LETTER OF TRANSMITTAL

COMMONWEALTH OF KENTUCKY
DEPARTMENT OF EDUCATION
FRANKFORT

To the Governor and the
General Assembly of the
Commonwealth of Kentucky:

In compliance with Sections 57.140 and 156.250 of the Kentucky Revised Statutes, I submit herewith the report of the Superintendent of Public Instruction for the biennium ended June 30, 1945.

Part 1 represents the Report of the Superintendent of Public Instruction and Part 2 contains statistical reports concerning personnel and finance from the standpoint of the state at large and from individual districts of the state. Your attention is called to the Summary of Recommendations concerning Kentucky's Educational Needs, which appears at the beginning of Part 1 of this report.

Respectfully submitted,

JOHN FRED WILLIAMS
Superintendent of Public Instruction

January 1, 1946

PART I

REPORT OF THE SUPERINTENDENT OF PUBLIC INSTRUCTION

A SUMMARY OF RECOMMENDATIONS CONCERNING KENTUCKY'S EDUCATIONAL NEEDS

This volume contains the Biennial Report of the Superintendent of Public Instruction for the school years 1943-44 and 1944-45. It contains extensive reports from the bureaus and divisions in the Department of Education. The report gives information about public elementary and secondary schools, what they are attempting to do and the needs which should be met if maximum service is to follow. The statement which follows here points out those phases of education which need the attention of the Legislature.

1. **We must make our school plants safe, sanitary, and suited to the expanding needs of our children.** Very little has been done since the war started to keep the school plants in good repair. The erection of new buildings to meet the growing needs of the pupils in the schools has been out of question. This has been due to the fact that war needs have made building materials unobtainable. Only meager repairs have been possible. Only in extreme emergencies have burned buildings been replaced. No expansion has been possible. Progress in education has been slowed up.

We must open the gates of progress by opening the doors to school building construction and repair. Out of the war has come a higher regard for effectiveness in all things. This generation must have school buildings in which they can live healthfully and safely, and where they can learn and work toward the life they will live. Better health, better opportunities to learn, demand efficiently equipped school buildings. Kentuckians cannot accept less for the young people. **There is immediate need for the expenditure of approximately $25,000,000 on school plants and a longtime need for the expenditure of probably four times that amount. The 1946 Legislature is asked to open this door to expansion by authorizing boards of education to provide building funds to meet immediate and long time needs.**

2. **The state's program of pupil transportation should be brought in step with expanding pupil needs.** The amount of money now expended for transporting pupils to school in rural areas ranks second only to the amount of money spent for the salaries of teachers in these schools. The ability to transport country boys and girls to school determines to a large degree whether these young people can have an effective school program. This is especially true for young people of high school age. We cannot have extensive curriculums in small high schools. We cannot pay the cost. We must consolidate high schools if we have programs to meet the needs of young people. We cannot consolidate schools unless we have adequate, safe transportation. This question is a major concern in any attempt to meet the needs of young people of this generation.

It may be necessary at some time in the not too distant future for the state to finance and operate a pupil transportation program if educational opportunities are to be equalized in all parts of the state. Many districts need help now, however. This help should come so it can improve transportation next year. Districts have expanded their current revenues in trying to keep the schools going under war-time living costs. Buses are worn out. Boards of education do not have adequate funds with which to

replace them. They need help. **The Legislature is asked to provide a fund of not less than $500,000 per year to be used in aiding districts to rebuild their transportation systems and to extend them in keeping with the needs of our expanding school program.**

3. **Human waste due to non-enrollment and non-attendance must be decreased and, finally, stopped.** We can at once stop blaming the failure to enroll in school and the failure to attend regularly upon any one thing. We can recognize that non-attendance and non-enrollment are caused by many things. We must locate these causes and remove them. An attractive, safe and sanitary school plant will help; safe and effective transportation will help; a wider use of health services will prevent absence on account of illness; a well-rounded school program will help; and above all, a well-educated, well-paid, conscientious teacher in charge of a school will draw children to it. When we help get these blessings for a school we will improve attendance and reduce human waste due to non-attendance.

We must bring this problem home to parents. We must improve the enforcement of health laws and provide new health education and services. We must pass laws which will prevent the employment of children who should be in school. We must strengthen our supervision of attendance and enforce attendance laws. There should be in every school system an adequate staff of well trained persons who understand how to help people keep their children in school. We need persons as attendance officers who at least are college graduates and who are trained in social and economic problems of living. These persons should be well paid and treated as professional leaders. **To aid in improving attendance the Legislature should increase the compulsory age limit and the minimum age for issuance of work-permits so that children who should be in school will not be exploited.** Records show that Kentucky's rank in school enrollment is due largely to the age limits of compulsory attendance.

4. **The school's learning program must be made to meet the needs of the young people of this generation.** When about 81,000 young people of high school age never enroll in high school it is time to raise some questions about what the high schools offer them. When one out of five of all children of school age (6 to 17 inclusive) never enrolls in school, the question becomes louder. There is no one cause of non-attendance and there is no one answer. There are many causes. There are many answers. We must find the causes and the answers.

It has been found over and over again that pupils attend school if the school is accessible, if it is housed in a safe and sanitary building, if it has a good physical education program, if it offers a variety of interesting programs of study, and if it is staffed by a principal and teachers who understand children and are educated to the degree that they can work with children and young people. The reasons for non-enrollment and non-attendance may be found in one of these phases. Young people are not fickle. They are earnest. They want meaningful living. They know when a curriculum meets their needs. They want to know how to live and work in the world in which they live. They want to understand art and music, and they want to learn how to live and make a living. Many boards of education cannot provide the things their young people want, the things they need, because they are restricted. They are not permitted to pay

out for education more than 75 cents on each $100. Other boards are permitted to expend twice as much on each dollar they possess. We have placed a severe penalty on a person who lives in a county school system. We have lifted the penalty from the person who lives in a city. We say to a country father, "We will let you spend only 7.5 mills out of each of your dollars on the education of your child, but we will let the man who lives in an urban center pay 15 mills out of each of his dollars on the education of his child. We let him get twice as much for his boy as we will let you have for your boy."

The Legislature is asked to stop this discrimination. The lawmakers are asked to equalize the right to levy taxes to support schools in both city and country at the maximum rate of 15 mills per $1.00, so that people in rural districts will have the right to provide a rich curriculum which will include vocational and occupational training. We must start now and advance as rapidly toward providing for every child in this commonwealth opportunity not only to citizenship education but to be trained in the occupation, vocation or profession in which he can serve best and find greatest happiness.

5. **Kentucky's children should have teachers as well trained for this work as physicians are trained for their work.** We must move toward this goal at a greatly increased rate. When the war came we had made great progress in this direction. At that time we were proud to report that less than 6 teaching positions out of each 100 were held by persons with less than two years of college preparation. More than half of the positions were held by persons who had four or more years of college preparation, and a considerable number had one, two or three years of graduate preparation. Today almost one-fourth of our teaching positions are held by persons who cannot meet certification requirements, and more than one in five do not have two years of college preparation.

It will be a difficult road back to the place we were when the war started, but it need not be a long road if the problem is attacked boldly. We must face the fact that we shall reach none of our educational goals unless we have an excellent teacher no matter in what direction we turn, what steps we take, nor what we do. The excellent teacher is the absolute essential and we may as well face the issues involved and do something about them.

The issue where all other issues converge is that the teacher must have **security** if he is to be effective. Security includes training, tenure, retirement, salary, period of employment, and working conditions.

a. **The teacher has a sense of security if he is well educated and well trained.** To guarantee this, every effort must be made to up-grade those regularly certificated teachers by providing in-service education opportunities at public expense. Since up-grading will be reflected in the improved educational opportunities of the children, it is a legitimate public expense. The training level at which inexperienced persons may be admitted to teaching should be raised as soon as possible to four years. **At the 1946 Legislative session the way should be opened so that the State Board of Education will have the right to up-grade present staff.**

b. **It is expensive to train for teaching.** Four years of college preparation involves what it actually costs to pay for board, room, books, clothing, fees, etc. for a four-year period, and, also, the salary the college student fails to earn by the fact that he is not employed. Actual and potential expense of going to college for four years is at least $8,000 and probably $10,000. This means that he should have the security of a long tenure. And since this long tenure in one job makes him less effective in another job in old age, he must have retirement security. The money he receives upon retirement should not be a mere pittance. He should not be forced to reduce, substantially, his level of living upon retirement. **The Legislature is asked to take steps not only to increase the mimimum amount of retirement income but the maximum, and to make other minor adjustments as will correct some of the weaknesses which have been revealed in the retirement law.**

c. **Security of the teacher can be increased by improving working conditions.** When the war began there were approximately 18,800 teaching positions and principalships in Kentucky. Now there are not more than 17,700. This represents a loss of some 1,100 persons. It means that 17,700 teachers have a teaching load as heavy as 18,800 teachers had at the beginning of the war. Teachers in many schools are over-crowded with numbers or with classes. This condition reduces the sense of security. Norton, in a study completed some months ago, indicated that Kentucky should have 21,000 classroom units or 21,000 teachers and principals. **To make pupil-teacher ratios normal Kentucky should increase the teaching staffs by some 3,000 to 3,500 persons. This means a greater financial support. This is a problem the Legislature must face now or in 1948.**

d. **The teacher should be employed for as long a period each year as other people in the public service.** This should either be done or the teacher should be paid as other employees for the entire year. This means a full salary for a full year. The teacher has spent 8 to 10 thousand dollars upon his education. He must pay rent, buy food and do all the things other people do. He cannot always be sure of employment during the vacation period. No one can. Since he has invested so heavily in his preparation, he should have the security of full year employment. Some districts have school terms of 10 months, others 9 months, others 8 months, others 7 months. The increased appropriation made by the 1944 Legislature enabled us to increase the school terms. In 1943-44 there were 72 counties which had 7 month terms. In 1944-45 the number had reduced to 55, and in 1945-46 only 46 counties will have 7 month terms. It is a travesty to expect a well-educated person to be willing to work for 7 months followed by a period of 5 months in which he will remain idle or risk temporary employment. He has very little security. We must move to close the gap. Not only will a standard school term tend to secure a good teacher but it will decrease retardation. Data submitted in this report by the Division of Census and Attendance shows that 26 per cent of the pupils enrolled in schools with seven month terms fail to pass a grade in one year. On the other hand, only 12

percent of the children in schools with 9 or 10 months fail to pass a grade in one year. A longer school term will reduce the failures. **The Legislature is asked to increase the minimum school term at least 8 months in 1946. This should be considered as the next step. It should lay the foundation for a 9 month term in 1948.** A longer term should come as the State is able to increase it beyond 9 months.

e. **Teachers must be paid salaries in keeping with the importance of their work.** The Legislature in 1944 made a generous start toward giving teachers increased security. Not only did that Legislature provide for a reasonably substantial increase for the current biennium but appropriated $3,000,000 to be paid to teachers for the year 1943-44. The $15,000,000 appropriated in 1944 increased the per capita from $13.49 in 1942-43 to $19.16 in 1944-45 and to $19.77 in 1945-46. In addition to this $1,500,000 was distributed to counties on an equalization basis.

The effect of these appropriations was to increase the state average teacher's salary from $782 in 1942-43 to an average of $1,094 in 1944-45. It increased average salaries for elementary teachers from $676 in 1942-43 to an average of $984 in 1944-45. It increased the average salaries of high school teachers from $1,139 in 1942-43 to an average of $1,456 in 1944-45.

This was a forward step. It must be remembered, however, that there are 50 per cent of the teachers who get less than the average, less than $984 per year in the elementary schools, less than $1,456 in high schools. In fact some elementary teachers get less than $500 per year, or less than $10 a week for the year, which is less than decent board and room cost.

The Legislature is asked to provide a minimum salary of $800 per year beginning in 1946-47. This with an 8-month school term requested in this statement will provide a minimum of $100 per month for 8 months. This means that the teacher who would draw the minimum 8-month salary of $800 will have $15.40 per week to live on and set aside savings and continue her professional growth. This $800 for 8 months represents only the next step toward security.

In order that a minimum school term of 8 months and a minimum annual salary of $800 may be provided for teachers, the Legislature is asked to appropriate annually for the next biennium a per capita fund of $18,000,000 and an equalization fund of $2,000,000.

6. **Free textbook service should be extended to the high school grades.** In the school year 1934-35 books were furnished free to the first four grades. The next year the fifth grade was included. As the years have gone by free textbooks have reached all the grades, 1 to 8 inclusive. This progress has been made on an annual appropriation of $500,000. **It is recommended that the Legislature make provision for local adoption of textbooks from a multiple list prepared by textbook commission or committees and approved by the State Board of Education.**

7. **Facilities for extending opportunities for training in vocations and trades should be increased.** Our programs of education in every school should tend to function in the lives of young people. Shop work and work

experiences should be provided in elementary as well as secondary grades. Vocational education should be an integral part of the total education program in every school system. Up to this time relatively small sums have been appropriated by the state for vocational education. In 1944 the largest appropriation ever made by the Legislature was provided. The program, however, is still limited to those schools in the main which qualify for Federal Aid. Industrial arts should be found in the upper grades of elementary schools. **It is recommended that the Legislature of 1946 make provision for extending the program for trades and occupations in the high schools, for industrial arts in the elementary schools, and for increasing emphasis upon agriculture and home economics. The trade schools located in different regions should be strengthened.**

8. **The Work of Vocational Rehabilitation must be expanded to meet increasing burdens.** The School for the Blind and the education of other handicapped persons is increasing in cost. Many blind persons have not been reached, due to lack of funds and personnel. Meeting the needs of the handicapped calls for increased costs in materials, services and in personnel. We cannot neglect this group. **The Legislature is asked to provide for the needs of the Division of Vocational Rehabilitation, and to appropriate annually $111,000 for the School for the Blind. Funds are needed for operating enterprises for the training and employment of blind persons.**

9. **Equalization of educational opportunities must be provided for all races.** Due to sparse population, it is difficult to provide adequate educational facilities for Negro children at a reasonable cost. In some instances elementary school population is so sparse that typical schools are difficult to provide. There are almost 2,000 Negro boys and girls of high school age living in areas where no high school facilities are provided for them. This means that high school facilities must be provided for them away from their counties. Lincoln Institute has been attempting to meet the needs of those who are unable to attend high school at home or in adjacent districts. This school is rendering every service possible within the limits of its facilities. It has many more requests than can be accommodated. **It is essential, therefore, that the appropriation for Lincoln Institute by the 1946 Legislature be $45,000.**

10. **Increased leadership in the supervision of instruction must be provided.** The Department of Education staff is doing all it can to improve learning in the schools. Research and consultant service is provided to local schools to the limit of the Department's facilities. Few states in the union have as small a number of persons on their instructional staff as Kentucky. In 1944, the Legislature provided for the employment of one supervisor of elementary schools. An examination of the report on elementary schools shows that her work has been effective. We now have one high school supervisor who supervises 681 high schools in the counties and cities of Kentucky employing more than 5,000 high school teachers. We have one elementary school supervisor with nearly 13,000 teachers located in the counties and cities of Kentucky. One person is employed as supervisor of Negro schools. **The Legislature should relieve this situation at its session. Two to four additional staff members are needed in the field of instructional supervision, curriculum development and in-service teach-**

er education. Recommendations are made in the budget of the Department for these additional services.

11. **The Division of Health Education should be supported by state funds and should be strengthened.** A Division of Health Education was established in the Department of Education in 1944. This was made possible through a grant from the W. K. Kellogg Foundation. The amount granted provided for the salary and travel of the Director and for secretarial help. Additional funds were granted to help in training county health coordinators, and for aiding selected counties in employing county health coordinators and supervisors. The program of this Division has been prosecuted vigorously. The Foundation will not support the Division any longer than the current school year. **It is recommended that the Legislature provide the funds for the continued maintenance of the Division of Health Education in the Department of Education.**

12. **The Division of Negro Education should be supported by the state.** For many years the Division of Negro Education has rendered conspicuous service to the cause of education for that race. Since its beginning, the services have been supported by a private foundation, namely, the General Education Board. That Board has announced that it cannot make funds available after the current year to support this service. **The budget presented to the Legislature by the Department of Education recommends provision for this service.**

13. **Every facility should be provided to aid returning veterans to continue their education.** Many young men entered the service before they completed high school. While in service they took courses and did types of work which may be considered in completing requirements for high school diplomas. Much consultation and correspondence is necessary in meeting the problems of these young men. There is need for a person in the Bureau of Instruction who can give at least half time to advising and assisting veterans in getting into training programs. **The Legislature should consider this problem when dealing with the budget requests of the Superintendent of Public Instruction.**

14. **The facilities of the State Department of Education should be strengthened so that its services to the schools may be more effective.** At present the Department is operating with inadequate staff and inadequate support. The Superintendent of Public Instruction has an appropriation of $67,500 with which to staff the Department of Education. With this he must employ professional staff and secretaries and pay all the travel for those who serve the public schools in the field. In addition to this, he must maintain his office. Out of this fund he must maintain the services of many divisions, including administration, finance, transportation, buildings and grounds, public relations, research and statistics, census and attendance, supervision, Negro education, and health education. Out of this fund there is available only enough money to employ staff for administration, finance, census and attendance, and supervision. There are no people employed by the state as Directors of Negro Education, Health Education, Research and Statistics, Public Relations, Transportation. Two of these divisions are supported by outside agencies and the work of the others, as far as possible, is assumed by other staff members.

We are asking for $125,000 in order that we may provide professional staff to render service in the following additional areas: Research, Public Relations, Negro Education, School Transportation, School Buildings and Grounds, Health Education, libraries, and for adding personnel to other under-staffed divisions of the Department of Education. This amount will have to be used carefully if it provides these services.

The Division of Teacher Education and Certification has had an appropriation of $15,000 annually for almost 20 years. During that period, the services rendered are almost doubled. The Director of this Division has the responsibility of supervising teacher education, being Secretary of the Council on Public Higher Education, Secretary of the State Board of Education, and coordinating the work of the Bureau of Instruction. There is one professional assistant in this division, two full-time secretaries, and one part-time secretary. This division should have general supervision over curriculum development. The clerical staff should be expanded. This division has collected fees year after year and turned them into the State Treasury. This amount has ranged annually from approximately $8,000 to approximately $20,000. **In order that this division may render the service in curriculum development through the employment of professional and clerical help, the Legislature is asked to appropriate $20,000 for each year of the next biennium.**

The State Board of Education appropriation of $15,000 is not enough to permit it to perform its proper functions. The fund is spent for materials, printing and supplies used in the Department of Education and for forms and reports used by the public schools. A very small part is used for employing a secretary. **To meet the increased cost of printing and services, the Legislature is asked to appropriate $20,000 annually to the State Board of Education.**

The Division of Free Textbooks asks that $500,000 be appropriated for each year of the next biennium in order that its services may be maintained.

In 1944, the Legislature made a substantial increase in the appropriation for Vocational Education. This increase was from $41,604 in 1943-44 to $250,000 for 1945-46. During this period the program of vocational education has started to expand in keeping with public demand. Not only have the agricultural education and home economics education programs continued to serve, but trade and industrial education has expanded. Several area trade schools have been in operation. These schools are ready to meet the need of peacetime occupational and trade training. In order that this program may meet more effectively the needs of these times, the Legislature is asked to provide for the next biennium an annual appropriation of $730,410.

Funds for Vocational Rehabilitation of handicapped persons should be increased. In 1944, the state increased the annual appropriation from $39,-991 to $61,000. This increase has helped to increase the effectiveness of our work during the years. The needs are increasing and the next biennium will demand increased services. **The Legislature is asked to provide $100,000 annually for the next biennium to match the $297,707 allotment expected from the Federal Government.**

These recommendations, if carried out, will do much to strengthen the State's program of education, and will open the way for substantial progress in the future. These recommendations are based upon facts revealed in detailed reports which follow in this volume.

BUREAU OF ADMINISTRATION

General Administration

Some accomplishments of the Bureau of Administration from January 1944 to January 1946 consist of advising with boards of education and assisting them in the reversion of four independent school districts to the county school systems and the voting of sub-district taxes on a county-wide basis in three county school districts.

The independent districts which reverted to and became sub-districts of the county school districts were Bloomfield in Nelson County, Grayson in Carter County, Franklin in Simpson County, and Crofton in Christian County. By Bloomfield becoming a part of the county school district the board of education was furnished an opportunity to provide educational opportunities for the people of Bloomfield and the surrounding territory in a more economical and efficient manner than either district could furnish such facilities working as separate districts. The merger of the fourth class city of Franklin with the county school district enabled the educational authorities of that district to have a county-wide unified school program. The board of education can now furnish the same educational facilities for all the children of the district. This action places the Simpson County Board of Education in position to go forward with an outstanding educational program. The merger of the Crofton Independent district will enable the county board of education to provide educational facilities for the children of the territory surrounding Crofton in a manner which could not be done before the merger.

In addition to the merger of these districts, assistance was given to three county boards of education in voting sub-district taxes throughout their county districts. These counties were Simpson, Owen, and Trimble. The sub-district tax voted in Simpson County was 50c. This tax gave the board of education income from a maximum tax of $1.25 throughout the district and put the board of education in a position to extend the term of the school to nine months. The additional tax of 25c in each of the county districts of Owen and Trimble was necessary in order that the boards of education might continue the same educational program which was operating at the time the tax was voted. Increased costs in each of these districts were such that the boards of education would be forced to reduce some of the educational advantages offered the children, such as shortening the term, reducing transportation facilities, unless the tax was voted. In each of these districts the people voted the additional income by an overwhelming majority.

Transportation

School Transportation Survey

During the school year 1944-45 a complete survey of the school transportation system of the state was made. This study involved collecting

information on, and charting routes of every school bus operated in the state. Information was collected on several hundred items and compiled as a basis for recommending to the Office of Defense Transportation the amount of gasoline needed to operate the buses. Setting up machinery for collecting the information involved holding conferences with school officials and officials of the Office of Defense Transportation. It required much correspondence, travel, and telephone communication to make adjustments in routes and gasoline as conditions changed after the original survey had been completed.

The study has enabled boards of education to reroute many buses. This was necessary because of the shortage of the buses, gasoline and tires, due to the war effort. It served as an advantage to boards of education in that they could affect some savings which should have been made before the war but could not be accomplished without a stimulus of this sort.

Increasing Demands

A comparison of the facts gathered in this study with similar facts secured previously shows that school transportation by demand is increasing at a rapid rate and that it is becoming a more difficult problem each year for rural school administrators. This is well illustrated by the fact that in 1940-41 school buses operated daily approximately 70,000 miles while for the school year 1944-45 they were operated daily 88,000 miles. Below is a table giving items showing the increase in school transportation for the four-year period 1941-45.

TABLE I-a

	School Year			
	1941-42	1942-43	1943-44	1944-45
Number transported:				
Elementary	73,153	80,309	80,332	83,103
Secondary	43,964	45,648	45,926	46,248
Total	117,117	125,957	126,258	129,351
Type of vehicles:				
Buses	1,411	1,428	1,379	1,315
Panel trucks	82	88	168	212
Cars	150	87	61	61
Wagons	28	21	.....	.....
Station wagons	.....	8	.....	.....
Pickup trucks	.....	4	.....	.....
Total	1,671	1,636	1,608	1,588
Ownership:				
Public	542	714	679½	739
Private	1,086	879	820½	849
Public and private	43	43	108	.....
Total	1,671	1,636	1,608	1,588
Daily mileage:	81,624	85,037	84,875	88,262
Cost	$1,636,159.78	$1,831,778.63	$1,961,946.97	$2,272,581.30

School Buses

During the first one and one-half years of the biennium the rationing of school buses consumed a great deal of time on the part of this office to secure information required by the Office of Defense Transportation before approval of applications for new school buses for the different districts could be made.

It also involved adjustment of regulations and specifications to meet new and emergency situations. Plans had to be made for the repair of buses and for the exchange of used buses from one section of the state to another as well as from other states to this state. Much effort was required in aiding districts to secure replacements and repairs for buses and in settling disputes between operators and boards of education where strikes or near strikes of operators in the districts threatened to curtail school transportation.

During the last half of the second year of the biennium the school bus situation improved so far as making application for new buses is concerned, but the actual delivery of the buses which had been authorized by the Office of Defense Transportation was much delayed. Even though the school bus chassis situation has been critical during this biennium, enough new buses were secured to meet absolute requirements.

School Bus Insurance

A plan for the purchase of school bus insurance at cheaper rates has been in the process of development during the past few years. During the first year of the biennium this plan was completed and published in a departmental bulletin entitled, **School Bus Insurance.** This publication describes the complete working plan for insurance for the school buses throughout the state. Annually definite information on school bus accidents has been collected, compiled, and published either in mimeographed or bulletin form. This information is given to insurance companies. It gives many items of cause and result of accidents. It enables these companies to have more or less definite information, which they need when they place their bids annually for the coverage of school transportation vehicles. A summary statement of the accident reports for the school year 1944-45 follows.

This report shows that there were one hundred and twenty-five accidents in thirty-six counties and one in the independent district of Springfield. Of these accidents, only one each occurred in each of twenty-five districts, two each in each of fifteen districts, three each in ten districts, five each in four districts, six each in two districts, and nine in one district.

There were a total of seventy-five pupils involved. Of these, sixty-three were slightly injured, seven seriously and five fatally. These reports show that the bus driver was at fault in twenty-eight of the cases, people other than the bus driver in eighty-one cases. Seventeen of the districts failed to assign a fault.

It may be interesting to note also that most of the accidents occurred on good, straight, macadam roads where the flow of traffic was light to medium and the buses were traveling at a low speed. This suggests that more information and instruction should be given to the driving public. Boards of education and district superintendents should give more pub-

licity to the need of careful driving in and around schools and on school bus routes. More instruction in safety on school buses should be given weekly by the teachers of the schools. This report also reveals much evidence of fault of the drivers. This indicates that there is a need for more careful selection of drivers as well as more instruction in safe driving of school buses.

Educational Bulletins

The twenty-four issues of the Department bulletin for the biennium were as follows:

1944 January	**Improving the Quality of Living through In-Service Education of Teachers**
1944 February	**F.F.A. Activities in Kentucky's Program of Vocational Agriculture, 1943-44**
1944 March	**Free Textbook Administration**
1944 April	**Kentucky High Schools, 1943-44**
1944 May	**Educational Bills Passed by the 1944 Session of the Legislature of Kentucky**
1944 June	**Getting the School Under Way**
1944 July	**The School Lunch Program**
1944 August	**School Bus Insurance**
1944 September	**Evaluating the Community School**
1944 October	**Planning an Action Program for Schools**
1944 November	**Public School Directory, 1944-45**
1944 December	**Discussion, Teachers' Retirement System and Fourth Annual Report, June 30, 1944**
1945 January	**Vocational Guidance and Training for Returning War Veterans**
1945 February	**Future Farmers Activities in Kentucky's Program of Vocational Agriculture, 1944-45**
1945 March	**School-Community Health Education Service**
1945 April	**High Schools in War-Time—Regulations**
1945 May	**Financial Support, Financial Ability, and Inequalities Existing in Various School Systems in Kentucky**
1945 June	**Getting the Primary Reading Program Under Way**
1945 July	**List of Textbooks Adopted and Approved by State Textbook Commission of Kentucky 1945-50**
1945 August	**Kentucky's Approved Facilities for the Education and Training of Veterans**
1945 September	**Measuring the Community School**
1945 October	**The Program of Vocational Agriculture in Kentucky**
1945 November	**Public School Directory, 1945-46**
1945 December	**Report of the Superintendent of Public Instruction**

School Laws

The educational laws passed by the 1944 session of the Legislature were published in the department bulletin in May 1944. Twenty court decisions affecting the school laws since 1942 were annotated and included. Annotations of the court decisions are now being prepared to be placed in the new compilation of the school laws which will be published following the close of the session of the Legislature which meets in January, 1946.

School Buildings and Repairs

School Building Study

During the school year 1945-46 a study was made to determine the needs for new school buildings and additions to old buildings. This study shows that fire has consumed several buildings since the beginning of the war and that much needed repair and additions to old buildings must be made at as early a date as possible. It now appears that there will need to be expended immediately approximately $25,000,000 for school buildings and repairs to old buildings. Funds are not available with which to pay

for this needed repair. Boards of education, at present, are not authorized to lay aside any part of their income to pay for the building program which they must carry out to meet the educational need. Within the last few months several boards of education have taken advantage of the funds made available by the Federal Works Agency Community Facilities for loans of funds to pay for plans and specifications for new buildings and repairs of old ones which must be made following the close of the war period.

At the time this report was prepared (November, 1945), plans were practically complete for collecting information on the type of school building facilities available throughout the state. This information is needed in order that there may be available definite facts on which to base new laws. Plans are under way for recommending to the next Legislature laws which will enable boards of education to provide funds for the needed school building program.

State Board—Rules and Regulations

Section 162.060, Kentucky Revised Statutes, provides that the Superintendent of Public Instruction shall approve all plans and specifications for new public school buildings contemplated by boards of education and for all additions to or alterations of old buildings. Such approval shall be in accordance with rules and regulations of the State Board of Education. It further provides that no board of education may award a contract for the erection of a new building or for the addition or alteration on an old building until the plans have been approved by the Superintendent of Public Instruction.

Section 156.160, KRS, paragraph (5), provides that the Superintendent of Public Instruction shall prepare or cause to be prepared and submit for approval and adoption by the State Board of Education, "Regulations for the sanitary and protective construction of public school buildings, toilets, physical equipment of school grounds, school buildings and classrooms."

In compliance with these sections of law, there were submitted to the State Board of Education on September 21, 1945, regulations concerning school grounds and schoolhouse construction. These regulations have been prepared over a period of years and have been found to be desirable, workable, and fairly adequate. They consist of regulations pertaining to:

1. Submission of plans for approval
2. Building site
3. Building in general
4. Administrative offices
5. Elementary school rooms
6. High school rooms
7. Special rooms
8. Corridors, entrances and exits
9. Stairways
10. Sanitary conveniences
11. Window shades and interior decorations
12. Heating and ventilating
13. Electrical installations
14. Fire alarms
15. Special buildings

Future Needs

School Transportation

Because of the greatly increased demand for transportation over the past few years, as is indicated by table No. I-a of this repart, more adequate facilities for transportation of pupils must be made available. At present transportation is not available for many children who live beyond a reasonable walking distance of school which they must attend. There are others who cannot walk with safety over heavily travelled roads. In many districts facilities are available but not in sufficient amount to provide safe transportation. Such conditions are a deterrent to regular attendance and consequently contribute to the influences which are responsible for non-attendance. The amount expended in rural territory for transportation purposes comes second only to the amount expended for teaching service. The rural road building program will improve hundreds of miles of road throughout the state. This will cause an increased demand for transportation because it will result in the expansion of educational services now being demanded.

Transportation equipment in operation in Kentucky in many districts provides only the minimum needs for the rural child. It is in very poor repair and most of it needs to be replaced. Sufficient funds are not available to replace it and to expand the service as is being requested. Each day a fleet of more than 1,600 transportation vehicles carries approximately 130,000 children more than 88,000 miles in the commonwealth. More than $2,000,000 are expended annually for this service.

So vast a business involves many problems. The increased traffic hazards of the highway demand that extraordinary care be exercised in performing this service. More buses, better trained bus drivers and more and better trained school bus mechanics are needed if safety, reasonable comfort, and reliable service in transporting school children are to be provided.

School Buildings

The school plant facilities in a large percentage of the districts are overcrowded. Most of them cannot accommodate a program which will meet the vocational and academic needs of the people who must attend. In many districts school sites must be purchased. As stated elsewhere in this report, there is an immediate requirement of more than $25,000,000 to be expended for school buildings and repairs. This expenditure is needed for 450 new buildings, 650 auditoriums, gymnasiums, and additions, and 500 heating plant replacements. This needs to be done to supply the immediate need. Since the school laws do not permit boards of education to set aside funds which may be used for capital outlay and since all the funds that boards of education originally spent for providing capital outlay before the war have been used in paying additional costs for operating the school program, laws are needed at once authorizing boards of education to levy funds for this purpose.

If the Superintendent of Public Instruction is to perform the function required by statutes in connection with school buildings and transportation programs, it is necessary that the personnel for these services be considerably increased.

If Kentucky is to have a school program which will raise her educational standards that program must be operated, housed and equipped upon a plane of effectiveness. This requires that there be provided not only a safe and sanitary place in which children may live and learn but in addition thereto, for rural children, a safe and adequate transportation program for all children who live beyond a reasonable walking distance from the school which they must attend.

BUREAU OF INSTRUCTION

Those divisions in the Department of Education which are most directly concerned with the learning or instruction program have been grouped into a Bureau of Instruction. This organization has been effected in order that the different activities of the Department closely related to instruction might be more effectively coordinated. This organization started as of July 1, 1944, under a State Board of Education regulation.

The Bureau of Instruction is made up of the divisions of Free Textbooks, Health Education, Negro Education, Supervision, and Teacher Education and Certification. The Division of Negro Education has a close relation with the Division of Supervision.

All of these divisions are working cooperatively upon problems of instruction as they affect all levels of education.

The problems of instruction in the schools relate themselves to the work of every division in the Bureau of Instruction. This calls for close cooperation in locating school needs, in planning programs to meet these needs, and in carrying out jointly made plans. The entire staff during the current year is working on the problem of non-enrollment and non-attendance in the schools. The group decided that some improvement could be brought about if retardation is reduced, health teaching is improved, a more functional high school program is developed, and a better teacher is employed. The staff of the Bureau of Instruction is united in attacking these problems.

Elementary Schools

Program of State Supervision of Elementary Schools. In July 1944 a supervisor of elementary schools was added to the staff of the Department of Education. This position had been vacant since 1932 due to lack of funds with which to employ a person. This is recognized as a forward step in the general program designed to make the schools meet the needs of children more effectively.

The purpose of this program was to improve instruction and instructional facilities in the elementary schools through supervision. At that time, 4,500 teachers in the elementary grades were teaching on emergency certificates because they did not have sufficient training to meet the minimum certification requirements. Many of these persons were just out of high school, or had taught years ago and were now returning to the teaching field in order to keep the schools open. Never before in its history had Kentucky been faced with such a serious teacher shortage. Superintendents and boards of education had to either employ these emergency teachers or close the schools.

Helping Teachers and Supervisors. In view of this situation, how best to help these untrained people became an urgent and pressing problem. Some county boards employed special persons to help the teachers in the classrooms. These persons were experienced classroom teachers who had done outstanding work and knew how to work with children and adults in a friendly, constructive way. In addition to their previous experience and training, these teachers were provided further training in special workshops at the teachers colleges and the University. They became known as helping teachers or supervisors.

At the present time, 47 counties and 8 cities are participating in this program of supervision. In the year 1943-44 probably not more than 10 persons were employed as supervisors. We now have 95 persons doing this type of work.

Emphasis in the Elementary Schools. At the close of the first year, June 30, 1945, of the helping-teacher program in the counties an effort was made to evaluate the work. Nine significant questions were submitted to helping teachers in 32 counties. The answers to these questions as listed here show evidence of progress.

1. Has attendance improved this year?—Yes, 26; No, 6.

   The reasons given were:

   a. Community school idea made parents more interested
   b. Better health conditions
   c. Consolidation of schools, transportation provided
   d. Better school programs
   e. Cooperation of teacher and attendance officer
   f. More interesting activities in school
   g. Improved teacher-pupil relationship
   h. More attractive surroundings
   i. Teacher realization of attendance as her problem
   j. More materials for learning provided
   k. Home visitation by teachers
   l. Hot lunches provided
   m. Cooperation of court.

2. Has school plant improved this year?

Number painted outside	266
Number painted inside	1095
Number improving seat arrangement	1980
Number having hand-washing facilities	1332
Number providing sanitary toilets	1302
Number initiating lunch program	296

3. How many schools have added materials and amount spent?

		Total Spent
Number of schools adding readers	911	$ 8,944
Number of schools adding art supplies	739	
Number of schools adding library books	974	15,325
Number of schools adding maps	836	
Amount spent for art supplies, maps, etc.		11,745

4. Do you think teachers have grown in their ability to lead children in their learning activities?—All answered yes.

   The reasons given were:

   a. Individual conferences
   b. More materials used
   c. Demonstration lessons
   d. Workshops
   e. Group meetings with other teachers
   f. Committee
   g. Visits of college staff and members of Department of Education
   h. Professional reading
   i. Decreased teaching load
   j. Inter-visitation
   k. Community meetings.

5. What agencies assisted in school program?
   Health Department, County Agent, Lions Club, Kiwanis, Rotary, Business and Professional Women's Club, Mothers' Club, P.T.A., Churches, Save-Child. Fed., Junior Red Cross, TVA, County Paper, Health Coordinator, Homemakers Club, Home Demonstration Agent, Juvenile Court workers, Junior League, Returning veterans.
6. Have most teachers helped in planning a program of action in your schools? Yes, 30; No, 2.
7. Have more parents shared in program this years than formerly? Yes, 30; No, 2.
8. Have teachers shown more interest in work this year? Yes, 30; No, 2.
9. Do you feel that learning and learning conditions have been better this year? Yes, 30; No, 2.

Kinds of Work Done by State Supervisor of Elementary Schools. The supervisor of elementary schools works with local superintendents and teachers in

a. helping to initiate supervision programs
b. helping in reducing retardation through improved teaching of reading
c. helping teachers and supervisors to study learning problems, to plan remedial measures.

The state supervisor visits classrooms, gives demonstrations before groups of teachers, holds meetings of teachers. Close coordination is maintained with college staff members who train elementary teachers, through planning and evaluation conferences. The supervisor has been a staff member in many workshops for teachers, health coordinators and helping teachers.

To summarize, the State Supervisor of Elementary Schools has since July 1944:

1. Visited teachers in 44 counties in which 2,340 teachers were contacted
2. conducted, visited or participated in 15 workshops

3. held 55 conferences with superintendents
4. visited 355 classrooms
5. attended 8 regional education meetings with approximate aggregate attendance of 8,000 teachers
6. attended 20 regional meetings of supervisors
7. held two state meetings with supervisors
8. helped prepare bulletin on teaching reading.

Values of the Helping Teacher Program. The helping teacher or supervisory program has made some significant and permanent values to the improvement of education in Kentucky.

Stimulation to Professional Morale and Effort. Professional morale and the supply of qualified teachers was at an alarmingly low ebb when the helping teacher program was initiated in the Spring of 1944. This program has been valuable to a remarkable degree in stimulating professional morale and effort on the part of superintendents, principals, and teachers, and it has been particularly stimulating to teachers in county systems with many one and two teacher schools in remote sections where only rarely anyone manifested an interest in what was being done in the schools. Through personal conferences and group meetings, guidance, which strengthened the teachers and stimulated them to greater efforts, has been made available. Visits made by helping teachers to observe the programs in operation, to praise the things that were well done, and to talk over problems with teachers, gave encouragement. By helping the teachers do a better and more satisfying job, the helping teacher program has strengthened the profession. The superintendents in the fifty-five school systems supporting this program are enthusiastic in their praise of accomplishments in their schools, even in the face of a serious handicap in teaching personnel.

Increased Public Interest in Schools. Distinct contributions have been made in gaining interest and support for schools and public education by emphasizing parent visitation and participation in school programs, and by enlisting the help of all local and state agencies and service clubs in school activities. Closer cooperation has been developed, thereby, between the homes and the schools, and between other agencies and the schools. The more people share in the school program, the deeper is their interest and the greater is their support of public education.

Strengthening the Learning Program. The helping teacher program was designed to improve instruction through improving learning activities. Emphasis has been placed on improving learning facilities by providing better learning materials, improving learning conditions and school atmosphere, improving teaching techniques, and revising the elementary curriculum that it may meet the actual needs of boys and girls.

In-Service Growth of Teachers. Many learning experiences conducive to growth of teachers in service have been provided. These experiences include personal conferences, sectional and general meetings, inter-visitation, committee work, demonstration lessons, and workshops participated in by the total teaching staff of the school system.

Improved Attendance. Under stimulation of the helping teacher program, attention has been given to the major factors contributing to non-enrollment and irregular attendance. Resulting from parent visitation, there are evidences of a decrease in parent indifference, which is a contributing factor to non-enrollment and irregular attendance. This program has emphasized the improvement of health conditions at school and in the community, and improvement of health instruction, since ill health is one of the major causes of irregular attendance.

In an effort to remove the causes of retardation, which contributes to poor attendance, major emphasis has been given to the improvement of the teaching of primary reading.

Significance for Permanent Supervision. The accomplishments of the helping teacher program during the two-year period indicate that it is not a temporary measure to meet the emergency situation, but a positive step toward permanent state-wide supervision.

Needs in Elementary Schools. If the elementary schools in Kentucky are to meet the needs of elementary children as they should, certain improvements should be made. The following recommendations suggest the most pressing needs.

1. The elementary school term should be as long as the term of the high school.
2. The salary of the elementary teacher should be as high as that of the high school teacher.
3. There should be one helping teacher for every 50 classroom teachers or a major fraction of 50.
4. A well-planned program for the preparation of helping teachers in one or more of the colleges.
5. There should be at least three additional supervisors of elementary schools employed by the State Department of Education and the budget of the Department should be increased so this will be possible.

Free Textbooks

The Free Textbook Law was enacted by the General Assembly of Kentucky in 1928. It remained inoperative until 1934 due to the lack of funds. The "Appropriation Act" of 1934 provided $500,000.00 per annum for the purchase and the administration of free textbooks for the pupils of the public schools of Kentucky.

The first free textbooks were purchased by Kentucky in the school year of 1934-35. In this year books were purchased for the first three grades and in part for grade four. From 1934 to 1940 books were purchased for other grades until all eight grades were included. By 1940 all the pupils in grades 1 to 8, inclusive, had "complete sets of books."

In addition to the necessary replacement of books from year to year of the required subjects, books were supplied to the pupils in grades 1 to 8, inclusive, by 1944-45.

The annual expenditures by Kentucky for free textbooks, the number of books purchased each year, the elementary grade enrollment, and the grades for which books were purchased are given in the following table I-b.

Table I-b

Annual Free Textbook Purchases

Year	Annual Expenditure	No. Books Purchased	Elem. Grade Enrollment	Grades Supplied	Remarks
1934-35	*$455,582.94	1,333,402	529,210	1-4	Supplied only 3 subjects in grade 4.
1935-36	519,241.20	1,093,316	523,535	1-5	Replacements made and supplied part of grade 5.
1936-37	484,618.68	1,041,952	515,270	1-6	Replacements made and supplied part of grade 6.
1937-38	485,495.01	1,161,533	491,337	1-6	Replacements made and supplied part of grade 6.
1938-39	488,012.41	927,579	518,052	1-7	Replacements made and supplied part of grade 7.
1939-40	487,791.63	851,510	510,514	1-8	Replacements made and supplied part of grade 8.
1940-41	485,007.04	935,997	498,599	1-8	Replacements made and supplied optional books in grades 1 to 4.
1941-42	486,081.85	841,457	484,485	1-8	Replacements made and supplied optional books.
1942-43	484,843.47	868,939	470,025	1-8	Replacements made and supplied optional books.
1943-44	486,844.96	864,355	451,742	1-8	Replacements made and supplied optional books.
1944-45	**474,756.66	814,580	***452,000	1-8	Replacements made and supplied optional books.

* Annual expenditure includes cost of textbooks, insurance, freight, drayage.
** $474,756.66 is approximate amount expended in 1944-45.
*** 452,000 is estimated enrollment for 1944-45.

One third of the textbooks are changed every five years. Those changed are usually those which are becoming outdated or of least value. There is a demand, therefore, for the purchase of new books to replace at least one third of all the textbooks in the State. It is desirable to purchase all the newly adopted books immediately following the adoption if sufficient funds are available. Due to lack of funds it is necessary to distribute the purchase over a period of years. The enrollment of elementary grades, for example, for the school year ending on June 30, 1944, was 451,742. Based on the 1943-44 pupil enrollment it would have cost $1,903,114.25 to purchase all new books for the required subjects in 1945-1946. The purchase of optional books would have required an additional $395,192.70. The total amount required for these purchases would have been the sum of $2,298,306.95. To make full replacements and to buy the books for the added subjects with the annual appropriation of $500,000.00 will require a period of time of four years or more.

The extension of free textbooks through the high school grades 9 to 12 inclusive would require an annual estimated expenditure of approximately $650,000.00 for the first year. Free textbooks, however, could be provided for the high school grades on the one grade per year plan for an annual expenditure of about $225,000.00.

Free textbooks have been a valuable factor in the educational program of the State. This service would be greatly augmented by the extension of free textbooks into the high school grades.

Health Education

A director of health education was employed in the Department in August 1944 and is now a part of the services of the Department. The W. K. Kellogg Foundation made the inauguration of this service possible through a grant-in-aid. The entire expense of the Division of Health Education has been borne by the Foundation and this includes the salary of the director, his travel and a secretarial assistant. In addition to the grant for the financial support of the Division, an additional grant of $5,000 per year was made to be used in assisting counties in inaugurating special types of health education leadership.

Purposes. The following are the major purposes of the Division's work:

1. To find resources in health teaching and services
2. To coordinate health teaching and health services
3. To stimulate health teaching in terms of individual and community needs in all counties and communities
4. To develop in each county effective health services
5. To develop healthy citizens and keep them healthy.

County Health Coordinators. During the first two years since the inauguration of the health education division, emphasis has been placed upon an intensive effort to develop highly effective programs of health education in a given number of counties. In each of twelve counties a health coordinator is employed. The sum of $500 has been given from the Kellogg grant toward the payment of the salary of the health coordinator. This person in each county is employed by the county board of education.

The coordinator takes the lead in coordinating all agencies for teaching health and for rendering health services. He has a county health committee representing all these agencies. He works with teachers individually and in groups on problems of health teaching, sanitation, immunization and the like. He is conscious always of the importance of so relating health education and health services that the result will be healthy people.

Areas of Work. The State Director works not only with the coordinators in the twelve selected counties but with counties which do not have coordinators. The entire program touches such areas as resource use, coordination, teaching personal hygiene, disease control, sanitation, mental hygiene, nutrition, physical education, recreation, home nursing, safety, first aid, healthful school environment.

Effort has been made to provide training for coordinators and others who lead in health education. In 1944 and again in 1945 workshops were held for training county health coordinators and teachers of health. In 1945 the Division sponsored three work-conferences in three colleges, each continuing for one week. A total of 3 to 5 persons from each of 17 counties took part in these work conferences in health education.

Scope of Activities. Some idea may be gained of the scope of the work of the State Director when we look at a list of the activities: a. participated in seven workshops; b. took part in 12 major conferences; c. prepared bulletin; d. attended scores of teachers' meetings; e. addressed 50 groups; f. visited 12 counties and suggested teaching improvements; g. conferred with 42 county and city superintendents; h. visited 880 schools and addressed 1,610 teachers, observed 17,968 school children; and i. formulated state plans and made necessary reports.

A study of the reports from 12 county coordinators shows the scope of their activities: a. surveyed 576 schools; b. visited approximately 2,112 schools; c. contacted 66,000 pupils; d. conferred with 3,300 teachers and principals; e. attended 275 meetings and conferences; f. helped in establishing 125 lunch programs; g. helped in improving 192 playgrounds; h. helped in improving 240 privies and 252 school buildings; i. helped to examine 1,800 children for dental defects and in securing 4,500 corrections; j. assisted 125 crippled children in getting help; k. helped in obtaining glasses for 288 children, and 3,624 audiometer tests, and 1,428 X-ray pictures; l. helped in arranging 1,700 entertainments to raise money to buy health materials; m. took some part in 7,844 inoculations; n. helped in getting 48 classes in community health education and 37 home nursing classes.

Other Needs. Many things must be done before we have a genuinely effective health education program in Kentucky.

1. The Legislature should provide for the support of the Health Education Division.
2. Health education and services should be made effective in all counties in the state.
3. The education of all teachers should include more functional training in health teaching.
4. The efforts to coordinate the work of the State Departments of Education and Health should be continued.
5. The cooperation between the Department of Education and teacher training institutions should be continued.
6. Efforts should be made to develop additional supervisors of health education.

High Schools

During the school-year 1944-45 there were 681 high schools in Kentucky. Table I-h presents data regarding the number and types of organizations found in our high schools during the school-year 1944-45.

TABLE I-h

Types of High School Organizations and Number of Each

Types of Organization	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12.....	196	103	10	6	315
Grades 9-12.....	144	70	54	2	270
Grades 8-12.....	11	4	5	0	20
Grades 10-12.....	1	9	1	0	11
Grades up to 11.....	3	0	1	0	4
Grades up to 10.....	14	4	2	0	20
Grades up to 9.....	17	24	0	0	41
Totals	386	214	73	8	681

Table I-h not only shows the number of different types of high schools that were found in the State last year, but it also indicates the number of high schools operating under different types of control. It will be noted that 386 were operated by county boards of education while 214 were maintained by independent districts.

TABLE II-h

High School Enrollments by Grades, Race and Control

Grades	County Districts		Independent Districts		State or Regional		Private		Total
	White	Negro	White	Negro	White	Negro	White	Negro	
7	6,691	75	7,962	1,614	157	0	170	0	16,669

Information Concerning High School Development: For a number of years the Division of Supervision has carried three tables in the biennial report showing the development of high school education in Kentucky. The information in these tables has proven helpful to students of Kentucky education and it is thought desirable to continue to carry them in this report.

TABLE III-h

Number of High Schools by Years

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1915-16	316	No report	No report	316
1916-17	376	32	No report	408
1918-19	400	30	No report	430
1922-23	529	56	No report	585
1923-24	492	51	86	629
1924-25	496	50	84	630
1925-26	551	57	91	699
1926-27	552	55	88	695
1927-28	607	64	98	769
1928-29	614	73	97	784
1930-31	661	72	73	806
1931-32	676	70	86	832
1932-33	678	73	82	834
1933-34	682	74	84	838
1934-35	684	75	89	848
1935-36	680	75	83	833
1936-37	663	78	77	818
1937-38	652	80	76	808
1938-39	628	80	75	783
1939-40	605	78	75	758
1940-41	592	74	72	738
1941-42	574	71	71	716
1942-43	555	71	71	697
1943-44	541	70	70	681
1944-45	542	66	73	681

Table III-h above shows that there was a continuous growth in the number of high schools from 1915 to 1935. It will be noted that ten years ago there were 167 more high schools in operation than are in operation today. This decrease in the number of high schools has resulted very largely from their being merged into larger centers where pupils are provided a richer and broader program of work.

TABLE IV-h

Enrollment by Years in Different Types of High Schools

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1914-15	15,547	No report	No report	15,547

*1932-33	*83,092	*6,994	*7,407	*97,493
1933-34	83,930	6,961	7,445	98,336
1934-35	88,583	7,983	7,846	104,412
1935-36	101,017	6,546	8,173	115,735
1936-37	106,799	8,711	8,994	124,504
1937-38	109,587	8,938	9,610	128,135
1938-39	117,284	9,587	9,166	136,037
1939-40	121,204	10,342	9,999	141,545
1940-41	123,822	10,440	10,185	144,447
1941-42	119,398	10,173	10,339	139,910
1942-43	113,662	9,947	10,048	133,657
1943-44	102,546	9,422	9,900	121,868
1944-45	102,619	9,448	10,376	122,443

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included in the totals.

Table IV-h presents an interesting picture of the increase in high school enrollments since 1915. Naturally, enrollments showed a decrease during the war years due to pupils being inducted into the armed services and entering war industries. Reports received so far from high schools indicate that enrollments are increasing again throughout the state.

TABLE V-h

High Schools Accredited Through Grade Twelve, 1909-1945

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals

1943-44	494	55	69	618
1944-45	490	56	70	616

Table V-h portrays the situation as regards the number of accredited high schools by years since 1909. When one thinks of a high school in the true sense, one thinks of an institution that offers a program of work through the twelfth grade to graduation. High schools that do not offer work through graduation should be looked upon as feeder schools for schools that offer a complete program through the twelfth grade.

Future Plans for Improving the Quality of High School Education. Both public and private high schools in Kentucky are accredited by the State Board of Education. The accrediting of high schools, therefore, is a legal matter and the State Board of Education has adopted definite and specific standards for their accreditation. It has been argued by many that while these standards do improve high schools, still they do not emphasize the improvement in the quality of school work as well as they should. Hence, it is now proposed that the State Board of Education de-

velop regulations and recommendations along this line and have them inserted in their standards for accrediting. With State Board approval, these regulations will provide that beginning with the session 1946-47, every accredited high school shall, through its principal and faculty, study the needs of its pupil population and the community it serves and through the knowledge gained, formulate a statement of its philosophy, i. e., a set of beliefs or values that will serve as guides for making decisions regarding the character of the program of work that the school should provide.

The development of this program throughout the state will be slow. The cooperation of all the educational forces of the state will be necessary. Conferences of principals, superintendents and representatives of colleges will be required. Suggested forms for gathering information regarding pupils and the community must be devised. All of this means not only a program of action by the schools but the Division of Supervision as well.

It is also proposed for the next biennium that the Division of Supervision shall give increased emphasis to the development of larger centers of high school population in county systems of schools. The Division will do this in the hope that our rural high schools may be sufficiently large and sufficiently staffed and equipped to justify them in attempting to offer a program of activities comparable in its richness and breadth to that offered pupils in our larger centers of population. To achieve this end it will be necessary for the members of this Division to select a group of counties in greatest need along this line. It will be necessary for the supervisors to visit these counties, to survey their school conditions and needs, and then to meet with the school authorities and other interested citizens and discuss with them conditions of their school, and to suggest a program that will provide high schools of sufficient size to meet pupil and community needs.

Negro Education

Kentucky, like seventeen other States and the District of Columbia, requires separate schools for white and Negro children. Apart from the dual system itself, education for the Negroes is in no sense different from that for white children. The procedures and basic principles are the same for both races. Added to the limited financial resources and problems brought on by the war emergency is segregation, out of which arose most of the problems in connection with Negro education during the past two years. Even with these conditions this biennium has made its contribution to the general progress of the Negro schools which, when studied over a period of years, is most gratifying. The provision for adequate and equivalent facilities and opportunities for all groups is recognized as the ultimate objective of the State's program of Negro education. Negroes as well as other groups are entitled to rights, privileges, and obligations that inhere under the Constitution of the United States for all American citizens.

Schools for Negroes are now recognized by the same regulations as all other schools of the Commonwealth. Every school district in the State is now attempting to provide both elementary and high school advantages either by maintaining schools within the district or paying tuition for their Negro pupils to attend schools maintained by other districts. Where conditions and circumstances are somewhat the same, the public school ad-

vantages and facilities offered Negro children compare favorably with those offered white children.

Elementary Schools. There are 447 elementary schools operated for the Negro children with a pupil membership of 24,614. Of the number of schools, 103 are operated by independent school districts with pupil membership of 13,888, while 344 are operated by county school districts with a pupil membership of 10,776. In reality, most of the elementary schools of the State for Negro children are small, there being 311 one-teacher schools, 65 two-teacher schools, 29 three-teacher schools, and 42 four-or-more teacher schools. It will be noticed that 6,302 pupils or 58% of the total pupil membership in the county school districts are enrolled in 285 small one-teacher schools.

Table I-n gives the number and size of the Negro elementary schools showing membership and type of control.

TABLE I-n

Number and Size of Negro Elementary Schools Showing Membership and Type of Control

Size of School	County School Dists.		Ind. School Dists.		Total	
	No. of Schools	Member-ship	No. of Schools	Member-ship	No. of Schools	Member-ship
1-teacher	285	6302	26	603	311	6905
2-teacher	46	2694	19	1284	65	3978
3-teacher	8	774	21	2841	29	3615
4-teachers or more	5	956	37	9160	42	10116
All sizes	344	10726	103	13888	447	24614

Much effort during the past biennium has been directed towards consolidating the small, expensive elementary schools into larger more economical school centers. Some progress has been made in this direction, since two years ago there were 350 one-teacher schools as compared with 311 at the present time. Even with this accomplishment there still remains much to be done, since approximately 150 of the elementary schools enroll fewer than 20 pupils and 30 have a membership of less than 10 pupils.

Table II-n shows membership in the one-teacher schools, grouped according to teacher load.

TABLE II-n

Membership in One-Teacher Schools Grouped as to Teacher Load

Size in Membership	No. of Schools County Dists.	No. of Schools Ind. Districts	Total
10 and under	30	2	32
11-20	116	11	127
21-30	81	8	89
31-40	38	3	41
41 and over	20	2	22
All sizes	285	26	311

High Schools. With the policy of segregation coupled with a declining Negro population sparsely settled over large areas of Kentucky, providing a strong high school service to adequately meet the needs of the high school pupils is a difficult problem. Nearly 70 counties in the State do not have enough pupils for the maintenance of a high school without exorbitant cost. During the biennium the State attempted to meet this situation by providing State high school services.

In 1944 the State Legislature appropriated $42,000 per year for Lincoln Institute, and thereby reduced the cost to local boards of education sending students to the school to an amount commensurate with the cost necessary to provide a high school service at home for white children. Lincoln Institute's income from other sources, approximately one third the cost to operate the school, is also contributed to the program.

Under its State contract, Lincoln Institute makes its plant and equipment, valued at more than $500,000, available to the State Board of Education. The buildings consist of two dormitories, an administration and classroom building, a gymnasium, dining hall, shops, farm buildings, seven faculty residences, and a modern water treatment plant. A 445-acre tract of land includes a farm which provides food for the Institution, and forty acres of campus. The school is located at Lincoln Ridge, in Shelby County.

The general acceptance of the services of Lincoln Institute, as made available to the local boards of education by the State Department of Education, has overcrowded the capacity of the school's facilities. There are nearly 2,000 Negro youth of high school age living in the school districts which now must send their Negro pupils to a boarding high school. It is therefore essential that the State increase its appropriations to Lincoln Institute in order that its facilities may be expanded and that truly equal educational opportunities may be made available to Kentucky's Negro youth.

The State owns and operates the West Kentucky Vocational Training School at Paducah. This school is a technical school. It offers courses in trades training and subjects related to the trades taught. Eligible pupils may earn four high school credits a year, including two shop units, for the two years of training for a trade. High school graduates may attend this school and receive training for a useful vocation.

The courses of study include Auto Mechanics, Barbering, Carpentry and Woodwork, Tailoring and Garment Service, Electric and Acetylene Welding, Cooking, Dressmaking, Homemaking, Cosmetology, and Commercial Subjects. Among the related courses are Home Planning, Mechanical Drawing, Trade English, Trade Arithmetic, Child Care, Trade Relations, and Safety Education. Approximately 250 pupils are instructed during the year, representing over 30 counties and six states.

From the beginning of the National Defense Training through the whole war period, the school carried classes for workers and prospective soldiers. In both industry and the armed services, many men were able to do their part in an exceptional way because of the training received at West Kentucky Vocational Training School. Veterans are now filing applications to begin preparation for civilian life through the trades program of the school.

The present and prospective enrollment demands an expansion of equipment and plant for sufficient educational service to obtain. Most urgent are a dormitory, a gymnasium, and enlarged mechanical shop space and equipment.

In addition to these two State schools there are 67 local high schools offering training for high school youth. Of these 67 schools, 35 are six-year high schools, 21 are four-year high schools, 2 are junior high schools, grades 7-8-9, one is a senior high school, grades 10-11-12, and the remainder are incomplete high school organizations of various types. All of these high schools are accredited by the State Board of Education. Sixteen are accredited A class, 37 B class, and the others for the grades offered. In these schools are enrolled 9,521 pupils, 6,336 of whom are in grades 9-10-11-12.

Table III-n presents data regarding the number and membership of the various types of organizations that are found in the Negro high schools of Kentucky.

TABLE III-n

Negro High Schools, Number, Type of Organization and Membership

Type of Organization	No. in All Districts	Membership
Grades 7 to 9	2	1,842
Grades 7 to 12	35	4,656
Grades 9 to 12	21	1,753
Grades 10 to 12	1	955
Grades 7 to 10	1	188
Grades up to 10	6	82
Grades up to 9	1	45
Total	67	9,521

Higher Education. For the year 1943-1944, there were enrolled in Kentucky State College, only state-supported institution of Higher Education for Negroes, 321 students exclusive of duplicates; for the year 1944-1945, the number was 369. The effect of the war upon the enrollment can be judged best by comparing the above enrollment figures with the pre-war peak of 682 that enrolled in the college in 1939-1940. In addition to its effect upon the enrollment of students the war also had a tremendous effect upon the faculty. During the biennium the appropriation of the college was increased from $130,000 per annum to $150,000 and faculty salaries were increased on the average of approximately $20 per month. This raise, however, was insufficient to hold some of the better faculty members in the school. Many State Legislatures in the South, stimulated by the Supreme Court decision in the Gaines case, granted unprecedented financial support to their Negro state colleges during this period. Our own State, not having reached a decision as to whether it would bring about equality in higher education for Negroes by expanding the Negro college or by admitting Negro students to graduate and professional courses in existing state institutions, left its Negro college in a somewhat defenseless situation where its better faculty members were attracted to more lucrative positions in other institutions and indeed a position where the accreditation of the Kentucky State College for Negroes was seriously

threatened. Crystallization of ideas has taken place in the meanwhile and a well-planned program is being presented for the consideration of the 1946 General Assembly.

Pending provision of equality within the state, the Out-of-State Aid Program, inaugurated in 1936, continued to serve Negro applicants. During the summer session of 1944 and the regular school year of 1944-1945, a total of 129 students received aid from the State to attend 26 different colleges and universities throughout the country. Eighty-eight students attended during the summer and 41 during the regular session. The amount contributed in this program by the State was $7,158.42.

Teacher Education and Certification

Teacher Demand and Supply

At the time this report is written (November 15, 1945) the war is over. The crisis in the schools, however, is at the crest. Along with the magnificent services rendered in the war effort by school people, went large numbers of the best educational leaders. A few of these leaders are returning. Some will return later. Some will never return.

Vacant Classrooms. While these leaders in education were away many of their places were taken by other people not as well-trained. About 1,100 positions were never filled. They must wait to be filled by those who will return and by persons who will enter the profession.

Emergency Teachers. When the war began, there were approximately 18,850 teachers and principals in the schools. The day the war closed only about 17,700 positions were filled. When the war opened every position was filled by a certificated teacher. When the war closed 4,500 of the positions were held by emergency teachers. When the war opened less than 7 per cent of the positions were held by persons with less than two years of college preparation. When the war closed 21.5 per cent of the positions were held by persons with less than two years of college preparation.

Table I-t shows how rapidly the number of emergency certificates increased as the war advanced. In 1940-41 only 53 emergency certificates were in force and none on less than two years of college preparation. In 1944-45 the number had increased to 4,567, many of which were issued for persons who had no college preparation whatsoever.

TABLE I-t

Emergency Certificates Issued Over the War Period

Year	Number
1940-41	53
1941-42	336
1942-43	2,673
1943-44	4,100
1944-45	4,567

Training of Emergency Teachers. Not all the persons holding emergency certificates have low amounts of preparation but most of them do. None have met certification requirements. Table II-t gives the picture for 1945-46. Approximately 8 per cent of the emergency teachers (370 persons) are old teachers who taught so long ago that they could get certificates

without completing even a high school education. If each of these persons had 30 pupils it means that 11,100 children had a teacher who had not completed high school. This means that a conservative estimate shows that 135,000 children go to school to an emergency teacher and that the teachers of about 95,000 do not have two years of college training.

TABLE II-t
The Education of Emergency Teachers 1945-46

Training Level	Approximate No. Teachers	Percentage	Approximate No. Children Taught
Below H. S. Graduation	370	8.2	11,100
H. S. Graduate—no college	1,150	25.5	34,500
Some College Training but below two years	1,600	35.0	48,000
More than two years but less than four	1,300	29.0	39,000
Four or more years	80	1.8	2,400
TOTAL	4,500	99.0	135,000

Table III-t gives a picture of the preparation of teachers employed in Kentucky in 1944-45. This table includes regular and emergency teachers. It approximates conditions as they exist in 1945-46. This table shows that 31.1 per cent of elementary teachers had less than two years of college preparation and that one in ten had no college preparation whatsoever. It shows that almost one in ten of the high school teachers was not a college graduate. Its favorable showing is that one in five high school teachers had a master's degree.

TABLE III-t
The Education of Teachers in Kentucky 1944-45

Training	Elementary		Secondary		Total	
	Number	Per Cent	Number	Per Cent	Number	Per Cent
No College Training	1,294	10.3	5	0.1	1,299	7.3

Median	82.3		A-B Plus		111.6	

* There were actually 17,710 teachers employed but not all are reported in this table.

Source of Teacher Supply. There is little hope that the teacher shortage will be appreciably alleviated in the immediate future. A look at the chief source of supply convinces one that not enough teachers can be prepared by the colleges to fill the places of emergency teachers to raise the

standard to the pre-war level before 1949 or 1950. One measure of teacher supply which has been shown to be reasonably valid is the number of persons who do supervised teaching from year to year in their teacher preparation programs. If we use this as a measure of teacher supply the picture is disheartening as is shown in Tables IV-t and V-t.

In 1939-40 slightly more than 1,400 persons prepared to teach in the elementary grades, but only 292 were found in this group in 1944-45. The number entering elementary teaching, each year prior to the war, exceeded 1,000. In 1939-40 more than 1,000 persons prepared to teach in high school but by 1944-45 only 336 prepared to teach in high school.

It has not followed that persons who did student teaching entered teaching in Kentucky. During 1943-44 for example a total of 747 did student teaching in Kentucky but only 442 persons were certificated, and only 158 persons actually began teaching that year.

TABLE IV-t

Number of Persons Taking Supervised Student Teaching at the Elementary Level for a Six-Year Period Ending June 30, 1945

There are four directions in which we may turn to rebuild the teaching profession to the educational level desired.

1. We can increase the emphasis upon attracting more of the promising young people into the courses which prepare for teaching.

2. We can intensify our efforts to upgrade those now teaching who are at a low training level.

3. We can bring back into the profession those who left the service during war time.

4. The State Board of Education should be charged with the authority to regulate the renewal and reinstatement of certificates of those who have an acceptable level of preparation.

Teacher Education During the War

Those responsible for the education of teachers have made greater efforts than ever before to reduce the impacts of war upon the schools. The colleges which educate teachers have continued during this biennium to render the high type of service they had been giving ever since the war started. Great emphasis has been placed upon improved campus programs; for those teachers who could not come to the campus of a college, the services of the college were taken to them; colleges have made their faculties available for workshops, conferences, seminars, consultation, and have given freely of their services.

Cooperation During War. While the enrollment on the college campus reached its lowest level during this biennium, constant effort has continued to improve the services: six workshops for helping teachers have been held; two workshops and three work conferences on health education have been held; about 25 off-campus workshops for teachers have been held during the summers; workshops, problems courses, and extension classes have been sponsored; and every means whereby the colleges could help teachers in service do a better job has been employed.

All agencies engaged in education have cooperated. The Council on Public Higher Education has worked with the State Department of Education in studying needs, formulating procedures for meeting these needs, and have joined in executing plans thus formulated. All divisions of the Department of Education have worked together in finding ways and means to offset the effects of the war on the teaching personnel. All staff members of the Bureau of Instruction have worked cooperatively in helping the teacher do a better job.

Improving Teacher Education. The Cooperative Study of Teacher Education which started in 1943 has continued. In 1944 the group engaged in this study developed standards for evaluating a community school and used these standards in school improvement. In 1945 the group developed the characteristics of a teacher for a community school. The colleges are now studying their offerings with a view to making their programs function more effectively in developing a better teacher. During the biennium more than 1,000 persons from college staffs and public schools have worked cooperatively in an attempt to improve the services of teachers.

It is important to record the fact that the war made it necessary to employ as emergency teachers many persons who had quit teaching for one reason or another. Most of these were women and most of them were married and had homes to look after. If they were to get refresher training it was necessary to provide it near them since they could not go to the college campus without great sacrifice and inconvenience. This made it necessary to develop workshop programs in many counties.

These workshops did work of high quality and did much, not only in upgrading the teachers, but in improving the quality of their services. The workshops were organized on the basis of a summer school and excellent laboratory facilities were provided. The staffs in these workshops were of high quality. The number of full-time staff members ranged from 3 to 12 and there were, in addition, many part-time members. The teacher enrollments ranged from 50 to 160.

Loyal Teachers. The people of Kentucky should commend the efforts of those devoted teachers who have given their services to the children of the Commonwealth. They have worked under most difficult conditions. They held their posts while many of their colleagues were leaving, some for patriotic reasons, some who were attracted by higher salaries in industry, and others by higher salaries in the profession in other states. They drew miserably low salaries and faced overcrowded classrooms. They did not complain much. They fought on the home front. There are about 13,000 of them. We should applaud them.

Education and National Defense. The war proved that education is the first line of national defense. It was said by a great general that 85 per cent of the Army was made up of men who had some education. Since this is true, we should give attention to making the job of those who educate more secure; secure in the sense that the teacher has a salary which will enable him to live on a plane equal to other people; secure in the sense that he holds his job only on the basis of merit; secure in the sense that his work is recognized as other great work is recognized.

To guarantee this security, the state should make provision to get a teacher as well trained for his job as a physician is for his job. It means that a teacher who does his job well should be paid a salary which will enable him to live on a plane as high as a physician lives who does his job well and gets paid accordingly. This need is dictated not only by the fact that a good teacher should be compensated but by the fact that Kentucky's child must be guided in his education as effectively as he is guided into health by his physician.

Some Characteristics of a Good Teacher in Kentucky. There is rapidly developing a common philosophy of teacher education in Kentucky. This philosophy gives us a picture of the kind of teacher we need to make the schools serve the people of Kentucky effectively. We believe that it is the function of teacher education to help prospective teachers acquire such knowledge, understanding, and attitudes as will prepare them to help people develop those competencies in actual living which are essential to them as social beings in our American democracy. The characteristics listed here should, as far as is possible, be developed in all teachers.

1. The teacher should be a well-rounded, educated person, and this should be revealed by what the teacher is, by the way he feels, by the way he thinks, by what he knows, by what he does, and by the way he works. These characteristics should be developed to the degree that:

a. The teacher is able to communicate ideas orally and in writing in language that can be understood by the individuals and groups with whom he communicates.

b. The teacher has an understanding of and a feeling for literature as a contribution to our cultural heritage. He reveals it through the way he gets those with whom he works to share this feeling and understanding.

c. The teacher has a reasonable and workable understanding of the ordinary day-to-day problems which arise in such areas as the arts, sciences, social sciences, health and welfare. This understanding is developed to the degree that those with whom he works are encouraged to use their abilities to the maximum in the solution of their problems.

d. The teacher recognizes the dignity and worth of the human personality. He can find common ground on which he and the individual with whom he is associated can share.

e. The teacher has developed to a reasonable degree an understanding of the problems people face in community life, the agencies through which the community works, and the function of leadership. He has reasonable skill in helping communities solve their problems.

f. The teacher has physical health, emotional stability, and mental balance which result in general poise.

2. **The teacher should understand the natural environment and the ways in which it affects the lives of people. This understanding should be revealed by the recognition of the significant phases of the environment and the uses of the environmental factors in learning, an appreciation of environmental features in relation to the science and art of living, and a loyalty to the need for conserving and improving the environment.** These qualities should be developed to the degree that:

a. The teacher participates in initiating and conducting community programs pointed toward wise adjustment to the environment and use of resources.

b. The teacher understands the basic principles of resource use and is willing to assume leadership in getting people to use resources wisely.

c. The teacher has a workable knowledge of natural and human resources, selects those suitable and produces with the children additional materials.

d. The teacher keeps himself informed about the work of agencies engaged in the study and use of resources and cooperates with them.

e. The teacher has the ability to study the local community, to assist in determining individual and community needs, and helps build a total school program on the basis of needs and resources.

f. The teacher has the ability to develop such an appreciation of the environment among his associates that they will never lose sight of its practical and esthetic values.

g. The teacher adapts himself to the environment and becomes a part of the community.

3. **The teacher should be able to live and work with people, and this ability should be characterized by a disposition to recognize any given type of behavior has a definite cause: The ability to accept all people emotionally and to reject no one as hopeless or unworthy; to recognize that every person is unique; to understand that all people face a series of common developmental tasks; to understand the science of human growth and development; and to use the scientific method in making judgments about people.** These characterictics should be developed to the degree that:

a. The teacher understands and uses democratic procedures in living and in teaching.

b. The teacher has such a sense of security that he is able to give and take in working with people on their problems. He is able to accept help as well as give it.

c. The teacher is able to deal with controversial issues objectively.

d. The teacher has the ability and willingness to work with groups in finding those values in the community which should be preserved and to give his allegiance to their further development.

e. The teacher accepts leadership functions when circumstances demand but shows by the way he works that his major purpose is to develop leadership qualities in others.

f. The teacher is interested in his profession to the degree that he continues his own professional growth; participates in making and supporting the programs of his professional organizations; and inspires others to want to enter the profession.

4. **The Teacher should be a person who has professional competencies developed to the degree that he is able to use child interests, aptitudes, abilities and learning experiences in achieving their life purposes through democratic processes. These competencies should be developed to the degree that:**

a. The teacher knows how children grow and learn and the basic conditions favorable and unfavorable to child development. He applies this knowledge in creating and maintaining a favorable learning environment.

b. The teacher is able to project plans into the future, to work and wait for them to mature, to alter plans in the light of each evaluation, and to take a new direction when necessary.

c. The teacher maintains the attitude that he is always **becoming** a teacher.

d. The teacher recognizes the potentialities in each child and grows and learns with him. He demonstrates his recognition of these potentialities when working with children in formulating and carrying out jointly made plans.

e. The teacher finds deep satisfaction in helping children grow and learn.

f. The teacher feels that learning and growing and living together are community processes and uses them with children-learning as well as with people in the community outside the school.

g. The teacher understands the learning needs of children of the age level and life level at which he works and selects learning materials and experiences in the light of their needs.

h. The teacher understands the instruments for measuring pupil progress and is able to use the results in guiding pupils at the learning level on which he works.

i. The teacher participates in formulating the total school program, and understands its aims and objectives and is able to organize his work so that it may contribute effectively to the total school program.

The above statement of characteristics was developed by more than 100 persons from all levels of education in Kentucky during 1945.

BUREAU OF VOCATIONAL EDUCATION

Division of Vocational Education

During the past two years, all phases of vocational education have been called upon to render a more diversified service and train a larger number of people for a wider variety of occupations than at any time in history. The critical need for additional workers in certain industries directly connected with the war effort, or affected by the war effort, called for immediate specialized training of thousands of persons for numerous occupations throughout the country. The urgent demand for additional workers in certain war industries made it necessary that many special courses be offered, frequently on an emergency basis.

Vocational education has been, is now, and will continue to be an integral part of the total program of education. Unless this is true, neither vocational education nor the total program of education will function as efficiently as is desirable. The war emergency and the critical element of time made it necessary for certain divisions of vocational education to make immediate changes in courses and policies. That these changes were made effectively, and that services were rendered as needed, is proven by the thousands of trained young men and women who were fed into the war plants and other occupations directly connected with the emergency.

The power of any nation, whether during an emergency or in normal times, is directly affected by its resources, both natural and human. Natural resources, however great, cannot be developed to the fullest extent unless its human resources are trained and able to function efficiently in developing these resources so they may be used to reach the objectives which the nation must achieve. During the past two years this objective was to produce the machinery of warfare, the food, and other supplies more rapidly than our enemies, to the end that these enemies might be subjected with the least loss of life and with the least possible expenditure of the resources of the nation.

During the reconversion period, specialized vocational courses for returning veterans and war workers will be even more urgently needed. The rapid development of machinery, especially farm machinery, will make it possible for fewer persons to carry on the agricultural production of the nation. Many farm young men and women will find it necessary to train themselves for occupations related to agriculture or occupations en-

tirely outside of agriculture. Thousands of persons who were called into the war production plants of the nation will need to develop other skills and train themselves for other occupations because of the shutdown of the production of materials of war. Vocational courses to train these persons for proficiency in their new occupations will be necessary if they are to be able to carry on a satisfactory way of life and to adequately provide for themselves and persons dependent upon them. Only when such persons have the vocational abilities they need will they become employable and be in demand in the occupations of their choice.

Vocational education in agriculture proved itself especially effective during the past two years. The serious need of large quantities of food for our own people, our armed forces, and our Allies made it necessary that the farms of the nation produce the largest total quantity of food products in the history of the nation, in spite of a serious shortage of manpower and new farm machinery. Farm machinery repair courses carried on by the teacher of vocational agriculture, or under his direct supervision, made it possible for farmers to keep thousands of well-worn pieces of farm machinery operating efficiently in the fields, which in normal times would have been scrapped and replaced with more modern implements. Improved practices put into effect by farmers, young farmers, and all-day students of agriculture made possible the largest per acre and per animal unit production in the history of American agriculture. Progress was made in marketing procedures, and in many cases the quality of agricultural products sent to the market was materially improved.

Vocational home economics education rendered one of its most distinct services during the past two war years. A happy, normal home environment and atmosphere has always been recommended as one of the most important factors in the life of any nation. During the past two years more women were engaged in industry or activities outside the home and, in the case of farm families, more homemakers were called upon for work in the fields than at any time in history. In spite of these conditions the homes of America continued to play their important role. The training received in vocational home economics by all-day students, young women, and adult women did much to help make this possible.

Thousands of Kentucky women and young women received special instruction to help them meet the problems caused by the emergency. In addition, probably more Kentucky women received instruction in food production, food preservation and processing than in any previous period. Emphasis was placed upon balanced diets, and much progress was made in this area.

Trade and industrial education rendered one of its most significant services during the past two years. Trade schools were called upon for the training and re-training of thousands of men and women badly needed in the war plants of the nation or in other occupations which required vast expansion because of the supplies needed for the prosecution of the war. Skilled craftsmen were needed in a wide variety of occupations, both old and new. Many of these skilled workers had to be trained in the shortest possible period of time; thus creating a serious problem for teachers and coordinators of trade and industrial work. That the trade schools

met this emergency successfully is proven by the thousands of men and women who went into the war plants of this state and many other states.

Distribution is always an important problem in normal times but becomes an even more serious problem during an emergency. Many additional people were needed for distributive occupations during the past two years because of the greatly increased demand for goods and services and because of the many difficulties caused by the emergency; thus making it difficult to provide these goods and services to the people of the country. Many new courses were made available, and large numbers of people received training, usually in a very short length of time.

The reconversion period will see a continued need for vocational education for thousands of persons if they are to make themselves employable during a period which may be far different from anything the nation has seen in the past. To carry forward this vast program of vocational education during this period, the State of Kentucky will need many additional funds, both state and Federal, to make this much needed training possible.

TABLE I-v

The number of people served by Vocational Education during the last two years is as follows:

	1943-44	1944-45
Agriculture (regular Program)	11,142	9,655
Food Production War Training (Agriculture)	64,824	70,067
Home Economics (regular program)	14,376	15,599
Trades and Industry (regular program)	4,365	4,617
War Production Training (Trades and Industry)	12,308	5,955
Distributive Occupations	11,240	7,958
Totals	118,255	113,851

TABLE II-v

Enrollments in and Expenditures for Food Production and War Production Training Programs

Year	Program	Enrollments	Expenditures
1943-44	War Production Training	12,308	469,985.35
	Food Production Training	64,824	360,454.30
	Total	77,132	830,439.65
1944-45	War Production Training	5,955	316,928.54
	Food Production Training	70,067	308,515.20
	Total	76,022	625,443.74

TABLE III-v

Number of Vocational Teachers by Field and Disbursements of Federal and State Funds of each of the Years of the Biennium 1943-45

School Year	Number of Teachers				Federal Funds	State Funds
	Agriculture	Home Economics	Trades and Industries	Distributive Occupations		
1943-44	204	262	153	54	$460,058.45	$ 3,692.00*
1944-45	178	285	169	32	432,984.04	146,521.08

* Allotted from Governor's Emergency Fund for use in special wartime Distributive classes.

Agricultural Education. The program of Agricultural Education has rendered effective service during the biennium. Classes of instruction were offered for farm boys enrolled in high school, young men out of school but not yet established in farming and persons already established in farming. While the number of departments decreased during the biennium because of the loss of teaching personnel, the teachers in active departments expanded the scope of their program to assist the war effort. The number of departments of vocational agriculture decreased from 260 during the school year 1942-43 to 186 during the school year 1944-45 and the enrollment in high school agriculture classes decreased from 7,619 to 5,641 during this two-year period. The enrollment in classes of instruction for out-of-school persons for the two-year period was 144,017. Of this number, 134,758 were enrolled in classes taught by special teachers as a part of the Food Production War Training Program, under the direction and supervision of the teachers of vocational agriculture. The decrease in enrollment in the high school classes was due to the small number of departments and to the large number of boys leaving high school for the Armed Forces. Although the number of active departments of vocational agriculture decreased during the biennium and the number of all-day pupils enrolled decreased in proportion, it is significant that the labor earnings of all-day pupils did not decrease and, during the 1944-45 year, showed a considerable increase over the previous year. This increase is due to the fact that the teachers of agriculture who were on the job placed increased emphasis upon the supervised farming program and upon the production of much needed food and other farm products needed for the successful prosecution of the war. The Kentucky Future Farmers Cooperative, (Incorporated), through which leaders in agricultural education purchased dairy heifers, western ewes, beef heifers and feeder calves by the hundreds, as well as other needed items, did much to contribute to this expanded supervised farming program and the increased labor earnings which resulted.

The Food Production War Training Program, formerly the Rural War Production Training Program, was operated through the department of vocational agriculture in the high schools. Classes, in the production of farm commodities and shop work with special emphasis on farm machinery repair, were offered for adult farmers. In many counties two thirds of the adult farmers were enrolled in one or more of the Food Production War Training classes.

The total cost per enrollee in the Food Production War Training Program was $5.20. Of this amount 74c was spent for equipment and $4.46 was spent for instructions. Local boards of education were reimbursed for the cost of instruction and equipment, but furnished the classroom and facilities for this program.

The number of school community canneries established or operated, increased from 116 in 1942-43 to 154 by June 30, 1945. The number of persons enrolled in food courses increased from 32,628 to 41,998 during the biennium and the amount of food processed in the school community cannery by farm families increased from 1,563,724 quarts in 1943 to 2,167,701.

Through the farm machinery repair courses, operated under the Food Production War Training Program, by the teacher of vocational agriculture, farmers repaired and built farm machinery and equipment in order that the production goals for agriculture commodities could be met.

TABLE VIII-v

Farm Machinery and Equipment Items Repaired or Constructed in Farm Machinery Repair Classes. 1942-1945

	1942–43	1943–44	1944–45
Tractors, Trucks and Automobiles Repaired	4,107	2,928	1,176
Farm Machines Repaired	19,206	14,937	6,208
Equipment Items Constructed or Repaired	77,208	58,090	54,302
Total	100,521	75,955	61,686

Three assistant state supervisors were added to the staff in agricultural education to assist with the administration and supervision of the Food Production War Training Program. The clerical staff was also increased to take care of the extra work.

The equipment purchased with funds allotted to Kentucky from the U. S. Office of Education, is the property of the State Board of Education and is to be left with the local school as long as it is used for vocational training purposes.

Some of the outstanding contributions made to the total program of education in Kentucky by the Food Production War Training Program, are:

1. One of the greatest adult education programs in the history of the country has been started, as evidenced by the 141,479 adults enrolled in classes of instruction during the biennium.

2. Teachers have learned to use others in developing and operating a program of instruction. The use made of special teachers and advisory committees by the teachers of vocational agriculture has enabled a few well trained persons to conduct an effective program of education for adults.

3. Facilities have been added in order that a satisfactory instructional program might be conducted by the schools. There are, in the state, 236 well equipped high school vocational farm shops and 154 school com-

munity canneries in addition to the library material and equipment used in the classroom.

4. A cooperative program between departments in the school, has been developed. The teachers of vocational agriculture and home economics have developed a cooperative program to improve farm family living. The school community cannery has provided a means whereby instruction in food production and processing could be carried through to completion. The food program is planned jointly between the teacher of agriculture and the teacher of home economics. Each teacher assists the other in carrying out this cooperative program. The teacher of agriculture assumes the major responsibility for the production phases of the instruction and for the mechanical operation of the cannery. The teacher of vocational home economics assumes the major responsibility for instruction in food processing in the cannery.

5. A cooperative program has been developed with agencies outside the schools. United States Department of Agriculture agencies assisted with the Food Production War Training Program by having members on the advisory committees. These agencies also helped in the adult program by recruiting class members, assisted with teaching materials and helped with the actual class instruction.

6. Improved production practices have been carried out on the farm as a result of instruction. A study was made to determine the effectiveness of instruction given. It was found in one class, with an enrollment of 14 persons that an average of 8 improved practices per person were being carried out as a result of decisions reached in the class.

The aim in vocational agriculture is, "To train present and prospective farmers for proficiency in farming." Supervised farming is an important part of the program in vocational agriculture. If we are to train boys enrolled in high school to become farmers, a beginning must be made in farming. The net labor earnings from supervised farming of all-day high school pupils in Kentucky was $960,094.26 or an average of $162.81 per boy for the year ending June 30, 1944, while for the year ending June 30, 1945 the earnings reached $1,013,344.37 or $179.66 per boy. On January 1, 1945, boys enrolled in high school agriculture classes had $1,726,909.00 invested in farming. In addition to the productive enterprise projects completed, improvement projects and supplementary farm practices contributed much to the program. Supervised farming occupies equally as an important place in the program of instruction for out-of-school and adult farmers as it does in the program for high school boys.

The Future Farmers of America is a national organization of farm boys studying vocational agriculture in high school. The major responsibilities of this organization are to develop agriculture leadership, cooperation, citizenship, improve agriculture and patriotism. Each department of vocational agriculture has an active F. F. A. chapter. The actual membership in the F. F. A. chapters in the state is 4,842 but the grand total membership when the associate and honorary membership was included was more than 14,000. Chapters and individual members bought a total of $226,000 worth of war bonds and stamps and sold an additional $200,000 worth of bonds and stamps. More than 2,143,000 pounds of salvage material was also collected by the members of the F. F. A. chapters in the state during

the year 1944-45. Leadership training meetings were held in each of the nine districts in the state during the year and $3,300 was distributed in premiums and awards on all leadership training and supervised farming activities for the same period. The State Fair was held only once during the biennium. There was $1,500 in premiums offered in the F. F. A. division of the State Fair. Three district lamb shows were held and more than 400 baby beeves were exhibited at the Fat Cattle show each year of the biennium.

Home Economics Education

The vocational home economics program is designed to improve personal, home and family living through the training of youth and adults for the vocation of homemaking. All-day classes, part-time classes and evening classes are provided to give this training. Table IX-v shows the number of all-day departments, part-time classes and evening classes, together with the enrollment during the past two years.

TABLE IX-v

Number of All-Day Departments, Part-Time Classes, and Evening Classes in Home Economics, and Enrollment, by Years

	1943–44		1944–45	
	No. of Depts. or Classes	Enrollment	No. of Depts. or Classes	Enrollment
All-Day Departments	251	12,519	275	13,199
Part-Time Classes	29	398	26	417
Evening Classes	75	1,459	93	1,983
	Total	14,376	Total	15,599

Table IX-v shows that during the year 1943-44 there was a decrease in the number of all-day departments. Many of the departments were closed because qualified teachers were not available. The increase in the number of all-day departments in 1944-45 was made possible because of the additional funds made available through the increased state appropriation for vocational education and because teachers were permitted to teach home economics with an emergency certificate when no qualified teachers were available. There were fourteen teachers who taught with emergency certificates. The issuance of emergency certificates did not entirely eliminate the condition of a shortage of teachers as shown by the fact that during 1944-45, twelve departments were closed because the teachers resigned and no qualified or emergency teachers could be secured to take their places and eight departments in which home economics was taught the year before were not opened during this year.

The decrease in the number of and enrollment in part-time and evening classes is due to several factors: transportation difficulties, girls going to industrial areas to work, increased demands on women's time, lack of qualified teachers, and insufficient funds to encourage new programs.

During the biennium homemaking programs have been geared to give help on problems of homemaking made more acute by wartime con-

ditions. Shortage of labor, scarcity of material, family members being away from home, and the increased cost of living are some of the conditions which affected homes, and in turn, affected home economics education.

Each year of the biennium, teachers have been given help on adjusting their homemaking programs to assist families with their problems through conferences, visits, teaching materials sent to them, and workshops. In 1943-44 thirteen bulletins, newsletters, and teaching hints were prepared and sent to teachers, and in 1944-45 there were fourteen such publications. In 1943-44 conferences were held to give help on planning a homemaking program, teaching adults, working on a cooperative program on the problems of food production and preservation, and evaluating a homemaking program. In 1944-45 conferences were held on the teaching of child development, on organizing home economics clubs, on home electrification, and on food production and preservation.

In 1943-44 special work was started on improving the total homemaking program. A steering committee composed of a teacher trainer from one of the teachers colleges, the assistant state supervisor, the president of the home economics teachers section of the K. E. A., a home economics teacher and a teacher trainer from the University of Kentucky, who served as chairman, was appointed by the State Supervisor to work on plans for improving the total homemaking program. This committee set up some tentative criteria for a good homemaking program and worked out a very simple rating device for teachers to use in evaluating their own programs. The criteria and rating device were presented to the presidents of the district organizations and suggestions for changes were made. The criteria and rating device were changed in light of the suggestions made and then presented to the teachers at district meetings. Each teacher then rated her program by the rating device. Summaries of the strengths and weaknesses of the programs in the district were compiled. The district summaries were then compiled for the entire state, and the information as to the weaknesses of programs was used in making plans for the workshop held at the University of Kentucky during the last two weeks of June 1944 and for the State program of work for the year 1944-45.

During 1944-45 the activities for improving the total homemaking program included giving help to teachers on techniques of evaluation and on methods of teaching child development. Some ways by which teachers were given help on evaluative techniques and methods of teaching child developments were through conferences, mimeographed teaching materials, individual visits, and workshops at the University of Kentucky.

A major development in the homemaking program during 1943-45 has been the food preservation program. There were 154 school community canneries established in the state and 126 of these canneries were located in schools where there was a vocational home economics department. In these schools the home economics teacher worked cooperatively with the cannery program. She was primarily responsible for the instruction given in the cannery on food preservation. In addition to giving the instruction in the cannery, teachers of home economics worked on promotion of the cannery program, trained special teachers for the cannery, taught small groups canning procedures before coming to the cannery, and gave follow-up instruction to individuals using the cannery.

Another major development during the second semester of the school year 1944-45 was the organization of a State Association of Future Homemakers of America. Previous to this time there had been no state organization for home economics students sponsored by the Division of Vocational Education. The Assistant Supervisor of Home Economics Education was appointed the State Adviser of the new organization. Under her guidance and supervision 88 high school home economics clubs with a membership of 2,530 affiliated with the State and National organizations. As this was a new organization, the work done during the first year was on organization problems. Local clubs worked on suggestions for a name, types of members, degrees of membership, motto, creed, emblem, color, flower, and other problems. Thirteen district organizations were formed at meetings of delegates of clubs within the district. Suggestions worked out by the local clubs were presented at district meetings and selections made of the best suggestions to present at a state meeting. In April 1944 a state meeting composed of two delegates from each district was held for the purposes of electing state officers, of making selections from the suggestions made by the districts on organization problems to be presented at the sub-regional meeting of delegates from five states, and of plans for the State Association. Four delegates from the State Association attended the sub-regional meeting. At this meeting ideas on the organization problems were pooled and ones selected to be presented at a meeting of delegates from each of twelve sub-regions in the United States. The meeting of representatives from all sub-regions was held in June and decisions made concerning the organization. The name Future Homemakers of America was selected for the organization, and the purpose of the organization were set up, as follows:

1. To promote a growing appreciation of the joys and satisfactions of homemaking.
2. To emphasize the importance of worthy home membership.
3. To encourage democracy in home and community life.
4. To work for good home and family life for all.
5. To promote international good will.
6. To foster the development of creative leadership in home and community life.
7. To provide wholesome individual and group recreation.
8. To further interest in home economics.

An organization for Negro home economics students called New Homemakers of America was also started during the second semester of the year 1944-45. The itinerant teacher trainer, Kentucky State College was appointed the State Adviser for this organization. During the year, 19 clubs with a membership of 510, affiliated with the State and National organizations. At a regional conference held in Atlanta, Georgia, two delegates presented a summary of the ideas on organization problems which the 19 clubs submitted. Plans have been made to elect state officers early in the fall of 1945.

Reports from the home economics teachers for the year 1944-45 indicate that more teachers are making an effort to have a total program of

1. Fifty-nine per cent of the programs made some contribution to the elementary program in the development of good food habits. Some ways most frequently reported were: making posters, working with children in lunchroom, lending teaching material, having programs given by home economics girls.

2. Approximately two-thirds of the teachers gave instruction to adults either through organized classes, individual help, sending information to the homes, loaning books, bulletins and equipment, preparing newspaper articles, or having information centers.

3. Approximately one-fifth of the teachers reported giving some instruction to out-of-school youth during the year.

4. In seventy-nine per cent of the schools having a lunch program and a home economics teacher, the home economics teacher assisted with the program. Some ways in which she assisted were: planned or checked menus, advised with lunch manager, supervised the serving of meals, purchased food and other supplies, supervised the entire lunch program, supervised the preparation of meals, kept financial records, and assisted in making the lunch program educational. A number of teachers assisted with lunch programs in other schools in their local school districts.

5. Fifty-two per cent of the teachers reported cooperative work with other agencies in the community on problems of homemaking.

6. Seventy-eight per cent of the teachers reported that they did other work during their period of extended employment besides the supervision of projects. Some of the other work done was: worked with adults, which included home visits, group meetings, newspaper articles, window displays, teaching or supervising in the cannery, loaning books, bulletins and equipment, preparation and distribution of mimeographed material; gave help to girls on problems other than home projects; worked with the Future Homemakers of America organization; worked with community activities such as helping with recreational activities and serving on post-war committees.

Home projects are an integral part of the homemaking program. Table X-v shows the number of distribution of projects, in the various phases of homemaking, completed by pupils during the past two years.

TABLE X-v

Number and Type of Home Projects Completed by Pupils in Vocational Home Economics

Type of Project	Number of Projects Completed					
	1943-44			1944-45		
	White	Colored	Total	White	Colored	Total
Care and guidance of children	641	83	724	730	137	867
Consumer buying	380	73	453	317	60	377
Family and social relations (including recreation)	400	45	445	306	53	359
Health and home care of the sick	331	52	383	263	61	324
Home improvement (interior and exterior)	4,214	452	4,666	4,245	491	4,736
Home Management	725	80	805	659	83	742
Laundering	629	120	749	583	142	725
Personal care and improvement	1,242	141	1,383	1,364	174	1,538
Provision of food for the family	5,353	375	5,728	5,225	424	5,649
Selection, care, construction and renovation of clothing	8,281	341	8,622	8,510	359	8,869
Miscellaneous	423	4	427	1,609	29	1,638
Total number of projects	22,619	1,766	24,385	23,811	2,013	25,824

Table X-v shows an increase in the total number of projects completed in 1944-45 as compared with those completed the previous year. The specific types of projects showing an increase in number completed were care and guidance of children, home improvement, personal care and improvement, selection, care, construction and renovation of clothing, and miscellaneous. Many of the projects listed under the heading of Miscellaneous were those that contributed to several areas of homemaking.

During each year of the biennium a teacher education conference was held. In the fall of 1943 the conference was for the purpose of planning changes that should be made in the pre-service training programs to enable teachers to better carry on homemaking programs that will meet present needs. During the year all institutions training vocational home economics teachers reported some increase in experiences provided for student teachers. Some of the increased experiences reported were with teaching adults, with the cannery program, with the lunch program, and with the home project program. In the fall of 1944, the teacher education conference was devoted to determining what the teacher education group could do to improve instruction in child development and to plan ways of evaluating the teaching of child development.

School Lunch Program

For many years the schools in Kentucky have been concerned with the health of the pupils, and health education has been one of the major goals. A good school lunch program contributes to the general health of children by developing good food habits and by providing foods which are needed

for energy, for regulating the body processes, and for building and repairing body tissues. Very few schools, in the past, have been able to have a good lunch program because of a lack of funds to operate it. In September 1943 the State Department of Education entered into an agreement with the War Food Administration whereby schools could receive reimbursement for part of the cost of food used in the school lunches. In 1943-44 approximately 450 schools participated in this program receiving a total reimbursement of $428,461.72, and in 1944-45, 684 schools participated, receiving a total reimbursement of $852,554.64.

Due to the fact that the program started late in the fall of 1943, many schools were unable to make the necessary arrangements to operate a lunch program during the year. The increase in the number participating in 1944-45 indicates that schools are interested in having a school lunch program as a part of the total school program.

From September 1943 through December 1943 funds from the Governor's emergency fund were used to administer and supervise the program. For the period 1944-46 an annual allotment of $16,800.00 was provided to be used for administering and supervising the school lunch program in public schools. The administration and supervision of the program was under the direction of the State Supervisor of Home Economics Education. Two assistant supervisors were appointed. One of the assistant supervisors worked in the eastern half of the state and the other in the western half of the state.

During the biennium schools have been visited and individual help on school lunch problems has been given; conferences have been held to explain the details of the program; and bulletins have been prepared and sent to all schools, giving help on problems such as making the lunch program educational, planning menus, securing equipment, and purchasing food. The supervisors have also assisted in workshops during each summer of the biennium.

Another important phase of the lunch program was the distribution of donated commodities which were in surplus abundance. During the biennium the following commodities were distributed to superintendents having lunch programs in their schools: apples, green beans, beets, cabbage, carrots, eggs, kale, onions, Irish potatoes, and sweet potatoes. The commodities were shipped to different places in the State. The superintendent of schools in the center where the car was placed acted as the consignee and notified the persons who were to receive the commodities. The allocation of the commodities was made by members of the Supervisory Staff in the State Department of Education.

During the biennium many schools canned food for the school lunch in the school community canneries. Many of the donated commodities were available in large quantities and canning the food was the only way to prevent spoilage and waste. Other foods were also canned, making it possible for schools to have a sufficient food supply to serve adequate meals when food shortages existed.

Trade and Industrial Education. During the period covered by this report, the Trade and Industrial Education service of the State was putting all the emphasis possible on training workers for war production under the War Production Emergency Training Program. However, the regular In-

dustrial Training Program was carried on for day high school students; and the numbers of students taking courses were very gratifying considering how many boys were entering the Armed Forces. Part-time and evening courses were well attended considering the number of people taking special courses for the war effort. Table XI-v shows the enrollment in regular Trade and Industrial classes, and Table No. XII-v shows enrollment in the War Production Training classes for the biennium. Table No. XIII-v shows expenditures for National Defense and War Production Training Programs.

July 1, 1943-June 30, 1944	450,008.74
July 1, 1944-June 30, 1945	336,905.15
Total	$4,228,046.13

The plan of Area Trade Schools for the State is moving steadily forward. During the five years in which emergency War Training Programs were operated, the Area Trade Schools have been supplied with equipment purchased from War Training funds, equipment and buildings transferred from the N.Y.A. Program and Army surplus.

These schools have been equipped with shop machines and tools for instruction in machine shop, sheet metal, auto mechanics, aircraft, electricity, radio, welding, woodwork, etc., valued at $2,500,000.00. This equipment has been turned over to the State at no cost, with the exception of transportation of Army surplus from its original location in war plants to the respective schools.

The Area Trade Schools and the counties covered by each school are as follows:

Ashland Vocational School Ashland, Ky.	7 Counties
Fayette Co. Vocational School Lexington, Ky.	21 Counties
Harlan Co. Vocational School Harlan, Ky.	4 Counties
Hazard Vocational School Hazard, Kentucky	4 Counties
Louisville Vocational Schools Louisville, Kentucky	11 Counties
Madisonville Trade School Madisonville, Kentucky	11 Counties
Mayo State Vocational School Paintsville, Kentucky	15 Counties
Northern Ky. State Vocational School Covington, Kentucky	9 Counties
Owensboro Trade School Owensboro, Kentucky	6 Counties
Tilghman Trade School Paducah, Kentucky	8 Counties
Somerset Vocational School Somerset, Kentucky	13 Counties
Western Trade School Bowling Green, Kentucky	12 Counties
West Ky. Vocational School for Negroes Paducah, Kentucky	All Counties

During this biennium 27,245 students received industrial training in Kentucky in the different types of training offered. The Area Trade Schools are now equipped to carry on the postwar training program for returning veterans, displaced war workers, out-of-school youth and high school students. However, it will take increased appropriations to carry on the training program that is in demand, now that we are in the postwar period. Kentucky has had an industrial expansion during the war, and this trend will continue. Therefore, returning veterans and others must be trained to man the reconverted industries which will provide jobs for Kentucky labor.

Along with "in-school" shop training, extension training for several occupations is carried on by itinerant instructors who travel to the places where the workers are and give supplementary instruction in evening and leisure time classes. The major fields covered at this time are firemen, R.E.A. linemen, miners and shop foremen.

Industrial Arts classes in which high school students get training in the use of general industrial tools have not been very active during this war period because so many of the teachers entered the Armed Forces or were called into industry where they proved to be essential workers. It is planned for the near future, as the teachers become available, to develop general industrial classes in all urban high schools. When these classes

are set up boys can take general industrial training while in high school and then proceed to Area Trade Schools for specific vocational training to prepare them for a job in industry.

Mayo State Vocational School

The Mayo State Vocational School was opened in September, 1938. During the first two years of operation, the school was organized exclusively on the Day Trades School plan. After two years of successfully serving the youth of Kentucky it became necessary, because of the world situation, to start a National Defense Training Program in 1941. This, of course, made it necessary to do some reorganizing of the teaching staff and the curriculum of the school in order to adjust the school to the war needs of the nation. Within the course of time, the war industries began to work in close harmony with the school and the training of young men and women to make the munitions of war. This program, of course, expanded from year to year as the war clouds got darker and the United States became involved in the world crisis. The school has successfully trained over 8,000 young men and women since 1941 for the war industries of this nation. Then too, it has played a major part in the training of young men and women who became connected with the Armed Forces. These young men and women are now in different branches of the service as skilled workmen aiding and assisting in the destruction of the enemy. If a complete story could be written of the Mayo State Vocational School, it could be said that many pages would be filled with lives saved and battles won because of the skilled workmanship of people trained at the Mayo State Vocational School. The value measured, in time of war, of such an institution cannot be determined in dollars and cents. It can only be determined in lives saved, battles won, and principles fought for. The results accomplished thus far from the establishment of the Mayo State Vocational School in 1938, has more than paid for the money expended in the construction and organization of such an institution.

After successfully serving the nation as a War Training Center for a period of four years or longer, it became apparent that War Training was no longer in such great demand from industry. Therefore, it was necessary to organize the institution on the Regular Day School Program as was established in 1938. This organization was started in January, 1945.

Below is a list of courses offered in the Day Trade Program:

Carpentry	Drafting	Mine Mechanics
Auto Mechanics	Cosmetology	Machine Shop
Commerce	Industrial Electricity	Radio
Sheet Metal	Welding	

The Mayo School also offers the following services through regular and itinerary instructors:

1. **Evening Trade Extension Schools or Classes.** The purpose is to increase skill or knowledge in the occupation in which the wage earner is employed, through supplementary instruction given during the leisure time of the workers.

2. **Part-time Trade Extension Classes.** The purpose shall be to increase skill and knowledge in the occupation in which the wage earner is employed, through instruction given during working hours.

3. **Part-time Cooperative Classes.** To provide vocational training in school systems where it would be impractical to erect a trade school or even install unit courses, through cooperation between schools and local employers. The class will be made up of workers from many trades and occupations with one or more in each occupation, depending upon the training needs of the community.

TABLE XIV-v

Enrollment in the Mayo State Vocational School Resident and Extension Courses

Training Courses	Enrollment	
	1943–44	1944–45
Regular Day Trade School	298	311
War Training Program	2,035	530
Trade Extension	1,115	1,260
Total	3,448	2,101

TABLE XV-v

A Financial Report of Mayo State Vocational School

Expenditure Category	1943–44	1944–45
Personal Services	$20,345.00	$17,940.00
Services other than Personal	3,625.00	3,930.00
Materials, Supplies and Parts	5,380.00	4,580.00
Replacements and other Current Expenses	2,150.00	1,720.00
Capital Outlay	3,500.00	1,830.00
Total	$35,000.00	$30,000.00

It has been necessary to curtail the training program at the Mayo State Vocational School because of a decrease in appropriation by the Legislature in operating the institution. To insure an efficient training program, it will be necessary to have more money appropriated by the General Assembly of Kentucky.

The West Kentucky Vocational Training School for Negroes.

The West Kentucky Vocational Training School at Paducah, Kentucky, is designed to provide training opportunities to the end that the Negro youth of the State may equip themselves for employment in worthy vocations.

The school is staffed with a complete faculty, a president, a business manager, a registrar-secretary, a secretary to the business manager, a coordinator, a staff physician, a matron, and five workers.

The following departments are well organized and reasonably well equipped:

Cabinet Making	Home Making
Building Trades	Cosmetology
Auto Mechanics	Barbering
Garment Servicing	Janitorial Service
Welding	Typing and Shorthand

Along with each trade, related subjects are taught to the end that the trainee may attain proficiency and understanding of the vocation and its relationship to the world of work as well as to other desirable activities in which people in a democracy must engage.

Evening classes are provided in order to meet the needs and conveniences of men and women who are regularly or partially employed in industry or as homemakers. This instruction is provided free to all people interested in taking such courses.

Most of the trade courses are set up on a two-year basis. Exceptions are barbering and beauty culture, each of which may be completed in one school year. Welding may also be mastered in a limited period.

Typing and shorthand are now available as two-year courses. Students completing these courses will be capable of holding positions as stenographers and typists. A prefabricated steel foundry building, complete with all molding equipment, has been secured for the school by the Division of Vocational Education; and this trade will soon be available to students.

The school also carries a number of extra curricular activities—music clubs, debating clubs, basketball and football.

Aim and Scope of the West Kentucky Vocational Training School.

The West Kentucky Vocational Training School is operated by the State Board of Education of Kentucky as a vocational school where Negro youth may receive training in trades together with related and supplementary courses. Students who have finished high school are enabled to master a useful vocation and broaden their preparation through related courses and directed study, thereby gaining practical experience in the trade.

While the emphasis of the school is upon vocational training, facilities are provided for such high school work as a given student may desire to satisfy his needs toward high school graduation. Both trade certificates and high school diplomas are granted to those who earn them.

TABLE XVI-v
Enrollment

Years	Students Enrolled
1943-44	125
1944-45	265

The following is a summary of the biennial financial statement of West Kentucky Vocational Training School:

For the School Year 1943-44

Allotted Legislative Appropriation	$40,000.00	
Reimbursement from Vocational Division	3,087.50	
Total funds available for instruction and operation		$43,087.50
Salaries	$27,759.92	
Operation and Maintenance	10,173.37	
Capital Outlay	1,350.00	
Supplies	3,008.16	
Total Disbursements		$42,291.45
Balance		$ 796.05

For the School Year 1944-45

Allotted Legislative Appropriation	$48,250.00	
Reimbursement from Vocational Division	3,302.50	
Total funds available for instruction and operation		$51,552.50
Salaries	$33,379.00	
Operation and Maintenance	12,514.35	
Capital Outlay	944.00	
Supplies	4,092.21	
Total Disbursements		$50,929.56
Balance		$ 622.94

Distributive Occupations Education.

Vocational education in the distributive field is one of the newer phases of vocational education in Kentucky. During the past two years, there has been more than a 50% increase in the number of people served by the distributive education program.

Retailers, wholesalers and others in distributive occupations have been, and are now, faced with many new problems resulting from a war-time economy. The offerings of the Distributive Education program have been shaped to provide the best possible educational service in solving these problems.

A summary of the developments during the past two years includes:

1. Continued expansion in enrollment, types of classes, and in the number of school districts which offer the program.
2. Continued growth of the cooperative part-time classes.
3. A greater degree of cooperation and understanding between business organizations and schools in those communities where Distributive Education training is being conducted.
4. A definite increase in enrollment in the evening classes.
5. The use of itinerant instructors to make available distributive education classes in a greater number of communities.

6. A trend toward the recognition of the Distributive program as part of the schools' total offering.

Cooperative Part-Time. Since 1920 the number of people engaged in retailing has increased more rapidly than in any other field of endeavor. It is estimated that in the State of Kentucky, 10,000 new people are finding their first jobs in the distributive field. The object of the cooperative program is to lay the foundation for store or other distributive work as a vocation.

The cooperative program is offered as a part of the standard high school curriculum. The subject matter is based on actual needs and experiences of the pupils, and the instructors for the classes have had work experience in retail stores. Each student spends fifteen hours a week in school and a minimum of fifteen hours a week in store work. The program is coordinated by the teacher, through frequent contacts with the employer as well as the employee on the job in the store. Thus the student not only receives vocational training in school, but also is supervised in his first job by the school.

Evening. According to the latest census report, more than 100,000 people in the State of Kentucky are engaged in a distributive trade. The function of this ever increasing group is to provide consumers with goods and services. The purpose of the evening program is to improve the skills and abilities of those engaged in a distributive vocation, so that they can offer the best possible service to the consumer. Classes are organized on the basis of needs of the workers and are taught by people with expeperience in the particular field. Courses are organized to meet the needs of three groups; first, conferences and clinics for owners, managers and store executives. The programs are designed to aid in the solution of store operation problems; second, sales courses for experienced workers. These include classes in merchandise studies, sales techniques, display techniques, store arithmetic, store English and the like; third, classes for those with little or no experience. These include pre-employment training classes, classes to improve workers on their present jobs, and supplementary training classes to advance workers to other jobs in the trade.

TABLE XVII-v

Number of Students in Distributive Education

School Year	Part-Time Cooperative	Part-Time Extension	Evening Extension	Total
1943-44	611	7,412	3,217	11,240
1944-45	691	6,204	1,063	7,958

Division of Vocational Rehabilitation and Special Education

Scope and Function

The State Board of Education of the Commonwealth of Kentucky, in cooperation with the United States Government, provides Vocational Rehabilitation services for mentally and physically impaired individuals. Such services include vocational and college training, physical restoration, psychological and psychiatric services, fitting of prosthetic appliances, aptitude and intelligence testing, counselling, guidance, and placement. All services are performed in order to prepare individuals for more remunerative employment in the occupation in which they are best fitted to earn a living.

The philosophy underlying the program of Vocational Rehabilitation is based on the belief that the extension of special services to the physically handicapped will assist in equalizing their opportunities. During the fiscal year 1943-44 and 1944-45, this division, through its local district supervisors, was able to render rehabilitation services to 2,418 individuals in the Commonwealth of Kentucky. Kentucky exceeds all the other states of Region IV and V in the number of rehabilitated persons. The State is divided into eleven districts for vocational rehabilitation services, with district offices in the following places: Paducah, Harlan, Madisonville, Owensboro, Bowling Green, Louisville, Lexington, Somerset, Ashland, Covington, and Hazard.

The cooperative relationship of other agencies with Vocational Rehabilitation has been very desirable. The service of this program is extended to every county and community in the State. Because of the increasing demands of special services to individuals it has become more and more necessary for better relationships to be worked out with other social agencies.

During the fiscal years 1943-45 the State of Kentucky spent $101,000 for Vocational Rehabilitation. The federal government allotted to Kentucky $311,488.97. Federal funds unmatched and reverting amounted to $37,717.79.

In order for the program to fully meet the needs of the vocationally handicapped there should be appropriated not less than $100,000 annually for the next biennium 1946-47—1947-48.

The Federal government expended an amount over 3 times the state expenditure. Without a single exception during 1943-45 every state bordering Kentucky expended more for Vocational Rehabilitation services than did Kentucky. The added responsibility alone of serving the blind fully justifies the increase in state appropriations. The problem of handling service for blind is quite expensive because of specialized service required in assisting them in physical restoration and training. The added responsibility of providing physical restoration, medical treatment, psychiatric and psychological services, and services for the blind makes it imperative if Kentucky is to meet the needs of its less fortunate handicapped citizens.

Handicapped Children

The Kentucky Legislature in 1934 established the Division of Vocational Rehabilitation and Special Education in the Department of Education. Special Education is charged with the responsibility of rendering special service to handicapped children and citizens throughout the state in order that they may be trained for some specific vocation. The program of Special Education is administered by the State Board of Education in cooperation with local county and independent boards of education. Many schools in Kentucky furnish transportation and tutorial services to the handicapped group on the same basis as instruction is furnished to the normal school child. It has been estimated that approximately 1,500 children are being trained by special teachers or tutorial training in the home. Since the training and education of a handicapped child costs more than that of normal children, it is the responsibility of the State to provide such education and bear the additional cost involved.

Kentucky School for the Blind

The State Board of Education operates the Kentucky School for the Blind located in Louisville, Kentucky. This institution has been serving in that capacity for over 100 years. The educational program of this institution includes instruction in all the elementary subjects, as well as accredited high school work. Some of the subjects included in such an educational program are: music, home economics, commercial work, and other types of vocational courses. The Vocational Rehabilitation Division, in cooperation with the Kentucky School for the Blind, has been able to assist their graduates in additional training and also in seeking employment in various fields of endeavor. Any child between the ages of 6 and 18, having visual handicap which prevents his attendance at the public schools, and being a resident of the State of Kentucky, is eligible for admittance.

The annual appropriation for operation of the Kentucky School for the Blind has been $82,000. An increase to $111,000 annually is being requested. The School which has been serving approximately one hundred fifty pupils should have an increased enrollment, since a recent study in the Department of Education showed 293 blind children of school age as not enrolled in any school. The increase requested would also be used to increase salaries of teachers and other personnel whose salaries are inadequate and to meet costs of much needed improvements in the physical plant.

Kentucky Workshop for the Blind

The Kentucky Workshop for the Adult Blind is located at Louisville, and offers training and employment to adults. This agency is engaged in the manufacture of such articles as brooms, broom bags, mops, etc., which are sold to jobbers on the open market. During the war period they have made a direct contribution not only in production, but also in offering employment opportunities to a large group of blind adults.

The Workshop serves as a training agency for those individuals who desire to be employed later in industry. It will be the responsibility of the Kentucky Workshop to train a much larger group of blind persons in the future.

In Cooperation with Vocational Rehabilitation

Vending Stand Program

The Division of Vocational Rehabilitation is the agency in the State authorized to license vending stands operated by the blind. These vending stands are small businesses operated by blind people and provide good opportunities for this group of handicapped individuals. The vending stands are provided through vocational rehabilitation and the program is supervised by special personnel of the rehabilitation program. There are now forty such employment opportunities in the state.

It is anticipated that the program be expanded within the next two years so that there will be about one hundred fifty vending stands providing work opportunities and independence for blind persons.

THE BUREAU OF FINANCE

Under the administration of the State Board of Education and the State Superintendent of Public Instruction, the former fourteen divisions of the State Department of Education have been reorganized into four bureaus effective as of July 1, 1944. The Bureau of Finance includes the Division of Finance and the Division of Census and Attendance, which are more directly concerned with the over-all supervision, accounting and auditing of school finance and statistics. The Bureau of Finance is charged with all control and expenditure records for each of these fourteen divisions—103 accounts in all.

Space necessarily limits written accounts of various activities, functions and accomplishments of the Bureau of Finance during the two-year period covered by this report. However, certain tables displayed herein portray partial measures of the scope, status, and results with reference to finance, census and attendance.

Division of Census and Attendance

The two chief areas of action of the Division of Census and Attendance during the biennium ending June 30, 1945, were first, a continuation of the work of the preceding biennium with special emphasis upon maintaining a complete and accurate school census; and second, an intensive study of the causes of non-enrollment and irregular school attendance in the state. During this period a strong effort was made to focus attention of the school people and the public upon the obstacles to non-enrollment and irregular attendance with the view of eliminating as many of them as possible.

School Census

The state lost 35,257 census children during this biennium. The county districts lost 29,731 of this number and the independent districts lost 5,526. During the preceding biennium the county districts lost 35,651 and the independent districts lost 9,836. The county districts lost almost 14 per cent of their census children from 1940 to 1945 and the independent districts lost slightly more than 8 per cent during the same period. The rural areas show the greatest census loss, as indicated by Table I-c:

TABLE I-c

Number of Census Children by County and Independent Districts from 1940 to 1945

Year	County	Independent	Total
1940	547,575	230,854	778,429
1941	536,362	227,017	763,379
1942	523,915	221,189	745,104
1943	500,711	217,181	717,892
1944	488,176	216,014	704,190
1945	470,980	211,655	682,635

Only six county districts reported a gain in school population from 1943 to 1945. These counties reported a total gain of 930. Jefferson County accounted for 583 and Daviess County 121. Campbell and Shelby Counties gained 92 each. Clark County gained 28 and Montgomery County 14. During this biennium fifty-one independent districts gained 1,743. Newport, Catlettsburg and Bowling Green showed about one-third of this gain. The school population loss in the remaining districts amounted to 37,930.

The decrease in school census was due largely to the migration of families to industrial centers. From May, 1940, to April, 1945, the state lost 95,794 census children. The loss during this period can be attributed to the impact of war which resulted in a large number of war workers migrating to war-industrial plants. Now that the war is over, it is contemplated that a large number of these migrants will return to their native state in the not too distant future.

School Enrollment

The decrease in public school enrollment during the biennium ending June 30, 1945, was 33,954 compared with a census-loss of 35,257 for the same period. It is important to note, however, that for the school-year 1944-45 the loss in school census was 21,355 compared with an enrollment loss of only 4,920. During this last year of the biennium, independent districts reported a slight gain in enrollment over the preceding year. These data indicate an upward trend in enrollment, when compared with the census, since 1944. The table which follows shows the public school enrollment by county and independent districts from 1940 to 1945:

TABLE II-c

Number of Children Enrolled in Public Schools of County and Independent Districts from 1940 to 1945

Year	County	Independent	Total
1940	426,510	182,111	608,621
1941	418,324	181,143	599,467
1942	404,567	176,738	581,305
1943	389,195	172,649	561,844
1944	366,643	166,167	532,810
1945	361,472	166,418	527,890

During the school-year 1944-45, a survey was made to determine the number of children of school census age that enrolled in private and parochial schools for that year. It was found that 11,675 census children enrolled in county districts and 29,508 in independent districts, thus making a total of 41,183 children from 6 to 17, inclusive, enrolled in private and parochial schools of the state. It was found also that 1,048 children from 6 to 17, inclusive, were enrolled in other schools and colleges of the state. When these numbers are added to the public school enrollment of 527,890, we find a total of 570,121 children enrolled in the schools of the state for the school-year 1944-45.

Average Daily Attendance

The decrease in enrollment was paralleled by a decrease in average daily attendance until the year, 1944-45. Table III-c shows the average daily attendance for county and independent districts since 1940:

TABLE III-c

Average Daily Attendance From 1940 to 1945

Year	County	Independent	Total
1940	338,290	154,920	493,210
1941	330,023	152,002	482,025
1942	319,781	147,837	467,618
1943	293,299	140,311	433,610
1944	278,015	136,442	414,457
1945	277,294	138,184	415,478

It is significant to note that the average daily attendance increased 1,021 for the state from June 30, 1944 to June 30, 1945. This increase occurred in spite of the fact that the state lost 21,355 in school census and 4,920 in school enrollment. This increase is more significant when the method of securing the average daily attendance for the school-year 1944-45 is taken into consideration. Prior to 1944-45, the average daily attendance was found by dividing the aggregate days attendance by the actual number of days taught. In 1944-45, the average daily attendance was found by dividing the aggregate days attendance by the minimum term length for the district. The method used for 1944-45 gives a lower average daily attendance for those schools which failed to teach the minimum term length than would have been the case had the former method been used. This means that if the former method had been used in calculating average daily attendance for this year, the state would have shown a greater increase.

Number Promoted and Retained in Grades 1 to 8, Inclusive

Table IV-c tells a dismal story of the penalty a child has to pay when he does not have a standard school term:

TABLE IV-c

Number Children in Grades 1 to 8 Promoted and Number Not Promoted At Close of 1944-45 School Terms, With Data Given On Basis of Term Length

Months in School Term	Total in School	Promoted		Not Promoted	
		Number	Percentage	Number	Percentage
7 and 7½	162,312	119,969	73.92	42,343	26.08
8 and 8½	94,185	73,995	78.56	20,190	21.44
9, 9½ and 10	149,333	130,748	87.55	18,585	12.45
Total	405,830	324,712	80.01	81,118	19.99

The first group of figures in this table shows that of the 162,312 pupils in schools with terms of 7 months and 7½ months 42,343 failed to pass their grades. This means that more than one out of four children in these counties had to spend at least two years in a grade. The third group of figures in Table IV-c shows that the pupils in schools with 9, 9½ and 10 months are more fortunate, since in this group less than one out of eight has to stay in one grade for more than one year. Said in another way, a boy who lives in a community able to provide a term of only seven months has one chance in four that he will have to spend two years in a grade, while there is less than one chance in eight that a boy who lives in a community with a 9, 9½ or 10 month school term will have to stay in school more than one year. Think of it: In 7 and 7½ month school terms the loss in human growth is 26 per cent, in 8 and 8½ month school terms the loss is 21.44 per cent, while in 9, 9½ and 10 month school terms the loss is only 12.45 per cent.

Causes of Non-Enrollment and Irregular Attendance

Non-enrollment and irregular attendance are critical problems that should be considered in determining the effectiveness of the public schools of the state. The Division of Census and Attendance in 1944-45 attempted to survey the state to ascertain the extent and causes of non-enrollment and irregular attendance. First, forms were mailed to all of the 257 school districts calling for the number of census children by age, grade, sex, and race not enrolled in the county or independent school districts. Reports on non-enrollment from five counties and twelve independent districts had not been received when this report was made. However, these seventeen districts not reporting are so widely distributed that they should not seriously affect the conclusions that may be drawn. Second, a survey of attendance was made to determine the causes of absenteeism. Fifty-three counties and thirty-six independent districts participated in this survey. The tables which follow show the results of these two surveys and indicate why children do not enroll in school and why they do not attend regularly when enrolled.

Non-enrollment. Table V-c shows that in the counties 83,182 white and 3,587 colored children, or a total of 86,769, were not enrolled in any school in 1944-45; and in the independent districts 20,411 white and 4,800 colored children, or a total of 25,211, were not enrolled. Over 111,980 children in the state were not enrolled for various causes.

* This Table includes the non-enrollees reported by all the districts in the state except five counties (Casey, Henderson, Madison, Knott and Woodford) and twelve independent districts (Berea, Central City, East Bernstadt, Hikes, Lone Jack, Ludlow, Nicholasville, Paducah, Pikeville, Prestonsburg, Somerset, and Versailles).

Table VI-c shows the numbers and percentages of children by ages not enrolled in any school in the counties and independent districts studied. It is seen that of the 55,934 census children six years of age, 17,173 or 30.7 per cent were not enrolled. This group accounted for 15.33 per cent of the non-enrollees. There were 64,112 children sixteen and seventeen years old not enrolled in any school. This group accounted for 57.25 percent of the non-enrollees. The six, sixteen and seventeen year olds who failed to enroll in any school comprise 72.58 per cent of all non-enrollees. It should be remembered that these age-groups are not covered by the compulsory attendance law.

TABLE VI-c

Number of Census Children, Number Not Enrolled, Per Cent of Census Not Enrolled, and Per Cent of Non-Enrollees of Each Age-Group for School-Year, 1944-45*

Total	682,635	111,980	16.40	99.95

* See footnote in Table V-c.

Irregular Attendance. Tables VII-c and VIII-c show a summary of valid and invalid causes of absences in fifty-three county and thirty-six independent districts studied intensively by means of a special survey of these districts. About 46 per cent of valid absences as shown in Table VII-c was caused by illness of children or illness and deaths in families, quarantines, lack of clothing, weather conditions, and failure of transportation systems to operate. But approximately 54 per cent of the 2,190,855 pupil-day absences was due to invalid causes. Note the list of valid and invalid causes indicated in first column in Table VII-c:

TABLE VII-c

Number of Absences Due to Valid and Invalid Causes as Reported by 53 County and 36 Independent Districts for School-Year, 1944-45

VALID CAUSES	County Districts		Independent Districts		Co. and Ind. Districts	
	No. Days	Per Cent	No. Days	Per Cent	No. Days	Per Cent
Illness of Child	463,502	26.21	238,943	56.48	702,445	32.06
Illness in Family	60,134	3.40	21,652	5.11	81,786	3.73
Death in Family	8,403	.47	5,287	1.24	13,690	.62
Reporting to Court	2,402	.13	551	.13	2,953	.13
Quarantine	6,489	.36	2,723	.64	9,212	.42
Lack of Sufficient Clothing	16,598	.93	4,886	1.15	21,484	.98
Weather Conditions	129,692	7.33	13,812	3.26	143,504	6.55
Transportation (Failure of Bus to Run)	37,232	2.10	3,843	.90	41,075	1.87
Total Valid Causes	724,452	40.98	291,697	68.95	1,016,149	46.38
INVALID CAUSES						
Indifference of Parents	292,385	16.53	45,987	10.87	338,372	15.44
Truancy	56,348	3.18	15,604	3.68	71,952	3.28
Poverty (Other than Lack of Sufficient Clothing)	8,204	.46	1,665	.39	9,869	.45
Working Without Permit	404,286	22.86	16,241	3.83	420,527	19.19
Visiting	35,933	2.03	13,062	3.08	48,995	2.23
Transportation (Missed Bus)	25,832	1.46	1,227	.29	27,059	1.23
Distance	40,870	2.31	2,878	.68	43,748	1.99
Miscellaneous	179,507	10.15	34,677	8.19	214,184	9.77
Total Invalid Causes	1,043,365	59.01	131,341	31.04	1,174,706	53.61
Total Absences	1,767,817	99.99	423,038	99.99	2,190,855	99.99

Table VIII-c reveals that 702,445 pupil days were missed in these districts due to certain diseases and injuries. Diseases caused 673,090 pupil days to be lost and injuries caused 29,355 pupil days to be missed—16,749 pupil days were caused by injuries at home alone. It is evident that more effective attendance laws and better health and safety programs could greatly reduce non-enrollment and increase attendance throughout the state.

TABLE VIII-c

Number and Types of Absences Due to Illness as Reported by 53 County and 36 Independent Districts for School-Year, 1944-45

Total	463,502	99.92	238,943	99.93	702,445	99.94

School people, working alone, cannot solve all the attendance problems. When a child fails to enroll in school or does not attend regularly, there is always a maladjustment which should be located and remedied. The difficulty may arise from the physical condition of the child, from his mental attitude or outlook, from unwholesome home conditions, from lack of parental interest, from poor teaching and teaching facilities, or from any combination of these or other factors. This problem in many respects is a social and economic problem. The problem of school attendance can be considered solved only when every child who should be enrolled is in regular attendance, well adjusted in school, making satisfactory progress in his school work, and developing into an effective and efficient citizen of the community, state and nation. The solution of this problem requires the united efforts of all citizens.

Division of Finance

Equalization Fund

The following Table I-f concerns the distribution of the special State Equalization Fund of $1,500,000 appropriated by the General Assembly of 1944, for the purpose of aiding school districts whose total net recurring revenue was not sufficient to yield as much as $40 per pupil in average daily membership. The amount of recurring revenue for each district was obtained from its annual financial report of June 30, 1943.

This money was allotted to 60 counties and 18 independent districts for the school year of 1944-45 as compared to $399,999.95 distributed to 32 counties and 5 independent districts in 1943-44.

For the school year of 1945-46 the Equalization Fund of $1,500,000 is being distributed to 57 counties and 12 independent districts, as shown in Table II-f below. The net total recurring revenue or ability to pay in 1943-44, upon which the 1945-46 Equalization Fund was distributed for these districts was $6,899,411, and the total average daily membership used was 219,857 or an average of $31.38 per child; while that for 1942-43, upon which the 1944-45 Fund was distributed, was $7,281,247 and the A. D. M. was 242,492 or an average of $30.03 per child. This means that on the average each district receives about $1.35 less per child in average daily membership in 1945-46, than was received in 1944-45.

Equalization Fund Law

The Constitution of the State of Kentucky was amended in 1941 permitting the distribution of state school funds on some bases other than per capita but in a ratio not to exceed 10 per cent of the total appropriation. The Act authorizing this distribution on a need-ability basis is as follows: "Any board of education that has had its budget and salary schedule approved by the State Board of Education, whose ratio of assessed valuation of property to fair cash value is equal to the average ratio throughout the state, as certified to the State Board of Education by the Kentucky Tax Commission, and has levied for school purposes a tax of at least seventy-five cents on each one hundred dollars of property subject to local taxation and not less than the ad valorem tax levy made for the school year 1943-44, shall have the privilege of applying for aid from this special fund. Such application shall be filed with the Superintendent of Public Instruction on or before January 15 prior to the beginning of the school year for which such aid is requested, except the year 1944 and previous to May 15, 1944.

The Superintendent of Public Instruction shall make a careful study to determine the amount of revenue that is available annually for the education of each child in average daily membership in the public schools in each school district in Kentucky. This study which shall be used as a basis for the distribution of moneys from the special fund shall be based upon records and reports for the school year ending June 30 immediately preceding. For the purpose of this study the Superintendent of Public Instruction shall include all recurring state and local revenues accruing to the board of education and shall calculate the local income at the rate of seventy-five cents per one hundred dollars of property subject to local taxation, or on the basis of the 1943-44 ad valorem tax levy if it is greater than seventy-five cents. This study shall be made annually in the same manner. If the Superintendent of Public Instruction finds that a board of education is unable to provide an average of forty dollars per year for the education of each child in average daily membership in its district,

* The ratio that would have distributed the total $1,500,000, is 79.1594645. However, 79.0 was used which distributed $1,496,977.25, leaving a remainder of $3,022.75 to be distributed later when the seventh check is issued.
** Did not qualify.
[1] Districts are ranked as to their need-ability indices.

then the Superintendent of Public Instruction with the approval of the State Board of Education shall prorate from the funds appropriated for this purpose an amount sufficient to enable each board of education to provide an income of forty dollars per year for the education of each child in average daily membership in such school district. In the event that the amount appropriated for this purpose is not sufficient to permit an allotment to each board of education of the full amount necessary to provide an income of forty dollars per year per pupil in average daily membership, then the amount appropriated shall be distributed to all school districts which qualify for such aid on a percentage basis to be determined by the ratio of the funds appropriated for this purpose to the total amount necessary to provide an income of forty dollars per child in average daily membership in the public schools of the entire Commonwealth."

Program Supplemented by Equalization Fund

School districts participating in the Equalization Fund are being definitely benefited by this additional aid. A better education program has been provided which enables these districts, (a) to increase teachers' salaries, (b) employ additional teachers to reduce the heavy teaching load, (c) provide a **helping-teacher** program, (d) lengthen the school term, (e) extend library service, (f) purchase more instructional supplies, (g) extend the community health-co-ordinator program, (h) improve the sanitary conditions in schools, and (i) improve other local conditions in these schools through the cooperation of the State Department of Education.

Length of Rural School Term

The mean average independent school terms expressed in months, for the last three years are as follows: 1943-44, 8.94; 1944-45, 9.08; and 1945-46, 9.10. During these same years the average terms for the county schools were 7.55, 7.69, and 7.75 months respectively. Within these years the respective averages for all independent and county districts in the State are 8.24, 8.38, and 8.42 months. In 1943-44 there were 72 county districts with 7-month terms. By 1944-45 this number had been reduced to 55, and 1945-46 there are only 46 counties now operating on 7-month terms. The chief factor affecting the length of the school term is the lack of available revenue. However, the Equalization Fund has made possible many of these increases. Of these 72 counties increasing their 7-month school terms, 23 participated in this Fund and two others increased their terms from 7 1/2 to 8, and from 8 to 9 months. Only 7 counties not receiving this aid lengthened their school terms.

Per Capita

The Legislature in 1942 appropriated $9,700,000 for the school year of 1943-44. But in 1944 it appropriated $3,000,000, supplementing the 1943-44 appropriation for the express purpose of increasing teachers' salaries for that year. It was distributed to each district on a per capita basis, according to its official census figures. Then the district allotted its proportionate part to each of its teachers' equal monthly payments throughout the 1943-44 school year.

In 1944 the Legislature also appropriated $15,000,000 for each of the school years of 1944-45 and 1945-46, ten per cent of which was distributed to less able districts "for equalizing educational opportunities." The regular per capita going to all districts in the State for these two respective years was $19.16 and $19.77 per census child, as compared to $13.49 for 1943-44.

Teachers' Salaries

The teachers' salaries for 1944-45 and 1945-46 have been materially increased over previous years. To illustrate median annual salary for all county and independent school districts including elementary and high schools was $782 in 1942-43, while in 1944-45 it was $1,094, or an annual increase of $312. The salaries for 1945-46 are approximately the same as in the preceding year.

There is still too much difference between the salaries of elementary and high-school teachers where training and experience are similar. As salaries have been increased the differentials between these two groups have remained about the same. In 1942-43 the average salary of all elementary teachers in the public common schools was $676, while that for the high schools was $1,139. In comparing the same two groups for 1944-45, the average salary for the elementary was $984, and that for the high-school teachers was $1,456. Even though salaries were higher in 1944-45 than in 1942-43, still the differentials remain substantially the same—$463 and $472 respectively. This is true, regardless of whether teachers are white or colored.

Throughout the history of public schools in Kentucky there have been differentials between the salaries of white and negro teachers on both elementary and high-school levels. However, this practice is being reduced rapidly. In 1944-45 it was found that 32 independent and 1 county district had such differentials. Through persistent efforts on the part of those districts substantial gains were made. In 1945-46, 13 districts eliminated differentials, 13 reduced them to a marked degree, and only 6 independent and one county made little or no changes. Most of these districts are striving to raise all their teachers to equal pay for equal training, experience, and extra service. Budgetary limitations seem to be the only preventive.

Property Assessments

There has been a seeming up-trend in the corporate and non-corporate property valuations in the State as indicated by the medians of assessed valuation per census child during the last three bienniums. The district medians are shown in table below:

Districts	1940–41	1942–43	1944–45
County	$1,475	$1,676	$2,000
Small Independent[1]	1,891	2,050	2,354
Large Independent[2]	2,406	2,583	2,875
State-at-large	1,841	2,020	2,267

[1] Embrace cities smaller than those of first four classes.
[2] Embrace cities of first four classes.

Extreme cases below depict glaring differences in the valuation of corporate and non-corporate property behind each per census child among these districts in the fiscal year of 1944-45.

1. County:
   (a) Woodford, $10,717, with a tax rate of 30c.
   (b) Clinton, $408, with a tax rate of 75c.
2. Small independent:
   (a) Anchorage, $8,663, with a tax rate of 75c.
   (b) Gatliff, $205, with a tax rate of $1.25.
3. Large independent:
   (a) Fort Thomas, $9,132, with a tax rate of 97c.
   (b) Corbin, $1,129, with a tax rate of $1.50.

These variations are indicative of the wide range in the inequalities of education opportunities throughout the State.

Total State School-District Liabilities

The total liabilities of all public common school districts for the State of Kentucky, including voted bonds, funding bonds, holding company bonds and all other liabilities, have been substantially reduced during the last four fiscal years. The array of total state liabilities of all districts is displayed as follows:

Year	Total Liabilities	Differences Over Preceding Years
1941-42	$17,488,918.48	$ —67,905.77
1942-43	16,240,766.47	1,248,152.01
1943-44	14,423,666.51	1,817,099.96
1944-45	13,585,402.22	838,264.29

The minus quantum shown for 1941-42 indicates that liabilities were on the increase at that time. However, for the last three years there has been a decline in total liabilities from $17,488,918.48 to $13,585,402.22 or a mean annual average decrease of $1,301,172.07. This shrinkage has been effected largely by an increase in Equalization Fund, and also in per capita, thus releasing a large proportion of property revenue, previously allocated for teachers' salaries, to be used for other school purposes.

Financial Statement
Superintendent of Public Instruction
Fiscal Year Ended June 30, 1944

Amount appropriated for the year		$60,000.00
Add: Transfer from Vocational Education		184.48
