, and three full copper to Huntington, W. Va., all these giving fine toll service over the Bell Company's lines in all directions.

The Banking institutions of the community consist of four National Banks and two State Banks and Trust Companies, having in all a combined capital, surplus and undivided profits amounting to \$1,000,000.00 and deposits amounting to \$2,550,000.00. Their loans and investments amount to \$2,700,000.00. This in

addition to two Home Building Associations with \$1,250,000.00 capital provides ample funds for all commercial and industrial enterprises.

Ashland is distinguished for having a number of the most valuable industries and population drawing commercial features of any city of its size in Kentucky. Among these are its

PAROCHIAL SCHOOL

CATHOLIC CHURCH

newspapers. The Ashland Daily Independent was established in 1895 and has grown to be the largest daily in the entire north-eastern section of the State, circulating widely throughout a territory of more than fifty thousand population and reaching into the richest oil, gas, coal and timber region in the South. The Ashland Commercial is but recently launched, but it has already established itself and gives promise of great usefulness.

Twenty years ago Ashland was without a single Wholesale House of any kind. Today she is attracting more than ordinary attention as a Wholesale Mercantile Center.

The completion of several branch lines of railroad during the past few years has enabled our Wholesale Merchants to extend their business throughout Eastern Kentucky, a very large portion of West Virginia, Ohio and Virginia. At the present time our Wholesale Merchants and Packing Houses employ 32 travelling salesmen and do an annual business of \$3,000,000.00.

Ashland is so situated that it is what might be termed the gateway of all the lumber and tim-

bers produced in south-western West Virginia and north-eastern Kentucky, which section comprises perhaps more standing timber today than any other section of equal size in the United States. The Timber consists largely of Oak, Poplar, Hemlock, Linn or Basswood, Hickory, Beech, and Yellow Pine. There is manufactured and handled in and near Ashland, each year, some 200,000,000 feet of the various kinds of lumber and timber, amounting to some \$4,000,000.00. Ashland is one of the principal centers for the manufacture of Poplar lumber in the United States.

The Big Sandy River, Guyandotte River, Twelve Pole and other smaller streams, on which vast amounts of the various kinds of logs are floated out each year, together with the various railroads converging to Ashland, on

which large amounts of lumber and logs are shipped each year, naturally make Ashland the gateway for this vast enterprise. The territory of south-eastern Kentucky and south-western West Virginia is a network of small portable mills, most of whose product is handled in or

THOMAS BUILDING
HOME OF PARK CITY CLUB

CITIZENS BANK AND TRUST CO

through Ashland. Another strong feature of the timber and lumber business in this section is that the timber abounding in these sections is of the finest that exists today

in the United States. The Oak is very large, long bodied and of good texture which makes it desirable for nearly all purposes. A large amount of it is sawed quartered and produces a very fine grade of quartered oak. The poplar is known as the soft yellow poplar and is very desirable on that account. It grows very large so that wide lumber can be made from it which commands a ready market. The other woods are of the best quality and the machinery employed in manufacturing these various

midway between the vast steel-making ore deposits of the lakes and the coking coals of the mountains of Kentucky and the Virginias, where the Sea-board Air Line, Ohio and Big Sandy, and Chesapeake and Ohio Railways of the south-east connect with the C. H. & D. Ry.,

woods, is as perfect and complete as can be found.

The Iron and Steel Industry of Ashland extends a bright vision of hope and promise for the future, and why?

Situated as

VIEW-BATH AVENUE

the D. T. & I. Ry., and the Norfolk and Western systems for the great North-west, opening up ample and favorable transportation facilities to the vast consuming territory of the South, South-west, West and

THE ELMS

North-west. Iron and Steel manufacturing here, in all its varied branches, is no longer an experiment. Pioneering has been done, and actual practice has produced results unsurpassed anywhere. It was here that the first successful Steel Works was built in that part of the "New

BATH AVENUE

South," west of the Alleghenies and south of the Ohio and Kanawha Rivers, and it has been in continuous and successful operation ever since starting.

Within a radius of four miles from this point, eight large blast furnaces (and others building) are running night and day, crowded to their fullest capacity, turning out all grades of metal, such as Foundry, Forge, Malleable, Basic, Bessemer, and Ferro-Silicon Pig Iron, all of which is, or can be consumed or manufactured by the various Rolling Mills, Foundries, Machine Shops, Wire, Sheet, and Nail Mills, and Steel Works here, and the demand is not then fully supplied.

ON BATH AVENUE

The native or nearby ores, coals and limestone are excellent for car wheel, foundry, Basic and High Silicon pig iron, and the finished products of our manufactures stand in the markets of the country at large, equal to the best and surpassed by none.

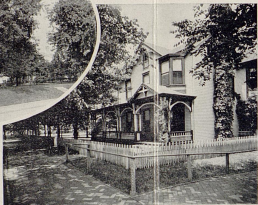

With these conditions existing, with our native resources already developed to a large extent, with the facilities for assembling other material here to advantage, the possible building up of a vast and profitable Iron and Steel manufacturing community at this point is no longer an experiment; and with capital, push and energy the fondest hopes for a bright and prosperous future can be realized.

The Coal of south-eastern Kentucky is well-known and that it is at our very door is an important feature not to be overlooked by investors and manufacturers seeking a location. The coal is of a bituminous nature high in fixed carbon and practically free from impurities and for both domestic and steaming purposes it is unsurpassed. For more than thirty years the industries of Ashland have been supplied with

this coal and at a price that has made it the cheapest fuel on the Ohio River. There is still within a radius of twenty miles a large acreage of fine steaming and coking coal that has never been opened up.

Natural gas from the famous "Warfield" district is furnished to consumers at 25 cents per thousand for domestic purposes and at ten cents for manufacturing purposes.

The Clay of the section is unequalled in any part of the state and it is doubtful if there

ON WINCHESTER AVENUE

is any territory in the United States where nature has done so much in this line. We

ASHLAND FIRE BRICK WORKS

have in this clay belt within a radius of thirty miles and in almost inexhaustible quantities—the celebrated Flint Clay of Kentucky, No. 1 Fire Clay, and No. 2 or Plastic Clay, for all of which there is a large demand. Here exists the greatest belt of No. 2, or what is commonly known as plastic clay to be found within the borders of the State. This clay is high in Silica and Alumina—especially the latter, which makes it very refractory.

The Ashland Fire Brick Company was organized in 1886, one plant with a capacity

ON GREENUP AVENUE

NORTON IRON WORKS

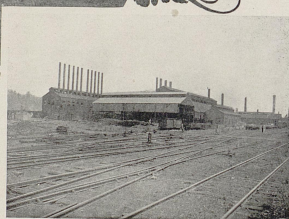

of eight thousand bricks per day; today they have five plants with a combined capacity of seventy-five thousand bricks per day. They manufacture all kinds of fire brick, making a specialty of Blast Furnace Brick and linings for Rotary Cement Kilns. They have established some of the longest records for Blast Furnace linings in the United States, four years and over being nothing unusual for their brick. Their Cement Kiln linings have established such a reputation that they are shipping them as far West as Utah and Colorado regularly and they have quite a trade in Mexico, Canada, Japan and Cuba. Here are employed 450 to 500 men. The Olive Hill Clays used in the higher grade brick are said by an English expert to be the finest in the world, and the clay which we get there is a very plastic clay making a very hard dense

brick which answers for the tops of Blast furnaces and other places where much abrasion is to be withstood.

This Company make six million vitrified Paving Brick per year, which are used throughout the country for street paving purposes.

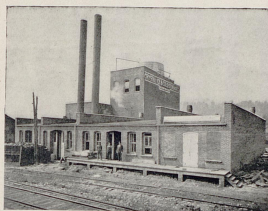

The Red Brick industry is profitably carried on throughout this section. All the plants manufacture more than ten million brick annually, employing about 100 hands. Much of this product is gas-burnt, fuel for this purpose being very cheap, and the brick is a very superior article.

In addition to farming, the Means & Russell Iron Company mine

ASHLAND STEEL WORKS

fire-clay and limestone which finds ready market at home. They employ about 50 men and mine more than 10,000 tons of clay and limestone annually.

CRYSTAL ICE & COLD STORAGE CO.

this book. The output now is more than 150,000 tons annually. Their Machine Shops and Foundry are of great interest, being operated on modern lines with excellent equipment. The Company also have extensive lumber interests.

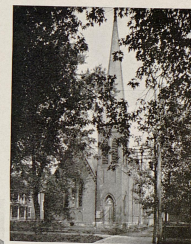

The Ashland Steel Company manufactures Bessemer Steel Billets, Slabs and Bessemer Wire Rods. Their daily output, 24 hours, is 600 tons Bessemer Steel, 300 tons Bessemer Wire Rods. This Company employs 750 to 800 hands. They produce a quality of steel and rods that is not excelled, have shipped their products to nearly all the large Manufacturers in the United States and a trial order has always been followed by inquiry for larger tonnage; quality of product is known throughout the United States.

The product of the Ashland Sheet Mill Company's Plant is about 24,000 tons per year, composed of black galvanized flat sheets and the various forms of painted and galvanized roofings. They employ about 450 men, all of whom are skilled to a more or less extent. Raw material is in the form of a billet of home manufacture. This is broken down to a sheet bar, from which the sheet is made, after which the same goes through the process of cold rolling, annealing, and galvanizing, when it is ready for the market.

Ashland Iron and Mining Company conduct a varied industry. They have in operation furnaces—two stacks—coke ovens, cement mill, mines and general stores. The furnaces manufacture strong foundry, high Silicon and Bessemer ferro-silicon pig iron with an output of 200 tons a day. The furnaces run 365 days per year and employ 500 men.

The Coke ovens have 66 Bee-hive ovens, making each day 100 tons of hard furnace coke. 20 men are engaged at the ovens. The Cement Mill has three dryers, four tube mills, capacity 500 barrels a day of Puzzolan cement. This plant is operated by alternating current electric equipment. A 90 barrel per day lime-kiln is run in connection with the Cement Mill.

The company owns and operates extensive coalmines whose product has been fully described elsewhere in

CHRISTIAN CHURCH

CALVARY EPISCOPAL CHURCH

The Plant is modern in every particular being capable of competing with any

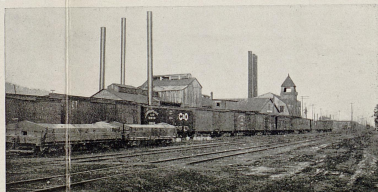

THE HOME OF THE COMMERCIAL CLUB OF ASHLAND

ASHLAND LEATHER CO.

other institution of a like kind in the country. The location is particularly favorable, owing to an extensive market through the South for their product.

The Norton Iron Works are manufacturers of pig iron, steel cut nails, nail plate, wire nails, polished and galvanized staples, plain and galvanized wire, and barbed wire, both painted and galvanized. The out-put is approximately 100 tons finished material, and 150 tons pig iron per day. There is employed on an average 600 to 700 hands.

ASHLAND ARTIFICIAL ICE PLANT-ELECTRIC LIGHT PLANT

The Ashland Leather Company operates an up-to-date tannery. They turn out each day 400 heavy packer hides. Their product is exclusively high grade oak sole leather and belting. The plant covers several acres and employs 125 hands.

One of the largest and best equipped plants in the city is the Ashland Foundry and Machine Works. They manufacture all kinds of iron and brass castings includ-

ASHLAND LUMBER CO.

have a combined capacity of 300 barrels of flour, 1,000 bushels of meal and 3,000 bushels of chop, daily. They are equipped with the latest improved machinery.

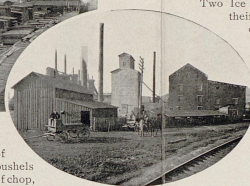

Transportation is the most important factor to the manufacturer and the manufacturing community. Indeed there can be no "Manufacturing Community" without ample water or railroad transportation, and the fact that our city has doubled in population in the past eight years, that new industries have been added and every industry has been constantly in operation without a single failure in ten or fifteen years is the best evidence that there is no lack in this respect.

The facts are that Ashland is particularly fortunate in this respect having one local line, the Ashland Coal and Iron Railway, reaching the coal and clay fields of north-eastern Kentucky, and two splendidly equipped and well managed lines from the Atlantic to the Middle West, the Norfolk and Western Railway from Norfolk, Virginia, to Columbus and Cincinnati, Ohio, and the Chesapeake and Ohio Railway from Newport News to Cincinnati, Ohio, and Louisville, Ky., each line having coal fields inexhaustible and sufficient for supplying

ing castings for mining purposes and do general repair work. The plant has been recently rebuilt and improved. It now has an equipment of the latest and best machinery made. In foundry, blacksmith and machine shop departments, it employs about 50 men.

Two Ice Factories supply the community with their product. They have a combined capacity of 70 tons daily. A great cold storage plant in process of erection will have a capacity of 120,000 feet.

Two Roller Flour Mills, second to none in the country are engaged in the manufacture of flour, meal, chop and feed of all kinds. They

coal and coke for manufacturing and domestic purposes for ages to come.

That it may be seen and well understood that Ashland has been well served during the past it

CENTENARY M. E. CHURCH, SOUTH

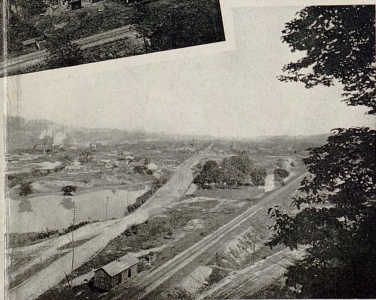

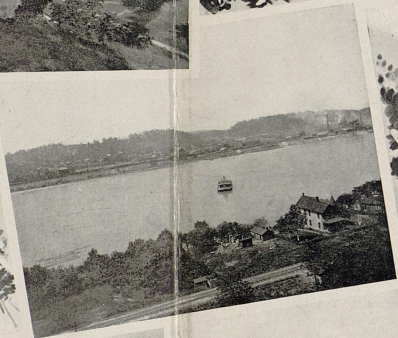

is only necessary to mention the fact that during the year 1906 the several rail lines handled in and out of Ashland proper the immense sum of one million tons of freight, equal to fifty thousand cars of twenty tons each.

This is not all by any means as our manufacturers are served by steam boats plying the waters of the Ohio River and by two other rail-

road lines—the Cincinnati, Hamilton and Dayton Railroad and the Detroit, Toledo and Iron-ton Railroad from Toledo, Ohio, on Lake Erie, both of which reach Ashland by barge from Iron-ton.

The management of these lines has always been liberal with respect to the extension of tracks and switches, and the putting in of rates that has enabled the manufacturers to bring in the raw material and forward the manufactured article to the markets of the North, South, East and West, including foreign lands.

To the Investor

This Booklet Must Prove Two Things:

¶ *First*—That many articles of manufacture may be made at Ashland at a minimum of cost.

¶ *Second*—That manufactures may be shipped over a wide field economically and without delay.

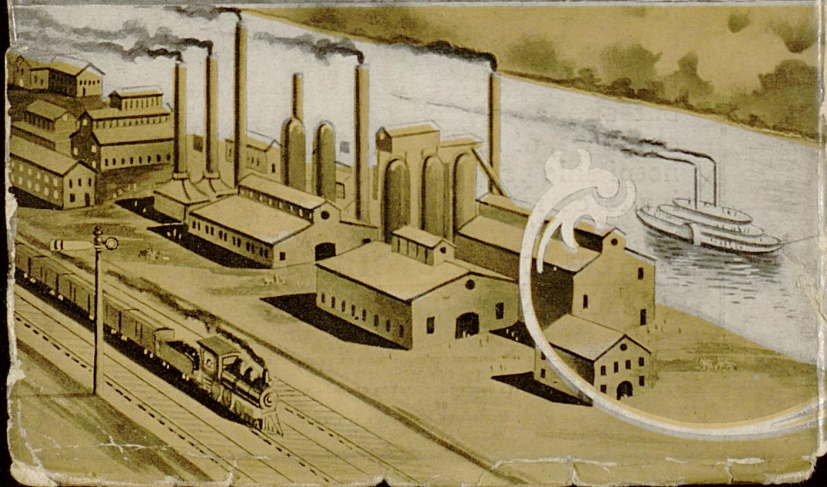

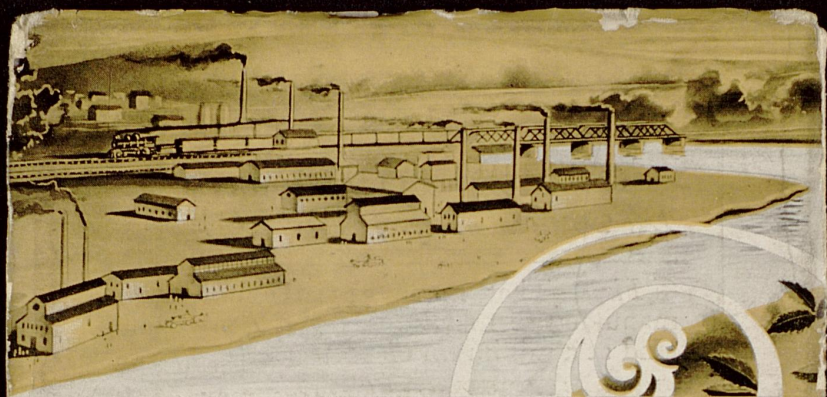

¶ We have cheap fuel, the raw materials, abundance of labor of every grade, (without any friction among the laboring element—no labor troubles so common elsewhere), and unsurpassed facilities for transportation. Ashland is the natural gateway between the Northern and Southern section of the Middle-West and the centre of a big trade between East and West. As to markets—75 per cent of the entire population in the United States is within a radius of about 500 miles of Ashland.

¶ Any manufacturer using raw material—coal, iron, clay, hard woods, poplar or other lumber, leather, hides, will do well to investigate here. Shoe and furniture factories especially will reap every advantage.

¶ We have a city of great industries, but also a city of schools, of churches, of HOMES. We have a hospitable people. Prove us. We invite correspondence.

ASHLAND, KENTUCKY

DESIGNED, ENGRAVED AND PRINTED UNDER THE DIRECTION OF THE ASHLAND INDEPENDENT BY THE H. W. WEISBRODT CO., CINCINNATI, OHIO.

TO OUR PATRONS:

Our way of arousing your interest in our work may come to you as somewhat of a surprise.

It is done for the purpose of making you familiar with our service of reproducing a favorite photograph of yourself, or any other member of your family, in the form of a miniature painting, hand colored in aquarelle, on ivory.

We are all owners of a certain photograph to which, for reason of genuine sentiment, we have become much attached. Such a picture reproduced in aquarelle on ivory should most certainly prove to be a highly cherished possession, or might become a most appropriate gift for many occasions.

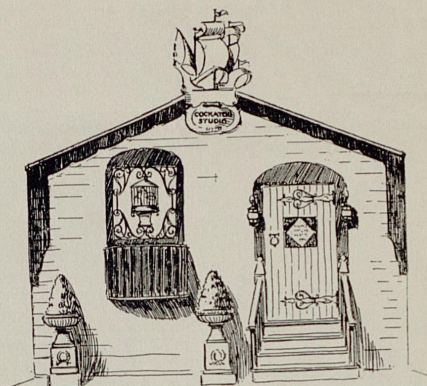

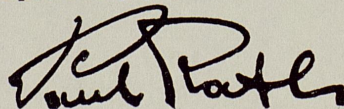

It does not necessarily mean that such a picture should be of recent date, in fact some of our most wonderful work has been done on old family portraits, which their owners wished preserved for themselves, even if not for gifts, their permanence being guaranteed by us.

Freehand miniature painting on ivory (not to be mistaken for photographs printed on ivory and traced) is indeed one of the most charming of all arts and because of its exquisiteness gives an accent of personal distinction to the general decorative effect of the room in which they are used. There are many unique and attractive ways in which they may be framed. Your choice or our suggestion in the manner in which they may be done up, either way, they are sure to meet the demand of the most exacting taste.

We have in our service a miniature painter who is one of the best known artists of Paris, France, whose work for true likeness and artistic distinction is unexcelled, and it has time and again met with the enthusiastic approval of our friends. Knowing this, and always aiming to have our work done to the complete satisfaction of our friends, we accept commission for portraits with the understanding that the finished work be subject to approval and acceptance by the person giving the order.

We would deeply appreciate an opportunity to submit samples, and quote you our lowest prices -- which you will find are much lower than usually charged for work of this kind.

Very respectfully yours,
